Mr. CASEY. It has not, because I do not know whether or not Mr. SIMMONS has inserted this matter into my remarks.

Mr. CRAMTON. The action the gentleman is taking, as I get it from what the gentleman has read, seems to lead to some question of the course of the gentleman from Nebraska, and I do not feel, in the absence of the gentleman from Nebraska and without conversation with him, that the gentleman from Pennsylvania ought to make that request, and I should be obliged to object. If the gentleman will take it up when the gentleman from Nebraska is here, I shall have no objection.

Mr. CASEY. I would like to ask what has the gentleman from Nebraska got to do with my remarks; why should I go to see him about it? This is a violation of the rules of the House.

Mr. CRAMTON. I understand, Mr. Speaker, if I caught it correctly from the reading by the gentleman, that the language the gentleman objects to now is not language that appears in the RECORD as coming from the gentleman from Pennsylvania, but appears in the RECORD as coming from the gentleman from Nebraska [Mr. SIMMONS].

Mr. CASEY. That is correct.

Mr. CRAMTON. As the gentleman wants to strike out something that is in the RECORD as coming from the gentleman from Nebraska [Mr. SIMMONS], I should have to object unless the gentleman from Nebraska were present to look after the matter himself.

Mr. CASEY. Mr. Speaker, I do not know whether this language which I am complaining about was inserted in my speech

by the gentleman from Nebraska, nor do I know by whom it was inserted, whether it was inserted down in the Government Printing Office, or where. I have no right to assume that the gentleman from Nebraska did insert this language in the RECORD in violation of the rules of the House.

Mr. CRAMTON. But the inference would remain that it was improperly inserted by the gentleman from Nebraska [Mr. SIMMONS], and this action I would have to object to if taken in the absence of the gentleman from Nebraska [Mr. SIMMONS].

Mr. GARRETT of Tennessee. Will the gentleman from Pennsylvania yield?

Mr. CASEY. Yes.

Mr. GARRETT of Tennessee. I understand the situation is this: While the gentleman from Pennsylvania was addressing the Committee of the Whole he yielded, in response to a request of the gentleman from Nebraska, for a question; that question was asked and answered and the remarks went to the gentleman from Pennsylvania for revision. They were revised and handed to the messenger from the Printing Office, and somewhere between the office of the gentleman from Pennsylvania and the Printing Office there was inserted other matter in the question of the gentleman from Nebraska which left the answer of the gentleman from Pennsylvania confused and placed him in an improper light as to the question before the House. Words appeared in the RECORD which were not uttered on the floor of the House and were not in the manuscript at the time the gentleman from Pennsylvania revised the manuscript, so that he had no opportunity to make his answer properly responsive to the question.

Mr. CRAMTON. If the gentleman will yield, my only suggestion is that since the gentleman from Nebraska [Mr. SIMMONS] is referred to in the matter, that the gentleman defer his request until a little later, when the gentleman from Nebraska is here.

Mr. GARNER of Texas. Suppose the gentleman from Nebraska [Mr. SIMMONS] admitted that he inserted this himself. The House would undoubtedly authorize it to be stricken from the RECORD.

Mr. CRAMTON. Let us wait and let the gentleman from Nebraska speak for himself. There is the day before us, when it can come up later, just as well as now.

Mr. CASEY. I have no desire to press this matter if that is the wish of the House, but the gentleman from Nebraska is in the Speaker's lobby at the present time, or he was there two minutes ago.

Mr. LINTHICUM. Mr. Speaker, I make the point of order of no quorum until the gentleman from Nebraska can come in.

The SPEAKER. Does the gentleman from Maryland make a point of order of no quorum?

Mr. LINTHICUM. I do.

Mr. MADDEN. We have sent for Mr. SIMMONS to come in.

Mr. CASEY. At the suggestion of the gentleman from Michigan I will temporarily withdraw my unanimous-consent request and make it later on.

The SPEAKER. The gentleman from Pennsylvania temporarily withdraws his request.

Mr. LINTHICUM. And I withdraw my point of order.

CONFERENCE REPORT—TREASURY AND POST OFFICE DEPARTMENTS APPROPRIATION BILL

Mr. MADDEN. Mr. Speaker, I call up the conference report on H. R. 10635, making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1929, and for other purposes, and I want to say in that connection, Mr. Speaker, that there was only one amendment offered to the bill by the Senate. The Senate receded from that amendment in conference and the bill which is now before the House is exactly the same as it was when it left the House.

The SPEAKER. The gentleman from Illinois calls up a conference report, which the Clerk will report.

The Clerk read the conference report and statement.

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10635) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1929, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1 and 2.

MARTIN B. MADDEN,
M. H. THATCHER,
JOSEPH W. BYRNS,
Managers on the part of the House.
F. E. WARREN,
REED SMOOT,
LEE S. OVERMAN,
WM. J. HARRIS,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the bill (H. R. 10635) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1929, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and embodied in the accompanying conference report as to each of such amendments, namely:

On Nos. 1 and 2, relating to labor-saving devices for the Post Office Department: Appropriates $700,000 as proposed by the House, instead of $736,000 as proposed by the Senate, and strikes out the authority, inserted by the Senate, for the purchase and repair of automatic postage-service machines.

MARTIN B. MADDEN,
M. H. THATCHER,
JOSEPH W. BYRNS,
Managers on the part of the House.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

TREASURY AND POST OFFICE DEPARTMENTS APPROPRIATION BILL

Mr. MADDEN. Mr. Speaker, I offer a concurrent resolution (H. Con. Res. 25) and ask for its immediate consideration.

The SPEAKER. The gentleman from Illinois offers a concurrent resolution, which the Clerk will report.

The Clerk read as follows:

HOUSE CONCURRENT RESOLUTION 25

Resolved by the House of Representatives (the Senate concurring), That the Clerk of the House of Representatives is authorized and directed, in the enrollment of H. R. 10635, "An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1929, and for other purposes," to make the following changes in the engrossed bill:

On page 20, line 13, after the word "act," where it occurs the first time, insert the words ", as amended."

On page 20, line 24, after the word "act," insert the following: "and for carrying out the applicable provisions of the act approved March 3, 1927 (Stat. L. v. 44, p. 1381)."

On page 20, line 25, after the word "officers," insert the word "attorneys."

On page 21, line 1, after the word "supervisors," insert the following: "gaugers, storekeepers, storekeeper-gaugers."

On page 22, line 9, after the syllable "tions," insert the word "prescribed."

On page 22, line 14, strike out the word "bonds" and insert the word "bonded."

Mr. MADDEN. Mr. Speaker, I want to make a brief statement in explanation of this resolution, so it will be thoroughly understood and may be a part of the history showing the reason we are proposing the adoption of the concurrent resolution.

The concurrent resolution which has just been read makes five textual changes in the paragraph for the Bureau of Prohibition and the enforcement of the narcotic acts. None of the amendments adds or subtracts from the existing law affecting the service. Two of the amendments are to correct errors which have crept in in the printing of the bill at some stage of its passage.

The other three amendments are to clarify the text of the paragraph so as to make it conform to the requirements of the accounting laws. These three amendments result from the establishment of the prohibition enforcement as a separate bureau. They were deemed unimportant at the time the bill was framed in the House, and they may not be important now, but it is deemed advisable to have them made so that there may not be any criticism of the technical features of the language. In my judgment they are not absolutely essential, but for the

purpose of clarification and to prevent technical interpretations they are desirable.

Mr. GARNER of Texas. What is the enlargement of the law with reference to officers and attorneys? Does it enlarge the opportunity of fixing salaries in that respect?

Mr. MADDEN. Attorneys are provided for in the law and are specified, but they are not specified in the appropriations, and it was to clarify the whole situation that we wanted to make the statement clear.

Mr. GARNER of Texas. Is this entirely agreeable——

Mr. MADDEN. Yes; it is absolutely agreeable. It does not make any change except textual changes.

The SPEAKER. The gentleman from Illinois asks unanimous consent for the present consideration of the resolution. Is there objection?

There was no objection.

The resolution was agreed to.

INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. CRAMTON. Mr. Speaker, I call up the conference report on the bill (H. R. 9136) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1929, and for other purposes, and ask unanimous consent that the statement may be read in lieu of the report.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9136) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1929, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 23, 27, 28, 30, 31, 33, 34, 35, 36, 38, 39, and 52.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 5, 7, 8, 9, 11, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 25, 26, 37, 42, 43, 44, 45, 47, 48, 49, and 50, and agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "; second, to reimbursing the United States for the cost of the San Carlos irrigation project; third, to payment of operation and maintenance charges, and the making of repairs and improvements on said project: *Provided further*, That reimbursements to the United States from power revenues shall not reduce the annual payments from landowners on account of the principal sum constituting the cost of construction of the power plant or the project works until such sum shall have been paid in full: *Provided further*, That the Federal Power Commission is hereby directed, within sixty days after the approval of this act, to report to Congress what compensation, if any, in addition to that already provided for, should be paid to the Apache Indians of the San Carlos Reservation by reason of the generation of hydroelectric power at the Coolidge Dam, in the manner provided in section 10 (e) of the Federal water power act and section 5 of regulation 14 of the Federal Power Commission"; and the Senate agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows: Restore the matter stricken out, and on page 35 of the bill, in lines 2 and 3, strike out the following: "not exceeding five years"; and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment, insert the following: "Claremore Hospital, Oklahoma, $50,000, on condition that the city of Claremore donate to the United States not less than 5 acres of land for such hospital and agree to deliver without charge medicinal water; in all, $155,000"; and the Senate agree to the same.

Amendment numbered 24: That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment as follows: In lieu of the sum proposed, insert "$165,000"; and the Senate agree to the same.

Amendment numbered 29: That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment as follows: In lieu of the sum of "$330,000" proposed in such amendment, insert "$305,000"; and the Senate agree to the same.

Amendment numbered 32: That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment, insert the following: ": *Provided*, That not to exceed $50,000 from the power revenues shall be available during the fiscal year 1929 for the operation of the commercial system; in all, $1,104,000"; and the Senate agree to the same.

Amendment numbered 40: That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment as follows: Restore the matter stricken out by said amendment, amended to read as follows: ": *Provided further*, That not to exceed $20,000 from the power revenues shall be available during the fiscal year 1929 for the operation and maintenance of the commercial system"; and the Senate agree to the same.

Amendment numbered 41: That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$12,644,000"; and the Senate agree to the same.

The committee of conference have not agreed on amendments numbered 6, 12, 46, and 51.

LOUIS C. CRAMTON,
FRANK MURPHY,
EDWARD T. TAYLOR,
Managers on the part of the House.

REED SMOOT,
CHARLES CURTIS,
WM. J. HARRIS,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the bill (H. R. 9136) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1929, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and embodied in the accompanying conference report as to each of such amendments, namely:

BUREAU OF INDIAN AFFAIRS

On No. 1: Makes the appropriation for the purchase of certain property for the Jicarilla Indian Reservation, N. Mex., immediately available.

On No. 2: Makes a verbal correction in the text of the appropriation for supervision of mining operations on leased Indian lands.

On No. 3, relating to the San Carlos irrigation project: Restores the language, stricken out by the Senate, requiring certain net revenues from the sale of electrical power to be used toward reimbursing the United States for the cost of the irrigation project, and inserts the proviso, proposed by the Senate, requiring the Federal Power Commission to report to Congress what compensation, if any, should be paid to the Apache Indians of the San Carlos Indian Reservation by reason of the generation of hydroelectric power at the Coolidge Dam, modified so as to require that such report shall be made in "60" days instead of "30" days, as proposed in the Senate amendment.

On No. 4: Restores the House language relating to the Flathead irrigation project modified so as to strike out the time limit of five years on the discretionary power of the Secretary of the Interior to extend the time for payment of operation and maintenance charges now due and unpaid.

On No. 5: Makes the appropriation for a school building in or near Burns, Oreg., immediately available, as proposed by the Senate.

On Nos. 7 and 8: Appropriates $10,000, as proposed by the Senate, for additional land for the Sequoyah Orphan Training School.

On Nos. 9 and 10: Appropriates $50,000 for an Indian hospital at Claremore, Okla., upon land to be donated by the city, modified so as to require the delivery by the city without charge of medicinal water.

On No. 11: Makes a verbal correction in the text of the bill.

On No. 13: Makes the appropriation for expenses of the tribal council of the Tongue River Indians, Montana, immediately available, as proposed by the Senate.

On Nos. 14, 15, 16, and 17 relative to the use of Indian tribal funds: Appropriates $164,000, as proposed by the Senate, instead of $185,000, as proposed by the House, for the Klamath Indians; and makes immediately available, as proposed by the Senate, the sum of $7,000 for a hydroelectric plant for the Shoshone Indians of Wyoming.

On No. 18: Makes immediately available, as proposed by the Senate, the appropriation for a road between Cooley and White River on the Fort Apache Indian Reservation, Ariz.

On No. 19: Appropriates $20,000, as proposed by the Senate, for maintenance of that portion of the Gallup-Shiprock Highway within the Navajo Indian Reservation, N. Mex., to be reimbursed as required by the act of June 7, 1924.

On Nos. 20 and 21 relative to per capita payments to the Menominee Indians of Wisconsin: Provides for a per capita payment of $200, as proposed by the Senate, instead of $100, as proposed by the House, and makes the appropriation immediately available, as proposed by the Senate.

BUREAU OF PENSIONS

On No. 22: Appropriates $1,165,000 for salaries as proposed by the Senate, instead of $1,150,000 as proposed by the House.

BUREAU OF RECLAMATION

On Nos. 23 to 41, inclusive: Appropriates $23,000 for office expenses in the District of Columbia as proposed by the House, instead of $27,000 as proposed by the Senate; appropriates $165,000 for personal services in the office of the chief engineer, instead of $160,000 as proposed by the House and $170,000 as proposed by the Senate; appropriates $30,000 for miscellaneous expenses in the office of the chief engineer as proposed by the Senate, instead of $25,000 as proposed by the House; appropriates $13,000 for miscellaneous expenses in field legal offices as proposed by the Senate, instead of $10,000 as proposed by the House; appropriates $30,000 as proposed by the Senate for construction of protective works at Picacho and unnamed washes on the Yuma project; on the Yuma, Minidoka, North Platte, Riverton, and Shoshone projects appropriations are made for operation of commercial systems out of power revenues as proposed by the House, instead of by direct appropriations, as proposed by the Senate, except that in the case of the Minidoka and Shoshone projects appropriations from power revenues are made in the respective amounts of $50,000 and $20,000, instead of the respective amounts of $46,000 and $15,000 proposed by the House; and appropriates $27,000 as proposed by the House, instead of $32,000 as proposed by the Senate for operation and maintenance of the Milk River project in Montana.

GEOLOGICAL SURVEY

On Nos. 42, 43, 44, and 45: Appropriates $247,000 as proposed by the Senate, instead of $209,000 as proposed by the House for gauging streams; and appropriates $180,000 as proposed by the Senate, instead of $160,000 as proposed by the House for examination and classification of lands.

NATIONAL PARK SERVICE

On No. 47: Makes a correction in the text of the bill to insert an amount erroneously omitted from the House bill in connection with the Yosemite National Park.

On Nos. 48 and 49, relating to the Carlsbad Cave National Monument, New Mexico: Changes a reference in the text to "superintendent" to the correct designation of "custodian" and inserts the language proposed by the Senate relative to the purchase and installation of a power unit for lighting the cave.

TERRITORIAL GOVERNMENT

On No. 50: Makes a textual correction in the appropriation for legislative expenses for the Territory of Alaska.

FREEDMEN'S HOSPITAL

On No. 52: Makes a portion of the expenses of Freedmen's Hospital payable by the government of the District of Columbia as proposed in the House bill.

The committee of conference have not agreed to the following Senate amendments:

On No. 6: Relative to a readjustment of the boundaries of the old Fort Apache Military Reservation, Ariz., now occupied by the Theodore Roosevelt Indian School.

On No. 12: Appropriating $15,000 for relief of distress among the needy Indians of the Turtle Mountain Band, North Dakota.

On No. 46: Relative to the letting of concessions in the Rainier National Park.

On No. 51: Appropriating $390,000 for Howard University.

LOUIS C. CRAMTON,
FRANK MURPHY,
EDWARD T. TAYLOR,
Managers on the part of the House.

Mr. CRAMTON. Mr. Speaker, the amount of the bill as it passed the House was $272,078,039; as it passed the Senate, $272,865,039, or an increase of $787,000. The House recessions amount to $183,000 and the Senate recessions amount to $199,000.

The bill as agreed upon, without the Howard University and Turtle Mountain items, which must be acted upon, is $272,261,039.

If the House approves the action which the committee expects to offer with reference to Howard University and Turtle Mountain, the total will be $272,656,039, which is $509,800 under the Budget.

Unless there is some question as to items in the report, I will not take the time of the House further at this time with reference to the report.

Mr. Speaker, I move the previous question on the adoption of the report.

The previous question was ordered.

The conference report was agreed to.

The SPEAKER. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Provided, That the Secretary of the Interior is hereby authorized and directed to change and relocate the boundaries of the old Fort Apache Military Reservation, Ariz., now occupied by the Theodore Roosevelt Indian School, by transferring such areas to the Fort Apache Indian Reservation as he may deem advisable by reason of the use and/or occupancy of a part thereof by Apache Indians and to transfer an approximately equal area of lands of the Fort Apache Indian Reservation to the Theodore Roosevelt Indian School reservation, such exchanges of land to be made in accordance with surveys based upon the Salt River base and meridian, the expenses of such surveys to be paid from appropriations for the surveys of Indian lands.

Mr. CRAMTON. Mr. Speaker, I offer a motion, which I send to the desk.

The SPEAKER. The gentleman from Michigan offers a motion, which the Clerk will report.

The Clerk read as follows:

Amendment No. 6: Mr. CRAMTON moves to recede and concur in the Senate amendment.

Mr. CRAMTON. Mr. Speaker, this is an adjustment of boundaries as between a former military reservation in the Apache Indian Reservation, this former military reservation now being used for school purposes. This adjustment of boundaries is a matter I am familiar with. It takes a few acres off one side, where it is occupied by Indians and they desire to keep it, and it adds a few acres on the other side, where the school desires to use it.

The motion to recede and concur was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

For relief of distress among the needy Indians of Turtle Mountain Band of North Dakota, $15,000.

The SPEAKER. The gentleman from Michigan offers a motion, which the Clerk will report.

The Clerk read as follows:

Mr. CRAMTON moves to recede and concur in the Senate amendment with an amendment striking out all of the amendment and inserting in lieu thereof the following:

"For the construction and improvement of roads on the Turtle Mountain Indian Reservation, N. Dak., $5,000."

Mr. CRAMTON. Mr. Speaker, with reference to this amendment, the Senate proposition was an appropriation of $15,000 for these Indians, mostly patent-fee Indians, to be used as a gratuity or as a ration proposition.

The House conferees are very strongly opposed to the old ration system and to gratuities of that kind and especially as to fee-patent Indians. So the House conferees propose a smaller appropriation for the construction of needed roads on the reservation, the purpose being to furnish labor for these Indians. If they are in need they can get the money by working for it.

In this connection I want to ask permission to extend my remarks in order to put in a letter from the superintendent of the agency, and I want to read this paragraph, which is very illuminating as to the different policies that may be followed. The superintendent of the agency says:

The policy under which we are working is a gratuitous ration to the sick, aged, and crippled, but no ration to any family where able-bodied persons are capable of performing three days' work at the agency. There has been some opposition to this policy by a few disgruntled Indians who claim that the rations in our warehouse were sent for free

distribution and that I have no right to require that they work for them. One Indian who had requested a policeman to intercede for him to the end that he might be given a ration, was told, by the policeman that he could have a ration if he would work for it. His reply was, "If I've got to work for Hyde, I might as well work for myself." This he proceeded to do, and has supported himself and family by hauling wood to white farmers.

The letters in full are as follows:

DEPARTMENT OF THE INTERIOR,
UNITED STATES INDIAN FIELD SERVICE,
Devils Lake, N. Dak., February 20, 1921.

COMMISSIONER OF INDIAN AFFAIRS,
Washington, D. C.

DEAR MR. COMMISSIONER: Your telegram of the 18th reached me just as I was starting for Devils Lake to attend a term of Federal court. This letter is, therefore, being sent from Devils Lake.

On Saturday, 18th, I mailed your office copies of correspondence that has passed between Mr. John Clark, chairman of the board of county commissioners of Rolette County and myself, relative to the advantages to be derived from an appropriation for the establishment and maintenance of roads on the reservation.

There is but one "all weather" road on the reservation. This is a State highway, and for a distance of 6 miles forms the south boundary of the two townships comprising the reservation. Two other roads, but slightly graded and poorly improved, run from the south line to the north line of the reservation. The balance of the roads on the two townships are unimproved and are impassable for automobile traffic much of the time.

There is ample opportunity for improving these roads, and it is my belief that such a measure would be of direct benefit to the Indians living on the reservation as it would enable them to haul their wood and hay more readily. As only Indians would be employed in the construction of new roads the labor would furnish them with sufficient funds to make gratuities unnecessary.

Practically all of the Indians, wards, indigent patent in fee, and unenrolled have homes. It is true that many of them are living on the allotments of their relatives, but in any event they have houses that they look upon as their own. None of them are so situated, but what they could secure garden space and, with very little effort, pasturage for a cow or two. All of them, with the exception of the non-enrolled Indians have received 160 acres of land. Most of the non-enrolled Indians have married with enrolled Indians, and thereby shared to some extent in the allotment of land. The indigent patent in fee Indians to-day are without land, because they found it was more convenient to secure a patent in fee to their allotments and live for a time without effort on the proceeds derived from the sale of their patents in fee.

This class of people would not be contended with an additional 40 acres if it were given to them and would maintain that 40 acres was not sufficient and clamor for 80 or 160. Such an additional allotment would be unfair to the present wards who have continued to hold their land.

The conditions on the reservation are greatly improved. The old and sick are being given rations and the young and able-bodied are given an opportunity of earning rations. The ration roll for the present year has been reduced 70 per cent over last year. I have a standing offer of a ration for three days' work at the agency. This ration consists of 20 pounds of flour, 5 pounds of fat salt pork, 2½ pounds of beans, hominy, rice, or other cereal, 2 pounds of sugar, and a half pound of tea. In addition to this, a noon-day meal is given on each of the three days the Indian is required to work. This ration is equivalent to the purchasing power of $3 in cash.

The $500 allotted for the purchase and resale of wood has been entirely expended. Approximately 150 cords of green, poplar poles were purchased and these have been hauled to the agency yard. A power saw is belted to our pump engine and Indians desirous of working for a ration are engaged in sawing this wood into stove lengths and piling it to dry.

The matter of relieving distress has had my personal attention this year as well as last and no appeal for relief has been disregarded. All rationers are being visited by the policemen in the district once every two weeks and the officers are personally questioned by myself relative to the needy families within their respective districts. In addition to this, I personally visit many of the homes during my trips about the reservation. The policy under which we are working is a gratuitous ration to the sick, aged, and crippled, but no ration to any family where able-bodied persons are capable of performing three days' work at the agency. There has been some opposition to this policy by a few disgruntled Indians who claim that the rations in our warehouse were sent for free distribution and that I have no right to require that they work for them. One Indian who had requested a policeman to intercede for him to the end that he might be given a ration was told by the policeman that he could have a ration if he would work for it. His reply was, "If I've got to work for Hyde, I might as well work for myself." This he proceeded to do and has supported himself and family by hauling wood to white farmers.

The distressful situation among these Indians has been bred from too many gratuities, both from the county and the agency. Summer and fall wages were not conserved because it was known that the agency or county would come to the relief of distress. Rolette County has reduced the amount expended for rations 33⅓ per cent this year. The gospel of work is not overly popular with a few of the Indians, but it is the only method by which they can be reinvested with a semblance of pride and initiative. It is for this reason that I suggest an appropriation for the betterment of roads that will enable us to offer work at a fair remuneration to those who are able and willing rather than throw another obstacle in their way by giving them additional land as a reward for their previous mistakes.

Very respectfully yours,

JAMES H. HYDE, *Superintendent.*

THORNE, N. DAK., *February 13, 1928.*

MR. JAMES H. HYDE,
Superintendent, Belcourt, N. Dak.

DEAR SIR: I am writing you with reference to the road problem within the reservation. I have been wondering for a long time if it would not be possible to get your department to take up the matter and see if you could not get a yearly allowance to be spent for road-improvement purposes within the reservation.

The two townships comprising the reservation have a total assessed valuation of only $183,229 (1927 valuation, which is much the same as prior years). The levy for road-improvement purposes is 5½ mills, which is as much as we can levy under the present State law. This, as you will readily see, gives us a yearly amount of less than $1,000 for the two townships, if all the taxes levied are collected, which they are not. This is only about one-fourth as much as is raised by most of the other townships in the county for road-improvement purposes. This is due to the fact that a considerable amount of the land within the reservation is trust patent land and not taxable.

You are familiar with the topography of these two townships and I think you will agree with me when I say that it requires much more money to build and maintain roads through them than through any other portion of this county, due to rocks and stumps and the hilly nature of the land. In order to have any roads at all through the reservation we have been spending each year several times the amount of money that these two townships are really entitled to, based upon their assessed valuation. This money, of course, has to be raised in and really belongs to other parts of the county. The taxpayers are commencing to complain that we are using part of their money where it should not be used and we can not blame them for so complaining, for road conditions are not of the best anywhere and the money should be spent where it is raised. But, as I have said before, in order to keep the roads through the reservation in any passable condition whatsoever we will have to have more money from some source. During the greater part of last summer the only way that most of the roads through the reservation could be traveled at all was on horseback.

If a yearly Federal appropriation of about $5,000 for each of these two townships could be had for road-improvement purposes it would be a wonderful thing. It would not only help to improve the roads, but would provide work for many of the Indians at times when other work is not plentiful and would so help to educate them away from the idea of always looking for gratuities.

Through my work as county commissioner I have been in close touch with the road problems of the reservation for the past seven years, and the thought of trying to get some help from the Federal Government for road improvement there has often come to me, and believing it worthy of serious consideration I am suggesting it to you.

Yours very truly,

JOHN CLARK,
Chairman Board of County Commissioners of Rolette County.

DEPARTMENT OF THE INTERIOR,
UNITED STATES INDIAN FIELD SERVICE,
Belcourt, N. Dak., February 18, 1928.

MR. J. CLARK,
County Commissioner, Thorne, N. Dak.

DEAR MR. CLARK: Your letter of the 13th relative to the road problem on the reservation has been received and carefully read. I concur with your conclusions and will submit the proposal to the Indian Office with a recommendation that an appropriation be sought from Congress for the express purpose of improving the roads on these two townships.

I appreciate your predicament in applying funds derived from the taxpayers in other townships for the betterment of road conditions on the reservation, and realize that the amount derived from taxes on the reservation proper would be wholly insufficient even to maintain the present roads without doing any new work.

Such a fund, if made available, would be doubly beneficial, for not only would it improve the road conditions and increase the value of the property of these Indians, but the work involved would furnish labor to a large number of Indians who are now unemployed.

This seems a very propitious time to lay this matter before Congress, for several interests are endeavoring to secure the passage of a bill to provide gratuities for fee-patent Indians on this reservation. People who are conversant with the Indian problem are adverse to such a bill as they feel that a gratuity appropriation would establish a precedent that would be of immeasurable damage to the Indian and create a perpetual problem that would never be concluded as long as a person could establish a degree of Indian blood.

If, therefore, Congress would appropriate a sum of money that could be expended among these Indians in return for labor, such action would materially relieve the conditions of unemployment and at the same time do so without creating a precedent whereby fee-patent Indians would be virtually rerecognized as wards of the Government. In addition to this much-desired result, the property of both wards and fee-patent Indians would be increased in value by the improved roads.

A copy of your letter, together with a copy of this letter, is being sent the Commissioner of Indian Affairs, with a request that the subject matter thereof be given consideration.

Very truly yours,

JAMES H. HYDE, *Superintendent.*

The motion of Mr. CRAMTON was then agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment 46, page 94, in line 20, insert the following: "*Provided,* That the proviso to section 2 of the act approved February 26, 1919, establishing the Grand Canyon National Park, shall not apply to the Rainier National Park, State of Washington."

Mr. CRAMTON. I move to recede and concur with the following amendment.

The Clerk read as follows:

Strike out the Senate amendment and insert in lieu thereof the following:

"That section 3 of the act of August 25, 1916 (39 Stat. 535), entitled 'An act to establish a National Park Service, and for other purposes,' be, and the same is hereby, amended by adding the following thereto: '*And provided further,* That the Secretary of the Interior may grant said privileges, leases, and permits and enter into contracts relating to the same with responsible firms or corporations without advertising and without securing competitive bids: *And provided further,* That no contract, lease, permit, or privilege granted shall be assigned or transferred by such grantees, permittees, or licensees without the approval of the Secretary of the Interior first obtained in writing: *And provided further,* That the Secretary may in his discretion authorize such guarantee, permittees, or licensees to execute mortgages and issue bonds, shares of stock, and other evidences of interest in or indebtedness upon their rights, properties, and franchises, for the purpose of installing, enlarging, or improving plants and equipment and extending facilities for the accommodation of the public within such national parks and monuments.'"

Mr. CRAMTON. Mr. Speaker, with reference to that amendment the Comptroller General has rendered a decision holding that section 3709 applying to advertising, soliciting bids for contracts with the Government applies to contracts made by the Interior Department with the operators to carry on in the parks. That, of course, would be extremely embarrassing in the administration of these parks. At the present time it has affected seriously the new contracts necessary in Mount Rainier Park.

That is a good illustration, because the parks company that handles the hotels is financed by public-spirited men of Seattle and Tacoma. These public-spirited men who provide facilities needed for the use of the public in the parks are about to carry on a very large new program. If the ruling stands it would be a good deal of an embarrassment. The Senate amendment was put in and intended to cure the situation in Mount Rainier Park, but would not affect other parks. As a matter of fact the language proposed by the Senate would not have accomplished what was really intended, even for Mount Rainier. The language that we have proposed takes care of not only Mount Rainier Park but other parks, and clarifies the authority and authorizes securities that are needed for Mount Rainier Park and the new developments.

It should be stated that the contracts made with these operators in the national parks are made not for service to be furnished to the Government but for service to be furnished to the public who go to the parks, and the Government retains full control of the rates that may be charged the public. If contracts could only be let after advertising, the terms of the competition would be very difficult to define and it might occur that an established operator, rendering thoroughly satisfactory service at rates approved by the Government, and having acquired the good will of the public through experience and fair dealing, might lose out, and one less experienced, less reliable, and less capable come in.

The second proviso in the substitute I have offered probably only reiterates in law what many of the contracts now contain. The third and last proviso is to meet a need now existing in the Mount Rainier situation, where the company is to provide very extensive new facilities.

The SPEAKER. The question is on the motion of the gentleman from Michigan to recede and concur with an amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment 51, page 14, after line 6, insert:

HOWARD UNIVERSITY

Salaries: For payment in full or in part of the salaries of the officers, professors, teachers, and other regular employees of the university, the balance to be paid from privately contributed funds, $160,000, of which sum not less than $2,200 shall be used for normal instruction;

General expenses: For equipment, supplies, apparatus, furniture, cases and shelving, stationery, ice, repairs to buildings and grounds, and for other necessary expenses, including reimbursement to the appropriation for Freedman's Hospital of actual cost of heat and light furnished, $80,000;

For the construction and equipment of a chemistry building, $150,000; and the Secretary of the Interior is authorized to enter into contract or contracts for such building and equipment at a cost not to exceed $390,000;

Total, Howard University, $390,000.

Mr. CRAMTON. Mr. Speaker, I offer the following motion.

The Clerk read as follows:

Mr. CRAMTON moves to recede and concur in the Senate amendment.

Mr. CRAMTON. Mr. Speaker, in reference to that I want to call the attention of the House to the fact that legislation has been proposed for some time to correct this situation, and it is hoped that we may have an early consideration of it.

I will ask unanimous consent to revise and extend my remarks with reference to this item, and in doing so I desire to put in a study of the attendance at Howard University and the situation in certain States with reference to the use of Federal and State funds.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. CRAMTON. Because of the annual points of order against the items for support and development of Howard University, I drafted and introduced in the Sixty-eighth Congress the following bill:

That section 8 of an act entitled "An act to incorporate the Howard University in the District of Columbia," approved March 2, 1867, be amended to read as follows:

"SEC. 8. Annual appropriations are hereby authorized to aid in the construction, development, improvement, and maintenance of the university, no part of which shall be used for religious instruction. The university shall at all times be open to inspection by the Bureau of Education and shall be inspected by the said bureau at least once each year. An annual report, making a full exhibit of the affairs of the university, shall be presented to Congress each year in the report of the Bureau of Education."

This was favorably reported from the Committee on Education by Chairman DALLINGER but not reached for action by the House. Each Congress since then I have introduced the same bill.

In the Sixty-ninth Congress an identical bill, by the gentleman from New York [Mr. REED], was reported by him from the Committee on Education and passed the House, but was not taken up in the Senate. His bill has been again reported and is now on our calendar. I hope it may be reached for consideration soon and sent to the Senate in time for action there.

To appreciate the national need of such an institution as Howard for the colored race, it is desirable to note the following table just issued by the bureau of research in the college of education of that institution as part of a study of the "comparative distribution of Federal and State funds for collegiate education of whites and negroes in 17 States." The table follows:

TABLE SHOWING

I. Distribution of students in publicly controlled institutions of four-year collegiate grade in 17 States, and the distribution of Federal and State funds for four-year collegiate education and the relation of the distribution to the population in 17 States having separate schools for white and negro students [1]

II. The extent to which Howard University serves persons born in those States.

State	Total population		Per cent negro population is of white population	Number of white students enrolled in schools of 4-year grade	Number of negroes who should be so enrolled according to population	Number of negroes actually so enrolled in schools of 4-year collegiate grade	Number of students at present in Howard University of 4-year collegiate grade	Federal funds for higher education			State funds for higher education			Number persons from the States enrolled in college for the autumn, winter, 1927-28	Number of students and graduates of Howard University from the several States studied				
	White	Negro						Received by whites	Amount due to negroes at same rate according to population	Amount actually received by negroes	Amount received by whites	Amount due to negroes at same rate according to population	Amount received by negroes		Graduates from college, by State of birth from 1919 to 1927	Students entering the school of medicine, by State of birth, 1923-1927	Graduates from the school of medicine, by State of birth	Students entering the law school from 1922-1927	Graduates from the law school from 1922-1927
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20

[1] These data were obtained from "Biennial Survey of Education, 1922-1924," Department of Interior, Bureau of Education Bulletin (1926) No. 23, and State Superintendents Reports for 1922-1924; Bureau of Education Bulletin (1927) No. 37.

[2] Includes also appropriations for schools above secondary but of junior collegiate grade.

[3] This includes 348 students of secondary school grade.

[4] This includes 574 students of secondary school grade.

[5] This includes 261 students of secondary school grade.

[6] This includes 442 students of secondary school grade.

In explanation of that table and in comment upon it I have selected Mississippi for purposes of illustration, since the points of order which struck out all the appropriations proposed by the bill, when it was first before the House, were made by the gentleman from Mississippi [Mr. LOWREY].

1. Column 1 gives a list of the 17 States in which separate educational facilities are maintained for whites and negroes.

2. Columns 2 and 3 give the white and the negro population, respectively, based upon the Fourteenth Census Report.

3. Column 4 shows the per cent that the negro population is of the white for each State. Mississippi, 109.5.

4. Column 5 represents the number of white students enrolled in State institutions of four-year collegiate grade in each of the States. Mississippi, 850.

5. Column 6 shows the number of negroes that should be enrolled if educational opportunities were given negroes on the basis of population; e. g., Mississippi has 850 white students in institutions of four-year collegiate grade. Therefore negroes, who constitute 109.5 per cent of the white population, ought to have in similar institutes 109.5 per cent of 850 students, or 930.

6. Column 7 shows the number of negroes who are actually enrolled in State institutions of four-year collegiate grade; e. g., in Mississippi there is not a single negro enrolled in a publicly controlled institution of four-year collegiate grade.

7. Column 8 indicates the number of students enrolled in Howard University from each of the 17 States listed; e. g., there are 33 students from Mississippi enrolled in Howard University.

8. Column 9 shows the amount of money appropriated by the Federal Government for white institutions of four-year collegiate grade; e. g., the Federal Government gave $235,649 to the State of Mississippi for institutions of four-year collegiate grade.

9. Column 10 shows what negroes should have received had the Federal Government appropriated money to negroes on the same basis as it did to white; e. g., if the Federal Government had given negroes in Mississippi a proportionate share of money based upon the white appropriation, they would have received $258,035.

10. Column 11 shows what negroes actually received from the Federal Government; e. g., the Federal Government gave $39,592 to negro schools in the State of Mississippi.

11. Column 12 indicates the amount of money appropriated by each State for white institutions; e. g., the State of Mississippi gave $769,529 for white institutions.

12. Column 13 shows the amount of money negroes should have received from the State had the State given a proportionate share to negroes; e. g., in Mississippi if negroes had received their proportionate share of State funds based upon what the white schools received, they would have got $842,634.

13. Column 14 shows what negroes actually received from the States; e. g., Mississippi gave negro institutions $65,251, and, as will be seen from the footnotes (f) most of the contributions from the States for negroes included mainly funds for schools of junior college grades.

14. Columns 15 to 20, inclusive, indicate the number of students and graduates of Howard University from the various States; e. g., from Mississippi there are now registered in Howard University 19 students in the academic colleges; 7 students in the school of medicine, 3 in the school of law, 2 in the school of dentistry, and 2 in the school of pharmacy. In the last eight years 18 students have graduated from the academic colleges. From 1923 to 1927, inclusive, 10 have graduated from the school of medicine and 2 from the school of law.

The following summary accompanies the table furnished me by the university:

OBSERVATIONS BASED UPON TOTALS OBTAINED IN THE ABOVE TABLE

1. Negroes represent an average of 33.2 per cent of the white population in the 17 States listed with a range of 5.3 per cent in Missouri to 109.5 per cent in South Carolina. Therefore, on the average for the 17 States listed, negroes should receive about one-third as much as the whites. Although in States like South Carolina and Mississippi they should receive more than the whites.

2. There are a total of 128,958 white students in institutions of four-year collegiate grade. There are supposedly 3,071 negroes in such institutions, but when the secondary school students are eliminated there are actually only 1,446 such students enrolled. On the basis of population, negroes should have 37,884 such students. Howard University has registered at the present 1,056 students, almost as many as are in similar State institutions for negroes in all of these 17 States combined.

Again it should be noted that in 11 of the 17 States not a single negro is registered in an institution of four-year collegiate grade.

There are in Howard University at the present time 759 students from these 11 States alone. It should be noted further that there are in Howard University 306 students from these 17 States taking medicine and 41 students from these 17 States taking law, and no provision is made for negroes for such education in any of these States (except West Virginia, see house bill No. 10, Legislature of West Virginia) either by the States or by the Federal Government.

3. Appropriations for white and negro education:

(a) White institutions in these 17 States receive a total of $5,305,452 from the Federal Government.

(b) Negroes receive a total of $282,275 (most of which goes for education of junior college grade) from the Federal Government.

(c) Negroes should receive on the basis of population from the Federal Government $2,114,494.

(d) White institutions received a total of $31,651,836 from the 17 States.

(e) Negroes received from the same States $1,850,809.

(f) Negroes should have received on the basis of population, $10,876,426.

(g) White institutions received both from the Federal and State Governments $36,957,288.

(h) Negroes received both from the Federal and State Governments $2,133,594.

(i) Negroes should have received from both the Federal and State Governments $12,990,920, leaving a deficiency of $10,857,326.

The situation as it exists in Mississippi, emphasizing the need for national opportunity for education for the colored race, is presented as follows by the Bureau of Research:

Number of students, faculty, and appropriation by the Federal Government and State of Mississippi for universities and colleges of four-year grade

	Students enrolled		Faculty		Appropriations from Federal Government		Appropriations from State	
	White	Colored	White	Colored	White	Colored	White	Colored
I. Universities and colleges of 4-year grade:								
1. Agricultural and Mechanical College	[1] 1,342		[1] 92		[2] $233,099		[4] $357,623	
2. Mississippi State College for Women	[1] 1,225		[1] 74		[2] 2,550		[4] 158,611	
3. State Teachers' College	1,582		[3] 38				82,705	
4. University of Mississippi	[1] 850		[1] 42				160,590	
5. Total in universities and colleges of 4-year grade	4,999		246		235,649		769,526	
6. Students[5] enrolled in—								
(a) Graduate school [5]	20							
(b) Law schools [5]	120							
(c) Pharmacy schools [5]	83							
(d) Medicine schools [5]	67							
(e) Education [5]	1,752							
(f) Faculty			246					
Total	2,042		246					
II. Schools of junior college grade: Alcorn Agriculture and Mechanical College		386		52		[6] $39,592		[6] $65,251

III. Omit.

	White	Colored
IV. Summary and conclusion (universities and colleges of 4-year grade):		
1. Total population	853,962	935,184
2. Per cent negro population is of white population		109.5
3. Proportionately negroes should (but do not) have the following numbers in—		
(a) Graduate schools		21.9
(b) Law		131.4
(c) Pharmacy		90.88
(d) Medicine		73.36
(e) Education		1,918.44
(f) Faculty		26.938
4. Total amount appropriated by the Federal Government for universities and colleges	235,649	
(a) Proportionately negroes should have, and did not, receive from the Federal Government		239,046.65
5. Total amount appropriated by State for universities and colleges	769,529	
(a) Proportionately negroes should have, but did not, receive from the State government		842,634.25

	Students enrolled		Faculty		Appropriations from Federal Government		Appropriations from State	
	White	Colored	White	Colored	White	Colored	White	Colored
V. Grand summary (higher institutions above secondary):								
1. Received from Federal Government						$235,649.00		$39,592.00
2. Received from State						769,529.00		65,251.00
3. Amount negroes should have received from the Federal Government but did not								228,443.65
4. Amount negroes should have received from the State but did not								776,783.25

[8] State Superintendent's Report, pp. 274-275.

The SPEAKER. The question is on the motion of the gentleman from Michigan to recede and concur.

The question was being put when Mr. TARVER asked for a division.

Mr. BLANTON. Mr. Speaker, I ask for the yeas and nays.

The question was taken; and only three Members rising the yeas and nays were refused.

The committee divided; and there were—yeas 112, nays 12.

Mr. TARVER. Mr. Speaker, I object to the vote on the ground that no quorum has voted.

The SPEAKER. The gentleman from Georgia makes the point of order that there is no quorum present. Evidently there is no quorum present. The Doorkeeper will close the doors, the Sergeant at Arms will bring in absent Members, and the Clerk will call the roll.

The question is on agreeing to the motion of the gentleman from Michigan.

The question was taken; and there were—yeas 259, nays 93, not voting 81, as follows:

[Roll No. 39]

YEAS—259

So the motion was agreed to.

The Clerk announced the following pairs:

Until further notice:

Mr. Wood with Mr. Connally of Texas.
Mr. Graham with Mr. Dominick.
Mr. Stobbs with Mr. Arnold.
Mr. Morin with Mr. Driver.
Mr. Treadway with Mr. Gallivan.
Mr. Fish with Mr. Mansfield.
Mr. Wurzbach with Mr. Quayle.
Mr. Cochran of Pennsylvania with Mr. Somers of New York.
Mr. Yates with Mr. Wingo.
Mr. Free with Mr. Tucker.
Mr. Kearns with Mr. Steadman.
Mr. Watson with Mr. Carew.
Mr. Vestal with Mr. Abernethy.
Mr. Kiess with Mr. Deal.
Mr. Michaelson with Mr. Celler.
Mr. Curry with Mr. Fulmer.
Mr. Doutrich with Mr. Lyon.
Mr. Strong of Pennsylvania with Mr. Palmisano.
Mr. Fort with Mr. Romjue.
Mr. Kelly with Mr. White of Colorado.
Mr. White of Maine with Mr. Larsen.
Mr. Reed of New York with Mr. Sumners of Texas.
Mr. Anthony with Mr. Carley.
Mr. Foss with Mr. Doyle.
Mr. Glynn with Mr. Edwards.
Mr. Brand of Ohio with Mr. Collins.
Mr. Estep with Mr. Dickstein.
Mr. Strother with Mr. Drewry.
Mr. Hogg with Mr. Hull of Tennessee.
Mr. James with Mr. McMillan.
Mr. Bohn with Mr. O'Connor of New York.
Mr. Simmons with Mr. Rayburn.
Mr. Christopherson with Mr. Sears of Florida.

The result of the vote was announced as above recorded.

A quorum being present, the doors were opened.

Mr. CRAMTON. Mr. Speaker, at this point in the RECORD I ask unanimous consent to extend my remarks with reference to the report that has just been adopted, and also to extend my remarks with reference to various amendments the House has just acted upon, and in doing so I may desire to insert certain letters or quotations from hearings or statements.

The SPEAKER. The gentleman from Michigan asks unanimous consent to extend his remarks in the manner indicated. Is there objection?

There was no objection.

Mr. CRAMTON. The following is the financial comparison of the House, Senate, and conference action, including the action just taken, on the Howard University and Turtle Mountain Indian items:

Amount of bill as passed the Senate		$272,865,039
Amount of bill as passed the House		272,078,039
Net addition, including $390,000 for Howard University		787,000
House has receded from—		
More land for Sequoyah School	$10,000	
Claremore Hospital	50,000	
Gallop-Shiprock highway	20,000	
Bureau of Pensions	15,000	
Picacho and other washes, Yuma project	30,000	
Gauging streams	20,000	
Classification of lands	38,000	
		183,000
Senate has receded from—		
Milk River project, operation and maintenance	5,000	
Amendments on Yuma, Minidoka, North Platte, Riverton, and Shoshone, substituting direct appropriations for use of power revenues for operation of commercial systems	194,000	
		199,000
Bill as agreed upon without Howard University and Turtle Mountain Indian items		272,261,039
Howard University		390,000
Turtle Mountain Indians		5,000
		272,656,039
Amount of Budget estimates		272,165,839
Maximum of bill		272,656,039
Less than Budget		509,800

Accompanying this statement I also insert Table A, showing the financial effect of Senate amendments and later action thereon. Also I present Table B, showing appropriations under the Department of the Interior, including supplemental and deficiencies, fiscal years 1916–1929, inclusive. In certain columns I have segregated appropriations from Indian tribal funds, Indian reimbursable appropriations, all other Indian appropriations—treaty or gratuity—Army and Navy pensions, from the reclamation fund, all other Interior appropriations, and the annual totals.

In connection with Senate amendments 9 and 10, for establishment of a new Indian hospital at Claremore, Okla., I insert the following letters from Col. Clarence B. Douglas on behalf of Claremore:

TABLE A.—*Statement of Senate amendments involving appropriations, showing effect of action of conferees thereon, and action taken by House on amendments 12 and 51*

Amendment No.	Subject	Budget estimate	Appropriated by House	Appropriated by Senate	Agreed amount	Increase (+) or decrease (−), agreed amount compared with House figure			Increase (+) or decrease (−), agreed amount compared with Senate figure	
						Reclamation fund	Indian tribal funds	General	Reclamation fund	General
	Indian affairs:									
7	Sequoyah Orphan Training School	$95,000	$83,000	$93,000	$93,000			+$10,000		
9, 10	Claremore Indian Hospital			50,000	50,000			+50,000		
12	Turtle Mountain Indians			15,000	5,000			+5,000		−$10,000
14, 15, 17	Klamath Indians (from tribal funds)	185,000	185,000	164,000	164,000		−$21,000

[1] Does not include appropriations for the Patent Office and the Bureau of Mines, which have been transferred to the Department of Commerce.
[2] Includes deficiency for 1927 which was paid from 1928 appropriations.
[3] Includes $4,773,160 appropriated for the Patent Office and the Bureau of Mines transferred to the Department of Commerce July 1, 1925.

FEBRUARY 7, 1928.

Hon. LOUIS C. CRAMTON,
Member of Congress, Washington, D. C.

DEAR SIR: Representing the city and Chamber of Commerce of Claremore, Okla., in the matter of securing an appropriation of $50,000 for a hospital for Indians at that place, I desire to say this:

The city of Claremore will furnish without cost to the Government a suitable site of 5 acres for this building and will furnish without cost to the Government the necessary supply of mineral water for medicinal use in hospital.

Very truly yours,

CLARENCE B. DOUGLAS.

FEBRUARY 7, 1928.

Hon. LOUIS C. CRAMTON,
Member of Congress, Washington, D. C.

DEAR SIR: Following are the service rates for light, water, and gas as charged to consumer in Claremore, Okla. The water and light systems are city owned. The gas is furnished by a corporation. These figures are as of February 6, 1928:

Gas, 40 cents first 100,000, 32 cents next 400,000, 25 cents on up.

Lights, 11 cents first 50 kilowatts, 10 cents second 50 kilowatts, 9 cents second hundred kilowatts, and 8 cents all over 200 kilowatts.

Water, 30 cents first 20,000 gallons, 25 cents next 30,000, 18 cents next 150,000, 15 cents next 300,000, and 12 cents all over first 500,000 gallons.

Claremore will deliver water, light, and gas to building site without cost to the Government.

Very truly yours,

CLARENCE B. DOUGLAS.

In connection with Senate amendment 19, the following letter from Charles Springer, president of New Mexico State Highway Commission, should be a matter of record as to completion of construction of connecting highways:

NEW MEXICO STATE HIGHWAY DEPARTMENT,
Washington, D. C., February 15, 1928.

Hon. LOUIS C. CRAMTON,
House of Representatives, Washington, D. C.

DEAR MR. CRAMTON: This will confirm my verbal statement that I will endeavor to have the New Mexico State Highway Commission, at its next meeting, order a survey of the route north from Shiprock to Colorado State line on the road to Cortez and Mesa Verde National Park, with a view to constructing same as a Federal-aid project.

As the Federal-aid allotment funds up to and including the fiscal year beginning July 1, 1928, have already been budgeted to other roads, it will be impossible to begin construction on that project this year, but I will do my best to have it included in our program for the following year, to wit, our fiscal year 1929–30.

From what I know of the attitude of the other members of our commission I can assure you that we will keep that road under maintenance in the meantime, and I believe we can maintain it in good passable condition at all times.

Yours faithfully,

CHARLES SPRINGER,
President New Mexico State Highway Commission.

Mr. TAYLOR of Colorado. Mr. Speaker, reserving the right to object, I want to call the attention of the House to the fact that for several years past the Interior Department appropriation bill has gone on the statute books in almost the identical language that it has come from the Committee on Appropriations of the House. One of the main reasons for that is this: The chairman of this subcommittee, the gentleman from Michigan [Mr. CRAMTON], every alternate year when Congress is not in session goes out over the country and makes a personal and painstaking inspection of the thousands of widely diversified and tremendously important activities of the Interior Department. There are over 200 Indian tribes, reservations, and schools throughout the country, and the obligations of the Government toward each one and their rights and obligations are

nearly all different. No Congress can rightfully or fairly or intelligently legislate or appropriate either the Government's money or the Indians' money without actually going out and making a personal inspection of the conditions of each tribe and each school.

Then there are all of our 19 national parks, each one having its own and different problems. They are our great national playgrounds and outing places. We are all trying to encourage a "See America first" sentiment, and our parks are our greatest aid and asset in that direction. This Interior Department committee has absolutely got to visit these parks and personally learn their requirements if we ever expect to develop their possibilities and scenic attractions in any systematic and economical way.

Then there are the 27 Government irrigation and reclamation projects scattered over all the arid Western States, all with widely different conditions. There are hundreds of thousands of people dependent upon and struggling desperately to make homes upon and build up that western country. They are certainly deserving of all the personal attention that Congress can possibly give them.

Then there are the General Land Office and Geological Survey, and practically all of its public domain, and Alaska and the Hawaiian Islands, all most deserving of our personal knowledge and attention, and it is utterly impossible to treat justly all of these far-flung activities of the Interior Department and interests of our country and our own people by sitting here in Washington. Those many billions of property rights and many millions of our citizens are deserving of better treatment than that.

All of these vast western interests of our Government mean nothing politically or personally to the gentleman from the northern State of Michigan. Yet he gives his time and does a tremendous amount of hard work and individually learns the facts and every year renders to our country an incalculably valuable public service unselfishly. [Applause.] I feel that he is setting a splendid pace and is a commendable object lesson to Congress and to the country, and especially to the other subcommittees of the Committee on Appropriations and other committees, which if it were followed would mean many millions of dollars of saving to the taxpayers of the country every year. It would make our national Budget system what we all hoped it would be, a very great saving and a wonderfully systematizing and orderly handling of the fiscal policy of our country. Under our Budget system the Appropriations Committee of this House is the "watchdog of the Treasury." We are the guardian of the taxpayers of this country, and I make these statements because I personally know of the vast amount of hard detail work he has done, and I feel that the gentleman from Michigan is entitled to this comment. I should add that some of the rest of this subcommittee have been with him some of the time. Mr. FRENCH and I were with him in Alaska four years ago and in the Hawaiian Islands two years ago, and last fall on a hurried inspection trip through Wyoming, California, Arizona, and New Mexico; and Mr. MURPHY has been with him on several trips. But the greater part of the actual detail work and the collection of all the data and correspondence is done by the chairman of this subcommittee. He personally knows all the actual existing conditions on all of these hundreds of Government enterprises better than anyone else, and for that reason, when the hundreds of witnesses come before us or when we meet in conference with another body, his judgment nearly always prevails, as it ought to. [Applause.]

Mr. CRAMTON. Mr. Speaker, may I be permitted to make this observation in response to the very generous statement of my colleague on the committee, the gentleman from Colorado [Mr. TAYLOR]? I think the real reason for the success of the bills from the subcommittee on the Interior Department is that nothing comes from that subcommittee except with the unanimous support of the whole subcommittee.

RETURN OF CONFERENCE REPORT ON INDEPENDENT OFFICES APPROPRIATION BILL

Mr. MADDEN. Mr. Speaker, I ask unanimous consent that the request of the Senate for a return of the conference report on the independent offices appropriation bill be granted.

The SPEAKER. Is there objection?

There was no objection.

FEDERAL APPROPRIATIONS FOR THE SUPPORT OF HOWARD UNIVERSITY

Mr. LOZIER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the conference report upon the Interior Department appropriation bill.

The SPEAKER. Is there objection?

There was no objection.

Mr. LOZIER. Mr. Speaker, I favor the adoption of the Cramton motion to the effect that the House concur in the Senate amendment to the Interior Department appropriation bill providing for an appropriation of $390,000 for the support of Howard University. About one-half of this amount is to be expended for a new building, which is in the nature of a permanent improvement. Since 1879 the Federal Government has been contributing annually to the support of this institution located at Washington, D. C., for the higher education of men and women of the Negro race. This university now has an attendance of approximately 2,000 students, who pay tuition and provide their own living expenses. Its students come from 38 States and 13 nations. Its standing as an efficient educational institution has been investigated by the Maryland and Middle States college ratings boards, and it has been given a rating of class A. It is not disputed that it is doing a splendid work in preparing men and women of the colored race for more useful lives.

From nearly every State in the Union young men and women of the Negro race who are studious, industrious, and ambitious come to Howard University, and here they are given training which equips them for better citizenship. The students who have gone out from this school have, as a general rule, exercised a wholesome influence over their race and materially aided in raising the standard of negro citizenship. In addition to the courses of study usually followed in first-class universities, departments are provided for the education of men and women in the following professions: Religion, law, medicine, dentistry, and pharmacy. Ministers, doctors, dentists, pharmacists, and teachers educated at Howard University have gone into communities where there are large negro populations and successfully practiced their professions among those of their own race and by precept and example have made a substantial contribution to the health, industry, morality, temperance, and right living among the less fortunate members of their race.

No one will deny that the white race in the United States is vitally interested in every movement that will make the men and women of the Negro race better citizens. The millions of negro men and women in the United States will follow their leaders, and it is therefore important that they have the right kind of leaders, and that they be led in the right direction; that is, toward temperance, morality, industry, sanitary living, and good citizenship.

As a white man I am proud of the history-making accomplishments of the white race in every department of human activity, and I want to see the members of the Negro race brought under every possible uplifting influence. I want them led by educated, honest, industrious, right-thinking, right-living, God-fearing men and women and not led by those who are shiftless, ignorant, and depraved.

As white men we owe a duty to the black men. What is that duty? To do them no harm; to stimulate their industry and encourage them to be temperate, sanitary, moral, honest, and useful; to aid them in becoming better citizens, so they may contribute something worth while toward the material, moral, and spiritual betterment of mankind.

In 1920 our negro population was in excess of 10,000,000, and, of course, it will continue to increase. If the activities of the Negro race are not wisely directed, these millions will become a serious menace to our free institutions. But if these 10,000,000 negro men and women in the United States are educated and taught industry, temperance, sanitation, morality, and good citizenship, they will make a substantial contribution to our national life. In the very nature of things all this can not be done in the twinkling of an eye. But we of the white race owe it to ourselves to do what we can, in reason, to improve the mental, moral, and economic condition of the 10,000,000 negroes who constitute about one-tenth of the population of the United States.

The negro is in our midst. It will do no good to discuss when and why he was brought to the United States. He is here and we must reckon with facts and conditions as they exist. Now, as it seems that these millions of negroes are in the United States to stay, the question is, What shall be done with them, and what should be the attitude of the white race toward the negro men and women who constitute practically one-tenth of our population? Shall we encourage them to live lives of idleness? No. Shall we adopt a policy that will result in their degradation and degeneracy? No. Shall we have them go backward mentally and morally? No. Shall we allow them to live and die in ignorance, vice, and shiftlessness? No.

It is not only a question as to what is best for the Negro race, but there is also involved the question as to what is best

for the white race. If these millions of negro men and women are to remain as a part of our permanent population, then I, as a patriotic American and well-wisher of my country, do not want those millions to be ignorant, intemperate, and immoral. Rather would I have them brought to a higher standard of citizenship. I prefer to have them industrious, sober, moral, and educated. As they will be a factor in our political and economic life, I want them to have the right kind of leaders—men who will lead them forward, not backward; upward, not downward.

Inasmuch as Congress has for nearly a half century made annual appropriations for the construction, maintenance, and development of Howard University, and in view of the splendid work it is doing, I believe this support should be continued. The money thus granted is an insignificant amount when you consider the purpose for which it is appropriated and the good it will do toward working out a safe, sane, and proper solution of the negro problem.

Moreover, the Federal Government contributes liberally to the education of our Indian population on the theory that the expenditure will aid in developing what is best in the American Indians and make them better citizens—and what we grant to the red man we should not deny to the black man.

All the States have not made adequate provision for the higher education of negroes, and in Howard University we have a first-class institution devoted exclusively to the better training of negroes in the trades and professions. Instead of requiring negroes who are hungry for higher education and for instruction in the trades and professions to get their training in second-class State institutions, why not maintain a first-class negro university which is capable of developing trained leaders for the Negro race, and where the negroes can be educated among and by members of their own race?

I am, therefore, voting to concur in Senate amendment No. 51; and if this amendment is adopted the pending bill, when it becomes a law, will carry an appropriation for the Howard University.

TYSON-FITZGERALD BILL

Mr. PEERY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing therein a house joint resolution passed by the General Assembly of Virginia with reference to legislation affecting emergency officers.

The SPEAKER. Is there objection?

There was no objection.

Mr. PEERY. Mr. Speaker, on leave granted me by the House I extend my remarks by inserting in the RECORD copy of house joint resolution adopted by the General Assembly of Virginia on February 11, 1928, in regard to the Tyson-Fitzgerald bill.

House joint resolution

Whereas of the nine classes of officers who served in the World War, eight classes, namely, Regular officers of the Army, Navy, and Marine Corps; provisional officers of the Army, Navy, and Marine Corps; and emergency officers of the Navy and Marine Corps—have been granted by Congress the privilege of retirement of disability, when incurred in line of duty, leaving only the disabled emergency officers of the Army without such retirement privileges; and

Whereas an overwhelming number of the Members of Congress since the armistice have promised to correct this injustice to disabled emergency Army officers by the enactment of legislation designed to adjust the unfair condition imposed upon this one remaining class of officers: Be it

Resolved by the house of delegates (the senate concurring), That the general assembly indorses the demand for recognition of the equality of service of the other eight classes of officers and the emergency Army officers in the proposal to grant retirement privileges to the disabled emergency Army officers upon the same basis and with the same privileges as have been granted to the disabled officers of all other classes, including the disabled emergency officers of the Navy and Marine Corps; and be it further

Resolved, That all Members of the Seventieth Congress of the United States be, and they are hereby, urged to lend their active support in securing the enactment of the Tyson-Fitzgerald bill as early as possible in the Seventieth Congress; and be it further

Resolved, That copies of this resolution be sent to each Member of the Congress of the United States from the State of Virginia.

Agreed to by house of delegates, February 11, 1928.

JNO. W. WILLIAMS,
Clerk House of Delegates.

Agreed to by the senate, February 13, 1928.

O. V. HANGER,
Clerk of the Senate.

PLIGHT OF COTTON FARMER

Mr. SANDERS of Texas. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing therein an article on the trouble with agriculture which appeared in the Houston (Tex.) Chronicle.

The SPEAKER. Is there objection?

There was no objection.

Mr. SANDERS of Texas. Mr. Speaker, under leave to extend my remarks in the RECORD by printing an article which appeared in the Houston Chronicle, I submit the following. This article was written by the Hon. T. N. Jones, of Tyler, Tex., one of the most prominent attorneys in Texas, and a man who has given serious thought and careful study to the agricultural problem for more than a quarter of a century.

(Special to the Chronicle)

TYLER, TEX., February 16.—T. N. Jones, attorney of this place, issues the following statement: "The press has published extensively that there will be in Jackson, Miss., on February 20 a conference of the governors of some of the Southern States and others specially appointed 'to reduce or prevent an increase in the cotton acreage of the South.'

"No harm can come from such a meeeting, and little, if any, good will be accomplished by it unless the distinguished representatives of the cotton-growing States dig into and ascertain the fundamental causes for conditions through the South so far as those engaged in agriculture are concerned. If those who may meet in Jackson devote their time to ascertaining the real causes which have produced the present situation and start some sensible movement to remove those causes, then some good may be the result.

DEMAND LARGE ACREAGE

"The basic cause for the constantly increasing cotton acreage and production is that there are in every village, town, and city in the South those who not only will not encourage the production of less cotton but insist on their tenants planting large acreages in cotton. This applies to landowners whose farms are cultivated by tenants.

"There are those in every village, town, and city in the South who constantly demand that cotton shall be planted in large acreage and have never at any time heretofore urged and are not now urging any decrease in acreage. They constitute that large and influential class engaged in local commercial pursuits. Their business is the farm-supplying trade of the Southern States. They furnish the rations, either directly or indirectly, used by the farmers in producing crops, and they insist that those who eat the bread and meat and wear the clothes they sell on credit, produce a crop which can on any day, at some price, be sold for cash.

SAYS COTTON CREDIT BASIS

"If the banks throughtout the South lend money with which the farmers can buy for cash, many such banks insist that cotton shall be planted in order that when the notes mature in the fall there will be a crop that can be converted into money, so the notes will be paid. If anyone doubts the absolute correctness of this statement, I invite him to examine the chattel mortgage records throughout the Southern cotton-growing States and note that cotton is the basis for practically all credit extended to those engaged in agricultural pursuits.

"Directly coupled with this situation is the irrefutable fact that a very large percentage of the retail commercial business of the South that deals directly with farm credits is based on the poverty and ignorance of the masses engaged in agricultural pursuits.

TOO POOR TO RESIST

"Those who actually till the soil and produce the crops are too pauperized to resist the demands of those who furnish them and their families food to eat and rags to wear to resist the demands of the supply houses and commissaries which exist wherever cotton is raised in this Republic. The interest rates paid the banks and the unconscionable profits paid to credit supply houses and commissaries in such localities could only be endured by a citizenship so pauperized that it can offer no resistance to the demands made on them, but they must accept whatever conditions may be imposed on them.

"This system is not only based on the poverty of the people, but its very existence depends wholly on a continuance of present conditions. Those engaged in such commercial exploitation know that their business will continue only by keeping those actually engaged in agricultural pursuits in debt.

MASSES UNEDUCATED

"I repeat that the retail commercial system of the South, taken as a whole outside of the cities, is based on the pauperized condition of the farmers, and that system as it is at present can continue only by keeping the farmers in debt.

"One fundamental aid which sustains present conditions is the uneducated condition of the masses of the people of the Southern States. Outside of the cities and large towns, that condition is appalling. The masses of the white people of the South outside of the cities and large towns are without education. They may read and write, but they do not know enough to even aid in preserving their liberties and their rights.

"This uneducated condition, coupled with the pauperism of the farmers, furnishes the basis for the commercial life of the South. It

furnishes the cause for the constant demand for the ever increasing production of cotton. Every bank, every retail merchant, every commissary owner demands that cotton in large acreage be planted.

DEPLORES SYSTEM

"They may meet, yes, they do meet, in the chambers of commerce and proclaim that there must be a reduction of cotton acreage, and from those places they proceed directly to the cuddy holes in their places of business and write chattel mortgages for the poor devils to sign covering the cotton crops from one to five years, and in addition, everything from the pig to products raised by the children. Listen to the speeches in the chambers of commerce, and in the banquet halls where a few most carefully selected farmers are entertained, and go directly from there to the mortgage records and see the work that is really being done. Always, everywhere, in the private counting houses the demand is made that cotton must be produced so that the debts can be paid. Not one word is said in private conference with the farmers about reduction of cotton acreage.

FIGURES ARE CITED

"The outstanding truth which confronts us is that illiteracy and pauperism are the handmaidens of cotton all over the world.

"India has 316,055,241 people of whom 293,431,590 are wholly illiterate. That country raises more than 5,000,000 bales of cotton.

"Egypt has 14,000,000, of whom 12,971,395 are illiterate. That country raises 1,500,000 bales of cotton.

"China has 400,000,000 people of whom at least 350,000,000 are illiterates. That country raises more than 2,775,000 bales of cotton.

"Brazil, Mexico, Peru, Russia, and some 25 other countries all raise cotton, and in practically all of them 90 per cent of the population are illiterate, and in all of them, squalid, revolting pauperism prevails.

ABJECT POVERTY IN SOUTH

"The Southern States as a whole constitute the most productive country on earth, yet, in the South, there is more abject poverty and illiteracy than in any other country on earth in which a high state of civilization is supposed to exist.

"There is another basic cause for the condition of the farmer of the South and of those who are engaged in agricultural pursuits. There is absolutely no marketing system for cotton, cottonseed, or any other farm product.

"The manner in which the cotton crop is purchased from the original producer is a reflection on the intelligence and the ideas of fair treatment entertained by the so-called business men who control the primary markets.

"The street buying of cotton by men who know little, if anything, about grade or staple from the incompetent cotton producer is tragic.

MARKETING SYSTEMS DISCOURAGED

"It is revolting to observe the transactions between the cotton traders and the poor, uneducated, pauperized men, women, and children who haul the cotton to market. Practically every man who lives in or in any way deals with the primary markets discourages the establishment of a thorough marketing system. The reason for this is that there are so many people engaged in speculating in farm products and making a living thereby.

"There is still another reason for the pauperized condition of the farmers which is the result of 60 years or more of exploitation.

"There is practically no article of commerce which is not controlled by some combination or by some trade agreement or by some custom, so that when a farmer buys he must pay tribute to from one to half dozen persons, corporations, or combinations.

PEOPLE DEBT-RIDDEN

"Throughout the Southern States they are denied the privilege of buying collectively in quantities for the cash, while individually they have and do now produce a large percentage of the wealth of the whole South, yet they have none of that wealth and are too debt-ridden to be anything but slaves and peons. They not only feed and clothe and make rich those who handle the things they buy in order to enable them to produce cotton and other crops, but after the cotton is produced they are the victims of combinations which are composed of great cotton merchants, aided and encouraged by the very Government which the South supports, who bear the price and buy the cotton crop for at least $350,000,000 below its actual value and far below the actual cost of production.

JARDINE GIVEN DEFENSE

"Mr. Jardine was not the cause of the decline in the price of cotton. He may have been one of the instruments which was used by the combination of cotton buyers to bear the price, but the real cause was and now is the agreement among great cotton merchants that cotton must go down.

"There is another influence which is destructive of the chances for the cotton producers to obtain a fair price for cotton. Certain influences in Texas, Arkansas, and probably in other States have for some years been most prolific in propaganda to show that cotton can be produced for an average of about 9 cents per pound. The trade has accepted as true that propaganda. The result has been and is to bear the price of cotton. If cotton can be produced for 9 cents per pound, the trade will not pay 25 cents for it, nor will it pay 18 cents for it, which would be 100 per cent net profit to the producer.

CONDITION IS DISGRACE

"While it may be true that a few men on a few acres under most favorable conditions raised cotton at a cost of 9 cents per pound, it is suicidal to claim that the cotton crop of the South can be produced for less than 18 or 20 cents per pound.

"The squalid condition of the cotton raisers of the South is a disgrace to the southern people. They stay in shacks, thousands of which are unfit to house animals, much less human beings. Their children are born under such conditions of medical treatment, food, and clothing as would make an Eskimo rejoice that he did not live in a cotton-growing country. Without exception, around those shacks there are no decent sanitary accommodations. There are no places for the production and care of livestock or poultry. In hundreds of thousands of instances there are no arrangements for gardens or places where vegetables can be raised.

SAYS PROPAGANDA ABUNDANT

"While propaganda has been abundant in the effort to make it appear that the financial condition of the farmer is most favorable and wonderfully improved, there is not one word of truth in such propaganda.

"There is not 1 landowner in 40 who lives on, raises cotton, and cultivates his own farm who now has his own money in the bank with which to finance entirely the production of his crops for 1928.

There is not 1 tenant farmer in 100 throughout the whole South who has his own money on hand with which to finance the production of his crop for 1928.

REPORTS REFERRED TO

"If there are those who question the correctness of this statement I refer him to the final report and testimony submitted to Congress by the Commission on Industrial Relations, created by the act of August 23, 1912, and to the census taken of agricultural conditions throughout the South. Since those investigations and reports, conditions have grown worse and not better.

"There are those in this country who desire to establish a system of commercial farming. They hope to raise the basic crops of the Nation with ignorant peon and peasant labor. For their purposes, the greater the degree of ignorance and poverty and more numerous the paupers, the easier it will be to control the agricultural lands and convert farms into large commercial enterprises of most extensive units.

ASKS EDUCATIONAL SYSTEM

"What will the governors of the Southern States and their friends do at the Jackson meeting?

"Will they, first of all, start a movement to build an efficient free educational system in each State in the South for the purpose of stamping out ignorance and illiteracy? Such a system may cost in the aggregate for the South more than a billion dollars per annum, but the Southern States can afford to pay more than that amount rather than allow present conditions to continue.

"Will they destroy, root and branch, the method now used in every Southern State of street-buying cotton, one or a few bales at a time, which subjects the producer to the exploitation of local speculators?

"Will they organize to destroy the infamous credit supply and commissary system which flourishes in practically every town, village, and hamlet in the South and which is based on the ignorance and pauperism of those who raise cotton?

WILL TAKE 20 YEARS

"Will they seek to start a movement to bring about a condition where those who engage in agricultural production will have their own funds with which to produce their crops?

"Will they declare that there shall not be peons on the farms of the South and that farm peasantry shall never exist in this the Southland?

"It will take 20 years to establish satisfactory educational, financial, and social conditions in the South. Will those assembled at Jackson start a movement to establish such conditions?

"Since writing the above, I have read in the Fort Worth Star-Telegram a special from Texarkana, headed, 'Poor farmers urged to quit.' It quotes L. E. Rast, agriculturist of the Arkansas Bankers' Association, as declaring that "the inefficient farmer whose cotton-production cost is 30 cents a pound and who breaks the market is one of the greatest evils with which real farmers must contend.'

LAZY MAN'S CROP

"He asserted that 'such a farmer does not care what his cotton brings, being interested solely in providing credit to tide him over dull periods. The inefficient farmer plants cotton because it is the easiest crop in the world on which to get credit and because it is a lazy man's crop.'

"In his remarkable declaration he was supported by Dean D. T. Gray, of the University of Arkansas College of Agriculture, who said:

"'We want the inefficient farmer to leave and the sooner the better. What we are worried about is what is to become of this type when he moves to the city. Business men can help the real farmers if they find employment for men leaving the farms so that they may become consumers of farm products.'

ARKANSAS SCORED

"The class of farmers about whom those gentlemen were talking are the product of the infamous commercial system which has existed throughout the cotton-growing States since 1865. There has never been and is not now in the State of Arkansas a public free school system in which the white children, much less the negroes, could be given any part of such training as would make them efficient in farming or anything else. No State in this Republic has been more derelict in its duty to its children since the Civil War than has Arkansas, and all of those inefficient, lazy farmers at whom the fulmination is aimed were either raised in Arkansas or in some other southern State which has grossly neglected its duty to the children born therein.

NEGLECT DECRIED

"Who are those inefficient, lazy farmers? And where did they come from? Tens of thousands of them are the children of the former landowners of the South, who, through the influence of the system prevailing in the Southern States, have been allowed to grow up in dense ignorance and abject poverty.

"The South, to its everlasting shame, for more than 60 years has neglected the education and training of her white children except in certain favored localities, and has occupied its time and energies in building and developing urban life. Now, through some of her educators and the representatives of the Bankers' Association, she desires to disown and kick out her progeny.

"What will that meeting in Jackson, Miss., do about all of these matters?"

THE FEDERAL RESERVE BANK OF DALLAS, TEX.

The SPEAKER. Under the order of the House the Chair recognizes the gentleman from Texas [Mr. WILLIAMS] for one hour. [Applause.]

Mr. WILLIAMS of Texas. Mr. Speaker, I will ask the Clerk to read a resolution that was introduced by me yesterday.

The SPEAKER. Without objection, the Clerk will read the resolution.

The Clerk read as follows:

Concurrent resolution

Whereas it is alleged that the governor of the Federal Reserve Bank of Dallas, Tex., has violated the Federal reserve act by his refusal to recognize the rediscount privilege to member banks in rural communities; and

Whereas it is alleged that the policies administered by the governor of the Federal Reserve Bank of Dallas, Tex., in conducting the business of such bank have worked many hardships on farming and livestock interests of the territory included in the eleventh Federal reserve district: Therefore be it

Resolved by the House of Representatives (the Senate concurring), That a joint committee is hereby created, to be composed of three Members of the Senate, to be appointed by the President of the Senate, and three Members of the House of Representatives, to be appointed by the Speaker of the House of Representatives.

Such joint committee is authorized and directed to conduct a thorough investigation into the administration of the affairs of the Federal Reserve Bank at Dallas, Tex. The committee shall report its findings to Congress, as soon as practicable, together with such recommendations as it may deem advisable.

For the purposes of such investigation, the committee, or any subcommittee thereof, is authorized to select a chairman, to hold hearings, to sit and act at such times and places during the sessions and recesses of the present Congress at the seat of government and elsewhere, to employ such clerical, stenographic, and other assistants, to have such printing and binding done, to require the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, to take such testimony, and to make such expenditures (including expenditures for travel) as it may deem advisable. The cost of stenographic service in reporting such hearings shall not be in excess of 25 cents per hundred words.

The expenses of the committee shall be paid one-half from contingent fund of the Senate and one-half from the contingent fund of the House of Representatives, upon vouchers to be approved by the chairman of the committee.

Mr. BLANTON. Mr. Speaker, will the distinguished gentleman, my colleague from Texas, yield for a comment on his resolution?

Mr. WILLIAMS of Texas. Yes.

Mr. BLANTON. The gentleman's resolution provides for a special joint committee of the House and Senate that is not to be composed of members of the Committees on Banking and Currency of the two Houses. I want to congratulate the gentleman for so framing his resolution, for it has teeth in it, and means something. The resolution which the Senator from Texas [Mr. MAYFIELD] passed in the Senate the other day provides that the Federal reserve system is to be investigated by the Senate Committee on Banking and Currency. We already know how that committee feels with reference to the matter, and we may hardly expect any accomplishment from it, because we remember the bill, S. 3657, which it passed in the Senate during the last Congress. That bill which, on December 17, 1926, passed the Senate without a dissenting voice raised against it, would have retired Mr. Tulley, when he got ready to quit, on a pension of $15,000 per year for life, as long as he lived, half of which was Government funds in said banks, and would have retired the officials who are now drawing $50,000 per year, when they got ready to quit, at a pension of $30,000 each per year for life, half of which money was Government funds in said banks, and would have retired all officers and employees of the Federal reserve system on pensions of 60 per cent of their high salaries drawn for life when they quit, one-half of which money, or 30 per cent, was Government funds in said banks. If the Committee on Banking and Currency felt that way toward these Federal reserve officials, we know how little we could expect from an investigation by it. It would be the same as having the Power Trust investigated by the Federal Trade Commission.

And it was not until the House, on February 1, 1928, struck out the enacting clause and killed the similar bill that was brought before us by our House Committee on Banking and Currency, that was to pension these officials on salaries of $12,000 per year for life, after they quit, that this Senate resolution I refer to was ever prepared and acted upon. That Senate measure, S. 3657, in the last Congress, was passed by the Senate by unanimous vote, without any Senator raising his voice against it.

Mr. WILLIAMS of Texas. Yes.

Mr. BLANTON. And such a bill, although reduced to $12,000 annual pensions, would have passed this House, when presented here by our Banking and Currency Committee on February 1, 1928, had it not been for the fight which the gentleman from Texas [Mr. WILLIAMS], aided by our colleague from Texas [Mr. BLACK], the gentleman from Illinois [Mr. MADDEN], and myself, made against same, which resulted in its enacting clause being stricken out, and the bill killed.

Mr. WILLIAMS of Texas. Mr. Speaker and gentlemen of the House, in addressing you to-day I realize the fact that should this resolution be adopted and a committee appointed as the resolution provides that it is possible that the actions of the committee may be of far-reaching effect. I realize that since the creation of the Federal reserve act there has been a sort of a halo thrown around the Federal reserve banks; the average individual views a Federal reserve bank as a place where only the select are admitted, and while this should not be true, yet it is a fact; and I recognize, also, the fact that there are some who feel that those who are in authority in the Federal reserve banks are infallible.

However, regardless of the views of any individual relative to the Federal reserve bank act or of those in authority in the Federal reserve banks, the fact remains that Congress created the Federal reserve act; and it is the duty of Congress to see that each of the Federal reserve banks function as Congress intended they should when the act was created; and if any one of them, regardless of the reason, are failing to function as they should, then it is the duty of Congress to take cognizance of the fact; therefore, in introducing the resolution I feel that I am not only within my rights as a Member of this House but performing a duty to the people of this country.

For many months there has been much agitation in the eleventh Federal reserve district by reason of complaints and protests of bankers relative to the policies of the governor of the Federal reserve bank of that district, and especially as he applied his policies to the member bank in the rediscount privilege.

These complaints and protests, coming from all portions of the district, have produced a condition that, under the management of the present governor of the Federal reserve bank of the eleventh district, that the Federal reserve bank is not able to carry into effect the benefits which it is possible and which it was intended the Federal reserve bank should render.

I have been deliberate and exhaustive in my preliminary investigation, and that investigation has led me to believe that an investigation of the conduct of the Federal reserve bank of the eleventh district should be made by a joint committee of the Senate and the House of Representatives. This is a serious proposition. An investigation will affect not only the eleventh Federal reserve district but every Federal reserve district; and

should an investigation be made it should have for its sole purpose the discovery of the facts and of doing justice to all concerned, and particularly for the purpose of discovering whether or not any corrective or remedial legislation will be necessary; that being true, and should the committee decide that corrective or remedial legislation should be passed, then and in that event it would be very necessary that Members of both the Senate and the House have Members on the committee that they will be in position to give the information to their respective bodies.

I want in the beginning to make the statement that the governor of the Federal reserve bank at Dallas, Tex., has violated the Federal reserve act in applying the rediscount privilege to member banks, and especially the small country bank, and also that his experience as a practical banker has been such that he has not the information nor the qualifications necessary for one to have for the position as governor of the Federal reserve bank, as everyone knows a man who is governor of a Federal reserve bank should have had experience as a practical banker and one who has a knowledge of values that fit him for the responsible position as governor of a Federal reserve bank.

In addressing you to-day I shall endeavor to confine myself to the record made by the governor of the Federal reserve bank on both the above propositions—that is, that the governor of the Federal reserve bank at Dallas, Tex., has violated the Federal reserve act in the rediscount privilege accorded the member banks—and also that his record as a banker fails to establish the fact that he is qualified as a practical banker for the position of governor of the Federal reserve bank. Further, before I enter into the presentation of the record, I want to commend those directors who voted against the reelection of the governor, and I sincerely believe that had the other directors realized what his reelection meant to the eleventh Federal reserve district they would have joined with those directors who voted against the governor's reelection, and this resolution would never have been introduced.

I want also to state that no one has supported more loyally than I the Federal reserve bank act, nor has anyone given the act more hearty approval than myself; and while I do not agree with all the features of the measure, yet I believe that it is one of the greatest pieces of legislation ever passed by a legislative body, and when operated by competent and patriotic authority it can be of the greatest assistance to our financial institutions; and yet, when operated by those who do not recognize the duty they owe the member banks, one who would not accord the member banks the consideration and privilege Congress intended should be accorded them when the act was passed, you can readily see how destructive it can become.

Mr. HUDSPETH. Mr. Speaker, will the gentleman yield?

Mr. WILLIAMS of Texas. Yes.

Mr. HUDSPETH. The gentleman is an experienced banker, as I understand.

Mr. WILLIAMS of Texas. I have been in the banking business for over 25 years.

Mr. HUDSPETH. Yes.

Mr. WILLIAMS of Texas. As an evidence that I have supported the Federal reserve act loyally, for your information, I will say that when the act became operative I placed the banks with which I was connected, which were operating under State charter, in the Federal reserve system and those banks have been members of the Federal bank since that time. I believe that you will agree that is sufficient evidence that I am friendly toward the Federal reserve bank act, and I say to you frankly that if my record, as one who has been in the banking business for 25 years, did not bear me out in the statement that I am friendly to the Federal reserve act, I would not feel that I should address you on the question now before this House.

I also want to make it clear before I go into the record—and I want every Member here to understand me—this is neither a political question nor is it a personal matter; I am speaking to-day for every rural bank in my State, every rural bank in this country, for you must realize that if the policies of the Federal reserve banks are such that they withhold from member banks the rediscount privilege the member banks are justly entitled to receive from the Federal reserve bank, there is not a community, there is not a home in all this country, which will not feel the effects of such policy, there is not a Member of this House but who realizes what it means to a community when a bank is forced to close its doors, and that there is not an individual in the community but who is made to suffer for the closing; and in addressing you to-day I wish to present to you the record of one who is in authority in the Federal reserve bank of the eleventh district at Dallas, Tex., and after you have heard his record I believe that you will agree with me that he has not only failed to recognize the rights of the small banks in the district—a right given them under the Federal reserve act—in the rediscount privileges but has intentionally withheld from them the privilege, and, further, with the intention of forcing the member bank out of business.

I know there is nothing personal intended in this resolution. I have been the friend of the governor of the Federal reserve bank at Dallas for years—I am his friend at this time—and I want to say for your information the principal reason why this resolution was not introduced some time ago was that I had hoped that the matter would adjust itself, and by so doing obviate the necessity of introducing this resolution, and I will state here that the directors of the eleventh Federal reserve bank at Dallas, Tex., and the members of the Federal Reserve Board here in Washington have had the matter placed before them, and for the reason there was evidently no relief forthcoming the resolution has been introduced in this House.

I am the friend of the governor of the Federal reserve bank at Dallas, Tex., but I do not agree with him as to his policies in the administration of the Federal reserve bank, as he applies them to member banks, and especially the member bank in the farming and stock-raising communities, and in differing with him I feel that I have had an experience which gives me a knowledge of the conditions in such communities to the extent that I hope I am not presuming when I say that I do not agree with him in the rediscount privilege which Congress intended the member bank should have when the Federal reserve bank act was enacted into a law.

I have always been a conservative in the administration of the banks with which I was in authority, the records of the Comptroller of the Currency, I believe, will substantiate the statement, and here I wish to add that anyone who is in authority in a bank who does not apply conservative and sound banking principles to the operation of the bank, he will fail, the bank will fail; and further, when a bank in any community has a record of several years of successful operation that alone is evidence enough that the bank was operated conservatively.

I would enter my objections to the appointment of anyone as governor of the Federal reserve bank who was not a conservative and one who would at all times insist that the member banks submit for rediscount paper which met all the requirements of the Federal reserve act in the way of being eligible, and paper which had the proper collateral and security that would make the paper collectible when due, and I know of no banker in the eleventh Federal reserve district but who wants the governor of the Federal reserve bank to be a man who will at all times protect the Federal reserve bank in the administration of the affairs of the bank; but my contention is that the present governor of the Federal Reserve Bank of Dallas, Tex., has not applied that principle to member banks in their application for rediscount privileges, but has refused with the intention of forcing them out of business.

On June 15, last year, I attended a stockholders meeting of member banks of the eleventh Federal reserve district, at Dallas, Tex.; this meeting was called by those in authority at the Federal reserve bank at Dallas, and was called for the purpose of giving the bankers the opportunity of discussing with those in authority in the Federal reserve bank questions which were of importance to the member banks. At this meeting there were present several hundred bankers from all portions of the district; many of them came to the meeting anxious that they have an opportunity of being heard. However, in this most of them were disappointed. A program had been arranged whereby all the forenoon and most of the afternoon was taken by addresses made by the Federal reserve agent, the governor of the Federal reserve bank, and the attorney for the Federal reserve bank. This program was so lengthy that many bankers present were forced to leave the meeting without the opportunity of being heard. The meeting was for one day only, however. Late in the afternoon some questions were asked the governor, which he very courteously answered, and the day following he addressed a letter to a certain banker who had asked him a question as to certain policies he was enforcing in the administration of the Federal reserve bank, relative to rediscount privileges accorded the member banks. The party acknowledged receipt of the governor's letter and propounded further questions relative to his policies. The governor answered the letter and used the following language. I give you this that you may begin to draw some conclusions as to his conception of his duty toward the member banks in the rediscount privilege.

At this meeting, the night before the meeting of the stockholders, which was to meet to-morrow, the governor and the Federal reserve agent at Dallas appointed a committee of 28 bankers to prepare a program for the stockholders' meeting to-morrow. On that committee were 28 men, 14 of them out of

group 1, 60 banks out of over 800; 11 out of group 2, and 3 out of group 3, with 292 banks; and 3 out of group 3, with 467 banks.

Mr. JOHNSON of Texas. Mr. Speaker, will the gentleman yield?

Mr. WILLIAMS of Texas. Yes.

Mr. JOHNSON of Texas. Will the gentleman tell us how those groups are divided?

Mr. WILLIAMS of Texas. Yes. Group 1 is all banks with capital from $500,000 up. Group 2 is all banks with capital from $500,000 down to $100,000; and group 3, from $100,000 down to $25,000. Three men were appointed by the committee on arrangement to represent the country banks. He was anxious that the country banks should have a fair opportunity to talk at this meeting, and they were present at the meeting of the stockholders; but most of the time, I must say again, was taken up by the addresses by the governor, the Federal reserve agent, and the attorney for the Federal reserve banks. That shows how considerate they were at the stockholders' meeting to the small-member bank.

I attended the meeting as a banker, a country banker, and as a Member of Congress. In going around over my district and over my State, considering the fact that I have been in the banking business, it is but natural that those in the banks would say things to me that they would not say to the Federal reserve bank people. I had been hearing these complaints. At this meeting there were present several hundred bankers from all portions of the district. Many of them came with the hope that they would have the opportunity to be heard, but all of the time in the morning and most of the afternoon was taken up by addresses by the governor and the Federal reserve agent and the attorney for the Federal reserve banks.

Mr. JOHNSON of Texas. Mr. Speaker, will the gentleman yield there?

Mr. WILLIAMS of Texas. Yes.

Mr. JOHNSON of Texas. Some of the Members of the House are not bankers, like the gentleman. Will the gentleman please tell us what the rediscount privilege is?

Mr. WILLIAMS of Texas. Yes. Those who have eligible paper can take it with them to the Federal reserve bank and receive credit. That is all there is to it.

Here is a paragraph from his letter dated July 1, 1927, which is an answer to the complaint made by a member bank that the Federal reserve bank should endeavor to take care of the member bank in the way of rediscount privilege and thereby protect the member bank from paying 6 per cent for money, which he paid when he was forced to borrow from his city correspondent bank by giving them the privilege of the rediscount rate which was from 3½ to 4 per cent. Here is what the governor says:

> You evidently have in your mind the thought that the Federal reserve banks ought to devise ways and means to increase their business and to compete with the city correspondent banks for the member banks' borrowing business.
>
> In our judgment here, this would be most unwise and entirely without province of Federal reserve banking. If the member banks can be better pleased and better satisfied by borrowing from their correspondent banks instead of from the Federal reserve bank then that is a circumstance about which the Federal reserve bank should have no concern, but I am sure that it would be a matter of great concern upon the part of the city correspondent banks if the Federal reserve bank were to induce the member banks to borrow from it in preference to borrowing from their city correspondent.

Note his language, please, that it should be of no concern to the Federal reserve bank to induce the member bank to borrow its money from the Federal reserve bank, that is not the proposition; all the member bank expects is recognition of the right it has under the Federal reserve bank act for the rediscount privilege, and if the treatment is accorded the member bank by the Federal reserve bank which should be accorded, the difference in rate will be an incentive for the member bank to borrow from the Federal reserve bank. You will also observe what he says about the city correspondent being concerned if the Federal reserve bank takes care of the loans for member banks. That is one of the troubles with the governor of the Federal reserve bank, and one of the complaints is that his conduct of the Federal reserve bank toward the small member bank is such that they are compelled to pay their city correspondent 6 per cent, when if he had the proper conception of the duty he owes the small member bank the member bank would secure his rediscounts at the discount rate, which has been the past year 3½ and 4 per cent; certainly the city correspondent would want the governor refuse the small member banks the rediscount privilege.

Mr. BLACK of Texas. Will the gentleman yield at that point?

Mr. WILLIAMS of Texas. With pleasure.

Mr. BLACK of Texas. Of course, the gentleman is well aware of this, but I want to remind the gentleman that these member banks are compelled to keep their reserves with the Federal reserve bank.

Mr. WILLIAMS of Texas. Seven per cent of their deposits without interest.

Mr. BLACK of Texas. And the law contemplates that if they tender eligible paper it will be rediscounted at the Federal reserve bank and at the rediscount rate provided. If the member banks are denied this privilege when they tender sound eligible paper for rediscount, then one of the main purposes of the Federal reserve act is nullified.

Mr. WILLIAMS of Texas. That is correct.

Here is another paragraph from the same letter, which was in answer to the statement that the rediscount privilege given the member bank was one of the principal reasons for Congress passing the Federal reserve act, and that it was the intention of Congress when the act was passed that this privilege should at all times be recognized by those in authority in the Federal reserve bank. How does this sound to you? Here is what he says:

> You are evidently under the impression that rediscounting for member banks in order that they may extend the volume of primary credit, which in their judgment should be extended, is the chief function of the Federal reserve bank—

Listen to this—

> I hope that I shall not shock you unduly when I say to you that, in my judgment, the rediscount function of the Federal reserve bank has already begun to dwindle in significance, and that to the greater extent that the Federal reserve banks carry on in an intelligent manner the open-market operations, just to that extent will the importance of the rediscount functions be minimized.

Mr. HUDSPETH. Will the gentleman yield?

Mr. WILLIAMS of Texas. With pleasure.

Mr. HUDSPETH. As I understand, the difficulty with this gentleman is that he caters to the big-city bank and discriminates in favor of the big-city bank against the country bank.

Mr. WILLIAMS of Texas. If I can reach it, I will prove that by the records.

Mr. HUDSPETH. Of course, anyone looking at the gentleman from Texas [Mr. BUCHANAN] and myself would know we are from the country, and I want to ask the gentleman how many of those city banks belong to the Federal reserve system and how many country banks.

Mr. WILLIAMS of Texas. Well, there are 60 banks in the district in Group 1—that is, banks having a capital of $500,000 and up—and there are 467 banks in the eleventh Federal reserve district which have a capital of $100,000 down to $25,000. They are in Group 3.

Mr. HUDSPETH. And he discriminates against the country banks and in favor of the city banks.

Mr. WILLIAMS of Texas. Yes; and it seems to me it is for the purpose of compelling those banks to close their doors.

Mr. STEVENSON. Will the gentleman yield?

Mr. WILLIAMS of Texas. With pleasure.

Mr. STEVENSON. I want to call the gentleman's attention to another expression in that letter. He seems to put out the idea in the letter that the chief function will in the future be the open-market operations of the Federal reserve bank?

Mr. WILLIAMS of Texas. That is his idea.

Mr. STEVENSON. That means that instead of loaning money to the banks which have stock in the bank, which have their deposits there, and which have to look to the Federal reserve bank for a low rate of discount, they will go into the open market and buy at one time $500,000,000 of open-market paper, which will tend to relieve the people in the speculative districts and turn money loose there.

Mr. WILLIAMS of Texas. That seems to be his policy. Now I shall prove to you by the record of the governor of the Federal reserve bank in his policies toward the member bank, and especially the member bank in the farming communities, in the rediscount privilege, is in keeping with his statement.

First permit me to show you when and where the governor of the Federal Reserve Bank of Dallas, Tex., was given the authority to enforce his policies on the member banks of the district, and withhold from them the rediscount privilege to which they were entitled under the Federal reserve act. At a meeting of the directors of the Federal reserve bank of the eleventh district held on April 12, 1926, a resolution was passed by the directors creating a discount committee consisting of the governor of the Federal reserve bank, the Federal reserve agent, the two deputy governors, the cashier, and the assistant cashier, and providing that the governor be chairman of the committee.

The last paragraph of the resolution reads as follows:

Be it further resolved, That the discount committee shall have authority to pass upon all loans and discounts submitted in accordance with the terms of the Federal reserve act, and the action of the committee, when approved by the executive committee or by the governor and Federal reserve agent acting for the executive committee, shall be final.

Note the language please—

when approved by the governor and Federal reserve agent, acting for the executive committee, shall be final.

That resolution placed the entire authority of passing on all loans and discounts up to the governor. Everyone who is informed as to actual conditions in the Federal reserve bank at Dallas knows the Federal reserve agent does not count, and if there was a sure enough Federal reserve agent, all of which there is not and the bankers in Texas know there is not, at Dallas, this resolution would never have been introduced, for the reason that the discrimination against the small banks of the system accorded them by the governor would never have been permitted.

The governor was the only one on the committee, as above stated, the Federal reserve agent was not considered, the other members of the committee were individuals holding their position in the Federal reserve bank with the approval and consent of the governor.

The two deputy governors, the cashier, and the assistant cashier never spent 30 seconds of their lives in the management of a bank, anywhere, and the records will prove it. Yet they sit there and pass on rediscounts which the member banks put up to them. They were placed in a position that if they disagreed with him they would have been removed. You may say that I am mistaken. I am not mistaken; the governor of the Federal reserve bank at Dallas, Tex., after that resolution was passed proceeded to enforce his policies on the member banks, and I say here and now that the governor of the Federal reserve bank at Dallas, Tex., withheld credit from member banks when they were entitled to the credit, and I make the statement also, and the records will prove the statement, that he did so with the intention of forcing them out of business, force them to close their doors; good, solvent banks, serving the community where they were located, and the governor of the Federal reserve bank, under the authority given him by the resolution, attempted to force those banks which to his mind were unnecessary, to close their doors and force them out of business. And to show you the unlimited authority granted the governor by the directors the above resolution was the last and only mention made as to a discount committee since April, 1926. For almost two years not a mention or discussion.

Mr. McKEOWN. Will the gentleman yield?

Mr. WILLIAMS of Texas. With pleasure.

Mr. McKEOWN. I will state that we have some banks in that Federal reserve district and the record bears out the fact that they have stood by and knocked at the doors, yet it appears to be the desire to shut the banks in our district.

Mr. WILLIAMS of Texas. Yes, sir; the same policy has been applied to banks in Texas. Do you wonder why he was reelected? Do you not think if you were a director of a Federal reserve bank you would be in an embarrassing position if you voted to remove a man after you had given him the unlimited authority these directors gave this man?

After the authority was given the governor to refuse the rediscount privilege to member banks he proceeded to withhold from them credit they were entitled to receive under the provisions of the Federal reserve act, and to prove my statement here is the record; please follow me closely, this should interest you; here is his record.

Mr. MOORE of Virginia. Will the gentleman yield?

Mr. WILLIAMS of Texas. With pleasure.

Mr. MOORE of Virginia. Will the gentleman tell us whether in doing what the gentleman stated he did—writing the letter, for instance, which you have read—the governor was acting in accordance with what is supposed to be the policy of the Federal Reserve Board?

Mr. WILLIAMS of Texas. It is questionable as to that. I will quote the policy of the Federal Reserve Board if I reach it, but it is not the intention of the Federal Reserve Board for the governor to withhold the rediscount privilege from a member bank if the paper is eligible, and if the paper is not eligible there is not a bank in the district which would expect the rediscount privilege.

Mr. MOORE of Virginia. I had particularly in mind this point: In his letter the governor seems to subordinate the rediscount processes to the open-market processes?

Mr. WILLIAMS of Texas. Yes; that is what he says.

Mr. MOORE of Virginia. I was wondering whether the Federal Reserve Board has given any countenance to that.

Mr. WILLIAMS of Texas. That I can not answer. The directors are not for that policy, so I am informed. Here is the report made by the member banks to the board on the 29th of June of last year, and I think one who knows Texas knows that is the high-water mark for credits, because by the same time in July cotton is beginning to move in south Texas and the loans are being reduced. This record shows that on the 29th of June of last year the Richmond Bank had $14,395,000 rediscounts secured by securities other than Government securities. Any banker with Government securities can get money. The St. Louis district had $15,346,000 rediscounts secured by securities other than Government securities; Kansas City, $10,550,000; San Francisco, $27,554,000; Atlanta, $27,996,000; and Dallas, $3,921,000.

In 1926 there was a big crop of cotton and prices were low. That caused more debts in the Dallas district not being liquidated than ever before, and there never has been a year in the history of the district that the rediscount privilege was needed to a greater extent.

Mr. JOHNSON of Texas. Will the gentleman yield?

Mr. WILLIAMS of Texas. With pleasure.

Mr. JOHNSON of Texas. Will the gentleman state the size of that district and the volume of business?

Mr. WILLIAMS of Texas. I will get to that in a minute. Take the Atlanta district as a comparison.

I take the Atlanta district for the reason that it is the only district with similar conditions as the Dallas district, almost entirely an agricultural district, and principally a cotton-producing district; that being true, loans made by member banks to their customers, and the rediscounts necessarily offered to the Federal reserve bank in each of the two districts are of necessity almost the same class of paper; that is, loans made by member banks to farmers and the paper offered by member banks to Federal reserve banks is this class of paper, farmers notes, secured by livestock, including their teams and milch cows, their growing crops, and oftentimes their farm implements, the districts are similar in that the loans made to farmers are advanced for purpose of making and gathering their crops, and when their crops are harvested they almost invariably place them on the market and thereby reduce their loans.

Here are some figures that should be of interest to you, and if you will follow me carefully I believe that you will see that these figures indicate, and prove conclusively to you, that the policy of the governor of the Federal reserve bank at Dallas, Tex., in dealing with member banks in regard to the discount privilege accorded to the member banks by Congress when the Federal reserve act was passed, is such that he has not only refused to grant to many member banks the discount privilege entitled to them by the Federal reserve act, which was the intention of Congress when the act was passed, but in many instances he has endeavored to embarrass those in authority in member banks, by refusing to them the discount privilege they were justly entitled, saying to them their bank was of no use in the community where it was supported by farmers, that the farmers did not need to borrow money, that there was no need of small banks, that there were enough large banks in Texas to take care of all legitimate demands for banks, that he, as governor of the Federal reserve bank, was going to use his efforts to close some of the banks, in several instances insulting in his attitude, and especially does this apply to small banks and those situated in communities where the banks are supported by farmers and loans made by member banks to farmers.

The records show that on June 29, 1927, Atlanta district, with 477 banks and with paid-in capital and surplus of $14,735,000 and deposits of $67,447,000, total $82,182,000, was carrying rediscounts from member banks to the amount of $31,917,000, of which amount $3,802,000 was secured by Government securities, leaving amount rediscounted to member banks secured by securities other than Government securities of $27,996,000.

Dallas district on the same day, with 820 banks, with paid-in capital and surplus of $12,561,000 and deposits of $58,109,000, total of $70,670,000, was carrying rediscounts from member banks to the amount of $5,918,000, of which $2,116,000 was secured by Government securities, leaving amount rediscounted to member banks secured by securities other than Government securities of $3,802,000, less than one-ninth of amount carried by Atlanta district.

The report further shows that Atlanta had invested in bills bought in the open market and Government securities, a total of $19,859,000, and Dallas had invested in bills bought in the open market and Government securities, a total of $36,847,000, approximately twice the amount of Atlanta district. Atlanta had over one-fourth of its paid-in capital, surplus, and deposits invested in rediscounts from member banks, secured by securities other than Government securities, and approximately one-

fourth of its paid-in capital, surplus, and deposits invested in bills bought in the open market and Government securities, while Dallas district had approximately 5 per cent of its paid-in capital, surplus, and deposits invested in rediscounts from member banks, secured by securities other than Government securities, while it had at the same time over 50 per cent of its paid-in capital, surplus, and deposits invested in bills bought in open market and Government securities.

Mr. BEEDY. Will the gentleman yield to me for a moment?

Mr. WILLIAMS of Texas. For a moment, but I must hurry. I am crowded for time.

Mr. BEEDY. I am sorry to say that I have missed a part of the gentleman's speech. Has the gentleman given any figures to show the status of the reserves in the Dallas bank as compared with the reserves in the Atlanta bank?

Mr. WILLIAMS of Texas. I could stand here and talk for 30 days on the record down there——

Mr. BEEDY. Am I correctly informed when I am told that the Dallas bank has been overextended for years, and only during the administration of the last governor has the reserve been brought up to the legal requirement, and that this result has been accomplished because the present governor can say "No"?

Mr. WILLIAMS of Texas. They would not have had that situation if they had not dissipated money in salaries or if that bank had been operated for the interests of the stockholders.

Mr. BEEDY. The salaries have not been changed much, if any, under the present governor's administration, have they?

Mr. WILLIAMS of Texas. I am not going to yield and get into a controversy with the gentleman. I have records here that I want to put in the RECORD, although I want to be courteous to the gentleman, of course.

Here is a report by Mr. Tally, the governor, on the 31st of December, showing the income from the Federal reserve bank on rediscounts of member banks:

1926, $525,993.

1927, $254,983.

This is a falling off of over 50 per cent in one year.

Gentlemen of the House, I know the country banker; I am familiar with the conditions under which a country bank is operated, I know what the country bank means to the community in which it is operated; I doubt if there is a man in my State who knows more country bankers than I. I know them by name, I know where they live, I have visited the community where their banks are located, I have been in their banks, and I want to say here and now, there is not a higher type of bankers living than the country banker in my State, and there is no more patriotic and loyal men on earth than the country banker in Texas, and many of the prosperous communities and cities in Texas to-day is an evidence that some country banker operated a country bank in the community and assisted in developing the resources of that particular part of the State.

During the World War when drives were being made to sell Liberty bonds and to secure funds for the Red Cross and all other activities to assist in winning the war, the country banker in Texas, as in other States, was working in the lead. He neglected his business, left it in the hands of others, and went out over the country making speeches, contributing money, and loaning money to those who did not have money to contribute, that he might assist in his small way, as a good citizen, in giving the best of which he was capable to his country.

The country banker in my State is a free-born white man, and when he has a right granted to him under the laws of this country he resents being treated in a manner as though he were a crook and that he had no rights. Imagine how you would feel, knowing that you had a legitimate right to apply to the governor of a Federal reserve bank for the rediscount privilege, a right accorded you under the Federal reserve act, and as you know, the member banks are forced under the act to keep a certain per cent of their deposits in the Federal reserve bank upon which the member bank receives no interest, you as the operating head of a member bank, and have the governor not only treat you as though you had no right to make the application but bawl you out and, as he has done in many instances—and the RECORD will bear me out in the statement—absolutely insult you. That is what the governor of the Federal Reserve Bank at Dallas has done on numerous occasions, and a committee from the Senate and this House will find such has been the case, should this resolution be adopted.

You know what you would want to do under those conditions, you know how you would feel toward the institution, and you further know that you would never apply to the Federal reserve bank again as long as the present governor was retained. That being true, I care not how efficient the governor may be, his usefulness as governor of the Federal reserve bank has been destroyed, he has destroyed it himself, and for the directors to retain him as governor is crippling the service and usefulness of the Federal reserve bank in the district. And while he was reelected, it was by a divided vote of the directors, and the fact that the vote was divided is sufficient evidence that he is not the proper man for the place of governor of the Federal reserve bank; however, he was reelected.

Mr. JONES. Will the gentleman yield?

Mr. WILLIAMS of Texas. Gladly.

Mr. JONES. Is there any practical and direct way for them to get rid of an official who violates the spirit and the purpose of the law?

Mr, WILLIAMS of Texas. I do not know. If there is not, there should be legislation introduced in these two Houses that will do it.

Mr. BEEDY. Will the gentleman yield?

Mr. WILLIAMS of Texas. Yes.

Mr. BEEDY. The individual banks in the district own stock in the Dallas Reserve Bank and elect three-fourths of the directors of that bank, do they not?

Mr. WILLIAMS of Texas. I do not want to get into an argument——

Mr. BEEDY. Is not that the fact?

Mr. WILLIAMS of Texas. Wait a minute. Let me show you the unfairness of the Federal reserve act, although I am for that act.

The Federal reserve act grants to group 3, banks of capital stock from $100,000 down, the right to elect two men; is not that correct?

Mr. BEEDY. That is true.

Mr. WILLIAMS of Texas. The Federal reserve act grants the banks between $100,000 and $500,000 the privilege of electing two men. Then from $500,000 on up, two men, which makes six. Then the board here appoints three, which makes up the nine directors. One-half of the member banks in every one of the 12 Federal reserve bank districts elects two men. That is one reason I am complaining about this.

The city banker, the fellow with $500,000 capital and up, has no kick. He is a great banker, and that is one trouble over here at the Treasury Department. They sent one of the men down there to investigate it, but he did not see the fellow to whom the governor of the Federal reserve bank is denying the rediscount privilege.

Mr. BEEDY. The member banks have the right to elect, and do elect, two-thirds of the directors, do they not?

Mr. WILLIAMS of Texas. I am not going to yield further.

Mr. BEEDY. Will the gentleman yield for one more question?

Mr. WILLIAMS of Texas. If the gentleman will guarantee me additional time.

Mr. BEEDY. The gentleman has a joint resolution pending here asking for an investigation of this bank. The gentleman knows there is one—a similar resolution—that was introduced in the Senate and is now before the Senate Committee on Banking and Currency, does he not? Does the gentleman want two investigations at the same time?

Mr. WILLIAMS of Texas. No; he does not want two investigations, and when I began my statement I said if this investigation was held and it developed that remedial legislation or corrective legislation should be introduced in these Houses to take care of a condition that might arise, that Members of both Houses ought to be on that committee of investigation.

Mr. BEEDY. In the hope of being helpful may I ask another question? The gentleman knows, does he not, that it is the duty of the Federal Reserve Board here in Washington to make such investigations?

Mr. WILLIAMS of Texas. Yes.

Mr. BEEDY. And before they can make such investigations they must have some charges. Have any charges been preferred by any of these banks in Texas to the Federal Reserve Board against the Dallas Reserve Bank?

Mr. WILLIAMS of Texas. Not that I know of; but both the board of directors at Dallas and the board in Washington have been informed in this matter.

Mr. BEEDY. Does the gentleman think it is fair to go over the heads of the Federal Reserve Board and ask Congress to investigate?

Mr. WILLIAMS of Texas. Who created the Federal Reserve Board?

Mr. BEEDY. The Congress; and it reposed in the Federal Reserve Board the duty of making investigations of the reserve banks of the system.

Mr. WILLIAMS of Texas. Does Congress want any man governor of any of the Federal reserve banks whose conduct to the member banks is such that 50 per cent of the banks

will not do business with him, except when forced to do so by law?

Mr. BEEDY. Of course, I am not going to assume all those facts to be proven, but anything that is wrong should be investigated and corrected in an orderly way and in accordance with the law establishing the system as passed by Congress.

Mr. WILLIAMS of Texas. My time is running and I refuse to yield further, in all courtesy to the gentleman.

As a further evidence that he is not the proper man for the position I submit the following information, which is evidence to you how the bankers of the district feel toward the policies of the governor of the Federal reserve bank in that district:

On October 12 last year a meeting of the bankers on the South Plains was held at Lubbock, Tex.; there was present at the meeting 35 bankers, representing 23 banks, and passed resolutions unanimous condemning the policies of the governor of the Federal reserve bank at Dallas, Tex.

On October 18 last year a meeting of bankers was held at Abeline, Tex., with over 30 bankers present, representing 15 banks, and passed unanimous resolutions condemning the policies of the governor of the Federal reserve bank at Dallas, Tex.

In November last year a meeting of bankers was held at Corsicana, Tex., with over 35 bankers present, representing 20 banks, and passed resolutions condemning the policies of the governor of the Federal reserve bank, with one vote dissenting, and I am informed that he stated that it was a personal matter with him.

This month, I believe it was about the 6th or 7th, a meeting of bankers of the Paris (Tex.) district, composed of bankers from Lamar, Red River, and Fannin Counties, and bankers from southern Oklahoma, met at Paris, Tex., with between 90 and 100 bankers present, and passed resolutions unanimous condemning the policies of the governor of the Federal reserve district at Dallas, Tex., and my colleague [Mr. HUDSPETH] is my authority for the statement that the bankers met in his district at San Angelo and passed resolutions condemning the governor's policies. Think of it, gentlemen of the House, at four meetings of bankers, with almost 200 bankers present and only one vote against the resolutions condemning the policies of this man.

In addition to the above, the directors of the West Texas Chamber of Commerce, at a meeting held at Cisco, Tex., in June last year, with 65 members present, passed resolutions condemning his policies as applied to the member bank located in the farming and livestock communities, and again at a meeting of these directors, held at Fort Worth, Tex., on January 19 of this year, passed resolutions condemning his policies.

Mr. JONES. Will the gentleman yield?

Mr. WILLIAMS of Texas. Yes.

Mr. JONES. Is it not true also that the bankers having to do business with the Federal reserve bank would not make a protest unless conditions were very serious?

Mr. WILLIAMS of Texas. Oh, you can not imagine it! It takes a lot of intestinal courage to go up against that bank. [Laughter and applause.] Think about a little country banker being put in a position where you are going to close the bank in the community. That money and that bank was created in that community. That bank is operated for the community and there is an individual placed down there that can withhold from you credit to which you are entitled and break your bank. And I make the charge here and now, and if this committee is appointed they will find where the governor of the Federal reserve bank in Dallas, Tex., forced some solvent banks to close when the Federal bank examiner's force was trying to put them on their feet, and if it had not been for the governor of the Federal reserve bank they would have done it. I can name the banks and the dates and give the facts. That is his record. He said he was going to close them, and if you will let me alone I will get to that because I have that record here.

As further evidence that my statement is substantiated by the record, listen to this: The president of a certain bank in Texas, a man who had been the operating head of a bank in this community for 25 years, applied to the governor of the Federal reserve bank for further rediscount privileges, he owed the Federal reserve bank a modest amount, but owing to the fact that the farmers in that particular part of the State had failed in a feed crop, and the necessity of furnishing them money to buy feed, that they might make another crop, made it necessary that he have more discounts. The governor, after discussing the matter at length, the banker explaining the necessity of his making the request, refused to grant him further rediscount privilege. The banker, addressing the governor, said:

Governor, do you mean to tell me that if it becomes necessary to extend our bank further rediscount privilege, or close our bank, that we will have to close the bank?

Listen to the governor's reply, calling the party by name—

That is just exactly what I mean. Go home and close your damn bank. It will be a damn good lesson to your community.

Mr. BEEDY. The gentleman doesn't hold me responsible for that language?

Mr. WILLIAMS of Texas. I want to show you how much ability he has. This man did not get another dollar from the Federal reserve bank; he paid the bank what he owed. And listen to the statement of his bank made to the Comptroller of the Currency on call of December last year: Deposits, $293,998.99; cash, bonds, and bills of exchange, $196,555.48; approximately two-thirds of his deposits in cash and exchange. Here is another: The president of a bank in Oklahoma—and this man had been the active manager of the bank for 15 years—applied for the rediscount privilege for his bank, which application was refused, and the governor stated to this man, and also to the vice president of the bank, who was present, that they would have to close their bank, said that you haven't a chance; go home and close your bank.

Let us see if he had to close his bank, and remember he did not get a dollar from the Federal reserve bank, and he is now applying for a State charter to get out of the Federal reserve system. Here is the statement of his bank, made under call of the Comptroller of the Currency at the December call last year: Deposits, $363,953.07; cash and exchange, $241,316.62; approximately two-thirds of his deposits in cash and exchange. Here is another from a bank out in west Texas, where the governor of the Federal reserve bank refused them the rediscount privilege, and listen to what he said when the application was refused—

We have too many banks; we only need a few banks in the larger towns in Texas to take care of all the business.

Further he said to them, the president and cashier:

You should not loan money to farmers, but invest your money in Government securities and commercial paper.

Here is the statement of this bank made under December call, as the others just mentioned: Deposits, $117,983.42; cash and exchange, $62,226.12; over one-half of the deposits in cash and exchange. Do these statements have the earmarks of broke banks? Does it look like they had to close? And remember, the governor of the Federal reserve bank would not loan them $1. I realize they are what would be termed small country banks; but they were serving the communities in which each was located, and I believe that you will agree with me that they were serving them well from the statements made to the Comptroller of the Currency, and here I ask permission to print in the RECORD the statement of each of these banks in full, that you may have the opportunity of studying them further:

Condensed statement of the condition of Citizens National Bank, of Blooming Grove, Tex., at the close of business December 31, 1927

RESOURCES

Loans and discounts		$171,283.82
Overdrafts		948.64
Banking house, furniture, and fixtures		12,350.00
Stock in Federal reserve bank		1,900.00
Due from United States Treasurer		1,250.00
Other resources		749.99
Cash:		
Currency and exchange	$72,296.25	
Bonds	55,000.00	
Bills of exchange	69,259.23	
		196,555.48
		385,037.93

LIABILITIES

Capital stock	50,000.00
Surplus and undivided profits	14,038.94
Dividends unpaid	2,500.00
United States circulation	24,500.00
Deposits	293,998.99
	385,037.93

This statement is correct.

J. R. GRIFFIN, *Cashier.*

Statement of the condition of the State National Bank, Idabel, Okla., at the close of business December 31, 1927

RESOURCES

Loans and discounts		$122,289.98
Overdrafts		917.63
Banking house		30,000.00
Furniture and fixtures		10,000.00
Real estate		12,778.84
Stock in Federal reserve		1,650.00
Cash resources:		
Liberty bonds	$15,868.96	
Bonds, warrants, etc	122,792.82	
Cash and sight exchange	102,654.84	
		241,316.62
Total		418,953.07

LIABILITIES

Capital stock	$50,000.00
Surplus	5,000.00
Borrowed money	None.
Deposits	363,953.07
Total	418,953.07

The above statement is correct.

C. E. BOLLINGER, *Cashier.*

Attest:

D. B. STRAWN, *President.*
J. E. DOOLEY, *Vice President.*

Financial statement of the condition of the First National Bank, Meadow, Tex., at the close of business, December 31, 1927

ASSETS

Loans and discounts		$77,561.05
Overdrafts		183.80
County and school warrants		3,477.00
Federal reserve bank stock		850.00
Real Estate (banking house) and furniture and fixtures		8,454.88
Other real estate		572.86
Other assets		950.77
Cash:		
Cotton acceptances	$35,637.46	
On hand and due from banks	26,588.66	
		62,226.12
Total		154,276.48

LIABILITIES

Capital stock		$25,000.00
Surplus		5,000.00
Reserved for taxes and interest		704.29
Cashier checks outstanding		5,588.77
Deposits:		
County and school	$8,563.43	
Time deposits	500.00	
Individual	108,919.99	
		117,983.42
Total		154,276.48

The above statement is correct.

EARL T. CADENHEAD, *Cashier.*

I make another statement, and I recognize the fact that this is a broad statement also. The governor of the Federal reserve bank at Dallas, Tex., through his authority as governor of the Federal reserve bank, has forced banks in the eleventh Federal reserve district to close their doors when the bank should have remained open. I am in position to name some of the banks. I have in mind one bank that the actions of the governor of the Federal reserve bank forced it to close, when the national bank examiners' force was endeavoring to reorganize the bank and would have succeeded had it not been for the governor of the Federal reserve bank; and the bank would have been in operation to-day had it not been for the governor of the Federal reserve bank. But the trouble was, as you see from the record, the governor did not want to save the bank, he wanted it to close, and he closed it. He has made the statement that there are too many banks and that he was going to help close some of them.

Here, I want to read you a paragraph from the report made by the governor of the Federal reserve bank to the directors at their January meeting in 1927:

> We believe that we would do much better to assist the stronger banks in counteracting a detrimental effect upon them brought about by numerous failures, than we would to undertake to use any considerable amount of our resources in trying to tide over the weak situation for the primary purpose of avoiding the effect that might come to the stronger institutions entitled to assistance by virtue of the quality of their assets and the evidence which they have given in the past of adhering to sound policies.

His policy is to take care of the stronger institutions (and I approve him taking care of them), and break the smaller institutions. There is the trouble, and again I make the statement that he has used his authority as governor of the Federal reserve bank, not to assist the small member bank but to withhold from it that which Congress intended should be accorded it when the Federal reserve bank act was passed; that is, in the rediscount privilege, and by so doing he has forced banks to close their doors when they should have remained open.

Think about it, gentlemen of the House. Last year, the governor of the Federal reserve bank at Dallas, Tex., by refusing to the member banks the rediscount privilege they were entitled, cost the member banks of that District over a million dollars. Why there are banks in Texas who loaned more money to member banks in Texas last year than the Federal reserve bank loaned them. I mean individual banks were carrying more loans to banks than the Federal reserve bank was carrying, and the governor of the Federal reserve bank at Dallas, Tex., by withholding from the member banks the rediscount privilege to which they were entitled, and forcing them to secure their loans from their city correspondents, cost the member banks in that district over a half million dollars, by reason of the member bank having to pay 6 per cent for their money from their correspondents when they should have secured it from the Federal reserve bank at 3½ and 4 per cent, which was the discount rate last year. Why, I can give you the name of a certain bank in Texas that loaned over a million dollars to banks last year that the governor of the Federal reserve bank had refused, and every one of the loans has been paid, and some of these were to banks where the governor had told them they would have to close their bank.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. WILLIAMS of Texas. With pleasure.

Mr. COOPER of Wisconsin. Did I understand the gentleman to say that the country bank took these securities to the Federal reserve bank of which you speak and was denied the rediscount privilege and if the rediscount had been given it would have been at 3 per cent?

Mr. WILLIAMS of Texas. From 3½ to 4 per cent, which was the discount rate during the year.

Mr. COOPER of Wisconsin. Did you say that they took the same securities to a big bank and received the discount but were obliged to pay 6 per cent?

Mr. WILLIAMS of Texas. Yes; and in some instances 7 per cent.

Mr. COOPER of Wisconsin. So these facts show that it was not the character of the securities which the Federal reserve bank really objected to?

Mr. WILLIAMS of Texas. No. If it had been, they would not have been discounted. I do not know of a member bank of that district that wants them to take paper that is not safe.

Mr. COOPER of Wisconsin. But the big bank did take the securities?

Mr. WILLIAMS of Texas. Certainly; and I can give you the name of one bank in Texas that loaned over a million dollars to banks that the Federal reserve governor refused, and the loans have been paid.

Mr. BLACK of New York. Did the Federal reserve bank rediscount the paper for the larger banks?

Mr. WILLIAMS of Texas. I am not in a position to answer that. All the records that I have given you here are unquestioned.

The policy of the governor is to refuse to rediscount for a member bank notes which are obviously renewals, or any part of the note a renewal, with the statement that the Federal Reserve Board here in Washington has held that renewal paper is not eligible. Here is the information furnished me by the governor of the Federal Reserve Board, which is in answer to a letter I addressed him January 30, requesting that he give me record of rulings made by the board on this question; listen:

> There are good renewals and bad renewals; and it is a matter for banking judgment to determine the merits of each case by a knowledge of the circumstances in which the original loan and the renewal have been made.

Further he says:

> As the circulars and regulations of the Federal Reserve Board have undertaken to state the fundamental principal, it is the liquidity of the paper that must be looked to to determine its eligibility, and the liquidity should not be tested by standards that are narrow, arbitrary, or inflexible, such mechanical rules must not be allowed to take the place of a discriminating banking judgment.

This regulation and circular issued under date of April 27, 1915.

Think of it, gentlemen of the House, the governor of a Federal reserve bank making the claim that he was a banker with a regulation as above, made in 1915, and he attending conferences here with other governors of the Federal reserve banks often each year, with every opportunity to inform himself.

Mr. HUDSPETH. Mr. Chairman, will the gentleman yield?

Mr. WILLIAMS of Texas. With pleasure.

The SPEAKER pro tempore (Mr. ROWBOTTOM). The time of the gentleman from Texas has expired.

Mr. HUDSPETH. Mr. Speaker, I ask unanimous consent that the gentleman be permitted to proceed for 10 additional minutes.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. HUDSPETH. It has been stated in the press that the national bankers in my district do not fool with Mr. Tally. The directors go to the intermediate credit banks and put up their own notes and get their money on their own security. They do not fool with Mr. Tally at all, because he has turned down every piece of paper that they offered him, and they do not propose to be coerced.

Mr. COOPER of Wisconsin. Mr. Speaker, this address of the gentleman from Texas [Mr. WILLIAMS] is one of the most important that has been made during this Congress. As I under-

stand the situation to-day it is almost impossible through a run by depositors to close an honestly-conducted bank.

Mr. WILLIAMS of Texas. That is correct.

Mr. COOPER of Wisconsin. Because it can take its securities to the Federal reserve bank and get credit.

Mr. WILLIAMS of Texas. That is correct.

Mr. COOPER of Wisconsin. But if the Federal reserve bank arbitrarily refuses to rediscount good securities, then it is possible by such a run to close almost any bank even though it is honestly conducted.

Mr. WILLIAMS of Texas. Certainly.

In that connection I call attention to a remark that a certain member banker made in Texas in discussing the policy of this man. He said that if there was a crisis in that State, it would break 70 per cent of the banks, because he said the little banks would go to their correspondents, and they would tell them to go to the Federal reserve bank, and the Federal reserve bank would tell them to go to hell. [Laughter.] And that is what would happen. That is what he has been doing. This man never had authority in but one bank in his life. I say that he has not the ability to determine the solvency or the insolvency of an institution.

I make the charge, here and now, that the governor of the Federal reserve bank at Dallas, Tex., does not have the ability to determine a solvent institution, nor has he the ability to determine an insolvent institution. I realize that is a broad statement, here is the record which I believe will justify the statement:

The governor of the Federal reserve bank at Dallas, Tex., was never the operating or managing head of but one bank, his record as a banker is as follows: He held the position of assistant cashier with the City National Bank in Dallas, and received a salary of $4,000 a year, in 1911 he went with the Lumbermans National Bank, at Houston, Tex., as cashier at a salary of $6,000 a year. He remained with the Lumbermans National Bank until 1914 when he was given a position in the Federal reserve bank at Dallas, at a salary of $5,000. This information was furnished by a member of the Federal Reserve Board here in Washington, the information as to the salary he received when he entered the Federal reserve bank, note this will you, he received a salary of $1,000 a year reduction when he entered the Federal reserve bank, do you believe that had he been a banker the Lumbermans National Bank would not have endeavored to retain him, you know that it would.

He remained with the Federal reserve bank until July, 1921, when he accepted the active vice presidency of the Southwest National Bank of Dallas, Tex., with entire control and management as to policies of the bank, and it would shock you to know what he charged for his services, but he claimed that he could put the bank over and the directors stood for his demands in the way of a salary, he operated the Southwest National Bank until early in 1923 when he severed his connections with the bank, and at a reorganization of the bank whereby the North Texas National Bank was organized and took over the assets of the Southwest National Bank, it was agreed by the North Texas National that after all losses sustained by the Southwest National, the present governor of the Federal reserve bank had entire authority in the management for over a year, had been taken care of, the balance would be paid to the stockholders of the Southwest National, and the management of the North Texas National has made the statement that up to this time the stockholders of the Southwest National have not received 1 cent, and that they might get as much as 15 per cent on their stock after the losses in Southwest National had been taken care of. The capital stock of the Southwest National was $2,000,000 and 15 per cent on the stock would be $300,000, a loss to the stockholders of the Southwest National Bank of $1,700,000, and, say, the stockholders have not yet received the 15 per cent, do you think that is the record of a banker? And remember that when he was connected with the City National Bank of Dallas, and the Lumbermans National Bank at Houston he was not the managing head of either institution.

Gentlemen, I have many letters from bankers scattered over the district which I would like to put in the RECORD, but owing to the fact that it would burden the RECORD, I shall not have them printed. I also have much information given me confidentially, which I can not give you.

Mr. JOHNSON of Texas. Mr. Speaker, will the gentleman yield right there?

Mr. WILLIAMS of Texas. Yes.

Mr. JOHNSON of Texas. I want at this point, with the gentleman's permission to read a letter from a banker in my district, which I received yesterday. I shall not give his name, but he has been a safe, conservative, and successful banker for more than 25 years. Furthermore, he is a man who weighs his words. He is not an alarmist or extremist, and what he says always commands the respect and confidence of those who know him. The letter is as follows:

FEBRUARY 21, 1928.

Mr. LUTHER A. JOHNSON,
Member of Congress, Washington, D. C.

DEAR MR. JOHNSON: I am taking the liberty to write you to solicit your interest and earnest consideration of the question that has so thoroughly aroused the country bankers of this Federal reserve district; that is, the removal of the present governor, Mr. Lynn Talley. You are thoroughly aware of the distressed condition of the farmers of the country for the past few years and their urgent need of all the assistance that can be safely given them by the banks of the country and all Government agencies that have been organized for their aid and relief.

The interests of the farmers are so thoroughly interwoven with that of the country banker that whatever affects them affects us and whatever affects us vitally affects them. The country bankers are very anxious to render all the assistance they can to the farmers, who have been so badly in the dumps for the past few years, but deposits in country banks the country over are very low, and their ability to aid is very limited unless they are able to rediscount during the summer months.

The arbitrary methods of the present governor and his utter lack of interest in the problems and welfare of the farmer and country banker make it almost impossible for them to get rediscounts with this bank. In fact, rather than suffer the embarrassment and humiliation of continued refusals, many of us have ceased to have any business with the Federal reserve bank except to keep up our reserve with them as required by law, and have gone back to the old method of borrowing from commercial banks at a high rate of interest and keeping with them compensating balances all through the year. Some have taken the other alternative of confining their loans to such amount as they will be able to take care of with their own resources throughout the year. I do not have any complaint at the Federal reserve system. In fact, I think we are all agreed that its organization was one of the greatest pieces of legislation of the age.

But having to tie up our limited means in its stock and keep our reserve with them without interest and then be deprived of the only privilege they have to offer us, that of rediscount, is a pretty bitter pill. The average country banks are paying their officers and employees very meager salaries and about one out of five for the past few years have been paying any dividends to their stockholders. Yet we are paying this gentleman $25,000 a year (about five times the amount he could command from any commercial bank) for this magnificent service he is rendering us.

It is no small wonder that two or three hundred country bankers have raised such a roar, and this number does not by any means represent the dissatisfied bankers of the district.

A great number of them say, "I feel just as you and the others do about it, but the power of the governor of the Federal reserve bank to withhold or extend credit is such that I can not afford to incur his displeasure." Any consideration you may give this matter will be appreciated not only by me but by hundreds of other country bankers of this district.

Yours very truly,

———— ————.

Mr. WILLIAMS of Texas. That letter is a typical letter of hundreds from the bankers in the eleventh Federal reserve district and of many oral conversations where the parties would not write letters.

Mr. Speaker, and gentlemen of the House, I have many letters from bankers scattered all over the eleventh Federal reserve district which I would like to have printed in the RECORD, but owing to the fact that it would burden the RECORD I shall not have them printed. I have a great deal of information given me in confidence by many who fear the results should it be known they had furnished the information, and now, in conclusion, and with a feeling of great concern, I want to say to you that the situation in the eleventh Federal reserve district is acute and that something should be done to remedy the situation, and whether you believe the record I have given you proves either my statement that the governor is not a banker or the statement that he has withheld from member banks the rediscount privilege with the intention of forcing them out of business, yet the facts are that the present governor has certainly alienated the respect and friendship of a large portion of the member banks of the district, and to the extent that they will do only such business with the Federal reserve bank as they are compelled to do so by law as long as the present governor remains in the position he now occupies in the Federal reserve bank at Dallas, Tex. It is significant to know that less than 25 per cent of the State banks in Texas, which are eligible to join the Federal reserve bank, are in the Federal reserve system and that only one State bank each in Oklahoma, New Mexico,

and Arizona are members of the Federal reserve bank. The Federal reserve bank at Dallas is not filling to any degree its sphere of usefulness and the usefulness Congress intended that it should when the act was enacted into a law.

And now, in conclusion, again let me impress on you the seriousness of the condition as it exists in the eleventh Federal reserve district, and whether the record of the governor of the Federal reserve bank, as I have presented it to you, proves my contention or fails to prove it; whether the governor is qualified or whether he is not qualified, his policies toward the small member banks, his arbitrary and discourteous treatment accorded the bankers, has destroyed his usefulness as governor of the Federal reserve bank in that district; this is not a question of individuals; he made the record; approximately 50 per cent of the member banks refuse to do business with the Federal reserve bank at Dallas, Tex., as long as this man is governor of the bank.

That the facts may be ascertained and that justice be accorded every one concerned, I ask that the resolution be adopted. [Applause.]

FARM RELIEF

The SPEAKER pro tempore. Under special order of the House the Chair recognizes the gentleman from Oklahoma [Mr. CARTWRIGHT].

Mr. CARTWRIGHT. Mr. Speaker and fellow Members of Congress, I shall ask your attention for but a few minutes. The matter about which I desire to speak is so near to my heart and of such national importance at this time that I know it will be difficult for me to speak with restraint or without seeming exaggeration.

There is, indeed, no issue before the people of America to-day so fundamental and so far-reaching as that which moves me to address you at this hour. It involves no less than the existence of the Nation itself, the maintenance of its every industry and business, the very life of its every inhabitant. This is not a wild exaggeration or a loose flight of the imagination, Mr. Speaker, but simply the statement of an actual and evident fact. Let me illustrate what I mean by asking you to think for a moment of a single industry that compasses the whole land.

Behind the vast network of machinery and the complicated problems of equipment, management, and maintenance in the Nation's transportation system, one clear and indisputed and all-important fact stands out by itself.

Stated in the simplest, concrete terms it is that if an engineer is deprived of food he can not run his train. Apply this simple truth to all the people in every industry and you have no industries. Apply it to all of the people and there is but one end—death to every man, woman, and child. Without food the people perish, without physical sustenance for its inhabitants the Nation dies.

Such obvious statements as these would be laughable but for one great, tragic fact, namely, the serious condition which faces the people who produce the food upon which human life depends in America. If that condition were due to the greed or the lawlessness of the farming people of this country Congress would waste no time in enacting laws to deal with them. We know, however, that you can not find in any other group so large a percentage of peaceful, law-abiding, home-loving people as among the farming population. They constitute one-third of the entire population of the country, yet they are receiving less than one-tenth of the national income.

Since 1920 the value of farm lands has decreased $20,000,000,000, while real estate in industrial centers has advanced more than $20,000,000,000. Since 1910 farm bankruptcies have increased by more than 1,000 per cent. While the farmers of the United States have to pay from 6 to 15 per cent for their bank loans, brokers on the New York Exchange can borrow their billions for stock gambling at the low rate of 4 per cent.

According to the conservative Manufacturers Record, the deflation policy of the Federal reserve bank reduced agricultural values by $32,000,000,000, while the reduction in other business was only $18,000,000,000. The consumers pay more than $30,000,000,000 for farm products, but the farmers receive only $9,000,000,000 of this. Within a period of five years—1920 to 1925—capital invested by farm operators decreased to the alarming extent of $3,000,000,000 per year. In other words, there was a total decrease of $15,000,000,000 in this short period of five years. The total farm indebtedness has grown to the enormous sum of $12,000,000,000, while the percentage of income that goes to agriculture has reached the low figure of 7.5 per cent of the total national income.

I might quote at great length other figures and statistics to show the seriousness of the situation among the millions of farmers upon whose labors our country depends for the basic necessities of life.

No thoughtful man will deny that this situation should and must be remedied, not alone for the sake of the farmers but to prevent general disaster. In all the pages of history there is no greater and more tragic truth than this, namely, that national prosperity and security can not rest on agricultural bankruptcy.

That we are approaching a state of general bankruptcy on the farms of America can not be denied by those who know the actual facts. We who came from the great farming sections feel the increasing pressure of these facts year by year. Day after day, Mr. Speaker, I am receiving letters from farmers and merchants pleading for some action of Congress that will relieve the unfair conditions and lift the undeserved burdens under which they suffer. They do not ask for special privileges for themselves, but for relief from burdensome and unjust conditions imposed on them by special privileges granted to others. They find themselves compelled to purchase in protected markets and to sell in competitive markets, to pay dearly for what they need and to dispose cheaply of what they produce, to see the results of their labor subjected to restricted credit at a high rate of interest, and to market manipulation and price fixing over which they have no control. In addition to these and other artificial and unjust burdens, they must face the inevitable dangers of drought, flood, hurricane, as well as the destructive boll weevil and other devastating enemies of the fruits of their labors.

Mr. BUSBY. Mr. Speaker, will the gentleman yield?

Mr. CARTWRIGHT. Yes.

Mr. BUSBY. A great deal has been said recently about the great prosperity of the country. Do you find that this prosperity applies to your class of people?

Mr. CARTWRIGHT. No, indeed; rather starvation. In the single section of Oklahoma which I have the honor to represent thousands of acres of cotton were literally destroyed by the boll weevil last year, and such has been the case for the past several years.

I wish to state, Mr. Speaker, as a fact beyond dispute that no producing group in this country faces such a combination of handicaps and burdens as those which are imposed from the outside on the farmers of America and their families.

These people are my people, Mr. Speaker. I know them. I love them, I belong to them. They are essential to the very existence of this country. Therefore their problems, their needs, and their rights can not and must not be neglected or ignored. Regardless of party affiliation, we can not fail to agree with that great Democratic leader who said, "The farmer who goes forth in the morning and toils all day—who begins in the spring and toils all summer—and who by the application of brain and muscle to the natural resources of the country creates wealth, is as much a business man as the man who goes upon the board of trade and bets upon the price of grain."

With all my heart, Mr. Speaker, I plead for an honest understanding of the place and the problems of the farmer in the life of this Nation. And I plead further, for earnest support of every constructive measure that may be placed before this body that will bring relief and a fair chance to the agricultural forces upon which the prosperity, the stability, the very life of our country so largely depend. [Applause.]

PERMISSION TO ADDRESS THE HOUSE

Mr. BEEDY. Mr. Speaker, I ask unanimous consent to address the House for five minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maine?

Mr. TILLMAN. Reserving the right to object, Mr. Speaker, a number of us have been allotted time. I do not want to interfere with the gentleman, but I believe I shall have to object.

The SPEAKER pro tempore. Under the provisions of the special order, the Chair will now recognize the gentleman from Utah [Mr. COLTON].

Mr. TILSON. Mr. Speaker, the gentleman from Utah informs me that he is not ready to go on with his remarks at this time.

THE FOURTEENTH, FIFTEENTH, AND NINETEENTH AMENDMENTS

The SPEAKER pro tempore. The Chair will recognize the gentleman from Massachusetts [Mr. TINKHAM] for 1 hour and 30 minutes.

Mr. TINKHAM. Mr. Speaker, there is in the United States indefensible and flagrant nullification of three amendments of the Federal Constitution—the fourteenth amendment (second section), the fifteenth amendment, and the nineteenth amendment—resulting in notorious and scandalous disfranchisement.

The questions involved are not so much questions of race, color, or previous condition of servitude as they are of constitutional enforcement and of a just and equal balance of political power among the various States of the Union, although they revolve about negro disfranchisement.

The issue in all its nakedness is whether there shall be a constitutional government in the United States and whether the Government as it now exists shall be a legitimate one.

The first question to be answered is whether disfranchisement does exist.

Any American who has traveled throughout the United States is familiar with the fact that the negro votes as freely as the white man in the North, East, and West, but not in the South.

James Bryce, in The American Commonwealth (1895, Vol. II, pp. 483, 484), in speaking of the suppression of the negro vote, says:

The modes of suppression have not been the same in all districts and at all times. At first there was a good deal of what is called "bulldozing"—i. e., rough treatment and terrorism—applied to frighten the colored men from coming to or voting at the polls. Afterwards the methods were less harsh. Registrations were so managed as to exclude negro voters, arrangements for polling were contrived in such wise as to lead the voter to the wrong place so that his vote might be refused; and, if the necessity arose, the Republican candidates were counted out or the election returns tampered with. "I would stuff a ballot box," said a prominent man, "in order to have a good, honest government," and he said it in good faith and with no sense of incongruity.

Mr. McKEOWN. Will the gentleman yield for a question?

Mr. TINKHAM. I can not yield.

Mr. McKEOWN. I want to know if the gentleman is still reading what Mr. Bryce said.

Mr. TINKHAM. I am still reading from Mr. Bryce.

Mr. McKEOWN. I will appreciate it if the gentleman will let us know when he comes to his own remarks.

Mr. TINKHAM. I shall do so.

In the same volume—pages 509–510—Mr. Bryce says:

The methods whereby the negroes have been prevented from exercising the rights of suffrage vested in them by law have been described in the last preceding chapter. These means are now seldom violent; but whether violent or pacific, they have been almost uniformly successful. In the so-called border States the whites are in so great a majority that they do not care to interfere with the colored vote, except now and then by the use of money. Through the rest of the South the negro has come to realize that he will not be permitted to exercise any influence on the Government, and his interest in coming to the polls has therefore declined. This is true of all sorts of elections, just as the determination of the whites to suppress his vote is no less strong as respects Federal elections, whose result can not directly affect the administration of State or local affairs, or the imposition of State or local taxes, than it is in State and local elections.

* * * The whites, accustomed to justify their use of force or fraud by the plea of necessity, have become callous to electoral malpractices. The level of purity and honesty in political methods, once comparatively high, has declined, and the average southern conscience is now little more sensitive than is that of professional politicians in northern cities. * * *

In speaking of education and property qualification devices for suppressing the negro vote, Bryce further states—page 512:

* * * The other is that every limitation of the suffrage diminishes pro tanto (amendment 14) a State's representation in Federal elections, thereby weakening its influences in Federal affairs and mortifying its self-esteem. The State of Mississippi, while courageously facing the latter of these difficulties, so far as the colored people are concerned, has sought to evade the former by the ingenious loophole under which the registering officials may admit whites who, though illiterate, are able to give a "reasonable interpretation" of any section of the Constitution. Such whites have, one is told, been able to satisfy the officials far more generally than have the negroes. And if this particular section happens to be put to them, their common sense will find its interpretation obvious.

The Supreme Court of Mississippi in Ratcliff *v.* Beale (1896, 20 So. Rep. 865), in relation to a State constitutional clause imposing a poll tax, stated:

It is in the highest degree improbable that there was not a consistent, controlling, directing purpose governing the convention by which these schemes were elaborated and fixed in the constitution. Within the field of permissible action, under the limitations imposed by the Federal Constitution, the convention swept the circle of expedients to obstruct the exercise of the franchise by the Negro race * * *. In our opinion, the clause was primarily intended by the framers of the constitution as a clog upon the franchise, and secondarily and incidentally only as a means of revenue.

In the Alabama convention of 1901, held with the avowed purpose to "have adopted new constitutional provisions for the exclusion of negroes from participation in politics" (Political Science Quarterly, 1903, Vol. XVIII, p. 480), Ex-Governor Oates, of Alabama, a former Member of this House, after asserting that—

There were two possible methods of assuming control: One was by force and shotguns, the other to cheat the blacks (ibid. p. 487)—

is reported verbatim as saying:

I was an advocate of the latter, because it didn't take life. Now, I never changed votes with my one hand, but I upheld it and counseled it in those who did. I am just as guilty as those who did * * *. Unfortunately it was a necessity. We could not help ourselves. We had to do it or do worse. But we have gone on from bad to worse, until it is a great evil * * *.

Another speaker at the same convention is reported (ibid, p. 487) as saying:

We are tired of frauds; we are tired of ballot-box stuffing; we are tired of buying negro votes; but the fraud will never cease until this vote [negro] is eliminated.

Mr. McKEOWN. Will the gentleman advise us whether he is now through with Mr. Bryce?

Mr. TINKHAM. I have finished with Mr. Bryce and also with the Political Science Quarterly.

Governor Hardwick, of Georgia, in his address before the State convention in acceptance of the Democratic nomination for Governor of Georgia in 1920 according to the Atlanta Constitution, of October 25, 1920, stated:

I shall urge the enfranchisement of all white women in accordance with the Anthony amendment, and the disfranchisement of all black women, on the same plan that negro men are now disfranchised in Georgia.

The Statesman's Yearbook (1926, p. 435), a semiofficial organ published annually in England, conservatively states:

* * * Several of the Southern States have adopted methods—which differ from one another—too complicated for explanation here, with the expressed, avowed purpose of excluding the negroes from the franchise, and yet avoiding the constitutional consequences of discriminating "on account of race, color, or previous condition of servitude."

Lothrop Stoddard, in his latest book entitled "Reforging America" (1927, p. 318), states:

The negro is, of course, disfranchised in the South, and has practically no voice in politics.

André Siegfried, a professor at the School of Social Science at Paris, a diplomat and an investigator for the French Musée Social, who has traveled in America for 20 years, in his book entitled "America Comes of Age," published in 1927—which has been ranked with Alexis de Tocqueville's Democracy in America and which the London Times declares to be "the best book on America since Bryce's Commonwealth"—states, pages 93–94:

At present the blacks are crushed under the heel. In the first place, all political rights are denied them. According to the fifteenth amendment to the Constitution, ratified on March 30, 1870, "the right of a citizen of the United States to vote shall not be denied or abridged by the United States, or by any State, on account of race, color, or previous condition of servitude." The Southern States refused to ratify it, but the measure went through in spite of them. After 1890 laws were passed in all the Southern States which, without actually designating blacks, excluded them from the suffrage. Sometimes it is done by establishing electoral lists; sometimes the applicants are asked to give a "reasonable interpretation" of the Constitution, and naturally a negro never succeeds. A clause called "the grandfather act" automatically allows the whites, even though poor and illiterate, to vote without this examination, provided they are ex-soldiers or the descendants of those who voted in 1867. The fraud is evident and is contrary to the spirit of the Constitution, but the North winks at it; for to interfere would mean another war. If by chance a negro were to slip through the meshes of the net, he would not dare present himself at the polling booth, for he would be beaten off with clubs and his very life would be in danger. In the eastern border States of Virginia and North Carolina this severity has been somewhat relaxed, but in the South as a whole practically all the negroes are treated as pariahs. No negro has ever been appointed or elected to a public position, although in certain rare exceptions—the customs, for example—they have been employed, owing entirely to Federal influence. Otherwise the whites maintain a united front without a single break. There is no doubt that southern politics are based not on equality but on force.

The amendments to the Federal Constitution voted after the Civil War did not aim at suppressing the distinctions between the races, but were simply intended to avoid the injustice of differential treatment. Southern legislation, however, has definitely maintained the latter.

Siegfried is in error in relation to two statements. First, the Southern States did not refuse to ratify the fifteenth amend-

ment. Mississippi, for instance, ratified it unanimously. The elections were not held under military control and the members were elected with full knowledge that they would vote on the amendment. The same is largely true of other Southern States. Second, the so-called grandfather clause is not in effect now, as he implies. It was declared unconstitutional by the Supreme Court in 1915 in the case of Guinn and Beal *v.* United States (238 U. S. 347).

Senator BLEASE, of South Carolina, when referring to the constitution of that State in the Senate on March 2, 1927, according to the CONGRESSIONAL RECORD, volume 68, No. 69, Sixty-ninth Congress, second session, pages 5388–5389, stated:

> We keep the colored man from voting in South Carolina by that constitution. * * * We have plenty of ballot boxes in South Carolina in our primary election where nobody is permitted to vote but white people, where one candidate receives every vote. * * * I think Mr. Coolidge received 1,100 votes in my State. I do not know where he got them. I was astonished to know that they were cast and shocked to know that they were counted.

A Member of another branch of Congress from a State contiguous to the District of Columbia, in referring to the nonenforcement of the fifteenth amendment of the Constitution, in a public letter on November 15, 1927, stated:

> If one were to impute literal truth to the alleged analogy, the conclusive answer would be that the South's resistance to the fifteenth amendment was intended to avert the wretched consequences of the unspeakable crime involved in the adoption of the amendment.

This is a frank admission of the nullification of the fifteenth amendment and a brutal declaration of lawless resistance to its enforcement. This is rebellion.

The Washington Post, in a leading editorial on January 29 last, stated:

> The common sense of the American people, represented in the Republican and Democratic Parties, will save them from making fools of themselves on the eighteenth amendment, the fourteenth, and the fifteenth. By general consent the fourteenth and fifteenth are dealt with in a practical manner in response to the necessities of the situation. * * *

The thirteenth amendment reads as follows:

> SECTION 1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States or any place subject to their jurisdiction.
>
> SEC. 2. Congress shall have power to enforce this article by appropriate legislation.

This amendment abolished slavery in the United States and gave Congress the right to enforce its provision by Federal statute.

Sections 1, 2, and 5 of the fourteenth amendment read as follows:

> SECTION. 1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.
>
> SEC. 2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the legislature thereof is denied to any of the male inhabitants of such State, being 21 years of age and citizens of the United States, or in any way abridged, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens 21 years of age in such State.
>
> SEC. 5. The Congress shall have power to enforce, by appropriate legislation, the provisions of this article.

This amendment declared the negro to be a citizen of the United States, left the control of the electoral franchise with the States, and provided that if the negro were disfranchised the basis of representation in the disfranchising States should be reduced in proportion to the disfranchisement, thus precluding any disfranchising State in the Union from profiting politically by the nullification of the Constitution and preventing the destruction of the just and equal balance of political power among the States through representation fraudulently based upon the disfranchised, and it gave Congress the right to enforce its provisions by Federal statute.

The fifteenth amendment reads as follows:

> SECTION 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.
>
> SEC. 2. The Congress shall have power to enforce this article by appropriate legislation.

Although this amendment did not confer the right of suffrage upon any one, it prohibited the States from giving preference in the suffrage to one citizen of the United States over another on account of race, color, or previous condition of servitude, and gave Congress the right to enforce its provision by Federal statute.

The nineteenth amendment reads as follows:

> The right of the citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex. Congress shall have power to enforce this article by appropriate legislation.

Although this amendment did not confer the right of suffrage upon any one, it prohibited the States from giving preference in the suffrage to one citizen of the United States over another on account of sex, and gave Congress the right to enforce its provision by Federal statute.

In discussing the thirteenth, the fourteenth, and the fifteenth amendments, the Supreme Court of the United States, in the Slaughter House cases (1872, 83 U. S. 36), stated:

> Before we proceed to examine more critically the provisions of this amendment [the fourteenth amendment], on which the plaintiffs in error rely, let us complete and dismiss the history of the recent amendments, as that history relates to the general purpose which pervades them all. A few years' experience satisfied the thoughtful men who had been the authors of the other two amendments that, notwithstanding the restraints of those articles on the States and the laws passed under the additional powers granted to Congress, these were inadequate for the protection of life, liberty, and property, without which freedom to the slave was no boon. They were in all those States denied the right of suffrage. The laws were administered by the white man alone. It was urged that a race of men distinctively marked as was the negro, living in the midst of another and dominant race, could never be fully secured in their person and their property without the right of suffrage.
>
> Hence the fifteenth amendment, which declares that "the right of a citizen of the United States to vote shall not be denied or abridged by any State on account of race, color, or previous condition of servitude." The negro having, by the fourteenth amendment, been declared to be a citizen of the United States is thus made a voter in every State of the Union.
>
> We repeat, then, in the light of this recapitulation of events, almost too recent to be called history, but which are familiar to us all; and on the most casual examination of the language of these amendments no one can fail to be impressed with the one pervading purpose found in them all, lying at the foundation of each, and without which none of them would have been even suggested; we mean the freedom of the slave race, the security and firm establishment of that freedom, and the protection of the newly made freeman and citizen from the oppressions of those who had formerly exercised unlimited dominion over him. It is true that only the fifteenth amendment, in terms, mentions the negro by speaking of his color and his slavery. But it is just as true that each of the other articles was addressed to the grievances of that race, and designed to remedy them as the fifteenth.

Again, in Hodges *v.* United States (1906, 203 U. S. 1), we read:

> At the close of the Civil War, when the problem of the emancipated slaves was before the Nation, it might have left them in a condition of alienage, or established them as wards of the Government, like the Indian tribes, and thus retained for the Nation jurisdiction over them, or it might, as it did, give them citizenship. It chose the latter. By the fourteenth amendment it made citizens of all born within the limits of the United States and subject to its jurisdiction. By the fifteenth it prohibited any State from denying the right of suffrage on account of race, color, or previous condition of servitude, and by the thirteenth it forbade slavery or involuntary servitude anywhere within the limits of the land. Whether this was or was not the wiser way to deal with the great problem is not a matter for the courts to consider. It is for us to accept the decision, which declined to constitute them wards of the Nation or leave them in a condition of alienage where they would be subject to the jurisdiction of Congress, but gave them citizenship, doubtless believing that thereby in the long run their best interests would be subserved, they taking their chances with other citizens in the States where they should make their homes.

The nullifiers of these amendments have claimed repeatedly that the fifteenth amendment repealed the fourteenth amendment. The falsity of this claim is proved by the decisions of

the Supreme Court in the two cases above, the Slaughter House cases and Hodges *v.* United States, and by John S. Wise in his book on Citizenship—1906, page 231—in which he states:

The argument has been made that the power granted to Congress by the fourteenth amendment to reduce representation for disfranchisement was repealed by the adoption of the fifteenth amendment. The fallacy of this contention is apparent at a glance. The fifteenth amendment prohibits the States from denying or abridging the right of suffrage for a single cause, viz, race, color, or previous condition. The fourteenth amendment authorizes the reduction of representation if the right of suffrage is denied or abridged for any cause.

The Supreme Court has repeatedly construed and commented upon the fourteenth and fifteenth amendments, and one can find no suggestion in any decision in support of the allegation that the fifteenth amendment repealed the fourteenth amendment in whole or in part.

The fifteenth amendment did not repeal the fourteenth amendment, first, because there is no inconsistency between the two, the latter being cumulative and supplemental, not repugnant, to the other; second, because to forbid an act does not repeal a penalty otherwise laid upon it; and, third, because the judicial remedy, under the fifteenth amendment, may be sought by any aggrieved citizen, and perhaps only by a citizen, while the remedy by reduction of representation, under the fourteenth amendment, is a public remedy, enforceable only by Congress, which the additional private remedy under the fifteenth amendment can not be held to supersede or disturb.

In relation to the power of Congress to enforce the thirteenth amendment, Cooley's Constitutional Limitations (8th ed., 1927, Vol. I, p. 608) states:

It is not open to doubt that Congress may enforce the thirteenth amendment by direct legislation, punishing the holding of a person in slavery or in involuntary servitude, except as a punishment for crime. Clyatt *v.* United States (1905, 197 U. S. 207) and United States *v.* Reynolds (1914, 235 U. S. 133).

In Bailey *v.* Alabama (1911, 219 U. S. 219), with reference to the thirteenth amendment, we read:

While the amendment was self-executing, so far as its terms were applicable to any existing condition, Congress was authorized to secure its complete enforcement by appropriate legislation. As said in the Civil Rights cases: "By its unaided force and effect it abolished slavery and established universal freedom. Still, legislation may be necessary and proper to meet all the various cases and circumstances to be affected by it, and to prescribe proper modes of redress for its violation in letter or spirit. And such legislation may be primary and direct in its character; for the amendment is not a mere prohibition of State laws establishing or upholding slavery, but an absolute declaration that slavery or involuntary servitude shall not exist in any part of the United States."

No Federal statute has been passed to enforce the thirteenth amendment, because every State in the Union has forbidden slavery either in its constitution or by statute law. This amendment is not violated. There is, therefore, no nullification.

In relation to the power of Congress to enforce the fourteenth amendment, Cooley's Constitutional Limitations (8th ed., 1927, Vol. I, p. 602) states:

This amendment of the Constitution does not concentrate power in the General Government for any purpose of police government within the States; its object is to preclude legislation by any State which shall "abridge the privileges or immunities of citizens of the United States" or "deprive any person of life, liberty, or property without due process of law," or "deny to any person within its jurisdiction the equal protection of the law"; and Congress is empowered to pass all laws necessary to render such unconstitutional State legislation ineffectual. This amendment has received a very full examination at the hands of the Supreme Court of the United States in the Slaughter House cases (1872, 16 Wall. 36) and in United States *v.* Cruikshank (1875, 92 U. S. 542), with the conclusions above stated.

In Strauder *v.* West Virginia (1879, 100 U. S. 303) we read:

* * * It [the fourteenth amendment] was designed to assure to the colored race the enjoyment of all the civil rights that under the law are enjoyed by white persons, and to give to that race the protection of the General Government, in that enjoyment, whenever it should be denied by the States. It not only gave citizenship and the privileges of citizenship to persons of color, but it denied to any State the power to withhold from them the equal protection of the laws, and authorized Congress to enforce its provisions by appropriate legislation * * *.

In the Civil Rights cases (1883, 109 U. S. 3) we read:

The fourteenth amendment is prohibitory upon the States only, and the legislation authorized to be adopted by Congress for enforcing it is not direct legislation on the matters respecting which the States are prohibited from making or enforcing certain laws or doing certain acts, but is corrective legislation, such as may be necessary or proper for counteracting and redressing the effect of such laws or acts.

Although the fourteenth amendment is grossly violated by flagrant disfranchisement, no action has been taken either by Federal statute or by reducing the representation of the disfranchising States. This is nullification pure and simple.

In relation to the power of Congress to enforce the fifteenth amendment, Cooley's Constitutional Limitations (8th ed., 1927, Vol. I, p. 166) states:

* * * The fifteenth amendment provides that "the right of citizens of the United States to vote shall not be denied or abridged by the United States, or by any State, on account of race, color, or previous condition of servitude." To this extent it is self-executing, and of its own force it abolishes all distinctions in suffrage based on the particulars enumerated. But when it further provides that "Congress shall have power to enforce this article by appropriate legislation," it indicates the possibility that the rule may not be found sufficiently comprehensive or particular to protect fully this right to equal suffrage, and that legislation may be found necessary for that purpose * * *

In Ex parte Yarbrough (1884, 110 U. S. 651), in referring to the fifteenth amendment, we read:

* * * The new constitutional right was mainly designed for citizens of African descent. The principle, however, that the protection of the exercise of this right is within the power of Congress, is as necessary to the right of other citizens to vote as to the colored citizen, and to the right to vote in general as to the right to be protected against discrimination.

The exercise of the right in both instances is guaranteed by the Constitution, and should be kept free and pure by congressional enactments whenever that is necessary.

In Giles *v.* Harris (1903, 189 U. S. 475), a case which challenged the suffrage provisions in the constitution of Alabama as unconstitutional, the court said:

* * * Apart from damages to the individual, relief from a great political wrong if done, as alleged, by the people of a State and the State itself, must be given by them or by the legislative and political department of the Government of the United States.

Although the fifteenth amendment is grossly violated by flagrant discrimination, no action has been taken by Federal statute in the form of a Federal election law or otherwise. This is nullification, pure and simple.

In relation to the power of Congress to enforce the nineteenth amendment, it is provided in the same terms as in the thirteenth, the fourteenth, and the fifteenth amendments.

Although the nineteenth amendment is grossly violated by the flagrant disfranchisement of colored women, no action has been taken by Federal statute. This is nullification, pure and simple.

As to the power of Congress to enforce these amendments, we read in Cooley's Constitutional Limitations (8th ed., 1927, Vol. II, p. 1361) the following statement, with citations:

* * * Until recently the regulation and control of all elections, including elections for Members of Congress, and the punishment of offenses against election laws, have been left to the States exclusively. Congress, however, has undoubted authority to make such regulations as shall seem needful to insure a full and fair expression of opinion in the election of Members of Congress, and also to guard and protect all rights conferred by the recent amendments to the Federal Constitution.

That Congress has the complete right to protect all rights and immunities under the Constitution is declared in the case of United States *v.* Reese et al. (1873, 92 U. S. 214), where it is stated:

Rights and immunities created by or dependent upon the Constitution of the United States can be protected by Congress. The form and the manner of the protection may be such as Congress, in the legitimate exercise of its legislative discretion, shall provide. These may be varied to meet the necessities of the particular right to be protected.

The rights and immunities guaranteed by the Constitution are of its essence, and it is these that make the United States free and all its citizens equal before the law. It is the constitutional obligation and paramount duty of Congress to enforce these rights and immunities guaranteed by the Constitution.

A member of another branch of Congress from a State contiguous to the District of Columbia, on January 23 last (CONGRESSIONAL RECORD, vol. 69, No. 31, pp. 1927–1934), in defending the lawless and ruthless nullification of the fourteenth, the fifteenth, and the nineteenth amendments, stated:

* * * The South proposes to exercise her rights under the Constitution as her own will and judgment may dictate, undeterred by those who are controlled by either hate or ignorance—

And—

* * * that the right of suffrage is left to the States and that they can impose qualifications and conditions requisite to its exercise, provided they do not discriminate on account of sex, race, color, or previous conditions of servitude—

And he quotes at length and with much approval Williams *v.* Mississippi (1898, 170 U. S. 213).

In the case of Williams *v.* Mississippi, and in all other cases that have come before the Supreme Court which appear to give the States exclusive control of the franchise, it has been decided only that where a State law upon its face and in its terms did not discriminate between the races it was constitutional, except in the case of Guinn and Beal *v.* United States (1915, 238 U. S. 347). In this case, which declared unconstitutional the so-called grandfather clause, the question at issue related to a section of the constitution of the State of Oklahoma, which provided—

that no person, or lineal descendant of such person, who was on January 1, 1866, or any time prior thereto, entitled to vote under any form of government or who resided in some foreign nation, shall be denied the right to register on account of his inability to read or write any section of the constitution.

The court held that this provision was unconstitutional, notwithstanding that upon its face and in its terms it did not discriminate between the white man and the negro; it took judicial notice of the fact that as the fourteenth amendment of the Constitution, by which the Negro was made a citizen, was not adopted until 1868, and the fifteenth amendment not until 1870, it did in fact and actually discriminate between the white man and the Negro.

In other words, the court ruled that, although the law of a State upon its face did not discriminate in its terms between the races, it was unconstitutional if there was evidence of discrimination in its application and administration, and it took judicial notice that there was such discrimination in the application and administration of the law in question.

This decision is in harmony with the very important case of Yick Wo *v.* Hopkins (1886, 118 U. S. 356), where the court laid down the principle that a law may be fair and impartial upon its face and yet in its application and administration discriminate and be unconstitutional, and that the court would so hold if evidence of discrimination should be shown. The court said:

* * * In the present cases we are not obliged to reason from the probable to the actual and pass upon the validity of the ordinances complained of, as tried merely by the opportunities which their terms afford, of unequal and unjust discrimination in their administration. For the cases present the ordinances in actual operation, and the facts shown establish an administration directed so exclusively against a particular class of persons as to warrant and require the conclusion that whatever may have been the intent of the ordinances as adopted, they are applied by the public authorities charged with their administration, and thus representing the State itself, with a mind so unequal and oppressive as to amount to a practical denial by the State of that equal protection of the laws which is secured to the petitioners, as to all other persons, by the broad and benign provisions of the fourteenth amendment to the Constitution of the United States. Though the law itself be fair on its face and impartial in appearance, yet if it is applied and administered by public authority with an evil eye and an unequal hand, so as practically to make unjust and illegal discriminations between persons in similar circumstances, material to their rights, the denial of equal justice is still within the prohibition of the Constitution. * * *

* * * No reason whatever, except the will of the supervisors, is assigned why they should not be permitted to carry on, in the accustomed manner, their harmless and useful occupation, on which they depend for a livelihood. And while this consent of the supervisors is withheld from them and from 200 others who have also petitioned, all of whom happen to be Chinese subjects, 80 others, not Chinese subjects, are permitted to carry on the same business under similar conditions. The fact of this discrimination is admitted. No reason for it is shown, and the conclusion can not be resisted, that no reason for it exists except hostility to the race and nationality to which the petitioners belong, and which in the eye of the law is not justified. The discrimination is therefore illegal and the public administration which enforces it is a denial of the equal protection of the laws and a violation of the fourteenth amendment of the Constitution.

In Williams *v.* Mississippi, mentioned above, the court quotes the case of Yick Wo *v.* Hopkins, and states in conclusion that the constitution of Mississippi and its statutes—

Do not on their face discriminate between the races, and it has not been shown that their actual administration was evil, only that evil was possible under them.

These cases conclusively show that the Supreme Court will not allow constitutional rights and immunities to be circumvented or nullified if there is before the court evidence of circumvention and nullification in the application and administration of State laws. Any other doctrine would be monstrous. Where the law gives the right, the law ought to secure the exercise thereof. Congress is under the absolute obligation of preventing circumvention and nullification of the fourteenth, the fifteenth, and the nineteenth amendments.

It is defiantly lawless and altogether revolutionary that Congress should refuse to enforce these amendments which guarantee equality of citizenship in the United States. To enforce the fifteenth and the nineteenth amendments now so notoriously and scandalously nullified, Congress should pass a uniform election law, giving equal rights to all those who may be entitled to vote in the United States. In default of the passage of such a law, the second section of the fourteenth amendment, which is mandatory, should be enforced by the reduction of the basis of representation in proportion to disfranchisement. The second section of the fourteenth amendment gives Congress no option, is not permissive or directory, but mandatory.

* * * But when the right to vote at any election for the choice of electors for President and Vice President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the legislature thereof, is denied to any of the male inhabitants of such State, being 21 years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion, or other crimes, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens 21 years of age in such State.

In commenting upon this amendment, the Constitution of the United States of America, as amended to December 1, 1924, annotated (Sixty-eighth Congress, first session, Senate Document 154, page 742, under amendment 14, section 2, "Reduction of State's representation in Congress"), states:

Congress has never exercised the power conferred upon it by this section of reducing the representation of a State in the House of Representatives, but there can be no question of its power or its right to do so. Of its duty to do so, it alone is the judge. The amendment places the responsibility of enforcing its provisions upon that body. (Watson on the Constitution, Vol. II, p. 1653.)

Watson precedes the above statement with the following:

The language of the section recognized the power but not the right of a State to abridge the right of suffrage. There is a great difference between the exercise of a power and the exercise of a right. Sovereignty can not confer the right to commit a wrong, but it may confer the power to do so. But if a State should deny its electors the right to vote at any election for any such officers, or in any way abridge such right, then the section names a punishment which Congress may inflict upon the State for such denial or abridgment, and provides that it shall be a reduction of the State's representation in the National House of Representatives according to the manner provided in the section.

Andrew's New Manual of the Constitution (1916, pp. 278, 279), in discussing the second section of the fourteenth amendment, under "Inequality in representation," reads:

The number of Representatives being in proportion to the whole population of the States, including those that are colored, if suffrage were denied to this class the former slave States would have delegations in Congress much larger, in proportion to the number of voters, than the original free States. To remedy this inequality was the object of this second section. By it the States were not required to allow the blacks the right of suffrage; but if they did not allow it their representation in Congress was to be proportionately diminished. They might take their choice between general suffrage and more Congressmen or white suffrage and fewer Congressmen.

The fourteenth, the fifteenth, and the nineteenth amendments to the Constitution are as much parts of the Constitution as the eighteenth.

The eighteenth amendment reads as follows:

After one year from the ratification of this article the manufacture, sale, or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all territories subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

SEC. 2. The Congress and the several States shall have concurrent power to enforce this article by appropriate legislation.

The power of Congress to enforce this amendment is provided in exactly the same language as in the fourteenth, the fifteenth, and the nineteenth amendments.

It is the height of hypocrisy, mendacity, and fraud to assert that the failure to pass legislation to enforce the eighteenth amendment nullifies the Constitution unless it is admitted that failure to pass legislation to enforce the fourteenth, the fifteenth, and the nineteenth amendments nullifies the Constitution also.

In the CONGRESSIONAL RECORD of February 4 last (vol. 69, No. 41, pp. 2471–2475) there was inserted a speech on the enforcement of the eighteenth amendment made on February 1 last at a so-called law-enforcement meeting at Richmond, Va., under the auspices of the Woman's Christian Temperance Union, the Anti-Saloon League, and other organizations, where the pinnacle of nauseating hypocrisy was reached by one William G. McAdoo, a conspicuous sympathizer with the nullification of the fourteenth, the fifteenth, and the nineteenth amendments of the Constitution, whose speech has been given wide currency. In this speech appear the following statements:

> The real issue, the fundamental issue, is: Shall the Constitution and the laws of the United States be respected and obeyed by the people and by the duly constituted officers of every State in the Union? Or shall a State in its sovereign capacity be permitted to disregard any part of the Constitution of the United States which it elects not to obey?
>
> * * * The policy of prohibition is therefore firmly anchored in the Constitution, and every unlawful effort on the part of any individual or group or on the part of a sovereign State to thwart or defeat it is in direct contravention of the supreme law of the land.
>
> It is therefore imperative that the American people shall frankly face the question of enforcement and the issues which it raises. Present conditions can not be allowed to continue. If the law is a good law, it must not be repealed; and if it remains unrepealed, it must be enforced. The evils from which we suffer are not the evils of prohibition but the evils of nonenforcement of prohibition. We can rid ourselves of these only by substituting enforcement for nonenforcement. The patriotic intelligence of the country should therefore be directed to the best means of securing enforcement.
>
> * * * We must maintain the Constitution, not alone by obedience to it but by pursuing the lawful processes it prescribes for change or amendment, if we are dissatisfied with its provisions. Let us look always with reverent eyes and patriotic hearts upon the noble constitutional edifice won by the blood of our fathers and maintained by the blood of their sons. That edifice rests upon the foundation of the 48 sovereign States which are integral parts of the Federal Union. Each State has contributed a column to the support of the constitutional structure. No sovereign State would deliberately attempt to pull down the column it has contributed to the constitutional edifice, and yet if the doctrine now mistakenly advanced that a State may determine for itself what part or parts of the Constitution it will obey, should prevail, the end of constitutional government is in sight * * *.

There is before the Committee on Rules a resolution for an investigation of disfranchisement, introduced on December 5 last. It proposes the reduction of representation in the several States according to the disfranchisement disclosed by the investigation, and it is the plain constitutional duty of this committee to report out such an order of investigation. Should the present Congress refuse to act upon this resolution, which would disclose that the laws in the disfranchising States are unconstitutional because they do discriminate between the races in their application and administration, and that there exists vast disfranchisement, then once again Congress would put its seal of approval upon nullification and lawlessness. That it is the duty of Congress to make this investigation and to enforce the fourteenth amendment can not be denied.

Let us admit frankly that the negro has been abandoned to his political fate and will remain abandoned unless he organizes politically and asserts his power in those States where he may freely vote; the Constitution, however, can not be abandoned as the negro has been abandoned. This scandalous disfranchisement, in violation of the Constitution, has been brought repeatedly to the attention of Congress by resolution and otherwise. Yet no action has been taken, and there has been treated with mockery and scorn the suggestion that the Constitution be enforced. This can no longer continue.

But there is much more in the refusal of Congress to enforce the Constitution than the lawless and unconstitutional suppression of the negro vote. There is involved the destruction of a just and equal balance of political power among all the States of the Union. Before the War of the Rebellion, representation in the lower House of Congress and in the Electoral College, which chooses the President and the membership of which is equal to the number of Representatives and Senators, was based upon the whole population plus 60 per cent of the negro population. Automatically with the freeing of the negro, representation in the lower House of Congress and in the Electoral College was based upon the total white population and the total negro population, because the Constitution provides for representation based upon all free persons. The States of the South now count all the white population and all the negro population as the basis for their representation, and obtain in Congress and in the Electoral College representation for both the white population and the negro population, the latter of which they disfranchise. These States now have more political power than they had before the war, when they were allowed to count only 60 per cent of the colored population. In other words, they have annexed the entire political power of the negro, whereas before the Civil War they had only 60 per cent of it. As the negro population is about one-third of the population of these States, each white person in these States has at least one-third more political power than each white person in the other States, and in those States where the negro population is largest at least double the political power. If the fourteenth amendment were not nullified, these States would have about one-third fewer Representatives and about one-third fewer members in the Electoral College than they have now, and would find it impossible to control the House of Representatives and to elect the President, which they have done frequently.

It has been said by an eminent authority that—

> Every Representative sent from a disfranchising State since the disfranchising process began, in excess of this reduced number, has been sent without authority and has occupied his seat without right or title. The House of Representatives would have been legally warranted at any time since Mississippi disfranchised the negro in 1891 in refusing to admit any delegation from a disfranchising State. When such a delegation appears it is known that its number exceeds the number which the State has a constitutional right to send, and as they all stand upon the same ground and are alike subject to the same infirmity, the House can not distinguish between them and is not called upon to admit either or any of them. It is for any State to make the title of each of its Representatives good by sending only such number as the Constitution authorizes. A suffrage system in violation of the Federal Constitution is, so far as it affects the Federal Government, void as an entirety, and no Representative claiming to be elected under such a system can show a constitutional title to a seat in Congress.

If a presidential election should turn upon the unconstitutional electoral votes now based upon the unconstitutionally elected Representatives, there well might follow a struggle for the possession of the Government which would lead to revolution.

With the nullification of the fourteenth, the fifteenth, and the nineteenth amendments, not only are the elections in these States unconstitutional and lawless, but the presidential elections are tainted with fraud and illegitimacy.

Negro disfranchisement is more of a fraud upon the whole country that it is upon the negro. By his disfranchisement and the nullification of the mandatory fourteenth amendment, which requires reduction of representation in proportion to disfranchisement, the great, Northern, Eastern, and Western States are deprived of their proportionate, just, and legal representation. Shall the people of the Southern States be whole persons politically and those of other States only two-thirds or half persons politically, by the nullification of the Constitution? Shall fraudulent majorities in Southern States elect the President and control the Congress, in violation of the Constitution and its just provisions? Shall the disfranchising States directly impair the political rights of every other State and of every voter in every other State?

Thomas Jefferson is quoted in the Virginia Enquirer of April 27, 1824, in connection with the struggle for equalizing representation among the counties of Virginia, as saying in part:

> The basis of our constitution is in opposition to the principle of equal political rights, refusing to all but freeholders any participation in the natural right of self-government. The exclusion of a majority of our free men from the right of representation is merely arbitrary and an assumption of the minority over the majority. In the representative privilege the equality of political rights is entirely prostrated by our constitution. Upon what principle of right or reason can any one justify the giving to every citizen of Warwick as much weight in the Government as 22 equal citizens in Loudoun? (Johns Hopkins Studies, "Representation in Virginia," p. 27.)

Abraham Lincoln, in his Peoria speech of 1854, after stating that under the Constitution the slave States voted on three-fifths of slaves, five slaves being counted as equal to three white—that Maine had 581,813 population, while South Caro-

lina with but 274,567 had the same number of Representatives, and "thus each white man in South Carolina is more than the double of any man in Maine"—that the same was true, though not to the same extent, of all citizens of the slave States over citizens of the free States, and that without any exception every voter in every slave State had more legal power in the Government than any voter in any free State, he proceeds:

Now, all this is manifestly unfair; yet, I do not mention it to complain of it, in so far as it is already settled. It is in the Constitution, and I do not for that cause or any other cause propose to destroy or alter or disregard the Constitution. I stand to it fairly, fully, and firmly. But when I am told that I must leave it altogether to other people to say whether new partners are to be bred up and brought into the firm on the same degrading terms against me, I respectfully demur. I insist that whether I shall be a whole man or only the half of one in comparison with others is a question in which I am somewhat concerned, and one which no other man can have a sacred right of deciding for me. If I am wrong in this, if it really be a sacred right of self-government in the man who shall go to Nebraska to decide whether he will be the equal of me or the double of me, then, after he shall have exercised that right, and thereby shall have reduced me to a still smaller fraction of a man than I already am, I should like for some gentleman deeply skilled in the mystery of "sacred rights" to provide himself with a microscope, and peep about and find out if he can what has become of my "sacred rights."

To-day it is not in the Constitution that a man in one State shall be "a whole man or only the half of one in comparison with others" in other States. On the contrary, the fourteenth, the fifteenth, and the nineteenth amendments forbid this very inequality.

Section 2 of Article IV of the Federal Constitution states:

The citizens of each State shall be entitled to all privileges and immunities of citizens in the several States.

In part confirmation of the shameful inequality of franchise rights in the several States, the following figures of votes cast in the 1924 elections for Representatives in Congress are impressive and conclusive.

Whereas the State of Michigan has 13 congressional districts, the total vote cast in the sixth district alone was 202,896; whereas the State of Missouri has 16 congressional districts, the total vote cast in the tenth district alone was 201,164. The total vote cast in the entire 10 districts of Alabama was only 152,343; the total vote cast in the entire 8 districts of Mississippi was only 98,576; and the total vote cast in the entire 8 districts of Louisiana was only 93,311.

Mr. BLANTON. Will the gentleman yield?

Mr. TINKHAM. I can not yield now.

Mr. BLANTON. Mr. Speaker, I make a point of order. I make the point of order that there is no quorum present. There are about 25 Democrats and 25 Republicans present.

The SPEAKER pro tempore. The gentleman from Texas makes the point of order that there is no quorum present. The Chair will count.

Mr. BLANTON. This speech ought to have somebody here to hear it, and I promised the gentleman to have a quorum here. I think we should have a quorum, especially when the gentleman will not yield even for a question.

Mr. LAGUARDIA. Mr. Speaker, I make the point of order that the gentleman from Texas is out of order. The gentleman from Massachusetts has not yielded the floor.

Mr. BLANTON. But I have made a point of order of no quorum, which is constitutional and always in order.

Mr. LAGUARDIA. Then do not make a speech about it.

Mr. BLANTON. Well, the gentleman from New York should not make a speech.

Mr. LAGUARDIA. I am addressing myself to the Speaker, and properly so.

Mr. BLANTON. Mr. Speaker, as the gentleman from Massachusetts [Mr. TINKHAM] does not care whether he is heard or not, I withdraw the point of order.

Mr. TINKHAM. The theory of our Government is that of a union of equal States, the essence of which is that all the States shall have equal political power and that the vote of a citizen of the United States in one State shall be the equal of the vote of a citizen of the United States in any other State. Disfranchisement in the Southern States impairs the political rights of every other State and of every voter in every other State. The question has become a question of the equality of white men. Shall all the States possess equal political power, or shall one-fourth of the States of the Union possess double the political power possessed by the remaining States? Shall all white persons possess equal political power, or shall each white person in the disfranchising States possess more political power than that possessed by each white person in the remaining States? This is the concern of every white citizen who wishes to preserve and defend his own political rights.

There can be no more deadly assassination of the principles that our Union is a union of equal States and that all American citizens are entitled to the same privileges and immunities and are equal than the fact that in certain States of the Union one vote is equivalent to one and one-third votes or one and one-half votes in other States, made so in part by craftily drawn legislative enactments, partisan administration of the election laws, and by fraud, in violation of a constitutional mandatory requirement that representation shall be reduced where disfranchisement exists, that no State shall deny to any person within its jurisdiction the equal protection of the laws, and that the right of citizens to vote shall not be denied or abridged by any State on account of race, color, or previous condition of servitude.

At this moment United States marines are in Nicaragua, it is said authoritatively, "to guarantee constitutional and fair elections." What answer can the Government who sent the marines to Nicaragua "to guarantee constitutional and fair elections" there make to the demand that the fourteenth and the fifteenth amendments of our Constitution be enforced here by Federal action?

The Congress of the United States has no moral right to ask the citizens of the United States to obey laws which it enacts when it has refused to obey the plain commands of the Constitution in relation to its own elections and the election of the President. For America to pose before the world as dictator of international morality and sponsor of international ethics with her national representatives elected in flagrant and defiant violation of her Constitution is the height of national hypocrisy.

Honest and constitutional government does not to-day exist in the United States with the nullification of the fourteenth and the fifteenth amendments of the Constitution.

DOMINATION OF THE WHITE RACE—MR. HOOVER AS A PRESIDENTIAL CANDIDATE

The SPEAKER pro tempore. Under the special order of the House the Chair recognizes the gentleman from Arkansas [Mr. TILLMAN] for 25 minutes. [Applause.]

Mr. TILLMAN. Mr. Speaker, I think I shall pursue the same course followed by the gentleman from Massachusetts and decline to be interrupted in order that I may rush through with my remarks and allow the House to adjourn.

Mr. Speaker, I think some one should say a few words in reply to the biennial message delivered by the gentleman from cultured Boston [Mr. TINKHAM], which those of us from the South have been compelled to listen to for the last several Congresses, but I shall be brief in what I say on that subject.

The gentleman from Massachusetts lives in Boston, and he deplores the fact that there are no colored people in office in the South. I was just wondering whether or not up in Boston, in Massachusetts, from which the President comes and from which the gentleman himself comes, if they have ever had a negro postmaster in the city of Boston. It could be easily arranged. There are intelligent negroes there. The President has the right to appoint and he is a Republican. The Senate has the right to confirm and is Republican. So the gentleman from Massachusetts is not consistent in wanting to fasten upon the South negro domination, negro control, and negro officials when he does not occasionally recommend some colored man for postmaster in the city of Boston.

Now, gentlemen, upon both sides of the House, I am one of a good many liberal Members from the South. I have voted for a great many things the people of the North wanted, but the people of the South are determined on one thing, and that is white domination. We demand it not only for the South but for the North, the East, and the West.

Wherever the Anglo-Saxon places his foot he becomes a conqueror and dominates. It is best for the world that he should. The people in the South are white and they are going to control the South and should do so.

If the Japanese predominated in California the PHIL SWINGS, the Mrs. KAHNS, the HENRY BARBOURS, the LEAS, the SHORTRIDGES, and the JOHNSONS would control California, and I would say God speed to them in doing so. [Applause.] If the negroes outnumbered and outvoted the Irish in Boston, I would say, "Irishman, keep in the saddle," and he would.

The best thing that ever happened to America was the advent of the white man. We have great respect for the Indian. He has been wronged, robbed, and outraged, and yet the best thing for civilization, the best thing for the world, and the best thing for him was that the white man came here. The white man found a few tepees on Manhattan Island while now there rise 30-story buildings, with their proud tops piercing the sky. The great city of New York has been substituted for the few

wigwams that were once found on Manhattan Island. Out in Chicago there were a few tepees and yet now we have the city of Chicago.

There were a few narrow trails through America, now we have all through the North, the South, the East, and the West great railroads. The Indians embarked in small canoes on our magnificent streams, and now palatial steamers run up and down these great streams. We had Massasoit, Pushmataha, Quannah Parker, Osceola—a few prominent Indians—now we have in their stead the Mayo brothers, the Wrights, Lindbergh, Edison, a host of wonderful men in many fields of activity.

The Indians had no schools. They had no colleges. They had nothing except a few scattered tribes and they were fighting each other all the time. We can say much for the Indian. He has been outraged, he has been wronged, and yet it was God, kismet, fate, destiny.

I want the people to govern who are best fitted to govern, whether in Dixie or elsewhere. I sometimes think we are in a rather dangerous position, especially with people who are all the time apparently criticizing white people for doing what they should and taking the side of some inferior race.

I am proud of my race. I am part English and part Scotch, and a good deal Irish—a rather sorry combination, perhaps, some people may say, but yet I am all white. I have wondered from what race or from what people the distinguished gentleman from Massachusetts ascended or descended. [Laughter.] I am for the white man.

Mr. SCHAFER. Will the gentleman yield?

Mr. TILLMAN. I prefer not to yield now. I want to rush along and get through. I have some other things to say. This is only incidental.

Mr. SCHAFER. Mr. Speaker, I believe we ought to have a quorum here.

Mr. TILLMAN. I yield to my distinguished and able friend. [Laughter and applause.]

Mr. SCHAFER. Does the gentleman feel so strongly for the white man that he would deny a man who was not white the rights and privileges guaranteed under the Constitution, especially a gentleman who is so strong for the eighteenth amendment of the Constitution?

Mr. TILLMAN. Yes; I am for the eighteenth amendment, and do not straddle or dodge on the issue. Let me tell the gentleman something. We have had to endure a good deal by being accused of violating the Constitution, and a lot of other things. I want to tell the gentleman that all through Dixie, all through the South, and particularly in my State, we do not disfranchise anybody except in a perfectly legitimate, legal, and constitutional way.

Mr. SCHAFER. That does not square with the speech the gentleman is making.

Mr. TILLMAN. I will respond to the gentleman's question. In the good State of Arkansas, and I know more about that State than any other, we have a perfectly legal and constitutional requirement that every man, white or black, every woman, white or black, before he or she exercises the right of suffrage, shall pay $1 into the school fund for the benefit of the common school children. This does not discriminate against anybody, and so, as far as I am concerned—and I have been a member of my State senate—I have not voted for any measure that did not apply equally to whites and to blacks. Now, this is an answer to the gentleman's question.

Going back a little, white men, let me tell you something. Do you know that in all the world there are 31,000,000 square miles of land controlled by colored people. Now, get this: There is only 22,000,000 square miles of land controlled by white people. Do you know that in all the world there are 1,700,000,000 human beings, and 500,000,000 only are white, and 1,150,000,000 are colored.

The last war was a white man's war, and 10,000,000 of the bravest and best men of the country who were white were killed. The white people are not increasing rapidly like the colored people. They have smaller families; and I can see the time when a rising tide of color may submerge the proud white man; and yet everything under God's sun, practically, that is worth a "continental" can be traced to the intelligence, activity, and morality of the white man.

Mr. GREEN of Florida. Will the gentleman yield?

Mr. TILLMAN. Yes; I yield to the gentleman.

Mr. GREEN of Florida. I would like to say, for argument's sake, that if the gentleman would take about 80 or 90 drops of the color of the white man, about 10 drops of the color of the black man, about 1 drop of the color of the Jap and a drop of the color of the Chinese, and then a drop of the color of the different foreign strains in our country and mingle them all together and hold them between himself and a bright light he would see the complexion of our Nation 500 years from today unless something is done whereby the races may be segregated.

Mr. TILLMAN. I am afraid my young friend speaks the gospel truth. Give the white man his due. One of the most beautiful things ever written was written by a woman—and it is philosophy. Just listen to this:

> Wherever the white man's light is shed
> (Oh! far has that light been thrown),
> Though nature has suffered and beauty fled,
> Yet the goal of the race has been thrust ahead,
> And the might of the race has grown,
> For this is the law: Be it cruel or kind
> The universe sways to the power of mind.

This is true. The white man governs because he is best prepared to govern. He may do wrong. He hurt the Indians, and yet it is better to have 115,000,000 of the best people on earth upon the best country on the globe than to have scattered tribes fighting among one another with no schools, no civilization, no literature, and making no progress whatever.

I am for the white man. I want him to govern here and I want him to govern in Massachusetts, and especially in Boston. [Laughter and applause.]

Now, I did not get up to talk about this subject, but I felt that somebody should reply to the gentleman who so often assails the South. The colored people have had their day this afternoon, and I am a friend of the negro. I want that understood. When I go home the colored people flock around my door to meet me and my wife—and they call her by her first name, Miss So and So. They come around to see us. They like us and they vote for me—many of them—and every one of them that wants to vote has a chance to do so if he will pay a dollar to the school fund, and if he is unwilling to pay that pittance into the school fund he ought not to vote.

Now I come to talk about the real question that I was accorded time to discuss.

Mr. Speaker, I beg to say that I do not consider it a dignified proceeding for an aspirant to a party presidential nomination to abandon his duties and go on the stump to present his claims.

It is permissible for candidates from Congress down to go up and down the counties and to grin the sovereigns out of their votes, but when a citizen attains the proportions that fit him for the White House and he desires to go there, he should announce that he does not choose to enter into a scramble for the honor of a party nomination and modestly wait to be drafted. This course will further his ambition more certainly than the course I am criticizing. The present canny occupant of the presidential chair will, because of his choice of methods, be drafted by his party when those now advertising their candidacies for the honor have destroyed themselves.

A Cabinet officer is an avowed candidate. Several United States Senators are leaving their seats in what was once considered the greatest forum on earth to beg for votes and delegates. Once a Roman statesman said: "To be a Roman senator is to be greater than a king." Once to be an American Senator was considered a more exalted honor than at present. Personally, I have great respect for the body north of us. They seem, however, to run stronger toward investigations than to legislative functions.

I am quoting here a joke told me by a United States Senator himself five days ago. He said that a teacher of the fifth grade out in Maryland recently asked the class this question: "What compose the United States Congress?" A boy answered, "The United States Senate." The teacher said: "Is there not an inferior body?" "No," said the pupil; "there is no inferior body." [Laughter.]

I have much respect for the able Senator from Idaho, and he has introduced an innovation in the way of an interesting questionnaire leveled at presidential aspirants. From a party standpoint I am glad he did, and yet some call him a self-appointed and self-annointed father confessor to presidential candidates. The Senator's questionnaire is certainly adding to national gaiety. He first served this paper on Senators CURTIS and WILLIS, neither of whom has a Chinaman's chance to be chosen. They frankly and, to my mind, satisfactorily answered the questions listed in the Borah letter.

The Senator then leveled his questionnaire spear at bigger game and wrote the following letter. Desiring to be accurate I sent to the Senator's office and procured a copy from his files.

FEBRUARY 9, 1928.

Hon. HERBERT HOOVER,

Secretary of Commerce, Washington, D. C.

MY DEAR MR. SECRETARY: Your friends have placed you in line for the nomination for the Presidency. I venture in view of that fact to ask your views upon a matter in which there is a wide and deep interest

throughout the country. I am sure you will be free to express yourself upon this important issue:

First. Do you favor incorporating in the next national Republican platform a plank specifically referring to the eighteenth amendment to the Constitution and pledging the candidates and the party to a vigorous, faithful, and effective enforcement of the amendment and the laws enacted to carry into effect the constitutional amendments?

Second. What is your attitude and what would be your attitude toward the amendment and its enforcement in case you are nominated and elected?

Third. Do you favor the enactment into law of the principle embodied in the New York referendum that the Congress should modify the Federal act to enforce the eighteenth amendment so that the same shall not prohibit the manufacture, sale, transportation, importation, or exporation of beverages which are not in fact intoxicating, as determined in accordance with the laws of the respective States? In other words, do you favor a program of legislation which will enable every State to determine for itself the alcoholic content of beverages to be manufactured, sold, and transported throughout the country?

Fourth. Do you favor the repeal of the eighteenth amendment or the repeal of the Volstead Act?

Very respectfully,

WM. E. BORAH.

The Secretary about this time heard the call of the tarpons and the sea bass down in tropical Florida and did not reply until his return. After much prayerful labor, the mountain on February 23 brought forth not a majestic lion but a pale, gray mouse. Mr. Hoover's remarkable reply follows:

I feel that the discussion of public questions by reply to questionnaires is likely to be unsatisfactory and ofttimes leads to confusion rather than clarity. Replies to the scores of such inquiries on many questions are impossible.

Out of regard for your known sincerity and your interest in the essential question I will, however, say again that I do not favor the repeal of the eighteenth amendment. I stand, of course, for the efficient, vigorous, and sincere enforcement of the laws enacted thereunder. Whoever is chosen President has under his oath the solemn duty to pursue this course.

Our country has deliberately undertaken a great social and economic experiment, noble in motive and far-reaching in purpose. It must be worked out constructively.

Mark Twain never said anything funnier than the last paragraph. Hitherto this Cabinet officer has not posed as a humorist. By this letter he has definitely established for himself undisputed primacy in the field of American humor. [Laughter.]

He complains that questionnaires are likely to be unsatisfactory, leading to confusion rather than clarity, and straightway proves his assertion. But he walks up, cap in hand, and throws his answer in the Senator's lap somewhat like throwing a bone to a dog, saying in effect, "There is my answer, but don't ask me any more fool questions." The Secretary is a strong man, a great world figure, and his failure to be frank is the more reprehensible because of his undisputed greatness and preeminence. Mellon is the strongest, most forceful Cabinet member, and Hoover is second, and he should have been frank, and has not been. Clarity! The answer is as clear as the mud at the bottom of the Potomac. Does it really satisfy anybody? The Baltimore Sun says it is disappointing to dry leaders—not sufficiently far-reaching, is their view—and the wets say, mere platitudes. In some places the drys say he is wet and in other places the wets say he is dry. The Washington Post editorially commends his answer, but the brilliant columnist, George Rothwell Brown, seems to condemn it. I was somewhat amazed to read in the press that my leader among the drys in the House is quoted as accepting the Hoover letter enthusiastically, saying, "Such expressions, joined with our knowledge of the man, should satisfy anyone as to the sincerity of his attitude toward the interests of Federal prohibition." The paper continuing said that Mr. CRAMTON was so well pleased that his friends look to him to join the Hoover band wagon. Is it possible that my leader will abandon his neighbor, Senator WILLIS, a known dry, and leap into the Cabinet member's band wagon to beat the bass drum or to blow the trombone? Mr. Stayton, a wet, is quoted as saying, "We had hoped for something more than mere platitudes from Mr. Hoover." And so it goes. The Secretary dodges and does not do so artfully. He straddles and does not straddle gracefully. [Laughter and applause.]

Imagine the following dialogue, which might well take place:

Question (Senator BORAH). "Mr. Secretary, are you in favor of a revision of the tariff; and if so, up or down?"

Answer (Mr. HOOVER). "Our country has deliberately undertaken a great social and economic experiment, noble in motive and far-reaching in purpose. It must be worked out constructively." [Laughter.]

Question (Senator BORAH). "Once you were associated with President Wilson, who favored the League of Nations and a World Court. How do you stand on that issue?"

Answer (Mr. HOOVER). "Our country has deliberately undertaken a great social and economic experiment, noble in motive and far-reaching in purpose. It must be worked out constructively." [Laughter.]

I represent myself and other drys who do not think the Secretary's answer to the Borah questionnaire is responsive. I think his reputation for candor and courage has suffered by this answer. The thing Senator BORAH stressed mainly was whether or not Mr. Hoover favored incorporating in the next national Republican platform a plank specifically referring to the eighteenth amendment. He also particularly wanted to know whether Mr. Hoover favored a program of legislation which would enable every State to determine for itself the alcoholic content of beverages to be manufactured, sold, and transported throughout the country. That is the real issue that he should have met and he dodged it, by the use of words, words, words signifying nothing. The real issue between the wets and drys is not the repeal of the eighteenth amendment, not the return of the saloon, but whether the eighteenth amendment and the Volstead Act shall be nullified if desired by some of the States making their own laws determining the alcoholic content of intoxicating liquors. Mr. Hoover knew that and made a bid for the wet vote in Ohio and elsewhere by declining to be frank in his reply to the questionnaire submitted to him. There are wets and wets, there are drys and drys, with all shades of opinions. They differ in different States.

Sam Jones once said that men in different States differed materially as to what constituted intoxication. He said that a man was considered drunk in Maine if he swallowed two glasses of buttermilk, but in Kentucky a man was considered still sober if he, after two efforts, was steady enough to hit the ground with his hat. That a citizen was not thought to be drunk in Kansas if he could lie on the ground, hold to the grass with both hands, and not fall off the earth. So there are men of widely divergent views on the wet and dry question, but the people always want a candidate for a high office to state his position upon a great public question like this in language that can be understood. Is Senator WILLIS being fairly treated? His senatorial opponents have graciously said to him, "We shall not oppose you in your own State. We shall only oppose one another for second choice." And that is a courteous thing to do. The Senator was born in Ohio, he is the senior Senator from that State. He can truthfully say, as did a warlike Scot, "My name is MacGregor and my foot's on my native heath." He proposes to fight. Like another warlike Scot he has backed up against a limestone ledge and announces, "This rock shall fly from its firm base as soon as I." Why not be courteous to the Senator?

> How sweet and gracious even in our common speech
> Is that fine sense which men call courtesy.
> Wholesome as air and genial as the light,
> Welcome in every clime as breath of flowers,
> It transmutes aliens into trusting friends
> And gives its owner passport around the globe.

[Applause.]

So I have been disappointed in the attitude of my friend from Michigan, my white-plumed leader among the drys. I have also been disappointed at the position of one of the best-loved men in the House, the gentleman from Ohio [Mr. BURTON], one of our Nestors, who is reputed to have encouraged the Secretary of Commerce to enter the Ohio primaries in opposition to Ohio's favorite son, Senator WILLIS. My Republican friends, you do not often make serious political mistakes. Unless you do, our party stands but little chance to triumph in national elections. But you are not altogether immune from political blunders. A good many years ago a magnetic American leader, Theodore Roosevelt, pinned a white plume on his war bonnet and rode up and down the States with legions of enthusiastic supporters following him. The Republican nominee, a popular and worthy man, carried Utah and Vermont only. The schoolmaster at Princeton because of this blunder donned the purple of power and for eight years graced the chair that had been honored by Jefferson, Jackson, and Cleveland. He carried Ohio the second time. Right now over the Buckeye State hangs a political cloud no bigger than a saddle blanket and yet as black as Egyptian darkness, as black, indeed, as the rusty dust on the gates of Hades. That cloud may grow and spread till it casts its shadow over the country from Lake Erie to Dixie, from Portland to Portland. George Rothwell Brown, of the Post, says that both Hoover and WILLIS got off to a ripping start in Ohio, but the principal thing ripped, he said, is the Republican Party. By

the way, speaking of Mr. Brown, he makes us all smart by hurling at us his poison darts. He wields a keen blade, but it is dipped in vitriol and smeared with rattlesnake venom. He is as mean as Satan. He is all the time mendaciously talking about "the dry-voting and hard-drinking South." That is nine-tenths libelous. He crawls and skins and stings and stinks, and yet he is the cleverest paragrapher in America. If the editor in chief of the Post gets $20,000 a year, Brown ought to draw down $40,000. He is with all of his cussedness—and that covers him like a red blanket—the most entertaining columnist in the country. The only thing that redeems the Post's editorials from the charge of dull and heavy drabness is Brown's scintillating columns.

I plead for a fair deal for WILLIS, but he will be slaughtered in the house of his friends, not beaten, but not allowed an undivided delegation. And what has he done to be thus slaughtered or discredited?

It is a far cry from the Roman Forum to the Buckeye State, and yet I venture to compare an old with a fast-coming incident.

A few years ago in company with my dry leader, Mr. CRAMTON, and several other House Members, I stood in the Roman Forum and was shown the spot where the great Cæsar fell bleeding from many wounds inflicted by Brutus, Casca, and others.

The chaste Calpurnia had told her eagle-beaked husband not to go to the senate house on that day. The soothsayer had shouted in his ear, "Cæsar, beware the ides of March!" But Cæsar went, and died at the base of Pompey's statue. Before he fell he recognized his neighbor Brutus, and exclaimed in astonishment, "Et tu Brute." Later our party was conducted to the spot where Mark Antony delivered his famous oration over Cæsar's dead body, and his speech created much dissension among the Romans.

Now, after the ides of April, after the Ohio primary has been held, I can envisage some modern Mark Antony holding up the bloody cloak of Julius Cæsar WILLIS and pointing to the rents inflicted by the knives of those who should have been his friends and supporters and saying something like what Mark Antony said as he held aloft great Cæsar's bloody cloak:

"See what a rent the envious Casca (CRAMTON) made; through this the well-beloved Brutus (BURTON) stabbed. And as he plucked his cursed steel away, mark how the blood of Cæsar (WILLIS) followed it."

[Laughter and applause.]

CORRECTION OF THE RECORD

Mr. CASEY. Mr. Speaker, I renew the unanimous-consent request I made earlier in the day to strike from the CONGRESSIONAL RECORD of February 24 the remarks which were inserted in my speech without my knowledge or consent after I had corrected the reporter's copy of my speech and sent it by messenger to the printer. Pending that I desire to make a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CASEY. In the consideration of this question will it be permissible to discuss the facts with relation to this matter, because there is a difference of opinion, or will the question be confined solely to a violation of the rules by the insertion into my remarks of language without my consent?

The SPEAKER. The Chair thinks it would be well to discuss the facts as they may affect both gentlemen concerned.

Mr. CASEY. Will the time be limited on that?

The SPEAKER. It will proceed under unanimous consent. There will be no time limit unless the gentleman asks for it. It will be permissible for the gentleman to ask for a certain time.

Mr. CHINDBLOM. Mr. Speaker, how did the matter come up? I do not know whether the gentleman put it on the ground of personal privilege, but it would seem that in order to discuss the matter the gentleman should obtain unanimous consent.

Mr. GARNER of Texas. Under a reservation of the right to object, the gentleman can go ahead.

Mr. SIMMONS. Will the gentleman from Pennsylvania yield for a minute?

Mr. CASEY. I yield.

Mr. SIMMONS. Mr. Speaker, in the debate in the House last Friday the transcript shows that I addressed the gentleman from Pennsylvania and asked if he would yield. He answered "yes." Then the transcript shows that I stated that "I would like to call the gentleman's attention to the fact that it was thoroughly discussed—that was the amendment then under consideration—and to the fact that at first the gentleman from Pennsylvania [Mr. WELSH] objected to this being done unless we would take care and not cause any hardship to the children now in the District schools."

The gentleman was present at the meeting and stated he did not want to cause any hardship for the children then in the schools, and we drafted the amendment to meet the wishes of the gentleman and his colleague from Pennsylvania [Mr. WELSH].

To that the gentleman from Pennsylvania [Mr. CASEY] is shown to have replied:

That may be the gentleman's opinion, but it is not the fact. We might just as well have an understanding about this matter. Every letter and every telegram that has been read here to-day has been read because it was asked for by individuals and not by the subcommittee, and when they speak of "we" and the committee, they do not speak for me as a member of the committee.

Following that there was a discussion between the gentleman from Pennsylvania and the gentleman from Illinois [Mr. MADDEN].

After the adjournment of the House on Friday I corrected some of the transcript of the discussion that was brought to me in my office and went to my residence, which is about 5 miles from the Capitol. Along about 7 or 7.30 o'clock in the evening some one from the reporters' office called me on the telephone and asked if he could read my statement to me over the telephone for approval or disapproval, to save him coming out the 5 miles to my residence with the transcript. He read it to me, and as I remember it, I dictated over the telephone, and whoever it was took it down and read back to me the language to which the gentleman from Pennsylvania objects, I asking that he change my statement so that it would read as follows:

I would like to call the gentleman's attention to the fact that this paragraph was in the bill when the subcommittee reported to the full committee, and it was printed in italics in the report that the subcommittee presented to the main committee. The gentleman made no objection either in the subcommittee or the full committee to the language being in the bill; the bill was reported unanimously by the full committee; it was thoroughly discussed in the subcommittee and the full committee, and to the fact that at first the gentleman from Pennsylvania objected to this being done, unless we would take care of and not cause any hardship to the children now in the District schools. The gentleman was present at the meeting and stated that he did not want to cause any hardships for the children then in the schools. No one on the committee desires to cause any hardship, and we drafted the amendment to meet the wishes of the gentleman and his colleague from Pennsylvania.

I assumed then and I assume now that I had the right to amplify the statement that I had made by setting out in brief detail the facts covered by the original statement. I did not change the meaning that I had expressed. The gentleman from Pennsylvania made a general denial to what I had said, and of necessity I could not change the meaning of his answer. I believe that I was entirely within the rules of the House in doing what I did. I do not want any blame to be attached to anyone else if anything was wrong about it. The statements that I made on the floor were the facts then, and the statement that I amplified and stated in the RECORD were the facts when I made them. They are the facts now. However, if the gentleman from Pennsylvania does not want them in the RECORD, I have no objection to their being stricken out of his speech in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania that certain language be stricken out?

There was no objection.

TERMS OF PRESIDENT, VICE PRESIDENT, AND OTHERS

Mr. SNELL. Mr. Speaker, may I be permitted to make a statement? I have been requested by several Members to advise them when we would call up the rule for the White-Norris constitutional amendment. I discussed that matter with the gentleman from Connecticut [Mr. TILSON], the floor leader, and it seems now that if we can pass the agricultural appropriation bill by Saturday night next, we will be able to call up that rule for consideration of this constitutional amendment a week from to-day; that is, Tuesday, March 6, 1928.

CONTESTED-ELECTION CASE—HUBBARD v. LAGUARDIA

Mr. LETTS. Mr. Speaker, I submit a privileged report from the Committee on Elections No. 1, in the contested-election case of Hubbard against LaGuardia, for printing.

ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 48. An act to erect a tablet or marker to the memory of the Federal soldiers who were killed at the Battle of Perryville, and for other purposes;

H. R. 83. An act to approve Act No. 24 of the Session Laws of 1927 of the Territory of Hawaii, entitled "An act to authorize and provide for the manufacture, maintenance, distribution, and supply of electric current for light and power within Hanapepe, in the district of Waimea, island and county of Kauai";

H. R. 482. An act to provide relief for the victims of the airplane accident at Langin Field, Moundsville, W. Va.;

H. R. 3144. An act for the relief of Augustus C. Turner;

H. R. 5925. An act for the relief of the Fidelity & Deposit Co. of Maryland;

H. R. 8281. An act to provide for the withdrawal of certain described lands in the State of Nevada for the use and benefit of the Indians of the Walker River Reservation;

H. R. 8282. An act to provide for the permanent withdrawal of certain lands bordering on and adjacent to Summit Lake, Nev., for the Paiute, Shoshone, and other Indians;

H. R. 8291. An act to amend section 1 of the act of June 25, 1910 (36 Stat. L. 855), "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes";

H. R. 8292. An act to reserve 120 acres on the public domain for the use and benefit of the Koosharem Band of Indians residing in the vicinity of Koosharem, Utah;

H. R. 8527. An act for the relief of the International Petroleum Co. (Ltd.), of Toronto, Canada;

H. R. 9037. An act to provide for the permanent withdrawal of certain lands in Inyo County, Calif., for Indian use; and

H. R. 9994. An act to reimburse certain Indians of the Fort Belknap Reservation, Mont., for part or full value of an allotment of land to which they were individually entitled.

ADJOURNMENT

Mr. TILSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 4 o'clock and 40 minutes p. m.) the House adjourned until to-morrow, Wednesday, February 29, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Wednesday, February 29, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON AGRICULTURE

(10 a. m.)

To insure adequate supplies of timber and other forest products for the people of the United States, to promote the full use for timber growing and other purposes of forest lands in the United States, including farm wood lots and those abandoned farm areas not suitable for agricultural production, and to secure the correlation and the most economical conduct of forest research in the Department of Agriculture, through research in reforestation, timber growing, protection, utilization, forest economics, and related subjects (H. R. 6091).

COMMITTEE ON WORLD WAR VETERANS' LEGISLATION

(10 a. m.)

To amend the World War veterans' act, 1924 (H. R. 10160).

COMMITTEE ON THE MERCHANT MARINE AND FISHERIES

(10.30 a. m.)

To further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States (S. 744).

To promote, encourage, and develop an American merchant marine in connection with the agricultural and industrial commerce of the United States, provide for the national defense, the transportation of foreign mails, the establishment of a merchant-marine training school, and for other purposes (H. R. 2).

To amend the merchant marine act of 1920, insure a permanent passenger and cargo service in the North Atlantic, and for other purposes (H. R. 8914).

To create, develop, and maintain a privately-owned American merchant marine adequate to serve trade routes essential in the movement of the industrial and agricultural products of the United States and to meet the requirements of the commerce of the United States; to provide for the transportation of the foreign mails of the United States in vessels of the United States; to provide naval and military auxiliaries; and for other purposes (H. R. 10765).

COMMITTEE ON IMMIGRATION AND NATURALIZATION

(10.30 a. m.)

To amend the immigration act of 1924 by making the quota provisions thereof applicable to Mexico, Cuba, Canada, and the other countries of continental America and adjacent islands (H. R. 6465).

COMMITTEE ON THE JUDICIARY

(10 a. m.)

To amend the Judicial Code and to define and limit the jurisdiction of courts sitting in equity (H. R. 7759).

COMMITTEE ON THE POST OFFICE AND POST ROADS

(10 a. m.)

To amend Title II of an act approved February 28, 1925, regulating postal rates (H. R. 9296).

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. HUDDLESTON: Committee on Interstate and Foreign Commerce. H. R. 9663. A bill authorizing Herman Simmonds, jr., his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across Tampa Bay from Pinellas Point, Pinellas County, to Piney Point, Manatee County, Fla.; with an amendment (Rept. No. 772). Referred to the House Calendar.

Mr. PEERY: Committee on Interstate and Foreign Commerce. H. R. 9830. A bill authorizing the Great Falls Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Potomac River at or near the Great Falls; with an amendment (Rept. No. 773.) Referred to the House Calendar.

Mr. MILLIGAN: Committee on Interstate and Foreign Commerce. H. R. 10145. A bill authorizing American Bridge & Ferry Co. (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Carondelet, St. Louis County, Mo.; with an amendment (Rept. No. 774). Referred to the House Calendar.

Mr. CORNING: Committee on Interstate and Foreign Commerce. S. 2698. An act granting the consent of Congress to the State of Vermont to construct, maintain, and operate a free highway bridge across an arm of Lake Memphremagog at or near Newport, Vt.; without amendment (Rept. No. 775). Referred to the House Calendar.

Mr. CHRISTOPHERSON: Committee on the Judiciary. H. R. 328. A bill to relieve the Territory of Alaska from the necessity of filing bonds or security in legal proceedings in which such Territory is interested; without amendment (Rept. No. 776). Referred to the House Calendar.

Mr. CHRISTOPHERSON: Committee on the Judiciary. H. R. 8551. A bill to create an additional judge in the district of South Dakota; without amendment (Rept. No. 777). Referred to the Committee of the Whole House on the state of the Union.

Mr. HAUGEN: Committee on Agriculture. H. R. 53. A bill to provide for the collection and publication of statistics of tobacco by the Department of Agriculture; without amendment (Rept. No. 778). Referred to the Committee of the Whole House on the state of the Union.

Mr. HAUGEN: Committee on Agriculture. H. J. Res. 215. A joint resolution to authorize the Secretary of Agriculture to accept a gift of certain lands in Clayton County, Iowa, for the purposes of the upper Mississippi River wild life and fish refuge act; without amendment (Rept. No. 779). Referred to the Committee of the Whole House on the state of the Union.

Mr. HAUGEN: Committee on Agriculture. H. R. 484. A bill to amend section 10 of the plant quarantine act, approved August 20, 1912; without amendment (Rept. No. 780). Referred to the House Calendar.

Mr. HAUGEN: Committee on Agriculture. H. J. Res. 140. A joint resolution to amend sections 1 and 2 of the act of March 3, 1891; without amendment (Rept. No. 781). Referred to the House Calendar.

Mr. DYER: Committee on the Judiciary. H. R. 8295. A bill for the appointment of an additional circuit judge for the ninth judicial circuit; without amendment (Rept. No. 782). Referred to the Committee of the Whole House on the state of the Union.

Mr. DYER: Committee on the Judiciary. H. R. 11139. A bill for the appointment of an additional circuit judge for the second judicial circuit; without amendment (Rept. No. 783). Referred to the Committee of the Whole House on the state of the Union.

Mr. ENGLEBRIGHT: Committee on the Public Lands. H. R. 11023. A bill to add certain lands to the Lassen Volcanic National Park in the Sierra Nevada Mountains of the State of California; without amendment (Rept. No. 786). Referred to the Committee of the Whole House on the state of the Union.

Mr. COLTON: Committee on Elections No. 1. A report on the contested election case of Hubbard *v.* LaGuardia, twentieth New York district (Rept. No. 787). Referred to the House Calendar.

Mr. WOODRUFF: Committee on Naval Affairs. H. J. Res. 160. Joint resolution requesting certain information relative to the United States Naval Ordnance plant, South Charleston, W. Va.; without amendment (Rept. No. 788). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. MORIN: Committee on Military Affairs. H. R. 9712. A bill to amend the military record of Curtis V. Milliman; with an amendment (Rept. No. 784). Referred to the Committee of the Whole House.

Mr. GLYNN: Committee on Military Affairs. H. J. Res. 193. Joint resolution for appointment of Roy L. Marston, of Maine, as a member of the Board of Managers of the National Home for Disabled Volunteer Soldiers; without amendment (Rept. No. 785). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 10041) granting a pension to Alice B. Cook, and the same was referred to the Committee on Pensions.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. HOPE: A bill (H. R. 11525) to amend the packers and stockyards act, 1921; to the Committee on Agriculture.

By Mr. BUTLER: A bill (H. R. 11526) to authorize the construction of certain naval vessels, and for other purposes; to the Committee on Naval Affairs.

By Mr. MANSFIELD: A bill (H. R. 11527) to amend an act entitled "An act authorizing the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes," approved March 3, 1925; to the Committee on Rivers and Harbors.

By Mr. SUTHERLAND: A bill (H. R. 11528) to authorize appeals in all criminal proceedings and certain civil proceedings in the district court of Alaska; to the Committee on the Judiciary.

Also, a bill (H. R. 11529) to extend the time of the Alaska Anthracite Railroad Co. for completion of its railroad in the Territory of Alaska, and for other purposes; to the Committee on the Territories.

By Mr. WRIGHT: A bill (H. R. 11530) to amend the World War veterans' act, 1924; to the Committee on World War Veterans' Legislation.

By Mr. ENGLEBRIGHT: A bill (H. R. 11531) authorizing appropriations for the establishment and maintenance of mining experiment stations of the United States Bureau of Mines; to the Committee on Mines and Mining.

By Mr. JOHNSON of Texas: A bill (H. R. 11532) to amend the first paragraph of section 29, title 2, chapter 85, of the first session of the Sixty-sixth Congress, found in volume 41, part 1, page 316, of the United States Statutes at Large, relating to punishment for the illegal manufacture and sale of liquors; to the Committee on the Judiciary.

By Mr. TIMBERLAKE: A bill (H. R. 11533) to provide for the enlargement and further development of the Akron United States Agricultural Substation, located near Akron, in Washington County, Colo., by authorizing the purchase of certain lands adjacent thereto, the erection of certain improvements thereon, and the equipment thereof with dairy cattle and other livestock; to the Committee on Agriculture.

By Mr. BRAND of Georgia: A bill (H. R. 11534) providing for canceling naturalization certificates if and when a naturalized citizen, within five years after the date of the certificate of citizenship, has been guilty of fraud, or by his acts, declarations, or conduct has ceased to be a man of good moral character; to the Committee on Immigration and Naturalization.

By Mr. DYER: A bill (H. R. 11535) to provide punishment for killing or assaulting Federal officers; to the Committee on the Judiciary.

By Mr. HAMMER: A bill (H. R. 11536) to protect the sanctity and preservation of the institution of marriage within the District of Columbia; to the Committee on the District of Columbia.

By Mr. BACON: Joint resolution (H. J. Res. 220) tendering the thanks of the American people and the Congress of the United States to the Hon. Charles Evans Hughes, chairman of the delegation of the United States of America to the Sixth International Conference of American States; to the Committee on Foreign Affairs.

By Mr. REECE: Joint resolution (H. J. Res. 221) authorizing the award of a medal of honor to Ralph E. Updike; to the Committee on Military Affairs.

By Mr. SUTHERLAND: Joint resolution (H. J. Res. 222) to authorize the Alaska Game Commission to make refunds of license fees in certain cases; to the Committee on Agriculture.

By Mr. HICKEY: A resolution (H. Res. 127) to provide for additional compensation for assistant floor managers of telephones; to the Committee on Accounts.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ABERNETHY: A bill (H. R. 11537) granting an increase of pension to James B. P. Brady; to the Committee on Pensions.

Also, a bill (H. R. 11538) granting a pension to Ernest R. Hales; to the Committee on Pensions.

By Mr. BOWMAN: A bill (H. R. 11539) granting a pension to George Anson Carr; to the Committee on Invalid Pensions.

By Mr. BUSHONG: A bill (H. R. 11540) granting an increase of pension to Elizabeth S. Keim; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11541) granting an increase of pension to Catherine Rider; to the Committee on Invalid Pensions.

By Mr. CHAPMAN: A bill (H. R. 11542) granting an increase of pension to Mary M. Wilson; to the Committee on Invalid Pensions.

By Mr. CHINDBLOM: A bill (H. R. 11543) granting a pension to Mary E. Crabtree; to the Committee on Invalid Pensions.

By Mr. CRAIL: A bill (H. R. 11544) granting a pension to Ida M. Montgomery; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11545) for the relief of Charles Wilson; to the Committee on Military Affairs.

By Mr. CRISP: A bill (H. R. 11546) granting an increase of pension to William W. Martin; to the Committee on Pensions.

By Mr. ROY G. FITZGERALD: A bill (H. R. 11547) for the relief of Catherine Panturis; to the Committee on Claims.

Also, a bill (H. R. 11548) for the relief of Sarah Morris; to the Committee on Claims.

By Mr. W. T. FITZGERALD: A bill (H. R. 11549) granting a pension to Henderson M. Pettit; to the Committee on Invalid Pensions.

By Mr. GARRETT of Tennessee: A bill (H. R. 11550) granting a pension to Mattie Russell Meadows; to the Committee on Pensions.

By Mr. HALL of Indiana: A bill (H. R. 11551) for the relief of Ralph R. Cloud; to the Committee on Claims.

Also, a bill (H. R. 11552) granting an increase of pension to Martha A. Budd; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11553) granting a pension to Blenda C. Moore; to the Committee on Invalid Pensions.

By Mr. HOGG: A bill (H. R. 11554) granting an increase of pension to Rocelia Dennis; to the Committee on Invalid Pensions.

By Mr. KENDALL: A bill (H. R. 11555) granting a pension to Virginia A. Harris; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11556) granting an increase of pension to Ellen J. Perkins; to the Committee on Invalid Pensions.

By Mr. KURTZ: A bill (H. R. 11557) granting a pension to Nora Belle Biesecker; to the Committee on Invalid Pensions.

By Mrs. LANGLEY: A bill (H. R. 11558) granting an increase of pension to Owen Combs; to the Committee on Pensions.

By Mr. LEATHERWOOD: A bill (H. R. 11559) to authorize reimbursement of Dr. B. W. Black, formerly a commissioned officer of the United States Public Health Service, for travel performed subsequent to June 7, 1924, under orders of the Secretary of the Treasury, issued prior to that date; to the Committee on Claims.

Also, a bill (H. R. 11560) for the relief of the Bennion Livestock Co.; to the Committee on Claims.

By Mr. LINDSAY: A bill (H. R. 11561) granting an increase of pension to Anna M. Venus; to the Committee on Invalid Pensions.

By Mr. MERRITT: A bill (H. R. 11562) granting an increase of pension to Maria C. Hill; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11563) granting a pension to Thomas Collins; to the Committee on Pensions.

By Mr. MOORE of Ohio: A bill (H. R. 11564) granting an increase of pension to Sarah E. Petty; to the Committee on Invalid Pensions.

By Mr. PERKINS: A bill (H. R. 11565) for the relief of Edmund J. Clark; to the Committee on Military Affairs.

By Mr. PORTER: A bill (H. R. 11566) for the relief of Hugh R. Wilson, John K. Caldwell, and other diplomatic and consular officers and employees and representatives of the Departments of State, Commerce, the Treasury, and Agriculture who suffered losses in the Japanese earthquake and fire; to the Committee on Foreign Affairs.

By Mr. RAMSEYER: A bill (H. R. 11567) granting an increase of pension to Alvira Byrum; to the Committee on Invalid Pensions.

By Mr. REECE: A bill (H. R. 11568) granting an increase of pension to Frank C. Miller; to the Committee on Pensions.

By Mr. RUBEY: A bill (H. R. 11569) granting an increase of pension to Mary E. Allen; to the Committee on Invalid Pensions.

By Mr. SANDERS of New York: A bill (H. R. 11570) granting an increase of pension to Mary E. Logel; to the Committee on Invalid Pensions.

By Mr. SIMMONS: A bill (H. R. 11571) granting a pension to Fannie F. Wilson; to the Committee on Invalid Pensions.

By Mr. SUMMERS of Washington: A bill (H. R. 11572) granting a pension to Sarah J. Edmonds; to the Committee on Invalid Pensions.

By Mr. SWICK: A bill (H. R. 11573) granting an increase of pension to Anna M. Shaffer; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11574) granting an increase of pension to Alice C. J. Wilson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11575) granting an increase of pension to Irene Dunbar; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11576) granting an increase of pension to Mary E. Boyd; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

4604. Petition of sundry citizens of San Antonio, Tex., opposing certain legislation known as the Box bill, affecting immigration in the United States from Mexico; to the Committee on Immigration and Naturalization.

4605. By Mr. ADKINS: Petition of sundry adult citizens of Decatur, Ill., protesting against compulsory Sunday observance as proposed in the Lankford Sunday bill (H. R. 78); to the Committee on the District of Columbia.

4606. By Mr. ALDRICH: Petition of Thomas F. Tefft and 15 other citizens of the State of Rhode Island protesting against compulsory Sunday legislation; to the Committee on the District of Columbia.

4607. By Mr. BOIES: Petition signed by citizens of Onawa, Monona County, State of Iowa, protesting against the compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

4608. By Mr. BURDICK: Resolution of Lodge Gustaf II, Adolf No. 17, Vasa Order of America, of Providence, R. I., protesting against the reduction of the Swedish quota of immigrants; to the Committee on Immigration and Naturalization.

4609. Also, resolution of Lodge Ebba Brahe, No. 18, Vasa Order of America, of Providence, R. I., protesting against the reduction of the Swedish quota of immigrants; to the Committee on Immigration and Naturalization.

4610. By Mr. CANNON: Petition of Charles W. Young and other citizens of Montgomery County, Mo., opposing compulsory Sunday observance; to the Committee on the District of Columbia.

4611. Also, petition of John C. Garner and others, of Pacific, Mo., in behalf of an increase of Civil War pensions; to the Committee on Invalid Pensions.

4612. Also, petition of W. E. Muis and other citizens of Callaway County, Mo., opposing compulsory Sunday observance; to the Committee on the District of Columbia.

4613. Also, petition of C. R. Spradlin and other citizens of Audrain County, Mo., opposing compulsory Sunday observance; to the Committee on the District of Columbia.

4614. Also, petition of A. J. Keller and Bertie Keller, of Defiance, Mo., opposing compulsory Sunday observance; to the Committee on the District of Columbia.

4615. Also, petition of G. W. Miller and other citizens of Callaway County, Mo., opposing compulsory Sunday observance; to the Committee on the District of Columbia.

4616. Also, petition of L. E. Mahon and other citizens of Bland, Mo., opposing compulsory Sunday observance; to the Committee on the District of Columbia.

4617. Also, petition of W. F. H. Schroeder and other citizens of Gasconade County, Mo., opposing compulsory Sunday observance; to the Committee on the District of Columbia.

4618. Also, petition of J. C. Humphreys and other citizens of Callaway County, Mo., opposing compulsory Sunday observance; to the Committee on the District of Columbia.

4619. Also, petition of H. F. West and other citizens of Fulton, Mo., opposing compulsory Sunday observance; to the Committee on the District of Columbia.

4620. By Mr. CARSS: Petition of Alexander La Doix and 30 other Chippewa Indians, of International Falls, Minn., protesting against enactment of H. R. 189, the so-called purification bill; to the Committee on Indian Affairs.

4621. By Mr. DARROW: Petition of the Philadelphia Board of Trade favoring the enactment of H. R. 8557, to provide for the establishment and operation of foreign trade zones in ports of entry of the United States, etc.; to the Committee on Interstate and Foreign Commerce.

4622. By Mr. EATON: Petition of 82 residents of Plainfield and North Plainfield, N. J., against enactment of H. R. 78; to the Committee on the District of Columbia.

4623. By Mr. ENGLEBRIGHT: Petition of H. L. Wolfsen and other petitioners of Colfax, Calif., protesting against the Sunday closing law for the District of Columbia; to the Committee on the District of Columbia.

4624. Also, petition of Mr. A. E. Stewart and other citizens of Roseville, Calif., protesting against Sunday closing for the District of Columbia; to the Committee on the District of Columbia.

4625. Also, petition of sundry citizens of Siskiyou County, Calif., protesting against Sunday closing for the District of Columbia; to the Committee on the District of Columbia.

4626. By Mr. GALLIVAN: Petition of Rollin H. Richardson, 6 Alpine Street, Roxbury, Mass., recommending legislation governing the care and treatment of dumb animals; to the Committee on Agriculture.

4627. By Mr. GARBER: Letter of M. C. Sutton, manager of the Oklahoma City Clearing House Association, of Oklahoma City, Okla., in opposition to S. 1752; to the Committee on the Post Office and Post Roads.

4628. Also, letter of Barrington Moore, secretary Council on National Parks, Forests, and Wild Life, of Washington, D. C., in support of H. R. 5467 and S. 2171, migratory bird conservation bills; to the Committee on Agriculture.

4629. Also, letter of Charles B. Burdick, engineer, of Chicago, Ill., in support of the Newton bill (H. R. 8111), providing for an inventory of water resources; to the Committee on Interstate and Foreign Commerce.

4630. Also, letter of J. H. Hoeppel, commander General Harrison Gray Otis Post, No. 1537, V. F. W.; past commander Charles A. Lindbergh Camp, No. 103, U. S. W. V.; and past commander Glenn Dyer Post, No. 247, American Legion, in support of H. R. 6523 and S. 1986, providing for increase in pension; to the Committee on Military Affairs.

4631. Also, resolutions of Chamber of Commerce, of Hominy, Okla., in protest to the passage of H. R. 9033 and H. R. 9294; to the Committee on Indian Affairs.

4632. By Mr. GUYER: Petition of sundry citizens of Kansas City, Wyandotte County, Kans., urging increases of pension for survivors and widows of the Civil War; to the Committee on Invalid Pensions.

4633. By Mr. HADLEY: Petition of sundry residents of Everett, Wash., protesting against the Lankford Sunday closing bill; to the Committee on the District of Columbia.

4634. Also, petition of sundry residents of Marysville, Wash.; to the Committee on the District of Columbia.

4635. Also, petition of residents of King County, Wash., protesting against the Lankford Sunday closing bill; to the Committee on the District of Columbia.

4636. Also, petition of residents of Langley, Wash., protesting against the Lankford Sunday closing bill; to the Committee on the District of Columbia.

4637. By Mr. HALL of Indiana: Petition of R. D. Homer and 131 citizens, of Pulaski County, asking for increase of pensions for Civil War soldiers and widows; to the Committee on Invalid Pensions.

4638. Also, petition of Rebecca Berry and 128 citizens, of Miami County, Ind., asking for increase of pensions for veterans of the Civil War and for widows of veterans of the Civil War; to the Committee on Invalid Pensions.

4639. Also, petition of Ray Houser and 75 other citizens, of Huntington County, Ind., asking increase of pension for every Civil War survivor and war widows; to the Committee on Invalid Pensions.

4640. Also, petition of Mary McCole and 105 other citizens, of Grant County, Ind., asking for increase of pension for survivors of Civil War; to the Committee on Invalid Pensions.

4641. By Mr. HAUGEN: Petition of 31 citizens of Chickasaw, Fayette, and Bremer Counties, Iowa, protesting against the enactment of House bill 78 or any other compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4642. By Mr. JOHNSON of Washington: Petition of 39 citizens of Lewis County, Wash., opposing compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4643. Also, petition of the Federated Teachers of the Public Schools of Tacoma, Wash., favoring the Curtis-Reed bill; to the Committee on Education.

4644. Also, petition of 13 rural mail carriers of Lewis, Thurston, Mason, and Grays Harbor Counties, Wash., supporting the Gibson retirement bill and the Reece good roads bill; to the Committee on the Civil Service.

4645. Also, petition of citizens of Clarke County, Wash., protesting the Lankford Sunday observance bill; to the Committee on the District of Columbia.

4646. Also, petition of 686 citizens of Tacoma and Pierce County, Wash., opposing compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4647. By Mr. JOHNSON of Texas: Petition of W. A. Terrell, of Fort Worth, Tex., favoring and urging passage of H. R. 25, H. R. 88, and H. R. 9059, relative to Postal Service employees; to the Committee on the Post Office and Post Roads.

4648. By Mrs. KAHN: Petition of Frank B. Fitzpatrick and numerous other citizens of California, urging the passage of H. R. 6518, known as the Welch minimum wage bill; to the Committee on the Civil Service.

4649. By Mr. KORELL: Petition of citizens of Portland, Oreg., protesting against the passage of the bill known as the Brookhart bill; to the Committee on Interstate and Foreign Commerce.

4650. Also, petition of sundry citizens of Portland, Oreg., protesting against the passage of the Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

4651. By Mr. KVALE: Petition of members of the Women's Christian Temperance Union of Tracy, Minn., urging passage of the Stalker bill (H. R. 9588); to the Committee on the Judiciary.

4652. Also, petition of members of W. C. T. U. of Cottonwood, Minn., urging passage of the Stalker bill (H. R. 9588); to the Committee on the Judiciary.

4653. By Mr. LINDSAY: Petition of Brooklyn Tuberculosis and Health Association of the Bureau of Charities, urging support of the Parker bill (H. R. 5766), providing for the coordination of the public-health activities of the Government; to the Committee on Interstate and Foreign Commerce.

4654. Also, petition of board of directors, Green Mountain Club, New York City, urging support of H. R. 5760, to set aside Great Falls of the Potomac as a national park; to the Committee on the District of Columbia.

4655. By Mr. LUCE: Petition of members of the faculty and administration of Wellesley College, Wellesley, Mass., protesting against naval building program; to the Committee on Naval Affairs.

4656. By Mr. MILLER: Petition of citizens of Seattle, Wash., protesting H. R. 78; to the Committee on the District of Columbia.

4657. Also, petition of sundry citizens of Seattle, Wash., protesting passage of the District of Columbia Sunday closing law (H. R. 78); to the Committee on the District of Columbia.

4658. By Mr. MONAST: Petition of citizens of Providence, R. I., protesting against compulsory Sunday laws; to the Committee on the District of Columbia.

4659. By Mr. NELSON of Wisconsin: Petition signed by Mrs. C. M. Chapman and others, of Madison, Wis., protesting against compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4660. By Mr. O'CONNELL: Petition of the Westchester County Federation of Women's Clubs, Mount Vernon, N. Y., for law observance and enforcement; to the Committee on the Judiciary.

4661. Also, petition of Innis, Speiden & Co., New York City, favoring the passage of H. R. 9195, the Cuban parcel-post bill; to the Committee on Ways and Means.

4662. Also, petition of the New York section, Green Mountain Club (Inc.), favoring the passage of H. R. 5760, to set aside as a national park the Great Falls of the Potomac and an acre above the falls; to the Committee on the District of Columbia.

4663. Also, petition of the Brooklyn Tuberculosis and Health Association of the Bureau of Charities, Brooklyn, N. Y., favoring the passage of the Parker bill (H. R. 5766), which provides for the coordination of the public-health activities of the Government; to the Committee on Interstate and Foreign Commerce.

4664. Also, petition of the Metropolitan Life Insurance Co. of New York City, favoring the passage of the Parker bill (H. R. 5766), a bill to provide for the coordination of the public-health activities of the Government; to the Committee on Interstate and Foreign Commerce.

4665. By Mr. OLDFIELD: Petition of Eugene Cypert and others, of White County, Ark., urging the increase of pensions of Civil War pensioners; to the Committee on Invalid Pensions.

4666. By Mr. ROBINSON of Iowa: Petition of Rev. W. T. Smith, pastor of the First Methodist Episcopal Church of Iowa Falls, Iowa, and sundry citizens of Iowa Falls against the proposed naval construction bill; to the Committee on Naval Affairs.

4667. By Mr. SANDERS of New York: Petition of Mrs. S. C. Carr, signed by 34 citizens of Rochester, N. Y., protesting against the passage of the Lankford compulsory Sunday observance bill; to the Committee on the District of Columbia.

4668. By Mr. SHALLENBERGER: Petition of sundry citizens of Nebraska against compulsory Sunday observance; to the Committee on the District of Columbia.

4669. By Mr. SHREVE: A protest from Charles A. Donaghue and other citizens of Corry, Pa., against the passage of the Lankford Sunday observance bill; to the Committee on the District of Columbia.

4670. By Mr. SMITH: Petition signed by Dr. G. W. Pendleton and 808 other citizens of Idaho Falls, Idaho, protesting against the enactment of any compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4671. By Mr. SINNOTT: Petition of numerous citizens of Oregon, protesting against passage of the Lankford bill, or similar compulsory Sunday legislation; to the Committee on the District of Columbia.

4672. By Mr. STRONG of Pennsylvania: Petition of Red Cross Sisterhood, No. 86, Dames of Malta, Punxsutawney, Pa., in favor of H. R. 10078; to the Committee on Immigration and Naturalization.

4673. By Mr. SWICK: Petition of Mr. W. E. Minteer and 128 residents of Ellwood City, Lawrence County, Pa., members of the Berean bible class, United Presbyterian Church, urging the passage of H. R. 78, the Lankford bill, providing for Sunday observance in the District of Columbia; to the Committee on the District of Columbia.

4674. By Mr. SWING: Petition of residents of Riverside, Calif., protesting against compulsory Sunday observance laws; to the Committee on the District of Columbia.

4675. Also, petition of residents of San Bernardino, Calif., protesting against compulsory Sunday observance laws; to the Committee on the District of Columbia.

4676. Also, petition of sundry residents of Beaumont, Calif., and vicinity protesting against compulsory Sunday observance laws; to the Committee on the District of Columbia.

4677. By Mr. TIMBERLAKE: Petition in behalf of Civil War pension bill from veterans at Boulder, Colo.; to the Committee on Invalid Pensions.

4678. By Mr. WELCH of California: Petition of the San Francisco Board of Supervisors, San Francisco, Calif., favoring the passage of H. R. 7467, granting consent to the city and county of San Francisco to construct, maintain, and operate a bridge across the Bay of San Francisco, Calif.; to the Committee on Interstate and Foreign Commerce.

4679. By Mr. WHITE of Colorado: Petition of sundry citizens of Denver, Colo., praying enactment of legislation increasing the rates of pensions to veterans of the Civil War; to the Committee on Invalid Pensions.

4680. By Mr. WYANT: Petition of Stephen F. Whitman & Son (Inc.) favoring passage of Capper-Kelly resale price bill (H. R. 11); to the Committee on Interstate and Foreign Commerce.

4681. Also, petition of 125 members Local Union No. 1044, United Brotherhood of Carpenters and Joiners of America, by John W. Neth, recording secretary, favoring passage of Cooper-Hawes bills (H. R. 7729 and S. 1940); to the Committee on Labor.

4682. Also, petition of the Narrow Fabric Co., of Reading, Pa., favoring passage of Capper-Kelly bill (H. R. 11); to the Committee on Interstate and Foreign Commerce.

4683. Also, petition of Hardwick & Magee Co., Philadelphia, Pa., favoring passage of Capper-Kelly resale price bill (H. R. 11); to the Committee on Interstate and Foreign Commerce.

4684. Also, petition of C. J. Hollister, D. D. S., chief dental division, Pennsylvania department of health, favoring passage of H. R. 11026, Public Health Service bill; to the Committee on Interstate and Foreign Commerce.

4685. Also, petition of Council on National Parks, Forest, and Wild Life, indorsing the Anthony-Norbeck migratory bird conservation bills (H. R. 5467 and S. 2171); to the Committee on Agriculture.

4686. Also, petition of J. Q. Waters, West Newton, Pa., favoring passage of the Wurzbach bill (H. R. 6523) or Tyson bill (S. 1986); to the Committee on Military Affairs.

SENATE

WEDNESDAY, *February 29, 1928*

The Chaplain, Rev. ZeBarney T. Phillips, D. D., offered the following prayer:

Almighty God, our Heavenly Father, at this morning hour we render Thee our humble praises for all Thy mercies renewed to us each day. And from our thankful hearts we beseech Thee for all whom we love and upon whom we bestow our watchful care, for all who have blessed us with kindness, led us with patience, and restored us by their sympathy and help, for all who are bearing the burdens of life, for all who are sick and afflicted, and for all who are anguished in spirit, that Thou wouldest make Thy people one in heart and mind and purpose; and that our eyes may kindle to the beauty and glory of America when she looks forth as the morning, fair as the moon and clear as the sun in the splendor of Him who is the light of the world, Jesus Christ our Lord. Amen.

The Chief Clerk proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. CURTIS, and by unanimous consent, the further reading was dispensed with and the Journal was approved.

CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Ferris	La Follette	Schall
Barkley	Fess	McKellar	Sheppard
Bayard	Fletcher	McLean	Shipstead
Bingham	Frazier	McMaster	Shortridge
Black	George	McNary	Simmons
Blaine	Gerry	Mayfield	Smith
Blease	Gillett	Metcalf	Smoot
Borah	Glass	Moses	Steck
Bratton	Gooding	Neely	Steiwer
Brookhart	Gould	Norbeck	Stephens
Broussard	Greene	Norris	Swanson
Bruce	Hale	Nye	Thomas
Capper	Harris	Oddie	Tydings
Caraway	Harrison	Overman	Tyson
Copeland	Hayden	Phipps	Walsh, Mass.
Couzens	Heflin	Pine	Walsh, Mont.
Curtis	Howell	Pittman	Warren
Cutting	Johnson	Ransdell	Waterman
Dale	Jones	Reed, Pa.	Watson
Deneen	Kendrick	Robinson, Ark.	Wheeler
Dill	Keyes	Robinson, Ind.	Willis
Edge	King	Sackett	

Mr. COPELAND. My colleague the junior Senator from New York [Mr. WAGNER] is detained on official business. I will let this announcement stand for the day.

Mr. GERRY. The Senator from New Jersey [Mr. EDWARDS] is necessarily detained from the Senate by reason of illness in his family.

The VICE PRESIDENT. Eighty-seven Senators having answered to their names, a quorum is present.

PETITIONS AND MEMORIALS

Mr. TYSON presented a communication from the secretary of the executive committee of the New York Young Republican Club, of New York City, N. Y., which was ordered to lie on the table and to be printed in the RECORD, as follows:

Hon. LAWRENCE D. TYSON,
United States Senator, Washington, D. C.

SIR: The executive committee of the New York Young Republican Club, at its regular meeting held on the 17th day of February, 1928, approved the following resolution in regard to the Tyson-Fitzgerald bill now pending before the Congress:

"*Resolved*, That the executive committee of the New York Young Republican Club hereby approved the proposed legislation now pending before the Congress, commonly known as the Tyson-Fitzgerald bill (H. R. 500, S. 777), whereby all persons who served as officers of the Army of the United States during the World War, other than as officers of the Regular Army, and who during such service incurred physical disability rated to be in excess of 30 per cent permanent, shall be placed upon a separate list and granted the same compensation and perquisites as are received by retired officers of the Regular Army similarly situated; further

"*Resolved*, That the executive committee of the New York Young Republican Club respectfully urge upon the Senate and the House of Representatives the early passage of the said Tyson-Fitzgerald bill (S. 777 and H. R. 500) in order that belated justice may be done to the disabled officers of the National Army; further

"*Resolved*, That the secretary of this committee transmit a copy of this resolution to the President of the Senate, the Speaker of the House of Representatives, the chairman of the respective Committees on Military Affairs of the Senate and House of Representatives, and to the chairman of the Committee on Rules of the House of Representatives, with the request that the said Tyson-Fitzgerald bill (S. 777, H. R. 500) shall have their earnest and serious consideration."

We trust that this subject may have careful attention.

Very respectfully,

JOSEPH MARK BALDWIN,
Secretary Executive Committee.

Mr. REED of Pennsylvania presented a petition of the Philadelphia (Pa.) Board of Trade, praying for the passage of the bill (S. 351) prohibiting the sending of unsolicited merchandise through the mails, which was referred to the Committee on Post Offices and Post Roads.

REPORTS OF THE NAVAL AFFAIRS COMMITTEE

Mr. SWANSON, from the Committee on Naval Affairs, to which was referred the bill (S. 1377) for the relief of Lieut. Robert Stanley Robertson, jr., United States Navy, reported it with an amendment and submitted a report (No. 442) thereon.

Mr. SHORTRIDGE, from the Committee on Naval Affairs, to which was referred the bill (S. 151) for the relief of Charles R. Sies, reported it without amendment and submitted a report (No. 443) thereon.

Mr. HALE, from the Committee on Naval Affairs, to which was referred the bill (S. 2442) for the relief of Lieut. Henry C. Weber, Medical Corps, United States Navy, reported it without amendment and submitted a report (No. 444) thereon.

SESQUICENTENNIAL OF DISCOVERY OF HAWAIIAN ISLANDS

Mr. BORAH. Mr. President, from the Committee on Foreign Relations I report back favorably without amendment the joint resolution (H. J. Res. 141) to authorize the President to invite the Government of Great Britain to participate in the celebration of the Sesquicentennial of the Discovery of the Hawaiian Islands, and to provide for the participation of the Government of the United States therein, and I ask unanimous consent for its immediate consideration.

The VICE PRESIDENT. Is there objection to the request of the Senator from Idaho?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, and it was read, as follows:

Resolved, etc., That the President be, and he is hereby, authorized and requested to extend a formal invitation to the Government of Great Britain to participate in the said celebration by sending a man-of-war with delegates representing the Dominions most interested.

SEC. 2. That for the purpose of defraying the expense of participation by the Government of the United States in the said celebration, an appropriation of the sum of $5,000, or so much thereof as may be necessary, is hereby authorized, to include transportation, subsistence, or per diem in lieu of subsistence (notwithstanding the provisions of any previous act), and such other expenses as the President shall deem proper.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. BORAH. I ask that there may be printed in the RECORD the House committee report and the message of the President in relation to the matter.

The VICE PRESIDENT. Without objection, it is so ordered.

The report and message are as follows:

[H. Rept. No. 507, 70th Cong., 1st sess.]

AUTHORIZING THE PRESIDENT TO INVITE GREAT BRITAIN TO SESQUICENTENNIAL OF HAWAIIAN ISLANDS

Mr. MAAS, from the Committee on Foreign Affairs, submitted the following report to accompany H. J. Res. 141:

The Committee on Foreign Affairs, to which was referred House Joint Resolution 141, to authorize the President to invite the Government of Great Britain to participate in the celebration by the Territory of Hawaii of the Sesquicentennial of the Discovery of the Hawaiian Islands, and to provide for the participation of the Government of the United States therein, having considered the same, report thereon with the recommendation that it do pass.

The Hawaiian Islands were first sighted by the ships of the exploring and scientific expedition under the command of Capt. James Cook, January 18, 1778. Captain Cook was at that time making his third voyage of exploration into the Pacific, which had for one of its special objects the discovery of a northwestern passage which might allow of a shorter route from Europe to Asia. At the time of the discovery of these islands by Captain Cook, the inhabitants were found to be living in a condition, due to their surroundings and isolation, that can only be described as one equivalent to the stone age in Europe. They had neither metals, textiles, pottery, nor a written language, and the knowledge of Christianity, of course, had never been brought to their attention. It is possible that their ancestors had lived on these islands for 1,200 years or more.

Captain Cook, after discovering the islands, sailed to the northwest coast of the American Continent, and to what is now Alaska, and in November of the year 1778 returned to the islands with the idea of wintering there. The incidents of the second voyage showed that the Hawaiians looked upon Captain Cook as the incarnation of their god Lono. He and his men were treated with the greatest respect and hospitality, provided with supplies and food, and liberally entertained. Finally, on February 4, 1779, after a stay lasting through three months, the ships took their departure, and all would have been well had not one of the vessels suffered a casualty when off the northern end of the island of Hawaii, where the winds blow frequently in gusts, approaching gale strength, one of the masts was sprung, and Captain Cook decided to return to the Bay of Kealakekua to effect the necessary repairs. The third visit did not turn out so well. Possibly because the country had been impoverished because of the lavished gifts bestowed on the visitors, possibly because of the jealousy of the men because of the actions with the women, the fact remains that the cordiality which was present on the previous occasion was lacking. Quarrels arose; on the night of February 13 a boat belonging to the *Discovery* that had been left secured astern instead of being hoisted aboard overnight was found missing. The natives, covetous of the iron fastenings which it contained, had taken it and broken it to pieces. Captain Cook went ashore to see the King and compel the recovery of the boat and intending to bring the King on board his vessel as a hostage. A fight developed and Captain Cook was killed at the water's edge in trying to get back to his boats.

Following this discovery ships began to frequent the islands and American vessels and others engaged in the China trade stopped in these waters to refit or to obtain provisions. Whalers came to the islands. Finally, in 1820 the pioneer missionaries from New England arrived in the islands.

From this time dates the development and civilization of the islands and its people. American influence was always very marked, and through many steps culminated in the annexation of the Republic in 1898, since which time it has been an integral part of the United States.

It is these incidents which it is proposed to celebrate during the period from August 15–20, 1928, a date half way between the date of the first arrival of Captain Cook in the islands, January 18, 1778, and the date of his death, February 14, 1779. The Legislature of the Territory of Hawaii, impressed by the importance of the events, passed the following concurrent resolution:

CONCURRENT RESOLUTON

"Whereas the Territory of Hawaii, now an integral part of the United States of America, was first made known to the world by the explorations of Capt. James Cook, R. N.; and

"Whereas his discovery of these islands occurred on the 18th day of January, 1778, when, in the H. M. S. *Resolution* and H. M. S. *Discovery*, he sighted the island of Oahu, and on the 20th day of January, 1778, he first set foot ashore at Waimea, island of Kauai; and

"Whereas this discovery marked a turning point in the history of the islands which led them out of the past and into communication with the rest of the world; and

"Whereas the explorations of this celebrated navigator and leader of the British Empire, who also made known to the world the continents of New Zealand and Australia, continued until his death, which occurred at Kealakekua Bay, island of Hawaii, on the 14th day of February, 1779; and

"Whereas it is fitting that the Territory of Hawaii should celebrate the one hundred and fiftieth anniversary of the discovery of these islands by Captain Cook, in a manner to do honor to this bold and intrepid son of a friendly nation, and to celebrate the development and rise of this archipelago to its present position in this great Commonwealth of ours: Now therefore be it

"Resolved by the Senate of the Legislature of the Territory of Hawaii (the House of Representatives concurring), That a sesquicentennial celebration of the discovery of these islands be held during the week of August 15–19, 1928; and that the governor of the Territory respectfully request the President of the United States to extend a formal invitation to the Government of Great Britain, asking their participation by sending a man-of-war with delegates representing the Dominions most interested, and that the Federal Government be asked to send representatives for the occasion, with the presence of such units of the United States Fleet as may be spared; and be it further

"Resolved, That the governor request the proper authorities of the Federal Government to provide for the issuance of a suitable series of postage stamps commemorating the discovery of these islands, and the issuance of a commemorative 50-cent coin."

It also passed an act to carry into effect the celebration and providing $20,000 to meet the cost of conducting the ceremonies.

[Act 256]

An act providing for the appointment of a Cook Sesquicentennial Commission, making an appropriation and providing for its expenditure

Be it enacted by the Legislature of the Territory of Hawaii:

SECTION 1. The Governor of the Territory of Hawaii is hereby authorized to appoint a commission, in the manner provided by section 80 of the organic act, to be known as the Cook Sesquicentennial Commission, to consist of five members.

SEC. 2. The commission shall have charge of the arrangements for the ceremonies during the week of August 15–19, 1928, commemorating the one hundred and fiftieth anniversary of the discovery of the Hawaiian Islands by Capt. James Cook.

SEC. 3. The sum of $20,000 is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, for the purpose of providing entertainment for such delegates as may be sent to attend the said ceremonies and for the cost of conducting such ceremonies.

SEC. 4. This act shall take effect upon its approval.

Approved this 2d day of May, A. D. 1927.

W. R. FARRINGTON,
Governor of the Territory of Hawaii.

In consequence of these acts of the legislature, the governor of the Territory, through the Secretary of the Interior, initiated the steps looking toward getting the President's approval to the plan that was contemplated in the concurrent resolution. The Delegate of the Territory took the matter up with the State Department and the Interior Department. As a consequence, the Secretary of State on December 28, 1927, sent the following communication to the President:

THE PRESIDENT:

From August 15–19, 1928, the Territory of Hawaii will celebrate the sesquicentennial of the discovery of the Hawaiian Islands by Capt. James Cook, and the Legislature of the Territory of Hawaii has appropriated $20,000 to meet the cost of the celebration.

The Hawaiian Legislature has also, by a concurrent resolution adopted in April last, authorized the Governor of the Territory to "request the President of the United States to extend a formal invitation to the Government of Great Britain, asking their participation by sending a man-of-war with delegates representing the Dominions most interested," and to ask that the Federal Government "send representatives for the occasion, with the presence of such units of the United States Fleet as may be spared."

In pursuance of this resolution, the Secretary of the Interior, acting for the Governor of the Territory of Hawaii, has recommended that the President be requested to ask of Congress legislation authorizing the President to extend the invitation, and an appropriation of $5,000 to enable participation by the Government of the United States in the celebration.

To these ends the undersigned, the Secretary of State, who is advised by the Director of the Bureau of the Budget that the request is not in conflict with the financial program of the President, has the honor to submit to the President a draft of a joint resolution, which he recommends, if the President approve thereof, be commended to the favorable consideration of the Congress.

Respectfully submitted.

FRANK B. KELLOGG.

DEPARTMENT OF STATE,
Washington, December 28, 1927.

The President, on January 4, 1928, sent the following message to Congress:

To the Congress of the United States:

At the request of the Governor of Hawaii, made through the Secretary of the Interior, in pursuance of a resolution of the Legislature of Hawaii, I commend to the favorable consideration of the Congress the draft of a joint resolution, attached to the accompanying report of the Secretary of State, to authorize the President to invite the Government of Great Britain and the governments of certain of the British Dominions to participate in the celebration at Honolulu of the Sesquicentennial of the Discovery of the Hawaiian Islands, and to provide for participation of the Government of the United States therein.

CALVIN COOLIDGE.

THE WHITE HOUSE, *January 4, 1928.*

Accompanying the President's message was the draft of the joint resolution and it is that draft which has been embodied in the House Joint Resolution 141 here being considered. The proposal to invite the Government of Great Britain and the Dominions most interested is due to the fact that Capt. James Cook and his expedition was sent out by the British Government, that in addition to the discovery of the Hawaiian Islands, he was concerned with the explorations on the

west coast of what is now the Dominion of Canada, made original surveys in the Gulf of St. Lawrence, and was responsible in a large measure for adding to the British Empire the continent of Australia and New Zealand. The invitation on the part of the Government of the Territory of Hawaii to Britain to take part in the ceremonies has already been transmitted through the American chargé d'affaires in London, but this resolution will authorize the President to transmit the invitation for the Territory.

The celebration will consist of a gathering of delegates in Honolulu, who will then be taken to the island of Kauai, the westernmost of the group, where at Waimea, the point at which Captain Cook first landed, there will be a pageant and dedication of a monument commemorating the first landing. The party will then return to Honolulu and proceed to Kealakekua, where Captain Cook spent the greater part of his second visit to the islands and where he died. Here it is expected that there will be the opening of a Territorial park and dedication of a memorial bronze tablet to mark the spot where Captain Cook fell, also the dedication of the tablet to mark the site of the first Christian burial in the islands. The party will then return to Honolulu for final exercises of a commemorative and literary character.

Hawaii, with its present population of three hundred and thirty-three thousand-odd inhabitants, with its marked development as an American community, with its splendid prosperity, dependent upon agricultural interests, is such a wonderful example of what America has achieved through its advancement of republican and Christian ideals, that the celebration of this occasion marking the one hundred and fiftieth anniversary of the modern birth of the islands is deemed one worthy to be celebrated by Federal cooperation.

This resolution will authorize Federal recognition of the event, will provide for Federal representation in the event, both by representatives and a part of the fleet, and authorizes an appropriation of the sum of $5,000 to take care for such representatives. The cost of the celebration in the islands is provided for by the Territory.

[H. Doc. 132, 70th Cong., 1st sess.]

SESQUICENTENNIAL OF THE DISCOVERY OF THE HAWAIIAN ISLANDS

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES TRANSMITTING DRAFT OF A JOINT RESOLUTION, ATTACHED TO THE ACCOMPANYING REPORT OF THE SECRETARY OF STATE, TO AUTHORIZE THE PRESIDENT TO INVITE THE GOVERNMENT OF GREAT BRITAIN AND THE GOVERNMENTS OF CERTAIN OF THE BRITISH DOMINIONS TO PARTICIPATE IN THE CELEBRATION AT HONOLULU OF THE SESQUICENTENNIAL OF THE DISCOVERY OF THE HAWAIIAN ISLANDS, AND TO PROVIDE FOR PARTICIPATION OF THE GOVERNMENT OF THE UNITED STATES THEREIN

To the Congress of the United States:

At the request of the Governor of Hawaii, made through the Secretary of the Interior, in pursuance of a resolution of the Legislature of Hawaii, I commend to the favorable consideration of the Congress the draft of a joint resolution, attached to the accompanying report of the Secretary of State, to authorize the President to invite the Government of Great Britain and the Governments of certain of the British Dominions to participate in the celebration at Honolulu of the Sesquicentennial of the Discovery of the Hawaiian Islands, and to provide for participation of the Government of the United States therein.

CALVIN COOLIDGE.

THE WHITE HOUSE, *January 4, 1928.*

THE PRESIDENT:

From August 15 to August 19, 1928, the Territory of Hawaii will celebrate the sesquicentennial of the discovery of the Hawaiian Islands by Capt. James Cook, and the Legislature of the Territory of Hawaii has appropriated $20,000 to meet the cost of the celebration.

The Hawaiian Legislature has also, by a concurrent resolution adopted in April last, authorized the Governor of the Territory to "request the President of the United States to extend a formal invitation to the Government of Great Britain asking their participation by sending a man-of-war with delegates representing the Dominions most interested," and to ask that the Federal Government "send representatives for the occasion, with the presence of such units of the United States fleet as may be spared."

In pursuance of this resolution the Secretary of the Interior, acting for the Governor of the Territory of Hawaii, has recommended that the President be requested to ask of Congress legislation authorizing the President to extend the invitation, and an appropriation of $5,000 to enable participation by the Government of the United States in the celebration.

To these ends the undersigned, the Secretary of State, who is advised by the Director of the Bureau of the Budget that the request is not in conflict with the financial program of the President, has the honor to submit to the President a draft of a joint resolution, which he recommends, if the President approve thereof, be commended to the favorable consideration of the Congress.

Respectfully submitted.

FRANK B. KELLOGG.

DEPARTMENT OF STATE,
Washington, December 28, 1927.

DRAFT OF A JOINT RESOLUTION TO AUTHORIZE THE PRESIDENT TO INVITE THE GOVERNMENT OF GREAT BRITAIN TO PARTICIPATE IN THE CELEBRATION OF THE SESQUICENTENNIAL OF THE DISCOVERY OF THE HAWAIIAN ISLANDS, AND TO PROVIDE FOR THE PARTICIPATION OF THE GOVERNMENT OF THE UNITED STATES THEREIN

Whereas the Territory of Hawaii will celebrate from August 15 to August 19, 1928, the Sesquicentennial of the Discovery of the Hawaiian Islands by Capt. James Cook; and

Whereas the Legislature of the Territory of Hawaii has appropriated the sum of $20,000 to meet the cost of conducting such ceremonies, and for the purpose of providing entertainment of delegates; and

Whereas in pursuance of a concurrent resolution of the Legislature of the Territory of Hawaii, adopted by the senate thereof on April 14, 1927, and by the house of representatives thereof on April 16, 1927, the Governor of the Territory of Hawaii has requested the President "to extend a formal invitation to the Government of Great Britain asking their participation by sending a man-of-war with delegates representing the Dominions most interested," and has asked that "the Federal Government send representatives for the occasion, with the presence of such units of the United States Fleet as may be spared": Be it therefore

Resolved, etc., That the President be, and he is hereby, authorized and requested to extend a formal invitation to the Government of Great Britain to participate in the said celebration by sending a man-of-war with delegates representing the Dominions most interested.

SEC. 2. That for the purpose of defraying the expense of participation by the Government of the United States in the said celebration an appropriation of the sum of $5,000, or so much thereof as may be necessary, is hereby authorized, to include transportation, subsistence, or per diem in lieu of subsistence (notwithstanding the provisions of any previous act), and such other expenses as the President shall deem proper.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time and, by unanimous consent, the second time, and referred as follows:

By Mr. PINE:

A bill (S. 3415) to amend paragraph (5) of section 20 of the interstate commerce act; to the Committee on Interstate Commerce.

(By request.) A bill (S. 3416) to carry into effect the twelfth article of the treaty between the United States and the Shawnee Indians proclaimed October 14, 1868; to the Committee on Indian Affairs.

By Mr. BAYARD:

A bill (S. 3417) granting an increase of pension to Mary J. McIntyre (with accompanying papers); to the Committee on Pensions.

By Mr. BROUSSARD:

A bill (S. 3418) for the relief of John F. Mathews; to the Committee on Military Affairs.

By Mr. STECK:

A bill (S. 3419) for the relief of W. J. Price; to the Committee on Military Affairs.

A bill (S. 3420) granting an increase of pension to Harriett G. Baker; to the Committee on Pensions.

By Mr. KENDRICK:

A bill (S. 3421) for the relief of certain stock-raising homestead entrymen in the State of Wyoming; to the Committee on Public Lands and Surveys.

By Mr. OVERMAN:

A bill (S. 3422) for the relief of W. W. Ruark; and

A bill (S. 3423) for the relief of the Advance Manufacturing Co.; to the Committee on Claims.

By Mr. McNARY:

A bill (S. 3424) for the relief of Cynthia Rudler Osgood; to the Committee on Pensions.

By Mr. McKELLAR:

A bill (S. 3425) for the relief of John Miller Grove, alias James M. Groves; to the Committee on Military Affairs.

By Mr. CARAWAY:

A bill (S. 3426) to quiet title and possession with respect to certain lands in Faulkner County, Ark.; to the Committee on Public Lands and Surveys.

A bill (S. 3427) authorizing the Secretary of the Navy to make a readjustment of pay to Gunner W. H. Anthony, jr., United States Navy (retired); to the Committee on Naval Affairs.

By Mr. SCHALL:

A bill (S. 3428) to acquire by purchase, condemnation, or otherwise a site for and the erection and completion thereon of a suitable building for the use and accommodation of the United States post office, United States customs, United States immigration department, United States border patrol, and Department of Justice in International Falls, Minn.; to the Committee on Public Buildings and Grounds.

A bill (S. 3429) for the relief of Samuel S. Michaelson; to the Committee on Claims.

By Mr. WILLIS:

A bill (S. 3430) granting an increase of pension to William Frederick Gross (with accompanying papers); to the Committee on Pensions.

By Mr. McLEAN:

A bill (S. 3431) granting a pension to Mary Wagner (with accompanying papers); to the Committee on Pensions.

By Mr. BLAINE:

A bill (S. 3432) to amend section 200 of the World War veterans' act of 1924, as amended; to the Committee on Finance.

A bill (S. 3433) to amend an act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes," as amended; to the Committee on the Judiciary.

By Mr. WHEELER:

A bill (S. 3435) to authorize an appropriation from tribal funds to pay part of the cost of the construction of a road on the Crow Indian Reservation, Mont.; to the Committee on Indian Affairs.

By Mr. HALE:

A bill (S. 3436) for the relief of George A. Sawyer (with accompanying papers); to the Committee on Claims.

By Mr. JONES:

A bill (S. 3437) to provide for the conservation of fish, and for other purposes; to the Committee on Commerce.

By Mr. NORBECK:

A bill (S. 3438) authorizing a per capita payment to the Rosebud Sioux Indians, South Dakota; to the Committee on Indian Affairs.

A bill (S. 3439) to authorize the Secretary of Agriculture to acquire a herd of musk oxen for introduction into Alaska for experimentation with a view to their domestication and utilization in the Territory; to the Committee on Agriculture and Forestry.

By Mr. HEFLIN:

A joint resolution (S. J. Res. 103) providing for the return of the remains of members of the Marine Corps and other naval forces who have died in Nicaragua during the present intervention by the United States; to the Committee on Naval Affairs.

FLOOD CONTROL

Mr. JONES. I desire to introduce a bill relating to the flood situation. It is a bill which embodies the action of the Commerce Committee, and I was authorized to prepare and introduce it in the Senate and then report it back as soon as possible. I expect to report it back to-morrow or the next day.

The bill (S. 3434) for the control of floods on the Mississippi River from the Head of Passes to Cairo, and for other purposes, was read twice by its title and referred to the Committee on Commerce.

AMATEUR BOXING IN THE DISTRICT OF COLUMBIA

Mr. WALSH of Massachusetts submitted an amendment intended to be proposed by him to the bill (S. 1954) allowing and regulating amateur boxing and sparring matches in the District of Columbia, which was referred to the Committee on the District of Columbia and ordered to be printed.

AMENDMENTS TO THE DISTRICT OF COLUMBIA APPROPRIATION BILL

Mr. CAPPER submitted an amendment proposing to make the appropriation of $250,000 immediately available "for proper grading, seeding, and sodding; for the construction of roads, walks, and steps; for seating; for running-track, baseball diamond, tennis courts, and other athletic facilities; for fencing and other necessary work to fit up for athletic purposes the ground purchased as a joint site for the Langley Junior High School and the McKinley High School," intended to be proposed by him to House bill 11133, the District of Columbia appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. NEELY submitted an amendment intended to be proposed by him to House bill 11133, the District of Columbia appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

In the items for "Street and road improvement and repair," on page 25, line 15, insert the following:

"Northeast: B Street, Sixteenth Street to Seventeenth Street, $5,000.

"Northeast: Seventeenth Street, A Street to B Street, $5,000."

EDGAR WALLACE

Mr. CARAWAY. Mr. President, I wish but a moment of the Senate's time to do, possibly, an unprecedented thing.

On the 25th of this month there died in a hospital here in the District of Columbia Edgar Wallace. For a number of years he was the legislative representative of the American Federation of Labor. Born in England, he came to America at a very early age. He had actual knowledge of the working conditions in this country through having earned his living by day labor. Later he became an official in the organization of which he was a member. Then he came to Washington as one of the representatives of the American Federation of Labor.

I knew Mr. Wallace intimately well. He was a man of great information, of stainless honor, and of the most kind and generous disposition. I was much shocked when I learned of his untimely death.

I wish merely to say this in testimony of the very high character of this representative of organized labor.

Mr. KING. Mr. President, the Senator from Arkansas [Mr. CARAWAY] has just paid an eloquent and fitting tribute to Edgar Wallace. I have known Mr. Wallace for a number of years and frequently met him in connection with legislation in which, as the representative of the American Federation of Labor, he was interested.

The Federal Government has become so powerful and the field of legislation which it covers is so broad that some organizations and individuals regard it as necessary that their views be presented to committees of Congress. Congress has, upon various occasions, enacted measures dealing directly or indirectly with social and industrial questions and with matters affecting labor, whether organized or unorganized. Mr. Wallace, in his activities in behalf of the organization with which he was connected, was always frank and temperate. His views were presented in a concise and convincing manner and were of value to committees charged with the responsibility of framing suitable measures. I regarded him as a man of honor and integrity, as one interested not only in the organization of which he was a representative, but in social and political questions affecting the industrial welfare of our country.

There are some persons who appear before committees and confer with Senators and Congressmen whose views are of importance and whose suggestions make for wise and sound legislation. In his devotion to the cause of labor I never found Mr. Wallace indifferent to the rights and interests of others. He was an upright, honest, and patriotic man. Organized labor has lost a valiant and courageous defender and our country a patriotic citizen. I sincerely regret his death and extend my sympathy to his immediate associates and those who have cause to mourn the great loss which his demise entails.

CORRECTIONS IN ENROLLMENT OF HOUSE BILL 10635

Mr. WARREN. Mr. President, from the Committee on Appropriations I report back favorably House Concurrent Resolution 25, and ask that it may be read. I also ask unanimous consent for its immediate consideration.

The concurrent resolution was read, and the Senate, by unanimous consent, proceeded to its consideration, as follows:

Resolved by the House of Representatives (the Senate concurring), That the Clerk of the House of Representatives is authorized and directed, in the enrollment of H. R. 10635 entitled "An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1929, and for other purposes," to make the following changes in the engrossed bill:

On page 20, line 13, after the word "act," where it occurs the first time, insert the words: ", as amended."

On page 20, line 24, after the word "act," insert the following: "and for carrying out the applicable provisions of the act approved March 3, 1927 (Stat. L. vol. 44, p. 1381)."

On page 20, line 25, after the word "officers," insert the word "attorneys."

On page 21, line 1, after the word "supervisors," insert the following: "gaugers, storekeepers, storekeeper-gaugers."

On page 22, line 9, after the syllable "tions," insert the word "prescribed."

On page 22, line 14, strike out the word "bonds" and insert the word "bonded."

Mr. WARREN. Mr. President, in explanation of the concurrent resolution, I send to the desk and ask the clerk to read a statement appearing in yesterday's CONGRESSIONAL RECORD in the House proceedings.

The VICE PRESIDENT. The clerk will read, as requested.

The Chief Clerk read as follows:

[From the CONGRESSIONAL RECORD, Tuesday, February 28, 1928, page 3706]

Mr. MADDEN. Mr. Speaker, I want to make a brief statement in explanation of this resolution, so it will be thoroughly understood and may be a part of the history showing the reason we are proposing the adoption of the concurrent resolution.

The concurrent resolution which has just been read makes five textual changes in the paragraph for the Bureau of Prohibition and the enforcement of the narcotic acts. None of the amendments adds or subtracts from the existing law affecting the service. Two of the amendments are to correct errors which have crept in in the printing of the bill at some stage of its passage.

The other three amendments are to clarify the text of the paragraph so as to make it conform to the requirements of the accounting laws. These three amendments result from the establishment of the prohibition enforcement as a separate bureau. They were deemed unimportant at the time the bill was framed in the House, and they may not be important now, but it is deemed advisable to have them made so that there may not be any criticism of the technical features of the language. In my judgment they are not absolutely essential, but for the purpose of clarification and to prevent technical interpretations they are desirable.

Mr. GARNER of Texas. What is the enlargement of the law with reference to officers and attorneys? Does it enlarge the opportunity of fixing salaries in that respect?

Mr. MADDEN. Attorneys are provided for in the law and are specified, but they are not specified in the appropriations, and it was to clarify the whole situation that we wanted to make the statement clear.

Mr. GARNER of Texas. Is this entirely agreeable——

Mr. MADDEN. Yes; it is absolutely agreeable. It does not make any change except textual changes.

The SPEAKER. The gentleman from Illinois asks unanimous consent for the present consideration of the resolution. Is there objection?

There was no objection.

The resolution was agreed to.

Mr. KING. Mr. President, will the Senator yield?

Mr. WARREN. Certainly.

Mr. KING. The statement made by the distinguished chairman of the Appropriations Committee in the House and the inquiry submitted by the Representative from Texas [Mr. GARNER] do not, to my mind at least, reveal fully the implication and the meaning of the changes. Mr. MADDEN repeatedly said that it is for the purpose of clarification and also that there might be no technical interpretation which could affect the measure. He further stated that at the time when the bill was originally drawn these matters were not deemed important, but they are now deemed important.

It would seem, in view of the statement made by Mr. MADDEN, that this is rather important legislation. I do not wish to delay the passage of the concurrent resolution, but if the Senator from Wyoming will explain just the effect of the amendments, I shall be very glad.

Mr. WARREN. I will say to the Senator that the concurrent resolution has been carefully considered by the committee. It merely provides for the insertion in the bill of certain language which the House originally did not put in and which the Senate committee did not recommend when the bill was before the Senate, because the amendments desired did not come to our notice until the bill had been completed and gone to conference, where, of course, it could not be changed.

I have here a letter consisting of two pages from the official in charge of this work, which, I think, gives the reasons why the action now proposed should be taken. I offer that letter for the RECORD and ask that it may be printed at this point. It is signed by Mr. J. M. Doran, who is the Commissioner of Prohibition.

The VICE PRESIDENT. In the absence of objection, the letter will be printed in the RECORD.

The letter is as follows:

TREASURY DEPARTMENT,
BUREAU OF PROHIBITION,
Washington, February 28, 1928.

Hon. FRANCIS E. WARREN,
Chairman Senate Committee on Appropriations,
United States Senate.

MY DEAR SENATOR: Through inadvertence certain, apparently, necessary requirements with relation to the appropriation for the Bureau of Prohibition were omitted from the draft of the act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1929, etc.

The vital omission is in connection with personnel heretofore provided for in the appropriation for the Internal Revenue Bureau who were transferred to the Bureau of Prohibition by virtue of provisions of the act of March 3, 1927, creating the Bureau of Prohibition and the Bureau of Customs.

In order to cure these and other minor defects it is requested that you cause changes to be made in the draft of the act, as follows:

On page 20, line 25, after the word "officers," insert "attorneys."

On page 21, line 1, after the word "supervisors," insert "gaugers, storekeepers, storekeeper-gaugers."

On page 20, line 13, after the word "act," where it occurs the first time, insert the following: "; as amended,"

On page 20, line 24, after the word "act," insert the following: "and for carrying out the applicable provisions of the act approved March 3, 1927 (Stat. L., v. 44, p. 1381)."

On page 22, line 9, after the syllable "tions," insert the word "prescribed."

On page 22, line 14, strike out the word "bonds" and insert in lieu thereof the word "bonded."

Your favorable consideration of these recommendations will be very greatly appreciated.

Very sincerely yours,

J. M. DORAN,
Commissioner of Prohibition.

Mr. WARREN. The Senator from Utah is aware of the fact, of course, that in legislation enacted heretofore we provided that some of the duties in connection with prohibition enforcement which were then being performed direct by the Internal Revenue Bureau should be transferred to the Bureau of Prohibition. That is probably the only explanation that is necessary. The concurrent resolution proposes to give the enrolling clerk of the House authority before the appropriation bill shall be enrolled to insert the minor items which are covered perhaps in a number of words, but which mean little when all is said and done.

Mr. KING. Mr. President, may I ask the Senator whether the adoption of the concurrent resolution will result in increasing the number of employees in either the Internal Revenue Bureau or the Prohibition Unit?

Mr. WARREN. I think not.

Mr. KING. Will it result in an increase in their salaries?

Mr. WARREN. I could not accept the responsibility of making an unqualified negative answer to the Senator's inquiry; but I see nothing in the resolution which would lead me to think that such a result would be brought about. I am unable, however, to say what may happen in that respect.

Mr. KING. Does it enlarge the powers of any of the officials or employees of the Government in either of the bureaus referred to?

Mr. WARREN. In my judgment, it does not; it is simply to enable the Prohibition Unit to do the work which was transferred to it from another bureau.

Mr. KING. As I understand the Senator, then, it transfers from one bureau or Federal agency to another some of the duties which were heretofore performed by the Bureau of Internal Revenue?

Mr. WARREN. As I have said, certain work that was heretofore performed by the Internal Revenue Bureau has been transferred to the Prohibition Unit, and the purpose of the concurrent resolution is to make provision to enable them to carry on that work.

Mr. KING. If we accept this proposed legislation we will do it upon the theory of faith, which is "the substance of things hoped for, the evidence of things not seen."

Mr. ROBINSON of Arkansas. Mr. President, from an examination of the concurrent resolution it appears that the first amendment proposed is to insert the words "as amended" after the word "act." Plainly that is a textual amendment.

The second amendment is to add, on page 20, line 24, after the word "act," the words "and for carrying out the applicable provisions of the act approved March 3, 1927." What is the act approved March 3, 1927, which is referred to?

Mr. WARREN. I have it not before me at this time.

Mr. BINGHAM. May I say to the Senator that is the act reorganizing the Prohibition Bureau and putting it under a separate division of the Treasury Department.

Mr. ROBINSON of Arkansas. Plainly that amendment does not depart from the purposes of the appropriation bill.

Mr. WARREN. Not at all.

Mr. ROBINSON of Arkansas. The third amendment is, on page 20, line 5, after the word "officers," to insert the word "attorneys"; the next amendment is, after the word "supervisors," to insert the words "gaugers, storekeepers, storekeeper-gaugers"; the fifth amendment is to insert the word "prescribed" on page 22, line 14; and the last amendment proposed by the concurrent resolution is to strike out the word "bond" and insert the word "bonded."

Mr. WARREN. The word "attorneys" was left out inadvertently when the bill was drawn.

Mr. ROBINSON of Arkansas. Plainly the amendments are intended to perfect the appropriation bill.

Mr. WARREN. Entirely so.

The VICE PRESIDENT. The question is on agreeing to the concurrent resolution.

The concurrent resolution was agreed to.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9136) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1929, and for other purposes; that the House had receded from its disagreement to the amendments of the Senate Nos. 6 and 51 to the said bill and concurred therein, and that the House had receded from its disagreement to the amendments of the Senate Nos. 12 and 46, and agreed thereto each with an amendment, in which it requested the concurrence of the Senate.

INTERIOR DEPARTMENT APPROPRIATIONS

The PRESIDING OFFICER (Mr. ODDIE in the chair) laid before the Senate the action of the House of Representatives on certain amendments of the Senate to the bill (H. R. 9136) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1929, and for other purposes, which was read, as follows:

Resolved, That the House recede from its disagreement to the amendments of the Senate Nos. 6 and 51 to the bill (H. R. 9136) entitled "An act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1929, and for other purposes," and concur therein.

That the House recede from its disagreement to the amendment of the Senate No. 12 and agree to the same with an amendment as follows:

In lieu of the matter inserted by said amendment insert the following: "For the construction and improvement of roads on the Turtle Mountain Indian Reservation, N. Dak., $5,000."

That the House recede from its disagreement to the amendment of the Senate No. 46 and agree to the same with an amendment as follows:

In lieu of the matter inserted by said amendment insert the following: "That section 3 of the act of August 25, 1916 (39 Stat. 535), entitled "An act to establish a National Park Service, and for other purposes," be, and the same is hereby, amended by adding the following thereto: *"And provided further*, That the Secretary of the Interior may grant said privileges, leases, and permits and enter into contracts relating to the same with responsible persons, firms, or corporations without advertising and without securing competitive bids: *And provided further*, That no contract, lease, permit, or privilege granted shall be assigned or transferred by such grantees, permittees, or licensees, without the approval of the Secretary of the Interior first obtained in writing: *And provided further*, That the Secretary may, in his discretion, authorize such grantees, permittees, or licensees to execute mortgages and issue bonds, shares of stock, and other evidences of interest in or indebtedness upon their rights, properties, and franchises, for the purposes of installing, enlarging, or improving plant and equipment and extending facilities for the accommodation of the public within such national parks and monuments."

Mr. SMOOT. Mr. President, when the conference report on this bill was up for consideration there were three items in the bill, put in by the Senate, that had to be taken back to the House. The matter went back to the House, and it has agreed to the Senate amendments with amendments in two cases.

I move that the Senate concur in the amendments of the House to Senate amendments Nos. 12 and 46.

Mr. ROBINSON of Arkansas. This represents a complete agreement?

Mr. SMOOT. Yes; a complete agreement.

The PRESIDING OFFICER. The question is on the motion of the Senator from Utah.

The motion was agreed to.

INDEPENDENT OFFICES APPROPRIATIONS—CONFERENCE REPORT

Mr. BLACK. Mr. President, on Monday last I entered a motion to reconsider the vote by which the conference report on the independent offices appropriation bill was agreed to. I desire to state the object of the motion to reconsider. When the motion was made to agree to the report of the committee of conference unfortunately I was not able to learn what the motion was until it had been carried. I immediately sent for a copy of the report, and found that it was the conference report on the independent offices appropriation bill.

In the conference report there are two recommendations with reference to amendments which were adopted by the Senate. The Senate conferees agreed to recede from seven amendments which were placed upon the bill by the Senate, and in return for that the House agreed to one very small, insignificant amendment. Included in the seven amendments from which the Senate conferees have receded are two with reference to the Shipping Board, one which would limit the maximum salary to be paid to the attorney for that board to the sum of $10,000, and the other reducing the total amount which that board is empowered to expend for legal services.

Mr. BRATTON. Mr. President, will the Senator from Alabama yield to me?

Mr. BLACK. Yes, sir.

Mr. BRATTON. With all due deference to the Senator, I desire to state that we have a unanimous-consent agreement making another matter the special order for the morning hour. I believe it takes priority over the matter which the Senator is now discussing, and if it will not inconvenience him I should very much like to reach the special order and endeavor to dispose of it this morning.

Mr. BLACK. The motion which I have made has to come up to-day, as I understand, and is in order as business coming over from a preceding day.

The VICE PRESIDENT. It is not necessary for the motion to come up to-day, and it is not in order during morning business.

Mr. BLACK. I am in no hurry about it, but I shall not take over five minutes.

Mr. BRATTON. I shall take it as a favor if the Senator will let the measure to which I refer go forward.

Mr. BLACK. I yield for that purpose.

Mr. BRATTON. I thank the Senator for his kindness.

PUEBLO INDIAN LANDS

The VICE PRESIDENT. Morning business is closed, and, in accordance with the unanimous-consent agreement, the Chair lays before the Senate the amendment of the House of Representatives to the bill (S. 700) authorizing the Secretary of the Interior to execute an agreement with the Middle Rio Grande conservancy district providing for conservation, irrigation, drainage, and flood control for the Pueblo Indian lands in the Rio Grande Valley, N. Mex., and for other purposes. The question is on concurring in the House amendment as amended, which is open to further amendment.

Mr. BRATTON resumed and concluded the speech begun by him on yesterday. The speech entire is as follows:

Tuesday, February 28, 1928

Mr. BRATTON. Mr. President, the bill now before the Senate authorizes the Secretary of the Interior to make a contract with the Middle Rio Grande conservancy district, being a corporation organized under the laws of the State of New Mexico, to develop and reclaim certain lands owned by six tribes of Indians, all located within the proposed conservancy district, and authorizing an appropriation therefor. The Middle Rio Grande conservancy district embraces an area consisting of about 210,000 acres of land situated in the valley of the Rio Grande River in New Mexico. This area runs a distance of about 150 miles with the river and varies in width from 1 to 6 miles. Of the 210,000 acres, it is proposed to reclaim slightly in excess of 132,000 acres. That land is owned in part by whites and in part by Indians. The Indians own 23,607 acres. That land is not compact; it is not contiguous but it is separated into different tracts, and is interspersed with the white-owned land, thus making it difficult, if not impossible, to reclaim the white-owned lands without at the same time including the Indian-owned lands, and, conversely, making it difficult, if not impossible, at this or any future time to reclaim the Indian-owned lands without reclaiming the white-owned lands at the same time. In other words, Mr. President, the topography and the geography of the country are such that the two classes of land must be reclaimed concurrently and together.

Of the 23,607 acres of land owned by the Indians, 8,346 acres are now being cultivated and have been cultivated for many years in the past, thereby leaving an area of 15,261 acres of raw land owned by the Indians that it is proposed to reclaim along with other lands under this great project.

The present cultivated area is being irrigated and has been so for a number of years in an antiquated, obsolete, indifferent, and unsatisfactory manner; so much so that I call the attention of the Senate to the significant fact that, according to the statement made by the Assistant Commissioner of Indian Affairs, at one time these Indians cultivated about 25,000 acres of land in this area, but due to conditions——

Mr. FRAZIER. Mr. President, will the Senator yield?

Mr. BRATTON. I yield to the Senator from North Dakota.

Mr. FRAZIER. Do I understand that the Commissioner or Assistant Commissioner of Indian Affairs made the statement that 25,000 acres were cultivated there at one time by the Indians?

Mr. BRATTON. That is my recollection.

Mr. FRAZIER. I do not recall any such statement being made, and I should like to have reference to it if the Senator has it.

Mr. BRATTON. If the Senator will turn to the bottom of page 15 of the first hearings of the Senate Committee on Indian

Affairs held under date of January 20 this year he will find that the Assistant Commissioner of Indian Affairs said this:

My understanding is that the Indians at one time cultivated about 25,000 acres, whereas to-day they are cultivating approximately 8,000 acres of land—

Having reference, of course, to the district then under discussion.

Mr. COPELAND. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. KING in the chair). Does the Senator from New Mexico yield to the Senator from New York?

Mr. BRATTON. I yield to the Senator from New York.

Mr. COPELAND. I do not want to divert the thought of the Senator; but it has been represented to me that these Indians now have about 8,000 acres of land. Is that correct?

Mr. BRATTON. They have 8,346 acres now in cultivation.

Mr. COPELAND. And that the proposal now pending would place on that Indian group a debt of about $560,000. Is that correct?

Mr. BRATTON. It does this, Mr. President: The Indians own two classes of land within this area. One of those classes comprises 8,346 acres of land that is now being cultivated in an indifferent, obsolete, antiquated, unsatisfactory way. That condition has obtained to the extent that their cultivated area, at one time was 25,000 acres, has been reduced now to 8,346 acres.

Mr. COPELAND. Has the tribe been reduced in numbers at the same time?

Mr. BRATTON. That I am not able to say to the Senator. I do not want to make a misstatement. I do not know.

In addition to the 8,346 acres now being cultivated, it is contemplated to reclaim 15,000 acres plus of raw land, which is not now being cultivated. The total area of Indian lands to be reclaimed would be 23,607 acres. The total cost of that is $1,593,311, and is based upon a maximum of $67.50 per acre on the whole area; but the lien to secure that sum does not attach to the present cultivated area. It remains free from lien. The income from it remains free. There is a lien placed upon the raw land, something that is now of a nominal value, if any value at all, for the whole debt, with the provision that that lien never shall be foreclosed as long as the Indians own the land, and that the reimbursement shall be made from proceeds of leases upon the newly reclaimed land.

Mr. COPELAND. If the Senator will bear with me, that is very interesting. Do I get it right now: These Indians are cultivating about 8,000 acres?

Mr. BRATTON. That is correct.

Mr. COPELAND. And then, in addition to that, they have about 15,000 acres of raw land, uncultivated land?

Mr. BRATTON. That is correct.

Mr. COPELAND. But, if this project is carried through, the mortgage, so to speak, will not be upon the 8,000 cultivated acres, but will be upon the raw acreage?

Mr. BRATTON. That is true, Mr. President. Do my answers satisfy the point the Senator from New York has in mind?

Mr. COPELAND. I am very much interested. What the Senator says does give me new light. I had supposed that the lien was upon all the acreage owned by the Indians.

Mr. BRATTON. No, Mr. President; the Senator's information in that regard is in error. If the Senator will turn to line 21, page 6 of the bill, he will find this language:

The share of the cost paid the district on behalf of the Indian lands under the agreement herein authorized, including any sum paid to the district from the funds authorized to be appropriated by the act of February 14, 1927, * * * shall be reimbursed to the United States under such rules and regulations as may be prescribed by the Secretary of the Interior: *Provided*, That such reimbursement shall be made only from—

That has been amended to read—

only from proceeds of leases from the newly reclaimed pueblo lands, and there is hereby created against such newly reclaimed lands a first lien, which lien shall not be enforced during the period that the title to such lands remains in the pueblos or individual Indian ownership.

Expressly limiting the lien to the newly reclaimed lands, expressly providing that that lien shall not be subject to foreclosure as long as the Indians own the land, and expressly providing that the reimbursement shall be made from proceeds of leases upon newly reclaimed land.

Mr. COPELAND. If the Senator will bear with me just a moment, I am very anxious, as the Senator knows, to be set right in the matter, for the reason that I have had many letters from people living in my State who appear to be interested in the Indians, and for the further reason that I have had the suspicion through the past several years that sometimes the interests of the Indians are not looked after as they should be. This is no reflection at all upon the Senator, and has no bearing on this bill.

If I am correctly advised, however, the Indians now have about 15,000 acres of what the Senator calls raw land, uncultivated land.

Mr. BRATTON. Yes.

Mr. COPELAND. Which they can not use at all under present conditions. Is that correct?

Mr. BRATTON. That is true.

Mr. COPELAND. In other words, if these Indians are at any time to have more land to cultivate some of this raw land must be taken over in order that it may be placed under irrigation?

Mr. BRATTON. That is true.

Mr. COPELAND. Then, as a matter of fact, if the Senator is right, it means that the Indians will be no worse off in any respect after this is over. They will still have their 8,000 acres unencumbered, and they will have a chance of selling or leasing these other lands or using them themselves if they feel so disposed?

Mr. BRATTON. Moreover, instead of their present 8,000 acres being irrigated in an indifferent, unsatisfactory, backward way, it will be reclaimed and will have a modern system of reclamation, which ought to make it produce fourfold over its present production.

Mr. COPELAND. Without any added expense to the Indians?

Mr. BRATTON. Exactly.

Mr. LA FOLLETTE. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from New Mexico yield to the Senator from Wisconsin?

Mr. BRATTON. I yield.

Mr. LA FOLLETTE. Is it not the contention of those who represent the Indians that these 8,346 acres are now under such an intensive cultivation that on the average 2½ acres support an individual Indian; and are they not contending, may I ask the Senator, that as a matter of fact they will not have any such proportionate benefit as is implied under the Senator's statement?

Mr. BRATTON. Mr. President, in answer to that, I suppose the Senator is referring to the contentions of the secretary of the Indian Defense Society when he says "those who represent the Indians."

Mr. LA FOLLETTE. Not entirely, Mr. President. I have also seen the statement made by Mr. Hanna, who, I understand, is attorney for the Pueblo Tribe involved.

Mr. BRATTON. Under the employment of this association, as I understand. He is a very high-class, distinguished gentleman.

Mr. LA FOLLETTE. My understanding and the Senator's understanding differ with regard to that; but that is not important, as I see it. The point I was trying to bring to the Senator's attention was that there is a contention that this 8,346 acres is, and has been for a great number of years, under sufficiently intensive cultivation that approximately 2½ acres support an individual Indian.

Mr. BRATTON. I can not answer the Senator's question in better language than to read the testimony given by Mr. Collier before the committee of which the Senator and I are members. I call his attention to the language beginning at the bottom of page 33, and I also invite the attention of the Senator from New York to this language. Before I read it, however, I want to call attention to the fact that the bill then under consideration involved an appropriation of the same sum of money. It contemplated reclaiming the same area. The only substantial difference between the bill as it then stood and as it now stands is whether there shall be a gratuity for a part of the sum and the balance reimbursable, or whether the entire sum shall be reimbursable.

Mr. LA FOLLETTE. That is quite a difference, Mr. President.

Mr. BRATTON. With that in mind, let me call the attention of the Senator to the facts as stated by Mr. Collier when he said:

I believe there are no dependable statistics, but we know the per capita income of these tribes within the last few years, which has varied from $15 to $45 per capita per annum, based on a yield per farm and the other factors of income. They are farmers.

The interest of the Indians in this project is just as direct and imperative as the interest of any white element in the valley. Although the project took its origin from the white end, and is a project of the general community, yet it is true that the interest of the Indians is direct, imperative, and important, because, first, as I said, the existing cultivatable acreage, now that there has been so much water-logged, is not sufficient to maintain a decent standard of living in at least three of these pueblos; and second, we are all

hoping for an increase of population in these tribes. They are strong, virile tribes. They are pure-blood Indians. Their habits are industrious. Altogether, they are model Indians. We are hoping for an increase of population through the extension of adequate medical services to them. If that increase of population comes, as it will come—it has begun already—it will be totally impossible, under the existing conditions, for that population to live on the existing limited area of the land. Either it must disperse or starve, because these Pueblos are located in regions where there is only an infinitesimal demand for casual labor. So the Pueblos face not only present hardship but increased future hardships; unless this plan is carried out they face what is to them the supreme evil—that of being compelled, with the growth of population, to break up and go out into distant places. In other words, they face the end of their tribal relations, and to them that is a supreme matter.

Mr. President, I do not believe I could answer the Senator's question with respect to the conditions that confront these Indians in any stronger language than the secretary of the Indian Defense Society, who is championing the opposition to this bill, described them in the language I have just read.

Mr. LA FOLLETTE. Of course, there is no argument so far as the 15,000 acres of raw land is concerned; and, of course, Mr. Collier suggests there in his testimony, if I followed the Senator correctly, that there will be great hardship if these tribes continue to grow in population. However, is it not a fact—and I ask this question in all good faith, because the Senator is familiar with this area and knows it well, and I do not—is it not a fact that these Indians are now deriving their sole income from and are living as a result of that income off these 8,346 acres?

Mr. BRATTON. Yes, Mr. President; they are living—such living as it is—from that source. But Mr. Collier described it as an intolerable condition, which must be remedied, or the Indians in the near future will be required to sever their tribal relations, and go out into the world.

Mr. LA FOLLETTE. That is predicated upon the theory that the population is going to increase, as I understood his testimony.

Mr. BRATTON. Yes.

Mr. LA FOLLETTE. I would like to ask the Senator a further question; I do not desire to interrupt his line of argument.

Mr. BRATTON. I yield.

Mr. LA FOLLETTE. Will the Senator explain, if he has the information, just what it is contemplated will be done on these 8,346 acres in the way of actual improvement of the irrigating system that now exists there, and in that connection, if it will not divert the Senator, I should like to draw his attention to the statement made by Mr. Burkholder, who, I understand, is the engineer for the conservancy district, where he said, as appears on page 376 of the hearings before the subcommittee of the House Committee on Appropriations, referring to the 8,346 acres:

> It sustains the life of the Indians who exist there. The reason there is a distinction—

That is, that there was a distinction in that bill—

> The reason there is a distinction there is that the acreage they have now, or the 8,000 acres, more or less, does sustain the Indians in the valley. It is their bread and butter, and if that is to go to them without any maintenance or betterment charges we know that they can sustain life and continue to exist—

I assume he was referring to the 15,000 acres—

> Then if we charge them for the additional area which they might lease or farm in part by themselves, that seems to us to be absolutely fair.

Mr. BRATTON. May I ask the Senator what question it is that he propounds to me?

Mr. LA FOLLETTE. I ask the Senator to explain to us just exactly what in the way of betterments and improvements in the irrigation system on these 8,346 acres is contemplated, providing this bill is enacted, if he has the information.

Mr. BRATTON. As I understand it, the entire district, including the Indian lands, will have a modern system of storage, river control, silt control, and will relieve the land from its alkalied and water-logged condition. It has been testified without dispute that the cultivatable area in that district is gradually decreasing, because the water level is constantly rising. My attention was called in the last few days to a case of a well located in this district. The water was 8 feet below the surface only a few years ago. Now it is only 6 feet below the surface. It has risen 2 feet in the course of a few years. That illustrates how the water level is rising.

The Indian lands and the white lands have been reduced in area, so far as cultivation is concerned, because the water level has continued to rise, because the land has become alkalied and can not be cultivated as it was heretofore. The Indian area has decreased from 25,000 acres to 8,000 acres plus, and the white area has been reduced from 125,000 acres down to some 30,000, as I remember the figures.

It is intended, Mr. President, to change that condition by relieving the land from being water-logged and alkalied and to increase its productivity with a modern, up-to-date system of irrigation storage, river control, flood control, silt control, canals, and the accouterments that go with a modern system.

Mr. COPELAND. Mr. President——

The PRESIDING OFFICER (Mr. McKELLAR in the chair). Does the Senator from New Mexico yield to the Senator from New York?

Mr. BRATTON. I yield.

Mr. COPELAND. May I ask the Senator if these acres now referred to as raw land were formerly cultivated?

Mr. BRATTON. As I understand, they never were. It may be that some of that land was cultivated at one time. It is treated and referred to throughout as raw land—that is, land not now in cultivation. It may be that some of it was cultivated and has ceased to be so by reason of becoming alkalied and water-logged.

Mr. COPELAND. And on account of the elevation of the water?

Mr. BRATTON. And because of the elevation of the water level.

Mr. COPELAND. I ask unanimous consent to put into the RECORD the communications I send to the desk. They are from persons who are interested in this matter.

The PRESIDING OFFICER. Is there objection? There being no objection, the communications were ordered to be printed in the RECORD, as follows:

NEW YORK, N. Y., *February 25, 1928.*

Senator ROYAL S. COPELAND,
United States Senate:

Urgently request you to vote against the Rio Grande Pueblo conservancy bill (S. 700) as most unjust and unfair.

FRED M. STEIN.

NEW YORK, N. Y., *February 25, 1928.*

Senator ROYAL S. COPELAND,
United States Senate:

Trust you will use your influence to defeat the Rio Grande Pueblo conservancy bill (S. 700). This bill outrageous in its injustice to the Indians.

HOWARD S. GANS.

NEW YORK CITY, N. Y., *February 25, 1928.*

Senator ROYAL S. COPELAND,

DEAR SENATOR COPELAND: May I urge you to use all your influence to prevent the passage of the Rio Grande Pueblo conservancy bill?

It seems to me that it is simply a question of honor on the part of our Senate not to let it pass.

Yours truly,

GERTRUDE E. GROSSMANN,
33 West Sixty-seventh Street.

Mr. COPELAND. Mr. President, just one other question. As I see it, then, from the statement of the Senator, no imposition is thought of here. These Indians will be better off, in one respect at least, if their present 8,000 acres shall be given modern means of irrigation, and they have the further prospect of using other acres, redeemed by the irrigation project, and the expense of the project will be taken care of from the sale of leases in the newly irrigated area.

Mr. BRATTON. Mr. President, the Senator from New York has summarized the situation accurately. I think it may be analogized to a picture like this, if the Senator from New York will give me his attention. It may be compared with this kind of an arrangement.

The Senator from New York might say to me, "You are occupying a residence that has deteriorated through the years. It no longer is comfortable. It no longer is habitable. I will furnish the money to improve that residence and make it a modern, up-to-date, comfortable residence for the use and occupancy of yourself and family. I will furnish the money to build two new residences on opposite corners of your plot of land. I will charge the entire cost of constructing the two new residences and of modernizing your present residence to the two new residences, and I will look to the rent from those two residences to repay me the full investment; and while I am being repaid in that way

from something that is now worthless, you and your family may occupy the residence with comfort and convenience." It occurs to me that that is a perfect analogy to the situation that is contemplated under this bill.

Mr. LA FOLLETTE. Mr. President, will the Senator permit me to trespass on his time further?

Mr. BRATTON. Gladly.

Mr. LA FOLLETTE. In the hearings before the subcommittee of the House Committee on Appropriations, on page 375, Mr. CRAMTON asked Mr. Burkholder this question, and I am reading this because I should like to have the Senator's interpretation of what Mr. Burkholder said:

Mr. CRAMTON. Why do you think it necessary or desirable to have the provision that the 8,000 acres shall not be subject to charge against the Indians for operation, maintenance, and betterment, but that the other 15,000 acres which may hereafter be brought under cultivation will be subject? Before you answer that question, let me ask you another one as to the 8,000 acres: The operation cost, in so far as it applies to the works, separate and apart from the Indian lands, will, of course, be borne by the project as a whole, and you are just exempting the 8,000 acres of Indian land from that charge. As to any maintenance or operation upon the Indian lands, is it contemplated that the Indians will take care of that themselves?

Mr. BURKHOLDER. In so far as possible.

Mr. CRAMTON. There are certain maintenance ditches on the Indian lands, and you are exempting them. Now, is it your program that that work shall be done by the project, without compensation, or will it be done by the Indians themselves?

Mr. BURKHOLDER. In so far as possible it will be done by the Indians. The exception to that, of course, is where we have a main canal that passes entirely through a pueblo in order to serve another pueblo or white lands below. The canal must be operated by the district in order to insure a proper supply below. In other cases, where there is a lateral that will entirely serve an individual pueblo, it is the intention to deliver the water to this lateral, and let the Indians take care of it.

Mr. President, I rather construe that language to mean that it was in Mr. Burkholder's mind that the only works which they would intend to put through these acres which are now under cultivation and irrigation, and which they would maintain, would be these canals which were going through the present cultivated acres in order to get water to another pueblo or to white lands below. I would like to ask the Senator whether or not he places the same construction on that answer?

Mr. BRATTON. No, Mr. President; I do not. What Mr. Burkholder is talking about is the water after it is turned out of the main canals into the laterals running onto and through Indian lands. He says that the district will control the main canals traversing Indian lands, but that when the water is turned into laterals leading onto the Indian lands, for their use exclusively, instead of charging them with upkeep and maintenance, the Indians shall do that work themselves. If the Senator from Wisconsin will read the testimony he will find that the Assistant Commissioner of Indian Affairs understands it exactly that way, and is willing to have the Indians perform that service as to their own lands, after the water is turned out of the main canals into the laterals leading entirely to Indian lands.

Mr. LA FOLLETTE. It seemed to me that the statement that it was intended to refer to a case where a main canal crossed one of these Indian lands was an indication that that was all that was contemplated.

Mr. BRATTON. Mr. President, this legislation was considered by the Senate Committee on Indian Affairs, it was passed through the Senate by unanimous consent, it was considered by the House Committee on Indian Affairs and reported favorably. The Senate bill, after it was passed, containing a gratuity of about half a million dollars, went to the House, and there was amended by taking out the gratuity feature, and making the entire sum reimbursable. This is the first time I have ever heard it suggested that the district intends to deal unfairly or unjustly with the Indians in the matter of giving them a modern, up-to-date, adequate system of reclamation of their lands.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. BRATTON. I yield.

Mr. COPELAND. What does the Senator understand to be the criticism of the Indian Defense Association?

Mr. BRATTON. It is this, Mr. President. The original bills introduced in both branches of the Congress authorized an appropriation of $1,593,000. That was a gratuity as to the present area of 8,346 acres, and was not reimbursable in any sense.

Mr. LA FOLLETTE. Mr. President, may I ask the Senator upon what theory that was made a gratuity appropriation?

Mr. BRATTON. It was made a gratuity appropriation because it was drawn that way in the bill. It speaks for itself. It was a gratuity because it was not reimbursable.

Mr. LA FOLLETTE. The point I have in mind is that it seems to me that gratuity was made a gratuity, so far as these 8,000 acres are concerned, on the theory that they were already partially under irrigation by works which the Indians themselves had constructed.

Mr. BRATTON. I shall come to that after I shall have answered the question of the Senator from New York.

It cost $563,355 to reclaim the present cultivated area, at a maximum of $67.50 per acre. The original bill made that part of the appropriation as a gratuity. It was not reimbursable in any wise.

[At this point, the hour of 2 o'clock having arrived, the unfinished business was laid before the Senate, and the consideration of the House amendment to Senate bill 700 was postponed until the following day.]

Wednesday, February 29, 1928

Mr. BRATTON. Mr. President, I desire now briefly to state to the Senate the scope of the project and the plan of the Indians' participation in it, and, if I am able to do so, to convince the Senate that the present bill is liberal and generous to the Indians.

Mr. President, the Middle Rio Grande conservancy district has a board of consulting engineers consisting of some of the outstanding engineers of the country. Mr. A. J. Wiley, of the State of Idaho, with whom, perhaps, the Senator from Idaho [Mr. BORAH] is acquainted, is a member of that board. For many years he has served as consulting engineer for the Bureau of Reclamation and has been connected with some of the notable reclamation projects in the West. Mr. D. C. Henny, a consulting engineer of Portland, Oreg., also is a member of that board. He has enjoyed equal distinction with Mr. Wiley. Mr. Arthur E. Morgan, of Dayton, Ohio, president of the Dayton-Morgan Engineering Co. and a consulting engineer of long experience and note, is a third member of that consulting board.

Mr. W. M. Reed, chief engineer for the Bureau of Indian Affairs, formerly identified with the Bureau of Reclamation, is the fourth member of the board. Mr. Wiley, of Idaho; Mr. Henny, of Oregon; Mr. Morgan, of Ohio; and Mr. Reed, of the Bureau of Indian Affairs, constitute the consulting board of this project.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER (Mr. ODDIE in the chair). Does the Senator from New Mexico yield to the Senator from Idaho?

Mr. BRATTON. I yield to the Senator.

Mr. BORAH. The Senator from New Mexico has made reference to Mr. Wiley, and it may not be out of place for me to say, regardless of what effect it may have upon the pending measure, that Mr. Wiley is one of the most eminent men in his profession in the United States and his character is in entire accordance with his eminence in his profession.

Mr. BRATTON. I thank the Senator from Idaho for that statement. The report from which I am now about to read, made under date of November 17 last, was signed by all the gentlemen whom I have named except Mr. Wiley. He was abroad at that time serving the British Government in his professional capacity. The other gentlemen, however, all concurred in the report, from which I quote. They discussed the various features in the proposed reclamation.

Mr. LA FOLLETTE. Mr. President, may I ask the Senator from New Mexico if that report is printed in the hearings?

Mr. BRATTON. It is not. It is, however, contained in what is called House Document 141, prepared by the Secretary of the Interior in response to the act passed about a year ago.

The report outlines that the project contemplates flood control, drainage, irrigation, storage, water supply, and silt control. The board takes into account the fact that the project will cost $11,829,000. Let it be understood by the Senate that this is not a project of a million and a half dollars.

On the contrary, it is a project of more than $11,000,000 in scope and cost. After discussing the total cost this board says with reference to the reasonableness of that cost:

The degree of river protection afforded by the plan, as above explained, is reasonable and well balanced. The projected system of drainage and irrigation is of a permanent character, and follows the best practice. The water supply of the project is deemed sufficient, provided it is rigorously protected against upstream encroachment; and the estimates are comprehensive and conservative.

So that the combined voice of the outstanding engineers of the country characterizes this as being a project along modern and scientific lines, with a conservative estimate of cost.

This board has said something with reference to the manner in which the Indians' share of the cost should be arrived at. I desire now to call the attention of the Senate to that, and to show, if I may do so, that the suggestions made by the board have been followed in toto by the district.

At page 29 of the report of the first hearings, conducted on January 20, this board said:

In determining what part of the total construction cost is to be apportioned to Indian lands we believe that the following policy would be equitable and desirable:

From the total cost of the project there should be deducted the cost of any local protection work for the city of Albuquerque and the cost of protecting San Marcial and the Santa Fe Railway at that point. There should also be deducted a portion of the cost of irrigation storage, so as to exclude from storage charge the 9,000 acres, more or less, now being irrigated. The remainder of the cost of the project, including the cost of irrigation storage, may be distributed over all the benefited lands on an acreage basis.

The construction cost to the Indian lands would thus be in accordance with the ratio which the benefited area of Indian lands bears to the benefited area of the entire project, with the deductions noted above.

In regard to the cost of operation and maintenance of irrigation works which serve Indian lands, it would seem that the Indians should be relieved of such cost for the lands now irrigated under existing ditches, which are so far as possible to be operated and maintained by themselves as at present.

The new area of Indian lands to be irrigated under the proposed plan should pay its proper proportion of operation and maintenance.

In general, we feel that the above outlined apportionment of cost would be fair to the Indian population and at the same time give the cooperation equitably due to non-Indian landowners in making necessary improvements in the middle Rio Grande Valley.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. BRATTON. I yield to the Senator.

Mr. COPELAND. I want to be made perfectly clear on the distribution of cost referred to just now by the Senator. If this is not a favorable time to make the inquiry, I will defer it.

Mr. BRATTON. I gladly yield to the Senator now for that purpose.

Mr. COPELAND. As I understand the situation, most of the lands that are now occupied and cultivated by the Indians are upstream lands. They are up the river.

Mr. BRATTON. Yes.

Mr. COPELAND. The new lands that are to be brought in—Indian lands and white lands—are down the river; but in order to get the water to the raw lands of the Indians and to other lands which will be benefited it is necessary to carry the main ditches through the present tilled or cultivated Indian lands.

Mr. BRATTON. I so understand, Mr. President.

Mr. COPELAND. I want to be made clear on that. As I understand, a charge of about half a million dollars will be made against the present cultivated Indian lands. Is that correct?

Mr. BRATTON. No, Mr. President.

Mr. COPELAND. Not any at all?

Mr. BRATTON. Not any at all. That charge, plus the charge of reclaiming the new land, is all placed against the new land, and the present area is absolved from any lien or any liability whatsoever.

Mr. COPELAND. I so understood the Senator yesterday, but as I thought about it I have wondered if there is not actually a charge made against the Indians of a half million dollars to cover the cost of improving the present cultivated land. Instead of being charged against those lands, that charge is made against the other lands?

Mr. BRATTON. That is true.

Mr. COPELAND. Then it seems to me that it is incumbent upon the Senator to show that the cultivated Indian lands are actually benefited by the expenditure of this money.

Mr. BRATTON. I shall be glad to do that.

If the Senator will turn to the statement made by the Assistant Commissioner of Indian Affairs at the last hearing, conducted under date of February 17, at page 56, he will find that in setting forth the benefits that the Indians will derive, under paragraph 14, the Assistant Commissioner of Indian Affairs set this out as one reason for the passage of the bill:

I want to emphasize that the Indians will also receive a very much increased value for their property by reason of the terms of this bill. It will cost the Government $67.50 to irrigate this land, but the Indians will have property, after it is irrigated, estimated to be worth anywhere from $150 to $200 an acre.

In that connection I call the attention of the Senator to the third paragraph, where the assistant commissioner refers to the raw land as worth $10 per acre and states that it will be worth from $150 to $200 an acre after it is reclaimed.

Mr. COPELAND. Mr. President, will the Senator permit an interruption there while the matter is in my mind?

Mr. BRATTON. Yes.

Mr. COPELAND. When this raw land is reclaimed, suppose an Indian or a group of Indians wanted to go there and use that land. Would they have to lease it in the same way that I would if I were to go there?

Mr. BRATTON. I think not; and in order to fortify myself I have consulted the Bureau of Indian Affairs. They do not interpret the bill as requiring that the entire land be leased to others, but as empowering the bureau, if they see fit to do so, to let the Indians use such portion of it as they may need in addition to their present area.

Mr. COPELAND. Then the Indians' rights are protected, so that if a group of them wish to go to the newly irrigated land and cultivate it they can do so under the same freedom that they do now with the cultivated acreage?

Mr. BRATTON. That is my view of the bill, and the department entertains the same view.

Mr. COPELAND. I thank the Senator for that information.

Mr. KING. Mr. President, will the Senator yield?

Mr. BRATTON. I yield to the Senator from Utah.

Mr. KING. I think the Senator should state—because that is the fact if I correctly interpret the bill that is before us—that while it is perhaps true that the 8,346 acres of land which have been cultivated for hundreds of years by the Indians, and from which they now make their living, may be absolved from a part of the expense incident to this gigantic project, costing more than $11,000,000, nevertheless the 15,000 acres of so-called raw land, a part of which at least heretofore has been cultivated, will have saddled upon it a burden of more than $109 per acre. It is obvious, it seems to me, that no Indian—and I doubt whether any white man—could go upon that raw land and successfully reclaim it, maintaining himself in the meantime, at a cost of $109.50 per acre; and, of course, if we are to judge the future by the past, I do not care how conservative the engineers may be, no irrigation project, if it is estimated at $11,000,000, can be completed for that sum. The cost will be greatly in excess of that amount.

Mr. BLAINE. Mr. President, will the Senator yield?

Mr. BRATTON. I yield to the Senator from Wisconsin.

Mr. BLAINE. Preliminary to my questions, I want to assure the Senator that the questions I desire to ask him are not for the purpose of provoking a controversy, but rather to ascertain whether or not we can agree upon what the facts are in this matter.

Mr. BRATTON. I shall be glad to have the Senator propound any questions he has in mind.

Mr. BLAINE. I may also state that I have gone over the record in such time as I have had available, briefly, of course; and, as I understand, in this entire project the agricultural lands proposed to be redeemed or reclaimed are 133,346 acres.

Mr. BRATTON. I think 132,000 acres plus.

Mr. BLAINE. That is approximately right?

Mr. BRATTON. Yes.

Mr. BLAINE. Of that, 8,346 acres are now occupied and cultivated by the Pueblos.

Mr. BRATTON. Precisely so.

Mr. BLAINE. Included in that 132,000 or 133,000 acres is this 15,000 acres of raw land proposed to be reclaimed that belongs to the Pueblos.

Mr. BRATTON. Yes.

Mr. BLAINE. I understand that the cost of the entire project, including the provisions for flood control, is a little over $11,000,000, and that the bill provides that the Indians shall pay $1,593,311, plus $50,000 that was provided for by another bill, or a total of $1,643,311.

Mr. BRATTON. That is correct.

Mr. BLAINE. That is the amount that is reimbursable against the 15,000 acres of raw land to be reclaimed. Now, as I calculate the result of those figures, I find that the Indians' land—that is, the 15,000 acres—is to be encumbered by a lien at the rate of $109.554 per acre, or, in round numbers, $109.50 per acre.

Mr. BRATTON. I have not made the calculation, but we will assume that to be correct.

Mr. BLAINE. That figure is arrived at by dividing $1,643,311 by 15,000. I understand the record shows that the district made an estimate that the cost of this improvement, as against the white man's land, would be $76.12 an acre. I find that on page 400 of the House Appropriations Committee hearings. Is that correct?

Mr. BRATTON. I think that is substantially correct.

Mr. BLAINE. Then I find that if the Indian were compelled to pay this reimbursable amount, and were to pay at the rate the white man must pay, or $76.12 an acre, there would be reimbursable against the 15,000 acres the sum of $1,141,800. That is 15,000 times $76.12 an acre, taking the district's own estimate. I assume those figures are substantially correct.

Mr. BRATTON. We will assume them to be substantially correct.

Mr. BLAINE. We can agree on those facts. The only controversial proposition involved, then, from my viewpoint, is, why make the 15,000 acres of the raw Indian land to be reclaimed chargeable with $109.55 an acre and leave the white man's burden only $76.12 an acre?

Mr. CUTTING. Mr. President, will my colleague yield?

Mr. BRATTON. I yield to my colleague.

Mr. CUTTING. Is not the Senator from Wisconsin assuming that the 8,000 acres of land already under cultivation are going to receive no benefit from the proposed legislation?

Mr. BLAINE. I understand that the claim is made that no benefits will accrue to the 8,346 acres; but if it is contended that benefits will accrue to the 8,346 acres, then it is our duty to ascertain what those benefits will be and not take a lump sum of over half a million dollars as an estimated benefit.

As I understand it, there is no showing that the 8,346 acres will be benefited by any amount. Theoretically it may be, but there are no facts, as far as I can find, that justify the levying of one single cent against the 8,346 acres and compelling the 15,000 acres to reimburse for this mythical benefit that is alleged to flow to the 8,346 acres. I may be mistaken in this, and I would like to be informed.

Mr. BRATTON. That is a fair question.

Mr. CUTTING. Mr. President, I do not want to interfere with the argument of my colleague, and I am sure he can show, and very successfully show, that the 8,000 acres will be benefited. The point I am trying to make is that lands under white settlement in this same area, lands which are under cultivation and likely to be improved by the irrigation works, are included in the total area to be benefited in calculating the $76.12 an acre.

Mr. BLAINE. We agree on that, on the basis of 132,000 or 133,000 acres.

Mr. CUTTING. Yes; that acreage includes land which is at present under cultivation but which will be improved by the proposed legislation.

Mr. BLAINE. How much?

Mr. CUTTING. I do not know the exact figures, but if the Senator is comparing the land under white settlement with land under Indian ownership, he ought to include the entire amount which may be benefited, including, we believe, the 8,000 acres.

Mr. BLAINE. My understanding was and is that the 132,000 or 133,000 embraces all of the raw land to be improved, plus the 8,346 acres. Then, in addition to that, as I understand it, the total amount is something like 210,000 acres, but outside of this 132,000 or 133,000, the balance is largely grazing land, and is not to be burdened on the basis of the improvement for irrigation and drainage. I just want to be straightened out on the facts.

Mr. CUTTING. The particular point I wanted to clear up was that that 132,000 acres includes land which would be improved under the present legislation, even though it may be land which is at present under some degree of cultivation. Is not that so?

Mr. BRATTON. Yes, Mr. President.

Mr. CUTTING. Therefore, as compared with the $76 an acre which the white land justly pays, the debt on the Indian land amounts to $67.50 an acre, rather than $109.50, provided we can show that the 8,000 acres are going to be benefited.

Mr. BLAINE. I do not understand that that is limited to $67.50 an acre. That is taking in the whole 23,000 acres.

Mr. CUTTING. Exactly.

Mr. BLAINE. Upon that basis; but there are 8,346 acres of that already improved. The senior Senator from New Mexico is going to advise us as to just what proposed improvements will accrue to the 8,346 acres, and I would like to hear him.

Mr. SMOOT. Mr. President, I want to ask the senior Senator from New Mexico one question, and he can answer it at the same time he answers the Senator from Wisconsin. The $109.50 an acre is reimbursable. Does that amount of money carry an interest charge?

Mr. BRATTON. It does not.

Mr. SMOOT. It is to be reimbursable within 40 years without interest?

Mr. BRATTON. It is reimbursable now under such rules and regulations as the Secretary may prescribe, but without interest. It provides that the lien on the new lands, which is the only land covered now by the lien, shall never be foreclosed so long as the Indians own the land, but that only proceeds from leases on the newly reclaimed land shall be used to reimburse the Government during the time the Indians continue to occupy the land. Their present acreage of 8,300 acres is free of lien, free of debt, and absolved from any liability whatever.

Mr. LA FOLLETTE. Mr. President, will the Senator yield?

Mr. BRATTON. I yield.

Mr. LA FOLLETTE. I should like to ask the Senator if the bill which previously passed the Senate did not provide that this reimbursable charge should not be collected faster than over a 40-year period.

Mr. BRATTON. That is correct, but it was changed.

Mr. LA FOLLETTE. That has been stricken out, and under any rules and regulations which the Secretary of the Interior might approve they could collect as rapidly as he would decide could be done.

Mr. BRATTON. Mr. President, I desire now to answer the inquiry propounded by the junior Senator from Wisconsin, which is an altogether fair one.

I read yesterday a statement made by the secretary of the Indian Defense Society, and I desire to call the attention of the Senator from Wisconsin to that, because perhaps it answers his question in more effective language than I could employ. This is what he said:

> I believe there are no dependable statistics, but we know the per capita income of these tribes within the last few years, which has varied from $15 to $45 per capita per annum, based on a yield per farm and the other factors of income.
>
> * * * * * * *
>
> The interest of the Indians in this project is just as direct and imperative as the interest of any white element in the valley. Although the project took its origin from the white end, and is a project of the general community, yet it is true that the interest of the Indians is direct, imperative, and important, because, first, as I said, the existing cultivatable acreage, now that there has been so much water-logged, is not sufficient to maintain a decent standard of living in at least three of these pueblos; and, second, we are all hoping for an increase of population in these tribes. They are strong, virile tribes. They are pure-blood Indians. Their habits are industrious. Altogether they are model Indians. We are hoping for an increase of population through the extension of adequate medical services to them. If that increase of population comes, as it will come—it has begun already—it will be totally imposible, under the existing conditions, for that population to live on the existing limited area of the land. Either it must disperse or starve, because these Pueblos are located in regions where there is only an infinitesimal demand for casual labor. So the Pueblos face not only present hardship but increased future hardships; unless this plan is carried out they face what is to them the supreme evil—that of being compelled, with the growth of population, to break up and go out into distant places. In other words, they face the end of their tribal relations, and to them that is a supreme matter.

Later he said this:

> Twice last year I stood and watched the whole male population of Santo Domingo pueblo working to restore a mother or main ditch which had washed out. They will not have to do that under the changed conditions. They are used to taking care of their domestic water-supply problems, etc.

Mr. BLAINE. Mr. President, if the Senator will permit this interruption, I fear I have not made myself clear in my question.

Mr. BRATTON. I think I understand the Senator, and I shall undertake to answer his question.

The present area of 8,300 acres is much less than the Indians used to cultivate. At one time they cultivated approximately 25,000 acres. That area has decreased progressively from year to year, because the water level has continued to rise, and the land has continued to become water-logged and alkalied, so that their cultivatable area has gradually decreased, and it will continue to decrease, and unless some such system of reclamation as is now contemplated is afforded the Indians, five years from now their cultivated acreage perhaps will be 5,000 acres or less. So, to say that the Indians will not reap a benefit from modernizing the system of irrigation and reclamation for the 8,300 acres is to entertain a misconception of the real situation.

This land is in a river valley. While the Indian area has decreased, as I have outlined, from 25,000 to 8,000 acres plus, white lands in cultivation have decreased in proportion. That area is continuing to decrease, both Indian and non-Indian, and will continue to decrease unless reclaimed. As was said, these Indians face intolerable conditions as to the 8,300 acres. Moreover, this system contemplates giving that acreage a modern, up-to-date system of reclamation, to be paid for under the direction of the Secretary of the Interior as the work advances to his satisfaction.

Mr. BLAINE. Mr. President, I would like to pursue my inquiry just a little bit further, if the Senator will yield, in order that I might make a brief explanation of what I mean, and then I think we will understand each other.

Mr. BRATTON. I yield.

Mr. BLAINE. I am satisfied with the theoretical deductions that have been made by the Senator, but they are purely theoretical deductions, in my opinion. I am getting at what are the actual benefits that should be assessed against the 8,346 acres. I understand, though I may be misinformed, that the matter of the water rising or lowering has not occurred within the last hundred years or more, and, for all I know, in some distant future time that water may recede or it may rise. But when we are undertaking an irrigation project or a drainage project we are not attempting to contemplate what God Almighty may do through the clouds or through the rivers, but what we can do presently as we find the water level and the water stage.

Assuming this to be an ordinary drainage district or irrigation district and application was made to assess the benefits, the benefits assessed are not theoretical benefits in these cases. The commission, if the administration be under a commission, or the board, if it be under a board, or whatever body it may be under, as an administrative body proceeds to estimate through the most reliable data they can acquire from engineers and so forth the cost of the improvement, whether it is drainage or irrigation. Then they take the land within that area and apportion pro rata that cost to the district for the drainage or irrigation, and that cost is the thing which we call, in legal parlance, the benefits. That is, the only way by which we can arrive at the benefits to the land that is being drained or irrigated is to ascertain what the cost of the project will be. Having ascertained that cost we have, therefore, ascertained the benefits that will accrue to the land.

The board or commission in the district to which I have referred as being organized does not determine the benefits that are going to accrue because of the enhanced value of the land that will build up a splendid community and furnish better homes, better schools, better churches, and better social conditions. Of course, all those benefits accrue to a district so organized when it is successfully carried out. But those are the benefits that naturally flow from the ingenuity and the intelligence and the industry of the people who are located in the district, be it an irrigation district or a drainage district. Those benefits to which the Senator refers are the imaginary, fictitious benefits, so far as actual dollars and cents are concerned. They may come to the Indians in future years, and they may not. But as a legal proposition, as a logical proposition, the only benefits that should be assessed against the 8,346 acres are the actual benefits derived by a process of mathematics in determining the actual cost of putting in the drainage or irrigation system because of these 8,346 acres.

I understand that the only cost involved—in fact, the only project—is an aqueduct or drainage ditch, and, as I have the map in my mind's eye, it is on the left-hand side of the river, though it may be on the other side. That ditch or aqueduct is of no benefit to this particular property except that it is proposed to put in a siphon at a certain place—I have forgotten the identical location—which may cost about $20,000, which will have the effect of controlling the flood waters and thereby operate as a benefit to the 8,346 acres.

I have gone into the hearings. I have endeavored to be fair. I have picked out every item that I would consider should be legally taxed against the 8,346 acres, and the only single item I can find as an actual benefit that will flow to these 8,346 acres is the building of the siphon in the drainage ditch. There may be other items. If there are, I should like to be informed about them, so I can add the cost of those items to the $20,000 and arrive at what actually, as matter of law, should be considered as benefits accruing to these lands. We should tax against the areas improved only the actual cost of construction and all those appurtenances that go with that sort of work in order to make it sufficient, adequate, and usable. That is all that ought to be taxed against these 8,346 acres, and not a single dollar or penny of theoretical or imaginary benefits which may flow from the general improvement of the community. If we are going to tax a prospective benefit against the 8,346 acres we ought to tax it against the Senator's home city, we ought to tax it against the community outside of that district, because just as sure as the project becomes a success each of those places will benefit, and from it will flow a great benefit to the whole community, to all the lands adjacent to the district, and to all the cities and villages; in fact, to the entire State.

So far as I am concerned, I am quite willing—in fact, I am ready—to grant to this district all the necessary powers that ought to be granted so far as the United States is concerned with respect to the Indians' rights in order to make there a great community, but I am opposed to taxing one single dollar against the 8,346 acres which the Indians have improved themselves with their own system, operating for many, many years; centuries, in fact, I understand. Eleven acres of that land have supported a family of five people. It must be an effective system. It is their system. They are an ancient people. I think it is wrong to tax against this proposition anything but the actual cash expenditure that is made upon the 8,346 acres.

I would like to have the Senator give us the information as to what other benefit, in a legal sense, as I have explained, will flow to the 8,346 acres. I am sorry to have taken so much of his time, and I apologize.

Mr. COPELAND. Mr. President, if the Senator from New Mexico will let me ask one question in addition, then I shall keep still. I think I have in mind the same thing that the Senator from Wisconsin has, that the raw lands of the Indians should be taxed no more than any other raw lands, unless the benefits to the cultivated Indian lands are sufficient to justify the placing of a charge upon the raw lands instead of upon the Indians' cultivated lands. I am sure that is what the Senator from Wisconsin intends to have pointed out.

Mr. BRATTON. In response to the series of observations made by the Senator from Wisconsin—and I say that in the best of good humor—I suggested a while ago that not only the engineering staff of the district has gone over this matter but that a staff of outstanding consulting engineers of the country, four in number, standing at the head of their profession, have pointed out how the cost should be apportioned to the Indians, and have said that when it is apportioned in that way it will be equitable and fair. They have said that the plans are modern, up to date, comprehensive, and satisfactory. I can not say where a canal will run or where a lateral will run. That is solely for the engineers to determine. But those engineers have stamped their approval upon the plans of the district.

As to the apportionment of the cost, if the Senator will give me his attention, I read a while ago what this staff of engineers said should be done in arriving at an equitable share of the cost to be assigned to Indian lands. If the Senator will turn to page 25 of the hearings of January 20, he will find that the district has adhered scrupulously to the recommendations of the consulting board. He will find that certain deductions have been made covering exactly what the Senator from Wisconsin has in mind, and that those deductions were made before allocating any cost to the Indian lands.

First is the capitalized interest for non-Indian lands—that is, developing isolated tracts—$500,000; special flood protection, for Albuquerque and San Marcial, $652,000; extra expense, Belen Canal, with which the Indians are not concerned, $75,000; silt control of the river, $500,000. This makes a total deduction there of $1,727,000.

On the next page the Senator will find a further credit to the Indian lands, as follows: Isleta drainage, paid by the Government, $50,185; El Vado Reservoir—the board recommended that no charge should be made against the 8,000 acres for that reservoir, and consequently a deduction of $103,300 has been made on that score, conforming to the recommendations of the board. There is also a preliminary expense of $50,000 that is deducted, making an additional deduction of $203,485.

Mr. BLAINE. If the Senator will yield further, I suggest I do not believe the Senator wants to lead us to understand that we can take the benefits which would accrue to the district, excepting the Indians, and add all those together, and then take the total cost of the project and deduct the benefits assessed to all the others excepting the Indians, and then say the difference is the benefit to the Indians. That is not a legal rule. It is not a sensible rule. It is an arbitrary rule. Those who made the estimates might just as well have said that the amount of the benefits to the whites was less and assess against the Indians $2,796,796 or more. That is not the basis for making an assessment of benefits, as I understand the law. I may be mistaken, but I never heard of a drainage district or an irrigation district that ever made an assessment of benefits on that basis at all. It is a new thing to me. I do not quite understand it.

Mr. BRATTON. Mr. President, this consulting board has been on the ground; the Assistant Commissioner of Indian Affairs visited this project last fall; my colleague [Mr. CUTTING] and I are familiar with it; the Representative of the State of New Mexico, in the Chamber at the other end of the Capitol, is familiar with it. We are in harmony in our support of the measure. Moreover, no voice was raised in opposition to this proposed legislation until the $500,000 plus neces-

sary to reclaim the 8,300 acres was converted from a gratuity into a reimbursable one. Then, for the first time, the question was raised that perhaps the Indians do not need this development; that perhaps the 8,300 acres will not be benefited, and perhaps the plans are not being developed along scientific lines.

Mr. BLAINE. Mr. President, will the Senator from New Mexico yield to me?

Mr. BRATTON. I yield.

Mr. BLAINE. In reference to the $563,000 plus, what proportion of that consists of a benefit to the 8,346 acres upon the usual legal basis on which benefits are ordinarily assessed?

Mr. BRATTON. If the Senator will consider the land at its present value of not to exceed $25 per acre, and then realize that after it is reclaimed it will be worth from $150 to $200 per acre, and that its yield will be increased fourfold, he may acquire some concept of what the benefits to that acreage will be.

Mr. BLAINE But, Mr. President——

Mr. BRATTON. And when the Senator has made the mathematical calculation suggested, he will see that the cost is entirely disproportionately low to the benefits that will be derived by the Indians.

Mr. BLAINE. If the Senator will yield, I should like to ask another question.

Mr. BRATTON. I yield.

Mr. BLAINE. If the Senator proposes to establish the rule for the assessment of benefits upon the basis of the difference of the value of land in its raw state and its improved state, that is another new theory to me. I do not understand that that is the accepted basis for the assessment of benefits.

Mr. BRATTON. Oh, no, Mr. President; when I said $25 an acre on the 8,300 acres I did not have raw land in mind; I had that particular land in mind.

Mr. BLAINE. I do not care what land may be contemplated. The measure of benefits, if there be benefits, is not upon the basis of enhanced value of the land by reason of improvements. The legal basis, and the equitable basis, confirmed by all our courts and by all legislation in every State where they have drainage and irrigation laws is the basis of actual benefits that accrue to the particular acreage within the district and not upon the enhanced value of the land because of the improvements, as I understand the law. If the latter were true, one could assess benefits far in excess of the actual expenditures that made it possible to cultivate and till and use the lands. Certainly no one will suggest that that is the correct rule, and I suggest I do not believe the Senator from New Mexico makes any such suggestion; but his argument, carried to its ordinary limits, is that because of the enhanced value of this land benefits will accrue to the extent of some $563,000 from that source. I should like to know the exact amount of benefits to accrue to these 8,346 acres measured by the cost of the improvement.

Mr. BRATTON. Mr. President, if I have not enlightened the Senator on that question I give up the task as being a hopeless one.

Mr. FRAZIER. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Mexico yield to the Senator from North Dakota?

Mr. BRATTON. I yield.

Mr. FRAZIER. I should like to quote from the statement of Mr. W. M. Reed, on page 21 of the first hearings. As I understand, Mr. Reed is the engineer for the Department of the Interior who has been down there and inspected the land. He said in regard to this:

> The only relief that the Indians will have, of course, is on the main canal, which will serve not only their lands but the lands below.

On the next page, page 22, Mr. Reed further says:

> These Indians have had a system that has served their purpose, perhaps to them satisfactorily, but not scientifically. They still think that they can go on and exist and perhaps prosper under the same conditions. The lands that have become waterlogged have become so not from the acts of the Indians but as the result of civilization.

I should like to try to clear up the statement about the 25,000 acres which are supposed to have been cultivated there some time ago. On page 373 of the House hearings before the Appropriations Committee, Mr. Rodey, one of the engineers of the conservancy district in New Mexico, makes this statement:

> From various sources the information is that at one time probably as much as 125,000 acres of lands in the valley floor were cultivated. The prehistoric Indians are said to have cultivated as much as 25,000 acres.

It is a myth that the prehistoric Indians cultivated that acreage. In the last 300 years no such area has been cultivated; apparently at least we have no information from any source to show that to have been the case. There is merely an old story that prehistoric Indians cultivated 25,000 acres there.

Mr. BRATTON. Mr. President, I did not exist in prehistoric times and am not familiar with that. The Indian Bureau, speaking through Mr. Meritt, made the direct statement that 25,000 acres had been cultivated.

Mr. FRAZIER. He said, "It is said."

Mr. BRATTON. And the area is now reduced to 8,000 acres.

Now, Mr. President, I hope I may proceed. This bill originally carried a gratuity of $563,000 plus, the balance being reimbursable. There was not a voice raised in opposition to the measure; there was not a suggestion that it lacked merit; there was not an intimation that any harsh treatment to the Indians was contemplated either immediately or remotely. Not a word of that kind was uttered until the House amended the bill to make the entire sum reimbursable instead of a part of it, as it had theretofore provided.

Mr. FRAZIER. Mr. President, will the Senator yield to me further?

Mr. BRATTON. I yield.

Mr. FRAZIER. I should like to say in regard to that suggestion that there has been much information brought out in the later hearings that was not brought out in the first hearing. That is why, perhaps, there was no criticism made of the first measure.

Mr. BRATTON. Very well, Mr. President, if the Senator from North Dakota takes that view. I repeat that not a word of criticism was said until the House made that change, and in making the change it harmonized the bill with the policy that was established some 15 years ago of making appropriations for the reclamation of Indian lands reimbursable. I understand that that policy has obtained since 1913 to the present time. This proposed legislation is in harmony with that prevailing policy with one exception. That is that the legislation which has gone before has placed a lien upon the lands reclaimed, with no guaranty that it would not be foreclosed so long as the Indians owned the lands, whereas this bill provides that the lien shall not be foreclosed while the land remains in Indian ownership, thus being more liberal than the ordinary legislation.

Mr. KING. Mr. President, will the Senator permit an interruption?

Mr. BRATTON. Yes.

Mr. KING. I think the Senator should state at this point that when the project was first contemplated and discussed the Indians were led to believe that whatever appropriation was made only $1,000,000—and at first the amount was only $700,000 or $800,000—was to be reimbursable and a charge or lien upon the lands to be reclaimed, to wit, 15,000 acres. There was no intimation that an additional $589,000 or $600,000, if appropriated, was to be reimbursable. They understood that if anything above a million dollars was appropriated it was to be a gratuity; and that doubtless silenced opposition. Their assent to the original proposition was predicated upon the assumption that in no event was there to be a charge upon the Indians to exceed $1,000,000. Now, when the charge placed against their lands, and against the 15,000 acres only, is to be nearly $1,600,000, or $109.50 per acre, obviously the Indians object and voice their opposition in every reasonable and proper way.

Mr. BRATTON. Mr. President, I do not propose to be led into any discussion of veracity as between those who have discussed this subject in New Mexico. They are not in accord on the point referred to. The Senator's observation and his emphasis upon the fact that the newly reclaimed land bears a lien of $109.50 per acre is fallacious in this regard: He closes his eyes to the benefit to the 8,300 acres and regards that as being entirely eliminated from the equation. If we waive aside the 8,300 acres, forget the fact that the Government is expending $563,000 plus to reclaim that land, and increase its market value from, say, $25 per acre to from $150 to $200 per acre, and forget the fact that through the expenditure of that money that land will yield, perhaps, fourfold its present production—if all that is to be waived aside as immaterial and foreign, then it is correct to say that the new land bears a lien of $109.50 per acre; but to make the statement without considering that the 8,346 acres are being benefited in the way I have outlined, with protection afforded to the Indians, is an unfair statement of the situation.

Mr. FRAZIER. Mr. President, will the Senator yield?

Mr. BRATTON. Yes.

Mr. FRAZIER. As I understand, there are about 3,500 Indians on the 8,000 acres?

Mr. BRATTON. That statement has been made.

Mr. FRAZIER. According to all the evidence that was produced at the hearings they make their living out of the cultivation of these 8,300 plus acres. That is not quite 2½ acres to each Indian. If it is true that by this project the fertility of the land will be increased fourfold, it must be a very

productive tract of land. I do not know how good the land is down in New Mexico, but that would make it a remarkably productive piece of land, in my estimation.

Mr. BRATTON. I will say to the Senator that when that valley shall be reclaimed it will be as productive as any valley of the West. To defeat this proposed legislation will be visiting the greatest injustice upon those Indians that the Congress could visit upon them. It would thwart a development that will aid the State and will aid the country. In my judgment, the gravest mistake that the Congress could make would be to defeat this proposed legislation.

The Senator from North Dakota heard the Assistant Commissioner of Indian Affairs when he stated that the bureau set out to secure a gratuity, so far as the 8,300 acres were concerned; that that was its object, its purpose, and its hope; and the bureau stood for that until it became convinced that it was impossible to persuade Congress to depart from the policy of making these appropriations reimbursable. Then the Assistant Commissioner of Indian Affairs said to the Senator from North Dakota that this bill, even in its present form which did not grant to the Indians what he wanted, what he desired, what he hoped for, was one of the most liberal pieces of legislation that has ever been proposed in recent years. I concur in all of that.

Mr. President, without taking more time—I have taken too much time already—I want to read what the Assistant Commissioner of Indian Affairs stated before the Senate committee in the last hearings in summarizing the benefits and the protection that this bill gives to the Indians.

He said this:

I want to point out some of the benefits to the Indians that will accrue by reason of the passage of the bill now before this committee, and I do not believe that a single proposition can be controverted.

I call the attention of the Senator from North Dakota, both Senators from Wisconsin, and the Senator from New York to this, if I may have their attention:

First. The bill before the committee permits an agreement to be entered into between the Secretary of the Interior and officials of the district, and we propose to put in that agreement every provision that is possible for the protection of the Indians.

Second. Only lands susceptible of economic irrigation and cultivation within the Indian pueblos can be included under this bill, and the Secretary of the Interior is to determine what lands shall be included, and what lands he shall construe as susceptible of economic irrigation and cultivation. Therefore the district officials can not include any Indian lands within that district that are not subject to economic irrigation and cultivation.

Third. The cost of the improvements to this land is limited to $67.50 per acre over the entire 23,000 acres; $67.50 is not an excessive cost for irrigation. It has been pointed out that the average cost for irrigation at this time is approximately $100 per acre. The 15,000 acres of new land within the Indian pueblos not now irrigated are worth not to exceed at this time $10 per acre. When this land is irrigated, it will be worth at least $150 an acre. Therefore the Indians will receive a great benefit by reason of the improvement of this land.

Fourth. Another benefit the Indians will receive is the provision in the bill that the entire amount, 8,346 acres, has a guaranteed water right. That is a great protection to those Indians. Under the present conditions the Indians have no guaranteed water right on the 8,000 acres. There is no treaty provision with the Pueblo Indians that guarantees them any protection in their water rights.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. BRATTON. I yield.

Mr. COPELAND. Has not that right been made use of for many, many years?

Mr. BRATTON. That is true; but it has never been adjudicated by any court, treaty, or otherwise. and it is susceptible of loss by nonuse or abandonment. The bill provides explicitly that the water rights to the 8,000 acres shall be prior and paramount to any rights of the district; that the water rights to the 15,000 acres shall be on a parity with the rights of the district; and that no water rights, either old or new, shall ever be lost by nonuse or abandonment, whereas under the law in New Mexico the nonuse of water for four years constitutes an abandonment of it. This bill protects those Indians in an extremely important way with respect to their water rights, as I have outlined.

Therefore those Indians will not get the benefit of the decision of the Supreme Court in the Winters case, and for that reason it is a great protection for the Pueblo Indians to have this provision in the bill, and that is one of the provisions we insisted should go into the bill after visiting the irrigation project.

Fifth. The water rights of the 15,000 acres are recognized in this bill, and they are protected in this bill. That is for the new land. The water rights, old as well as new, shall not be subject to loss because of nonuse or abandonment as long as title shall remain in Indians, pueblos, or individuals. That is another very great protection to the Indians of these pueblos.

It is a well-known fact that the Indians do not make good use of their water, and under certain State laws they are subject to forfeiture because of nonuse. But under the provisions of this bill they are protected in their water rights, even though they do not make use of the water.

Sixth. The 8,346 acres shall not be subject by the district to any pro rata share of any future operation and maintenance or betterment work performed by the district.

That is another very great protection to those Indians. In all future years they will not be called upon to pay any operation and maintenance cost for the irrigation of lands within the pueblos now protected, which amounts to 8,346 acres.

Seventh. The reimbursement shall be made out of rentals of newly reclaimed lands. In other words, the Indians occupying the 8,346 acres will not be called upon to pay out of the proceeds from their cultivated lands any of the reimbursable charges for the improvements. The reimbursable charges will be taken out of the rentals of the newly reclaimed lands.

Eighth. There will be no lien upon 8,346 acres for improvements or betterments. That is another protection the Indians get that they do not ordinarily get in irrigation legislation. Under this bill now before the committee there is no lien upon that land.

Ninth. Liens on the newly reclaimed land shall not be enforced during the period that the title shall remain in pueblos or in individual Indian ownership.

That is another protection to the Indians, because in ordinary legislation that provision does not obtain. Ordinarily the lien is enforceable against the Indian lands, even while it is owned by the Indians. But it is our practice not to enforce it as long as an Indian lives, but to take it out of the proceeds from the sale of land after the Indian dies.

Tenth. The department shall be recognized in all matters pertaining to the operation of the district in the ratio that the Indian lands bear to the total acreage of lands within the district. We will have a voice in the management of that conservancy district, and we can at any time have absolute control of conditions within the pueblos involved in this conservancy district.

Eleventh. Indian lands not taxable as long as held by Indians. Under the terms of this bill they will not be required to pay any taxes as long as they own the lands, and they are in Indian ownership, either individual or tribal.

Twelfth. Indians are not required to pay any interest on moneys advanced by the Government. Under the terms of this bill they will not be required to pay interest for the loan of this money, even if it is not returned to the Government within 100 years.

Thirteenth. The Indians will get a very great benefit by reason of flood protection under the terms of this bill. That land is subject to flood, and property there has been destroyed because of floods, but under the terms of this bill the Indians will get the benefit of flood protection.

Fourteenth. I want to emphasize that the Indians will also receive a very much increased value for their property by reason of the terms of this bill. It will cost the Government $67.50 to irrigate this land, but the Indians will have property, after it is irrigated, estimated to be worth anywhere from $150 to $200 an acre.

Fifteenth. The Indians, under the terms of this bill, will not be required to pay any of the irrigation charges so far as the 8,356 acres are concerned out of their products, but the white lessees will pay practically all of the reimbursable charges that are enforced under the terms of this bill.

* * * * * * *

That is our interpretation of the bill; but we will be glad to have the bill amended, and it is my understanding that there will be no objection on the House side to that amendment.

He is discussing there the amendment changing the language from "leases or proceeds" to "proceeds of leases," which has been done.

Mr. President, in conclusion, I want to say that I yield to no man in this Chamber or elsewhere in his attitude of sympathy and helpfulness toward the Indians. That is the duty of an ordinary citizen. It is one of the highest duties of an official who serves in this body. The bill as originally introduced contemplated a gratuity. The passage of the bill with the gratuity is utterly impossible. No Senator upon this floor need deceive himself as to that. Either this bill, in substantially the form with which we are now dealing with it, will be enacted or there will be no legislation in behalf of the Indians.

The Assistant Commissioner of Indian Affairs went over the district in person some 90 days ago. These members of the House Committee on Indian Affairs went through it at the same time. Every one was in accord that the legislation was wholesome, and not a voice of protest was raised until the gratuity was eliminated and the entire debt was made reimbursable under the language I have indicated. Then it was

that the controversy arose. It revolves around whether the money expended to reclaim the 8,300 acres shall be a gratuity or shall be reimbursable.

While the bill is not what was contemplated at the outset, I conclude by saying that, in my judgment, based upon an intimate knowledge of conditions, the bill is fair; it is liberal; it is generous; it will benefit the Indians; it will benefit the State; it will add prosperity to the Indians as well as to the whites. The importance of the legislation can not be overstated. I think that those who oppose the bill without having been on the ground, without first-hand knowledge of conditions, are led into an erroneous interpretation of the situation because of lack of information.

I very much hope, Mr. President, that the House amendment will be concurred in by the Senate, in order that the Indians may be improved and prospered and set upon a higher plane of living. I firmly believe that will be when this legislation is enacted and this great project is carried out.

Mr. CURTIS. Mr. President, I offer the amendment which I send to the desk, and I want to take a few minutes of the time of the Senate to explain it. I wish to have the amendment read.

The PRESIDING OFFICER (Mr. FESS in the chair). The clerk will read the proposed amendment to the amendment.

The CHIEF CLERK. On page 7, line 5, after the word "lands," insert: "except such parts thereof as the Indians shall themselves farm."

Mr. CURTIS. Mr. President, as I understand the situation, the Indians now occupy some 8,346 acres of land which are to be virtually exempt from the charge for improvements provided for in the bill. In addition to that, they own some 15,000 acres against which the assessments are to be a lien. The lien is not to be enforced as long as the 15,000 acres are owned by the Indians, but the money derived from leases is to be used for the purpose of reimbursement.

According to my understanding, the Indians would require about 12,000 acres in order that all of them might be accommodated. They have 8,346 acres now which they are farming, and, in my opinion, the Indians who own this land—the 8,346 acres and the 15,000 acres—should all be treated alike, and Indians who may take up land for actual farming purposes on the 15,000 acres should not be required to pay rental to be applied to the extinguishment of the lien for improvements. If we exempt the Indians on the 8,346 acres, surely the Indians who own a part of that, as well as the others who own and will take up a part of the 15,000 acres, should be exempted in the same way.

I believe that it would be a great benefit to the Indians if they could have the 8,346 acres so improved as to relieve the land from water logging and remove the danger of flood and then have enough of the other land—15,000 acres—so that all the Indians would have farm lands sufficient to support their families. I believe if that could be accomplished Congress would be justified in taking the money derived from leases on the remaining part of the 15,000 acres to pay for the balance of the land which is used—the 8,346 acres—and what might be required out of the 15,000 to accommodate the other Indians.

I know that this is a very heavy charge on the 15,000 acres, and I doubt very much if that charge is put against the Indians who want to occupy the land, or any part of it, if any of them can be persuaded to take it. They would be afraid. The act provides that this lien shall not attach as long as the land is owned by the tribe or by individual members of the tribe, so it must be the intention of the act not to apply the lien as long as the land is so held; and that being so, why attach a lien to the land which might be leased or occupied by the Indians out of the 15,000 acres?

I offer this amendment so that it may remove any fear upon the part of the Indians who want a part of the 15,000 acres. They might take a lease now, or have a few acres set aside for them now under an order of the Secretary of the Interior, without a cent of rental charged against them. A new Secretary might come in and say that the Indians on this 15,000 acres have been benefited and that they should pay a rental. If they should be required to do that, it would be found that they would not occupy and develop the land.

I have offered this amendment so that if this bill shall be enacted into law there will be no question but that the Indians who occupy the 8,346 acres will be relieved from any payment, and that those who take lands out of the 15,000 acres will be relieved in the same way, because the Indians on this land are entitled to the same kind of treatment.

Mr. KING. Mr. President, will the Senator permit an inquiry?

Mr. CURTIS. Certainly.

Mr. KING. I did not hear the amendment read, but judging from what the Senator has just said, his position, I assume, is that practically the entire amount of $1,596,000 plus shall be regarded as a gratuity from the Government to the Indians.

Mr. CURTIS. So far as the land they occupy is concerned, but I think the money derived from leases of the land which they do not occupy, which is leased to white people or others, should properly be applied to the extinguishment of the lien, but that under the provisions of the bill the lien should not be enforced against any of the land as long as the land is owned by the tribe or by individual members of the tribe.

Mr. KING. Let me ask the Senator whether any steps may be taken, and if so, what they are, by which the title may be taken from the Indians and transferred to whites?

Mr. CURTIS. There could not be under existing law. There might be in the future, of course, an act of Congress authorizing the selling of this 15,000 acres. I hope Congress will never pass an act permitting the Indians to sell the homesteads which they may own on the 8,346 acres or which they may take from the 15,000 acres. Many of the Indians who have been given allotments and who have been permitted to sell have lost their homes and are now homeless, and in many places are dependent on the charity of the counties to support them, which should not be. They should be permitted to occupy these lands without danger of their being sold to clear this lien, or sold for their own benefit. That is my judgment.

Mr. KING. Does not the Senator think that the adoption of his plan would produce such a condition of uncertainty and chaos as really to arrest the development of this 15,000 acres?

Mr. CURTIS. I do not see how it could, because, as I am advised, the Indians could not and would not need more than 12,000 acres.

Mr. KING. In addition to the 8,000?

Mr. CURTIS. No; about three or four thousand in addition to the 8,000. I would be perfectly willing that it be limited so that they would not have more than twelve or fifteen thousand acres all told. I do not want more set aside for them than they need.

Mr. BRATTON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from New Mexico?

Mr. CURTIS. I yield; certainly.

Mr. BRATTON. In view of the legislative situation with which we are now confronted, and with which the Senator from Kansas is perfectly familiar, I would like to know if he would accept an amendment to his amendment, so as to add, after the word "lands," the words, "except such part thereof, not to exceed 4,000 acres, as the Indians shall themselves farm."

Mr. CURTIS. If the Commissioner of Indian Affairs should report that 4,000 acres, in addition to the 8,300 acres now being farmed, would be sufficient to accommodate the Indians, I should be perfectly willing to agree to that. I think it would be better if the amendment were limited to, say, "not to exceed one-half of 15,000 acres," and then provide that only such part of it as was necessary should be used.

Mr. BRATTON. The 4,000 acres would be approximately one-third.

Mr. CURTIS. It is now nearly 2 o'clock, and if the Senator will let his request go over until to-morrow I will talk with the Indian Office.

Mr. BRATTON. I should be glad to do that; and may I propose a unanimous-consent agreement to take this measure up to-morrow?

Mr. CURTIS. I am very anxious to have the measure disposed of, but in the last three days I have promised Senators that we would have a call of the calendar. I really promised them that there would be a call of the calendar this morning, as I had hoped that this bill would be out of the way yesterday. I would like to have to-morrow morning for the calendar, unless debate on this measure could be limited, and we could surely get it through to-morrow.

Mr. BRATTON. Having occupied the amount of time that I have occupied, I am not in a position to suggest a limitation of debate on the part of others.

Mr. ROBINSON of Arkansas. Mr. President, it has been only two or three days since we devoted time to the consideration of the calendar.

Mr. CURTIS. I shall not make the request for to-morrow.

Mr. BRATTON. Mr. President, I ask unanimous consent that at the conclusion of the routine morning business to-morrow the Senate shall proceed to the consideration of Senate bill 700, commonly called the conservancy district bill.

Mr. HEFLIN. Mr. President, about how long does the Senator think it will take to dispose of the bill?

Mr. BRATTON. I am reasonably confident that we can finish it during the morning hour to-morrow. That is my hope and my belief.

Mr. HEFLIN. I was thinking that if we could finish the consideration of the bill to-day within an hour——

Mr. BRATTON. The Senator from Nebraska [Mr. NORRIS] has advised me that he desires to conclude his address respecting the measure which is the unfinished business.

Mr. HEFLIN. Very well. I did not know but that my suggestion would suit the Senator from Nebraska as well; but I have no desire to interfere with his desire.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New Mexico? The Chair hears none, and it is so ordered.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7201) to provide for the settlement of certain claims of American nationals against Germany and of German nationals against the United States, for the ultimate return of all property of German nationals held by the Alien Property Custodian, and for the equitable apportionment among all claimants of certain available funds.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills:

H. R. 121. An act authorizing the Cairo Association of Commerce, its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Cairo, Ill.; and

H. R. 5679. An act authorizing the Nebraska-Iowa Bridge Corporation, a Delaware corporation, its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River between Washington County, Nebr., and Harrison County, Iowa.

MUSCLE SHOALS

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, Senate Joint Resolution 46.

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Mississippi [Mr. HARRISON]. The Senator from Nebraska [Mr. NORRIS] is entitled to the floor.

Mr. HEFLIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Ferris	McKellar	Shortridge
Barkley	Fess	McMaster	Simmons
Bayard	Fletcher	McNary	Smith
Bingham	Frazier	Mayfield	Smoot
Black	George	Metcalf	Steck
Blaine	Gerry	Moses	Steiwer
Blease	Gillett	Neely	Stephens
Bratton	Glass	Norbeck	Swanson
Broussard	Hale	Norris	Thomas
Bruce	Harris	Nye	Tydings
Capper	Harrison	Overman	Tyson
Caraway	Hayden	Phipps	Wagner
Copeland	Heflin	Pine	Walsh, Mass.
Couzens	Howell	Ransdell	Walsh, Mont.
Curtis	Johnson	Reed, Pa.	Warren
Cutting	Jones	Robinson, Ark.	Waterman
Dale	Kendrick	Sackett	Wheeler
Deneen	Keyes	Schall	Willis
Dill	King	Sheppard	
Edge	La Follette	Shipstead	

The PRESIDING OFFICER. Seventy-eight Senators having answered to their names, a quorum is present. The Senator from Nebraska will proceed.

Mr. NORRIS. Mr. President, when the Senate adjourned yesterday I had not yet finished the comment I was making upon the activities of Mr. Gray, the Washington representative of the American Farm Bureau Federation. I have quite a large amount of material here that I intended originally to use on that subject, but I am taking so much of the time of the Senate and I am so desirous of concluding my remarks to-day, if I can, that I have made up my mind to say but little more, at this time at least, upon that branch of the subject.

I want to read, however, extracts from a letter that Mr. Gray wrote, and a copy of which I presume every Member of the Senate received, and to show from the facts how misleading are the statements which he makes. I have shown, I think, that in the propaganda in which he has interested himself and in the things he has sent out over the country he has been misleading—and that is a mild term to apply—in practically every statement he has made and every statement he has sent out for publication. He has not, as I said yesterday, in my judgment, been a fair representative of a great farm organization, inasmuch as he did not state to his constituents more than one side of a proposition, and while he often told what was technically true, the deception came about often because he told only part of the truth. I am going to take some of the statements in his letter and compare them with his own bill, for which he is asking the Members of this body to vote.

His letter is dated February 16, and refers in the first paragraph to a map which he had sent out and about which I commented yesterday. Further on in his letter he said:

> The amount of power has been referred to on the floor of the Senate as 1,250,000 horsepower. Just as the Farm Bureau has looked up the facts with regard to the cyanamide process, we have looked up the facts as to the amount of power at Muscle Shoals and desire to present them to you for your information.

I had made the statement that the so-called Willis bill, which he is asking us to pass, provided for an installed horsepower exceeding 1,000,000, and I am going to prove that statement by the very bill that he asks us to pass. In this letter he said that these misrepresentations had been made on the floor of the Senate. He summarizes, after going along on that line for some time, and specifies in items what the power is at Muscle Shoals, as follows: Dam No. 2, 134,000 horsepower; Dam No. 3, 54,000 horsepower; steam, 120,000 horsepower. He has omitted entirely from the list Cove Creek. He has misstated the installed horsepower in every respect excepting steam.

Further on in the letter he said:

> So that instead of over a million horsepower being a true statement of the power available, the facts are that there is only about 345,000 horsepower, of which 308,000 is at Muscle Shoals and less than 40,000 at Cove Creek.

Those are the statements made by Mr. Gray, and made for the purpose of influencing votes in this body. I hold in my hand the Willis bill, for which Mr. Gray has been propagandizing during the last several months, even before it was introduced. I am going to read from that bill what it provides about horsepower. I wish Senators would take their lead pencils now and write down the amounts that I read from the bill.

Commencing at the bottom of page 9 of the Willis bill, under Title B, is this language:

> In addition to the payments above covenanted to be made the lessee covenants and agrees that it will—
>
> (1) At its own cost and expense complete the steam-power plant connected with said United States nitrate plant No. 2 by installing such additional electrical generating and other equipment as will increase the generating capacity of said plant up to at least 90,000 kilowatts.

That means 125,000 horsepower. That fact he has stated correctly in his letter. I ought to comment there, perhaps, just in a few words, because this provision states that the lessee—that is, the Cyanamid Co. and the Air Nitrates Co.—must make this installation.

I explained to the Senate several days ago that that is the only place where they spend any money that they do not get back in the way of addition to fertilizer that they get out of the farmer. All other expense is met by the taxpayers. There is 120,000 horsepower. Mark that down. On the same page, in paragraph 2, there is a provision about the installation of additional power in Dam No. 2, which reads as follows:

> (2) In accordance with plans and specifications which have been or may be prepared or approved by said Secretary of War and out of funds which the lessor hereby covenants and agrees promptly to make available for that purpose—

That is, the lessee shall install it, but the Government of the United States shall pay the bill and furnish the money—

> install in the power house of said Dam No. 2, with reasonable promptness after such funds are so made available, such additional electrical-generating units, together with necessary hydroelectric and operating appurtenances, accessories, and facilities as will increase the generating capacity of the equipment of said Dam No. 2 up to approximately 600,000 horsepower.

Now mark down 600,000 horsepower. The Willis bill also provides for the building of Dam No. 3. The provision for the building of that dam will be found on page 4:

> Subject to the provisions of Article D hereof—

The bill is specifying the things that are included in the lease—

Dam No. 3, with its lands, water rights, power house, structures, and facilities, which shall include installed electrical-generating equipment sufficient to generate there 250,000 horsepower.

Mark that down. That is what the Government has got to provide at Dam No. 2. Some Senator may want me to read Article D, because the bill provides that this must be done subject to the "provisions of Article D," which will be found on page 12 of the Willis bill:

D. The lessor—

That is, the Government of the United States—

for the purposes of navigation improvement, national defense, and to secure the maximum production of fertilizers at Muscle Shoals in time of peace—

All those are beautiful phrases—

covenants and agrees to acquire and construct with reasonable promptness the dam generally known and designated as Dam No. 3 and described in paragraph (2) of the granting clauses hereof.

That is the clause I have read, which states that the Government must install machinery capable of the generation of 250,000 horsepower.

On page 50 of the Willis bill will be found another provision that will add more horsepower at the expense of the Government for the benefit of the lessee.

The lessor—

That is, the United States Government—

for the purposes of navigation improvement, national defense, incidental flood control, and to secure the maximum production of fertilizers at Muscle Shoals in time of peace—

They are beautiful objects the author of the bill has in view—

covenants and agrees to acquire and construct with reasonable promptness, Cove Creek Dam, to be constructed upon the Cove Creek site on the Clinch River located approximately 8 miles in a direct line north of Clinton, in the State of Tennessee.

Further on, on the same page, it is provided:

Said Cove Creek Dam shall have a height of approximately 225 feet, a power house and hydroelectric installations and equipment for the generation of at least 200,000 horsepower—

Put that down, add the figures together, and what do we have? We have 1,170,000 horsepower provided for in the bill for which the Senator from Ohio is asking us to vote. I distinctly said the other day that this horsepower was not all primary horsepower; one could not get that much power every day in the year, but it is to be the installed horsepower able to be generated at some seasons of the year. As I explained in reference to the operation of Cove Creek Dam, if it were operated by the Government, the Government owning Dam No. 2, by letting out water when the Tennessee River is low it would improve navigation and improve the power production at Dam No. 2, and, for that matter, at all other dams between there and Dam No. 3; but a private individual owning Cove Creek Dam, as I explained, might want to use the power at a time when it would be to the advantage of the person operating Dam No. 2 and Dam No. 3 not to have it operated, because he might let out water when there was already too much water in the river and not let out water when there was not enough in the river.

However, the point I wish to make is that the man representing this great farm organization who, as everyone must concede, ought to be fair with the farmers and with the Members of the Senate, writes the character of letter I have read, when the facts are in the bill that he is advocating and from which I have read. While I am referring to that bill I wish to mention some other dams about which he has not said anything. Not only does the lessee under this bill get all the power facilities I have enumerated, but he gets a preferential right to build under the national Federal dam act, three other dams without paying any rental or making any return as provided for under the Federal dam act. I want to read to Senators that portion of the bill. That is another bonus the lessees are to get for which the Government gets nothing. That is provided for on page 55 of the Willis bill, which refers to additional dams. In addition to all those that we have been talking about—

The lessee—

That is, the American Cyanamid Co. and the Air Nitrates Corporation—

will, within 90 days after the date hereof, cause to be organized under the laws of one of the United States a subsidiary corporation, empowered to engage in the business of developing, generating, transmitting, and distributing electric power, and will cause said subsidiary corporation to file, within 90 days after its organization, with the Federal Power Commission an application for a preliminary permit to enable said subsidiary corporation to secure the data and perform the acts required by section 9 of the Federal water power act, with a view to acquiring and obtaining a license to construct, operate, and maintain, in accordance with the terms and provisions of said act, except as herein otherwise provided—

And that is important—

the following dams, to wit: (1) Senator Dam, to be constructed upon the Senator site on the Clinch River, above the mouth of the Emery River; (2) Melton Hill Dam, to be constructed upon the Melton Hill site on the Clinch River, in Anderson and Knox Counties; (3) Clinton Dam, to be constructed upon the Clinton site on the Clinch River, near Clinton, all of said sites being located in the State of Tennessee; and thereupon the said commission shall issue such a preliminary permit forthwith.

That is not done ordinarily, but in this case as soon as the application shall be made a preliminary permit is to be issued, without according anyone else the right to be heard, without giving any other bidder the right to intervene; in other words, it is made compulsory upon the Power Commission to issue the preliminary permit. Such permit is merely issued for the purpose of letting the beneficiaries of this bill make the necessary examination to see whether or not they want to utilize the dams; and as it will be found later on in the bill, if they desire to utilize them they can take all or any one or more of them.

The bill goes on to provide how they can acquire these dams. Remember that under the general dam act certain fees must be paid. The beneficiaries of this bill, however, would escape that. They will not only have the right first to investigate the dams, but after they have investigated them, if they find that they want all of them or any one or any two of them, they have the right to take such of them as they may desire, in preference to anyone else. Then there is a further provision which reads:

Provided, however, That said subsidiary corporation shall not be required to pay, under and pursuant to the terms and provisions of subsection (f) of section 10 of said act, to the lessor any annual charges for interest, maintenance, and depreciation on said Cove Creek Dam on account of the said subsidiary corporation's use and operation, as licensee under said act, of any dam or dams mentioned and described in this article.

Mr. President, I have been somewhat criticized because I have devoted so much time to the Cyanamid Co.'s bid, it being said that upon analysis it is found to be so indefensible that there is not any danger of the Senate adopting it. I hope I have made it that plain; I hope the conditions and circumstances have been made so clear that the Cyanamid Co. bid has already been entirely eliminated from consideration; but I felt it my duty to discuss the question. It seems to me that we ought not only to know about the propaganda that this man has circulated for a long time, especially among the farmers of America, but we ought to know of the deceptive practices in which he has indulged with Members of the Senate themselves in order to try to get them to vote for this bill. The figures which I have just given demonstrate, it seems to me, the deceptive character of the literature which he has sent out. It is true he could say, "I was not speaking of installed horsepower," but who will read that letter and not understand that he was. It is true he may have left a technical hole out of which to crawl, but any man who will read the letters and then get the facts as I have given them from the bill itself can see for himself that the letter is almost criminally deceptive.

Mr. President, so far as I am now going into it, I have finished that particular branch of my subject. I wish now to take up a different line. I realize the honest disagreement among Senators and people generally about, as the phrase is usually employed, the Government going into business. I realize that many arguments may be made on each side of any proposition affecting the production and distribution of electric power, waterworks, and of other activities which some people desire the Government to take over and operate. I speak with great respect for those who do not agree with me on the subject, but I wish briefly to call to the attention of such Members of the Senate who are opposed to the Government going into any kind of business to the fact that we are already in this business. We have spent the Government's money to the amount, in round numbers, of $150,000,000. It is not a question of going in. If it were, I would concede there would be greater weight to the arguments which are advanced. There

is not involved here directly the ordinary question of whether a municipality should own its electric-light generating and distributing systems, although, as a general rule, I favor that; for we already have the generating plant; we already have the machinery; we already have the necessary housing to provide shelter to all of the necessary employees. The homes are all modern, finely built, well located, with all modern city advantages. The Government has done all that work and paid for it all out of the people's money.

No one denies that in case of war—and that was the primary object in first constructing the plant at Muscle Shoals—we would need every facility that we have there. We provided in the original statute that we would never lease it to any corporation or any individual, but the Government would retain it and operate it. So the question involved is not exactly one of Government operation. I wish to give the Senate some instances where, in my judgment, the Government can better do the operating than can a private individual, and I will only touch a few high spots.

I remember that the able Senator from California [Mr. JOHNSON] not long ago called our attention to the fact that the very light in this building, the very electricity that enables us to read here, is generated and distributed by the Government of the United States. We are working under the light of a Government-built, Government-owned, and Government-operated electric-light plant right now, and we are getting electricity cheaper than the other consumers in the District of Columbia can get theirs.

I heard the same Senator on a former occasion call the attention of the Senate to the Government-operated plants on the various reclamation projects, stating that in some of those reclamation projects they were heating the homes by electricity, it was so cheap—Government owned, Government operated. Before this debate is over I wish the Senator from California would again call the attention of the Senate to those governmental plants. They are illustrative of what the Government can do and what the Government does do.

Mr. JOHNSON. Mr. President——

Mr. NORRIS. I yield to the Senator.

Mr. JOHNSON. After I made the few remarks that I did the other day, in respect to the light by which we read in this Chamber and the heat that warms us as we sit in our seats coming from a power plant maintained, operated, conducted, and owned by the United States Government, the junior Senator from Virginia [Mr. GLASS] called to my attention the fact that the Government also is maintaining a coal yard in the District of Columbia, and selling coal to employees of the Government at a reduced rate under Government auspices, and is in the coal business so far as its employees are concerned.

Mr. NORRIS. I thank the Senator for his contribution. I could enumerate a great many governmental operations; but when it is applied to electricity, briefly, this is the condition, as it seems to me, with which we are confronted:

The generation and distribution of electricity is becoming more general every day. It is almost as necessary in a modern home as water. Water used to be supplied by private corporations and private individuals. That practice has almost passed out of date now, because it is conceded that the supplying of water is a governmental operation, a municipal operation. You must have a monopoly, to begin with, in order to do it economically, and a monopoly ought to be owned and controlled and operated by the Government, not by private individuals, because if private individuals have a monopoly of anything it is just as natural as the rising and setting of the sun that they will take advantage of it to the very limit.

If you are to have electricity supplied economically, it is necessary that it be a monopoly not only in a city but it ought to spread out and cover the entire country, because, as I have often explained here, by the touching of a button we can in effect transfer electricity from Boston to Chicago, or from Chicago to St. Louis, and so on around the country. So, in order to get the greatest amount of electricity for the smallest amount of money, a monopoly is necessary; and I do not believe a free people will always submit to a private monopoly controlling one of the necessaries of life.

I am going to demonstrate, I think, that even municipalities scattered in different parts of the country have brought to their people by municipally owned plants the cheapest electricity that is enjoyed anywhere under the United States flag, cheaper than anywhere else in the world except in Ontario, Canada, where they not only have municipal operation but they have a wholesale operation, so that they have a giant power scheme that covers the entire Province.

I want to call the attention of the Senate, and I hope before this debate closes somebody will call the attention of the Senate in more detail than I will as I pass through some of these cities, to the advantages of Government operation in a thing of this kind as illustrated by the Government plants under the Reclamation Service.

We have this plant at Muscle Shoals. If it is turned over to a private company, the people of that vicinity will get no benefit. It is demonstrated already that they will not. It has been turned over to a private concern ever since it was completed. It has been rented by the Government to the Alabama Power Co.; and nobody has yet shown a single instance of a reduction to the consumer on account of the cheap electricity that the Alabama Power Co. gets.

I think I ought to read at this point part of a letter that I have received from James M. Proctor, of Scottsboro, Ala. I will read only a part of the letter; but he says:

> We are supplied with electricity by the Southern Cities Power Co., with principal offices in Shelbyville, Tenn. I am informed that the current is generated by a lock and dam upon the Tennessee River, near Chattanooga. It is brought to us by transmission lines from that point, about 100 miles. It is my understanding that this company only supplies three towns in Alabama—to wit, Stevenson, Scottsboro, and Bridgeport—all in Jackson County and all located along the route of the transmission line above referred to. For the use of current in residences these three Alabama towns are charged 11 cents per kilowatt for the first 50 kilowatts. For the next 50 kilowatts we are charged 9 cents per kilowatt, and all over 100 kilowatts is charged for at the rate of 6 cents per kilowatt. Thus 94 kilowatts cost the consumer $9.46. All of this current, it will be remembered, is generated by water power upon the Tennessee River. In other words, the consumer must use 94 kilowatts before the rate averages 10 cents per kilowatt, which seems to be the average rate in Alabama.

As compared with that rate at which electricity is sold to consumers by subsidiaries of the Electric Power Trust which reaches from the Atlantic to the Pacific and even into foreign countries, I want to call attention to the city of Pasadena, in California, which owns and operates a municipal light and power plant, and has done so for quite a number of years. I want to read from the official report of that light and power plant:

> At the time the people began to talk about building an electric utility the rates for electrical energy were 15 cents per kilowatt-hour, but a cut was made from this rate to 12½ cents. This was being charged at the time the city entered the field and established the above-mentioned rate of 8 cents per kilowatt-hour for domestic service and an 80-cent minimum instead of $1 with a top rate of 4 cents for power ranging down to as low as 1.2 cents. This, it will be observed, was a little more than half what had been charged before the city entered the field, and at the same time the service in those days was not what the service is to-day or since the city established its electric utility.
>
> * * * * * * *
>
> The company immediately filed a new schedule of rates, but they were lower than those charged by the city. The 8-cent rate was continued by the city until such time as the earnings justified a further reduction to 7 cents. The company dropped to 5 cents, a difference of 2 cents per kilowatt-hour. However, the citizens of Pasadena had been paying 15 cents per kilowatt-hour prior to the installation of the municipal light and power plant, and this was not forgotten by a large number, who continued to patronize their own plant, even though it cost more than if they had purchased their electricity from their own competitor. This support enabled the plant to show what could be done, and as the business grew in volume and operating costs were reduced the rate was further reduced to 5 cents per kilowatt-hour for light, scaling down to 3 cents, and 50 cents minimum, and a maximum of 4 cents per kilowatt-hour for power, scaling down to as low as 1.2 cents. The company, the city's competitor, immediately reduced its rates to a maximum of 4 cents per kilowatt-hour, stating that they would go below any rate made by the city—

And so on. They did not always do that. That was quite a number of years ago, and the city plant continued to grow and continued to reduce rates, as will be seen from the following figures:

> The maximum rate charged by the private company before the plant was started was 15 cents per kilowatt-hour.
>
> The maximum rate charged by the private company at the time the plant started was 12½ cents per kilowatt-hour.
>
> The maximum rate charged by the municipal light and power department at the time the plant was started was 8 cents per kilowatt-hour.
>
> All rates have since been reduced very nearly to those set by the municipal light and power department, and at this time the rates charged in Pasadena for light and power are as follows:
>
> The first 100 kilowatt-hours, 5 cents per kilowatt-hour.
>
> Next 400 kilowatt-hours, 4½ cents per kilowatt-hour.

Next 500 kilowatt-hours, 4 cents per kilowatt-hour.
Next 1,000 kilowatt-hours, 3½ cents per kilowatt-hour.
Over 2,000 kilowatt-hours, 3 cents per kilowatt-hour.
Minimum charge per month, 50 cents.

This plant started, I think, in 1906; and, as shown, they had hard sledding to begin with. The private company put the price down below their price, although it was the fact that the municipal plant was started that compelled the company to do it.

In order to run the municipal plant out of business the private company at first put the price below that of the municipal plant; and if the citizens of Pasadena had not been loyal they would have been led astray by this unfair competition, and the municipal plant would have failed and gone out of business. Because of their loyalty, however, they kept patronizing the plant, it kept getting more customers and doing more business, until it reached the point where it was able to cut down the price below where competition was possible from the private plant.

The first year the municipal plant lost $5,463.71. The next year they lost $12,525.63. They lost money for two years. The next year, however, they made a profit of $1,261.49—that was the year 1908–9—and they have made a profit every year since. It went up to $8,000 the next year, then to $17,000 the next, to $18,000, to $23,000, and so on until in 1923–24 the surplus profit of that municipal plant was $297,223.33, with rates which, while not as low as they will be able to have them there, are away below what they ever dreamed of getting them when they were subject to the control of a privately owned plant generating and distributing for profit. They are paying something always toward the amortization of their investment, and eventually they will have it free of debt and have no expense but maintenance.

A good illustration of what has been accomplished in municipally owned generating and distributing plants is afforded by the city of Seattle, in the State of Washington. I have a letter here written to me by the superintendent of lighting of that city, and I want to read from it just a little:

It will be of interest to you to know that the Stone & Webster Co., which opposes us here—

The Stone & Webster Co. are the owners of a private system that was in operation before the municipal plant was put in, and is still in operation—

filed as their cost, exclusive of interest charges and depreciation, $1,502,158.41 for the serving of 39,795 customers in the Seattle district—that is, King County—while our cost only amounted to $1,309,862.33 for serving 83,228 customers; that is, $200,000 less to serve twice the number of customers.

Compare those figures and see whether there is any consolation in the claim that private operation, with a beautiful private initiative, has advantages over the municipal plant, properly managed and properly operated.

Again, in these charges made by the municipal plant of Seattle there is an item amortizing the cost, doing away with the capital cost, which will eventually wipe it out entirely.

The history of operations in Seattle is exceedingly interesting. Here is a bill showing just what it would cost in various cities on the coast in the vicinity of Seattle. Suppose we take a bill, as they did here, for 519 kilowatt-hours used in one month, which would be a big consumption. Under the privately owned company in Aberdeen, Wash., that amount of electricity would cost the consumer $32.40, and I think it is the same in every one of the cities. It is Stone & Webster competing in Seattle, and not competing in the other places. In Wenatchee that energy would cost $22.03. In Yakima it would cost $19.03. In Walla Walla it would cost $19.24. In Puyallup it would cost $18.24. In Bellingham it would cost $15.80. In Everett it would cost $17.55. In Spokane it would cost $16.34, and, incidentally, Spokane has within its very limits one of the greatest water powers on earth, one that would turn every wheel and light every house in that city, at a rate that ought to be between 1 and 2 cents a kilowatt-hour, but privately owned, and what do they pay there? It would cost, as I have said, $16.34. What would it have cost in Seattle with a municipally owned plant? It would have cost $8.98.

Mind you, the private plant in Seattle, the same one that is charging these rates in the other cities, is charging the same rate the municipal plant charges, proving that they can operate and make money at the rate the municipal plant is charging.

As showing the scientific management of the private company in Seattle, Stone & Webster and the municipal company—I want to call attention to this fact—that Stone & Webster have $475 in stocks and bonds against every horsepower they own, while the municipal plant has only $173 against each horsepower. In other words, after a while the municipal plant will be in a position where it will have no debt, it will all be paid, and the private company there, as well as the private companies everywhere, like Tennyson's brook, will go on forever. They are always trying to increase capitalization, increase the issuance of bonds and stock, rather than to cut them out.

I have here the official report from Seattle, and I want to read an extract or two from it. This is for the year 1926.

The revenue for the year, $3,859,042.17 is 10.8 per cent in excess of that for 1925. The department's assets at the end of the year are $35,492,767.96, and bonds outstanding $22,305,000. During 1926, $497,000 worth of bonds have been retired, including bonds maturing up to 1929. A total of $1,422,000 worth of bonds have been retired before they were due.

That does not have any private initiative in it, but it seems to have some kind of initiative that is expertly working the people out of debt, reducing the charge for electricity, which will continue to be reduced as time goes on.

The year 1926 continues the financial success of Seattle's municipal light plant, which has shown an unbroken record of increased earnings each year for 22 years. Although carrying the interest charges on nearly $13,000,000 invested in the Skagit development, a large part of which is for preliminary work for the entire Skagit power project, the department earned $349,760.87 surplus above all operating expenses, interest, and very liberal depreciation charges in 1926 * * *.

At the end of 1926 the department served 11,000 ranges.

They are cooking by electricity in Seattle. They will cook everywhere in civilization by electricity if we can get rates as cheap as they get them in Seattle. There were 3,406 ranges in the last year in that city.

A large number of down-town business blocks were also connected to the city's system in 1926, as were also two more street railway substations.

This report states:

Every year since 1906 the plant has shown a surplus above all expenses, interest, and depreciation charges, and its income has increased each year over the previous year at an average rate of increase since 1906 of 19.13 per cent. The total earnings of the plant in the 22 years of its life were $32,781,212.37. Of this amount, $12,661,183.57 has been returned to the system in extensions and betterments, being the net earnings above expenses and interest charges * * *.

Before the city plant was started in 1902, consumers were paying 20 cents per kilowatt-hour for current. When it became evident that the city was actually to build a municipal plant the private companies reduced rates to 12 cents per kilowatt-hour. In 1905 the city began taking contracts under rates for residence service, as follows:

Eight and one-half cents for the first 20 kilowatt-hours.
Seven and one-half cents for the second 20 kilowatt-hours.
Six and one-half cents for the third 20 kilowatt-hours.
Four and one-half cents for all over 60 kilowatt-hours—

Some weeks later the private corporations reduced their rates to—

Ten cents for the first 20 kilowatt-hours.
Nine cents for the second 20 kilowatt-hours.
Eight cents for the third 20 kilowatt-hours.
Five cents for all over 60 kilowatt-hours—

with a 10 per cent discount for prompt payment, making the company's rate approximately one-half cent higher than the city rate. Early in 1911, when the municipal plant had grown to be a serious competitor, the company removed this differential and made its rates the same as the city rates.

July 1, 1911, the municipal plant reduced its rate to 7 cents for the first 60 kilowatt-hours and 4 cents for all over 60 kilowatt-hours, and this reduction was met by the company in November of the same year. July 1, 1912, the city again reduced the rate to 6 cents for the first 60 kilowatt-hours and 4 cents for all over 60 kilowatt-hours, and reduced the minimum monthly bill, which had been $1 to 50 cents. The company met the reduction one month later.

April 1, 1915, the city established the rate:

Five and one-half cents for the first 45 kilowatt-hours.
Two cents for all over 45 kilowatt-hours—

with a monthly minimum of 50 cents, and the company reduced its rates to the same schedule. During the war and up to 1920, the rate for light and power was one of the very few exceptions to the general rise in prices during the war. Rates were raised in 1920 to—

Six cents for the first 45 kilowatt-hours.
Two and one-half cents for all over 45 kilowatt-hours—

with a monthly minimum of 75 cents.

Effective since June 1, 1923, the present residence rates are:

Five and one-half cents for the first 40 kilowatt-hours.
Two cents for the next 200 kilowatt-hours.
One cent for all over 240 kilowatt-hours.

The complete rate schedule for all classes of business is given on pages 38 to 42.

It is to be noted that every reduction in rates has been made by the municipal plant and followed by its competitor.

The average residence rate in all cities of the United States of 200,000 population or more is 8 cents as compared to the average in Seattle for 1926 of 3.28 cents.

We must remember, Mr. President, that it was not only the consumers of the municipal plant who got this benefit but all the consumers of Seattle, those who still stay with the private company, who are still patronizing it, are getting the benefit of the reduction that has been brought about by the establishment of the municipal plant.

During the last six years the use of electric ranges in Seattle has increased until it is apparent that electric cooking will soon be universal throughout the city. At the end of 1926 there were 11,127 ranges connected with the city light system, of which 3,406 were installed during 1926. Under the residence rate, the electric range is placed on the same meter with the lights in the home, and the cost for electric cooking compares most favorably with that for cooking by gas, coal, or wood.

The residence rate in Seattle is 5½ cents for the first 40 kilowatt-hours, 2 cents for the next 200 kilowatt-hours, and 1 cent for all over 240 kilowatt-hours used per month. The larger part of current consumed for cooking under this schedule comes under the 2-cent rate, and the average residence bill for cooking and lighting, including the ordinary household electrical appliances, is $5.25 a month—

That is cheaper than we can cook in any other way—

Water heaters may be used on the same combined rate, which is equivalent to 1 cent per kilowatt-hour for that service.

Mr. President, I have some more statistics here with regard to Seattle, which I shall not present. But I do want to say that it has always seemed to me queer that any resident of Seattle would think for a moment of not patronizing the city plant which has brought thousands and hundreds of thousands of dollars of reduction to all the people of Seattle. It is queer to me why anybody in the city still refuses to patronize the city government, but continues to patronize the private company that used to charge them 20 cents per kilowatt-hour.

But it does not seem so queer when I see some of these grave and reverend Senators who, when anyone says that the Government may not do anything, are so incensed that they almost have hysterics. There is no doubt in my mind but what some people grieve every time they deposit a letter in the post office with a 2-cent stamp on it, that is to be carried across the continent, because nowhere from the beginning to the end of that service does any private corporation make any profit out of it. It is a Government operation all the way through. It is an illustration, and electricity is another, where a monopoly is necessary to get good service. A monopoly like Stone & Webster had in Seattle before the establishment of the municipal plant, and which charged the people 20 cents per kilowatt-hour, only demonstrates what is the natural thing for any monopoly to do.

The city of Cleveland has had a great experience with a municipal light plant, but it has never had a fair test, in my judgment. They started one there. It succeeded in reducing the rate, but has never been as successful as it seems to me it ought to be, mainly, as I believe, because it has had an unfriendly legislature, much of the time an unfriendly administration in the city, and some of the time, I am informed, even those who were managing the plant were unfriendly; but it made a wonderful record notwithstanding that. I want to read an excerpt from a letter sent to me by Newton D. Baker, ex-Secretary of War, who has been and still is a resident of the city of Cleveland. He said:

Of course, any company, public or private, distributing electric current for light or power is always obliged to deal with large consumers on the basis of cost of installation and operation of private units—that is to say, a manufacturer who has need for a substantial block of current can install a small generator and operate it from his own steam plant, and he will do so unless he can buy the current he needs at less cost than overhead and operation upon the installation of his own apparatus. In Cleveland, therefore, the rates fixed by the Cleveland Electric Illuminating Co. up to 1911 were deemed fair and adequately low to all large consumers, but the small domestic consumers, who could not install their own devices, paid the freight.

In other words, they were not able to get into competition.

The principal purpose of the new municipal plant was to protect these small domestic consumers by establishing a rate for them which the old company would be obliged ultimately to meet competitively. In 1906 the city of Cleveland acquired by annexation the South Brooklyn Village plant, as described in my previous letter. The competition thus brought into the field reduced the rate charged for arc lights in the streets from $67.92 to $54.94.

That was a reduction by which every taxpayer in the city of Cleveland benefited, a reduction which came to him by virtue and solely by virtue of the establishment of the municipal plant. Hundreds of thousands of additional dollars would have been taken from the people by taxes if it had not been for the establishment of that plant.

The method used by the Cleveland Electric Illuminating Co. in charging domestic consumers was so complicated that it was never possible to show variations in its rates very clearly. At the outset they charged 12½ cents per kilowatt-hour for a definite number of units and then a decreasing rate for succeeding numbers of units. As competition began to make itself felt, the privately owned company reduced the maximum but increased the number of units to which it applied, so that it was never easy to demonstrate a flat reduction, but that company has for years been constantly reducing its rate under the pressure of municipal competition.

In a postscript to his letter Mr. Baker said:

During a recent examination of the question as to whether the municipal electric-light plant should be continued and enlarged, expert engineers estimated that it had saved Cleveland and its people $13,849,000 during the period 1915 to 1923 by the lowered rates which its competition had secured from the private company.

I think the rate in Cleveland by the municipal plant is 3 cents per kilowatt-hour, but I do not have the rate before me and am speaking from memory.

From the official report of that plant I find that the customers increased in number from 37,610 in 1924 to 39,360 in 1925, a gain of 1,750 for the year, not as good a showing, it seems to me, as the plant ought to be able to make. The municipal plant was operating with coal. Their coal during the year covered by this report cost them $1.60 a ton, on which they had to pay $1.83 freight per ton, so that the coal cost them delivered $3.43.

The report says:

The plant has more than paid its way and to-day the city has an equity in it of over $2,000,000.

Consistent with its original purposes it has rendered real service to the people of this city:

1. It has saved the community at least $20,000,000 by reason of its low light and power rates to its own customers; and

2. Through the reduction of rates by the private company which has consistently followed since the municipal plant started operation.

3. As a result of its existence Cleveland enjoys the lowest domestic light rates in the United States, both through the municipal plant and the private company; and

4. In addition, especially low street-lighting rates.

I presume the statement that it is the lowest in the United States would probably be questioned by some other cities, but the point I want to make—and that is about all I care to do as I pass along—is that it was on account of the municipally owned plant and municipal competition that the rates in Cleveland came down. The private company had to meet the rate, and the people owe every cent of saving to the establishment of that municipal plant.

Another illustration in the United States of the cheapening of rates by municipal competition is given us by the city of Los Angeles. Here are the rates now charged in Los Angeles:

For the first 100 kilowatts consumed in any one month, 5.6 cents per kilowatt-hour.

For the next 150 kilowatt-hours consumed in any one month, 5.3 cents per kilowatt-hour.

For the next 250 kilowatt-hours consumed in any one month, 4.8 cents per kilowatt-hour.

For the next 500 killowatt-hours consumed in any one month, 4.1 cents per kilowatt-hour.

For the next 1,000 kilowatt-hours consumed in any one month, 3.2 cents per kilowatt-hour.

For the next 1,000 kilowatts consumed in any one month, 2.4 cents per kilowatt-hour.

For all in excess of 3,000 kilowatts consumed in any one month, 2 cents per kilowatt-hour.

Then, here are the power rates that the city gives, I think very low and perhaps lower in proportion than the domestic rates:

For 6,000 kilowatts consumed in any one month, 1.77 cents per kilowatt-hour. Then it goes down to 1.48, 1.37, and on down until it gets down to 0.87 cent per kilowatt-hour.

It is, then, because of this cheap power rate particularly that Los Angeles got some of its industries. Some of its most important industries have been located there because of the inducement that was given to them in the way of cheap power from the municipal plant in Los Angeles. As I remember it now, when Los Angeles started to put in the municipal plant such industries were paying to the private company 10 cents per kilo-

watt-hour. They have been reducing that rate until they are operating now, because of the competition they had, at the same rate the municipal plant charges.

Remember, Senators, that the municipal electric plant in Los Angeles has no cheap power. It is water power, it is true; but they have to go 250 miles from the city to get the water, and it costs them many millions of dollars to get the water into the city. The municipal light plant in Los Angeles compelled the privately owned plant to reduce its rates and they have been continually reduced until they reached the point I have just stated, with regard to both power and domestic rates.

I want to call the attention of the Senate in this connection to a letter from Mr. Scattergood, the chief electric engineer of Los Angeles, quite a noted engineer, and one of great reputation as I remember it. He touches on points I have often mentioned in the Senate, but he does it so much better than I have been able to do it that I want to read what he said, as follows:

The question is not one of complete public ownership or complete private ownership of electric utilities throughout our country. The question is, as you well put it, one of preventing private monopoly of our national resources having to do with power supply. This is vital to our prosperity and national strength as affected by our ability to compete in the world markets by the sale of the products of our industries whether agricultural or manufacturing.

I wish those words could sink deep into the hearts of every legislator, whether he be a Member of the Senate or of the House of Representatives or of a State legislature. Whether we get cheap or expensive electricity has a great deal to do with "our ability to compete in the markets of the world by the sale of the products of our industries, whether agricultural or manufacturing."

There is an absolute necessity for the establishment and maintenance of examples of public ownership on a large scale in order that public regulation of privately owned utilities may be economical and effective, and furthermore in order to avoid the evil consequences of complete private monopoly in our political life, aside from its effect on the cost of electric power and, in turn, on the cost of the products of our industries.

The existing important examples of public ownership in the United States and Canada afford the only criterion to which regulatory bodies may turn for assistance in determining reasonable costs of construction and operation for rate fixing and valuation purposes.

Several rate proceedings, for example, have been held recently before the State Railroad Commission of California for fixing rates to be charged by the Southern California Edison Co., doing business throughout the greater part of southern California. The combined municipalities have employed an attorney and similarly the farm bureau districts have been represented by an attorney. These attorneys have resorted to the records of the city's bureau of power and light in each instance for comparative data and segregation as a basis with which to analyze the cost and determine the reasonableness of the costs claimed by the company.

I wonder if Senators appreciate that point, relating to the importance of having standing out prominently throughout the country municipal-owned plants for the development and distribution of electricity. That is necessary in order to keep down the excessive costs that would otherwise come to the people and to manufacturing industries, and it is necessary in order when we want to regulate privately owned companies distributing electricity that we may have some place to go in order to get a standard; that we may have some place to go to find out the cost; that we may have some place to go where no deception can be practiced on us, where everything is open, and where we may have opportunity to see just what may be done, and thus effectively perform the governmental function of regulating privately owned distributing plants. Mr. Scattergood continues:

They have also utilized the bureau's cost accountants in making such analysis, and for testimony, with positive results in proving the unreasonableness of the company's claims and the company's actual costs. Were it not for the examples of public ownership in Los Angeles, Seattle, Tacoma, Pasadena, and other cities, the rates of the privately owned companies throughout the Pacific coast would be very substantially higher than they are and the character of service and treatment accorded the public would be much inferior to what it is; and what is true of the Pacific coast is true of our whole country, although to a much less degree in a greater part of it.

Our country's strength among the nations of the world is not sufficient to withstand ultimately the effect of supplanting considerations favorable to the general public except by special privilege and exploitation such as would result from a private monopoly of our power resources.

No man who will give study to this question can dispute or deny for a moment the conclusions that Mr. Scattergood reaches. If it were not for the municipally owned plants, if it were not for the cranks who in agitating reduction in rates have been calling attention to these examples, these points of interest that are standing out so prominently, we would be paying in the city of Washington and in every other city in the United States two-thirds more or perhaps twice as much more than we are now paying for electric lights. We saw in this great city of Washington the privately owned corporation oppose a reduction of rates, fight it through the courts, and finally agree to a compromise; but almost before the agreement went into effect, although the corporation had been previously claiming that it could not possibly reduce the rates below 10 cents per kilowatt-hour, it voluntarily reduced the price to less than 7 cents.

Commissions of all kinds have been deceived in their examinations. The place where they get the truth, as Mr. Scattergood says, the place where they go to get the evidence if they want to reduce rates is to municipally owned plants.

Mr. SIMMONS. Mr. President——

Mr. NORRIS. I yield to the Senator from North Carolina.

Mr. SIMMONS. I agree with the Senator that the rates of municipally owned plants based upon reasonable profits and sometimes upon actual cost without any profit would generally furnish a very helpful guide, to say the least, in determining what rates should be fixed by the various State agencies which are set up for the purpose of regulating the rates for power and other public-utility service. Most of the States, including mine, have such agencies. In my State power is conferred upon the public-service commission to regulate the rates. The difficulty that I see, however, in utilizing the rates charged by a municipal plant as an index to the rates to be charged by a privately owned plant is this: It is helpful, as I have stated, but I do not think we should get very far with such an index, because the municipally owned plant sells its electricity within a very short distance of the location of its power plant. One of the chief elements in determining the cost of power is the distance of transmission, and the transmission distances in the case of a municipal plant are so much shorter than the transmission distances in the case of power distributed by a private plant over stretches of 200, 250, or 300 miles that the index suggested is merely helpful, it seems to me, rather than being a criterion. I just throw that thought out for what it may be worth.

Mr. NORRIS. Some of the rates that I have here were made by power companies——

Mr. SIMMONS. Mr. President, if the Senator will pardon me, I wish to say just a word further along the same line.

Mr. NORRIS. Very well.

Mr. SIMMONS. I happen to know of a certain town in my State where the rate for electric current is much higher than it is in Washington; but that is justified by saying that the patrons are limited in number, while the Washington municipally owned plant has a large patronage; and the North Carolina plant can not afford, therefore, to give the same rate that is given here. So we have to pay a much higher rate in that town, which is the town where I live.

Mr. NORRIS. The Senator refers to a municipally owned plant in Washington. Of course, there is not a municipally owned plant in Washington.

Mr. SIMMONS. I was merely assuming that there was one here; I was using that for the purpose of illustration. I know there is not a municipally owned plant in Washington.

Mr. NORRIS. It is true, Mr. President, that electricity ought to be supplied in a large city cheaper than in a little village; that is reasonable; but the Senator's argument——

Mr. SIMMONS. But I did not finish, if the Senator will pardon me.

Mr. NORRIS. Very well.

Mr. SIMMONS. I was going to say that in that very town, my home town, there is another corporation which leases power from the municipally owned plant and distributes that power to cities within a radius, I will say, of 40 or 50 miles. That corporation has its lines running out to those other places, and it charges three or four times as much for that power in those towns located 40 or 50 miles away as it pays for the power which it buys from the city-owned plant. The corporation, however, justifies its rates upon the ground that the chief cost is not in producing the power but in transmitting the power. I should like to hear the Senator upon that question. I have been bothered very much because of that situation in North Carolina. I have complained very seriously of it, and I have almost gotten into a lawsuit about it.

Mr. NORRIS. There is no justification whatever for that claim. The cost of the transmission of electricity for 40 or

50 miles is so small that it can hardly be estimated. Electricity from such a plant as is located in Ontario, Canada, is carried for 250 miles and sold to the individual consumer in his home at less than 2 cents a kilowatt-hour. In transmitting current 40 or 50 miles there is practically no loss whatever, if the right kind of a system is used.

Mr. SIMMONS. Does the Senator include in his statement the cost of the line and the maintenance of the line, as well as the power?

Mr. NORRIS. Yes, sir; I include everything, even an amortization charge that will pay the entire cost in 30 years. There is more deception practiced upon the people of the United States in the case of electric-light rates than in almost any one thing that I know anything about.

Mr. SHORTRIDGE. Mr. President, may I ask the Senator a question?

Mr. NORRIS. Yes.

Mr. SHORTRIDGE. Is it or is it not possible to ascertain the cost of the plant and of the transmission line and then of the several elements of expense necessary to furnish the power? If it is possible, can not the regulating body, be it a council or be it a commission, ascertain all of those facts and then fix rates accordingly?

Mr. NORRIS. Yes; there is no difficulty about it whatever; that is what is done under any scientific arrangement.

Mr. SHORTRIDGE. I should like to make a further inquiry. Why, then, if it is easy to ascertain all these elements of cost, initial cost and running expenses, are not those items ascertained and rates appropriately fixed, so that a company may earn a reasonable return?

Mr. NORRIS. The utility companies deceive the regulating body.

Mr. SHORTRIDGE. I am not asking the question in a controversial spirit.

Mr. NORRIS. I understand that. The men who are regulating rates in California, for instance, are coming in daily contact with the finest experts in the world and they are always on one side; they are continually confronted with them. They are honest; they lean backward in order to be fair and not do an injustice; and the result is that they are often deceived, honestly deceived. That is what Mr. Scattergood says. We ought to have these signposts, these places where you can go and have the books thrown open, without any attempt or desire to deceive you or to mislead you; and I will call attention right now to a comparison between Los Angeles and San Francisco.

San Francisco was supplied—I do not know whether it is still that way or not, but until recently, at least, and perhaps still, San Francisco was supplied—with electricity from a privately owned corporation. It was supplied with water from a privately owned corporation. Los Angeles was supplied with electricity from a municipal plant, and with water from a municipal plant. The cities were not very different in population. Now, here are the rates:

The rates for lighting in San Francisco are 11.2 per cent higher than in Los Angeles. Sometimes it is asserted that these municipally owned plants make low rates for the people in their homes, but that they charge exorbitant rates for power. That is an argument that is sometimes used, and they say it is a political maneuver; but it is not true. That is the only thing I know about it that is wrong; it is just simply untrue; and San Francisco and Los Angeles illustrate that.

The rates for lighting in San Francisco are 11.2 per cent higher than in Los Angeles, and the rates for power in San Francisco are 12.7 per cent higher than in Los Angeles. There you have the comparison for both light and power. They are cities of nearly the same size, in about the same locality, one owning its electric-light plant and its water plant and the other supplying its citizens with water and with light from a privately owned system.

Mr. McKELLAR. Mr. President, do they have a regulatory commission in California?

Mr. NORRIS. Yes, sir; they have a regulatory commission.

Mr. McKELLAR. How do they regulate rates in such a way as to have one rate for one city and another rate for another?

Mr. NORRIS. They do not regulate the municipal rates. Those rates go down below their regulations. I assume that the commission in California is composed of able and honest men, and this private company supplying water and light to San Francisco make their arguments day after day, time after time, with the best experts in the world on their side and nobody on the other side, at least not experts on the other side, and the members of the commission perhaps are not experts, and that is the result. That is the result everywhere. These commissions do lots of good, I take it; but there is nothing like competition from a few outstanding places.

Now let me give you another comparison between Los Angeles and San Francisco.

If the people in Los Angeles had paid the same rates for their water and their power in 1924 that were charged by the private utilities in San Francisco that year, they would have paid nearly $15,000,000 for the water and power that they actually used. There is a difference between those two cities in one year of almost $15,000,000, and I understand that that is more than the entire municipal tax of the city of Los Angeles for that year. That pretty nearly meets this tax bugaboo that we always hear about.

Mr. President, much more could be said about Los Angeles, but I want to pass on. I am going to take up Tacoma. That is out on the coast also; and I shall have something to say about taxes at Tacoma.

Tacoma owns its municipal electric-light plant.

Mr. SHORTRIDGE. Mr. President——

Mr. NORRIS. I yield.

Mr. SHORTRIDGE. Before the Senator turns away from those California cities, assuming that we have honest officials to pass upon the matter of rate fixing, I suppose they take into consideration the cost of the plant and the cost of delivering the product to the consumer; and taking those things into consideration, they seek to fix a rate which will yield a fair return upon the investment. I suppose that is the process.

Mr. NORRIS. I suppose so.

Mr. SHORTRIDGE. If a given rate is manifestly too high, then it argues that something was wrong in the process of rate fixing, does it not?

Mr. NORRIS. I should think so; yes.

Mr. SHORTRIDGE. Then where does the relief come?

Mr. NORRIS. The relief comes in doing what Los Angeles did. I supposed the relief was going to come to San Francisco long ago when I did the best I could to see that San Francisco got her power and her water from the great Hetch-Hetchy development; but it seems, under some kind of manipulation, that the people of San Francisco and the surrounding cities did not get the benefit of that legislation.

Mr. SHORTRIDGE. There is one other method, is there not, to get the proper relief, and that is to elect the right kind of men to fix the rates?

Mr. NORRIS. Yes, sir; and I ought to say to the Senator that that applies both to the privately owned and to the municipally owned plants. I concede that if you elect or appoint a lot of crooks to run a municipal plant they will run it into the ground. They would do the same thing with a privately owned plant. In other words, there is not any place for dishonesty and crookedness in any of these things, whether private utilities or public utilities.

Mr. SHORTRIDGE. What we want is honest and capable men.

Mr. NORRIS. Exactly.

Now I will take up Tacoma; and, Senators, this is one of the most interesting studies, I think, of any city in the United States. They have by nature cheap power; that is true. They have an advantage over a good many other localities.

First I want to give you their electric rates:

Lighting and cooking, 4½ cents per kilowatt-hour for a quantity—at least 20 kilowatt-hours—equal to four one-hundredths of the floor space of the house with bedrooms and hall taken as half size; 1 cent per kilowatt-hour for the remainder; minimum charge, 50 cents per month.

That is a little bit complicated, but if you will look it squarely in the face it is very easy of solution. A good many cities, even in Canada—and I think that method of counting cost is increasing—do it on the basis of floor space, so as to charge the man with a mansion just a little bit higher initial rate than the man with an ordinary house. For instance, I think in Toronto, Canada, their rate starts out by charging 2 cents a kilowatt-hour for the first three kilowatts for each 100 square feet of floor space. It is not hard to figure. It results in the man with a great big mansion paying a little bit more for the first three kilowatt-hours and then the rate drops to all alike to 1 cent a kilowatt-hour, which, on the average, reduces the rates much below 2 cents per kilowatt-hour in that city. Tacoma has something similar as to that; but before I leave Tacoma I will give you a sample of just how this figures out in a large house and compare it with houses somewhere else. So it goes down to 1 cent per kilowatt-hour. For commercial lighting—that is, for stores, and so forth—there are two schedules. The customer can take his choice. Schedule 1 is 3½ cents for the first 1,000 kilowatt-hours; all over 1,000 kilowatt-hours, 2 cents.

That is a very low rate. That is away below the average of the cities of the world. In Tacoma there are a good many houses that are heated by electricity. There are houses in

Tacoma that have not any chimneys, that have been built since this plant has been in operation, and take their heat from the municipal plant.

Here is a bill of current consumed between March 14 and April 11, 1927, a little less than a month. The consumer used 158 kilowatts during the month. The total amount that he had to pay for that much electricity was $2.90. He had a range and a washing machine and all kinds of things in his house. Suppose he had been in Washington, D. C.—and we have much lower rates here than a good many other cities—and he had used that much current here; let us see how much he would have had to pay. He would have had 58 kilowatt-hours, at 6¼ cents, $3.62. He would have had 10 kilowatt-hours if he had had a range—I am assuming that he had one—at 6¼ cents, 63 cents, and 90 kilowatt-hours, at 3 cents, $2.70; so his total bill in Washington, D. C., would have been $6.95—practically $7. In Tacoma it cost him $2.90—practically $3. In other words, it would have cost him more than twice as much in Washington, D. C.. as he paid in Tacoma.

Mr. President, I have here a very interesting table from Tacoma that I desire to have printed in the RECORD at this point in my remarks. I ask unanimous consent to have it printed in the RECORD.

The PRESIDING OFFICER (Mr. FESS in the chair). Without objection, it is so ordered.

The matter referred to is as follows:

Comparison Tacoma municipal lighting versus Alabama Power Co.

POWER

Horsepower	Kilowatts	Load factor	Consumption, kilowatt-hour	Monthly cost		Average rate per kilowatt-hour		Difference	Per cent difference
				Tacoma	Alabama Power Co.	Tacoma	Alabama Power Co.		
		P. ct.				*Cents*	*Cents*	*Cents*

Mr. NORRIS. I desire to comment on this table.

We have heard it said so often, "These municipal plants and this Canadian municipal company"—a publicly owned company; it is not municipal—"give the domestic consumers the advantage. They do not give the power consumers a fair show." I have shown you about Los Angeles having power from her municipal plant 12 per cent cheaper than San Francisco from the privately owned plant. Now I am going to compare the rate charged for power—this is purely a power proposition—at Tacoma, from the municipal plant, with the rate charged for power by the Alabama Power Co. I have a table here running from 10 horsepower all the way up to 20,000 horsepower by easy stages, showing just what it would be in each place.

Let us take the case of a small user of power, and assume that he had 10 horsepower, and let us assume that the load factor is 15 per cent. That is a very low load factor. That is, he would be using it only 15 per cent of the time. The man in Tacoma who used that 10 horsepower for a month would have had to pay $11.86. If he had bought it from the Alabama Power Co. in Birmingham, Ala., he would have had to pay $25.36. You can take your choice. The privately owned plant is a beautifully equipped one, with all the incidents of efficiency; but the poor, neglected consumer has to pay more than twice the amount for power supplied by the Alabama Power Co. that he would have had to pay at this wretched municipal plant out in Tacoma. It is an awful thing, is it not? Suppose we say 25 per cent load factor, with the same 10 horsepower. He would have had to pay to the municipal plant in Tacoma $14.54, but the Alabama Power Co. would have charged $48.05 for the same service. That would have been an increase of 230.4 per cent.

Suppose, again, that there was a 40 per cent load factor, that he was using the current 40 per cent of the time. He would have had to pay in Tacoma $18.57. He would have had to pay the Alabama Power Co. $64.16, a difference of 245 per cent.

Suppose this consumer was going to take a hundred horsepower under a 20 per cent load factor. In one month that much power, if he had gotten it from the Tacoma municipal plant, would have cost him $129.82, and if he had bought it from the Alabama Power Co., it would have cost him $279.32, an increase of 115 per cent.

Suppose he wanted a thousand horsepower. That would have cost him at Tacoma $7,773.80 on a 25 per cent load factor. The Alabama Power Co. would have charged him $11,666.30, an increase of just a little bit over 50 per cent.

Suppose he wanted 20,000 horsepower, and he wanted it on a 90 per cent load factor, using it 90 per cent of the time. It would have cost him in Tacoma, from the municipal plant, $36,405.28; but the Alabama Power Co. would have charged him $82,431.86, an increase of 126 per cent. That is power comparison.

I want to add that I am going to consider taxes in this comparison. It is said that the Alabama Power Co. pays taxes, and that those taxes must be considered in figuring what it charges for service. That is true, I admit; but out in Tacoma the municipal plant pays what is equivalent to taxes to meet the tax argument. They pay 5 per cent of their gross receipts to the treasury for taxes. I want to read from their report. In 1925 that municipal plant paid $77,730 in lieu of taxes. They have paid, commencing back in 1917, when they paid $28,219.02 in taxes, increasing every year, because their business increased, until in 1925 they paid over $77,000 in lieu of taxes.

Mr. CARAWAY. Mr. President, may I ask the Senator a question?

Mr. NORRIS. Certainly.

Mr. CARAWAY. How much is the investment worth?

Mr. NORRIS. I have the figures here somewhere.

Mr. CARAWAY. If it is not convenient, I will not bother the Senator.

Mr. NORRIS. I have the figures here in this book, but I do not know that I have the place marked, and I could not give the figures from memory.

Mr. CARAWAY. Somebody has to furnish the capital on which the municipal plant operates?

Mr. NORRIS. Yes; and they are paying interest on all the capital. They borrow money to carry on, and are paying the debt off; and included in these rates is an amortization fee, to pay off the principal of money they have borrowed.

Mr. CARAWAY. Is the overhead, the pay of the men, supervision, and all those things, borne by the plant, or is it borne by the municipality?

Mr. NORRIS. Oh, yes; it is all paid by the system itself. I think it is Tacoma, perhaps of some other town the statistics of which I have here, but I have the statistics of one town where the system is supplying electricity, and even paid rent to the city for the rooms it occupied in the city hall.

The taxes paid for the year 1925 by the private power companies amounted to 4.86 per cent of their total gross revenues. This amount can be contrasted with the 5 per cent which the city of Tacoma pays to its general fund which last year amounted to more than $80,000.

Few people realize that Tacoma's municipal plant pays a 5 per cent gross revenue tax into its general fund each year, which appears to be a greater tax than is paid by the private power companies in this State. In face of this it is incontrovertible that Tacoma's power and light

rates are the lowest in the United States, taken as a whole; you, of course, realize why; the reasons are set out more fully in one of my inclosed articles under the caption of "Financing causes high power rates."

That is from a letter written by Kenneth G. Harlan, public-utility engineer—and incidentally I want to say that Mr. Harlan prepared the table from which I have been reading and which I will print in the RECORD.

In 1925 the Tacoma plant, after paying all the expenses, including 5 per cent in lieu of taxes——

Mr. SHORTRIDGE. Five per cent in lieu of taxes?

Mr. NORRIS. Yes. Under the law they are not taxed, but in order to meet the tax argument the charter provides that they shall pay 5 per cent of their gross revenue into the treasury of the city.

Mr. SHORTRIDGE. In lieu of taxes?

Mr. NORRIS. Yes. Their surplus in 1925 was $914,862.39. That was for one year. They have had a surplus every year since 1917, exceeding in each year $250,000, and in only one year was the surplus less than $300,000, and in only one year was it less than $400,000 during all those years.

Mr. SHORTRIDGE. May I ask the Senator another question?

Mr. NORRIS. Certainly.

Mr. SHORTRIDGE. Did that surplus go into the general fund of the city?

Mr. NORRIS. No.

Mr. SHORTRIDGE. What became of it?

Mr. NORRIS. That is kept in its business, of course. I suppose they take that surplus and use it to build additional plants, to extend the service, and so on. It represents, in reality, their profit, after setting aside the depreciation and all that.

Mr. SHORTRIDGE. But it is money belonging to the city?

Mr. NORRIS. Of course, the plant is owned by the city. The plant is owned by the city, but operated by a company.

Mr. SHORTRIDGE. The company retains that surplus as the legitimate profit arising from the operation of the plant?

Mr. NORRIS. Oh, yes; it goes into the business.

I want now to read from an article by Mr. Bone, the general counsel for the Port of Tacoma. I may say to the Senator from California that I may be wrong about it, but I think the technical, legal name of the activity that furnishes the electricity is the "Port of Tacoma." It is a sort of incorporated concern, incorporated to carry on this business, all owned, of course, by the city. Mr. Bone is general counsel for the Port of Tacoma and the municipal corporation which operates the port terminals in the Washington city. Here are some of the things he says:

A clerk in the offices of the grand lodge consumed 70 kilowatt-hours of electricity in October, for which he paid $4.38 to a private Power Trust.

He could have secured the same amount of "juice" from the municipal plant in Tacoma for $1.54.

In other words, he contributed to the Power Trust in October $2.84, or about $34 a year.

Tacoma's publicly owned light plant is saving her citizens over $3,000,000 annually.

If Tacoma raised its rates to meet the price charged in its neighboring city, Tacoma could cease to collect taxes and make the light department run the city—

That is mathematically true.

On July 1, 1926, the base rate was again lowered to 4½ cents. The second rate is 1 cent and the third rate is one-half cent. There are 30,000 light customers. The rates above noted cover house lighting, cooking, and accessories of all kinds. Taking all of these homes, the average consumption at the base rate is 32 kilowatt-hours per month. Many of the small homes get the 1-cent rate after using 20 kilowatt-hours of service.

The home of the writer is very large and must consume 54 kilowatt-hours at the base rate before getting the 1-cent rate. In January, this home consumed 628 kilowatt-hours for lighting, cooking, and accessories. The bill for this service would be as follows:

54 kilowatt-hours, at 4½ cents	$2.43
574 kilowatt-hours, at 1 cent	5.74
628 kilowatt-hours	8.17

or about 1⅓ cents per kilowatt-hour for all current used.

Tacoma also gives a rate of one-half cent for house heating, which is on a separate circuit.

Listen to this:

And some 2,700 homes use electric heat, many of them being without chimneys. Dirt is banished by the magic of "white coal." Thousands of electric ranges are in use and more are being added daily. The range goes on the lighting circuit, and practically all of the range current is at the 1-cent rate, which drops to one-half cent after using 800 kilowatt-hours.

So, Mr. President, I might go on almost without limit.

Mr. HARRIS. Mr. President, will the Senator yield?

Mr. NORRIS. I yield.

Mr. HARRIS. One of the points of opposition raised against this measure is that it would put the Government into business. I am sorry I missed part of the Senator's remarks, and I am wondering whether he has shown that the Government has been in business for nearly a hundred years in manufacturing munitions other than nitrates at the Frankford Arsenal, at Rock Island, and near Washington, and at a number of other places. I wonder if the Senator has brought that out.

Mr. NORRIS. No; I will say to the Senator that I have not brought that out, and I will be very glad if he would do so. Some time ago I referred to the fact that I had been taking up so much time of the Senate that I had cut out a good many things I wanted to say. I would be very glad, indeed, if the Senator himself would take up that subject and discuss it.

Mr. HARRIS. I have asked the War and Navy Departments to give me information as to what the Government is doing along that line. This is not a new development.

Mr. NORRIS. Mr. President, I am going to take up the city of Springfield, Ill., where they have municipally owned electric-light plant. I have before me the report for the year ending February 28, 1927. I have a later report, but I made my calculations on the basis of this report before I received the later one. They are practically the same, however.

The Springfield, Ill., plant is owned by the city of Springfield. In the vicinity of Springfield are several other cities, and I want to compare the rates charged for electricity in Springfield with the rates charged in the other cities in that vicinity in Illinois, all of them privately owned, and, I think, every one of those cities supplied by corporations dominated by Mr. Insull, who, it will be remembered, was recently trying to convince the Senate that he was entitled to buy a seat in this body for his special favorite. It is interesting to know that this man Insull comes in competition, not directly but in a way, with the municipally owned plant at Springfield.

Let us take a bill for 150 kilowatts of lighting or domestic service, a bill of 1,500 kilowatts of commercial service, and a bill for 4,000 kilowatts upon the power-service basis and compare them in all these cities. I want to compare the domestic service, the commercial service, and the power service.

For 150 kilowatts on the lighting service in Springfield, Ill., the customer would have to pay $5.28. If he lived in Bloomington, Ill., where Mr. Insull, under the blessed private initiative scheme, lives and operates and dominates, he would have to pay $15. If he lived in Danville, Ill., where Mr. Insull likewise, I presume, controls the situation, he would have to pay $11.25. If he lived in Decatur, Ill., he would have to pay $15. In East St. Louis he would have to pay $7.43; in Elgin, Ill., $15; in Peoria, $6.84; in Quincy, $9.75; in Urbana, $13. Remember that the same man in Springfield, Ill., would have to pay only $5.28.

Suppose that man was in business and taking light as a commercial customer and consumed 1,500 kilowatts per month. In Springfield, Ill., it would cost him $30. In Bloomington, Mr. Insull's blessed prerogative, it would cost him $100.50; in Danville, $84; in Decatur, $96; in East St. Louis, $64.97; in Elgin, $73.12; in Peoria, $55.28; in Quincy, $58.50; in Urbana, $97.50. I hope that Senators have not forgotten that the bill for the same service in Springfield, Ill., would be $30.

Mr. SHIPSTEAD. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Minnesota?

Mr. NORRIS. Certainly.

Mr. SHIPSTEAD. The Senator realizes, of course, that the responsibilities and duties of a sovereign require that he levy taxes of some kind. A man who has aspired to sovereignty and achieved sovereignty certainly must have some way of supporting his system of government.

Mr. NORRIS. Of course. If Mr. Insull paid $125,000 toward the candidacy of Mr. Smith, who had supervision over all these towns to which he furnished electricity, he had to get it back in some way, and so the poor people in Bloomington and Decatur and the other towns I have named had to bear the burden and pay the bill, as they always do. The big fellows never pay the bill. The customers pay the bill. Add 2 cents, and lo! it all comes in as by magic. It is easy.

Mr. SHIPSTEAD. Sovereigns do not like to have other people look into their affairs.

Mr. NORRIS. No; that is true.

Mr. SHIPSTEAD. They stand upon their rights as sovereigns. They do not like investigations.

Mr. NORRIS. I would like to go on with this comparison just a little further. Suppose we were buying power and we consumed 4,000 kilowatts per month. The Springfield municipal plant would charge us $68. In Bloomington, Ill., if we lived there and got our power from Mr. Insull, we would pay $166 for the same thing; in Danville, $142; in Decatur, $162.50; in East St. Louis, $101.89; in Elgin, $213; in Peoria, $98.10; in Quincy, $118; in Urbana, $174; all of which could have been bought in Springfield, Ill., of this much-hated and much-despised municipally owned plant for $68.

We talk about manufacturing, we talk about wanting to make goods cheaply so the consumers of the country will not be overcharged, and so we can compete with foreign competitors, and yet it will be insisted that we pay such prices for power to these privately owned corporations that are spending your money and my money in trying to corrupt the Senate of the United States and buy seats here. Some people insist on giving them $2 for this service instead of getting it for $1 or less from a municipally owned plant like they have in Springfield, Ill. Oh, consistency, you are fled to the woods! There is no consistency left.

If we want to advance in industry, if we want to be able to compete in foreign markets, it behooves us that we should say to the Water Power Trust in Illinois, represented by Insull, "Your control over politics in the Government of the State and of the Nation is ended, and we are going to do business on a fair and honest scale. We will not listen longer to this condemnation of governmental inefficiency when you yourselves are the most inefficient of any concern that can possibly be brought into public view."

Mr. SHIPSTEAD. The Senator would not confine that to Illinois, would he?

Mr. NORRIS. Oh, no; I would not confine it to Illinois.

Mr. SHIPSTEAD. I thought the Senator said Illinois.

Mr. NORRIS. Oh, Mr. Insull does not confine himself to Illinois, either.

The Springfield municipal plant had a very hard time in the beginning. They had the same experience that all municipal plants have had. I think I have among my papers a statement with reference to the lawsuits in which they became involved. The privately owned concerns always commence injunction proceedings and all kinds of litigation and obstruct municipal plants in every way possible. They go into politics and denounce as a Bolshevik or something worse the man who says, "I want a municipal plant." They go into the courts, and the litigation goes to the Supreme Court of the United States, for all of which the people have to pay on both sides, because the privately owned plant with almost unlimited expenses gets every cent of its income from the pockets of the people who consume electricity, which goes into every home, and goes to every student working his way through college, and to everybody else who consumes electricity. In the budget of every workingman's home and every business man's home everywhere in the United States are found these exorbitant rates, made in many instances as a result of the use of the flowing water which God has placed on the mountain tops and which delivers its unseen power into our homes and puts money and profit into the coffers of the rich as it trickles down the mountain side and turns itself into what we call electricity.

Let us see what are the rates in Springfield, Ill. The first 30 kilowatts cost 6 cents each, the next 70 cost 3 cents each, and all over 100 kilowatts cost 2¾ cents per kilowatt, with a minimum monthly bill of 50 cents. If this municipally owned utility once gets out of debt, as it is rapidly doing, those rates of course will be reduced much further. They have a separate rate for cooking of 1½ cents per kilowatt-hour. That is what the people pay for cooking in Springfield, Ill., if they are getting current from the municipal plant.

The street lighting, water, and electric rates per kilowatt-hour are 2 cents, and if we figure it out it will be found that that is very cheap. The lighting rates in force at the time the municipal plant in Springfield, Ill., was established were 13 cents for the first 30 kilowatts, 9 cents for the next 30 kilowatts, and 6 cents for all over 60 kilowatts, less 10 per cent discount for prompt payment.

I want to read from an article in a newspaper published in Springfield, Ill., entitled "A wicked public ownership," as follows:

A distinguished public-utility magnate is quoted in the press as declaring that public ownership is "wicked." If that be true, Springfield, the capital of Illinois, is an example of extreme and continuing wickedness.

In 1894 some public-spirited citizens of that town got together and subscribed $60,000 to build a plant for street lighting, to escape the extortion of the private corporation which then had a monopoly. The plant paid for itself in five years and then was donated to the city. This, from the corporation point of view, is appalling wickedness. It should have been capitalized at "reproduction cost" and unloaded on the community in that form.

For 21 years the plant continued lighting the streets. Then, in 1915, Willis J. Spaulding became manager and started in on commercial lighting and power distribution. By 1925 the city had secured 11,637 customers and had cut the rate for lights from 13 cents per kilowatt-hour to 6 cents. Obviously this is worse wickedness and more of it.

But that is not all. Instead of running behind, as publicly owned plants are supposed to do to suit corporation arithmetic, the public plant of Springfield is making money. It earned $115,000 above all charges in 1924 and $159,000 in 1925. This surplus—about $2 per year for each man, woman, and child in the city—belongs to the people instead of to a corporation. In addition the plant saved the people $549,000 in 1925 through reduced rates. Samuel Insull would agree that this is unparalleled wickedness!

In other words, the people of Springfield are saving more out of their water and electric plants than their city government costs them. Words fail to describe such wickedness.

Mr. President, I shall take up a branch of the tax question now. I am sorry that my good friend the senior Senator from New Jersey [Mr. EDGE] is not present, because I want to refer to a town in his State. South River, Mr. President, in New Jersey, is called——

Mr. EDGE entered the Chamber.

Mr. NORRIS. I am glad to see that the Senator from New Jersey is now present.

South River, in New Jersey, is called "The town with no local tax." I have here [exhibiting] a picture of a billboard that is on the outskirts of the town. When one is driving into that beautiful place, he sees by the side of the highway that billboard with the legend, "The town with no local tax—South River."

Mr. EDGE. It is to be congratulated, is it not?

Mr. NORRIS. It is, indeed. The billboard further reads:

Electric light, water, sewers, garbage collections, paved streets, gas, etc.; water front and railroad connections; ideal residential town; manufacturers investigate before locating elsewhere.

That is South River, N. J. I hardly know how it can be in the same State in which the Senator's home is located, but it is. For electric light the municipally owned plant in South River does not charge any more nor any less than is charged in adjoining cities, but that municipal plant makes so much money that the town levies no tax. We are always told that these measly, inefficient municipal plants do not pay. Here is one that makes such profit that the town does not have any local taxes to pay. Nobody pays taxes in South River for municipal purposes. The people there merely pay their electric-light bills at the same rate that citizens in neighboring towns pay, and they make so much money that they do not need to tax themselves. That is in New Jersey.

Mr. EDGE. Mr. President, has the Senator from Nebraska the figures that would warrant his statement that the profit on the electric-light system is the only income that the people have which produces that utopian situation where no one is compelled to pay taxes?

Mr. NORRIS. I have the figures, and I am about to produce them.

Mr. EDGE. I shall be delighted to hear them.

Mr. NORRIS. They charge for some things. I suppose if I went there to sell something on the street, I would have to pay a license; I have an idea I would, but I do not know. However, South River is a taxless town. It owns and operates its electric-light and water-supply systems. The net income from these public utilities is sufficient to provide the funds required for the municipal budget. The rates charged for electric light and city water service are the same as the charges in adjoining towns which are supplied by private companies. Both the electric and water systems are modern installations, well maintained and efficiently operated. They have efficiency in these publicly owned electric-light plants even in New Jersey.

Mr. EDGE. We usually have efficiency in the conduct of municipal affairs in New Jersey.

Mr. NORRIS. When the Senator finds out how efficient the municipally owned plant in South River is he will have to change his ideas, I am afraid, about some things. Let me give the Senator some figures.

Mr. EDGE. I do not know that the Senator from Nebraska is entitled to state the ideas of the Senator from New Jersey.

Mr. NORRIS. I shall not try to do so.

Mr. EDGE. The Senator from New Jersey himself usually states his ideas when it is necessary to do so.

Mr. NORRIS. I shall be willing to concede that right to my friend. If I misstate his position I want to be corrected.

I will tell the Senator just where South River is, so that he may visit that town. South River is located midway between New Brunswick and Perth Amboy, in New Jersey, on the South River, giving the town direct water transportation to New York.

The town covers an area of 8 square miles, and has a population estimated at over 10,000. Its leading industries are needle work, laces, embroideries, and its manufacturing establishments principally clay products, such as hollow tile, stucco, and enameled brick. The electric power and light and the city water service are supplied by the city, which owns and operates these two public utilities. Electric power is generated by two Diesel engines—they do not even have water power there—of 520 horsepower and 720 horsepower, respectively. A third engine of 1,150 horsepower, with building capacity for a duplicate unit, is now being installed, making the ultimate capacity of the plant 2,520 horsepower, or approximately 2,000 kilowatts.

Mr. FLETCHER. Mr. President, will the Senator allow me to interrupt him?

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Florida?

Mr. NORRIS. I yield.

Mr. FLETCHER. I take it that the fuel used there is oil.

Mr. NORRIS. Yes.

Mr. FLETCHER. And the town being on the water, they have water transportation for their oil, and get it at a very reasonable rate.

Mr. NORRIS. I suppose they do.

Electric service is sold at rate schedules closely approximating the rates for similar service furnished by the public utilities to adjoining towns which are served from the system of the Public Service Co. of New Jersey and the Eastern New Jersey Power Co. The rate schedules are compared, as follows:

Residence lighting in South River for first 500 kilowatt-hours, 9 cents; Public Service Co. rates in adjoining towns, first 20 kilowatt-hours, 9 cents.

The rates, then, run a little differently; the next steps being—

South River: Next 500 kilowatt-hours, 8.1 cents; next 1,000 kilowatt-hours, 7.2 cents.

Public Service Co.: Next 30 kilowatt-hours, 8 cents; next 700 kilowatt-hours, 7 cents.

The price of retail power in South River for first 100 kilowatt-hours is 8.1 cents; for the first 20 kilowatt-hours furnished by the Public Service Co., use of demand, the rate is 9 cents. The rates are practically the same, although the rate of the South River plant, first step, is for a hundred kilowatt-hours, while for the private company the first step is only 20 kilowatt-hours.

For the next 50 kilowatts the privately owned company charges 5 cents, while for the next 900 kilowatts the South River plant charges 7.2 cents. It would be necessary to figure out bills in order to know which charge was the greater. In other words, the people of South River are undertaking at their plant to charge the same rates that consumers elsewhere in New Jersey have to pay. The engineer who made this comparison for me has figured it out and shows that there is practically no difference in the cost to the consumer of either domestic or commercial consumption of electricity.

Mr. HARRISON. May I ask the Senator what is the cheapest rate for industrial power from the municipally owned plant?

Mr. NORRIS. I do not know whether I can give the figures. As to wholesale power, the charge for the excess above 10,000 kilowatt-hours in the case of the South River plant is 2.7 cents, while in the case of the privately owned plant the charge for the excess above 7,000 kilowatt-hours is 1 cent. It will be found, however, if the figures are run down that in some of the lower schedules much more electricity is allowed.

I was just about to read the result of an analysis made by Mr. Rau, who, in my judgment, is one of the best electrical engineers in the United States, a man of national, if not international, reputation. After citing all the figures, he says:

These comparisons indicated that the cost of electric service to domestic consumers is from 10 to 15 per cent less than that charged by the private companies and to the retail and wholesale power consumers from 10 to 15 per cent more.

In other words, as he works out the figures they practically equalize. He says that the domestic consumer gets 10 or 15 per cent the advantage from the municipally owned plant and the power consumer gets from 10 to 15 per cent advantage from the privately owned plant.

But he explains that as follows:

This latter condition, however—

That is, the difference in the cost of power—

affects very few consumers in a town such as South River, there being only three consumers who would receive a lower rate from the private companies on the wholesale power schedule in South River.

The electric plant generated during the year 1926 something like 3,112,850 kilowatt-hours, and the sales were as follows:

I have the table of sales made, the load carried, and all the details, which probably would not be interesting either to the Senate or to the ordinary reader.

Gross operating revenue for the year 1926 was $135,494.67, subdivided as follows:

Paid to electric department by the city:	
Pumping plant	$14,590.00
City street lighting	5,244.68
Electric lighting (estimated 8 cents)	56,501.68
Commercial power (estimated 4½ cents)	59,158.31
Total	135,494.67

Gross revenue per kilowatt-hour generated, 4½ cents.

Operating expenses per kilowatt-hour generated, 1.8 cents.

Gross revenue per kilowatt-hour sold, 5¼ cents.

Operating revenue per kilowatt-hour sold, 2.2 cents.

And out of it comes "the taxless town"!

Total fixed capital in electrical department at the close of 1926 was $300,042.48, of which $117,500 is a funded debt at 5 per cent interest, for which a sinking fund of $8,000 must be set aside each year.

You see, they are paying off their debt. They are setting aside, over there in New Jersey, $8,000 each year as a sinking fund; and here is the financial computation:

Interest and sinking-fund charges are therefore $13,875.

Fixed charges per kilowatt-hour sold, one-half cent.

Net earnings, exclusive of other fixed charges, per kilowatt-hour sold, 2.55 cents.

The gross operating income from the city water department for 1926 was $11,706.32.

The total net income from the electric and water departments was $80,348.84.

The income from these two public utilities, in addition to collection of local licenses and other sources, was more than necessary to provide the funds required under the town budget; therefore the slogan, "The town with no local tax."

Mr. EDGE. Mr. President, if the Senator will permit an interruption——

Mr. NORRIS. Yes.

Mr. EDGE. I just want to express my personal appreciation of the Senator's commendation of the municipal management of that town and to supplement that by the statement that, according to my general recollection, there are a number of towns in New Jersey, including my home town of Ventnor, where the water department is owned by the municipality and conducted, I think, in a very economical and businesslike manner. I think that is quite possible in various cases throughout the country. I join with the Senator in recognizing such management as that and approving of it.

Mr. NORRIS. I thank the Senator most sincerely for his commendation of my course. It is the first time that I have ever known him to approve it publicly.

Mr. EDGE. I was limiting the commendation for the moment to the evidence that the Senator had produced in my hearing.

Mr. NORRIS. Oh, I am not going to hold the Senator liable. I will let him change his mind to-morrow if he wants to, and the next time he speaks in favor of this beautiful private efficiency I want him to think of South River, over in his State, where they levy no tax. The next time he is opposing something that I want on the ground that public ownership pays no taxes, I want him to think of South River.

Mr. EDGE. The Senator will always consider these exceptions where unusual management has made possible these very satisfactory results and still be opposed to the general principle.

Mr. NORRIS. Oh, I had no such thought as converting the Senator. He is too hard-boiled. I do not expect to convert him; but I am glad to get the admission out of him that even in rock-ribbed corporation New Jersey it is possible that there should be a town so efficiently managed that its officials operate it without levying any taxes.

Mr. EDGE. The Senator should emphasize his commendation that New Jersey does produce those results.

Mr. NORRIS. I am trying to do it.

Mr. EDGE. Perhaps he can not demonstrate similar results in some other States of the Union.

Mr. NORRIS. Yes; I can demonstrate it in a good many places, but I am extremely delighted to demonstrate it in New Jersey.

Mr. HARRISON. Mr. President, is the Senator sure that the town is not named "Salt River" instead of "South River"? I was thinking that if the name was "Salt River" the Senator would not invite the Senator to make a visit up there.

Mr. EDGE. I might add, too, for the benefit of the Senator from Mississippi, that South River is one of the very, very strong Republican cities, with a Republican mayor and a Republican municipal government.

Mr. NORRIS. That is another thing I am delighted to hear. It comes so seldom from Members of this body that I am glad to have testimony to my Republicanism, that I am lauding a city over here whose officials are looking after their people so efficiently that they do not need to levy a tax, and they are all Republicans. I am delighted to hear it. Nothing has pleased me more for a good while. I did not know that before.

Mr. EDGE. Mr. President, as I understand, the Senator now classifies our school of thought as the radicals and his school of thought as the conservatives. Is that the new designation?

Mr. NORRIS. I had not classified it.

Mr. EDGE. I thought I understood the Senator to say something like that in some previous speech.

Mr. NORRIS. Perhaps I did say something of that kind; but, like the Senator from New Jersey when he commends my course, I reserve the right to change my mind and to take the other side.

Mr. President, I have a letter here about New Jersey. It is headed, "Is south Jersey paying for South America's electricity?" I ought to read some of it, I think. This is a letter written to the Board of Public Utility Commissioners of New Jersey.

Mr. FLETCHER. Mr. President, the Senator will bear in mind that one of the headquarters of the Cyanamid Co. is in New Jersey.

Mr. NORRIS. Yes; but it is not at South River.

BOARD OF PUBLIC UTILITY COMMISSIONERS OF NEW JERSEY.

GENTLEMEN: In your annual report for 1927 to Governor Moore, just made public, you take a strong stand against Federal control of interstate electric power lines.

After discussing the rapid extension of such power lines, by which New Jersey draws her current from sources in Pennsylvania, Maryland, and New York, you say:

"It is respectfully suggested that any legislation proposed to centralize, in a Federal bureau, regulation of interconnected companies should be strongly opposed * * *. The board believes the citizens of the State, fully informed of the facts, would not be in favor of Federal regulation of any detail of the electrical industry which the State can regulate for itself."

What are the "facts" which would turn citizens of this State against Federal control?

Why not supplement your report to the governor with a report of these "facts"?

In this supplementary report we would like you to answer a few questions.

Are not electric rates much higher in New Jersey than in Pennsylvania and New York?

How is it that Camden pays so much more than Philadelphia, although both cities receive their "juice" from the same power plants of the Philadelphia Electric Co.?

It is difficult for the layman to compare electric rates, as each company has its own system of charges. We appreciate that different businesses require different connected and peak loads. But here is a "fact" which you may incorporate in your supplementary report:

Two similar plants of the same size and operating the same hours in Camden and Philadelphia, compared bills for electricity a few months ago. The Philadelphia plant used 52,000 kilowatt-hours, and its bill was less than $1,000. The Camden plant used 50,000 kilowatt-hours, and its bill was $1,900, less juice at nearly double the cost.

And so it goes on; a demonstration, I think, of the fact that privately owned and operated electric-light plants do what it is natural for human nature to do, and that is to charge all that the traffic will bear; and unless we can have standing out outposts, as we do have, of municipally owned plants where we have exhibitions of efficiency and of cheapness and of utility, we shall be helpless in the hands of an electric-light trust. We owe more to these cities that have demonstrated what is possible in electricity than we do to any other source.

I have called your attention, Mr. President, to instances where the charges for electric-light service would be, if everything else were equal, the difference between success and failure; where in Springfield, Ill., you can get power from the municipal plant for manufacturing purposes more than 50 per cent cheaper than in any of the surrounding cities supplied with electricity from privately owned utilities; and the claim is always made, "Why, the private companies pay taxes and the municipal plants do not."

In addition to what I have already said about taxes in reference to these other plants, I want now to take up the question of taxes and show that it is mostly a bugaboo. It is conceded that a private company must add the taxes that it pays to the price of the current it sells. That is right. It is conceded that as a rule municipal plants do not pay taxes; and whatever that difference is it is perfectly proper to give it the weight and the consideration it is entitled to; but how much is it entitled to?

I have had figured out for me by an engineer the cost per kilowatt-hour of taxes in some of the leading cities of the United States, and I have this result:

New York, which has an average domestic rate for consumers of electricity of 6.72 cents per kilowatt-hour, supplied by a private corporation, pays per kilowatt-hour two hundred and fifty-three one-thousandths of a cent. That is what the taxes amount to that the company pays that supplies New York City with electricity—two hundred and fifty-three one-thousandths of a penny on each kilowatt-hour; and that is the largest of the list that I have.

In Detroit, the private company supplying that city with electricity pays, for each kilowatt-hour it sells, one hundred and fifty-two one-thousandths of a cent. That is practically one and a half mills. It is lost in the equation, and so is every other one.

Philadelphia, supplied with electricity by a privately owned corporation, taxes that corporation on every kilowatt-hour seventy-three one-thousandths of 1 cent. That is so small that on the ordinary bill you could not figure it out in a week. It would make only a few cents difference to every customer in an entire year.

Pittsburgh, likewise supplied by a private corporation, makes that corporation pay taxes, and those taxes amount to sixty-one one-thousandths of a cent on each kilowatt-hour of current that it makes and sells.

Mr. SHIPSTEAD. Mr. President——

The PRESIDING OFFICER (Mr. SACKETT in the chair). Does the Senator from Nebraska yield to the Senator from Minnesota?

Mr. NORRIS. I do.

Mr. SHIPSTEAD. What corporation is that?

Mr. NORRIS. That is the corporation that supplies Pittsburgh, Pa., with electricity. I do not know what its name is. I have not the name here.

Mr. SHIPSTEAD. Is that a corporation that buys electricity?

Mr. NORRIS. Oh, no, no. It is just such a corporation as we have here in Washington. I am going to take up Washington pretty soon. The city of Washington is supplied with electricity by the Potomac Electric Power Co. It pays taxes, and it tries to make us believe that if it had no taxes to pay it could meet these municipal rates. I am showing how much the taxes amount to on each kilowatt-hour of electricity that it sells.

Chicago is supplied with electricity by a private corporation, and that poor corporation pays taxes to the amount of one hundred and fifty-two one-thousandths of 1 cent on each kilowatt-hour.

The West Penn is a corporation that supplies a lot of cities in the vicinity of Pittsburgh with electricity; I do not know how many, but quite a number. It is a privately owned corporation and, of course, has to pay taxes, and those taxes amount to thirty-two one-thousandths of a cent per kilowatt-hour of electricity. In other words, if the customers were able to deduct the taxes the company pays, they could reduce the rate per kilowatt-hour thirty-two one-thousandths of a cent.

Mr. SHIPSTEAD. That would be taxes paid to the visible government?

Mr. NORRIS. Yes.

Now, I have the figures for the city of Washington, taxes paid in the city of Washington, including the Federal income tax, paid by the Potomac Electric Power Co. This is startling, in reality, and I will have to figure it out to see where I am going in my decimals. It amounts to five hundred and ninety-four ten-thousandths of a cent, less than a mill. Your numer-

ator is 594 and your denominator, if you want to put it in common fractions, is 10,000. That is the fraction of a cent this great corporation pays on each kilowatt-hour of electricity that it supplies us. So that if they did not have to pay taxes, they could reduce the rate five hundred and ninety-four ten-thousandths of a cent on each kilowatt-hour they sell us. We would have to keep on getting electricity, if that were the difference, for an ordinary lifetime, in order to get enough of the savings to buy an ordinary meal in an ordinary hotel in the city of Washington. If those taxes do not include Federal income taxes, as some people think, because income taxes are levied on net incomes, then the amount they pay as taxes on each kilowatt-hour is one hundred and eighty-nine ten-thousandths of a penny.

So, after all, Mr. President, these taxes should not make us feel so tender-hearted toward the people who have to pay them, because when you figure it out in terms of the kilowatt-hour that is supplied us, the amount of tax paid by the private company is so small that it is lost entirely in the equation, and if they paid no taxes whatever, the rate they charge us would be exactly the same as it is now. If the taxes were doubled, still the amount as applied to a kilowatt-hour would be so small that nobody would even think of it.

LOAN OF FIELD GUNS TO DALLAS, TEX.

Mr. SHEPPARD. Mr. President, I ask unanimous consent for the immediate consideration of Senate bill 2820, authorizing the Secretary of War to donate certain field guns to the city of Dallas, Tex.

Mr. McKELLAR. Has the bill been favorably reported?

Mr. SHEPPARD. It has been favorably reported by the Committee on Military Affairs. It has the approval also of the War Department.

Mr. WILLIS. Mr. President, I have been trying to get some guns for various cities in Ohio, and was told that there was a general provision in the statutes under which we had to proceed. I was wondering what special dispensation the able Senator from Texas had secured.

Mr. SHEPPARD. Mr. President, the statute to which the Senator refers has reference to guns captured during the World War. The guns covered by this measure were used by the National Guard at Dallas, Tex., for 10 or 12 years prior to the war. When the late war began, new guns were given the guard to take to France, and these guns were stored in a Federal arsenal, where they remain to-day.

Mr. WILLIS. They have been captured by the Senator.

Mr. SHEPPARD. Yes; if the Senator wishes to put it that way.

Mr. WILLIS. Very well; I am satisfied.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Military Affairs with amendments, on page 1, line 4, to strike out the word "donate" and insert the words "loan without bond"; on line 7, to strike out the word "mark" and insert the word "model"; and on line 9, after the numerals "1917," to insert a comma and the words "until such guns may be needed for national defense," so as to make the bill read:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and directed to loan without bond, without expense to the United States, to the city of Dallas, Tex., for the purpose of display in the State fair park in that city, two 3-inch field guns, model 1902, serially numbered 151 and 153, with carriages, which were used by Battery A, Texas National Guard, from 1906 to 1917, until such guns may be needed for national defense.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill authorizing the Secretary of War to loan certain field guns to the city of Dallas, Tex."

MISSISSIPPI RIVER BRIDGE, WISCONSIN

Mr. BLAINE. Mr. President, I ask for the present consideration of House bill 5818, authorizing J. H. Peacock, F. G. Bell, S. V. Taylor, E. C. Amann, and C. E. Ferris, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near the city of Prairie du Chien, Wis.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and the Senate (at 4 o'clock and 55 minutes p. m.) adjourned until to-morrow, Thursday, March 1, 1928, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate February 29, 1928

FOREIGN SERVICE

To be Foreign Service officers, unclassified

Archer Woodford, of Kentucky.
Cavendish W. Cannon, of Utah.
Leo F. Cochran, of Rhode Island.
James L. Park, of Pennsylvania.
Phil H. Hubbard, of Vermont.

To be vice consuls of career

Archer Woodford, of Kentucky.
Cavendish W. Cannon, of Utah.
Leo F. Cochran, of Rhode Island.
James L. Park, of Pennsylvania.
Phil H. Hubbard, of Vermont.

UNITED STATES ATTORNEY

James W. McCarthy, of New Jersey, to be United States attorney, district of New Jersey, vice Walter G. Winne, resigned.

UNITED STATES MARSHALS

Joseph Fritsch, jr., of New York, to be United States marshal, western district of New York. (A reappointment, his term having expired.)

Frederick L. Esola, of California, to be United States marshal, northern district of California. (A reappointment, his term having expired.)

REAPPOINTMENT IN THE OFFICERS' RESERVE CORPS OF THE ARMY

GENERAL OFFICER

To be brigadier general, Corps of Engineers Reserve

Brig. Gen. Jay Johnson Morrow, Corps of Engineers Reserve, from March 5, 1928.

CONFIRMATIONS

Executive nominations confirmed by the Senate February 29, 1928

APPOINTMENTS IN THE ARMY

MEDICAL CORPS

To be first lieutenant

First Lieut. Stuart Absalom Cameron.

PROMOTIONS IN THE ARMY

To be colonel

Lieut. Col. Julien Edmond Gaujot.

To be lieutenant colonel

Maj. George R. Allin, Field Artillery.

To be majors

Capt. William Hampton Crom.
Capt. George Rainsford Fairbanks Cornish.

To be captains

First. Lieut. James Fairbank Smith.
First Lieut. John Reigel Embich.
First Lieut. Fred William Koester.

To be first lieutenants

Second Lieut. Raymond Stone, jr.
Second Lieut. John Joseph Binns.
Second Lieut. Walter Burnside.
Second Lieut. James Francis Joseph Early.
Second Lieut. Howard John Vandersluis.

MEDICAL ADMINISTRATIVE CORPS

To be captain

First Lieut. Amos Stanhope Kinzer.

PROMOTIONS IN THE NAVY

To be captain

William R. Furlong.

To be commanders

Lemuel E. Lindsay.
Augustine W. Rieger.

To be lieutenant commanders

John J. Twomey.
Samuel B. Brewer.
Franklin S. Irby.

To be lieutenant (junior grade)

George W. Allen.

To be passed assistant surgeon

Walter F. J. Karbach.

To be passed assistant dental surgeon

Gunnar N. Wennerberg.

MARINE CORPS

To be first lieutenant

Richard J. Godin.

To be second lieutenant

George O. Van Orden.

To be chief quartermaster clerk

Claude T. Lytle.

POSTMASTERS

ARIZONA

Walter W. Jett, Chandler.

MARYLAND

Charles H. Johnson, Edgewood.
Stella B. Johnson, Fort Hoyle.
Hattie B. H. Moore, Marydel.
Charles R. Wilhelm, Monkton.
Webster Ravenscroft, Oakland.
Napoleon T. Nelson, Trappe.
Lafayette Ruark, Westover.
Addie D. Rayne, Willards.

WEST VIRGINIA

Clarence F. Tomlinson, Edwight.
J. D. Fultz, Everettville.

HOUSE OF REPRESENTATIVES

WEDNESDAY, *February 29, 1928*

The House met at 12 o'clock noon and was called to order by the Speaker.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Most merciful and all-wise Father, Thou hast made waiting beautiful and patience sweet. Thy holy Spirit is like an invisible bridge that unites us in our hopes and dreams. Thou dost give us the zest of soul that sorrow can not keep down and the cheer that burdens can not crush. Renew to-day the sunshine of our hearts and the childhood of our spirits. O God, humanity is all about us teeming through the arteries of the Republic. Many there are with stained garments and heavy hearts; they are struggling for mere existence through a veiled cloud. Stay Thou the threatening signs of social, moral, and political plague. The mission of Jesus of Nazareth is indispensable. He holds for all weary souls and bodies the remedy for our national ills. Oh, may the holy arms that were once stretched on the cross be loosened more and more to clasp the whole human family in one embrace. Then there shall be no more classes, but there shall be just men—the crowning gifts of God's creation. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

ORDER OF BUSINESS

Mr. TILSON. Mr. Speaker, I wish to say a word as to the program for to-day. The Committee on Coinage, Weights, and Measures, I understand, has the next call on Calendar Wednesday. I ask unanimous consent that upon the completion of the business presented by this committee for the remainder of the day Calendar Wednesday business may be dispensed with, so that the agricultural appropriation bill may be taken up and proceeded with.

The SPEAKER. The gentleman from Connecticut asks unanimous consent that on the completion of the consideration of the business presented by the Committee on Coinage, Weights, and Measures the business in order for Calendar Wednesday for the remainder of the day be dispensed with. Is there objection?

Mr. GARRETT of Tennessee. Mr. Speaker, reserving the right to object—and I shall not object—to the request of the gentleman from Connecticut, I think the session has reached a stage now where it is not improper to direct attention to the fact that it seems as if matters were being permitted to drift in such a way as necessarily to throw upon the Committee on Rules of the House responsibilities that it ought not to have to assume, by committees failing to take advantage of Calendar Wednesday to call up the business which they might call up at that time; and then as the session becomes more and more congested and pressure will be exerted for the consideration of this or that piece of legislation, each bit of it being in the minds of those interested the most important thing that Congress can do.

We shall have the pressure and the propaganda and letters and telegrams pouring in on the Committee on Rules to bring in special orders making in order the legislation that may be desired. The Committee on Rules will be "made the goat" by reason of the negligence of some of these committees in failing to avail of Calendar Wednesday to call up their business, which they may do under the general rules of the House.

Mr. TILSON. There is a special reason that applies to-day that is out of the ordinary. The Committee on Banking and Currency is now on call, but has no other business to take up. The next committee to be reached is the Committee on Coinage, Weights, and Measures. This committee has two bills. It may take all day to-day to consider them, and if so they are entitled to it. I am informed by the chairman of the committee, however, that the committee will probably not take all the time. Another committee would not wish to come in for a part of a day and have an entire day charged up to it. Therefore, under the circumstances, I think it would not be inappropriate to agree now to dispense with Calendar Wednesday business after the completion of the business brought forward by the Committee on Coinage, Weights, and Measures.

Mr. GARRETT of Tennessee. Further reserving the right to object, Mr. Speaker, as is very well known, the general policy of the minority has been and is not to try to interfere with the rights and responsibilities of the majority to fix the program of business. The majority can do that in any event, and it may as well be done pleasantly instead of forcing various parliamentary procedures; and what I suggested a moment ago is not intended by way of criticism of the majority leader in now asking for this action. But it does seem that upon matters of a nonpartisan nature, matters on which there will be no partisan division whatever, if advantage be taken of Calendar Wednesday, which was expressly adopted, as those of us who were here at the time it was adopted will recall, so as to insure to committees an opportunity for the consideration of their legislation, it would relieve the Committee on Rules of the necessity of coming in with special rules in congested times. It does seem proper to me to state this at this time, and really I do it for the purpose of calling it to the attention, not so much that of the majority leader, who knows the situation, but of the chairmen of these committees that have legislation which they want to get in, and to suggest that they ought to be ready to take advantage of Calendar Wednesday, and not come in later and unload responsibility on the Committee on Rules, which it ought not to have to bear.

Mr. GARNER of Texas. Mr. Speaker, will the gentleman yield?

Mr. GARRETT of Tennessee. Certainly.

Mr. GARNER of Texas. After all, if one of these committees came to the Committee on Rules for a rule providing for legislation which they neglected to bring in by reason of failure to avail of the right they would have on Calendar Wednesday, would not the Committee on Rules be justified in saying, "You did not take advantage of the opportunity that was given you"?

Mr. GARRETT of Tennessee. Absolutely. When I speak of the Committee on Rules considering business, of course I refer to the majority, because that is one particular committee where it is the majority that does business. The Committee on Rules would be absolutely justified, in my opinion, in taking that attitude, that is justified as between the Committee on Rules and the legislative committee, but then there is a forced responsibility to the public, which the Rules Committee should not be made to assume.

Mr. GARNER of Texas. Mr. Speaker, it is the duty of the chairman of those various committees to object to the setting aside of Calendar Wednesday when the majority leader takes the responsibility of asking that it be done, so it is the majority leader and the chairmen of the various committees who are responsible for not having the benefit of Calendar Wednesday.

Mr. TILSON. I will say that my request is in entire accord with the wishes of the several chairmen who are most directly interested.

Mr. LINTHICUM. Mr. Speaker, reserving the right to object, I wish to say to the gentleman from Connecticut that for the past three Wednesdays I have been here expecting that several bills on the calendar, reported by the Committee on Foreign Affairs, would come up, but on each of those days the consideration of those bills has been postponed. There is one particular bill in which I am interested, and the people are waiting for an answer in order to carry out certain work which has to be done. I certainly trust the gentleman from Connecticut will not ask to do away with any further Calendar Wednesdays. If he does I shall have to object. Whether that will accomplish anything or not, I do not know, but I shall endeavor to prevent all postponements after this.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

PERMISSION TO ADDRESS THE HOUSE

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to be allowed to proceed for 10 minutes.

The SPEAKER. The gentleman from Michigan asks unanimous consent to proceed for 10 minutes. Is there objection?

There was no objection.

Mr. LINTHICUM. Mr. Speaker, will the gentleman yield for just a moment?

Mr. CRAMTON. I yield.

Mr. LINTHICUM. Mr. Speaker, I ask unanimous consent that my colleague from New York [Mr. SIROVICH] be allowed to speak for 30 minutes immediately after the reading of the Journal and disposition of business on the Speaker's desk on Friday of this week.

The SPEAKER. The gentleman from Maryland asks unanimous consent that the gentleman from New York [Mr. SIROVICH] be permitted to address the House for 30 minutes, after the reading of the Journal and the disposition of business on the Speaker's table, on Friday next. Is there objection?

Mr. SNELL. Mr. Speaker, reserving the right to object, we have the agricultural appropriation bill coming on, and there will be several hours of general debate, during which the gentleman from New York could no doubt get the time he desires.

Mr. TILSON. Mr. Speaker, the agricultural appropriation bill is to be taken up after the disposition of Calendar Wednesday business, and there will be plenty of time allowed for general debate, and I hope that gentlemen, so far as possible, will take advantage of the general debate on the appropriation bill, rather than ask for permission to address the House.

Mr. LINTHICUM. My colleague has certain data which he wishes to gather, and he would like to have a specific time set aside for him. I have not made many requests of this kind of the House, and I am sure the gentleman from New York has not made such a request before.

Mr. SNELL. We want to accommodate the gentleman from New York and everybody else, but we would rather have the gentleman take his time during the general debate on the appropriation bill.

Mr. LINTHICUM. There will no doubt be general debate on that bill on Friday, so it would be six of one and a half dozen of the other. I hope the gentleman will not object.

The SPEAKER. Is there objection?

There was no objection.

SENATE BILL REFERRED

A bill of the following title was taken from the Speaker's table and, under the rule, referred to the appropriate committee, as follows:

S. 2800. An act authorizing E. K. Morse, his successors and assigns (or his or their heirs, legal representatives, and assigns), to construct, maintain, and operate a bridge across the Delaware River at or near Burlington, N. J.; to the Committee on Interstate and Foreign Commerce.

BILLS PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States for his approval bills of the House of the following titles:

H. R. 48. An act to erect a tablet or marker to the memory of the Federal soldiers who were killed at the Battle of Perryville, and for other purposes;

H. R. 83. An act to approve Act No. 24 of the Session Laws of 1927 of the Territory of Hawaii, entitled "An act to authorize and provide for the manufacture, maintenance, distribution, and supply of electric current for light and power within Hanapepe, in the district of Waimea, island and county of Kauai";

H. R. 482. An act to provide relief for the victims of the airplane accident at Langin Field, Moundsville, W. Va.;

H. R. 3144. An act for the relief of Augustus C. Turner;

H. R. 5925. An act for the relief of the Fidelity & Deposit Co. of Maryland;

H. R. 8281. An act to provide for the withdrawal of certain described lands in the State of Nevada for the use and benefit of the Indians of the Walker River Reservation;

H. R. 8282. An act to provide for the permanent withdrawal of certain lands bordering on and adjacent to Summit Lake, Nev., for the Paiute, Shoshone, and other Indians;

H. R. 8291. An act to amend section 1 of the act of June 25, 1910 (36 Stat. L. 855), "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes";

H. R. 8292. An act to reserve 120 acres on the public domain for the use and benefit of the Koosharem Band of Indians residing in the vicinity of Koosharem, Utah;

H. R. 8527. An act for the relief of the International Petroleum Co. (Ltd.), of Toronto, Canada;

H. R. 9037. An act to provide for the permanent withdrawal of certain lands in Inyo County, Calif., for Indian use; and

H. R. 9994. An act to reimburse certain Indians of the Fort Belknap Reservation, Mont., for part of full value of an allotment of land to which they were individually entitled.

ORDER OF BUSINESS

Mr. GREEN of Iowa. Will the gentleman from Michigan yield to me in order that I may propound a parliamentary inquiry?

Mr. CRAMTON. Yes.

Mr. GREEN of Iowa. Mr. Speaker, I desire, if possible, to call up the conference report on the alien property bill to-day and as early as possible. Will that be in order?

The SPEAKER. The Chair does not think that will be in order on Calendar Wednesday except by unanimous consent.

Mr. GREEN of Iowa. Then, Mr. Speaker, I ask unanimous consent that immediately after the conclusion of the remarks of the gentleman from Michigan I may be permitted to submit the conference report on the alien property bill.

Mr. GARRETT of Tennessee. Mr. Speaker, under the agreement which has been made, would it not be in order to do that after the completion of such business as may be presented to-day by the Committee on Coinage, Weights, and Measures, because the gentleman from Connecticut has secured unanimous consent to dispense with further Calendar Wednesday business after the Committee on Coinage, Weights, and Measures has completed its business?

The SPEAKER. It would be in order after that.

Mr. GREEN of Iowa. Mr. Speaker, I was trying to get in ahead of that.

Mr. GARNER of Texas. Mr. Speaker, reserving the right to object, I certainly have no objection to this conference report coming up at any time, but I understand that the gentleman from Illinois, the chairman of the Appropriations Committee, has an emergency resolution which he would like to call up by unanimous consent. It would not take five minutes to dispose of it, and Texas happens to be intensely interested in that resolution. If the gentleman from Iowa is going to get unanimous consent to call up this conference report, I would like the gentleman from Illinois to ask unanimous consent that he be permitted to call up his resolution immediately after the conclusion of the address of the gentleman from Michigan.

Mr. MADDEN. Mr. Speaker, I make that request.

The SPEAKER. The gentleman from Iowa asks unanimous consent that at the conclusion of the address of the gentleman from Michigan he may be permitted to call up the conference report on the alien property bill, and following that the gentleman from Illinois asks unanimous consent that he may present a resolution.

Mr. MADDEN. For which I will ask immediate consideration.

The SPEAKER. For which he will ask immediate consideration. Is there objection?

Mr. MADDEN. It might be well to have the House know what the resolution is. The committee is recommending $687,800 in the agricultural appropriation bill for next year for the destruction or control of the pink boll weevil. There is a very great emergency in Texas and some of the Southwest States in connection with this pest, and they must act at once. The committee is asking for the passage of a joint resolution that will make $200,000 of the $687,000 available for immediate use,

and then when that item is reached in the bill deduct the $200,000 from the amount carried in the item.

The SPEAKER. Is there objection?

There was no objection.

HON. HERBERT HOOVER

The SPEAKER. The gentleman from Michigan [Mr. CRAMTON] is recognized for 10 minutes.

Mr. CRAMTON. Mr. Speaker and gentlemen of the House, a very interesting address was given to the House yesterday by my friend, the gentleman from Arkansas [Mr. TILLMAN]. I was so unfortunate as not to be here at the time of the address, but I have read it with interest. I noted one statement therein in which the gentleman from Arkansas, one of the most influential members of the Democratic minority in this House, says:

Mr. Speaker, I beg to say that I do not consider it a dignified proceeding for an aspirant to a party presidential nomination to abandon his duties and go on the stump to present his claims.

This statement, of course, could only apply to one of the most prominent candidates for the Democratic nomination, JAMES A. REED, and I shall not take my time to enter into a defense of that prominent Democrat as against another prominent Democrat.

Mr. DYER. Will the gentleman yield?

Mr. CRAMTON. I am sorry I can not yield until I make sure I can say what I have to say. I will then be glad to yield to anyone.

Another statement of the gentleman from Arkansas is this, which is the real text of my remarks:

So I have been disappointed in the attitude of my friend from Michigan, my white-plumed leader among the drys.

I have never claimed any leadership or assumed any. I was not aware that I exercised any. On matters pertaining to the eighteenth amendment and its enforcement it has given me pleasure to contribute anything I could to promote its enforcement through the course of legislation here, and in that I have always found myself side by side with the gentleman from Arkansas [Mr. TILLMAN]; but in yesterday's address I find registered here before the Nation the disappointment of my colleague in that cause; disappointment based upon the fact that he alleges I do not support the one candidate for the Republican nomination that he thinks I ought to support, Senator WILLIS, whom I guarantee under no circumstances would he support. He is disappointed that I seem to incline to the candidacy of Mr. Hoover instead of that of Senator WILLIS. I will say to the gentleman from Arkansas that I, as a Republican and a dry, am in this very fortunate and happy position, which I am sure he must envy me, in that I can view with equanimity the contest for the Republican nomination, because as a consistent dry I can support, I am sure, after his nomination, any candidate now prominent for the Republican nomination. [Applause.]

What the gentleman views as to the Democratic situation I leave for him to contemplate, and I understand why he discusses the Republican contest instead of the Democratic. [Laughter.]

I will extend my remarks to the extent of putting in the statement of Secretary Hoover, which the gentleman from Arkansas has referred to, his reply to the inquiry from Senator BORAH, and which reads as follows:

I feel that the discussion of public questions by reply to questionnaires is likely to be unsatisfactory and ofttimes leads to confusion rather than clarity. Replies to the scores of such inquiries on many questions are impossible.

Out of regard for your known sincerity and your interest in the essential question I will, however, say again that I do not favor the repeal of the eighteenth amendment. I stand, of course, for the efficient, vigorous, and sincere enforcement of the laws enacted thereunder. Whoever is chosen President has under his oath the solemn duty to pursue this course.

Our country has deliberately undertaken a great social and economic experiment, noble in motive and far-reaching in purpose. It must be worked out constructively.

I was prepared to support Secretary Hoover for the nomination without any statement, because a man's character and record are better than campaign statements. [Applause.] And now that the statement has come, I am glad to read it in connection with my knowledge of the man, and his record, and his career, and his character. Himself a total abstainer, officially and personally always giving the weight of his great influence to the enforcement of the law, himself a great executive and a great organizer, I knew without any such statement that he would stand for the eighteenth amendment and its enforcement.

In this statement, which the gentleman from Arkansas belittles and seeks to ridicule, Secretary Hoover says:

Our country has deliberately undertaken a great social and economic experiment, noble in motive and far-reaching in purpose. It must be worked out constructively.

Herbert Hoover, as a great engineer and a great executive, when he uses the word "constructively" means its promotion and its advancement and its development. [Applause.]

If almost any prominent Democratic candidate for the nomination had used this language we would think he had misspoken himself and said "constructively" when he meant "destructively," but with Herbert Hoover he only used the word he meant to use.

Why, I am wondering! The gentleman expresses his disappointment that I am supporting a man that it is now understood, though not a resident of that State, and although he never had a residence in that State, is so strong in that great industrial and agricultural State that no other Republican will contest against him in the primaries; that he will be given the delegation from Michigan by unanimous consent; and so strong in the country that he is now so far out in the lead for the Republican nomination that the Democrats are commencing to shoot at him.

The gentleman expresses wonder that I give my support to him with his record and his declaration against repeal of the eighteenth amendment. I am wondering about the peculiar trouble of my friend from Arkansas, a trouble characteristic of our southern dry Democrats. I say that any prominent Republican candidate for the Presidency, if nominated, I could support whole-heartedly and with enthusiasm, as a dry. Hoover, WILLIS, CURTIS, DAWES, any of them, I could give my support to; but when the Democratic roll is called next November and my good friend from Arkansas, whom I esteem so highly and whom I know as a sincere and active dry—when the roll is called and my friend from Arkansas next November is asked to step up and put his ballot in the box for FRANK WILLIS as the Republican candidate or Al Smith or JIM REED or Governor Ritchie as the Democratic candidate, I wonder if my friend will go to the polls at all to vote. [Laughter and applause.] Certainly, he would not dare tell this House how he would vote in that kind of a dilemma.

Mr. SPEAKS. Will the gentleman from Michigan yield?

Mr. CRAMTON. If I have the time.

Mr. SPEAKS. I want to inquire whether the gentleman from Michigan considers the eighteenth amendment and the Volstead law as mere experimental undertakings subject to doubts as to their permanency?

Mr. CRAMTON. I would not use the word "mere." I have repeatedly referred to it as the great American experiment. [Applause.] Something the world has been wanting done but no other nation has ever been able to do it. We are trying to do it and we are going to make a success of it.

Mr. SPEAKS. Will the gentleman yield for another question? I want to say to the gentleman from Michigan that he has an entirely different conception——

Mr. CRAMTON. I am yielding only for a question, and I can not yield for a speech.

Mr. SPEAKS. Then I will ask the gentleman a question. Does the gentleman understand that the eighteenth amendment and the Volstead law instead of being a mere experiment represents the well-matured judgment and conclusions on the prohibition question by the people of the United States following a century of discussion and effort to attain the desired end and that the term "experiment" is no longer applicable to the subject?

Mr. CRAMTON. I know this: That the well-matured judgment of Ohio when they first adopted prohibition in 1918, statewide, then gave only a small majority if I remember right, something like 25,000. After that experience with it for several years a vote was taken in 1922 to permit the sale of beer and wine. That was rejected by a majority several times as large as the first one, 189,000, and only 7 counties in all, out of 88 in that State, gave any wet majority whatever.

Mr. SPEAKS. In order that the House may understand——

The SPEAKER. The time of the gentleman from Michigan has expired.

CONFERENCE REPORT ON ALIEN PROPERTY BILL

Mr. GREEN of Iowa. Mr. Speaker, pursuant to the unanimous request heretofore granted, I call up the conference report on the bill H. R. 7201, the alien property bill, and I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. The gentleman from Iowa asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was no objection.

Mr. GREEN of Iowa. Pending that, Mr. Speaker, I ask unanimous consent to address the House for five minutes on the general subject before the statement is read.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. GREEN of Iowa. Mr. Speaker and gentlemen of the House, I think Members of the House, regardless of whether they would have written this report and the bill in exactly the form presented, will agree with me in experiencing a sense of relief at the disposition of one of the most perplexing and difficult problems that has ever been presented to Congress by the agreement on the alien property bill.

The main features, in fact all the basic features of the original House bill have been preserved in the bill now presented to you as a result of the conference report. While it has been changed in many details, there is not a change in any essential feature of the bill reported by the House committee.

As soon as the bill gets in operation the Germans are to receive 80 per cent and the Americans 80 per cent of their claims. The American claims that do not exceed $100,000 and all death claims are to be paid at once. The American claims are to be paid in six years and the balance of the German claims will be made in payments through a period of about 25 years.

There are two principal changes made by the conference report, and I ask your attention to the reading of the statement, as it is much shorter than the report.

In the first place, the Senate strikes out the statement of policy that was in the House bill. I regretted to see this done, but it seemed impossible to get an agreement otherwise, and it has nothing to do with the features of the bill itself.

The next most important change was the fact that provision is made in the bill to take care of the Austrian and Hungarian claims. Provision is made for the settlement of American claims against these nations, and requirement is made that the Austrian Government shall deposit the money to take care of these claims before any money is paid out on the Austrian-Hungarian claims. The reason it was not put in the House bill was because the State Department was conducting negotiations with the Austrian and Hungarian Governments in order to establish a satisfactory basis upon which they could get into an arrangement with them.

The other matters are matters of detail. There is a provision with reference to special claims which has been modified by the conference committee, and requires that the German claimants shall show at the time the ships were taken that neither the German Emperor nor any of the ruling family—kings of divisions of the Empire—had any interest in those ships at the time they were taken. If so, then the provision is made that their interests is to be deducted.

With this preliminary statement I ask that the statement of the conferees be read.

The SPEAKER. The Clerk will read the statement.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 7201) to provide for the settlement of certain claims of American nationals against Germany and of German nationals against the United States, for the ultimate return of all property of German nationals held by the Alien Property Custodian, and for the equitable apportionment among all claimants of certain available funds, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"That this act may be cited as the 'settlement of war claims act of 1928.'

CLAIMS OF NATIONALS OF THE UNITED STATES AGAINST GERMANY

"SEC. 2 (a) The Secretary of State shall, from time to time, certify to the Secretary of the Treasury the awards of the Mixed Claims Commission, United States and Germany, established in pursuance of the agreement of August 10, 1922, between the United States and Germany (referred to in this act as the 'Mixed Claims Commission').

"(b) The Secretary of the Treasury is authorized and directed to pay an amount equal to the principal of each award so certified, plus the interest thereon, in accordance with the award, accruing before January 1, 1928.

"(c) The Secretary of the Treasury is authorized and directed to pay annually (as nearly as may be) simple interest, at the rate of 5 per cent per annum, upon the amounts payable under subsection (b) and remaining unpaid, beginning January 1, 1928, until paid.

"(d) The payments authorized by subsection (b) or (c) shall be made in accordance with such regulations as the Secretary of the Treasury may prescribe, but only out of the German special deposit account created by section 4, within the limitations hereinafter prescribed, and in the order of priority provided in subsection (c) of section 4.

"(e) There shall be deducted from the amount of each payment, as reimbursement for the expenses incurred by the United States in respect thereof, an amount equal to one-half of 1 per cent thereof. The amount so deducted shall be deposited in the Treasury as miscellaneous receipts. In computing the amounts payable under subsection (c) of section 4 (establishing the priority of payments) the fact that such deduction is required to be made from the payment when computed or that such deduction has been made from prior payments, shall be disregarded.

"(f) The amounts awarded to the United States in respect of claims of the United States on its own behalf shall not be payable under this section.

"(g) No payment shall be made under this section unless application therefor is made, within two years after the date of the enactment of this act, in accordance with such regulations as the Secretary of the Treasury may prescribe. Payment shall be made only to the person on behalf of whom the award was made, except that—

"(1) If such person is deceased or is under a legal disability, payment shall be made to his legal representative, except that if the payment is not over $500 it may be made to the persons found by the Secretary of the Treasury to be entitled thereto, without the necessity of compliance with the requirements of law in respect of the administration of estates;

"(2) In the case of a partnership, association, or corporation, the existence of which has been terminated, payment shall be made, except as provided in paragraphs (3) and (4), to the persons found by the Secretary of the Treasury to be entitled thereto;

"(3) If a receiver or trustee for the person on behalf of whom the award was made has been duly appointed by a court in the United States and has not been discharged prior to the date of payment, payment shall be made to the receiver or trustee or in accordance with the order of the court; and

"(4) In the case of an assignment of an award, or an assignment (prior to the making of the award) of the claim in respect of which the award was made, by a receiver or trustee for any such person, duly appointed by a court in the United States, such payment shall be made to the assignee.

"(h) Nothing in this section shall be construed as the assumption of a liability by the United States for the payment of the awards of the Mixed Claims Commission, nor shall any payment under this section be construed as the satisfaction, in whole or in part, of any of such awards, or as extinguishing or diminishing the liability of Germany for the satisfaction in full of such awards, but shall be considered only as an advance by the United States until all the payments from Germany in satisfaction of the awards have been received. Upon any payment under this section of an amount in respect of an award, the rights in respect of the award and of the claim in respect of which the award was made shall be held to have been assigned pro tanto to the United States, to be enforced by and on behalf of the United States against Germany, in the same manner and to the same extent as such rights would be enforced on behalf of the American national.

"(i) Any person who makes application for payment under this section shall be held to have consented to all the provisions of this act.

"(j) The President is requested to enter into an agreement with the German Government by which the Mixed Claims Commission will be given jurisdiction of and authorized to decide claims of the same character as those of which the commission now has jurisdiction, notice of which is filed with the Department of State before July 1, 1928. If such agreement is entered into before January 1, 1929, awards in respect of such claims shall be certified under subsection (a) and shall be in all other respects subject to the provisions of this section.

CLAIMS OF GERMAN NATIONALS AGAINST UNITED STATES

"SEC. 3. (a) There shall be a war claims arbiter (hereinafter referred to as the "arbiter") who shall be appointed by

the President, by and with the advice and consent of the Senate, without regard to any provision of law prohibiting the holding of more than one office. The arbiter, notwithstanding any other provision of law, shall receive a salary to be fixed by the President in an amount, if any, which if added to any other salary will make his total salary from the United States not in excess of $15,000 a year.

"(b) It shall be the duty of the arbiter, within the limitations hereinafter prescribed, to hear the claims of any German national (as hereinafter defined), and to determine the fair compensation to be paid by the United States, in respect of—

"(1) Any merchant vessel (including any equipment, appurtenances and property contained therein), title to which was taken by or on behalf of the United States under the authority of the joint resolution of May 12, 1917 (40 Stat. 75). Such compensation shall be the fair value, as nearly as may be determined, of such vessel to the owner immediately prior to the time exclusive possession was taken under the authority of such joint resolution, and in its condition at such time, taking into consideration the fact that such owner could not use or permit the use of such vessel, or charter or sell or otherwise dispose of such vessel for use or delivery, prior to the termination of the war, and that the war was not terminated until July 2, 1921, except that there shall be deducted from such value any consideration paid for such vessel by the United States. The findings of the board of survey appointed under the authority of such joint resolution shall be competent evidence in any proceeding before the arbiter to determine the amount of such compensation.

"(2) Any radio station (including any equipment, appurtenances, and property contained therein) which was sold to the United States by or under the direction of the Alien Property Custodian under authority of the trading with the enemy act, or any amendment thereto. Such compensation shall be the fair value, as nearly as may be determined, which such radio station would have had on July 2, 1921, if returned to the owner on such date in the same condition as on the date on which it was seized by or on behalf of the United States, or on which it was conveyed or delivered to, or seized by, the Alien Property Custodian, whichever date is earlier, except that there shall be deducted from such value any consideration paid for such radio station by the United States.

"(3) Any patent (or any right therein or claim thereto, and including an application therefor and any patent issued pursuant to any such application) which was licensed, assigned, or sold by the Alien Property Custodian to the United States. Such compensation shall be the amount, as nearly as may be determined, which would have been paid if such patent, right, claim, or application had been licensed, assigned, or sold to the United States by a citizen of the United States, except that there shall be deducted from such amount any consideration paid therefor by the United States (other than consideration which is returned to the United States under section 27 of the trading with the enemy act, as amended).

"(4) The use by or for the United States of any invention described in and covered by any patent (including an application therefor and any patent issued pursuant to any such application) which was conveyed, transferred, or assigned to, or seized by, the Alien Property Custodian, but not including any use during any period between April 6, 1917, and November 11, 1918, both dates inclusive, or on or after the date on which such patent was licensed, assigned, or sold by the Alien Property Custodian. In determining such compensation, any defense, general or special, available to a defendant in an action for infringement or in any suit in equity for relief against an alleged infringement, shall be available to the United States.

"(c) The proceedings of the arbiter under this section shall be conducted in accordance with such rules of procedure as he may prescribe. The arbiter, or any referee designated by him, is authorized to administer oaths, to hold hearings at such places within or without the United States as the arbiter deems necessary, and to contract for the reporting of such hearings. Any witness appearing for the United States before the arbiter or any such referee at any place within or without the United States may be paid the same fees and mileage as witnesses in courts of the United States. Such payments shall be made out of any funds in the German special deposit account hereinafter provided for, and may be made in advance.

"(d) The arbiter may, from time to time, and shall, upon the determination by him of the fair compensation in respect of all such vessels, radio stations, and patents, make a tentative award to each claimant of the fair compensation to be paid in respect of his claim, including simple interest, at the rate of 5 per cent per annum, on the amount of such compensation from July 2, 1921, to December 31, 1928, both dates inclusive. If a German national filing a claim in respect of any such vessel fails to establish to the satisfaction of the arbiter that neither the German Government nor any member of the former ruling family had, at the time of the taking, any interest in such vessel, either directly or indirectly, through stock ownership or control or otherwise, then (whether or not claim has been filed by or on behalf of such Government or individual) no award shall be made to such German national unless and until the extent of such interest of the German Government and of the members of the former ruling family has been determined by the arbiter. Upon such determination the arbiter shall make a tentative award in favor of such Government or individual in such amount as the arbiter determines to be in justice and equity representative of such interest, and reduce accordingly the amount available for tentative awards to German nationals filing claims in respect of the vessel so that the aggregate of the tentative awards (including awards on behalf of the German Government and members of the former ruling family) in respect of the vessel will be within the amount of fair compensation determined under subsection (b) of this section.

"(e) The total amount to be awarded under this section shall not exceed $100,000,000, minus the sum of (1) the expenditures in carrying out the provisions of this section (including a reasonable estimate for such expenditures to be incurred prior to the expiration of the term of office of the arbiter) and (2) the aggregate consideration paid by the United States in respect of the acquisition of such vessels and radio stations, and the use, license, assignment, and sale of such patents (other than consideration which is returned to the United States under section 27 of the trading with the enemy act, as amended).

"(f) If the aggregate amount of the tentative awards exceeds the amount which may be awarded under subsection (e), the arbiter shall reduce pro rata the amount of each tentative award. The arbiter shall enter an award of the amount to be paid each claimant, and thereupon shall certify such awards to the Secretary of the Treasury.

"(g) The Secretary of the Treasury is authorized and directed to pay the amount of the awards certified under subsection (f).

"(h) The Secretary of the Treasury is authorized and directed to pay annually (as nearly as may be) simple interest, at the rate of 5 per cent per annum, upon the amount of any such award remaining unpaid, beginning January 1, 1929, until paid.

"(i) The payments in respect of awards under this section shall be made in accordance with such regulations as the Secretary of the Treasury may prescribe, but only out of the German special deposit account created by section 4, within the limitations hereinafter prescribed, and in the order of priority provided in subsections (c) and (d) of section 4.

"(j) The Secretary of the Treasury shall not pay any amount in respect of any award made to or on behalf of the German Government or any member of the former ruling family, but the amount of any such award shall be credited upon the final payment due the United States from the German Government for the purpose of satisfying the awards of the Mixed Claims Commission.

"(k) No payment shall be made under this section unless application therefor is made, within two years after the date the award is certified, in accordance with such regulations as the Secretary of the Treasury may prescribe. Payment of any amount in respect of any award may be made, in the discretion of the Secretary of the Treasury, either in the United States or in Germany, and either in money of the United States or in lawful German money, and shall be made only to the person on behalf of whom the award was made, except that—

"(1) If such person is deceased or is under a legal disability, payment shall be made to his legal representative, except that if the payment is not over $500 it may be made to the persons found by the Secretary of the Treasury to be entitled thereto, without the necessity of compliance with the requirements of law in respect of the administration of estates;

"(2) In the case of a partnership, association, or corporation, the existence of which has been terminated, payment shall be made, except as provided in paragraphs (3) and (4), to the persons found by the Secretary of the Treasury to be entitled thereto;

"(3) If a receiver or trustee for the person on behalf of whom the award was made has been duly appointed by a court of competent jurisdiction and has not been discharged prior to the date of payment, payment shall be made to the receiver or trustee or in accordance with the order of the court; and

"(4) In the case of an assignment of an award, or of an assignment—prior to the making of the award—of the claim in respect of which such award was made, by a receiver or trustee for any such person, duly appointed by a court of competent jurisdiction, payment shall be made to the assignee.

"(l) The head of any executive department, independent establishment, or agency in the executive branch of the Government, including the Alien Property Custodian and the Comptroller General, shall, upon request of the arbiter, furnish such records, documents, papers, correspondence, and information in the possession of such department, independent establishment, or agency as may assist the arbiter, furnish them statements and assistance of the same character as is described in section 188 of the Revised Statutes, and may temporarily detail any officers or employees of such department, independent establishment, or agency to assist the arbiter, or to act as a referee, in carrying out the provisions of this section. The Attorney General shall assign such officers and employees of the Department of Justice as may be necessary to represent the United States in the proceedings under this section.

"(m) The arbiter, with the approval of the Secretary of the Treasury, is authorized to (1) appoint and fix the salaries of such officers, referees, and employees, without regard to the civil service laws and regulations or to the classification act of 1923, and (2) make such expenditures—including expenditures for the salary of the arbiter, rent, and personal services at the seat of government and elsewhere, law books, periodicals, books of reference, and printing and binding—as may be necessary for carrying out the provisions of this section and within the funds available therefor. Any officer or employee detailed or assigned under subsection (l) shall be entitled to receive—notwithstanding any provision of law to the contrary—such additional compensation as the arbiter, with the approval of the Secretary of the Treasury, may prescribe. The arbiter and officers and employees appointed, detailed, or assigned shall be entitled to receive their necessary traveling expenses and actual expenses incurred for subsistence—without regard to any limitations imposed by law—while away from the District of Columbia on business required by this section.

"(n) On the date on which the awards are certified to the Secretary of the Treasury under subsection (f) or the date on which the awards are certified to the Secretary of the Treasury under subsection (e) of section 6 (patent claims of Austrian and Hungarian nationals), whichever date is the later, the terms of office of the arbiter, and of the officers and employees appointed by the arbiter, shall expire, and the books, papers, records, correspondence, property, and equipment of the office shall be transferred to the Department of the Treasury.

"(o) No award or tentative award shall be made by the arbiter in respect of any claim if (1) such claim is filed after the expiration of four months from the date on which the arbiter takes office, or (2) any judgment or decree awarding compensation or damages in respect thereof has been rendered against the United States, and if such judgment or decree has become final (whether before or after the enactment of this act), or (3) any suit or proceeding against the United States, or any agency thereof, is commenced or is pending in respect thereof and is not dismissed upon motion of the person by or on behalf of whom it was commenced, made before the expiration of six months from the date on which the arbiter takes office and before any judgment or decree awarding compensation or damages becomes final.

"(p) There is hereby authorized to be appropriated, to be immediately available and to remain available until expended, the sum of $50,000,000, and, after the date on which the awards of the arbiter under this section are certified to the Secretary of the Treasury, such additional amounts as, when added to the amounts previously appropriated, will be equivalent to the aggregate amount of such awards plus the amounts necessary for the expenditures authorized by subsections (c) and (m) of this section (expenses of administration), except that the aggregate of such appropriations shall not exceed $100,000,000.

"(q) The provisions of this section shall constitute the exclusive method for the presentation and payment of claims arising out of any of the acts by or on behalf of the United States for which this section provides a remedy. Any person who files any claim or makes application for any payment under this section shall be held to have consented to all the provisions of this act. This subsection shall not bar the presentation of a claim under section 21 (relating to the claims of certain former German nationals in respect of the taking of the vessels *Carl Diederichsen* and *Johanne*); but no award shall be made under section 21 in respect of either of such vessels to or on behalf of any person to whom or on whose behalf an award is made under this section in respect of such vessel.

"(r) If the aggregate amount to be awarded in respect of any vessel, radio station, or patent is awarded in respect of two or more claims, such amount shall be apportioned among such claims by the arbiter as he determines to be just and equitable and as the interests of the claimants may appear.

"(s) The Secretary of the Treasury, upon the certification of any of the tentative awards made under subsection (d) of this section and the recommendation of the arbiter, may make such pro rata payments in respect of such tentative awards as he deems advisable, but the aggregate of such payments shall not exceed $25,000,000.

GERMAN SPECIAL DEPOSIT ACCOUNT

"SEC. 4. (a) There is hereby created in the Treasury a German special deposit account, into which shall be deposited all funds hereinafter specified and from which shall be disbursed all payments authorized by section 2 or 3, including the expenses of administration authorized under subsections (c) and (m) of section 3 and subsection (e) of this section.

"(b) The Secretary of the Treasury is authorized and directed to deposit in such special deposit account—

"(1) All sums invested or transferred by the Alien Property Custodian, under the provisions of section 25 of the trading with the enemy act, as amended;

"(2) The amounts appropriated under the authority of section 3 (relating to claims of German nationals); and

"(3) All money (including the proceeds of any property, rights, or benefits which may be sold or otherwise disposed of, upon such terms as he may prescribe) received, whether before or after the enactment of this act, by the United States in respect of claims of the United States agaisnt Germany on account of the awards of the Mixed Claims Commission.

"(c) The Secretary of the Treasury is authorized and directed, out of the funds in such special deposit account, subject to the provisions of subsection (d), and in the following order of priority—

"(1) To make the payments of expenses of administration authorized by subsections (c) and (m) of section 3 or subsection (e) of this section;

"(2) To make so much of each payment authorized by subsection (b) of section 2 (relating to awards of the Mixed Claims Commission), as is attributable to an award on account of death or personal injury, together with interest thereon as provided in subsection (c) of section 2;

"(3) To make each payment authorized by subsection (b) of section 2 (relating to awards of the Mixed Claims Commission), if the amount thereof is not payable under paragraph (2) of this subsection and does not exceed $100,000, and to pay interest thereon as provided in subsection (c) of section 2;

"(4) To pay the amount of $100,000 in respect of each payment authorized by subsection (b) of section 2 (relating to awards of the Mixed Claims Commission), if the amount of such authorized payment is in excess of $100,000 and is not payable in full under paragraph (2) of this subsection. No person shall be paid under this paragraph and paragraph (3) an amount in excess of $100,000 (exclusive of interest beginning January 1, 1928), irrespective of the number of awards made on behalf of such person;

"(5) To make additional payments authorized by subsection (b) of section 2 (relating to awards of the Mixed Claims Commission), in such amounts as will make the aggregate payments (authorized by such subsection) under this paragraph and paragraphs (2), (3), and (4) of this subsection equal to 80 per cent of the aggregate amount of all payments authorized by subsection (b) of section 2. Payments under this paragraph shall be prorated on the basis of the amount of the respective payments authorized by subsection (b) of section 2 and remaining unpaid. Pending the completion of the work of the Mixed Claims Commission, the Secretary of the Treasury is authorized to pay such installments of the payments authorized by this paragraph as he determines to be consistent with prompt payment under this paragraph to all persons on behalf of whom claims have been presented to the commission;

"(6) To pay amounts determined by the Secretary of the Treasury to be payable in respect of the tentative awards of the arbiter, in accordance with the provisions of subsection (s) of section 3 (relating to awards for ships, patents, and radio stations);

"(7) To pay to German nationals such amounts as will make the aggregate payments equal to 50 per cent of the amounts awarded under section 3 (on account of ships, patents, and radio stations). Payments authorized by this paragraph or paragraphs (6) may, to the extent of funds available under the provisions of subsection (d) of this section, be made whether or not the payments under paragraphs (1) to (5), inclusive, of this subsection have been completed;

"(8) To pay accrued interest upon the participating certificates evidencing the amounts invested by the Alien Property Custodian under subsection (a) of section 25 of the trading with the enemy act, as amended (relating to the investment of 20 per cent of German property temporarily withheld);

"(9) To pay the accrued interest payable under subsection (c) of section 2 (in respect of awards of the Mixed Claims Commission) and subsection (h) of section 3 (in respect of awards to German nationals);

"(10) To make such payments as are necessary (A) to repay the amounts invested by the Alien Property Custodian under subsection (a) of section 25 of the trading with the enemy act, as amended (relating to the investment of 20 per cent of German property temporarily withheld), (B) to pay amounts equal to the difference between the aggregate payments (in respect of claims of German nationals) authorized by subsections (g) and (h) of section 3 and the amounts previously paid in respect thereof, and (C) to pay amounts equal to the difference between the aggregate payments (in respect of awards of the Mixed Claims Commission) authorized by subsections (b) and (c) of section 2, and the amounts previously paid in respect thereof. If funds available are not sufficient to make the total payments authorized by this paragraph, the amount of payments made from time to time shall be apportioned among the payments authorized under clauses (A), (B), and (C) according to the aggregate amount remaining unpaid under each clause;

"(11) To make such payments as are necessary to repay the amounts invested by the Alien Property Custodian under subsection (b) of section 25 of the trading with the enemy act, as amended (relating to the investment of the unallocated interest fund); but the amount payable under this paragraph shall not exceed the aggregate amount allocated to the trusts described in subsection (c) of section 26 of such act;

"(12) To pay into the Treasury as miscellaneous receipts the amount of the awards of the Mixed Claims Commission to the United States on its own behalf on account of claims of the United States against Germany; and

"(13) To pay into the Treasury as miscellaneous receipts any funds remaining in the German special deposit account after the payments authorized by paragraphs (1) to (12) have been completed.

"(d) Fifty per cent of the amounts appropriated under the authority of section 3 (relating to claims of German nationals) shall be available for payments under paragraphs (6) and (7) of subsection (c) of this section (relating to such claims) and shall be available only for such payments until such time as the payments authorized by such paragraphs have been completed.

"(e) The Secretary of the Treasury is authorized to pay, from funds in the German special deposit account, such amounts, not in excess of $25,000 per annum, as may be necessary for the payment of the expenses in carrying out the provisions of this section and section 25 of the trading with the enemy act, as amended (relating to the investment of funds by the Alien Property Custodian), including personal services at the seat of government.

"(f) The Secretary of the Treasury is authorized to invest and reinvest, from time to time, in bonds, notes, or certificates of indebtedness of the United States any of the funds in the German special deposit account, and to deposit to the credit of such account the interest or other earnings thereon.

"(g) There shall be deducted from the amounts first payable under this section to any American national in respect of any debt the amount, if any, paid by the Alien Property Custodian in respect of such debt which was not credited by the Mixed Claims Commission in making its award.

CLAIMS OF UNITED STATES AND ITS NATIONALS AGAINST AUSTRIA AND HUNGARY

"SEC. 5. (a) The Commissioner of the Tripartite Claims Commission (hereinafter referred to as the "commissioner") selected in pursuance of the agreement of November 26, 1924, between the United States and Austria and Hungary shall, from time to time, certify to the Secretary of the Treasury the judgments and interlocutory judgments (hereinafter referred to as "awards") of the commissioner.

"(b) The Secretary of the Treasury is authorized and directed to pay (1) in the case of any such judgment, an amount equal to the principal thereof, plus the interest thereon in accordance with such judgment, and (2) in the case of any such interlocutory judgment, an amount equal to the principal thereof (converted at the rate of exchange specified in the certificate of the commissioner provided for in section 7), plus the interest thereon in accordance with such certificate.

"(c) The payments authorized by subsection (b) shall be made in accordance with such regulations as the Secretary of the Treasury may prescribe, but only out of the special deposit account (Austrian or Hungarian, as the case may be), created by section 7, and within the limitations hereinafter prescribed.

"(d) There shall be deducted from the amount of each payment, as reimbursement for expenses incurred by the United States in respect thereof, an amount equal to one-half of 1 per cent thereof. The amount so deducted shall be deposited in the Treasury as miscellaneous receipts.

"(e) The amounts awarded to the United States in respect of claims of the United States on its own behalf shall be payable under this section.

"(f) No payment shall be made under this section (other than payments to the United States in respect of claims of the United States on its own behalf) unless application therefor is made within two years after the date of the enactment of this act in accordance with such regulations as the Secretary of the Treasury may prescribe. Payment shall be made only to the person on behalf of whom the award was made except in the cases specified in paragraphs (1) to (4) of subsection (g) of section 2.

"(g) Any person who makes application for payment under this section shall be held to have consented to all the provisions of this act.

CLAIMS OF AUSTRIAN AND HUNGARIAN NATIONALS AGAINST THE UNITED STATES

"SEC. 6. (a) It shall be the duty of the arbiter, within the limitations hereinafter prescribed, to hear the claims of any Austrian or Hungarian national (as hereinafter defined) and to determine the compensation to be paid by the United States, in respect of—

"(1) Any patent (or any right therein or claim thereto, and including an application therefor and any patent issued pursuant to any such application) which was licensed, assigned, or sold by the Alien Property Custodian to the United States. Such compensation shall be the amount, as nearly as may be determined, which would have been paid if such patent, right, claim, or application had been licensed, assigned, or sold to the United States by a citizen of the United States, except that there shall be deducted from such amount any consideration paid therefor by the United States (other than consideration which is returned to the United States under section 27 of the trading with the enemy act, as amended).

"(2) The use by or for the United States of any invention described in and covered by any patent (including an application therefor and any patent issued pursuant to any such application) which was conveyed, transferred, or assigned to, or seized by the Alien Property Custodian, but not including any use during any period between December 7, 1917, and November 3, 1918, both dates inclusive, or on or after the date on which such patent was licensed, assigned, or sold by the Alien Property Custodian. In determining such compensation, any defense, general or special available to a defendant in an action for infringement or in any suit in equity for relief against an alleged infringement, shall be available to the United States.

"(b) The proceedings of the arbiter under this section shall be conducted in accordance with such rules of procedure as he may prescribe. The arbiter, or any referee designated by him, is authorized to administer oaths, to hold hearings at such places within or without the United States as the arbiter deems necessary, and to contract for the reporting of such hearings. Any witness appearing for the United States before the arbiter or any such referee at any place within or without the United States may be paid the same fees and mileage as witnesses in courts of the United States. Such payments may be made in advance, and may be made in the first instance out of the German special deposit account, subject to reimbursement from the special deposit account (Austrian or Hungarian as the case may be) hereinafter provided for.

"(c) The arbiter shall, upon the determination by him of the fair compensation in respect of all such patents, make a tentative award to each claimant of the fair compensation to be paid in respect of his claim, including simple interest, at the rate of 5 per cent per annum, on the amount of such compensation from July 2, 1921, to December 31, 1928, both dates inclusive.

"(d) The total amount to be awarded under this section shall not exceed $1,000,000, minus the sum of (1) the expenditures in carrying out the provisions of this section (including a reasonable estimate for such expenditures to be incurred prior to the expiration of the term of office of the arbiter) and (2) the aggregate consideration paid by the United States in respect of the use, license, assignment, and sale of such patents (other than consideration which is returned to the United States under section 27 of the trading with the enemy act, as amended).

"(e) If the aggregate amount of the tentative awards exceeds the amount which may be awarded under subsection (d), the arbiter shall reduce pro rata the amount of each tentative award. The arbiter shall enter an award of the amount to be paid each claimant, and thereupon shall certify such awards to the Secretary of the Treasury.

"(f) The Secretary of the Treasury is authorized and directed to pay the amount of the awards certified under sub-

section (e), together with simple interest thereon, at the rate of 5 per cent per annum, beginning January 1, 1929, until paid.

"(g) The payments authorized by subsection (f) shall be made in accordance with such regulations as the Secretary of the Treasury may prescribe, but only out of the special deposit account (Austrian or Hungarian, as the case may be), created by section 7, and within the limitations hereinafter prescribed.

"(h) No payment shall be made under this section unless application therefor is made, within two years after the date the award is certified, in accordance with such regulations as the Secretary of the Treasury may prescribe. Payment of any amount in respect of any award may be made, in the discretion of the Secretary of the Treasury, either in the United States or in Austria or in Hungary, and either in money of the United States or in lawful Austrian or Hungarian money (as the case may be), and shall be made only to the person on behalf of whom the award was made, except in the cases specified in paragraphs (1) to (4) of subsection (k) of section 3.

"(i) The provisions of subsections (l), (m), and (o) of section 3 shall be applicable in carrying out the provisions of this section, except that the expenditures in carrying out the provisions of section 3 and this section shall be allocated (as nearly as may be) by the arbiter and paid, in accordance with such allocation, out of the German special deposit account created by section 4 or the special deposit account (Austrian or Hungarian, as the case may be) created by section 7. Such payments may be made in the first instance out of the German special deposit account, subject to reimbursement from the Austrian or the Hungarian special deposit account in appropriate cases.

"(j) There is hereby authorized to be appropriated, to remain available until expended, such amount, not in excess of $1,000,000, as may be necessary for carrying out the provisions of this section.

"(k) The provisions of this section shall constitute the exclusive method for the presentation and payment of claims arising out of any of the acts by or on behalf of the United States for which this section provides a remedy. Any person who files any claim or makes application for any payment under this section shall be held to have consented to all the provisions of this act.

"(l) If the aggregate amount to be awarded in respect of any patent is awarded in respect of two or more claims, such amount shall be apportioned among such claims by the arbiter as he determines to be just and equitable and as the interests of the claimants may appear.

AUSTRIAN AND HUNGARIAN SPECIAL DEPOSIT ACCOUNTS

"SEC. 7. (a) There are hereby created in the Treasury an Austrian special deposit account and an Hungarian special deposit account, into which, respectively, shall be deposited all funds hereinafter specified and from which, respectively, shall be disbursed all payments and expenditures authorized by section 5 or 6 or this section.

"(b) The Secretary of the Treasury is authorized and directed to deposit in the Austrian or the Hungarian special deposit account, as the case may be—

"(1) The respective amounts appropriated under the authority of section 6 (patent claims of Austrian and Hungarian nationals);

"(2) The respective sums transferred by the Alien Property Custodian, under the provisions of subsection (g) of section 25 of the trading with the enemy act, as amended (property of Austrian and Hungarian Governments);

"(3) All money (including the proceeds of any property, rights, or benefits which may be sold or otherwise disposed of, upon such terms as he may prescribe) received, whether before or after the enactment of this act, by the United States in respect of claims of the United States against Austria or Hungary, as the case may be, on account of awards of the commissioner.

"(c) The Secretary of the Treasury is authorized and directed, out of the funds in the Austrian or the Hungarian special deposit account, as the case may be, subject to the provisions of subsections (d) and (e)—

"(1) To make the payments of expenses of administration authorized by section 6 or this section;

"(2) To make the payments authorized by subsection (b) of section 5 (relating to awards of the Tripartite Claims Commission); and

"(3) To make the payments of the awards of the arbiter, together with interest thereon, as provided by section 6 (relating to claims of Austrian and Hungarian nationals).

"(d) No payment shall be made in respect of any award of the commissioner against Austria or of the arbiter on behalf of an Austrian national, nor shall any money or other property be returned under paragraph (15), (17), (18), or (19) of subsection (b) of section 9 of the trading with the enemy act, as amended (relating to the return of money and other property by the Alien Property Custodian to Austrian nationals), prior to the date upon which the commissioner certifies to the Secretary of the Treasury—

"(1) That the amounts deposited in the Austrian special deposit account under paragraph (2) of subsection (b) of this section (in respect of property of the Austrian Government or property of a corporation all the stock of which was owned by the Austrian Government) and under paragraph (3) of subsection (b) of this section (in respect of money received by the United States in respect of claims of the United States against Austria on account of awards of the commissioner) are sufficient to make the payments authorized by subsection (b) of section 5 in respect of awards against Austria; and

"(2) In respect of interlocutory judgments entered by the commissioner, the rate of exchange at which such interlocutory judgments shall be converted into money of the United States and the rate of interest applicable to such judgments and the period during which such interest shall run. The commissioner is authorized and requested to fix such rate of exchange and interest as he may determine to be fair and equitable, and to give notice thereof, within 30 days after the enactment of this act.

"(e) No payment shall be made in respect of any award of the commissioner against Hungary or of the arbiter on behalf of an Hungarian national, nor shall any money or other property be returned under paragraph (15), (20), (21), or (22) of subsection (b) of section 9 of the trading with the enemy act, as amended by this act (relating to the return of money and other property by the Alien Property Custodian to Hungarian nationals), prior to the date upon which the commissioner certifies to the Secretary of the Treasury—

"(1) That the amounts deposited in the Hungarian special deposit account under paragraph (2) of subsection (b) of this section (in respect of property of the Hungarian Government or property of a corporation all the stock of which was owned by the Hungarian Government) and under paragraph (3) of subsection (b) of this section (in respect of money received by the United States in respect of claims of the United States against Hungary on account of awards of the commissioner), are sufficient to make the payments authorized by subsection (b) of section 5 in respect of awards against Hungary; and

"(2) In respect of interlocutory judgments entered by the commissioner, the rate of exchange at which such interlocutory judgments shall be converted into money of the United States and the rate of interest applicable to such judgments and the period during which such interest shall run. The commissioner is authorized and requested to fix such rate of exchange and interest as he may determine to be fair and equitable, and to give notice thereof, within 30 days after the enactment of this act.

"(f) Amounts available under subsection (e) of section 4 (relating to payment of expenses of administration) shall be available for the payment of expenses in carrying out the provisions of this section, including personal services at the seat of Government.

"(g) The Secretary of the Treasury is authorized to invest and reinvest, from time to time, in bonds, notes, or certificates of indebtedness of the United States, any of the funds in the Austrian or the Hungarian special deposit account, and to deposit to the credit of such account the interest or other earnings thereon.

"(h) There shall be deducted from the amounts first payable under this section to any American national in respect of any debt the amount, if any, paid by the Alien Property Custodian in respect of such debt which was not credited by the commissioner in making his award.

"(i) The payments of the awards of the commissioner to the United States on its own behalf, on account of claims of the United States against Austria or Hungary, shall be paid into the Treasury as miscellaneous receipts.

"(j) Any amount remaining in the Austrian or the Hungarian special deposit account after all the payments authorized to be made therefrom have been completed shall be disposed of as follows:

"(1) There shall first be paid into the Treasury as miscellaneous receipts the respective amount, if any, by which the appropriations made under the authority of section 6 and deposited in such special deposit account exceed the payments authorized by such section; and

"(2) The remainder shall be refunded to Austria or Hungary, as their respective interests may appear.

FINALITY OF DECISIONS

"SEC. 8. (a) Notwithstanding the provisions of section 236 of the Revised Statutes, as amended, the decisions of the Secretary of the Treasury in respect of the funds to be paid into the German, the Austrian, or the Hungarian special deposit account and of the payments therefrom shall be final and conclusive and shall not be subject to review by any other officer of the United States, except that payments made under authority of subsection (c) or (m) of section 3 or subsection (e) of section 4 or subsection (f) of section 7 (relating to expenses of administration) shall be accounted for and settled without regard to the provisions of this subsection.

"(b) The Secretary of the Treasury, in his annual report to the Congress, shall include a detailed statement of all expenditures made in carrying out the provisions of this act.

EXCESSIVE FEES PROHIBITED

"SEC. 9. (a) The arbiter, the Commissioner of the Mixed Claims Commission appointed by the United States, and the Commissioner of the Tripartite Claims Commission, respectively, are authorized (upon request as hereinafter provided) to fix reasonable fees (whether or not fixed under any contract or agreement) for services in connection with the proceedings before the arbiter and the Mixed Claims Commission and the Tripartite Claims Commission, respectively, and with the preparations therefor, and the application for payment, and the payment, of any amount under section 2, 3, 5, or 6. Each such official is authorized and requested to mail to each claimant in proceedings before him or the commission, as the case may be, notice (in English, German, or Hungarian) of the provisions of this section. No fee shall be fixed under this subsection unless written request therefor is filed with such official before the expiration of 90 days after the date of mailing of such notice. In the case of nationals of Germany, Austria, and Hungary, such notice may be mailed to, and the written request may be filed by, the duly accredited diplomatic representative of such nation.

"(b) After a fee has been fixed under subsection (a), any person accepting any consideration (whether or not under a contract or agreement entered into prior to the enactment of this act), the aggregate value of which (when added to any consideration previously received) is in excess of the amount so fixed, for services in connection with the proceedings before the arbiter or Mixed Claims Commission or Tripartite Claims Commission, or any preparations therefor, or with the application for payment, or the payment, of any amount under section 2, 3, 5, or 6, shall, upon conviction thereof, be punished by a fine of not more than four times the aggregate value of the consideration accepted by such person therefor.

"(c) Section 20 of the trading with the enemy act, as amended, is amended by inserting after the word 'attorney' wherever it appears in such section the words 'at law or in fact.'

INVESTMENT OF FUNDS BY ALIEN PROPERTY CUSTODIAN

"SEC. 10. The trading with the enemy act, as amended, is amended by adding thereto the following new section:

"'SEC. 25. (a) (1) The Alien Property Custodian is authorized and directed to invest, from time to time upon the request of the Secretary of the Treasury, out of the funds held by the Alien Property Custodian or by the Treasurer of the United States for the Alien Property Custodian, an amount not to exceed $40,000,000 in the aggregate, in one or more participating certificates issued by the Secretary of the Treasury in accordance with the provisions of this section.

"'(2) When in the case of any trust written consent under subsection (m) of section 9 has been filed, an amount equal to the portion of such trust the return of which is temporarily postponed under such subsection shall be credited against the investment made under paragraph (1) of this subsection. If the total amount so credited is in excess of the amount invested under paragraph (1) of this subsection, the excess shall be invested by the Alien Property Custodian in accordance with the provisions of this subsection, without regard to the $40,000,000 limitation in paragraph (1). If the amount invested under paragraph (1) of this subsection is in excess of the total amount so credited, such excess shall, from time to time on request of the Alien Property Custodian, be paid to him out of the funds in the German special-deposit account created by section 4 of the settlement of war claims act of 1928, and such payments shall have priority over any payments therefrom other than the payments under paragraph (1) of subsection (c) of such section (relating to expenses of administration).

"'(b) The Alien Property Custodian is authorized and directed to invest, in one or more participating certificates issued by the Secretary of the Treasury, out of the unallocated interest fund, as defined in section 28—

"'(1) The sum of $25,000,000. If, after the allocation under section 26 has been made, the amount of the unallocated interest fund allocated to the trusts described in subsection (c) of such section is found to be in excess of $25,000,000, such excess shall be invested by the Alien Property Custodian in accordance with the provisions of this subsection. If the amount so allocated is found to be less than $25,000,000, any participating certificate or certificates that have been issued shall be corrected accordingly; and

"'(2) The balance of such unallocated interest fund remaining after the investment provided for in paragraph (1) and the payment of allocated earnings in accordance with the provisions of subsection (b) of section 26 have been made.

"'(c) If the amount of such unallocated interest fund, remaining after the investment required by paragraph (1) of subsection (b) of this section has been made, is insufficient to pay the allocated earnings in accordance with subsection (b) of section 26, then the amount necessary to make up the deficiency shall be paid out of the funds in the German special deposit account created by section 4 of the settlement of war claims act of 1928, and such payment shall have priority over any payments therefrom other than the payments under paragraph (1) of subsection (c) of such section (relating to expenses of administration) and the payments under paragraph (2) of subsection (a) of this section.

"'(d) The Alien Property Custodian is authorized and directed (after the payment of debts under section 9) to transfer to the Secretary of the Treasury, for deposit in such special deposit account, all money and the proceeds of all property, including all income, dividends, interest, annuities, and earnings accumulated in respect thereof, owned by the German Government or any member of the former ruling family. All money and other property shall be held to be owned by the German Government (1) if no claim thereto has been filed with the Alien Property Custodian prior to the expiration of one year from the date of the enactment of the settlement of war claims act of 1928, or (2) if any claim has been filed before the expiration of such period (whether before or after the enactment of such act), then if the ownership thereof under any such claim is not established by a decision of the Alien Property Custodian or by suit in court instituted, under section 9, within one year after the decision of the Alien Property Custodian, or after the date of the enactment of the settlement of war claims act of 1928, whichever date is later. The amounts so transferred under this subsection shall be credited upon the final payment due the United States from the German Government on account of the awards of the Mixed Claims Commission.

"'(e) The Secretary of the Treasury is authorized and directed to issue to the Alien Property Custodian, upon such terms and conditions and under such regulations as the Secretary of the Treasury may prescribe, one or more participating certificates, bearing interest payable annually (as nearly as may be) at the rate of 5 per cent per annum, as evidence of the investment by the Alien Property Custodian under subsection (a), and one or more noninterest-bearing, participating certificates, as evidence of the investment by the Alien Property Custodian under subsection (b). All such certificates shall evidence a participating interest, in accordance with, and subject to the priorities of, the provisions of section 4 of the settlement of war claims act of 1928, in the funds in the German special deposit account created by such section, except that—

"'(1) The United States shall assume no liability, directly or indirectly, for the payment of any such certificates, or of the interest thereon, except out of funds in such special deposit account available therefor, and all such certificates shall so state on their face; and

"'(2) Such certificates shall not be transferable, except that the Alien Property Custodian may transfer any such participating certificate evidencing the interest of a substantial number of the owners of the money invested, to a trustee duly appointed by such owners.

"'(f) Any amount of principal or interest paid to the Alien Property Custodian in accordance with the provisions of subsection (c) of section 4 of the settlement of war claims act of 1928 shall be allocated pro rata among the persons filing written consents under subsection (m) of section 9 of this act, and the amounts so allocated shall be paid to such persons. If any person to whom any amount is payable under this subsection has died (or if, in the case of a partnership, association, or other unincorporated body of individuals, or a corporation, its existence has terminated), payment shall be made to the persons determined by the Alien Property Custodian to be entitled thereto.

"'(g) The Alien Property Custodian is authorized and directed (after the payment of debts under section 9) to transfer to the Secretary of the Treasury, for deposit in the special

deposit account (Austrian or Hungarian, as the case may be), created by section 7 of the settlement of war claims act of 1928, all money and the proceeds of all property, including all income, dividends, interest, annuities, and earnings accumulated in respect thereof, owned by the Austrian Government or any corporation all the stock of which was owned by or on behalf of the Austrian Government (including the property of the Imperial Royal Tobacco Monopoly, also known under the name of K. K. Oesterreichische Tabak Regie), or owned by the Hungarian Government or by any corporation all the stock of which was owned by or on behalf of the Hungarian Government.'

RETURN TO NATIONALS OF GERMANY, AUSTRIA, AND HUNGARY OF PROPERTY HELD BY ALIEN PROPERTY CUSTODIAN

"SEC. 11. Subsection (b) of section 9 of the trading with the enemy act, as amended, is amended by striking out the punctuation at the end of paragraph (11) and inserting in lieu thereof a semicolon and the word "or" and inserting after paragraph (11) the following new paragraphs:

"'(12) A partnership, association, or other unincorporated body of individuals, or a corporation, and was entirely owned at such time by subjects or citizens of nations, States, or free cities other than Austria or Hungary or Austria-Hungary and is so owned at the time of the return of its money or other property, and has filed the written consent provided for in subsection (m); or

"'(13) A partnership, association, or other unincorporated body of individuals, having its principal place of business at such time within any country other than Austria, Hungary, or Austria-Hungary, or a corporation organized or incorporated within any country other than Austria, Hungary, or Austria-Hungary, and that the written consent provided for in subsection (m) has been filed; or

"'(14) Any individual who at such time was a citizen or subject of Germany or who at the time of the return of any money or other property is a citizen or subject of Germany or is not a citizen or subject of any nation, State, or free city, and that the written consent provided for in subsection (m) has been filed; or

"'(15) The Austro-Hungarian Bank, except that the money or other property thereof shall be returned only to the liquidators thereof; or

"'(16) An individual, partnership, association, or other unincorporated body of individuals, or a corporation, and that the written consent provided for in subsection (m) has been filed, and that no suit or proceeding against the United States or any agency thereof is pending in respect of such return, and that such individual has filed a written waiver renouncing on behalf of himself, his heirs, successors, and assigns any claim based upon the fact that at the time of such return he was in fact entitled to such return under any other provision of this act; or

"'(17) A partnership, association, or other unincorporated body of individuals, or a corporation, and was entirely owned at such time by citizens of Austria and is so owned at the time of the return of its money or other property; or

"'(18) A partnership, association, or other unincorporated body of individuals, having its principal place of business at such time within Austria, or a corporation organized or incorporated within Austria; or

"'(19) An individual who at such time was a citizen of Austria or who at the time of the return of any money or other property is a citizen of Austria; or

"'(20) A partnership, association, or other unincorporated body of individuals, or a corporation, and was entirely owned at such time by citizens of Hungary and is so owned at the time of the return of its money or other property; or

"'(21) A partnership, association, or other unincorporated body of individuals, having its principal place of business at such time within Hungary, or a cooperation organized or incorporated within Hungary; or

"'(22) An individual who at such time was a citizen of Hungary or who, at the time of the return of any money or other property, is a citizen of Hungary;—'

"SEC. 12. (a) Subsection (d) of section 9 of the trading with the enemy act, as amended, is amended to read as follows:

"'(d) Whenever an individual, deceased, would have been entitled, if living, to the return of any money or other property without filing the written consent provided for in subsection (m), then his legal representative may proceed for the return of such money or other property in the same manner as such individual might proceed if living, and such money or other property may be returned to such legal representative without requiring the appointment of an administrator, or an ancillary administrator, by a court in the United States, or to any such ancillary administrator, for distribution directly to the persons entitled thereto. Return in accordance with the provisions of this subsection may be made in any case where an application or court proceeding by any legal representative, under the provisions of this subsection before its amendment by the settlement of war claims act of 1928, is pending and undetermined at the time of the enactment of such act. All bonds or other security given under the provisions of this subsection before such amendment shall be canceled or released and all sureties thereon discharged.'

"(b) Subsection (e) of section 9 of the trading with the enemy act, as amended, is amended by striking out the period at the end thereof and inserting a semicolon and the following: 'nor shall a debt be allowed under this section unless notice of the claim has been filed, or application therefor has been made, prior to the date of the enactment of the settlement of war claims act of 1928.'

"(c) Subsection (g) of section 9 of the trading with the enemy act, as amended, is amended to read as follows:

"'(g) Whenever an individual, deceased, would have been entitled, if living, to the return of any money or other property upon filing the written consent provided for in subsection (m), then his legal representative may proceed for the return of such money or other property in the same manner as such individual might proceed if living, and such money or other property may be returned, upon filing the written consent provided for in subsection (m), to such legal representative without requiring the appointment of an administrator, or an ancillary administrator, by a court in the United States, or to any such ancillary administrator, for distribution to the persons entitled thereto. This subsection shall not be construed as extinguishing or diminishing any right which any citizen of the United States may have had under this subsection prior to its amendment by the settlement of war claims act of 1928 to receive in full his interest in the property of any individual dying before such amendment.'

"SEC. 13. Subsections (j) and (k) of section 9 of the trading with the enemy act, as amended, are amended so as to comprise three subsections, to read as follows:

"'(j) The Alien Property Custodian is authorized and directed to return to the person entitled thereto, whether or not an enemy or ally of enemy and regardless of the value, any patent, trade-mark, print, label, copyright, or right therein or claim thereto, which was conveyed, transferred, assigned, or delivered to the Alien Property Custodian, or seized by him, and which has not been sold, licensed, or otherwise disposed of under the provisions of this act, and to return any such patent, trade-mark, print, label, copyright, or right therein or claim thereto, which has been licensed, except that any patent, trade-mark, print, label, copyright, or right therein or claim thereto, which is returned by the Alien Property Custodian and which has been licensed, or in respect of which any contract has been entered into, or which is subject to any lien or encumbrance, shall be returned subject to the license, contract, lien, or encumbrance.

"'(k) Except as provided in section 27, paragraphs (12) to (22), both inclusive, of subsection (b) of this section shall apply to the proceeds received from the sale, license, or other disposition of any patent, trade-mark, print, label, copyright, or right therein or claim thereto, conveyed, transferred, assigned, or delivered to the Alien Property Custodian, or seized by him.

"'(l) This section shall apply to royalties paid to the Alien Property Custodian, in accordance with a judgment or decree in a suit brought under subsection (f) of section 10; but shall not apply to any other money paid to the Alien Property Custodian under section 10.'

"SEC. 14. Section 9 of the trading with the enemy act, as amended, is amended by adding at the end thereof the following new subsections:

"'(m) No money or other property shall be returned under paragraphs (12), (13), (14), or (16) of subsection (b) or under subsection (g) or (n) or (to the extent therein provided) under subsection (p), unless the person entitled thereto files a written consent to a postponement of the return of an amount equal to 20 per cent of the aggregate value of such money or other property (at the time, as nearly as may be, of the return), as determined by the Alien Property Custodian, and the investment of such amount in accordance with the provisions of section 25. Such amount shall be deducted from the money to be returned to such person, so far as possible, and the balance shall be deducted from the proceeds of the sale of so much of the property as may be necessary, unless such person pays the balance to the Alien Property Custodian, except that no property shall be so sold prior to the expiration of six years from the date of the enactment of the settlement of war claims act of 1928 without the consent of the person entitled thereto. The amounts so deducted shall be returned to the persons entitled thereto as provided in subsection (f) of section 25. The sale of

any such property shall be made in accordance with the provisions of section 12, except that the provisions of such section relating to sales or resales to, or for the benefit of, citizens of the United States shall not be applicable. If such aggregate value of the money or other property to be returned under paragraphs (12), (13), (14), or (16) of subsection (b) or under subsection (g) is less than $2,000, then the written consent shall not be required and the money or other property shall be returned in full without the temporary retention and investment of 20 per cent thereof.

"'(n) In the case of property consisting of stock or other interest in any corporation, association, company, or trust, or bonded or other indebtedness thereof, evidenced by certificates of stock or by bonds or by other certificates of interest therein or indebtedness thereof, or consisting of dividends or interest or other accruals thereon, where the right, title, and interest in the property (but not the actual certificate or bond or other certificate of interest or indebtedness) was conveyed, transferred, assigned, delivered, or paid to the Alien Property Custodian, or seized by him, if the President determines that the owner thereof or of any interest therein has acquired such ownership by assignment, transfer, or sale of such certificate or bond or other certificate of interest or indebtedness (it being the intent of this subsection that such assignment, transfer, or sale shall not be deemed invalid hereunder by reason of such conveyance, transfer, assignment, delivery, or payment to the Alien Property Custodian or seizure by him), and that the written consent provided for in subsection (m) has been filed, then the President may make in respect of such property an order of the same character, upon the same conditions, and with the same effect, as in cases provided for in subsection (b), including the benefits of subsection (c).

"'(o) The provisions of paragraph (12), (13), (14), (17), (18), (19), (20), (21), or (22) of subsection (b), or of subsection (m) or (n) of this section, and (except to the extent therein provided) the provisions of paragraph (16) of subsection (b), shall not be construed as diminishing or extinguishing any right under any other provision of this act in force immediately prior to the enactment of the settlement of war claims act of 1928.

"'(p) The Alien Property Custodian shall transfer the money or other property in the trust of any partnership, association, or other unincorporated body of individuals, or corporation, the existence of which has terminated, to trusts in the names of the persons (including the German Government and members of the former ruling family) who have succeeded to its claim or interest; and the provisions of subsection (a) of this section relating to the collection of a debt (by order of the President or of a court) out of money or other property held by the Alien Property Custodian or the Treasurer of the United States shall be applicable to the debts of such successor and any such debt may be collected out of the money or other property in any of such trusts if not returnable under subsection (a) of this section. Subject to the above provisions as to the collection of debts, each such successor (except the German Government and members of the former ruling family) may proceed for the return of the amount so transferred to his trust, in the same manner as such partnership, association, or other unincorporated body of individuals, or corporation might proceed if still in existence. If such partnership, association, or other unincorporated body of individuals, or corporation, would have been entitled to the return of its money or other property only upon filing the written consent provided for in subsection (m), then the successor shall be entitled to the return under this subsection only upon filing such written consent.

"'(q) The return of money or other property under paragraph (15), (17), (18), (19), (20), (21), or (22) of subsection (b) (relating to the return to Austrian and Hungarian nationals) shall be subject to the limitations imposed by subsections (d) and (e) of section 7 of the settlement of war claims act of 1928.'

"SEC. 15. The trading with the enemy act, as amended, is amended by adding thereto the following new sections:

"'SEC. 26. (a) The Alien Property Custodian shall allocate among the various trusts the funds in the "unallocated interest fund" (as defined in section 28). Such allocation shall be based upon the average rate of earnings (determined by the Secretary of the Treasury) on the total amounts deposited under section 12.

"'(b) The Alien Property Custodian, when the allocation has been made, is authorized and directed to pay to each person entitled, in accordance with a final decision of a court of the United States or of the District of Columbia, or of an opinion of the Attorney General, to the distribution of any portion of such unallocated interest fund, the amount allocated to his trust, except as provided in subsection (c) of this section.

"'(c) In the case of persons entitled, under paragraph (12), (13), (14), or (16) of subsection (b) of section 9, to such return, and in the case of persons who would be entitled to such return thereunder if all such money or property had not been returned under paragraph (9) or (10) of such subsection, and in the case of persons entitled to such return under subsection (n) of section 9, an amount equal to the aggregate amount allocated to their trusts shall be credited against the sum of $25,000,000 invested in participating certificates under paragraph (1) of subsection (b) of section 25. If the aggregate amount so allocated is in excess of $25,000,000, an amount equal to the excess shall be invested in the same manner. Upon the repayment of any of the amounts so invested, under the provisions of section 4 of the settlement of war claims act of 1928, the amount so repaid shall be distributed pro rata among such persons, notwithstanding any receipts or releases given by them.

"'(d) The unallocated interest fund shall be available for carrying out the provisions of this section, including the expenses of making the allocation.

"'SEC. 27. The Alien Property Custodian is authorized and directed to return to the United States any consideration paid to him by the United States under any license, assignment, or sale by the Alien Property Custodian to the United States of any patent (or any right therein or claim thereto, and including an application therefor and any patent issued pursuant to any such application).

"'SEC. 28. As used in this act, the term "unallocated interest fund" means the sum of (1) the earnings and profits accumulated prior to March 4, 1923, and attributable to investments and reinvestments under section 12 by the Secretary of the Treasury, plus (2) the earnings and profits accumulated on or after March 4, 1923, in respect of the earnings and profits referred to in clause (1) of this section.

"'SEC. 29. (a) Where the Alien Property Custodian has made demand or requirement for the conveyance, transfer, assignment, delivery, or payment to him of any money or other property of any enemy or ally of enemy (whether or not suit or proceeding for the enforcement thereof has been begun and whether or not any judgment or decree in respect thereof has been made or entered) and where the whole or any part of such money or other property would, if conveyed, transferred, assigned, delivered, or paid to him, be returnable under any provision of this act, the Alien Property Custodian may, in his discretion, and on such terms and conditions as he may prescribe, waive such demand or requirement, or accept in full satisfaction of such demand, requirement, judgment, or decree, a less amount than that demanded or required by him.

"'(b) The Alien Property Custodian shall not make any such waiver or compromise except with the approval of the Attorney General; nor (if any part of such money or property would be returnable only upon the filing of the written consent required by subsection (m) of section 9) unless, after compliance with the terms and conditions of such waiver or compromise, the Alien Property Custodian or the Treasurer of the United States will hold (in respect of such enemy or ally of enemy) for investment as provided in section 25, an amount equal to 20 per cent of the sum of (1) the value of the money or other property held by the Alien Property Custodian or the Treasurer of the United States at the time of such waiver or compromise, plus (2) the value of the money or other property to which the Alien Property Custodian would be entitled under such demand or requirement if the waiver or compromise had not been made.

"'(c) Where the Alien Property Custodian has made demand or requirement for the conveyance, transfer, assignment, delivery, or payment to him of any money or other property of any enemy or ally of enemy (whether or not suit or proceeding for the enforcement thereof has been begun and whether or not any judgment or decree in respect thereof has been made or entered) and where the interest or right of such enemy or ally of enemy in such money or property has not, prior to the enactment of the settlement of war claims act of 1928, vested in enjoyment, the Alien Property Custodian may, in his discretion, and on such terms and conditions as he may prescribe, waive such demand and requirement, without compliance with the requirements of subsection (b) of this section, but only with the approval of the Attorney General.

"'(d) Nothing in this section shall be construed as requiring the Alien Property Custodian to make any waiver or compromise authorized by this section, and the Alien Property Custo-

dian may proceed in respect of any demand or requirement referred to in subsection (a) or (c) as if this section had not been enacted.

"'(e) All money or other property received by the Alien Property Custodian as a result of any action or proceeding—whether begun before or after the enactment of the settlement of war claims act of 1928, and whether or not for the enforcement of a demand or requirements as above specified—shall for the purposes of this act be considered as forming a part of the trust in respect of which such action or proceeding was brought, and shall be subject to return in the same manner and upon the same conditions as any other money or property in such trust, except as otherwise provided in subsection (b) of this section.

"'SEC. 30. Any money or other property returnable under subsection (b) or (n) of section 9 shall, at any time prior to such return, be subject to attachment in accordance with the provisions of the code of law for the District of Columbia, as amended, relating to attachments in suits at law, and to attachments for the enforcement of judgments at law and decrees in equity, but any writ of attachment or garnishment issuing in any such suit, or for the enforcement of any judgment or decree, shall be served only upon the Alien Property Custodian, who shall for the purposes of this section be considered as holding credits in favor of the person entitled to such return to the extent of the value of the money or other property so returnable. Nothing in this section shall be construed as authorizing the taking of actual possession, by any officer of any court, of any money or other property held by the Alien Property Custodian or by the Treasurer of the United States.

"'SEC. 31. As used in this act, the term "member of the former ruling family" means (1) any person who was at any time between April 6, 1917, and July 2, 1921, the German Emperor or the ruler of any constituent kingdom of the German Empire, or (2) the wife or any child of such person.'

FUGITIVES FROM JUSTICE

"SEC. 16. Section 22 of the trading with the enemy act, as amended, is amended to read as follows:

"'SEC. 22. No person shall be entitled to the return of any property or money under any provision of this act, or any amendment of this act, who is a fugitive from justice of the United States or any State or Territory thereof, or the District of Columbia.'

RETURN OF INCOME

"SEC. 17. Section 23 of the trading with the enemy act, as amended, is amended to read as follows:

"'SEC. 23. The Alien Property Custodian is directed to pay to the person entitled thereto, from and after March 4, 1923, the net income (including dividends, interest, annuities, and other earnings), accruing and collected thereafter, in respect of any money or property held in trust for such person by the Alien Property Custodian or by the Treasurer of the United States for the account of the Alien Property Custodian, under such rules and regulations as the President may prescribe.'

TAXES

"SEC. 18. Section 24 of the trading with the enemy act, as amended, is amended by inserting '(a)' after the section number and by adding at the end of such section new subsections to read as follows:

"'(b) In the case of income, war-profits, excess-profits, or estate taxes imposed by any act of Congress, the amount thereof shall, under regulations prescribed by the Commissioner of Internal Revenue with the approval of Secretary of the Treasury, be computed in the same manner (except as hereinafter in this section provided) as though the money or other property had not been seized by or paid to the Alien Property Custodian, and shall be paid, as far as practicable, in accordance with subsection (a) of this section. Pending final determination of the tax liability the Alien Property Custodian is authorized to return, in accordance with the provisions of this act, money or other property in any trust in such amounts as may be determined, under regulations prescribed by the Commissioner of Internal Revenue with the approval of the Secretary of the Treasury, to be consistent with the prompt payment of the full amount of the internal-revenue taxes.

"(c) So much of the net income of a taxpayer for the taxable year 1917, or any succeeding taxable year, as represents the gain derived from the sale or exchange by the Alien Property Custodian of any property conveyed, transferred, assigned, delivered, or paid to him, or seized by him, may at the option of the taxpayer be segregated from the net income and separately taxed at the rate of 30 per cent. This subsection shall be applied and the amount of net income to be so segregated shall be determined, under regulations prescribed by the Commissioner of Internal Revenue with the approval of the Secretary of the Treasury, as nearly as may be in the same manner as provided in section 208 of the revenue act of 1926 (relating to capital net gains), but without regard to the period for which the property was held by the Alien Property Custodian before its sale or exchange, and whether or not the taxpayer is an individual.

"(d) Any property sold or exchanged by the Alien Property Custodian (whether before or after the date of the enactment of the settlement of war claims act of 1928) shall be considered as having been compulsory or involuntarily converted, within the meaning of the income, excess-profits, and war-profits tax laws and regulations; and the provisions of such laws and regulations relating to such a conversion shall (under regulations prescribed by the Commissioner of Internal Revenue with the approval of the Secretary of the Treasury) apply in the case of the proceeds of such sale or exchange. For the purpose of determining whether the proceeds of such conversion have been expended within such time as will entitle the taxpayer to the benefits of such laws and regulations relating to such a conversion, the date of the return of the proceeds to the person entitled thereto shall be considered as the date of the conversion.

"(e) In case of any internal-revenue tax imposed in respect of property conveyed, transferred, assigned, delivered, or paid to the Alien Property Custodian, or seized by him, and imposed in respect of any period (in the taxable year 1917 or any succeeding taxable year) during which such property was held by him or by the Treasurer of the United States, no interest or civil penalty shall be assessed upon, collected from, or paid by or on behalf of, the taxpayer; nor shall any interest be credited or paid to the taxpayer in respect of any credit or refund allowed or made in respect of such tax.

"'(f) The benefits of subsections (c), (d), and (e) shall be extended to the taxpayer if claim therefor is filed before the expiration of the period of limitations properly applicable thereto, or before the expiration of six months after the date of the enactment of the settlement of war claims act of 1928, whichever date is the later. The benefits of subsection (d) shall also be extended to the taxpayer if claim therefor is filed before the expiration of six months after the return of the proceeds.'

"SEC. 19. Subsection (f) of section 10 of the trading with the enemy act, as amended, is amended by adding at the end thereof the following new paragraph:

"'In the case of any such patent, trade-mark, print, label, or copyright, conveyed, assigned, transferred, or delivered to the Alien Property Custodian or seized by him, any suit brought under this subsection, within the time limited therein, shall be considered as having been brought by the owner within the meaning of this subsection, in so far as such suit relates to royalties for the period prior to the sale by the Alien Property Custodian of such patent, trade-mark, print, label, or copyright, if brought either by the Alien Property Custodian or by the person who was the owner thereof immediately prior to the date such patent, trade-mark, print, label, or copyright was seized or otherwise acquired by the Alien Property Custodian.'

"SEC. 20. The proviso of paragraph (10) of subsection (b) of section 9 of the trading with the enemy act, as amended (relating to the return to certain insurance companies), is repealed.

SHIP CLAIMS OF FORMER GERMAN NATIONALS

"SEC. 21. (a) It shall be the duty of the arbiter to hear the claims of any partnership, association, joint-stock company, or corporation, and to determine the amount of compensation to be paid to it by the United States, in respect of the merchant vessels *Carl Diederichsen* and *Johanne* (including any equipment, appurtenances, and property contained therein), title to which was taken by or on behalf of the United States under the authority of the joint resolution of May 12, 1917, and which were subsequently sold by or on behalf of the United States. Such compensation shall be determined as provided in paragraph (1) of subsection (b) of section 3 of this act, but the aggregate compensation shall not exceed, in the case of the *Carl Diederichsen*, $166,787.78 and in the case of the *Johanne*, $174,600 (such amounts being the price for which the vessels were sold, less the cost of reconditioning). The arbiter shall not make any award under this section in respect of the claim of any partnership, association, joint-stock company, or corporation unless it appears to his satisfaction that all its members and stockholders who were, on April 6, 1917, citizens or subjects of Germany, became, by virtue of any treaty of peace or plebiscite held or further treaty concluded under such treaty of peace, citizens or subjects of any nation other than Germany, and that all its members and stockholders on the date of the enactment of this

act were on such date citizens or subjects of nations other than Germany.

"(b) Upon the determination by him of such compensation the arbiter shall enter an award in favor of such person of the amount of such compensation and shall certify such award to the Secretary of the Treasury. The amount of such award, together with interest thereon, at the rate of 5 per cent per annum, from July 2, 1921, until the date of such payment, shall be paid by the Secretary of the Treasury, in accordance with such regulations as he may prescribe. There is authorized to be appropriated such amount as may be necessary to make such payment.

"(c) No payment shall be made in respect of any award under this section unless application therefor is made, within two years after the date such award is certified, in accordance with such regulations as the Secretary of the Treasury may prescribe, and payment shall be made only to the person on behalf of whom the award was made except in the cases specified in paragraphs (1) to (4) of subsection (k) of section 3. The provisions of subsections (c), (l), (m), (o), and (r) of section 3 shall be applicable in carrying out the provisions of this section.

"(d) The provisions of this section shall constitute the exclusive method for the presentation and payment of claims arising out of any of the acts by or on behalf of the United States for which this section provides a remedy. Any person who files any claim or makes application for any payment under this section shall be held to have consented to all the provisions of this act. This subsection shall not bar the presentation of a claim under section 3 (relating to the ship claims of German nationals) in respect of the taking of the vessel *Carl Diederichsen* or the vessel *Johanne;* but no award shall be made under section 3 in respect of either of such vessels to or on behalf of any person to whom or on whose behalf an award is made under this section in respect of such vessel.

DEFINITIONS

"SEC. 22. As used in this act—

"(a) The term 'person' means an individual, partnership, association, or corporation.

"(b) The term 'German national' means—

"(1) An individual who, on April 6, 1917, was a citizen or subject of Germany, or who, on the date of the enactment of this act, is a citizen or subject of Germany.

"(2) A partnership, association, or corporation, which on April 6, 1917, was organized or created under the law of Germany.

"(3) The Government of Germany.

"(c) The term 'member of the former ruling family' means (1) any person who was at any time between April 6, 1917, and July 2, 1921, the German Emperor or the ruler of any constituent kingdom of the German Empire, or (2) the wife or any child of such person.

"(d) The term 'Austrian national' means—

"(1) An individual who, on December 7, 1917, was a citizen of Austria, or who, on the date of the enactment of this act, is a citizen of Austria.

"(2) A partnership, association, or corporation which on December 7, 1917, was organized or created under the law of Austria.

"(3) The Government of Austria.

"(e) The term 'Hungarian national' means—

"(1) An individual who, on December 7, 1917, was a citizen of Hungary, or who, on the date of the enactment of this act, is a citizen of Hungary.

"(2) A partnership, association, or corporation which, on December 7, 1917, was organized or created under the law of Hungary.

"(3) The Government of Hungary.

"(f) The term 'United States' when used in a geographical sense includes the Territories and possessions of the United States and the District of Columbia.

LEGISLATIVE COUNSEL AND SPECIAL ASSISTANT TO SECRETARY OF THE TREASURY

"SEC. 23. (a) Section 1303(d) of the revenue act of 1918, as amended by section 1101 of the revenue act of 1924, is amended by adding at the end thereof a sentence to read as follows: 'Notwithstanding the foregoing provisions, the compensation of each of the two legislative counsel in office upon the date of the enactment of the settlement of war claims act of 1928 shall, after such date, be at the rate of $10,000 a year.'

"(b) The salary of the special assistant to the Secretary of the Treasury in matters of legislation, so long as the position is held by the present incumbent, shall be at the rate of $10,000 a year."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate to the title, and agree to the same.

PAT HARRISON,
Managers on the part of the Senate.

STATEMENT OF THE HOUSE

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 7201) to provide for the settlement of certain claims of American nationals against Germany and of German nationals against the United States, for the ultimate return of all property of German nationals held by the Alien Property Custodian, and for the equitable apportionment among all claimants of certain available funds, submit the following written statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The Senate amendment strikes out all after the enacting clause primarily to make unnecessary a large number of separate amendments changing section numbers and cross references. The Senate substitute for the House bill embodies all the major policies of the House bill, and the bill as agreed to in conference, consequently, is substantially the House bill. The essential differences between the House bill and the Senate amendment are as follows:

AUSTRIA AND HUNGARY

The principal change made in the House bill by the Senate amendment is the addition of sections providing for the return of the property of nationals of Austria and Hungary held by the Alien Property Custodian (including their share of the unallocated interest fund), and for the settlement of claims of the United States and its nationals against Austria and Hungary, and of Austrian and Hungarian nationals against the United States. The disposition of the questions involved in regard to these matters became possible only a very short time before the bill was introduced in the House, and there was no opportunity of incorporating suitable provisions in the bill at that time.

The provisions are contingent upon payment by the Austrian and Hungarian Governments of sums sufficient to pay the claims against Austria and Hungary, and the work of the Tripartite Claims Commission has progressed to the point where the amounts necessary can be estimated. Claims of Austrian and Hungarian nationals against the United States are to be settled in a manner similar to that provided in the case of the claims of German nationals. The House recedes.

CLAIMS OF AMERICAN NATIONALS AGAINST GERMANY

Subsection (j) of section 2 of the Senate amendment is a new subsection requesting the President to enter into negotiations with Germany with a view to extending the time for filing claims before the Mixed Claims Commission, so as to give the commission jurisdiction of claims presented before July 1, 1928. In order to prevent undue delay in making pro rata payments on awards where no payment can be made until all awards have been certified, it is provided that awards on account of late claims will be payable under this bill only if the agreement is entered into before January 1, 1929. The House recedes, with an amendment providing for the filing of the American claims with the State Department, rather than presentation to the commission. It will not be necessary to require that claims already filed with the State Department be again filed.

Section 10 of the Senate amendment, dealing with the investment of funds by the Alien Property Custodian, corresponds to section 8 of the House bill. This section adds section 25 to the trading with the enemy act. Subsection (a) of section 25 is amended by the Senate in paragraph (1) to authorize the immediate investment, upon the request of the Secretary of the Treasury, of an amount not to exceed $40,000,000, out of the alien property funds. This amount is a conservative estimate of the aggregate amount of the 20 per cent of alien property temporarily to be retained. Under the section as amended, $40,000,000 will be immediately available for payment of awards of the Mixed Claims Commission and for the other purposes of the special deposit account. Paragraph (2) of this subsection

provides for the necessary adjustments in case the amounts invested under paragraph (1) are too large or too small. The amendment facilitates administration; and the House recedes.

The Senate amendment adds to paragraph (5) of subsection (c) of section 5 of the House bill—section 4 of the Senate amendment—a provision authorizing the Secretary of the Treasury to make partial payments, in his discretion, on awards of the Mixed Claims Commission in excess of $100,000. This amendment will prevent unnecessary delay in making payments on such awards which might otherwise be caused by the consideration of late claims by the commission or of claims not yet adjudicated; and the House recedes.

CLAIMS OF GERMAN NATIONALS AGAINST THE UNITED STATES

The Senate amendment rewrites subsection (a) of section 4 of the House bill—which appears as subsection (a) of section 3 of the Senate amendment—to provide that the arbiter shall be appointed by the President, with the advice and consent of the Senate. The House bill provided for his appointment by the President alone. The House recedes.

The Senate amendment provides for the appointment of a war claims counsel to represent the United States in proceedings before the arbiter. Under the House bill this duty devolves upon the Department of Justice; and the Senate recedes.

Subsection (d) of section 4 of the House bill is amended by the Senate amendment to extend the period of interest to be included in the awards of the arbiter, to include December 31, 1928. It is unlikely that the awards of the arbiter under this section will be certified before that date; and the House recedes.

The Senate amends subsection (d) of section 4 of the House bill to require that the arbiter shall make no award to a German ship claimant until the interest of the German Government, or any member of the former ruling family, if any, in the ship involved has been established by such claimant to the arbiter's satisfaction. If any such interest appears, the arbiter is directed to enter a tentative award accordingly. This award will not be paid but will be applied in satisfaction of the final payments from Germany, on account of the awards of the Mixed Claims Commission. The House recedes.

The Senate amendment, by subsection (c) of section 22, adds to the definitions contained in the House bill a definition of the term "member of the former ruling family." This term is defined to mean (1) the former German Emperor, or the ruler of any constituent state of the German Empire during the war period, or (2) the wife or any child of such person. The House recedes with an amendment to provide that none of the rulers of constituent states shall be included within the definition except the rulers of the Kingdoms of Saxony, Bavaria, and Wuerttemberg (the Emperor being also King of Prussia).

Paragraph (1) of subsection (b) of section 4 of the House bill is amended by the Senate by adding a provision that the findings of the board of survey, appointed under the authority of the joint resolution of May 12, 1917, to appraise the German merchant ships seized by the United States, shall be competent evidence in any proceeding before the arbiter to determine the compensation to be paid any claimant in respect of such ships. This amendment merely carries into the bill the provision contained in the joint resolution; and the House recedes.

The Senate amendment provided for the determination of compensation to be paid for the Tuckerton Radio Station, all the enemy interest in which was sold by the Alien Property Custodian to a private corporation. The House bill provided for the adjudication of claims only in respect of a radio station—the Sayville Station—which was sold to the United States. The Senate recedes.

Section 21 of the Senate amendment is added to provide for the determination of compensation to be paid in the case of two ships seized by the United States which were owned at the outbreak of the war by German nationals who, as a result of a plebiscite under the treaty of Versailles, became Danish nationals. Inasmuch as all the property of nationals in similar circumstances held by the Alien Property Custodian has been returned without limitation, the section provides that the awards for these ships—not greater than the amount received by the United States upon the sale of the vessels, minus the capital expenditures thereon—shall be paid in full and an appropriation is authorized to make such payment. The House recedes with a clarifying amendment.

RETURN OF PROPERTY HELD BY THE ALIEN PROPERTY CUSTODIAN

The Senate amendment provides for the payment of interest on any participating certificate or certificates representing investment of the unallocated interest fund. The Senate recedes.

The Senate amendment to subsection (d) of this section of the trading with the enemy act provides that for the purpose of transfer to the special-deposit account all property shall be deemed to be owned by the German Government if no claim thereto has been filed with the Alien Property Custodian prior to the expiration of six months after the enactment of the act, or if a claim has been filed for the recovery of the property before the end of that period and ownership has not been established by the claimant. The House recedes, with an amendment extending the six-months limitation to one year, and an amendment providing that ownership may be established by suit brought within one year after an adverse decision by the Alien Property Custodian, or within one year after the passage of this act, whichever date is later. This latter provision is necessary in order to afford an ample time for suit in cases where the custodian has heretofore decided the claim.

Subsection (f) of section 25 of the trading with the enemy act dealing with the return of any balance of the retained 20 per cent of alien property after all payments are made from the special-deposit account is amended by the Senate to allow return, in the case of deceased individuals and dissolved partnerships, associations, or corporations, to persons determined by the Alien Property Custodian to be entitled to the property. The House recedes.

Subsections (d) and (g) of section 9 of the trading with the enemy act provide for the return of property in cases where the owner is deceased. The Senate amendment amends these subsections to provide that only so much of the property of a decedent shall be returned to his legal representative for distribution to his heirs or legatees as the decedent himself would have been entitled to if living. Subsection (d) covers the cases of decedents who would be entitled to the return of all their property and allows a complete return to the legal representative regardless of the nationality or citizenship of the heirs or legatees, and provides that this same rule shall apply in cases where applications or proceedings are pending under the existing law. Subsection (g) covers the cases of decedents who would be entitled to the return of only 80 per cent of their property and provides that in any such case not more than 80 per cent may be returned to the legal representative, regardless of the citizenship or nationality of the heirs or legatees. The subsection contains a saving clause reserving to American citizens any rights they may have under the existing law in estates of persons dying before the enactment of the act. The principal change in these two subsections from the corresponding provisions of the House bill is the substitution of the status of the decedent for that of the distributee as the determining factor in making returns. The amendment avoids the complications which arise under the existing law. The House recedes.

In the Senate amendment to subsection (p), added to section 9 of the trading with the enemy act by section 12 of the House bill (section 14 of the Senate amendment), provision is made for the return of property of partnerships, associations, and corporations which have ceased to exist, on substantially the same principles as in the case of deceased individuals. The property of a dissolved corporation, for example, is transferred to the names of the trustees or liquidators of the corporation or of the stockholders, and such successors may proceed for its return in the same manner as such corporation might have proceeded if still in existence and with the same restrictions as would apply to a return to the corporation. The amendment further provides that debts of such successors may be collected out of the property to which they are entitled under this subsection in accordance with the provisions of subsection (a) of section 9. The House recedes.

Subsection (m) is amended by the Senate to provide that property in the hands of the Alien Property Custodian may be sold free of the restrictions of section 12 of the trading with the enemy act limiting sales to American purchasers. The House recedes.

A further amendment to subsection (m) provides for the return in full by the Alien Property Custodian, without the retention of 20 per cent, to the original owner or his legal representative of the property in any trust if the aggregate value thereof does not exceed $2,000. The provision will result in the final disposition and closing out of a large number of small trusts and will accordingly facilitate the administration of the Alien Property Custodian's office. The House recedes.

Section 29, added to the trading with the enemy act by section 13 of the House bill (sec. 15 of the Senate amendment), provides for the waiver or compromise of demands of the Alien Property Custodian for the transfer to him of enemy property. Subsection (b) of this section is amended by the Senate amendment to require the approval of any such waiver or compromise by the Attorney General, and is further amended to allow a complete waiver in cases where all the property would be returnable. Subsection (c) is added by the Senate amendment to provide for full release and waiver of demands by the Alien Property Custodian where the alien has not yet become entitled to the present possession or enjoyment of the

property. Demands are outstanding in some cases where the alien's right is contingent upon events which may never happen or which may not occur for some years. The amendment relieves the Alien Property Custodian from the necessity of seizing such property in the future. The provision does not apply to income for future years which an alien would receive if he now is, or would be, but for the seizure of his interest, receiving the current income from the same property. The House recedes.

Subsection (d), added by the Senate amendment, is a clarifying amendment making it clear that the Alien Property Custodian is not required to waive or compromise demands except in his discretion. The House recedes.

Subsection (e), added by the Senate amendment, provides that all money or property received by the Alien Property Custodian as a result of any suit, whether or not for the enforcement of a demand for transfer of property to him, shall be considered as forming part of the trust in respect of which the suit was brought and shall be returnable as such. This subsection is intended as a clear direction as to the disposition of money or property recovered in suits arising out of the disposition of property seized, the conduct of seized businesses and other transactions of the Alien Property Custodian involving property already seized or transferred to him. The House recedes.

Section 30, added to the trading with the enemy act by the Senate amendment, extends the remedies of creditors of the owners of property held by the Alien Property Custodian. The provisions of the existing law are very limited. The new section allows attachments against the property in the same manner as if the Alien Property Custodian were an individual indebted to the owner to the extent of the value of the property held. The House recedes with an amendment making it certain that the provision allows an attachment for the execution of a judgment or decree and that it does not in any case permit the physical seizure of any money or property.

A second paragraph of section 30 in the Senate amendment further extended the remedies of creditors and provided that the law of the District of Columbia should apply to the determination of claims in certain cases. From this amendment the Senate recedes.

Section 19 of the Senate amendment amends subsection (f) of section 10 of the trading with the enemy act. That subsection provides for the bringing of suits by the owner of a patent, trade-mark, print, label, or copyright, seized or transferred to the Alien Property Custodian, for the recovery of royalties for the period prior to sale by the Alien Property Custodian. Questions have arisen in regard to such suits as to who was the owner of the patent, and so forth, within the meaning of the section, after seizure by the Alien Property Custodian. This amendment provides that such suits shall be held to have been brought by the owner if brought either by the Alien Property Custodian or by the person who was the owner immediately prior to the seizure by, or transfer to, the Alien Property Custodian. The House recedes.

Section 20 of the Senate amendment repeals the proviso of paragraph (19) of subsection (b) of section 9 of the trading with the enemy act. The effect is to remove the restriction against the return of $2,000 each to former enemy insurance companies against which claims had been filed under the section.

Immediately following subsection (d) of section 21 of the Senate amendment appears a provision amending subsection (a) of section 9 of the trading with the enemy act to suspend the right to plead the statute of limitations against a claim or suit to subject property of an insurance company in the hands of the Alien Property Custodian to the payment of losses or damages resulting from the San Francisco fire, and excluding from all the benefits of the act any insurance company against which any suit has been filed within 90 days after the passage of the act. From this amendment the Senate recedes.

Section 31, added to the trading with the enemy act by section 15 of the Senate amendment, carries into that act the same definition of the term "member of the former ruling family" of Germany as is contained in the amendment to the settlement of war claims act. The House recedes with the same amendment as in that case.

Section 24 of the Senate amendment provides that, effective 18 months after the enactment of the act, the office of Alien Property Custodian is abolished, and that all authority, powers, and duties of the Alien Property Custodian are then transferred to the Secretary of the Treasury. From this amendment the Senate recedes.

EXCESSIVE FEES

The House bill authorized the American commissioner of the Mixed Claims Commission to fix fees for services rendered claimants in connection with proceedings before that commission and provided for a fine for the acceptance of fees greater than those so fixed. The Senate amendment required the fixing of fees in every case before the Mixed Claims Commission, the Tripartite Claims Commission, and the arbiter, and in addition to the fine imposed for a violation provided that any person who violated the provisions of the section should be disqualified from practice before the executive departments. The House recedes with an amendment to require the fixing of fees only in case of a request within 60 days after the mailing of a notice to the claimant and imposing as a penalty for a violation a fine of not more than four times the amount of the aggregate fee accepted in lieu of the disqualification provision of the Senate amendment.

TAXES

The House bill provided that the Federal taxes on alien property should be computed in the same manner as if the property had not been seized and should be paid wherever possible out of the funds held by the Alien Property Custodian. The Senate amendment added four qualifications: First, that, in the case of the disposition of capital assets, the rate should not exceed 12½ per cent; second, that the provisions of the laws and regulations relating to involuntary conversion should be applicable; third, that no interest or penalties should be payable by the taxpayer and no interest or penalties should be payable by the Government; fourth, that claims for refund could be filed and assessments made and proceedings started for collection within six months after the date of enactment of the act regardless of the expiration of the ordinary statutory period; and fifth, that tentative returns should be filed and tentative assessments made and that the 20 per cent of property withheld should be retained by the Alien Property Custodian as security for the payment of any deficiency finally determined to be due. The House recedes with an amendment providing for a maximum rate of 30 per cent in lieu of the 12½ per cent fixed by the House bill to apply to the disposition of capital assets, and making certain that the rate applies to partnerships, associations, and corporations as well as to individuals; that the allowance of additional time for filing claims and for making assessments should apply only in cases where the tax liability is changed by the provisions of this section; and, in lieu of the fifth provision, providing that property acquired may be returned prior to a final determination of tax liability, under Treasury regulations which will protect the interests of the Government by making certain that sufficient property is retained to pay the taxes or that a bond is given to secure such payment.

DECLARATION OF POLICY

The Senate amendment strikes out the declaration of policy contained in the House bill. The House recedes.

SALARIES OF LEGISLATIVE COUNSEL AND SPECIAL ASSISTANT TO THE SECRETARY OF THE TREASURY

Section 23 of the Senate amendment increases to $10,000 a year the salaries of Mr. Beaman and Mr. Lee, the legislative counsel of the House and Senate, respectively, and of Mr. Alvord, special assistant to the Secretary of the Treasury. No new offices are created, and the salaries are fixed for the present incumbents only. Inasmuch as existing appropriations are available and adequate for the increases, no additional appropriations are necessary. Exactly similar provisions were contained in section 702 and 703 of the revenue bill (H. R. 1) already passed by the House. These sections were inserted in the revenue bill by the unanimous vote of the Committee on Ways and Means, and the sections were agreed to by the House without an adverse vote. The House recedes.

AMENDMENT OF TITLE

The title is amended by the Senate, in view of the Austrian-Hungarian provisions added to the bill, to read "An act to provide for the settlement of certain claims of American nationals against Germany, Austria, and Hungary, and of nationals of Germany, Austria, and Hungary against the United States, and for the ultimate return of all property held by the Alien Property Custodian"; and the House recedes.

W. R. GREEN,
W. C. HAWLEY,
ALLEN T. TREADWAY,
JOHN N. GARNER,
J. W. COLLIER,
Managers on the part of the House.

Mr. GREEN of Iowa. Mr. Speaker, unless there is some question which some Member desires to ask, I call for a vote.

Mr. CHINDBLOM. Mr. Speaker, will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. CHINDBLOM. First, I want to compliment and congratulate the conferees on the part of the House, as well as of the Senate, upon the final termination of this long-drawn-out legislation. I have read and examined the report very carefully, and I think a very admirable piece of work has been done. I regret, of course, that the declaration of policy had to go out. However, the very distinguished other body recently found it necessary to abandon a declaration of policy with reference to our merchant-marine operations, and perhaps they became a little afraid of making declarations of permanent policy.

I have only one question, and that is with reference to the change of the rate of the tax to be collected upon capital assets, that change being from 12½ per cent to 30 per cent. Will the collection of that tax as to partnerships, associations, and corporations be made in the same manner as under the present revenue act?

Mr. GREEN of Iowa. This amendment applies to the old taxes under the excess-profits provisions as well as other taxes upon gains from the sale of capital assets. Inasmuch as the Government had taken over this property and it was converted involuntarily upon the part of the owners of it who did not desire to sell it but wanted to keep it the Senate provision limited the rate on capital assets to 12½ per cent, carried in the present law. The House provision was ambiguous and some of the House conferees, including myself, believed that where the Government, of its own accord, converted the property, it ought not to be subjected to excessive rates, but in conference we were obliged to compromise. I shall have to admit that the 30 per cent carried in the bill is not a very logical figure. It is an arbitrary figure really. It is a compromise between what the Senate had in its amendment and the House provisions, which in some cases might have subjected these parties who had their property converted against their will to possibly a 60 or 65 per cent tax or even more.

Mr. GARNER of Texas. Mr. Speaker, will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. GARNER of Texas. Is the gentleman from Illinois [Mr. CHINDBLOM] objecting to the increase in the rate from 12½ per cent to 30 per cent? If he is, I call his attention to the fact that the Committee on Ways and Means had this bill under consideration for a considerable length of time at the last Congress, as well as in this Congress, and did not put any limitation whatever upon it.

Mr. CHINDBLOM. I did not intend to make any objection to the amount. I do not recall from the reading of the bill whether that is the maximum which is to be applied by graduation, similar to the plan applicable to the surtaxes.

Mr. GARNER of Texas. This 30 per cent is applied to all taxes due from the German claimants upon gains from the sale of capital assets, of whatsoever kind and nature, whether the tax ran into the brackets of the income tax to the extent of 63 per cent, as the brackets went at that time, or was specifically a capital asset tax or an excess-profits tax. Any of those taxes will be limited to 30 per cent, and under the House bill they would have gone in one instance, I think, to 63 per cent. So I do not think anyone who favored the House bill could possibly complain of the increase from 12½ per cent to 30 per cent.

Mr. CHINDBLOM. I am not complaining. I simply wanted to know how it was to be applied. Then, I understand the taxes are to be fixed in accordance with the law in force at the time when they became due?

Mr. GARNER of Texas. Exactly.

Mr. CHINDBLOM. And that in the event the tax exceeds 30 per cent, it shall be reduced to 30 per cent.

Mr. GARNER of Texas. That is correct.

Mr. CHINDBLOM. That is what I wanted to make clear.

Mr. GARNER of Texas. While I am on my feet, permit me to express my appreciation of the gentleman's compliment to the committee on conference. I think a greater compliment possibly is the fact that the House seems to be entirely satisfied with the work of the conference committee.

Mr. GREEN of Iowa. Mr. Speaker, I ask for a vote.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

ERADICATION OF PINK BOLLWORM

Mr. MADDEN. Mr. Speaker, I ask unanimous consent for the present consideration of House Joint Resolution 223, which I send to the desk and ask to have read.

The Clerk read as follows:

Resolved, etc., That to enable the Secretary of Agriculture to meet an emergency caused by a serious outbreak of the pink bollworm of cotton in western Texas, and to prevent its spread to other parts of Texas and to adjoining States, including the same objects and under the same conditions specified under the heading "Eradication of pink bollworm" in the agricultural appropriation act for the fiscal year 1928, there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the additional sum of $200,000, to remain available until June 30, 1929.

Mr. MADDEN. Mr. Speaker, the Appropriations Committee will in a few minutes report the agricultural appropriation bill for the fiscal year 1929. In that bill there is carried for the eradication and control of the pink bollworm of cotton throughout the United States, $687,000. It is very important that some of that money be made immediately available, because the earlier we begin to eradicate the more certain it is that the work will be well done. It is proposed by the introduction of this resolution to give them the money in advance of the item in the bill becoming a law. When the bill comes up for consideration in the House this $200,000 carried in this resolution will be deducted from the amount carried in the appropriation bill for 1929.

Mr. HUDSPETH. Mr. Speaker, will the gentleman yield?

Mr. MADDEN. Certainly.

Mr. HUDSPETH. So far the only pink bollworm discovered is in the district that I represent. How will this be expended?

Mr. MADDEN. It will be expended under the direction of the Agricultural Department. Mr. Marlatt is already on the ground.

Mr. HUDSPETH. In conjunction with the State authorities?

Mr. MADDEN. Yes; just as it has always been.

Mr. CRISP. Mr. Speaker, will the gentleman yield?

Mr. MADDEN. Yes.

Mr. CRISP. Do the hearings before the gentleman's committee disclose the extent of the ravages of this pink bollworm, over how large an area?

Mr. MADDEN. It is about 350,000 acres as near as I can gather.

Mr. SNELL. In that section of the country?

Mr. MADDEN. Yes; in spots. It is not universal. Possibly it affects 350,000 acres. It is in New Mexico, Arizona, and Texas.

I would like to ask, Mr. Speaker, in order that there may be furnished a full explanation of the whole matter, unanimous consent to extend my remarks by printing two statements that I have here.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Following is the statement referred to:

MEMORANDUM RE COTTON PINK BOLLWORM EMERGENCY

A situation has arisen in western Texas which constitutes such a serious danger to the cotton producers of the United States and requires for its relief such prompt action that it seems necessary to call the emergency to the particular attention of Congress.

The cotton pink bollworm, one of the most serious cotton pests of the world, wreaking havoc with the cotton crop of India, Egypt, parts of Mexico, and other countries, has made its way across the border into the United States at various times in the past 10 years, and such outbreaks have been the subject of successful eradication measures. From 1921 until the present season no specimens have been found in the main Cotton Belt of the United States, and active and persistent efforts by all agencies have kept the infestation limited to the isolated plantings of the arid regions of the Southwest and to a narrow strip along the Mexican border in western Texas.

Within the past few weeks this pest, which ranks with the boll weevil in damage to the cotton crop, has been found at one point after another along the western border of the continuous cotton culture in west-central Texas. The first discovery was at Odessa, in Ector County, and all the scouting forces of the United States Department of Agriculture were promptly concentrated in that section of the Cotton Belt. As a result, the pest has now been found in seven counties—Ector, Midland, Martin, Andrews, Glasscock, Howard, and Dawson—containing a total cotton acreage of more than 350,000 acres.

The presence of the pink bollworm in this region threatens to impose another burden upon the cotton producers of the Southern States. If the producers must fight both the pink bollworm and the Mexican cotton boll weevil, which is now known through almost the entire Cotton Belt, they will have more serious insect problems to face than any other cotton-producing region in the world.

To meet this serious emergency the department, on January 27, 1928, transmitted a supplemental request to the Bureau of the Budget, and the Budget approved a supplemental recommendation of $400,000 for the purpose. It was believed that the department could cope with the situation if a part of this sum were to be made immediately available upon the passage of the agricultural appropriation bill. At that time, the infestations in Howard and Dawson Counties had not been discov-

ered, the cotton acreage in those counties being very much larger and more continuous than in the others known to be infested.

The extra expense of scouting which was necessary in order to find these new infestations, together with active clean-up operations which the department has been carrying on in the scattered plantings of southeastern Arizona and southwestern New Mexico, have so depleted the available funds that there is not a sufficient amount on hand to conduct the clean-up operations and eradication measures required.

In order to prevent the establishment of the pink bollworm in new localities, several different operations will be necessary. The pest, unfortunately, remained undiscovered in these areas in Texas until nearly the entire crop had been ginned and much of the lint and seed distributed, without restriction. The insects normally pass the winter in cottonseed and such seed is now present in gins and oil mills in large quantities. Thorough clean-up must be given to such gins and *mills and all* the seed sterilizer, fumigated, or crushed. Large amounts of it have been shipped to oil mills outside the infested areas, and the premises of such oil mills must also be thoroughly cleaned up after the shipments have been traced to destination. Practically all of the cotton lint has been baled and shipped and all such shipments must be traced in order to prevent the establishment of infestations at their various destinations.

This work can not wait until funds can be made available with the passage of the regular agricultural appropriation bill. Within the next few weeks some of the seed may be planted and will then be beyond reach. One of the surest ways of spreading such an infestation and establishing the insect in new localities consists of the shipment and planting of infested seed, and in the past several outbreaks have been discovered and promptly eradicated by the method of tracing cotton-seed shipments from infested areas.

Owing to the large territory affected and the size of the cotton crop in the infested counties and also to the fact that the adult moths into which the pink bollworms develop will soon start emerging, this entire program must be undertaken without delay and completed in the shortest possible time. According to telegraphic advices received from the Governor of Texas, and confirmed by representatives of the United States Department of Agriculture, every slight delay in starting these operations increases the danger of the permanent establishment of the pink bollworm in the regions now found to be infested, threatens its distribution into new localities, and reduces the possibility of its total eradication.

MEMORANDUM FOR MR. MADDEN

The pink bollworm of cotton is the most destructive cotton pest in the world. In all cotton countries where it has become established it destroys from 25 to 75 per cent of the cotton, according to climatic and other conditions.

In 1921 it appeared in several places in Texas and Louisiana. By prompt action of Federal cooperation with the States of Texas and Louisiana the pest was completely eradicated. Since then the pest has not appeared in these areas or any other place in the United States except along the Texas-Mexican border.

Between the infested Texas-Mexican border and the main producing cotton belt of Texas there is a broad stretch of semiarid noncotton-producing land, and it was thought that this pest could not get across this stretch of land into the main cotton-producing areas of Texas.

Recently, however, the pest has been found and definitely identified in seven counties of midwestern Texas, in which a large area of cotton is planted and which connects up with the main cotton-producing area of Texas and all the South. These counties are Ector, Midland, Martin, Andrews, Glasscock, Dawson, and Howard, with a probable area planted in cotton of more than 350,000 acres.

When it was definitely ascertained that the pink bollworm had infested four of these counties the department recommended to the Bureau of the Budget, and the Budget approved, a supplementary estimate of $400,000; add to this the regular Budget estimate of $289,000, makes a total of $689,000 recommended by the Budget for the control and eradication of this pest.

Since this supplementary estimate of $400,000 was sent to the House by the Budget the pest has been found in the two additional counties of Howard and Dawson.

Realizing the gravity of the situation, Dr. C. L. Marlatt, Chief of the Bureau of Entomology, United States Department of Agriculture, went to and is now in the infested areas in Texas, and on the 28th of February replied to a wire from Congressman BUCHANAN as follows:

"Clean-up of gins and regulation of cotton and seed should begin at once in west Texas area. Can the amount which is to be made immediately available be released for use now by joint resolution of Congress? Urgency fully warrants such action."

The pink bollworm reproduces itself by laying its egg in the cotton-seed, and, unfortunately, the new infestations in the seven counties of Texas adjoining the main cotton-producing region was not discovered until after the entire cotton crop had been gathered, ginned, and distributed throughout that section without any restriction or regulations.

Therefore in order to hold this destructive insect to the new infested areas it becomes necessary not only to commence a clean-up campaign at once of all gins, oil mills in the infested region, but to trace all shipment of seed and cotton from the infested areas to its destination before the next planting season, which commences during March, and to see to it that no seed from the infested region is planted to produce another crop without proper chemical treatment.

This creates the imperative necessity that a portion of the above-mentioned appropriation be made available at once, so that the work can be immediately undertaken. To do otherwise would be taking the chances of having this destructive cotton pest scattered over millions of acres of cotton-producing area of Texas. The Federal funds available for this work this fiscal year have been practically exhausted, and are sufficient only for scouting work to determine the limits of the present infestation.

If $200,000 of the $689,000 recommended in the Agricultural bill is made immediately available by joint resolution, and the department thereby enabled to strike in time to prevent the spread of infestation into new areas, it will save both Federal and State Governments many millions of dollars.

The regular appropriation bill will probably not become a law until the middle of April, when many acres of cotton will be planted with infested seed, and that, too, in uninfested areas.

Mr. HUDSPETH. Mr. Speaker, I ask unanimous consent to extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. HUDSPETH. Mr. Speaker and gentlemen of the House, the resolution just called up by Chairman MADDEN of the Appropriations Committee, making available $200,000 immediately for the eradication of the pink bollworm, is a matter of great moment to the farmers and a large number of the people in the district I represent. It has been brought to my attention that the destructive pest, the pink bollworm, has been discovered in a number of counties in my district. There was a meeting held on day before yesterday at Sweetwater, at which large numbers of farmers were present, also the Texas Pink Bollworm Commission and our governor, to discuss the situation. It is a grave one. My friend and colleague Mr. BUCHANAN, a member of the Appropriations Committee and chairman of the Texas delegation in Congress, called a caucus of the Texas Members the latter part of last week. I was present, and the matter was thoroughly gone over. I called attention to the fact that there was placed in the regular appropriation bill $600,000, to be used by the Federal Government to aid in cleaning up the pink bollworm, but it would not be available until July 1; that so far the only pink bollworm discovered in Texas was in the district I represent—the sixteenth; therefore a sum sufficient ought to be made immediately available to commence to combat this great menace to the cotton growers. Hence Mr. BUCHANAN, ever alert in the interest of the welfare of the farmer, conferred with his chairman and aided greatly in bringing forth this important emergency appropriation, which will enable Doctor Marlatt, Chief of the Bureau of Entomology, who also is ever alert and efficient, to join with our State authorities in stamping out this great menace.

Mr. Speaker, I desire here and now to thank the chairman and my colleague and other members of the Appropriations Committee for their prompt work, which means much to the cotton growers in the infested area of my district, whether a regulated zone is established by the Texas Pink Bollworm Commission or a noncotton zone in some localities.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

CALL OF COMMITTEES

The SPEAKER. The Clerk will call the committees.

The Clerk called the Committee on Coinage, Weights, and Measures.

MEDAL FOR COL. CHARLES A. LINDBERGH

Mr. PERKINS. Mr. Speaker, I call up House Joint Resolution 192, to provide for the coinage of a medal in commemoration of the achievements of Col. Charles A. Lindbergh.

The SPEAKER. The Clerk will report it.

The Clerk read as follows:

Joint resolution (H. J. Res. 192) to provide for the coinage of a medal in commemoration of the achievements of Col. Charles A. Lindbergh

Resolved, etc., That in recognition of the achievements of Col. Charles A. Lindbergh, the Secretary of the Treasury is authorized and directed to cause to be struck and presented to Col. Charles A. Lindbergh a gold medal with suitable emblems, devices, and inscriptions to be determined by the Secretary. For such purpose there is authorized to be appropriated the sum of $1,500.

SEC. 2. The Secretary of the Treasury shall cause duplicates in bronze of such medal to be coined and sold, under such regulations as

he may prescribe, at a price sufficient to cover the cost thereof (including labor), and the appropriations used for carrying out the provisions of this section shall be reimbursed out of the proceeds of such sale.

Mr. PERKINS. Mr. Speaker, I ask unanimous consent that the resolution may be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from New Jersey asks unanimous consent that the resolution be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

Mr. PERKINS. Mr. Speaker, this is a joint resolution providing for a gold medal for presentation to Col. Charles A. Lindbergh in commemoration of his achievements. It authorizes the Secretary of the Treasury to strike such an emblem and is in line with many other House resolutions in which medals have been minted to commemorate great events or great personalities.

I might say, however, that in this particular instance the resolution has the full approval of the Secretary of the Treasury, who has said there can be no objection to its issuance—

for in this way the very cordial sentiment of deep regard for Colonel Lindbergh might be given expression—

And—

the purchase of the medal by the public would be a compliment to Colonel Lindbergh without ulterior purpose.

The committee's report on this resolution is unanimous. It has not been felt necessary, nor do I consider it so, to extol Colonel Lindbergh's achievements at this time. No young man in America has made himself better known; none in our generation has been so lauded and praised for his heroic and deserving efforts. His quiet modesty in the face of world-wide flattery and his gentle humility have merited for him the commendation of his country, and this resolution is but in added emphasis of this.

Attached to the committee report, or made a part of its hearing on this resolution, may be found a list of medals struck by the Treasury Department under similar acts. There can be no question, and I am sure there will be no argument, as to the merit of this resolution. I ask that it be adopted unanimously by the House.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

On motion of Mr. PERKINS, a motion to reconsider the vote whereby the resolution was passed was laid on the table.

STANDARD WEIGHTS AND MEASURES FOR GRIST-MILL PRODUCTS

Mr. PERKINS. Mr. Speaker, I call up the bill (H. R. 9040) to establish a standard of weights and measures for the following wheat-mill, rye-mill, and corn-mill products, namely, flours, semolina, hominy, grits, and meals, and all commercial feeding stuffs, and for other purposes.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 9040) to establish the standard of weights and measures for the following wheat-mill, rye-mill, and corn-mill products, namely, flours, semolina, hominy, grits, and meals, and all commercial feeding stuffs, and for other purposes

Be it enacted, etc., That the standard of weights for the following wheat-mill, rye-mill, and corn-mill products, namely, flour, semolina, hominy, grits, and meals, and all commercial feeding stuffs shall be 100 pounds avoirdupois, and the standard measure for such commodities, when the same are packed for sale, shipped, sold, or offered for sale in packages of 5 pounds or over, shall be a package containing net avoirdupois weight 100 pounds, or a multiple of 100 pounds, or one of the following fractions thereof, 5, 10, 25, or 50 pounds; and, in addition, for wheat flour, rye flour, semolina, and corn flour only, 140 pounds; and for commercial feeding stuffs only, 60 or 80 pounds; each of which packages shall bear a plain, legible, and conspicuous statement of the net weight contained therein.

SEC. 2. The standard package for the following wheat-mill, rye-mill, and corn-mill products, namely, flours, semolina, hominy, grits, and meals, and all commercial feeding stuffs, when the same are packed, shipped, sold, or offered for sale in packages of 5 pounds or over, shall be those containing net avoirdupois weight 100 pounds, or multiples of 100 pounds, or the following fractions thereof, 5, 10, 25, and 50 pounds; and, in addition, for wheat flour, rye flour, semolina, and corn flour only, 140 pounds; and for commercial feeding stuffs only, 60 and 80 pounds.

SEC. 3. It shall be unlawful for any person, firm, corporation, or association to pack or cause to be packed for sale, to ship or offer for shipment, or to sell or offer for sale, the following wheat-mill, rye-mill, or corn-mill products, namely, flours, semolina, hominy, grits, and meals, or any commercial feeding stuffs in packages of 5 pounds or over, which, when in original unbroken package form, shall not be one of the standard measures established in section 2 hereof, and bear a plain, legible, and conspicuous statement of the net weight contained therein; and any person, firm, corporation, or association guilty of a violation of the provisions of this act shall be deemed guilty of a misdemeanor and be liable to a fine not exceeding $500. By the term "original unbroken package form," as used in this act, is meant any form of original package or carton or other container made or prepared to contain products for sale in such original package or other container, and purporting to contain any specific weight or measure: *Provided*, That sale of irregular broken lots by actual weight shall not be unlawful.

SEC. 4. The provisions of this act shall not apply to packages of the following wheat-mill, rye-mill, or corn-mill products, namely, flours, semolina, hominy, grits, or meals, or any commercial feeding stuffs when intended for export to any foreign country and packed according to the specifications or directions of the foreign purchaser, agent, or consignee; but if said wheat-mill, rye-mill, or corn-mill products, namely, flours, semolina, hominy, grits, or meals, or any commercial feeding stuffs shall, in fact, be sold or offered for sale for domestic use or consumption, then this exception shall not exempt said articles from the operation of any of the other provisions of this act: *Provided, however*, That when packages of said wheat-mill, rye-mill, or corn-mill products, namely, flours, semolina, hominy, grits, or meals, or any commercial feeding stuffs originally intended for export, have been packed in the packages customarily used in any foreign country, and it becomes necessary to offer these for sale or to sell them for domestic use or consumption, then such export packages may be sold for domestic use or consumption by special contract, if approved by the Secretary of Agriculture.

SEC. 5. Rules and regulations necessary for the enforcement of this act, not inconsistent with the provisions hereof, shall be made by the Secretary of Agriculture, and said rules and regulations shall include reasonable variations or tolerances which may be allowed.

SEC. 6. It shall be the duty of each district attorney to whom satisfactory evidence of any violation of this act is presented to cause proper proceedings to be instituted and prosecuted in a United States court having jurisdiction of such offense.

SEC. 7. This act shall not be construed as repealing the act of July 28, 1866 (ch. 301, Rev. Stat. U. S., secs. 3569 and 3570), authorizing the use of the metric system, but such sections shall not be construed as allowing the packing, shipping, or offering for shipment, the sale or offering for sale, of packages of any size other than those established as standards herein.

SEC. 8. This act shall be in force and effect one year from and after the passage of this act.

Mr. PERKINS. Mr. Speaker, I ask unanimous consent that the bill may be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER. The gentleman from New Jersey is recognized.

Mr. PERKINS. Mr. Speaker, this may be termed a standardization bill. It is familiar to most of the Members of the House, as it has been given approval on this floor on two previous occasions. It passed the House unanimously on February 5, 1923, as well as in 1919.

The purpose of the bill is to establish a standard for bags and containers of certain flours—rye-mill, wheat-mill, and corn-mill products—as outlined in the bill, as well as multiples thereof and fractions of 50, 25, and 12½ pounds. It does not apply to any package under 5 pounds.

The bill has the approval of the departments of agriculture of three-quarters of the States. It is designed to simplify and reduce the number of packages now in use. It has a direct meaning to the millers, because under the present system the standard of weights and measures in these products is regulated by State laws, and inasmuch as there are 48 States, there are practically 48 different standards at the present time.

The bill is asked for particularly by millers who have to carry large assortments of bags and containers. It is difficult for a miller in one State to ship into another State on account of these different regulations. The evidence before the committee has shown innumerable instances where perfectly innocent shipments, entirely proper and legal under the law as to such shipments, contravened the laws in States into which they were shipped.

The bill also has another aspect. At the present time flour and other food products are sold in bags of 96 pounds, 49 pounds, 24½ pounds, and 12½ pounds, and under the existing system the ordinary housewife in buying flour may think she is getting 25 pounds, when, as a matter of fact, she is getting only 24½ pounds.

Mr. DYER. Mr. Speaker, will the gentleman yield?

Mr. PERKINS. Yes.

Mr. DYER. How does this compare with the action of the States which have acted upon the subject?

Mr. PERKINS. This, in effect, indirectly, will repeal all State laws governing these standards and measures.

Mr. DYER. How is the gentleman able to make that statement, that this act will repeal State laws?

Mr. PERKINS. I should not say directly repeal, but under the Constitution of the United States the Congress is given power to regulate standard weights and measures. There is a crying need under the prevailing circumstances for a general standard.

If the gentlemen of the House will take the trouble to refer to the committee hearings, they will find annexed thereto a statement—in fact, also annexed to the report of the committee—showing the great variety of standards used throughout the different States. I do not desire to take the time of the House to read them, but on page 6 of the committee report, Exhibit A, it will be found that out of the 48 States there are practically no two States that agree on the standards fixed by this bill, and no two agree with each other. There is at the present time the greatest confusion existing throughout the Union in this regard.

We all know it is possible to carry this general idea of standardization too far, and it is well that we should carefully scrutinize every bill to see if this is done. In this instance, however, your committee feels much great good will result from this standardization, and it is respectfully urged that it be passed.

The SPEAKER. The time of the gentleman from New Jersey has expired. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. PERKINS, a motion to reconsider the vote by which the bill was passed was laid on the table.

DEPARTMENT OF AGRICULTURE APPROPRIATION BILL

Mr. DICKINSON of Iowa, from the Committee on Appropriations and by direction of that committee, reported the bill H. R. 11577, making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes, which was read a first and second time and with the accompanying papers ordered printed and referred to the Committee of the Whole House on the state of the Union.

Mr. GARRETT of Tennessee. Mr. Speaker, I reserve all points of order.

Mr. DICKINSON of Iowa. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of H. R. 11577, making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes.

Mr. BLANTON. Mr. Speaker, this important big supply bill has just been introduced at the desk, and will not be printed until to-morrow, and it is not available now to Members. How much time is the gentleman going to have for general debate?

Mr. DICKINSON of Iowa. General debate will continue this afternoon and a part of to-morrow, so that there will be plenty of time to secure copies of the bill.

Mr. BLANTON. Then this bill will not be read under the five-minute rule until day after to-morrow?

Mr. DICKINSON of Iowa. We might read a little of it to-morrow, if there is not too much of a demand for general debate.

Mr. BLANTON. This bill will not be available until to-morrow morning? It will be printed to-night.

Mr. DICKINSON of Iowa. The committee prints are available now and the hearings are available now.

Mr. BLANTON. But they are few in number. Does not the gentleman realize we are further advanced right now than we have ever been in any Congress before on the supply bills? We are almost through now.

Mr. DICKINSON of Iowa. Oh, no. There is the naval appropriation bill.

Mr. BLANTON. It is the next to the last one besides the deficiency bill?

Mr. DICKINSON of Iowa. No; then there is the legislative bill. There are two regular bills and one deficiency bill yet to be reported to the House.

Mr. BLANTON. The naval bill is next to the last one, the legislative bill besides, of course, the final deficiency bill. We are further advanced than we have ever been. What is all this hurry about?

Mr. DYER. We want to get home.

Mr. DICKINSON of Iowa. We want to get away.

Mr. BLANTON. You are not going to get away until the middle of May anyway. You are going to have to wait on the other body, because they have had a tentative understanding over there that they are going to adjourn on May 16, I have heard, so after all you are not going to get away until May 16. Therefore, why all this hurry?

I merely want to be sure of sufficient time to check this bill up with former bills and the law.

Mr. DICKINSON of Iowa. We want to get all of the bills into the hands of the Senate so there will be no handicap so far as the House is concerned.

Mr. Speaker, I ask unanimous consent that general debate be continued this afternoon, with the time equally divided between the gentleman from Texas [Mr. BUCHANAN] and myself. We will try to agree to-morrow upon the time for the conclusion of general debate.

The SPEAKER. The gentleman from Iowa asks unanimous consent that general debate for to-day be controlled equally by the gentleman from Iowa [Mr. DICKINSON] and the gentleman from Texas [Mr. BUCHANAN]. Is there objection? [After a pause.] The Chair hears none. The question is on the motion of the gentleman from Iowa.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 11577) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes, with Mr. TREADWAY in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 11577, which the Clerk will report by title.

The Clerk read the title of the bill.

Mr. DICKINSON of Iowa. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

There was no objection.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield 30 minutes to the gentleman from Utah [Mr. COLTON].

Mr. COLTON. Mr. Chairman, the United States furnishes the greatest example in the world of the absentee landlord. It has been estimated that the public domain consisting of about 194,000,000 acres of land, has a potential value of $26,000,000,000. This great area which has such a stupendous value is the property of the people of the United States and over which we exercise no particular supervision and concerning which we have no definite policy.

Mr. MORTON D. HULL. Will the gentleman repeat the figures as to the number of acres and the value of them?

Mr. COLTON. In referring to the public domain, I am speaking of that land which is not in any permanent reserve, just the public domain belonging to the United States over which there is no control or regulation or supervision. There are about 194,000,000 acres of such land left, and it is estimated by the Secretary of the Interior that it has a potential value of $26,000,000,000.

There are some of my colleagues and many of the inhabitants of the Western States who believe that these lands should be ceded to the States. I do not care to enter into a discussion of this phase. We are being confronted by a condition and not a theory. Under our laws as interpreted by our Supreme Court these lands belong to the Federal Government and Congress has the sole right to dispose of them in any manner it may see fit.

I believe that Congress has been derelict in defining a policy for the regulation and control of these lands. Surely we should not put off longer this important duty. In the 11 public-land States the public domain equals one-fourth of the total area; one-third of the total range area of the United States is in those States. The livestock industry of the 11 far Western States with 7,452,000 beef cattle; 25,066,000 sheep; 4,500,000 horses, mules, goats, and dairy cattle, has a valuation of $870,000,000.

Seventy per cent of all of the feed for this livestock is furnished by range lands as native pasturage. Over one-third of the gross farm income of these far Western States is from livestock. For the stable, efficient, and profitable production it is necessary to assure a satisfactory and permanent coordination between feed produced on ranges and that on different range areas.

This public domain equals more than one-third of the area in cultivation in the entire United States. It equals one-tenth of the entire land area of our country. It is largely arid or semiarid; mostly having an annual rainfall of 20 inches or less. It is too dry for profitable crop production. The vegetation on these lands at best is scant and the public grazing as

an asset is being rapidly dissipated through lack of control and regulation.

While this land furnishes 10 per cent of the feed for all of the livestock in the 11 Western States, yet estimates made by experts indicate that these lands are producing only about 50 per cent of their capacity. It is used mostly for grazing in fall, winter, and spring, although some parts are grazed the entire year.

May I pause here to say that many of the figures which I am using, and, indeed, much of the material I am using, has been furnished me by the Forest Service of the United States. I want to give this credit without any further and particular reference.

More than 20 years ago the Government formulated definitely a policy with reference to a part of its public domain by creating the national forests and regulating the grazing thereon. I believe we have now reached a stage where the use of our public ranges outside of the forests should be made a matter of Federal statute. Under the present conditions the established stockmen and home builders have no protection for the public domain which they have to use to make their operations a success and provide a living for their families.

Under the wise provisions of our land laws men have gone out in the Western States and have made homes for themselves and families with the understanding that they had a right to graze on the public domain.

From time immemorial the right to graze upon public lands has been recognized. I still believe in that right, and the time has come when these home builders and home owners must be protected. In order to afford that protection, I believe that Federal regulation offers the only solution and points the only way that protection can be afforded the home builder. Now, an outsider without ranch property or other obligation may go on our ranges at will with his livestock at any time, eat the feed, and pass on, leaving the home-builders' stock to starve or be cared for in some other way. He is forced, as a protection against the tramp stockmen, to graze his range land closer than he would otherwise do. He can not reserve a part of the range for emergencies or for the critical periods of the year. In fact, he can not exercise any of the rights and privileges usually given to stockmen on the forest reserves.

It has been fully demonstrated that where animals were under control in privately owned pastures and even on forest reserves the eradication of disease has been entirely practicable. While at the same time, in contiguous open ranges, vast herds have perished as a result of these diseases and their owners have been practically ruined.

A former tax commissioner of my State, well acquainted with conditions there, states that a part of the public domain will not support one-tenth the livestock it once did.

According to information furnished by the Forest Service, valuable grass types in Montana have deteriorated into a rabbit bush—yellow brush—weed type, supporting but a scant stand of valuable range plants, and now require five to six times as many acres to support a cow as formerly.

The 9,000,000 acres of semidesert type of range in Arizona which is largely public domain has been so badly depleted of its perennial grasses and palatable browse plants that it is practically worthless for year-long grazing and is very uncertain for winter use. It now requires 150 to 200 acres or more to support the equivalent of a cow year long in place of the 50 acres required on this type within the Santa Rita Range Reserve under experimental management.

So, may I say I am not pleading for something visionary. I am only asking that we shall pass a law and put into practical operation that which has been demonstrated can be done, and bring our range lands back to their full productivity.

The 5,500,000 acres of unappropriated public domain with their intermingled State and private lands which lie within the mesa and foothill portion of Arizona will seldom support livestock at a rate of less than 80 to 90 acres per cow year long. This same type of range under conservative grazing on the Santa Rita Range Reserve has carried cattle year long at the rate of less than 25 acres per cow for the last 12 years.

Every acre of grazing land that is not producing forage to its full capacity is a money loss. These ranges must, therefore, not only be perpetuated but they should be made to produce forage to the limit. The national forests in many of the States have a carrying capacity of about one cow unit for each 20 acres of land for a six months' grazing period. By a cow unit is meant one mature cow or the equivalent thereof in sheep, and this is somewhere in the neighborhood of five or six sheep for one cow unit. The public domain has a carrying capacity considerably less than that of the present national forests.

There is located near Ephraim, Utah, a Great Basin Experiment Station for range management, conducted by the United States Department of Agriculture. They have given some attention to this problem and have estimated about 40 acres of land for each cow unit for six months' grazing period. It is believed that on the average, animals can graze approximately six months on the summer ranges in the national forests and about six months on the winter ranges, which are almost entirely public domain.

Tests at the Great Basin Experiment Station have shown that overgrazed grasses are usually a month to six weeks later starting growth than good vigorous plants of the same species. Too close and too frequent cropping of forage plants in my State gave a production during three years of only 24 per cent of that from plants cropped twice during each season.

In the third year the heavily cropped plants produced only 7 per cent as much forage as the plants cropped twice.

The work done at the Great Basin Experiment Station at Ephraim, Utah, proves conclusively that regulated grazing is not detrimental to the land but that overgrazing is not only detrimental to the land but destroys the forage. Interesting experiments at that station show how nature rebuilds the vegetation on the land if given an opportunity. The earlier crops are not nutritious and therefore many of the cattle and horses feeding on these lands die of malnutrition. It is only after from 5 to 10 years that overgrazed lands may be brought back to 100 per cent of their productivity. Similar results have been obtained in Arizona, New Mexico, and other Western States.

Ten representative cattle outfits on public domain ranges similar to the Santa Rita range reserve in Arizona had an average calf crop from 1916 to 1925 of but 53 per cent, an average death loss of 10 per cent, and suffered a 5.8 per cent loss annually on an investment of $55 per cow. (See contrasting statement for Santa Rita below.)

Drought takes heavy toll from public domain ranges. Death losses from cattle in the Southwest on uncontrolled ranges have been as high as 30 to 50 per cent of cattle in some herds in a single year. In 1924, a drought year, many cows in southern Arizona had to be sacrificed at $16 or less a head, some with calves, and buyers refused to take the poorer animals, cutting back as high as 50 per cent of those offered for sale so that many of them had to be left on the range to die of starvation. At the same time cull cows in good condition were sold from the Santa Rita range reserve, a similar type of range but regulated and conservatively grazed for beef, at $35 a head and calves brought an average of about $20.

The public domain together with the uncontrolled intermingled State and private lands form a considerable part of the watersheds which supply water for the 19,000,000 acres irrigated.

The additional erosion resulting from depletion of the perennial grasses which are the main soil binding plants is an important factor in the silting and shortening of the life of irrigation and livestock reservoirs. Some irrigation reservoirs are silting up at a rate of 1 per cent or more of their capacity yearly. Thirty representative large livestock watering reservoirs silted up at the rate of 1 foot a year, giving them a life of less than 15 years.

Heavy rains falling on depleted lands cause rapid run-off and floods which tear out roads, bridges, and other public works, cover farm lands with a blanket of sand and gravel and fill the beds of navigable rivers.

Depletion of soil fertility by erosion is seriously endangering future productivity of the land.

The Jornada Range Reserve was fenced in 1912, then typical open public domain. By 1916 it had four times as much density of valuable grasses as adjoining uncontrolled public-domain range. Both areas were seriously affected by drought after 1916. By 1924 the controlled range on the reserve had decreased to where it supported slightly less than half of its maximum density, but the uncontrolled range at that time supported but 6.75 per cent as much forage as the controlled range. In 1927, following two good years of growth, the controlled range was again back to its maximum; the uncontrolled range had failed to recover noticeably and was covered essentially by worthless, poisonous, and low-value vegetation.

At the United States sheep experiment station in Idaho the controlled range is now approximately 20 per cent better than a similar adjoining open public domain; both areas have been grazed during fall, winter, and spring each year with sheep.

Deferred and rotation grazing applied to a regulated range in Wyoming resulted in an increase of 100 per cent in the vegetative cover in three years, a greater increase than occurred on an area totally protected from grazing—Hayden National Forest experiments.

On the Jornada Range Reserve in New Mexico the average annual calf crop from 1916 to 1925, including seven years of drought, was 65 per cent, an average annual loss of 1.8, a net production of 63 animals from each 100 cows. This compares with an average calf crop of 50 per cent and death losses of 10 per cent, or a net production of 40 head per hundred cows from public-domain range. The more efficient production under regulation spells the difference between profit and loss.

On the Santa Rita Range Reserve in Arizona the average annual calf crop, 1916 to 1925, was 73 per cent and loss 3¾ per cent and the cost of a yearling on the basis of 1925 values $17 a head. This was $5 less per head than it cost to produce yearlings on similar public-domain range. The reserve yearlings were fat and sold for $4 more per head, netting 7.4 per cent *profit to the* stockman on an investment of $85 per head even though prices were then unsatisfactory. This compares with a loss of 5.8 per cent on an investment of $55 on adjacent public domain. The outside range was overgrazed in practically every year. That on the Santa Rita was conservatively grazed. The numbers of livestock grazing on the reserve have been maintained throughout the 13-year period, 1915 to 1927, inclusive, and at the end of that period the range was in excellent condition. On the open public domain, however, the number of livestock varied extremely. The average for the period was less, however, and now the range is badly depleted.

One cattleman in 1919, when cattle were high, purchased with borrowed capital a ranch and approximately 500 head of cattle grazing on regulated range in Arizona. By December, 1927, he had his ranch and cattle entirely free from debt, though this was a period of years considerably below normal. It was not a question of numbers but rather one of adequate feed and the opportunity to apply reasonably good management.

Lambing with pastures and corrals on controlled range in Colorado resulted in saving over 7 per cent more lambs and with less labor than was secured in open-range lambing.

The stand of vegetation can be maintained as well, if not better, under proper grazing than it can under total protection from grazing.

An increase in vegetation from a density of 16 per cent of the soil surface to 40 per cent in high-mountain watersheds in Utah caused a reduction in summer surface run-off of 55 per cent and in sediment eroded from 56 per cent. The year's water supply from the area was not materially affected, however, since 95 per cent of the surface run-off comes from melting snow. The 5 per cent from summer rains, however, carry 88 per cent of the sediment.

These experiments, carried on for a number of years, are interesting and show conclusively the relation between the herbaceous growth on the land and the erosion of the soil. The increase, as I have just stated, of the vegetation from 16 per cent to 40 per cent decreased the erosion 55 per cent.

Regulated grazing on the Manti Forest, in Utah, has practically eliminated the disastrous floods which used to come from the watershed.

A good vegetative cover improves soil structure, allowing greater moisture penetration; it increases the water-holding capacity by increasing organic matter; it breaks the effect of wind; it binds the soil and lessens sheet erosion; it obstructs run-off, reduces the velocity of flow and carrying power of the water, and by catching soil particles it tends to form miniature terraces on slopes and dams and fills in small gullies. Under such conditions erosion is usually slight, and flood waters tend to be controlled at their start.

If it may be admitted, as I think it must, that the grazing on the public domain raises a serious problem, it would follow that some solution of this problem ought to be offered.

A careful study will show that the grazing industry depends upon the central mountain section as a joint unit and ignores almost completely the question of State boundary lines. As you know, there is a considerable migration, especially in the case of sheep, from ranges in various parts of Utah, Idaho, Wyoming, Nevada, and even as far as Oregon, to the winter ranges in southern and eastern Utah. This indicates that the problem is a complicated one, particularly when it comes to handling such things as taxation.

This is simply brought up as an illustration to show that this problem of grazing is not confined to any one State. The State lines are not geographical divisions; they are political divisions. I am mentioning this point in view of the fact that a great many seem to believe it is not a national problem.

Taking for granted that some system of control is necessary if we are to preserve the great asset of public grazing, this brings us to the consideration of the best way to handle the problem. Some have suggested that these lands should be turned to the State and could be handled better on a State basis. This would require the establishment of some system analogous to the system already in operation on the national forests in each State. In order to supervise these lands, it has been estimated by Dr. George Stewart that it would require a man of such training and ability that it would be necessary to pay a salary of at least $5,000 per year. Three state-wide assistants would be required. It is likely that these would cost the State an average of $3,500 each annually, making a total of $10,500. In my State it has been estimated that 12 range districts would be needed, each amounting to 2,000,000 acres in size. Each of these range districts would have one ranger directly responsible to the central grazing chief, and there would be an additional four guards to each ranger.

These guards would have about 500,000 acres of land each under supervision. Experiences in the Forest Service have shown this to be the absolute maximum that one man could hope to guard. This figure is probably the most important number of the estimate and it has been scrutinized and criticized in a variety of ways in order to arrive at its approximate accuracy. This would make 48 guards, who, however, would not be employed regularly for full time. It is thought that one-fourth of these might be employed four months, another one-fourth for six months, still another one-fourth for eight months, and the remaining one-fourth for year-long work. These periods of employment will be approximately the periods of the year that various parts of the public domain are suitable for grazing. This would involve a cost of $55,000 per year for these guards alone. It has been conservatively estimated that it would cost my State, as an example, a total of $113,000, or a cost of $18\frac{8}{10}$ cents per cow unit for six months. These figures do not include any appropriation for investigation research, which would become not only valuable but almost necessary. It would seem that $15,000 per year would be a low estimate for this work.

The income estimated by my State for grazing fees would be $120,000. This would be figuring the privilege of grazing the 600,000 cattle at 20 cents per unit for the grazing period. This might possibly be increased to 25 cents per unit. However, certainly not for the first few years, and until the carrying capacity of the range has been restored by means of careful grazing supervision and management. This would mean a net loss to the State of $7,000 annually, without provision being made for an investigation research. As I have indicated, the same conditions prevail in the other Western States, and while the figures would differ I feel sure the same ratio would be maintained in a study of each of the States.

May I speak for a moment concerning the watersheds? While most of the watersheds of the West are in the national forests, the supervision of the public domain is therefore not so important. Nevertheless, in many of the States it is a problem of considerable importance. Various tributaries of the Colorado River, for instance, drain watersheds in the public domain in eastern and southeastern Utah. I have no doubt that this is also true of many of the streams in other Western States.

Erosion is very general in these areas and although the streams rise principally in the national forests, many of them cross the public domain and improper grazing is bringing about a considerable amount of erosion. Such improper grazing is destroying the forest capacity of the grazing lands, and also increasing the silt problems in the streams and canals.

Some have advocated the passing of the public domain into private ownership, but it is very doubtful if the amount that could be derived by taxation would be anywhere equal to the amount that 37½ or even 25 per cent of the grazing fees from the Federal Government would bring.

Prof. George Stewart, of the Agricultural College of Utah, has made an extensive study of this subject, and I am taking the liberty of quoting some of his conclusions.

The following points deserve consideration in deciding whether State control is more advantageous than control by the Federal Government:

"First. There could, under one management, be a definite and thoroughgoing correlation in the use of the summer and winter ranges. It has already been pointed out that these are used by the same stockmen and there is a regular movement from summer ranges to winter ranges and vice versa.

"Second. The States are not geographical units; and Utah's winter ranges cross State boundaries. Under separate management, friction of various sorts is certain to arise and some of this would in time, without doubt, reach the courts. Federal control obviates this phase of the matter entirely.

"Third. There are some interstate watersheds conspicuous among which is the Colorado River. One of the important factors in handling waters of the Colorado River will in time be the silting problem. You are aware already by first-hand experience of some of the complications arising from separate water rights in this respect. Some of these operate in favor of

Federal control and some in favor of State control. It is probable, however, that the silting problem, which is the chief phase with which grazing would be connected, is largely a matter that Federal control would be more effective in handling. Whatever the virtues of this statement, it is a problem that deserves consideration.

"Fourth. It is likely that a higher net return would be derived by the State as a result of Federal control under the Forest Service.

"Fifth. The civil-service method of employing Federal employees, as opposed to the appointive method generally used by the State, has certain advantages by way of permanent employment which give the man a feeling of security. Roughly, it is safe to say that better men are employed for the same salary when employment is permanent and secure.

"Sixth. It frequently happens that some valuable experience in one State may be transferred to immediate application in another State under a Federal form of administration. There would be a considerable lapse of time before such an arrangement would be operative under separate State control. This might be overstated in part by the possibility of control initiated on the part of separate States. Utah, however, would be touched on every boundary by a State each of which might have a different point of view in these various problems."

Gentlemen, I only want to say in conclusion that a real problem is before us. The public domain to which I have referred is estimated to have a potential value of $26,000,000,000. Nobody is supervising it, nobody is exercising any regulatory control over it. The Interior Department, it is true, supervises the passing of title from the United States to the patentees, but other than that there is no control.

Nomadic herds are going to parts of the country which would otherwise be occupied by home builders, depriving them of their feed that is necessary to support their livestock and thereby their families. Here is this problem lying at the very doors of Congress, and when we plead for consideration, when we plead for the establishment of a policy for the control of this stupendously valuable property, we are scarcely able to arouse any interest whatever.

I have introduced bills in Congress at this session which would give the Secretary of the Interior the right to supervise the grazing upon the public domain. He is first to consider the interests of the small home builder, the man who goes out into the country with the hope of building a home for himself and his family. After this, he is to take into consideration the rights of those who have heretofore used the ranges; and then he is to inaugurate a system of regulation and control that will bring the public domain back to 100 per cent of its productivity. Surely this is important and worthy of consideration.

The future of the livestock industry of the West largely depends upon the action which Congress shall take in this important matter. It will do much toward stabilizing the industry in the West. Moreover, if we do not rise to the situation before long, the asset of public grazing will have been largely dissipated, if not entirely so, because many areas of the West are not producing more than from 25 per cent to 50 per cent of their capacity.

What is everybody's problem seems to be nobody's problem. We introduce bills for the regulating of grazing year after year. They sometimes get scant consideration in our committees, and very much less consideration on the floor of the House. Year after year the Secretary of the Interior reports to us and recommends legislation such as I have indicated.

The President of the United States in at least two of his messages has called attention to the necessity of some such regulation. We are so busy with other problems, sometimes looking afar for problems to solve, and we neglect some of the most important things lying at our very door.

I can scarcely appreciate anything that would be more worthy of the attention of this Congress than the steps that are necessary to preserve the great public domain. Its acres and acres, worth billions of dollars, are in need of our care. We are intrusted with the responsibility of these lands. We must see that something is done. The Government has no policy with reference to its public domain. It is for us to formulate one. [Applause.]

Many of the people in this country are asking for the conservation of the great resources of public grazing because of the revenue to be derived from it. We are asking for the conservation of this great resource for the benefit of our children and our children's children. You ask for its conservation for the dollars it may bring to this country; we ask for its conservation for the happy, contented citizenship of the future. We think in terms of people, not dollars. Give us a chance to build better roads, to have better schools, to make better homes, and we will continue to give to the Nation the greatest asset that this or any other nation could possibly have—a patriotic, home-building, liberty-loving, God-fearing people. [Applause.]

Mr. DICKINSON of Iowa. Mr. Chairman, I yield five minutes to the gentleman from New Hampshire [Mr. WASON].

Mr. WASON. Mr. Chairman, contrary to my usual custom, I rise at this time to call your attention to a matter which is close to the hearts of Members of this House. As you well know, for a number of years I have held a position upon this subcommittee of the Appropriations Committee that prepares the annual agricultural appropriation bill.

When appointed upon this committee we had an eminent Member of the House, Mr. Sydney Anderson, of Minnesota. Later he voluntarily left Congress to engage in other activities. Then the chairmanship went to the State of New York, to our distinguished colleague and friend, Walter W. Magee. It was a privilege and honor to serve with him upon this committee until the sad news from Syracuse was promulgated that he no longer breathed the breath of life. That was August, 1927. As the annual agricultural appropriation bill comes before the House to-day fond recollections of our departed Member fills our souls with grief.

Under the guidance of Chairman Magee the House always felt that it received fair and courteous treatment. Members realized in him the full-grown, capable leader and friend, and in his demise this House and this Congress, those of us who knew him well, feel that we have lost a personal friend and know that the country has lost a capable and wise legislator.

Mr. Chairman, as we present this bill to-day our chairman [Mr. DICKINSON] has kindly yielded me five minutes to express in a feeble way our regret in the death of our former chairman and colleague of this committee. He was a distinguished Member of the House. He is absent, but his influence and his ability and his friendship will not be forgotten as long as we who knew him retain our intellects and breathe the breath of life.

His successor has been on the Appropriations Committee since the beginning of his second term in Congress, which was in 1921. Permit me to say that in the years I have been associated on the Subcommittee on Agriculture with our colleague from Iowa, Hon. L. J. DICKINSON, we were very fortunate that he was available to succeed our former chairman.

In the preparation of this bill under his guidance, care, and industry we have had harmonious meetings, studies, and careful consideration of each and every item, and I feel that I voice the sentiment of my colleagues on the subcommittee in saying that he is a worthy successor to our departed friend and colleague in this position, and I hope and believe that my words and prophecy will prove true as the days roll on, and we will realize that the gentleman from Iowa [Mr. DICKINSON] is a worthy successor of our former chairman, Walter W. Magee.

There are two other members new to our subcommittee at this session, although they are not new members of the Appropriations Committee. One of them comes from the great State of Louisiana, who has been transferred from another subcommittee to this subcommittee—Mr. SANDLIN, a valuable addition to the committee or any committee of this House.

The gentleman from Washington [Mr. SUMMERS] has been a member of the Appropriations Committee for five years. His transfer from another subcommittee to this subcommittee is recognition of his ability, wisdom, and devotion to agriculture. The membership of the committee is such that I am proud to say to the House that I value my humble position on this committee more than words can express.

It is easy to talk about your associates, but the agricultural appropriation bill is an important bill to the producers and consumers of the United States. It carries a large amount of money. We have spent five weeks in hearing testimony and in preparing the bill which carries over $143,000,000 appropriation for 1929.

I hope that our recommendations will meet the approval of the House and be of lasting benefit to those engaged in agriculture and to those in the United States who are dependent upon the success of agriculture. [Applause.]

Mr. BUCHANAN. Mr. Chairman, I yield 45 minutes to the gentleman from Arkansas [Mr. OLDFIELD]. [Applause.]

Mr. OLDFIELD. Mr. Chairman, several speeches have been made on the floor recently, and I want to give some attention to each of those speeches. The gentleman from Michigan [Mr. KETCHAM] delivered a speech on the farm situation in the country a few days ago in which he quoted statistics from the Agricultural Department which at least tended to show that the agricultural population of the country is prosperous and is

getting along all right, and is getting along much better than it did prior to the passage of the Fordney-McCumber tariff law in September, 1922. I do not know what conclusion really would follow from the statistics which the gentleman from Michigan quoted, but I do know that the farming people of the country are probably in worse condition to-day than they have been in a generation.

In other words, the gentleman from Michigan [Mr. KETCHAM] tries to make this House believe that after the war was over and the Underwood law began to operate that the price of farm products began to decrease. In other words, the farmers began to go broke. Nothing is further from the truth. The facts are that the farmers of the country began to go broke when the Republican Party declared in their platform for "courageous and intelligent deflation." Farm products were high and prices of farm lands were high until this platform pledge was written in the Republican platform. The people know that it was due primarily and almost solely to the ruinous policy of deflation which President Harding and his administration imposed on the farmers and the country. They know it, because in the platform adopted at its Chicago convention the Republican Party declared for "courageous and intelligent deflation." That a deflation policy was embarked upon immediately after the Harding administration came into power we all know. How courageous it was, men may judge for themselves; but as for its intelligence, I do not believe there is a living man who will be so bold or so foolish as to praise or to condone. It is strange that gentlemen who sometimes cry loudest on this floor about the distress of the farmer do less than anybody to aid when the opportunity is afforded to be of service.

That tariff reform would go far toward the solution of the problem of agriculture we know on no less an authority than the commission appointed by the United States Chamber of Commerce and the National Industrial Conference to study and report on the problem. Its chairman was a distinguished Republican, the Hon. Charles Nagel, of St. Louis, Secretary of Commerce in the Cabinet of President Taft. Certainly he was not prejudiced against the Republican policy of protection, and yet in his report for that commission Mr. Nagel recommended a revision of the duties to remove some of the discrimination against agriculture. This report has been repudiated by President Coolidge, the Republican Party's leader, and if any Republican in this body who professes to be a friend of the farmer has ever suggested writing those recommendations into policy I have not heard of it. Indeed, at the only opportunity which this body has had to go on record as favoring the principle of the Nagel report, many of those who have been moved almost to tears when telling of the farmer's plight icily voted to table the McMaster resolution and prevent any opportunity to revise the tariff.

The Agricultural Department tells us that from 1920 to 1925 the value of farm lands in the United States decreased from $63,000,000,000 to $47,000,000,000, a decrease of $17,000,000,000. That department also tells us that if we consider the shrinkage in value of farm equipment, buildings, and crops, the decrease goes to $30,000,000,000. That is 50 per cent more than the value of all the railroads in the country.

There has just been issued by the Department of Agriculture a pamphlet entitled "The Farm Real Estate Situation, 1926–27," making some very interesting comparisons about the agricultural industry 15 and 7 years ago and now, a comparison that constitutes a terrific indictment of the Republican Party drawn in the house of its friends. The pamphlet written by E. H. Wiecking, an analyst in the Division of Land Economics of the Department of Agriculture, begins with these words:

> An average decline of 4 per cent in values was the outstanding development of the year 1926–27 in the farm real-estate situation. Declines were especially marked in some of the Corn Belt and cotton States, in some sections reaching 10 per cent.

This drop, says this report, brought farm real-estate values down to a level only 19 per cent above the 1912 to 1914 average, but—

> reckoned from the 1920 peak, farm real-estate values in early 1927 had declined 30 per cent.

Moreover, and worse, the author of this pamphlet shows that measured in—

> constant dollars of the purchasing power * * * farm real-estate values on March 1, 1927, were really worth 20 per cent less than they were 15 years before, or 1912.

The pamphlet next shows that the composite price index of 30 major products prepared by the United States Department of Agriculture dropped within the year 1926–27 from 143 to 127 per cent of pre-war; that net income available for capital invested in the agricultural industry decreased 21 per cent within the year; that the net cash returns of 15,000 farmers reporting to the department dropped 13 per cent during that year, while the net outflow of farm population to the cities for that one year was 1,020,000 persons. Meanwhile, taxes have been steadily increasing, and in 1926 they were 253 per cent of the pre-war taxes which the farmers paid as compared with 155 per cent of pre-war in 1920.

During the same year the department received reports of 40,000 farms sold at administrators or executors' sales, while 163,000 farms were sold at voluntary sales or in trades. If the farmers had been prosperous they would not have been so eager to dispose of their property, so that it can well be imagined that very many of these farms were sold by their owners at heavy losses. In fact, the department says that—

> reports are current of syndicates being formed for the purpose of buying up foreclosed and other distressed farms in the Corn Belt and holding them for a rise in value.

Yet the gentleman from Michigan tries to make the people of the country believe that the farming population is in good condition and is prosperous; much more prosperous than it was a few years ago. But that is not all. We find from statistics of the Federal Reserve Board that more than 3,000 banks failed in this country under the present Harding-Coolidge Administrations.

Mr. HASTINGS. To be exact, 3,941.

Mr. OLDFIELD. Nearly 4,000. As a matter of fact statistics will show that more than 95 per cent of those bank failures occurred in the agricultural sections of the country. Surely the farming population can not be prosperous when nearly 4,000 banks have failed in the agricultural sections of the country in the last 7 years. Yet we are told by the gentleman from Michigan that the farming population is prosperous.

I think that is a sufficient answer to his statement. No person can dispute that statement. The Agricultural Department will not dispute it. Out in Illinois, for instance, in the district of my friend TOM WILLIAMS, I think those black Illinois lands that sold for two and three hundred dollars an acre in 1920 are now advertised for sale, under the hammer, and are being sold at $50 and $60 an acre, and they can not always be sold at those sums. So that undoubtedly conditions are bad in the agricultural sections of the country.

What is the remedy? Some gentlemen on this floor think that the tariff ought to be reduced on those things which the farmers have to buy; that is, the manufactured articles. The farm conference in St. Louis in 1926 passed a resolution that that should be done. My friend from Iowa [Mr. DICKINSON] has made several speeches on the floor threatening to have the tariff reduced on the manufactured articles which the farmers of the country have to buy. Yet, when we have an opportunity here to consider tariff legislation, he and every other Republican from Iowa—and all of the Members of the House from that State are Republicans—voted not to consider the proposition; not to consider the tariff question at this session of Congress. Of course, President Coolidge does not want the tariff question considered at this session of Congress. Secretary Mellon does not want the tariff question considered at this session of Congress. The Republican members of the Committee on Ways and Means do not want the tariff question discussed at this session of Congress. But the farmers of the country would like to see the tariff brought down on certain articles mentioned at the farm conference in St. Louis in 1926.

Mr. COLE of Iowa. Mr. Chairman, will the gentleman yield?

Mr. OLDFIELD. Certainly.

Mr. COLE of Iowa. The Senate resolution called for revision downward, did it not?

Mr. OLDFIELD. The Senate resolution provided that it was the sense of the Senate that excessive tariff rates in the present law should be revised.

Mr. COLE of Iowa. In behalf of the farmers of my part of the country I want to say that they do not want the tariff revised downward on their products. On the contrary, they are insisting that it shall be revised upward.

Mr. OLDFIELD. And what about manufactured articles which they have to buy? What do they say about that?

Mr. COLE of Iowa. I do not believe the farmers are interested in reducing the tariff on those articles. They want to level upward and not downward. They are willing to let the industrial tariff remain where it is, but they do want increases on certain of their agricultural products. The Senate resolution was opposed by my colleague, Mr. DICKINSON, and by the rest of us who represent Iowa, because we do not believe in a revision downward of the agricultural schedules, and the Senate resolution called only for a revision downward.

Mr. OLDFIELD. But not of the agricultural schedules.

Mr. COLE of Iowa. It did not make any exception.

Mr. OLDFIELD. I will just read the Senate resolution—

* * * That many of the rates in existing tariff schedules are excessive, and that the Senate favors an immediate revision downward of such excessive rates, establishing a closer parity between agriculture and industry, believing it would result to the general benefit of all.

There is nothing in that resolution that indicates that it was the sense of the Senate to reduce the tariff on agricultural products, but evidently they wanted to reduce the tariff on manufactured products.

Mr. COLE of Iowa. They made no exception of agricultural products; and what we insist on is an increase in the agricultural tariffs.

Mr. OLDFIELD. Yes; but let me ask you this question: Why did you not vote to send the McMaster resolution to the Committee on Ways and Means and consider that question of increasing the tariff on agricultural products? You have closed the door against yourselves.

Mr. COLE of Iowa. Oh, no.

Mr. OLDFIELD. Oh, yes; absolutely you have closed the door. Every man in this country, it makes no difference how humble he may be, may get up a petition upon any subject and send it to you or to me, and we drop it into the basket, and it is referred to the proper committee by the Speaker of the House. Here was a case where the greatest legislative body in the world, except this House, sent a resolution over here by a vote of 54 to 34. A majority of 20 in the Senate voted for that resolution. And yet every member of the Iowa delegation voted not to increase the tariff on agricultural products or a decrease of the tariff on the products that the farmer has to buy, but closed the door absolutely for this session of Congress for any consideration of this subject.

Mr. DENISON. Mr. Chairman, will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. DENISON. How does the gentleman from Arkansas feel about the revision of the farm schedule? Does he believe it should be revised downward or not?

Mr. OLDFIELD. No; personally, I would be glad and willing to revise the agricultural schedule upward if it is necessary and if it is shown that there is a difference between the cost of producing in this country and abroad.

Mr. DENISON. Take rice, for example. That is produced in the gentleman's State. The gentleman knows that the producers of rice want the schedule increased.

Mr. OLDFIELD. Mr. MARTIN of Louisiana offered a bill to correct the tariff on the rice schedule, and the Ways and Means Committee turned it down cold and would not have anything to do with it because they were afraid it would open up some other features of the tariff law.

Mr. COLTON. Mr. Chairman, will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. COLTON. Did not that McMaster resolution provide for the downward revision of the tariff?

Mr. OLDFIELD. I read it just now. It means manufactured articles. It says:

Many of the rates in the existing tariff schedules are excessive—

It does not say agricultural or manufactured products, but it refers to excessive rates. It reads further—

and that the Senate favors an immediate revision downward of such excessive rates, establishing a closer parity between agriculture and industry, believing it would result in the general benefit of all.

I never heard anybody say on this floor or elsewhere that the disparity was because the agricultural schedule was too high, but always that the manufactured schedule is too high.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. LAGUARDIA. Assuming that the revision would be downward, would the gentleman increase the tariff on agricultural products and reduce it on manufactured goods? And does not the gentleman think that by increasing the tariff on agricultural products the cost of food would be increased to the people?

Mr. OLDFIELD. Oh, the people buy things to eat just as much when they are expensive as when they are less expensive. They buy them just as cheaply as possible, whether they are rich or poor.

Mr. LAGUARDIA. If there were not a tariff on women's garments, the manufacturers or dealers in this country would send their designers to Europe, and we would import them.

Mr. OLDFIELD. Maybe the gentleman takes the same position as Doctor CROWTHER, who wants to forbid the admission of all those imports.

Mr. BEEDY. Mr. Chairman, will the gentleman yield for a moment?

Mr. GARRETT of Tennessee. Will the gentleman yield to me?

Mr. OLDFIELD. Yes; I yield to the gentleman from Tennessee.

Mr. GARRETT of Tennessee. Is it not a fact that the gentlemen who voted as they did, when that aspect of the Senate resolution was presented, voted against saying to their own committee, known to approach these questions from the protectionists standpoint and according to the protectionist theory, "We want you protectionists to consider a proper revision of these schedules"?

Mr. OLDFIELD. Certainly.

Mr. LEAVITT. Mr. Chairman, will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. LEAVITT. Now the gentleman's leader has told him what he has been trying to say. [Laughter.]

Mr. OLDFIELD. Yes; and he always tells it properly and well.

Mr. LEAVITT. As I recall, two years ago the gentleman stated that if he were revising the tariff he would take it off wool and wheat and meat and reduce the duty on sugar. What has the gentleman to say about it now?

Mr. OLDFIELD. I think the gentleman from Montana said that he would take some of the duty off manufactured articles. I think the gentleman referred to that the other day.

Mr. LEAVITT. No; I would not destroy the farmers' market by 1 cent.

Mr. OLDFIELD. If you had your way about it, would you reduce the tariff on manufactured articles, or increase them, or leave them as they are?

Mr. LEAVITT. I would do what is necessary. [Laughter.] "Of course, the loud laugh that speaks the vacant mind" is heard before I have finished the statement. Some would be increased and some decreased, and so far as the agricultural products are concerned, in many cases it would be an increase.

Mr. OLDFIELD. And in no case would it be decreased?

Mr. LEAVITT. I would not say that.

Mr. RAGON. I would like the gentleman in connection with his remarks to say how the Senators from the State of Montana, from which the gentleman comes, voted on the McMaster resolution?

Mr. OLDFIELD. Both the Montana Senators voted for it. Now, Mr. Chairman, let me read what the gentleman from Iowa said.

On December 15, 1926, Mr. DICKINSON of Iowa said:

I do not believe those of us from the Central West are going to stand for a high tariff and say there can be no reduction in the tariff on commodities where they make an excessive profit or assist in monopolizing the control of a commodity.

And on March 2, 1927, he said:

It will therefore be the problem of the farmer to study the tariff schedules and everywhere he sees that exhorbitant prices are being charged, or that excessive profits are being made, he will join hands with those who are asking for tariff revision downward on such commodities in order to secure the equality to which he believes he is entitled.

Mr. DICKINSON also cited the platform adopted at the St. Louis Farm Conference November 16 and 17 which contained the following declaration on the tariff:

We favor the removal or modification of unfair and excessive tariff duties that now afford shelter for price-fixing monopolies. It is idle to refer to manufactured articles on the free list as benefiting the farmer when materials entering into their manufacture are highly and excessively protected. Therefore we urge immediate reduction on such basic materials as aluminum, steel, and chemicals.

In the same speech Mr. DICKINSON uttered this warning:

In my judgment, the party leadership that either admits the lack of a program or shows a disposition to further delay an effort to pass this legislation with no substitute to offer, should be repudiated and dethroned. It is my purpose to leave no stone unturned to bring this question to a final decision at the present session of Congress.

And yet the gentleman from Iowa voted not to consider the tariff question when he voted against sending the McMaster resolution to the Ways and Means Committee, thereby playing into the hands of the enemies of the McNary-Haugen bill repudiating what he said on this floor in 1926 and 1927.

Mr. HASTINGS. Will the gentleman permit me to say that the largest number of bank failures in the United States in the last eight years was 367 in the State of Iowa, and the largest in proportion to population of any State in the Union was in Montana, numbering 188.

Mr. OLDFIELD. Now, Mr. Chairman, the gentleman from Iowa [Mr. DICKINSON] voted against the McMaster resolution

on the 17th day of January, and on the 20th day of January he introduced a tariff bill in the House, which was sent to the Ways and Means Committee, increasing tariff rates on agricultural products. He preferred on the 17th of January to sustain the ruling of the Chair and to sustain the Republican organization in the House, thus making it impossible on that day to have anything considered which he might introduce in the future. Yet he did introduce a tariff bill in three days after that, a tariff bill revising the tariff upward on agricultural products. I think that was a great deal more than inconsistency. Both of the Senators from Iowa voted to send the resolution here, yet, as I say, within three days after that action was taken in the House he introduced a tariff bill which he knows will not be considered and which he knew would not be considered at the time he introduced it, and that he had previously helped by his vote on January 17 to make it impossible to have such matters considered.

Mr. DENISON. Will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. DENISON. I know the gentleman from Arkansas is a gentleman who has some respect for the different duties of the two branches of our National Congress. Does not the gentleman think that a bill of that kind or a movement of that kind should have originated in the House rather than in the other body?

Mr. OLDFIELD. The Senate recognized that.

Mr. DENISON. I do not think they recognized it.

Mr. OLDFIELD. Of course they did, otherwise they would have had some bill introduced there and started to consider it. However, they just passed a resolution saying it was the sense of the Senate, and it passed by a vote of 54 to 34. If an ordinary citizen should have sent such a statement here, it would have been forwarded to the Ways and Means Committee.

Mr. DENISON. I do not believe the Senate had any more right to pass such a resolution than the House would have the right to pass a resolution saying that it was the sense of the House that the Senate should ratify some tretay.

Mr. BLACK of New York. If the gentleman will yield, we have done that.

Mr. DENISON. Not with my vote.

Mr. BLACK of New York. We did that as to the World Court.

Mr. OLDFIELD. The gentleman from South Dakota [Mr. JOHNSON] had a great deal to say the other day as to why he was paired in opposition to this resolution, and why one of his colleagues voted one way and one the other way. Apparently he was afraid, according to his statement, that what was done here would be misconstrued out in his district and in other districts in South Dakota. I think his trouble and the trouble of other Members of this House was that they have been trying to explain away their votes on this proposition. I think the gentleman from South Dakota is afraid that his vote here will be correctly understood instead of being misunderstood. But what I object to about the gentleman from South Dakota is his quoting the senior Senator from South Dakota as saying that southern Senators had combined with Senators from the industrial East to defeat the McNary-Haugen bill. Now, any Senator or Member of this House ought to get his facts straight before he puts them in the RECORD. Now, what are the facts? I shall put the vote in the RECORD, or, rather, an analysis of the vote much fuller than I am going to give it here, because of lack of time, but 58 per cent of the Democrats in this House voting on that question voted for the passage of the McNary-Haugen bill, and 51 per cent of the Republicans voting on that question voted for the passage of the McNary-Haugen bill. In other words, we had a greater percentage of Democrats voting for the passage of that bill than the Republicans had. In the Senate 56 per cent of the Democrats present and voting, voted to pass it there and 52 per cent of the Republicans in the Senate voting on the question, voted for the passage of the McNary-Haugen bill.

Mr. ALMON. Was that at the last session?

Mr. OLDFIELD. That was at the last session. Therefore no Senator and no Member of the House ought to get up on the floor of either body and try to mislead the people by saying that Southern Senators and Southern Members among the agricultural Members of the Democratic Party helped to defeat the McNary-Haugen bill.

The Republican leadership on this floor tried to defeat it but they did not succeed. The present chairman, the man who occupies the chair now, Mr. TREADWAY, and Mr. TILSON, leaders on the Republican side, did everything in their power to defeat this bill. But they did not defeat it; they could not defeat it because they could not get the votes. The President defeated the bill. The President vetoed the McNary-Haugen bill and he had the able assistance of that great farmer, Andrew W. Mellon, in writing his message. Also that other great farmer, Herbert Hoover, helped to write his message; also that great farmer, Attorney General Sargent, of Vermont, helped to write that message; and that other great farmer, Secretary Jardine, of Kansas, was on hand to help the President write his veto message. The President and his Cabinet did everything possible to defeat the McNary-Haugen bill in the House and Senate and failing in this vetoed the bill. They are going to try to defeat it again but I hope they do not succeed. The facts show that they are the people who defeated it. The President, in his veto message, said it was class legislation, but the ink on his veto message had hardly gotten dry before he increased the tariff on pig iron 50 per cent. He increased it all he could. He did that for the benefit of the Steel Trust. Yet the record shows we exported 50,000 tons of pig iron last year and imported 132,568 tons and we produced 36,289,112 tons. We imported less than one-third of 1 per cent of our production. Everybody knows that and there is no question or doubt about it. Under the flexible provisions of the tariff law he has almost always increased the tariff except on bobwhite quails, paintbrushes, and things of that kind.

Mr. COLE of Iowa. Will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. COLE of Iowa. What was the tariff on pig iron?

Mr. OLDFIELD. Seventy-five cents a ton, and he raised it to $1.12½ a ton, just as much as he could under the law.

Mr. COLE of Iowa. I know, but the tariff on pig iron was very low, and the increase was correspondingly small.

Mr. OLDFIELD. Does the gentleman think he should have done that? If the gentleman thinks he should have increased the tariff on pig iron and vetoed the McNary-Haugen bill at the same time, let him say so.

Mr. COLE of Iowa. I have no objection to what the President did in behalf of pig iron, because the same President with the same pen a few months before had increased the duty on butter from 8 cents to 12 cents a pound, on wheat from 28 to 42 cents, and as soon as we can get it through the Tariff Commission, the same President, I believe, will increase the duty on corn from 15 cents to 22½ cents. That is the kind of President we want. [Applause.]

Mr. OLDFIELD. You can have him so far as I am concerned.

Mr. COLE of Iowa. He is in favor of increasing the duties on agricultural products and so are the farmers.

Mr. OLDFIELD (continuing). And I think he wants to be nominated again, and I think probably the gentleman wants him nominated.

Mr. WILLIAM E. HULL. Does the gentleman want him nominated?

Mr. OLDFIELD. Yes.

Mr. BLACK of New York. Will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. BLACK of New York. I have come over to the Republican side to make this statement. I do not think the gentleman wants to be unfair to the President. The gentleman has overlooked something he has done for the farmers.

Mr. OLDFIELD. What is it?

Mr. BLACK of New York. The only class of labor in the navy yards that had a salary increase last year was a couple of gardeners in the navy yards, and that was done in the interest of agriculture. [Laughter.]

Mr. OLDFIELD. Now, Mr. Chairman, I want to say a few words in reply to a speech made by my good friend, Doctor CROWTHER, here the other day. There are various tariff thoughts or views in the Republican Party, although not in the agricultural sections; but Doctor CROWTHER is consistent. In answer to a question that Mr. GARNER of Texas propounded to Doctor CROWTHER the other day, the gentleman from New York [Mr. CROWTHER] made a statement that I want to refer to. This is the question propounded by the gentleman from Texas [Mr. GARNER]:

> Mr. GARNER of Texas. If I understand the gentleman's position with reference to the protective tariff, it is that he would produce everything in this country that we could produce and would not import anything that can be produced in this country.
>
> Mr. CROWTHER. I should favor such a proposal.

Now, my friends, Mr. Fordney, who had a great deal to do with writing the Fordney-McCumber tariff bill, believed the same thing. Secretary of Labor Davis believes it so far as manufactured articles are concerned. I assume Doctor CROWTHER believes it with regard to manufactured articles and also with regard to farm products.

The question referred to everything we can produce here, and I assume the gentleman means there should be a Chinese wall around America stopping everything at the wall—farm prod-

ucts and manufactured articles that can be produced in this country.

I do not know how many Republicans believe this. I certainly do not believe it. But there is another very important Republican in this country who believes it. Secretary of Labor Davis is quoted in an editorial in the New York Times as follows:

America should have a tariff that will not permit anything to be imported from a foreign country that we can make in our own land.

Mr. CROWTHER. Will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. CROWTHER. I think in that same speech the gentleman will find a quotation that I put in the RECORD from Thomas Jefferson verifying that position. I wish the gentleman would read that.

Mr. OLDFIELD. I will look it up and see if it is in here. I do not think Jefferson ever had any idea that we would have embargoes on any sort of product. I am sure he did not favor any such policy, and that is what the gentleman meant. That is what the gentleman's answer to the question would mean.

Here we have a great country, and we can produce practically everything in America if the tariff wall were high enough, except possibly coffee and rubber, and I notice Mr. Edison states we can produce rubber in this country. We would produce everything and bring in absolutely nothing. I wonder if the gentleman from New York would be in favor of that?

Mr. CROWTHER. I do not want to bring in any farm products that would put our farmers out of business.

Mr. OLDFIELD. Does the gentleman want to bring in any at all?

Mr. CROWTHER. We brought in $1,000,000,000 worth during 1926.

Mr. OLDFIELD. Does the gentleman want to bring in any at all?

Mr. CROWTHER. I think it would be just as well if we did not bring in any that we can raise ourselves. [Applause.]

Mr. OLDFIELD. That stops absolutely international trade of all kinds.

Mr. CROWTHER. Oh, no; it does not.

Mr. OLDFIELD. Absolutely; if you are not going to bring in a dollar's worth of farm products from abroad or a dollar's worth of manufactured articles from abroad, how are you going to have any trade with foreign nations?

Mr. CROWTHER. Will the gentleman yield?

Mr. OLDFIELD. I yield.

Mr. CROWTHER. The gentleman from Arkansas and many other members of his party made just such speeches as this when the Fordney-McCumber bill was under consideration.

Mr. OLDFIELD. Yes.

Mr. CROWTHER. They went down into the well there and wept copious tears and drew pictures of the world falling off into primeval chaos and the stars ceasing to shine if we passed the Fordney-McCumber tariff bill——

Mr. OLDFIELD. Ask the question.

Mr. CROWTHER. And yet we have done more business with foreign countries under that bill than we have ever done under any tariff bill since such bills were written.

Mr. OLDFIELD. Yes; the gentleman stated it brings in $600,000,000 a year to the Treasury; and, as a matter of fact, it costs the people of this country, the consumers of America, $6 for every dollar brought into the Treasury.

Mr. CROWTHER. I would just like to know how the gentleman figures that.

Mr. OLDFIELD. All the experts and economists figure it that way.

Mr. CROWTHER. Oh, I do not take much stock in experts. [Laughter.]

Mr. GREEN of Florida. Will the gentleman yield?

Mr. OLDFIELD. I yield to the gentleman from Florida.

Mr. GREEN of Florida. I want to say to the gentleman from New York that his expert tariff system protecting manufacturing enterprises only is about to drive the tomato producers and other vegetable producers of my State out of business on account of the Mexican and Irish agricultural products which you are permitting to come in under your present tariff law.

Mr. CROWTHER. And I am anxious to increase their tariff.

Mr. GREEN of Florida. Why does not the gentleman's party do it? Your committee will not bring out anything.

Mr. CROWTHER. Mr. Chairman——

Mr. OLDFIELD. Mr. Chairman, I do not yield further.

The statement of the gentleman from Florida is true. The Ways and Means Committee will not undertake to consider the tariff question and the gentleman from New York knows that as well as I know it. The gentleman will not undertake to do it because he is afraid something will get into the bill that he does not like.

Mr. CROWTHER. Will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. CROWTHER. As I said to the gentleman from Texas [Mr. GARNER], the other day, I think we could pass a tariff bill here because we know how to do business in the House. We can go over to our committee, and as I told him, I think with the help of the liberal-minded Democrats—I did not have the gentleman from Arkansas in mind, I was talking to the gentleman from Texas [Mr. GARNER], because I recognize the gentleman from Arkansas as a free trader, of course.

Mr. OLDFIELD. I am not a free trader.

Mr. CROWTHER. I would like to ask sometime the men on the gentleman's side of the House to raise their hands if they subscribe to the theory of free trade. We would not find more than five or six of them. Your men are protectionists.

Mr. OLDFIELD. Is the gentleman through with his question?

Mr. CROWTHER. No.

Mr. OLDFIELD. Ask the question.

Mr. CROWTHER. Does not the gentleman think it would relieve agriculture if we could get a rule for such a bill, bring it in here, and name the hour for the previous question and pass it, but we could not pass it in the other body?

Mr. OLDFIELD. All right; I will answer the gentleman. I am perfectly willing to consider any bill the gentleman from New York will introduce and am ready for its consideration in the Ways and Means Committee. The Democratic Party is not a free-trade body and never has been. The trouble about the gentleman from New York and the gentleman's President is that he wants a greater tariff than will equalize the difference between cost of production at home and abroad.

Take the sugar proposition—the Tariff Commission more than a year ago reported to the President of the United States, upon the President's request, that $1.23 per hundred pounds on sugar instead of $1.76 per hundred pounds was ample to take care of the difference in cost between the production at home and abroad. They also called to the attention of the President the fact that the difference between $1.23, which was all that was necessary, and $1.76 in the Fordney-McCumber tariff law cost the people of the United States $75,000,000 a year, and only $35,000,000 got into the Treasury. The $40,000,000 went into the pockets of the sugar producers as a subsidy. And yet President Coolidge pigeonholed the report and it was like twisting a rabbit out of a hollow log to get it from him. Does the gentleman want a greater duty on sugar than that which will equalize the difference between the cost of production at home and abroad? That is what the Democratic Party will stand for—will you do it?

Mr. CROWTHER. I am not wholly in favor of that; I do think it is necessary for a rate to be really protective. Apparently, from statements the gentleman has made about the sugar question, he is satisfied with the deductions and opinions of the Tariff Commission on sugar, but he did not believe in it in regard to wheat, butter, and pig iron, all of which duties were increased.

Mr. OLDFIELD. I have not discussed the wheat or the butter question.

Mr. CROWTHER. It took nearly six years to get the data and figures on pig iron and the consequent raise in duty.

Mr. OLDFIELD. If anybody has been prosperous for the last six years it has been the steel companies and the automobile manufacturers, but the farmers have not been prosperous either in my part of the country or the gentleman's part of the country. The tariff was increased for the purpose of increasing the price of steel. Nobody wants an increase in the tariff unless it is to raise the price of their commodity. Is not that so?

Mr. CROWTHER. It is not.

Mr. OLDFIELD. It is true because it enables them to increase the price.

Mr. CROWTHER. The gentleman does not seem to know as much as he ought to on this subject. [Laughter.]

Mr. OLDFIELD. The gentleman knows that everybody is for the raising of the tariff for the purpose of increasing the price on the thing that the tariff applies to. And everybody knows people would not go to the expense of coming to Washington and lobbying for particular tariff rates if they did not think it would put money in their pockets.

Mr. CROWTHER. That is not so and never has been. The gentleman can not cite any facts to support that statement.

Mr. OLDFIELD. It is not necessary to cite any facts on that proposition. Everybody except the gentleman knows it.

Mr. CROWTHER. The gentleman talks about the steel companies; he ought to know that a great many of the steel com-

panies in this country were opposed to raising the duty on pig iron because their money was invested abroad in pig-iron plants.

Mr. OLDFIELD. Nobody ever saw any great headlines in the newspapers to that effect.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. OLDFIELD. I yield.

Mr. GARRETT of Tennessee. The gentleman from New York says it took six years to get it out; in view of the President's former action, is not the gentleman surprised at his moderation? [Laughter.]

Mr. CROWTHER. I am not, because I believe the President is a protectionist at heart and has the welfare of this country at heart. [Applause.]

Mr. GREENWOOD. Will the gentleman yield?

Mr. OLDFIELD. I yield.

Mr. GREENWOOD. There is one instance I would like to call the gentleman's attention to, and that is linseed oil, which is a component part of paint and which the farmers need. I transmitted a communication to the President urging action on reducing the tariff on linseed oil, because I appreciated the fact that he was the only one who had the power to do it, since the House would not act.

I got a nice letter from the President, saying he had referred it to the Tariff Commission, and had it under advisement. I also got a letter from the Tariff Commission, saying that nearly a year ago they reported to the President that the duty ought to be reduced.

Mr. OLDFIELD. He follows the recommendations of the Tariff Commission when it suits him, and does not follow them when it does not suit him.

Now, the gentleman from Massachusetts [Mr. TREADWAY] made quite a speech the other day, and the burden was what a wonderful accomplishment the Limitation Armaments Conference was in 1922. Think of it! The wonderful accomplishment of the Limitation Armaments Conference! As a matter of fact, by that conference we lost 825,000 tons of battleship tonnage, aggregating nearly $300,000,000 worth of the finest battleships that ever floated the seas. Yet the gentleman from Massachusetts [Mr. TREADWAY] thinks that was a great thing for the country. It was such a great thing for the country that they put it in the Republican platform in 1924, and the President in one of his speeches called the attention of the country to the fact that it did not seem to appreciate what a wonderful thing Secretary Hughes had done at this armament conference. Of course, everybody knows that the British destroyed only a few blue prints, some pictures of ships, while we destroyed $300,000,000 worth of the finest ships in the world, and the taxpayers will have to foot the bill. Some more of Coolidge constructive economy. Then the President wanted to get himself out of that hole, and he called a conference at Geneva, and what happened there?

About the only thing they talked about over there was the tariff; but our commissioners went there with hat in hand and tried to persuade the British to destroy some of their submarines and some of their cruisers. They pleaded with them and begged them to do it. Of course, they did not do it. In other words, Secretary Hughes went into this Limitations of Armaments Conference and matched his diplomacy against British and European and oriental diplomacy. He went in attired in full dress and came out wearing a barrel—and nothing else. The President went along and advertised to the country what a great thing had been done for the world, and now it develops, several years afterwards, that what was done was a dis-service to the country instead of a service to the country and to the world. The Geneva conference was also a failure. I presume the Republicans will say in their platform this year that that was a great success. I can see them now writing into their platform a great boost for this Pan American conference at Habana. Of course, we have not the official report of the Pan American conference at Habana, and it is impossible for us to tell what was accomplished there, but we do know from the newspaper reports that the Central and South Americans wanted to talk about the tariff down there; they wanted us to reduce our tariff so that some of their products could find a market in this country. Then they wanted to talk about immigration. Of course, those questions were taboo. They wanted to talk about Nicaragua also, and there was a good deal of talk about Nicaragua. The fact is, from the newspaper reports, every country in Central and South America is suspicious of us. They fear this great colossus of the north. Not only that, but every country in the world to-day is suspicious of the United States of America on account of our restrictions in respect to tariff and other restrictions upon international trade we have put in our laws.

We try to shut out everything that anybody else produces or makes anywhere in the world. Just take the city of New York, the greatest city in the world to-day. In 30 days she would be starved to death if she did not buy anything. If she never bought anything, she could not exist. There is no State in this Union, the great State of Pennsylvania or the great State of Illinois or any other State, which if it sold everything and bought nothing or bought everything and sold nothing, could exist.

Mr. BLACK of New York. Is the gentleman speaking of votes?

Mr. OLDFIELD. No; I am talking about farm and manufactured products.

Mr. ARENTZ. Mr. Pueyrredon, the ambassador from the Argentine, is the only one who brought out the matter of a tariff. The argument against taking the tariff off Argentine beef was a matter of the foot-and-mouth disease. If the gentleman from Arkansas or anyone else in the South wants that class of cattle to come into the American market——

Mr. OLDFIELD. Of course, I do not.

Mr. ARENTZ. And break down the livestock industry of the country, then I think they would be a party to a very serious thing.

Mr. OLDFIELD. Yes. Is the gentleman through?

Mr. ARENTZ. Yes.

Mr. OLDFIELD. I agree with the gentleman thoroughly. I do not want diseased livestock coming into America from anywhere. My proposition is that the countries represented at Habana are suspicious of America. They do not like us; they fear us. They see us fixing to build the greatest Navy in the world, so the newspapers say.

The world owes this country $25,000,000,000 to-day. Do you think that the world can owe us $25,000,000,000 and then we not trade with the world? Impossible! Economic law is the most forceful law that we have. When they owe us that much money, we have to sell to them and we have to buy from them. This country can not live unto itself alone any more than an individual can. Therefore, I say to you that we ought to have our tariff law reasonable. Most of the Republicans used to say that all they asked for in the way of a tariff was a tariff high enough to equal the difference in the cost of production at home and abroad. I was in favor of bringing the matter up in the committee and trying to pass a bill and relieve them if the proof and the facts showed that it is necessary to have a reasonable tariff in order to cover the difference in cost of production at home and abroad, but if you can not get together on that sort of a bill, if Mr. CROWTHER will not agree to that sort of a bill, then we could bring it out of the committee onto this floor and let the House decide the kind of a tariff bill it wants to pass, and if the Senate changed it materially, we could refuse to agree to the Senate amendments; but you gentlemen are afraid to have a tariff discussion.

Mr. McMILLAN. The gentleman means the Republicans?

Mr. OLDFIELD. Yes; of course.

Mr. WINTER. Is not the gentleman from Arkansas satisfied with the purchase of about $5,000,000,000 worth of goods a year from foreign countries?

Mr. OLDFIELD. Certainly, if that much comes here.

Mr. WINTER. Is not that the fact?

Mr. OLDFIELD. I do not think it is that much.

Mr. CROWTHER. It is considerably over $4,000,000,000.

Mr. OLDFIELD. Here is the trouble about that. We export more than we buy, and so long as we export more goods than we buy, we are ahead. Do you believe we ought not to have any foreign trade? If you say that you do not want $5,000,000,000, then why $1,000,000,000 worth, and if you do not want $1,000,000,000, why any? Surely the Republican Party does not mean that they want a Chinese wall around this country, an embargo, so that nobody can trade with us. Yet from the arguments you make—and you have gone back on that argument about the difference in cost of production at home and abroad——

Mr. LaGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. LaGUARDIA. The gentleman says that all he requires is the difference in the cost of production at home and abroad. Does the gentleman realize that taking the present cost of production and the present rate of exchange if the tariff were revised on that basis there would be an increase in the tariff on most manufactured articles?

Mr. OLDFIELD. Let me read you something on that question.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. BUCHANAN. Mr. Chairman, I yield the gentleman five minutes more.

Mr. OLDFIELD. Let me explain that thing to you. I presume a good many Members on this floor know Mr. Jackson Johnson, of the International Shoe Co., personally. He is at the head of the greatest shoe company in the world, with an invested capital of $75,000,000, and with thirty thousand and odd operatives. There is no protection on shoes and here is what he says about the tariff:

The shoe industry neither needs nor wishes protection. Certain industries may need a degree of protection, but in a general way the tariff is too high. No industry is entitled to 60 per cent to protect 25 per cent.

He further declared that there is a good deal of politics in the talk about the benefits of the protective tariff to labor, adding that American wages are higher than European, not because of the tariff, but because of the greater natural resources of this country, the more efficient organization of American industry, and the greater productivity of the American workmen. In the shoe industry he said that this superiority amounts to the production of twice as many shoes per workman than in England. The ratio of labor cost to the value of product is as great or greater in the shoe industry than in any of the protected industries.

I want now to read what Mr. Benjamin L. Winchell, president of the Remington Typewriter Co. said. He said:

We do not want a tariff, we don't need a tariff, and so far as I can see now, we never will need any. If we needed one, I am sure that we could get it.

Of course, and everybody else knows that he could get it if he needed it. He would get it if he asked for it, whether he needed it or not, while the Republican Party is in power.

When Mr. Winchell was asked if foreign competition had cut his company's business or forced it to reduce the wages of his workers, he laughed and said:

All the foreign typewriters sold in the United States could be put on this table. There simply isn't any foreign competition. On the other hand, we have carried the war into the enemy's territory so successfully that the Remington Co. sells more typewriters in Europe than all the European companies combined. In the case of Germany and Italy, it sells them over a tariff barrier erected by those countries to keep them out.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. OLDFIELD. Yes.

Mr. LAGUARDIA. Is not that because they have not learned to make typewriters abroad yet?

Mr. OLDFIELD. Here is the reason which this gentleman gives. He gives the reason here:

Put the American workman in a modern factory, give him the most improved machinery, put him under competent and intelligent foremen, and pay him high wages, and there isn't anything in the world that can touch him. He will turn out a better product than the foreign workman and he will turn out twice as much of it.

There is nothing on the face of the earth that can touch the American workingman.

Now, the other day Doctor CROWTHER referred to the textile industry as being in the dumps. Yet the textile industry has the highest tariff of any industry in America and pays the lowest wages. Nobody can dispute that. They have the highest tariff of any industry and pay the lowest prices.

The gentleman from New York also spoke of the cement industry. I do not know much about that. Then he talked about the railroads. Everybody was in the dumps. And yet the President has proclaimed general prosperity. You have had the Fordney-McCumber tariff since 1922, and under it we have the highest tariff rates that this country or any other country has ever seen; and now, forsooth, when we have hard times in the coal industry and in the textile industry and in agriculture and when 4,000,000 men are out of work and half that many more working part time what do the Republicans want to do? These quack doctors of the Republican Party have always said: "Raise the tariff, and it will cure all the industrial and economic ills of the country." Now, what do they want to do? They want to give them a double dose of the same medicine. President Wilson was right when he said the Republicans had not had an original idea in the last 50 years. [Applause.]

Mr. BUCHANAN. Mr. Chairman, I yield 50 minutes to the gentleman from Texas [Mr. MANSFIELD].

The CHAIRMAN. The gentleman from Texas is recognized.

Mr. MANSFIELD. Mr. Chairman, I recently clipped from the Washington Star a dispatch, which I ask the Clerk to read.

The CHAIRMAN. Without objection, the Clerk will read.

The Clerk read as follows:

HOLDS FARM ILLS DUE TO LAZINESS—T. F. HOPKINS, LARGE-SCALE OPERATOR, BLAMES AUTO FOR RURAL PLIGHT

CHICAGO, January 31.—What's wrong with the farmer, according to T. F. Hopkins, of Liberal, Kans., is that he lacks gumption and "get-up." Hopkins, who owns and operates a 2,000-acre farm near Liberal, voiced his views at the Interstate Commerce Commission hearing on grain rates now being held here.

"The American farmer is shiftless and lazy," said Hopkins. "He joy rides around in unpaid-for automobiles instead of attending to his work."

Hopkins had been called to testify as to his methods of farming, because the commission had been told his operations have been successful.

"Every farmer who spends his time tending his farm is making a go of it," he said. "If the average farmer worked as hard as the business man in the city, we wouldn't hear any more of this talk about hard times on farms.

"We have some good farmers, but we have a lot of poor ones. Most of these unsuccessful ones buy automobiles on the installment plan before they get their crops harvested. Any lack of success they have is due to laziness, shiftlessness, and improvidence. The automobile is a necessity, but it is too big a temptation for most of them, and they spend more time riding around than is good for their farms.

"On my own farm I do everything by machinery and tractors. I haven't a single horse or mule on the place."

Mr. MANSFIELD. Such is the viewpoint of the man who cultivates 2,000 acres by high-powered methods. His establishment will represent an investment of at least a quarter of a million dollars.

A writer in the Saturday Evening Post of last spring, Mr. Garet Garrett, in a series of articles presented some interesting thoughts upon the farm problem. Under his proposed solution, one-fifth of the people engaged in agriculture should be driven from the farms into other pursuits, and let the other four-fifths cultivate larger tracts of land by high-power machinery and other methods so as to reduce the cost of production. He said:

At the end of the regional agricultural conference held last year at Salt Lake City one man stood forth and said, "There is only one solution for the farmer to-day. Seventeen per cent must be ruined and driven off the land."

These words produced a deep psychic scandal. What a monstrous suggestion; yet everyone knew the truth. The truth is that one-fifth of the people now engaged in agriculture are economically unnecessary. They are wasting their labor and capital; they are a liability on the four-fifths who, with a very slight improvement of method, or with only the incentive of a little more profit, could easily produce the crops at a much lower average cost. The marginal fifth of the farm population is the body of distress. It adds to the surplus the breaking weight when the price is high and clamors for relief when the price is low.

Mr. Garrett expressed the view that the farmer did not understand the methods of either industry or agriculture. He said:

Not only is it difficult for the farmer to understand industry, there is a second complication. He does not understand agriculture either.

Commenting upon the farmers' belief that industry had prospered by the tariff and by organization to control surpluses and prices, he said:

Power of organization is not the secret of industry's profit. Neither is it the tariff. The secret is method. And that is the hardest single truth to put upon the farmer. He wishes not to believe it; or if he does believe it, he is obliged to look to his own methods. He would much prefer to think it is organization.

Mr. Garrett is an advocate of big business, on big-business methods—mass production by high-powered machinery. If little business can not compete, let it go to the wall. These methods, he claims, have made the success of industry, and can be applied with equal success in agriculture. He further says:

Fortunately, as it happens, the great staple crops that get agriculture into trouble, such as cotton, wheat, and corn, of which we produce an exportable surplus, are the crops that lend themselves to methods of intensity and power. The problem is not the price; it is how to reduce the cost of production to a point at which we can afford to sell the surplus at the world price, whatever that is.

He has a great deal to say of the little farmer, who is without method. He says:

And how involved the agricultural pattern becomes to be. The old and the new are in conflict still. A man with a mule and one bottom plow cotton patching in Alabama; another producing cotton by the

tractor method on a low-cost basis in Texas—the same staple for the same market. Which do you think will survive?

Mr. O'CONNELL. Mr. Chairman, will the gentleman yield there?

Mr. MANSFIELD. Yes.

Mr. O'CONNELL. Might not that gentleman's attitude be due to the fact that he thinks there are more and better farmers in Texas than in Alabama?

Mr. MANSFIELD. That is probably true; but he is in error, I believe.

Mr. McMILLAN. He is more of a geographical expert than a farming expert?

Mr. MANSFIELD. I believe he is an expert on paper farming.

In another connection he uses this language:

The one-mule cotton patcher in Alabama is the weevil in the fortune of the man producing cotton at a low cost by high-power methods in Texas.

Now, we all know that the only thing to do with the weevil is to poison him. This writer would have us treat the little farmer in that way when his business interferes with the business of the big farmer.

Just why this gentleman should give to the farmer of my State such a distinction over the farmer of the State of Alabama is beyond my comprehension. I can account for it only on the supposition that he may at some time have attempted real dirt farming in Alabama, while his Texas ventures have evidently been altogether on paper.

These were not the only allusions he made to the high-power Texas methods of producing cotton. He referred to the way in which we use the airplane and the tractor in dusting the poison upon the vast domains of cotton to kill the boll weevil. Also to the sledding process of gathering cotton, by which one man with this machine can do the work of a dozen or more cotton pickers, who insist upon picking cotton as our grandfathers picked it, by hand, out of the boll, one boll at a time. He assumes, of course, that all these high-powered methods of which he speaks have passed the experimental stage.

It is admitted by all that the sledding machine gathers with the cotton vast quantities of bolls, hulls, limbs, and trash of every description, but then, it is claimed, another high-powered labor-saving machine is applied at the gin. This machine, at low cost of operation, so thoroughly and completely separates the lint from the trash that the staple, when offered in the market, is so nearly faultless that it can not be distinguished from that which, when garnered, may have felt the delicate touch of the dainty fingers of a modern Ruth.

Oh, Mr. Chairman, cotton farming in Texas on paper is the most fascinating and successful business in all the world. Why, sir, it surpasses even the dreams of Henry Ford or Charles M. Schwab. Yet we find that in the year 1926 a tiny Government report, no larger than a man's hand, gave to the cotton market such a nose dive that the farmer, big or little, has not yet recovered from the shock. What the cotton farmer now stands most in need of is a parachute of some kind that will enable him to strike the bottom a little more gently the next time a department official opens his mouth.

The sledding process of gathering cotton having been referred to in such glowing terms, it should not be permitted to pass without further knowledge of the facts. Mr. Garrett's articles published in the Saturday Evening Post, have been read by several million people, who have been left under the impression that all the cotton crop of the United States can be gathered in that manner and at comparatively small cost. Gathering the crop being the greatest of the cotton farmers' problems, and it supposedly having been by this process so successfully solved, the farmer can prosper, if he will, and neither needs nor deserves any consideration at the hands of Congress. But what are the facts?

The sledding process can not be applied at all except in a few limited areas near the north border line of cotton production. Parts of Oklahoma and that portion of Texas known in history and in song as the Llano Estacada, or Staked Plains, are so far the only places where any extensive use of the sled has been made. In those sections, the Department of Agriculture in conjunction with the agricultural and mechanical colleges of Texas and Oklahoma have experimented quite extensively. Many thousands of bales have also been gathered by the farmers in those sections, with a greater or less degree of success.

In the year 1926, on account of the great slump in the cotton market, and on account of a scarcity of labor, the cost of picking and ginning a bale of cotton was about equal to the market value of the cotton after it was made ready for the market. Consequently, large quantities were permitted to go to destruction in the fields. Sledding was extensively practiced in the regions where found practicable, but principally, however, as a salvaging proposition. Several hundred thousand bales were gathered in that manner, but in 1927 we find that only 50,000 bales were so gathered. The facts will disclose the reasons for this reduction.

Not relying altogether upon my own judgment as to the sledding of cotton, I wrote to Hon. George B. Terrell, head of the department of agriculture of the State of Texas. I have here Mr. Terrell's reply, which I will ask the Clerk to read.

The Clerk read as follows:

DEPARTMENT OF AGRICULTURE, STATE OF TEXAS,
Austin, January 20, 1928.

Hon. J. J. MANSFIELD,
Member of Congress, Washington, D. C.

MY DEAR SIR: Yours of the 16th in regard to the process of sledding cotton has been received and contents noted.

In reply will state that this method of gathering cotton is used only in the Panhandle section of the State. It is a very rapid process of gathering cotton and the cost, I presume, would be less than $5 per bale for gathering cotton by this method.

The cotton must be matured and practically all open before the sledding can be done, as it strips all the bolls and limbs from the cotton stalk, and no more cotton can be made after the sled passes over it. It also lowers the grade of the cotton very materially, as sledded cotton usually brings about 2 cents per pound less than cotton picked by hand.

I do not know anything about the ginners charging $7 per bale extra for ginning this cotton because of the limbs, trash, and bolls in the cotton. It is possible that they make some extra charge for cleaning this cotton.

I would advise you to write Victor H. Schoffelmayer, of the Dallas News, Dallas, Tex., concerning this matter, as he has been in the plains country and made a study of this method of gathering cotton, and can give you more detailed information than we can give you from our department, as this method does not concern us in administration of agricultural laws but only concerns us as an economical and time-saving proposition.

Respectfully,

GEORGE B. TERRELL, *Commissioner.*

Mr. Terrell advised me to write to Mr. Victor H. Schoffelmayer, agricultural editor of the Dallas News, who is doubtless the best authority in the United States upon this subject. I wrote Mr. Schoffelmayer, and have here his reply, which I will ask the Clerk to read.

The Clerk read as follows:

THE DALLAS NEWS,
Dallas, Tex., January 28, 1928.

Mr. J. J. MANSFIELD,
House of Representatives, Washington, D. C.

DEAR MR. MANSFIELD: In reply to your inquiry about cotton sledding, at the present time this process is not adapted to any but the plains area, as it can be used only after killing frost. During 1927 only 50,000 bales were harvested in this way, because of the long, mild fall, and also because of a large supply of cheap hand labor. In the previous season, however, much more than this amount was gathered by sleds, though they did not come into vogue until after Christmas.

At the present stage of development the sled is still problematical, but it will play a big part in the plains area in the next few years. You understand, of course, that it is not confined to the Panhandle region, to which you refer, as its first general use was around Lubbock in the south plains section.

The usual cost for cleaning sledded cotton ranges between $2.50 to $4 a bale extra. The $7 figure given you must have applied to the whole ginning process.

If we can be of any further service to you, please let us know.

Yours very truly,

VICTOR H. SCHOFFELMAYER,
Agricultural Editor.

Please get report by A. P. Brodell and M. R. Cooper, United States Department of Agriculture, "Requirements and costs for picking, snapping, and sledding cotton in west Texas."

I have the Brodell and Cooper report referred to in the postscript of Mr. Schoffelmayer's letter. It contains some very valuable information, but, consisting of several pages with a number of tables of comparative costs, is most too long to be inserted in the RECORD. It is the only formal publication issued upon this subject by the Department of Agriculture.

At the bottom of page 6 of the Brodell and Cooper report is a table of comparative costs of gathering and ginning a bale of cotton in Texas as to both sledded and hand-picked cotton. It is shown that according to the scale of wages prevailing there at the time that the total cost of gathering and ginning a bale in the Great Plains district of Texas when

picked by hand was $22.33, while the cost when sledded was $12.39 per bale. On its face this represented a difference in cost of $9.94 in favor of sledding. But when we take into consideration the fact that the bale of sledded cotton sells in the market at $10 less than the bale of hand-picked cotton, then there is an actual cash balance of 6 cents per bale in favor of the hand-picked cotton.

This report, as well as all other authorities, shows that the sledded cotton sells at 2 cents per pound less than hand-picked cotton. This is a loss of $10 on each 500-pound bale. On larger bales the loss per bale is correspondingly greater.

Of course, there may be times, as in 1926, when, as a salvaging proposition, it is advisable, where practicable to do so, to use the sledding machine, regardless of the difference in cost. A scarcity of labor for hand picking may also render it necessary to use the sled in some instances where otherwise it might not be used.

Then, again, owing to the shortness of the seasons where sledding has been in operation, many of the cotton bolls do not mature and open. Still they contain lint, which has some value. This is known as "bollie" cotton. It can not be picked by hand, but can be salvaged by sledding. Several thousand bales can be saved in this manner which would otherwise go to destruction.

Mr. Garrett's observations were made in the spring of 1927, following the rather optimistic reports on the sled gathering of cotton in the fall of 1926. He assumed that it had passed the experimental stage, and he also failed to take into consideration the fact that the method can be applied in only a very limited portion of the area of cotton production. If he will review the case in the light of the present time, he will ask to revise his remarks. If he should await the lights of another year, he might, then, possibly, ask to expunge them from the record.

Mr. Garrett is in error in assuming that the high-powered mass-productive methods of cotton farming in Texas have been altogether successful. Rather, it might be said that such method has been weighed in the balance and found wanting. Up to this time the most successful farmer has been the man who has endeavored to curtail his production to that which can reasonably be gathered by the members of his own family. The so-called "cotton patcher."

Any known method of intensive cotton farming must, of necessity, be carried on with hired labor. Labor has left the farms and gone to the cities and to the industries. It is now so scarce on the farms and so high priced that the cotton crops produced by it will not pay the cost, except, possibly, in an occasional year. This is true no matter what method is carried out.

Furthermore, the high-powered intensive methods of cotton farming referred to would in a few years exhaust the fertility of the farms to such an extent as to render them almost worthless. Under such system it is not practical to rebuild or maintain the soil by a systematic rotation of crops as can be done by the man who plants only a small portion of his farm in cotton.

A farmer can, of course, improve upon his methods of farming and should do so. But he can not escape taxation, nor can he materially improve his marketing conditions without Government action to assist him. If he had nothing but the home market to deal with, he might possibly do so, but the marketing of the leading farm products is now a national and international problem. Cotton produced in the United States is sold on the markets of all the leading European countries, while cotton products are sold to all the world.

Tariff can aid the farmer so far as home consumption is concerned, but has no effect upon those crops that are sold abroad. It is idle for anyone to contend that the farmers themselves can deal with such international trade or marketing conditions. It is a problem for our Government. The McNary-Haugen plan is intended to take care of such conditions. Some say it will work; others say it will not work. We can never know until it is tried. If it works it will be a great boon to a large class of people sorely in need. If it does not work it can be cast into the discard.

I respectfully submit, sirs, that those who consider the McNary-Haugen plan a "price-fixing" measure have failed to comprehend its purpose. Under its operation no board would ever invoke the power conferred upon it as long as marketing conditions were normal. Its purpose is to secure orderly marketing of staple farm crops and prevent slumps and panics such as we had in the cotton market in 1926 and in the rice market of the past year.

The fact that every five or six years there is a temporary overproduction of cotton is no reason why a world panic should be created in the cotton market. The record shows that in a series of years we have as many years of underproduction as we have of overproduction. With properly regulated marketing conditions neither should be the cause for alarm.

It is largely the irregularity of the markets that cause these extremes in production. The high prices that obtain in a year of underproduction usually cause it to be followed by an overproduction, and vice versa. Such fluctuating conditions are the paradise of speculators and stock gamblers, but they keep the farmers' nose to the grindstone. If the consumers should occasionally get the benefit of cheaper cotton goods, the net result would not be so bad, but we find that such is not the case. No matter what the price of cotton, the man who wears socks, shirts, and one gallus continues to buy them at the same price.

Temporary fluctuations in the price of cotton, no matter how great they may be, have but little effect upon the price of cotton products. It is not unreasonable that this is the case. When we had the slump in the cotton market of 1926, the cotton goods being sold at that time were made of cotton for which a much higher price was paid by the spinners, consequently there was no reduction in the price of cotton goods. The manufacturers know that in a year or two the price of cotton will be evened up, no matter how high or how low it may occasionally go for a season. Conditions such as I have mentioned, aided by the tariff and by organization, render it possible for the manufacturers to market their products in a more orderly manner than is possible for the farmer to do. I, for one, believe we have the legal right, and that it is our duty to come to the aid of the farmer in helping him to improve his marketing conditions. Of course, men may differ as to the plan of such aid.

Roughly speaking, Mr. Garrett's plan of farm relief is to drive from the farms those who grow cotton on a small scale and let those continue in the business who grow it on a large scale by high-powered labor-saving machinery. This is the way he says big industry has succeeded over little industry, and that the big farmer should drive out the little farmer in the same way. No trust ever had a more able or willing defender. Instead of seeking to curb the power of the trusts in industry, he would even extend it to agriculture, to whom all mankind must look for food and raiment.

The main purpose of Mr. Garrett's series of articles was as a criticism of the McNary-Haugen plan of farm relief. He deplored the mentality of the farmer who believed in it and criticized the motive of the lawmaker who advocated it.

I have here called attention to two methods of proposed farm relief. Mr. Hopkins, the Kansas autocrat of 2,000 acres, who has neither horse nor mule on his princely plantation, to say nothing of an ox or an ass, would deprive the little farmer and his family of the use and pleasure of an automobile. Mr. Garrett, the paper farmer of Wall Street, would drive him from his home and compel him to seek employment elsewhere. In either case, the so-called "cotton patcher" is left between the devil and the deep blue sea.

This reminds me of the story of the young man upon his examination for license to practice law. When asked to define the difference between murder and manslaughter, he replied that there was no difference. When called upon to explain, he said that to the man who was killed it mattered but little whether he was murdered or manslaughtered.

So it is, Mr. Chairman, with the little farmer or the "one-mule cotton patcher." By the sweat of his brow he feeds and clothes a multitude, who may "joy ride" in automobiles while he and his family must travel in a more humble way. This is the viewpoint of Mr. Hopkins. According to Mr. Garrett, he must be driven from his home to seek employment elsewhere.

To the little farmer and his family it matters but little whether their home and business is to be murdered in the one way or manslaughtered in the other.

Mr. Garrett further says:

> The Texas growers are not interested in acreage curtailment. For that reason they are complained of bitterly. But why should they reduce their acreage? Rationally, they should increase it as fast as possible, and be encouraged to do so, because they are saving for this country what the old Cotton Belt people were by way of losing—namely, a dominant position in the cotton culture of the world. They are saving it as we have saved other advantages in the field of international trade. We met the low-wage labor of the world with high-wage labor and beat it by superior methods.

The best possible answer to this contention that cotton farmers should increase their production is found in the actual results of 1925 and 1926. In 1925 the crop was about 16,000,000 bales. In 1926 it was about 18,000,000 bales. Yet the smaller production of 1925 sold for approximately one-half billion dollars more than was received for the larger crop of 1926.

At $100 per bale, the 2,000,000-bale surplus of 1926 would have been worth $200,000,000. By permitting that surplus to be dumped upon the market, as was done, it caused a loss to producers and local dealers of about two and one-half times its own value. In other words, if the farmers themselves, collectively, could in some way have purchased this 2,000,000 bales outright at a fair price and then destroyed it in a great bonfire, they would still have been the net gainers of about $300,000,000. These are enormous figures to deal with, and a solution of this serious problem is worthy of the best thought of our land.

If the McNary-Haugen bill had been in operation, and had been found workable, it would have kept that 2,000,000-bale surplus off the market entirely in 1926, and without loss to the farmers. The board could then, through the medium of a threatened equalization fee, and organization of the farmers, have forced a corresponding reduction in the plantings of succeeding years, until this 2,000,000-bale surplus could have been absorbed. To have accomplished this would have required the expenditure of about $40,000,000 from the revolving fund, which would have been returned to the revolving fund without loss at the end of the transaction.

Of course, this is all dependent upon the law being found to be workable. Its opponents say it will not work, and that it is theoretically unsound. If some one a few years ago had foretold of the radio, doubtless we would all have said it "won't work."

Mr. Chairman, for many years we have tried to induce the farmer to reduce his acreage in the staple crops and diversify. Now, we are told that he must specialize on the staples, on a greater basis, in order to produce greater quantities at comparative less cost. I submit, sir, that the social and economic results of such a system of industrialized agriculture would be more harmful than would McNary-Haugenism—even as might be pictured by a Dante or Gustav Dore, or as visualized in the veto message of the President. [Applause.]

Mr. DICKINSON of Iowa. Mr. Chairman, I yield five minutes to the gentleman from Ohio [Mr. THOMPSON].

Mr. THOMPSON. Mr. Chairman, I am interested in the corn-borer legislation contained in this bill and my people are very much interested. A number of my constituents testified before this subcommittee of the Committee on Appropriations and their testimony is in the hearings.

I find that legislation with respect to the corn borer does not come before this subcommittee of the Committee on Appropriations and that this subcommittee only recommends an appropriation for research work, and that is agreeable to my people.

Mr. Chairman, I have been a member of the Committee on Agriculture of the House since the Sixty-seventh Congress. It is a great committee, and has some practical farmers on it, but many of its members are lawyers who are not specialists in agriculture. So far as I am concerned, I am just a native son of northwestern Ohio. I have not a nimble tongue, nor am I trained to heckle dirt farmers from my district when they come before committees of Congress for hearing of their grievances.

At the close of the Sixty-ninth Congress, when the Committee on Agriculture had become worked out physically and exhausted from attending hearings on "farm relief," and finally produced the McNary-Haugen bill, which was promptly vetoed by the President, there was introduced into the committee a bill providing for an appropriation to the tune of $10,000,000 for the work of exterminating the European corn borer, so called. It was given scant debate by the committee, because the committee felt it was doing something to help the farmer. They had been made to feel by the representations of an organization, so called, that it was necessary to put over a $10,000,000 appropriation.

Now, in the Seventieth Congress there is reintroduced before the Committee on Agriculture a bill authorizing the appropriation of $10,000,000 more for the same purpose, to be administered by the same people who administered the former act. This last bill that was passed in the Sixty-ninth Congress caused a rebellion in northwestern Ohio. The men who are interested in this corn-borer legislation are the head of the department of agriculture of Ohio and a candidate for the nomination as United States Senator from Ohio to succeed the junior Senator from Ohio, and Dean Christie, of the college of agricultural-extension work of Purdue University in Indiana. They are the men who are back of the legislation and the administration thereof. They call themselves the European Corn Borer Association.

The other day we had an example of genuine dirt farmers from the fifth Ohio district, who appeared, with hat in hand, before the Agricultural Committee of the House, respectfully requesting the right to object to another appropriation. Before they finished their testimony they found themselves heckled by smart lawyers.

Now, I propose to represent my constituents by protesting against this further appropriation of $10,000,000. The genuine farmers of my district are men who came to northwestern Ohio in early days, when it was a rough land, covered with mighty forests. There were no paved highways or improvements, nothing but a wild, swampy land, thickly wooded. They came from Germany. They were invited as immigrants, and told if they would come here and live on the land, removing the forests, ditching and tiling the land, that they could live in peace and retain their own language, their own religion, and their own parochial schools. They have done all this, and their descendants to-day are worthy sons of those pioneer men from Germany. They are splendid farmers. You had a sample of one of them here the other day as a witness before the Committee on Agriculture of the House. They are Americanized people now, and educated, some of them at the Purdue University. The promise made to them has not been kept.

During the war many of them naturally shifted their political allegiance, and in addition to making northwestern Ohio bloom as the rose and become the fairest and most prosperous agricultural county in Ohio, they have also changed it politically. These are the men I am pleading for to-day.

Now, the practice of legislation in this Congress grew out of the World War. Before that war it was not the practice to rely solely on the Government departments for advice. Legislators were supposed to know something themselves, but now the men in the departments are our masters, and tell us what to do. Our committee can not pass any legislation nor can any other committee of the House pass legislation without the approval of the departments, and often this approval is furnished to the heads of the departments by chiefs of divisions, who are under civil service and who are retained in perpetual jobs. The result is that there is a self-perpetuating bureaucracy of the worst type growing up here at Washington, and the men who furnish the taxes have not a word to say. Those on the committee who attempt to justify the advice of the department chiefs and bureaucrats in telling our Committee on Agriculture what to do, say to witnesses that the rich men are paying the taxes; that the Federal taxes is the money furnished by the rich; and that the farmers do not pay any Federal taxes, and therefore the extravagant appropriations are extolled as a good investment for the farmer. That is the argument.

Now, a word as to this corn-borer situation. There is a great feeling against it in Ohio, and we do not wish to be ruled by a so-called European Corn Borer Association. In Ohio we feel that we are now governed by despotic agencies. Farmers and city residents are both the victims of public servants who have become "bosses" of the people. It is a decline of popular government; our methods of committee legislation at the present time.

When the last appropriation was made of ten millions for this mythical Corn Borer Association, the Legislature of Ohio followed suit. It had no money to keep our State library open, so it closed it and voted more than twice that sum to support the corn-borer guards. Then a strange thing happened. General Motors and International Harvester began to deliver the war machinery the very day this bill went into effect, and they continued to deliver it as long as the ten millions lasted. As former Congressman C. L. Knight, of Akron, so well said:

> A war camp was gathered at Toledo, greater than Grant had when he started to capture Richmond. There were 800 sedans to bear 800 new inspectors on the wings of the morning out over the provinces to order the farmer to plow up his planted fields. There were four hundred 10-ton trucks and six hundred 1-ton trucks; probably the 10-ton trucks were to carry the bodies of the big corn borers from the field of action, while the small trucks were to haul off the little borers. I do not know, but I do know that there were beaters, choppers, gang plows, and God only knows what else gathered in this 10-acre war camp. Most of it is still there, but every vehicle that could bear away a pap sucker is gone.

In the meantime, the net result of all this has been just nothing at all. Officialdom has saved us from an imaginary enemy, and the tyranny of the educated has caused farmers to think that there is an European corn borer at work in their fields. All under heavens that is needed to protect the farmers against the European corn borer is a rotation of crops. Officialdom has saved us from an imaginary enemy at the cost of millions of public funds and now wants to save us again at the cost of another ten million, for certainly we have a new army of pap suckers, whose sticking qualities will fulfill Christ's prediction about the poor.

I have at all times stood for, and voted for, any and all legislation for betterment of the conditions of the farming class. I am ready and willing to do this again, but I am not ready to

vote for another great appropriation in the name of the corn borer. The farmers of Ohio justly feel that the appropriation of $10,000,000 was badly administered by State officials having the matter in charge, and that much more harm than good resulted from the use of the money in the so-called corn-borer campaign.

The Appropriations Committee has provided ample funds for research work. If $10,000,000 additional funds in an emergency appropriation like this is to be extravagantly enacted a second time on this foolish corn-borer drive, then I am against the use of part of it for the purchase of machinery by the so-called Harvester Trust as was done last summer. If a subsidy is to be voted to the farmers, I believe the money should go direct to the farmers and that they should be liberally paid for cleaning up their own land. Unless something like this is done, I shall vote against the entire foolish business.

As I understand it, the powers that be are not favorable to this legislation; the Secretary of Agriculture, Mr. Jardine, is against it; the Budget Commissioner, Gen. H. M. Lord, is opposed to it, and Hon. MARTIN B. MADDEN, chairman of the Committee on Appropriations of the House, looks with disdain upon it. Here is his sentiment recently expressed on this floor:

I tell you, gentlemen, that the time is coming when you can not afford to run away because some fellow sends you a telegram. That is about what it means. I have had five telegrams this week of that character. I had a telegram the other day from the Illinois Bankers' Association, in which they said they wanted me to vote for $10,000,000 again this year for the extermination of the corn borer; and I wired back and said: "We gave them $10,000,000 for 1928." Five millions of that were spent for machinery, some of which is now probably on the scrap heap. Four millions was paid to farmers for cleaning up their own premises. I am against that kind of expenditure, whether it is for the Army or for the Navy or for the farmer. What we ought to do is to take a sane view of all these situations.

Hon. FRED S. PURNELL, of Indiana, is author of the bill. Dean Christie, of Purdue University, together with the candidate for Senator from Ohio, Mr. Truax, form the essential part of the so-called European Corn Borer Association of the United States. It is such mischievous agencies as these who waste the people's money to perpetuate their jobs and farm the Government. This is a result of the tyranny of the educated.

Now, you say the people want these things. I say they do not. The farmers ask not to be meddled with by an overabundance of snooping State agents. The farmer who works, the industrious German farmer—not the one who farms by riding around in his automobile—asks to be let alone. They would even appreciate the repeal of the Smith-Lever Act which appropriates $500,000 per year to keep up the Federal Farm Bureau agencies throughout the United States. You just try the real dirt farmers when you go out among them and see whether they wish to be subsidized or not. You can go any place in any district in the United States and express the courage that you ought to have to the people and ask them whether they want use of public money even for corn-borer campaigns.

I recently received the following letter from a farmer of my district. It is a fair sample of the letters I receive:

DESHLER, OHIO, *February 12, 1928.*

Hon. C. J. THOMPSON,
Member of Congress, Washington, D. C.

SIR: Just received bulletin on how and what to do with cornstalks. Thought I would let you know what American farmers think of such rot. What do you suppose that rotter Worthley thinks the American farmers are? Idiots or what? You know farmers broke and raked stalks when you were a boy. Now, this bird is spending the taxpayers' hard-earned money sending out bulletins telling the farmers how to do work that is nearly done; at least nearly all the stalks are broke.

Well, Mr. THOMPSON, if you don't think that farmers in your district know how and when is the best time to handle their cornstalks, then I think you are a mighty poor man to represent us farmers in Congress.

Will close hoping you will see the light and do all in your power to rid the farmers and taxpayers of such dumb asses as Worthley.

Yours respectfully,

S. J. CHRISTMAN.

For the benefit of this gentleman I gave him the inside of the cause of the legislation last year and the evident reason for the attempt to reenact it this year, as follows:

In September, 1926, a body of representative citizens of the United States and Canada, alarmed by the havoc wrought by the European corn borer in Kent and Essex Counties, Ontario, and the damage observed in fields of corn along the American shore of Lake Erie, met in Detroit, adopting the title "International Corn Borer Organization," and appointed an executive committee with power to act.

The general idea of the 1927 compulsory clean-up campaign originated with this body, which was composed of G. I. Christie, La Fayette, Ind., as chairman; Director of Agriculture C. V. Truax, of Columbus, Ohio, as secretary; and nine others, representing State departments of agriculture, the Canadian Department of Agriculture, two of the largest farmers' organizations in America, and State agricultural colleges.

This committee, with the approval of the President and the Secretary of Agriculture, then had a bill introduced in Congress for a $10,000,000 appropriation to be expended in cooperation with the States of New York, Pennsylvania, Ohio, Michigan, and Indiana, in an effort to control the borer and demonstrate the fact that by concerted effort of the farmers in the infested area the borer either could be reduced or held to a minimum number.

The Federal Government having no police power whatever in the States, the act of Congress making the appropriation specifically provided that no part of the $10,000,000 could be spent unless and until each and every State in the control area had enacted necessary regulatory legislation.

A bill was then passed by the Ohio General Assembly providing for the State quarantine and control of the corn borer, and making an appropriation therefor. And all corn borer regulatory activities in Ohio have been performed under and by virtue of this Ohio statute. While the Federal Government has borne the great share of the expense of conducting the clean up in Ohio (the Federal Government paying direct to the Ohio farmers, up to October 31, over $2,250,000, or thirty-three times as much in Federal payments direct to the farmers alone as the State of Ohio had expended since January 1 of last year for all corn-borer-control work), by providing machinery and men and bearing all the expense of reimbursing the Ohio farmers for their extra labor, wherever any Federal officer or employee has exercised any police authority in Ohio, he has done so purely by virtue of his appointment by the Ohio Department of Agriculture as an Ohio State officer or agent, and after being so deputized by the State of Ohio his authority as a corn borer regulatory official has been limited entirely to the enforcement of the rules and regulations promulgated by the Ohio State Department of Agriculture, pursuant to the corn borer act of the Ohio General Assembly.

I replied as follows to his letter of February 12, 1928:

FEBRUARY 28, 1928.

Mr. S. J. CHRISTMAN,
Deshler, Ohio.

DEAR MR. CHRISTMAN: In response to your letter of February 12, concerning the corn-borer-control work by the Federal Department of Agriculture, I have this to say: I doubt if you understand just what part of this clean-up work is done by the Federal Government. I presume you have the impression, as many Ohio farmers have, that the rules and regulations concerning this work are made by the Federal Government. Such is not the case.

The Federal Government has no police powers over the citizens of Ohio, or, in other words, a Federal official can not enter upon your farm and require you to clean up your cornstalks, etc. The rules and regulations, quarantine lines, and control work are made and done entirely by the State. All the Federal Government can do and does do in the matter is to meet some of the expenses incident to this control work and compensate the farmer after the work is done. To be sure, some of the Federal officials have been deputized as State officials by the director of agriculture of Ohio, and therefore have State authority.

Your complaints as to rules and regulations, therefore, should be made to the director of agriculture of Ohio, at Columbus. He is charged with the enforcement of the Ohio law covering this pest, and similar laws. It might be of interest to you to know that the Federal Government last year, prior to October 31, paid direct to the Ohio farmers $2,250,000 for born-borer clean-up work. I feel that the Ohio farmers, instead of criticizing the Federal Government in the corn-borer work, should commend it for the reason that if the Federal Government had not entered into this matter probably no compensation would have been made for the extra expense necessary in the clean-up.

Thanking you for your communication and assuring you that I appreciate the trouble which this pest has caused you and other farmers of Ohio, and also pledging you that I will give the matter most earnest attention and assist in every way I can to lighten the burden which is placed upon the corn growers in the corn-borer-infested area, I am,

Very truly yours,

C. J. THOMPSON.

P. S.—I am inclosing a statement issued by the Assistant Secretary of Agriculture April 24, 1927.

I received a second letter from Mr. S. J. Christman, as follows:

DESHLER, OHIO, *February 25, 1928.*

Hon. C. J. THOMPSON,
Member of Congress, Washington, D. C.

DEAR SIR: Received your letter of February 20, and as you asked my opinion on the corn-borer situation I will write and tell you. Mr. THOMPSON, I am bitterly opposed to another appropriation; you

no doubt have heard all the arguments against it, so I will not try much to tell you why I oppose the appropriation. If you will take a geography and take the time to look at the sea level of the different sea levels of Essex County, Canada, Peeley Island, and Ottawa County, you will find them just about the same, so I feel is all the places they will do any damage, and men from those districts tell me if they rotate properly and rake their stalks the borer will do no damage. So when the people of Ottawa County are against the appropriation why should not I, in a county like Henry County, where there are scarcely any or none at all. Will close, hoping to be able to support you next fall for your part in defeating the $10,000,000 two-legged borer swindle.

With best regards,

S. J. CHRISTMAN.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield 20 minutes to the gentleman from Kansas [Mr. HOPE]. [Applause.]

Mr. HOPE. Mr. Chairman and members of the committee, this bill makes an appropriation for the carrying on of the packers and stockyards administration, a matter of great importance to the livestock interests of the country. The passage of the packers and stockyards act in 1921 was designed to break up the indefensible practices which were being engaged in by the big five packers in manipulating livestock markets, controlling prices, crushing competition, and defrauding producers.

The act has accomplished great good, and under its provisions the Secretary of Agriculture has been able to stop most of the wrongful and objectional practices which formerly existed. The original law, however, was not broad enough in its definition of a stockyard, and by reason of that defect there has grown up a system whereby prices on livestock are being manipulated and depressed to the extent that livestock producers are taking a loss of many millions of dollars a year. I refer to the system of direct buying of livestock, particularly hogs, at the big terminal markets through the operation of private stockyards, which system has grown to amazing proportions in the past few years.

During the week ending February 25 hog prices dropped lower than any time since late in 1924. In the past few months there has been a break of between three and four dollars in the hog market; no real reason has or will be offered for this. Neither the supply of live hogs on the farm or of the finished product in storage would justify any substantial lowering of prices, and receipts for the 67 principal markets for 1927, while slightly exceeding those for 1926, were 13.2 per cent below the five-year average. Exports were slightly lower than in 1926, but this decrease was more than made up by the normal census increase in domestic demand.

Mr. COLE of Iowa. Will the gentleman yield?

Mr. HOPE. Gladly.

Mr. COLE of Iowa. Is it not true that the estimated number of hogs in the country—which, I believe, is the estimate of the Department of Agriculture—exceeds by 6,000,000 the number of last year; and is it not true that during the first six weeks of this year the number of hogs slaughtered exceeded by 1,500,000 the number of hogs slaughtered last year during the same period; and is it not possible that this extra supply of hogs may have had some influence on the price?

Mr. HOPE. I will say to the gentleman that I do not have the figures as to the number of hogs slaughtered during the first six weeks of this year as compared with last year. Those figures may be correct, but I do not understand that the figures of the Department of Agriculture show that there are 6,000,000 more hogs in the country to-day than there were at this time last year.

I call the gentleman's attention to the fact that if there are that many more hogs this year than there were last year that that in itself is not sufficient to affect the price of hogs to the extent that it has been affected during this last year. This drop in the price of hogs took place about seven months ago, and the price of hogs has been going down ever since. Some of the packers have said that it was due to the loss in exports of hogs, but I call the attention of this committee to the fact that the exports last year were only equivalent to 900,000 hogs less than there were the year before, and the president of the American Institute of Meat Packers has admitted that this is less than the normal census increase in the demand in this country during that time. I call attention also to the fact that while the receipts of hogs in the 67 principal markets of this country last year were slightly in excess of those for the preceding year that they were lower by 13.2 per cent than the five-year average. So I do not believe it can be said that the receipts of hogs in the central markets or the supply of meat in storage or the hogs on the farms are any justification for the great drop that has taken place in hog price.

One packer representative attempted to explain the decline by stating that there was an unusually large catch of fish along the New England coast last year. It will take something more than a fish story, however, to convince the producer who is getting 3 or 4 cents per pound less for his hogs than he should be, that he has not been defrauded out of that sum by manipulation of the market.

Even when conditions are at their best the producer of meat animals labors under a tremendous disadvantage in the sale of his product. In the first place, the producers are scattered, unorganized, frequently of limited means, and in many cases not in a position to keep informed of market trends and conditions. The buyers, on the other hand, are well organized, with unlimited financial resources, and in touch with world market conditions. Another feature which places the producer at a great disadvantage is that ordinarily the animals must be sold when they have reached a certain weight or condition of flesh, and that once started to market, there is no alternative except to sell at the best price offered.

Since the producer is confronted with these handicaps to start with, he is surely not unreasonable in asking that he be allowed to sell on a competitive and open market instead of on one which is under the absolute control of the purchasers, and yet that is what the producer is up against to-day.

Mr. LANKFORD. Will the gentleman yield?

Mr. HOPE. I yield.

Mr. LANKFORD. Has pork gone down proportionately with the fall in the price of hogs?

Mr. HOPE. I have not heard of it.

While packers have engaged in private buying for a number of years, it is only since the passage of the packers and stockyards act, and particularly in the past three or four years, that it has been engaged in by the big packers, that it has become a menace to the producer. Recent figures indicate that approximately one-third of the hogs killed by the packers are marketed direct. Swift & Co. maintain private yards in connection with their plants in both Chicago and St. Louis, Cudahy has a private yard at St. Paul, and Armour & Co. maintains a private yard, known as the Mistletoe yard, at Kansas City, where its purchases have for several years past greatly exceeded its purchases on the open market there.

The practice of private buying at the terminal markets operates to the detriment of the producer in at least four ways. In the first place, packer buyers in local communities, known as selected shippers, by unfair methods drive out competition, so that the farmer with less than a carload of hogs has no other market outlet. This practice of buying through selected shippers is a rather ingenious and interesting one. The practice is to give one person in a locality the exclusive right and privilege to ship to the packer's private yard, and though it is not invariably true it is the general custom that no one from that territory, excepting the selected shipper, has the right to ship to the packer yard. The livestock so shipped remains the property of the selected shipper until received, weighed, graded, and priced by the packer employees. The arrangement with the shipper is that the price established on the nearest competitive stockyard shall determine the price of the livestock he delivers. The selected shipper is not an employee or agent of the packer, and simply intervenes as a middleman having exclusive authority to sell to the packer at the private stockyard.

In connection with the practice of purchasing through selected shippers, the large packers apparently have an understanding, either express or implied, that they will not compete with each other in direct buying. Thus there has grown up a system of apportioning territory among packers, so that one packer will buy along one railroad branch or in one county, and another packer will have the exclusive right to purchase in another territory or county.

In the second place, by reason of the selected-shipper plan, the packers are enabled to get the best hogs in any territory without competition. The result is that the inferior hogs are shipped to the central markets, and thus make the price for the good hogs purchased direct.

Again, since the private yards are being operated without Government supervision and inspection, there is nothing whatever to guarantee the farmer fair grading and weighing, since the packer himself fixes the grade, weight, and price. Perhaps it should be here remarked that the packer's contention that it is economy for the farmer to ship direct, because he saves commissions and handling charges, is not regarded as seriously by the farmer as it once was. A few direct shipments have convinced many farmers that the claimed saving is absorbed in dockage, shrinkage, and unfair grading.

Mr. LANKFORD. Will the gentleman yield further?

Mr. HOPE. Gladly.

Mr. LANKFORD. How do the other farmers in the neighborhood manage to sell their hogs? Do they sell them to the

selected shipper and he in turn sell them to the packers? Does the selected shipper act as agent for the packers?

Mr. HOPE. The selected shipper is not the agent of the packers, according to my understanding of the system. The general practice, as I understand, is for a packer to designate some one as the selected shipper in that locality, and under the protection which the packer gives him he is able to outbid the other buyers or cooperative marketing associations until eventually he gets the entire field to himself. Then there is only that outlet for the hog raisers in that vicinity, unless they are able to furnish carloads themselves.

Mr. LANKFORD. Does that really give the selected shipper a monopoly on the hogs in the neighborhood?

Mr. HOPE. It does; and that is the general effect of it. Of course, any man having a carload of hogs can ship them direct, but the average farmer only has a few hogs and he has to sell them to the local buyer. That is his only outlet.

Mr. O'CONNELL. Will the gentleman yield?

Mr. HOPE. Yes.

Mr. O'CONNELL. According to the gentleman's statement, then, he is contending that unless a man who raises hogs stands in with the packers he can not sell them at all?

Mr. HOPE. Not necessarily.

Mr. O'CONNELL. But pretty nearly that.

Mr. HOPE. In a good many cases it has that effect.

Mr. COLE of Iowa. Will the gentleman yield for a question?

Mr. HOPE. Gladly.

Mr. COLE of Iowa. The gentleman is in favor of the bill amending the packers and stockyards act?

Mr. HOPE. The gentleman means the one recently introduced?

Mr. COLE of Iowa. The one which is now pending.

Mr. HOPE. Yes.

Mr. COLE of Iowa. Will the gentleman tell me how that bill will affect the packers in towns such as we have in Iowa, where there is only one plant or one packer in the town? We have about a dozen packing plants in the State of Iowa, and there are no public stockyards. How is the owner or the manager of a plant of this kind going to buy his hogs unless he buys them direct from the farmer? For instance, take my home town, Cedar Rapids. We have a packing plant but no public stockyard. Must we go to a terminal market like Chicago to buy hogs for this plant?

Mr. HOPE. I will say to the gentleman in answer to his question that this bill will not affect that situation at all and is not designed to affect that situation.

Mr. COLE of Iowa. The gentleman thinks it will not apply to towns situated as Cedar Rapids, Iowa, is situated, with one packing plant and no public stockyard. The gentleman thinks the bill now pending would not affect situations of that kind?

Mr. HOPE. I do not think so, and I will say it is not the intention to affect that arrangement at all.

I realize the force of the gentleman's statement that that is the only opportunity the small packers have to buy hogs—by buying them direct. The purpose of the bill is to regulate the stockyards in the terminal markets which actually do affect the price of hogs.

Mr. COLE of Iowa. I think the exception in behalf of the smaller packing centers, where there is only one plant, ought to be made very definite in the bill. We do not want to have such packing plants interfered with. They are the hope of our country.

Mr. HOPE. I agree with the gentleman that they ought not to be interfered with and this bill is not designed to interfere with them. I might ask the gentleman if he has read the bill which was introduced in the House on Monday by myself.

Mr. COLE of Iowa. No; I have not had an opportunity to study the revised bill. I understand the bill has been thoroughly rewritten, and I hope the point I have raised is covered in it.

Mr. HOPE. But the most serious effect which direct buying in large market centers has on the market, is that the supply of hogs received direct enables the local packer to manipulate and depress the market, not only in the market centers but everywhere, because livestock prices the country over are determined by the prices at the big terminal markets like Chicago and Kansas City.

The packer is the biggest factor in fixing the price in all of the terminal markets. His desire to buy is in proportion to his need for a supply. If he has to purchase his hogs on the open market, he will be there early bidding against other local packers and the order buyers for out of town packers. On the other hand, if he has hogs in his private yards received through his selected shippers, he is not particularly interested in buying. What actually happens in such cases is that he stays off the market altogether or waits until afternoon after the order buyers have bought, and then makes his purchases. Thus the order buyers go on in the morning and get their hogs without any competition from the packer, and the packer goes on in the afternoon and buys without any competition from order buyers. With no competition all day the market is naturally dull.

The producer has to sell, his hogs are perishable; he can not hold for a better market, but must take what may be offered him by a buyer who does not particularly need the product and whose sole object is to buy as cheaply as possible. Sometimes the packer does not go on the market at all. Swift has stayed off the market at Chicago for two days at a time for two or three weeks in succession. What actually happens is shown in the following article taken from the Kansas City Drovers Telegram for February 11, 1928: "Packers are making the statement that buying hogs direct in the country is the most economical way." It is for the buyer, but not for the producer.

> Monday, February 6, supplied an outstanding example as to which side direct buying throws its economy. On that date 23,624 hogs arrived in Kansas City. Out of this number 14,865 were consigned direct to packers. On the open competitive market there were 8,759 hogs offered for sale. Of this number shippers and order buyers took 1,959 and the packers, who received 14,865 hogs direct, took only 6,430 on the open market. Packers did not make a single purchase until after the shippers and order buyers had filled their orders. The market ruled 10 to 20 cents lower, and the lowest since 1924. Packers got their hogs on the open market at the full decline and at the same time bought another liberal supply in the country on the low basis of the open market. In other words, through the break in Monday's prices packers got more hogs Monday and through Monday's buy in the country than they bought the entire week on the open market. Since Monday there has been a substantial advance in prices, so it stands to reason that as a result of Monday's directs packers gained a flat 25-cent advantage in this week's buy.

Since it is obvious that the system works to the detriment of the farmer, it may occasion some surprise that the packers are able to buy so many hogs that way. The answer lies in the fact that by reason of the vicious system of dividing up territory and apportioning it among selected shippers local competition has been eliminated. Many producers have no other outlet for their product. On the other hand, it is only fair to say that a few producers honestly believe that they are benefiting themselves in making direct shipments because they are told that they save commission and yardage charges.

H. R. 11525, recently introduced as an amendment to the packers and stockyards act, is designed to correct the direct-buying situation. This measure enlarges the definition of a stockyard to include any place, establishment, or facility consisting of pens or other inclosures and their appurtenances in which live cattle, sheep, swine, horses, mules, or goats are received, held, or kept for sale, slaughter, or shipment in commerce in sufficient volume or in such manner or under such conditions as tend to establish or effect substantially the market value in commerce of livestock and the difference in market value between the various grades of livestock at public stockyards. Under the original law it has been held by the Attorney General that the packers and stockyards administration had no jurisdiction over the so-called private yards, even when they are in close proximity to the great public markets in Kansas City, Chicago, and St. Louis.

The bill specifically makes it unlawful for a packer or stockyard owner to pursue any of the practices which now make direct marketing in the big terminal centers so detrimental to the producer. It forbids the granting of any undue or unreasonable preference or advantage to any person or locality; or selling, buying, or receiving livestock for the purpose of manipulating or controlling prices; the apportioning of territory or engaging in any course of business for the purpose of or which has the effect of restraining, hindering, burdening, obstructing, or changing the normal flow of livestock in commerce for the purpose of manipulating or controlling prices.

For a violation of these provisions of the law the Secretary is given authority after notice and hearing and subject to review of the courts to suspend any owner or operator of a stockyard. It is thought with the authority thus granted the packers and stockyards administration will be able to regulate and stop the objectionable practices now engaged in by the packers.

That the producers of the Nation are becoming aroused over the matter is shown by the wide interest which farmers and farm organizations are taking in it. No subject along the line of agricultural legislation has been discussed with more eagerness at farm meetings and among individual farmers. Last year when a bill somewhat different from the present one but seeking to accomplish the same purpose was pending before the

Committees on Agriculture in the House and Senate it was indorsed by the following national farm organizations: The National Farmers Union, the American Farm Bureau Federation, the National Livestock Producers Association, the National Grange, the American Farm Congress, the National Cooperative Milk Producers Federation.

Numerous State and local farm and livestock organizations have in the past two months passed resolutions against direct buying, among them may be mentioned the Illinois Agricultural Association, the Missouri Livestock Association, the Kansas State Board of Agriculture, and the Kansas Agricultural Council, which is composed of delegates from the Kansas State Board of Agriculture, the Farmers Cooperative Grain Dealers Association, the Farmers Cooperative Commission Co., Kansas State Horticultural Society, Kansas State Grange, and Farm Bureau.

The Secretary of Agriculture, who has had a better opportunity than anyone else to observe the pernicious effects of the direct-buying system, has expressed the belief that—

the operation or extension of such methods of purchasing livestock by packers will in fact, if it has not already done so, impair and ultimately break down the open competitive public markets where livestock is bought and sold and where prices are established.

The board of directors of the Chamber of Commerce of Kansas City, Mo., where exists the second largest livestock market in the world, on February 14, 1928, adopted the following resolution:

The Chamber of Commerce of Kansas City, Mo., representing the entire business interests of the city, which in turn represents large interests through the West and Southwest, credits the past development of this section to its agricultural prosperity and bases its future growth upon the same foundation.

Livestock is the medium by and through which the products of our soil are marketed and the fertility of the same maintained, and we feel that the open competitive livestock markets are absolutely vital for the protection and prosperity of the producers and consumers alike.

We are therefore heartily in favor of the present open and competitive markets and are opposed to any and all systems that threaten the permanency and stability of the same and believe that Senate bill 2506 and House bill 9288 are progressive steps toward better markets.

Even the packers themselves, when pressed to it, will admit that private buying is a bad thing for the producer. The late J. Ogden Armour once testified that the private stockyard system was "not economically sound," and that the packers did not intend to extend it. However, it was not long until Mr. Armour was out of the packing business, and the present management of that company is extending the system just as fast and as far as possible.

Thomas E. Wilson, president of Wilson & Co., one of the Big Four packers, recently gave out the following interview on the subject of direct marketing, as reported in the Kansas City Post for February 15, 1928:

A stand against the practice of direct buying of hogs in territories supporting a central market has been taken by Thomas E. Wilson, president of Wilson & Co., packers.

During a tour of inspection of the Wilson plant here yesterday, Mr. Wilson set forth some ideas he has on marketing conditions, especially in their relation to the hog market.

I am opposed to direct buying of hogs where there is a central market, and I would be in favor of seeing the practice stopped in the Kansas City territory—

Mr. Wilson said.

He explained that his company is forced to buy hogs direct to supply some of its plants where there is no adequate central market. In Kansas City, however, he said he would like to see all hogs shipped to the central market so all buyers could have an equal chance to bid on them.

"As it is at present," he said, "we are forced to go out and buy hogs direct to meet competition and keep our Kansas City plant operating at capacity."

"Do you mean, Mr. Wilson, that you have to buy direct so you can get your hogs as cheaply as your competitors?" it was asked.

"Well, it figures out about that way," he replied.

"And if your competitors would quit buying driect you would be glad to quit, too?"

"Yes, I would, especially in this territory, but when one packer buys direct the others have to do it in self-defense."

He was then asked if he believed the practice of direct buying by the packers was sound economically.

"Well, I'll say at least that it is for the packers," he replied.

As to the farm end of it, he believed the direct buying practice might prove detrimental if developed much further.

"I don't believe that direct buying has hurt them much yet," he said. "Of course, if it came to the point where it eliminated central markets it might be extremely detrimental or beneficial, just according to your viewpoint."

Mr. Wilson said his company is not opposed to the bill, which would provide Government regulation for privately owned stockyards. "It is no more than fair," he said, "that shipments of hogs bought directly from farmers and shipped into our yards should be weighed and graded under Government regulation just the same as hogs shipped to the central market."

He said however, he did not believe the bill would be enacted owing to the fact that it is being opposed by some of the large interests.

Mr. Wilson predicted a more prosperous year in 1928 for the packers and business in general than in 1927. His plant here is making a profit now, he said, and he sees a bright prospect for the year in the Kansas City territory. The company's holdings are estimated to be worth more than $100,000,000.

I do not know whether, in spite of what Mr. Wilson says, his company will oppose this proposed legislation or not. It can be said, however, that the other big packing interests of the country are strenuously against it. They will not give up without a struggle the power to control, manipulate, depress, and destroy the producers' market. In this, of course, they are consistently following their practices in the past by which they not only sought to control the producers' market but the consumers' market as well. There is no darker chapter in American business history than the story of the packing industry and the vicious, unfair, and illegal practices by which it was built up. All of this is a matter of public record, and the report of the investigation of the meat-packing industry by the Federal Trade Commission reveals the entire amazing and shocking story. No words of mine could condemn the industry half as effectively as the plain, matter-of-fact report of the commission.

The illegal combination between the Armour, Swift, Morris, and Hammond firms as disclosed by a Senate investigation in 1890 was partly responsible for the passage of the Sherman antitrust law. This law apparently had no effect upon the packer combinations, however, because the Federal Trade Commission's report showed conclusively that during the period between 1890 and the time of investigation in 1917 and 1918 a conspiracy and combination had existed in the industry which defied the public, the courts, and legislatures alike. During practically all of this time there were understandings and agreements among the leaders in the industry not only to manipulate and control the price of livestock but to control the price of dressed meat and to a large extent the price of all food as well.

The packers formerly manipulated prices by their ownership and control of the public stockyards. The packers and stockyards act and the consent decree entered into by the packers took away that weapon, but apparently packer ingenuity has replaced it by the selected shipper—division of territory—private stockyards combination, which has become just as effective. It is to be regretted that it is necessary that this situation be met with legislation. In the long run it is surely to the interest of the packer that the producer, upon whom he depends, should have a competitive market and a fair price. The packer attitude has always been otherwise, however, and there is no evidence that the present Wall Street banker control of the packing industry will result in the adoption of any different policy. In fact, if there is any change, the attitude toward the producer will probably be more relentless and cold-blooded than ever, for the bankers are going to require profits and a satisfactory return on the capital—watered stock and all. Leading packers have recently given out interviews predicting a fine year for the packing industry, and stock in packing-house companies in anticipation of cheap hogs for the coming year has been steadily increasing in price. In the meantime the producer is wondering how much longer he can remain in business under the present prices. He probably agrees with Thomas E. Wilson that—

direct buying is economically sound—for the packer.

Mr. BUCHANAN. Mr. Chairman, I yield 25 minutes to my colleague, the gentleman from Mississippi [Mr. QUIN].

Mr. QUIN. Mr. Chairman, the flood control bill is what interests some of the farmers in the States of Mississippi, Louisiana, Tennessee, and elsewhere. The flood control bill in my judgment must carry this provision:

Wherever upon any stretch of the bank of the Mississippi River it shall be found inexpedient, impossible, or uneconomical to build levees for the protection of adjacent lands subject to overflow it shall then be the duty of the engineering body in charge of the territory in question to acquire on behalf of the United States Government either the

absolute ownership of the lands so subjected to overflow or the floodage rights over said lands. Such acquisition of title or rights to be by private treaty or by condemnation proceedings as in the judgment of the engineering body in charge shall appear advisable. The cost of such proceedings and the acquiring of such title or floodage rights to be paid out of the appropriation authorized for flood control of the Mississippi River.

Gentlemen, I have taken no time in this House at this session of Congress. In fact, I never get on the floor except when I am vitally interested in the subject under discussion. In my mind the gravest wrong has been committed for a number of years against the riparian landholders along the banks of the Mississippi River, especially on the east bank. I want you gentlemen to get in your minds the condition that prevails. Before the levee system ever started—I speak in behalf of four of the counties in the congressional district which I have the honor to represent—Claiborne, Jefferson, Adams, and Wilkinson Counties.

Bear in mind that from Vicksburg, Miss., to Baton Rouge, La., the capital of Louisiana, on the east bank of that river for about 250 miles some places were a mile and a half back, others 2 miles, some not so much, and others a little further where these fertile farms were not only in cultivation, but producing splendid crops of corn, cotton, and other farm products. In these particular counties I have named, some places had magnificent brick homes, palaces, with hundreds and, some with thousands, of acres of land, splendid tenant houses, with all these people working making an honest and legitimate living.

This continued to be the case until this great river which God Almighty in His wisdom put near the middle of the United States, was interfered with by man. God in heaven, in my judgment, is the greatest engineer of the whole universe, and yet the War Department had engineers who said we can improve on God's work, and the natural outlets God had placed there were closed up.

At this hour bear in mind the only time there ever was an overflow on the east bank of the Mississippi was in 1797, 1884, 1893, and 1913.

Since the outlets have been closed and the water confined to these particular channels by elevating, through levees, the west bank of the land on the Louisiana side, as placed there by God in Heaven, the west bank was from 7 to 14 feet lower than the land on the east side. The land on the east side, in other words, formed the foothills of the great river, but by man placing the levees closing the outlet the higher the levees became the more liable was the water to break over the east banks of the Mississippi River.

The gentleman from Tennessee [Mr. GARRETT] a few days ago described the conditions in four or five counties in the State of Tennessee which he so ably represents. The gentleman from Louisiana [Mr. KEMP] has some land in his district in the same condition, and the gentleman from Mississippi [Mr. COLLIER] has some of the lands in the same condition.

With this land subject to ruin and devastation because of the work of the engineers first to make the Mississippi River navigable, and then after they saw it could not improve navigation they come back and said we will call it flood control to protect private property. I have no fault to find with what they are doing except that if they damage property there should be compensation.

Mr. MANSFIELD. Will the gentleman yield?

Mr. QUIN. Certainly.

Mr. MANSFIELD. The gentleman stated that the land on the east side was 7 to 14 feet higher than that on the west side. Now, before the days of the engineer on that river, before the levees were completed, did the early-time floods overflow the land on the east side?

Mr. QUIN. There never was one recorded by man in the books except in 1797 and 1844. Yet since the levees have been constructed and the channel of the river made smaller by the levees being increased and increased on the west bank of that stream, the water, which must find some outlet, comes gushing across on the east side, and these magnificent farms that I have told you about have been destroyed, and these magnificent mansions are gone, and the tenant houses have been cleared away for brambles and briers. Understand, those people who owned that land have been to the Federal Government asking justice. First, the Congress of the United States failed to compensate them for their land taken for the public good. Then they went to the courts. It was decided by the Supreme Court of the United States that there was no way in the law by which they could be compensated and that they must get their remedy through the Congress of the United States. The Mississippi River Commission reported and recommended that one of three things be done—that the United States Government should either levee those properties like it was doing the others, that it should compensate the people in damages for what damages had been done, or should buy the property outright and use it for a forestry reservation, because they must have the timber and the willows to do revetment work all along that stream.

Mr. GARRETT of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. QUIN. Yes.

Mr. GARRETT of Tennessee. In connection with the suggestion or the question asked by the gentleman from Texas [Mr. MANSFIELD] as to whether prior to this engineering work on the other side there had been overflows, speaking for the Tennessee part, which is in exactly the same situation as the gentleman's section in Mississippi, I do not know whether there were overflows or not; but this is true, that the construction of the levees on the other side unquestionably makes the overflow much heavier than it ever was, and it holds the water there for a much longer time, and, unquestionably, conceded by the commission engineers and all who have studied it, it adds tremendously to the damage that is wrought.

Mr. MANSFIELD. Then a damage instead of a benefit has been inflicted upon those people?

Mr. GARRETT of Tennessee. Oh, yes.

Mr. SNELL. And I suppose that part of those levees at least were built at the request of the people down there in order to protect them from the river? Is that right or wrong?

Mr. QUIN. Oh, yes; the people on the Louisiana side of the river participated in it.

Mr. SNELL. Was it not done at their request? Did they not want those levees?

Mr. QUIN. Yes. The Louisiana side did, but not my people on the Mississippi side of the river in that section.

Mr. GARRETT of Tennessee. But if the gentleman from Mississippi will permit, the gentleman from New York [Mr. SNELL] does not get the gravamen of this matter. We on the east bank are complaining because of the damage which has been wrought us by the levees on the other side with which we have nothing to do.

Mr. SNELL. Oh, that is a local matter instead of a matter for the whole country, because they built levees down there?

Mr. GARRETT of Tennessee. The Federal Government has contributed to those levees which have damaged Tennessee and the section of Mississippi which the gentleman represents.

Mr. QUIN. The whole trouble at this time is that the levees have been built up to such a point that it is impossible for the waters to go off in their natural course and the way that God intended, and that water must come over to the east bank. And as proof that there has been damage, I have told you of these magnificent farms with mansions that cost from $150,000 to $200,000 to build all gone to rack and ruin. The people are in a helpless condition. The ground was very fertile, and a man could grow from a bale to a bale and a half of cotton to the acre. The ground was rich as the land in the Valley of the Nile, and to-day it is almost worthless. Up to this good hour not one dime of compensation has ever been given to a single one of those landowners. That property was so valuable that it was picked out by the pioneers on which to settle. The people from Ireland, the people from England and Scotland, people who had means, came back there before the State of Mississippi was even a territory, when it belonged to the Government of Spain, and picked out this fertile land above the danger of overflows, and established these immense places there for habitation. Steamboats then came down that river—great palaces as big almost as run on the Atlantic Ocean, and to-day there is nothing but a few tugboats and small barges, with the exception perhaps of the *Tennessee Belle*.

Mr. SNELL. And the gentleman contends that the people who own that wonderfully fertile valley and those beautiful homes are not able to pay anything as a contribution toward levees?

Mr. QUIN. They can not pay taxes. In the first place the land can not be leveed. The terrain is such that a levee was never needed on the east bank of that river. Since they have built them over there on the other side, the Louisiana side, and raised the level of the water, the water has come over and ruined those plantations in Mississippi in my district. It would be worth more than the land itself to construct and maintain the levees, and so the Mississippi River Commission in its wisdom recommended the three things that I have stated, and Congress has failed to do anything. We now have the opportunity to do justice and equity to those people. No one could expect the property of an individual citizen of the country or of a corporation to be confiscated for the public good without some compensation given to the owner.

But to this hour there has not been the case presented when Congress has not declined to do it, and the Supreme Court of

the United States, I presume in a just decision, decided that it was not a matter for the courts. That is the decision in the Jackson case, and the gentleman from the Committee on Rules, the gentleman from New York [Mr. SNELL], may do well to read that case and see that it is impossible for these people to get justice in the courts. The only place where they can get justice is in this forum, just where I am pleading now.

I think we had a bill in 1914 or 1916, reported from the Committee on Claims, to settle this matter, but Congress did not see fit to do it. We had precedents where that had been done in Illinois and Wisconsin and other States of the Union.

Mr. MANLOVE. Will the gentleman yield right there for a question?

Mr. QUIN. Yes.

Mr. MANLOVE. Is there any legislation now pending in Congress looking to that end?

Mr. QUIN. We are trying to get it into this flood control bill. The bill which has been reported out by the committee, in my judgment, does not go far enough to protect these people that I am describing. I have a rough draft of an amendment to insert in that bill. If Congress will pass it, it will do justice to those people.

Mr. MANLOVE. Will that cover the particular claims of the farmers who have lost by reason of the inundation of their farms, or will it be by a blanket measure?

Mr. QUIN. That will depend on what Congress may fix for the handling of the flood problem. Those people that I have described have been left out of all legislation, and I believe they are left out of the present proposed legislation. But I tell you I am going to stand here and fight for the rights of those people. Do you think we ought to sit down and let this vast program go through and this wrong continued to those helpless people who have seen their plantations go to wreck? They can not obtain credit from a safe and sound bank, and I doubt if a safe and sound bank would loan money on that proposition.

Mr. GARRETT of Tennessee. Mr. Chairman, will the gentleman yield for a moment?

Mr. QUIN. Certainly.

Mr. GARRETT of Tennessee. It is important that gentlemen should understand the real position in this matter. I refer particularly to the gentleman from New York [Mr. SNELL] and the gentleman from Missouri [Mr. MANLOVE]. Heretofore the Federal Government has steadfastly refused through all of its branches—executive and legislative—to assume any part of the responsibility for damages.

Of course, our equities have been there all along, the equities of those who have been situated like the entire State of Tennessee and the section referred to by the gentlman from Mississippi [Mr. QUIN]; and the courts have rejected all efforts by the landowners to press claims against the sovereignty on the other side of the stream. The sovereignty could not be sued. We have had no remedy and nowhere to go to enforce our rights.

Mr. SNELL. May I interrupt the gentleman there?

Mr. QUIN. Yes.

Mr. MANLOVE. In other words, I am sure the Latin phrase, "in statu quo," as often used in present-day parlance, is true of the people down there.

Mr. SNELL. Suppose that neither the Federal Government nor anybody else had ever put any levees or revetments down there. Would your people still insist on damages?

Mr. GARRETT of Tennessee. No. It is extremely doubtful, however, if there would have been very much overflow, because on the Missouri and Arkansas and Louisiana side the level is lower than on the east bank, and there is such a wide spread of water that the water went 75 miles out into Missouri and Arkansas.

Mr. MANLOVE. Suppose the water had gone 75 miles to the west. Possibly it would have been impracticable to lower the levees on the west side and let the water take its natural course. Now, what is the probable extent of territory of these fine farms which have been ruined on the east side of the river?

Mr. GARRETT of Tennessee. In my territory at its widest point it is about 10 miles wide. It begins at 9 or 10 miles and slopes down to nothing. Something like 500,000 acres of land have been damaged. And another factor of damage that I would call attention to, although I do not want to interrupt the gentleman from Mississippi unduly—but another factor of damage that enters into it, at least in my section, is the fact that purely for the purpose of providing levees on the west bank of the river revetment work has been put in which has so changed the current of the Mississippi River naturally that it has been thrown over and is cutting away the east bank. I have put into the RECORD a letter from a woman for whom I can vouch, in which she states that she had a valuable farm of several hundred acres and now she has only 300 acres left, and sand has been spread over that. It is ruined.

Mr. MANLOVE. Another thing presents itself to my mind. You hear people talk about outlets and pockets designed to drain the flooded area. What would be the condition of this fertile land in Tennessee and Mississippi if by some arrangement the water could be diverted and your land on the east bank left dry? Would it still be good land, or has a great deal of it been washed out?

Mr. QUIN. A great deal of it has been ruined, washed out, sand deposits ruining much of it, because the levees constructed on the west bank of the Mississippi River.

There were great bars of sand, several hundred feet or a thousand feet wide and as tall as a barrel in some places. In Claiborne County, Miss., there was once a populous town called Grand Gulf. By this revetment work on the other side of the river they have made it cave in until where that place stood is now across the river on the Louisiana side. Now, we have another place, Rodney, in Jefferson County, where the process made the land extend out 6 miles into the river. So you can see what has been accomplished by man's work. It has inevitably acted in such a way as not only to destroy the land on the east bank, but in many instances to damage it in many places and then to make it so that a crop is not certain, because if there comes any high water at all it is bound, through this levee system, to come over and ruin the crop.

Mr. MANLOVE. We can well understand that periodically your crops are drowned out, but what I am wondering is how many acres of land in your State in these particular places you are telling us about are completely ruined or partially so.

Mr. QUIN. I would not say completely ruined, but there are about 250,000 acres inundated by this levee system and I would say that a great percentage of that has been totally destroyed.

Mr. SNELL. But that would only be a small percentage by reason of the deposit of 3 or 4 feet of sand.

Mr. QUIN. Well, there is a good deal of that, and the overflows because of the levees make practically all of it worthless. There can not be any certainty of a crop any year. Before levees on the west bank of the Mississippi River it was practically sure of a good crop every year. All of this land was not in cultivation. You understand that a big lot of this is woodland. All of this land was not producing fine crops, as I have said.

Mr. MANLOVE. Was the timber drowned out?

Mr. QUIN. In many instances the timber died, but there is a type of timber that grows in this soil. In this particular soil willows grow up, and that was one reason why the Mississippi River Commission thought it would be advisable for the Government to buy that soil. I think they estimated they could acquire all of the territory affected in these four counties in the State of Mississippi mentioned by me for about $2,300,000. However, that was many years ago.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. BUCHANAN. Mr. Chairman, I yield the gentleman 20 additional minutes.

Mr. GARRETT of Tennessee. I want to give the gentleman one illustration and then I will not again interrupt the gentleman. I did not mean to be understood as saying there were 500,000 acres of land ruined in my section, but what I meant was that there was at least that much subject to inundation. Now, just to illustrate what the levee will do.

I was at the little city of Hickman, Ky., one day in April, very shortly after I had reached home. You will remember that the flood with us began early in the spring. Hickman, I suppose, is a town of about 3,000 people, and the residence portion of it is on a pretty high bluff, but the business part of the town was under water from 10 to 36 inches deep. On the day following my visit there what is known as the Dorena Levee across in Missouri broke and within 20 hours all the water was out of Hickman.

Mr. DEMPSEY. Will the gentleman from Mississippi permit me to ask a question of the gentleman from Tennessee?

Mr. QUIN. Certainly.

Mr. DEMPSEY. I can not understand what the gentleman has said about damage by revetment work. Revetment work is done not to change the channel or not to change the banks but to stabilize the banks as they are, and it would seem to me from seeing it done there, as I did last fall, that the stream would simply be stabilized and made to flow in the channel as it is. How, then, could you get damage on the opposite side from revetment work when that simply makes your channel remain just as it was?

Mr. GARRETT of Tennessee. The difficulty is that that theory does not work out, or, at least, it did not work out opposite to my district, because, as I understand it, there is no question in the minds of the engineers but that the revetment work put in at a certain point there, at Booths Point, on the west side of the river, did cause a diversion of the current. It threw it over and it began to cut away the east bank of the river, while it was put there primarily for the protection of the levee that was on the west bank.

Mr. DEMPSEY. That was back of the bank?

Mr. GARRETT of Tennessee. Yes. It was put there to keep the bank from being cut away.

Mr. DEMPSEY. So it would go back to the levee?

Mr. GARRETT of Tennessee. Yes. That was on the west bank, and it diverted the current so that it threw it over on the east bank and took away my people's land.

Mr. WHITTINGTON. Will the gentleman from Mississippi permit me to ask a question of the gentleman from Tennessee?

Mr. QUIN. Yes.

Mr. WHITTINGTON. I was just wondering whether the gentleman could put in the RECORD the names of any engineers who support the statement that levee work on the Missouri side caused a caving in on the Tennessee side?

Mr. GARRETT of Tennessee. I did put a statement in the RECORD.

Mr. WHITTINGTON. I remember the gentleman's statement and his statement before the Committee on Flood Control, but I do not recall the names of any engineers, certainly no Government engineers, who maintain that the construction of that revetment work caused a cave-in on the opposite side.

Mr. QUIN. There is this about it: We know that something has caused it. We know that this river did not hurt us like God in heaven put it there. We know that on the east side, on the Mississippi side, much of the space was 7 feet higher and much of it 14 feet higher than on the Louisiana side before the levees were built; after the levees were constructed on the Louisiana side and after the outlets were closed so that the water could not go out of the Mississippi River, and when it had to be confined in this channel which the engineers made by constructing levees, the waters came over to the Mississippi side—the foothills—and ruined all this farm land. There is where the damage has come to the people I am representing and for whom I am pleading here. They have been to every place seeking redress and now the last resort is before this Congress when we are passing on the general flood-control proposition, and it appears to me that the people of the United States, whom you gentlemen represent, would not want these few individuals to be sacrificed even for the public good.

It appears to me these people have been long-suffering. They have borne the brunt of the levee system. These people have stood there and lost their crops, they have lost their properties, and now, when the Government is recognizing, as I believe we are doing from one end of this Republic to the other, the fact that we must assume control of the Mississippi River, these people, the riparian landowners, who have been damaged without their consent and without any fault on their part and against their will, ought to be compensated in some way for the wrongs that have been done them and must continue to go on unless there is a change in the river system; and, of course, under this flood control bill levees are going to be maintained.

I do not know whether they are going to provide the necessary outlets or not, but even if they provide the necessary outlets below and clear down to the Gulf of Mexico, we will not have any redress because the levees are already there and the water seeking its level, when it can not go out on the Louisiana side, must come over on the east side as it has been doing in the past.

Is it possible that the United States Congress would pass this bill without protecting these riparian landowners? In this age when everybody seems to be out grabbing after wealth, it looks to me like we should occasionally look at justice. The American people, a great and honest people, want justice done to all of its citizenry.

These citizens along the east bank of this river have suffered, they have endured, and now they come to their accredited representatives in Congress and ask that justice be given to them.

Mr. DEMPSEY. Will the gentleman yield?

Mr. QUIN (continuing). And you, my friends, will help us to get this justice that our people are asking.

Mr. DEMPSEY. I am asking this purely for information.

Mr. QUIN. Certainly.

Mr. DEMPSEY. When the original bill was passed, providing for flood control, under which the Mississippi River Commission has operated from its inception, was there any provision in the law for compensation to those who might be injured by the construction of the levees?

Mr. QUIN. I think not. The Supreme Court of the United States has decided there is no remedy at law and the only place where justice can be done is through the Congress of the United States; and as one humble Representative of these people, my constituents and friends—and those of other districts—I come to you gentlemen and ask that you place it in this flood control bill and give these people the justice and the equity for which they have been pleading all these years.

Mr. SNELL. Will the gentleman yield?

Mr. QUIN. I yield to the gentleman from New York.

Mr. SNELL. Is not this last flood the only flood that has been very dangerous or destroyed very much property in the gentleman's district?

Mr. QUIN. Ever since they started the levee system, or ever since they had the levees high enough on the Louisiana side of the Mississippi River, it has been doing this damage that I have related.

Mr. SNELL. I understood from the people when I was down there that this was the first flood that had ever gone down through the Yazoo district.

Mr. QUIN. I am not talking about the Yazoo district. I am talking about the district between Vicksburg and Baton Rouge.

Mr. SNELL. Oh, farther down.

Mr. QUIN. Yes. You understand this was called by the Mississippi River Commission the Hourochitto-Natchez district and the other is the Brunswick and Yazoo district. I do not think they ever had any trouble up there. They make cotton all the time, but these people I am talking for, since the levees have been built, have been damaged continually, and I have tried to make it plain that these magnificent farms, productive, allowing their owners to live in opulence, have now brought them to an impoverished condition where they are hardly able to pay their taxes.

Mr. MANLOVE. Will the gentleman yield?

Mr. QUIN. Certainly.

Mr. MANLOVE. I will say to the gentleman that his argument has produced a profound impression upon me, and there is one thing I would really like to know and I think the Congress would like to know more than anything else. In view of other legislation, probably not of this tenor but of a somewhat similar tenor, I would like to ask the gentleman whether or not, if Congress attempts to settle the damages that have now been incurred, it may not become cumulative and these same landowners or those to whom they may sell, be back here repeatedly asking for a continuation of appropriations to take care of such damages in the future, so that eventually we would have to pay for this same land over and over again. If that condition can be taken care of, I will say to the gentleman, I am heartily in accord with his argument.

Mr. GARRETT of Tennessee. That will have to be taken care of.

Mr. QUIN. That will be taken care of. One way to do that would be through a receipt signed as an estoppel. But in my judgment, the Mississippi River Commission recommended a much better plan, and that is to buy the land straight out. The Government will always have to have it and they can use the willows there in making up their mattresses. The Government should buy it straight out and maintain it as a forest reservation. This is set out by the Mississippi River Commission in one of its reports and is also in the hearings.

In my judgment the Congress of the United States could do one of the three things that the Mississippi River Commission recommended, and justice could be done to all of these landholders and nobody suffer from subsequent and consequent acts. I yield.

Mr. EVANS of California. Has any report of the board of engineers or a commission or otherwise been made showing that by the construction of the levees on the west side the east side was inundated?

Mr. QUIN. Yes; the Mississippi River Commission say that in the report, and they say it practically in the indicative mood.

Mr. EVANS of California. What is the date of that report?

Mr. QUIN. Nineteen hundred and twelve.

Mr. EVANS of California. Has any protest ever been made by the people on the east side?

Mr. QUIN. They have been to Congress for redress, but the bill could not get through. The Supreme Court of the United States ruled that the Government could not be sued in a case of that kind. So the only chance is of the vote of you gentlemen in this Congress in the flood control bill to give them the compensation they are entitled to.

Mr. LEAVITT. Will the gentleman yield?

Mr. QUIN. I yield to the gentleman.

Mr. LEAVITT. Is the area which the gentleman speaks of timbered now?

Mr. QUIN. There is some cottonwood and willow timber on it. It is not the long-leaf yellow-pine timber.

Mr. LEAVITT. I am greatly interested in the proposal of the gentleman, but I am wondering if that land could be made into a timber area?

Mr. QUIN. Oh, yes. The commission says so. I hope the gentleman will read the report of the commission. It is in the flood-control hearings. The gentleman from Tennessee [Mr. GARRETT] has the statement there. This is in the section of the country where the Government could make use of it, and the Mississippi River Commission so stated. There were three things in view, and they recommended this as the best of the three—that the Government acquire title to it.

Mr. LEAVITT. It could be made valuable so as to be a good investment for the Government?

Mr. QUIN. Yes. Our Government, I presume, will continue to handle the Mississippi River project and handle it in a governmental manner, and they will need all the willow in the Government work, and they can raise it instead of having to go out and buy it at a high price from somebody else. They can get all they need on their own reservation.

Mr. MANLOVE. Will the gentleman yield again?

Mr. QUIN. I yield.

Mr. MANLOVE. Does the water overflow to the extent that it would prevent making it a game refuge?

Mr. QUIN. No. This is the hillside of the Mississippi River, and in this section in these four counties the hills come close to the bank of the river. You know, naturally, if the edge of the bank is 14 feet higher than it is on the other side, there is a hill on the higher side, and then back a few miles are the hills that would take care of all of the game in case of a flood or highwater; they would make their escape to the woods.

Mr. EVANS of California. Are there levees on the east side?

Mr. QUIN. The Mississippi River Commission reported that it would be impracticable, as much as the land is worth, to construct and maintain levees on the east side.

Mr. EVANS of California. Therefore they let it overflow?

Mr. QUIN. Yes; the people did try in two places to construct levees, but they say it was a losing game. You could not build a levee high enough to protect the land without practically confiscating the property.

The fellows above may not have levees, and the water would come in back behind these levees. In other words the flood control bill practically makes this the flood way of the Mississippi River; all the land and all the banks that I have described to you under the pending bill is practically the flood area, the channel of the Mississippi River as far as practical purposes are concerned, and it is without compensation to the owners of the flooded area.

Mr. EVANS of California. How many acres are involved?

Mr. QUIN. Two hundred and fifty thousand acres, and in Tennessee 487,000, and I do not know how many in the district of the gentleman from Louisiana [Mr. KEMP].

Mr. CARSS. Will the gentleman yield?

Mr. QUIN. I will.

Mr. CARSS. If the Government should purchase it, would it make a good game preserve?

Mr. QUIN. Yes; it could not have a better one in the United States. It is an ideal spot.

Gentlemen, of all the matters that have been before the Congress in my judgment there has never been one with more justice and equity on the side of the complainants than we have here on the side of these riparian landholders. There has not been an act of omission or commission on their part that brought the condition about. They are simply being immolated on the altar for the public good. These good people have undergone the hardships all these years. They now ask the Congress of the United States to come to their relief and give them justice. Gentlemen, in my judgment this bill should carry a provision like I have just stated here, or something equivalent, in order that the riparian landholders shall receive compensation for the damages, the wrongs and the injury they have suffered and will suffer in the future. [Applause.]

Mr. BUCHANAN. Mr. Chairman, I yield 20 minutes to the gentleman from New York [Mr. O'CONNELL].

Mr. O'CONNELL. Mr. Chairman and gentlemen of the House, on Monday, February 20, 1928, this House, following the example of its great Committee on Military Affairs, unanimously passed H. R. 5494, which has for its beneficent purpose the sending of the mothers and unmarried widows of the heroic dead of the World War, at Government expense, to the graves of their sons or their husbands in the cemeteries abroad.

I called attention at that time to the fact that those of us that had to do with the adoption of that legislation enjoyed a great privilege and honor, and could always look back in future years with satisfaction to participation in the completion of a meritorious and salutary accomplishment. The distinguished author of the bill, the gentleman from Pennsylvania [Mr. BUTLER], whose courtesy and kindness has endeared him to every Member of this House, has assured me that since the passage of this act, the newspapers throughout the country and the country at large, have, with practical unanimity, applauded our action. So the country is thrilled by the fact that we are permitting these splendid women, as guests of the Government, to kneel at the graves of their beloved dead in the hallowed fields of France and Belgium. Their hearts are bowed in grief and pain because of the irreparable loss sustained in the World War. If reason had prevailed in those hectic and historic days there would have been no war, and there would have been no casualties, no dead, and those splendid boys would, most of them, be here to-day, and this sad pilgrimage these women are compelled to take would be unnecessary. Surely the saying is true that war is hell. Let me read for you a vivid description of this awful conflict which recently appeared in the Brooklyn Daily Times of my home city, written by its great columnist, "A B M." I think it especially appropriate as I am discussing the subject of war, and I am sure will impress the Members of the House with this war. I quote:

A moving picture of the war, depicting the battles of 1916, has been shown in Paris.

The verdict of those who saw it is that it is too horrible to be publicly shown.

Descriptions of it shake the heart and mind of every civilized man and woman.

Berlin audiences that saw it left the theater grim, white-lipped, silent, stricken dumb with fright.

They had seen films from the official cameras of the War Departments of France and Germany; taken in the very midst of the battles by photographers who came out alive only by miracles.

This film should be shown.

Not just to students at military training colleges, not just to officers and soldiers, but to every citizen of every country in the civilized world, whether it plans war or not, whether it dreads war or not.

Forget the nationality of the soldiers who took part. Remember only that they were human beings, our fellowmen, flesh and bones and blood like ours.

Show nations this film.

Show them the ranks of attacking soldiers, advancing under cover of their barrage to the trenches uprooted and devastated by advance fire. Show the first rank fall, clutching its knees. Show the machine-gun fire raised to meet the next rank. More abdomen and chest wounds now. Show line after line falling upon the bodies of those who went first, until the attack becomes an insane stampede, an unbelievable nightmare.

Show the column of soldiers marching away from the front, guarded by sentinels with fixed bayonets; one of the daily batches of men gone insane with the sight of war.

Show the bombardment of Dead Man's Hill. The artillery plays against the sides of the hill where thousands of dead and wounded men lie. The exploding shells send up showers of mud and débris mixed with human bodies, arms, and legs.

Show the close-up of an infantryman racing directly for the camera; his face distorted till it loses all human semblance; he runs like a madman, tearing his uniform on the barbed-wire, ripping the flesh from his own hands and legs; the most horrible close-up ever recorded on the screen. He stops, claws at his throat, drops on his knees. He is still biting the filth and mud around him when smoke blurs out the picture.

These are not the ravings of a hysterical and sentimental pacifist. They are the facts, registered on celluloid; the cold truth seen by the eye of official cameras.

They tell what mankind forgets too easily; what the new generation of peace can not imagine, because it is too terrible to think of; what even the returned soldier must forget if he is to stay sane.

Every war is the same. Read The Dynasts, by Thomas Hardy, for a picture of the Napoleonic battles. Read Chickamauga, by Ambrose Bierce, for a picture of our own Civil War. Read The Red Laugh, by Andreyev, for another picture of the World War.

This film should be shown. It is not lurid exaggeration. It is not overheated imagination. Would that it were!

Show it to every nation alike, little and big, powerful and insignificant, peaceful or pugnacious. Show it to the savage just making the acquaintance of another civilization; show it to old and cultured Europe; show it to young and vigorous America.

Show it to diplomats and ambassadors sitting at the tables where treaties are drawn up. Show it to rulers—kings, presidents, dictators. Show it to scientists and inventors preparing in laboratory and research stations the machines and gases of another war.

Show it to business men, big and little; to financiers, dreaming of commercial dominion, blind sometimes to the fearful price of conflict in terms of gold. Show it to labor, to the men and women of every country who work.

Show it to the mothers and fathers of the world. That infantryman is their kindergarten child, their young son. Show it to every occupation, trade, profession, and business between the Arctic Ocean and the Antarctic.

Say to them, "This is war. These are no studio battle fields, no painted wounds, no bloodless conflicts reeled off to the bang of a movie orchestra's piano. These are real deaths, real slaughter, real maimings."

Let audiences of every nation come out grim, silent, white lipped.

Say to them, "This is war among the nations of humanity. Shall we have more of it?"

Mr. SNELL. Mr. Chairman, I yield 10 minutes to the gentleman from Pennsylvania [Mr. McFADDEN].

Mr. McFADDEN. Mr. Chairman, I want to call the attention of the House to a situation that has developed in finance in this country during the past few months which has attracted the attention of the students of finance and banking to an extent that it has brought forth, during the last few months, speeches by such eminent bankers as Charles E. Mitchell, president of the National City Bank of New York, and Mr. John McHugh, president of the Chase National Bank of New York City, two of the largest and most important banks in the country. Members will recall that last year, about a year ago now, we passed the McFadden Act, which amended in important particulars the Federal reserve act and the national banking act, bringing the machinery up to date, so that the banking business of this country could proceed in an orderly and proper manner, since which time the assets of the national banking system have increased $3,000,000,000, and the law is working in a splendid manner. I do not care to comment further on this, but desire to quote Mr. Mitchell as follows:

Charles E. Mitchell, president of the National City Bank, writing in the current number of the American Bankers' Association Journal, calls attention to the increasing cost of bank operations and the competition for business whereby banks are finding themselves between the upper and nether millstones of high interest rates paid on deposits and diminishing yields on investments. He says the subject is pressing because the general trend of money rates is likely to be downward for some time to come, which must have a tendency to still further reduce the return on high-grade securities. It is a trite remark that "banks live mainly upon the margin between interest received and interest paid," but present-day practices seem to ignore this principle.

Against gross earnings of all member banks in the fiscal year ended June 30 last of $2,068,870,000, expenses aggregating $1,475,200,000, or about 70 per cent. After net losses and dividends there was only a margin of $147,351,000 left. The largest item in the banks' expense account is interest on deposits, which last year amounted to $687,021,000, or 46.5 per cent.

Obviously there are two alternatives before the banks. Either they must reduce operating expenses, including salaries, or cut interest on deposits. Competition for business and the numerous services which banks now feel called upon to extend customers have brought them to their present predicament. To curtail these services now, or to cut salaries, are extreme measures not justified in the circumstances. There are sound economic reasons why interest rates on deposits should be lowered.

Mr. Mitchell traces the influences since the war, through increase in our gold holdings and accumulation of wealth to bring about lower money rates. He points out that current interest rates on deposits should be based on current bank earnings, not on past profits. Many banks hold bonds which they acquired when yields were higher than are ruling now. They are enjoying high returns on original costs or perhaps realizing profits by sale. Clearly these earnings are not on a permanent basis. Yield on a selected list of high-grade bonds fell since the close of 1925 from 4.64 per cent to 4.11 per cent, and a similar list of State and municipal bonds declined from 4.20 per cent to 3.89 per cent. How can banks afford to pay as high as 4 per cent on deposits, as some country institutions (not savings banks) have been doing? It means that such banks must venture into investments offering higher returns, but which are not consistent with safety. Savings banks, building and loan associations, and banks of discount have separate and distinct functions to perform and are governed by separate laws. They should not encroach upon each other's field.

Fortunately the situation is being realized by the so-called country banks. Last fall certain up-State banks passed a resolution that after January 1, last, no more than 3½ per cent should be paid on savings accounts. Even that rate might well be cut. New York Clearing House banks pay only 2½ per cent on 30-day deposits and saw no reason to make a change when the rediscount rate was recently advanced to 4 per cent. In a period of established easy money, depositors can not expect to be a privileged class.

I now quote Mr. John McHugh. Mr. McHugh, among other things in his speech, said this:

But many country bankers feel compelled to buy investments primarily with reference to yield because they are paying high interest on their deposits. They hesitate to offer less interest to depositors, fearing that the deposits will then go to competitors. They feel themselves caught between an upper and a nether millstone. If they pay high interest on deposits, they can not buy Government securities, acceptances, outside commercial paper, and other highly liquid obligations with their depositors' money. If, on the other hand, they pay low interest on deposits they fear they will lose business to competitors.

This is the situation which comes about because of the great plethora of money in this country and the lack of proper investments in which that money can be placed. Quoting further from his speech:

If, in the process of reduction to lower interest rates on deposits, certain time deposits are withdrawn and the proceeds used in the purchase of securities and real-estate mortgages by the depositor, this is precisely what ought to happen. The country banker who can market part of his holdings of mortgages, and safe, high yield securities with narrow market, to his own depositors has improved his position and the community's position.

To my mind, Mr. McHugh and Mr. Mitchell have touched one of the vital things in our present banking situation. This accumulation of idle savings of the people in the banks of this country in the form of demand deposits at interest, which deposits are in turn invested by the banks in long-time loans is one of our important problems for banking to solve to-day. We have some 30,000 banks in the United States that are equipped to carry on a banking business. Because of the fact that we have been turning our national resources of late into cash to such an extent and because of the changed financial conditions throughout the world, it has brought a vast amount of idle money into these banks. I want now to quote an item from Moody's Investors Service, written by a careful financial analyst, who have given very careful thought and attention also to this very subject. Quoting, in part, speaking on this same subject, he says:

But to allow 4 per cent interest on depositored funds which must be employed in bond investment is unsatisfactory, because of current prices of strictly high-grade bonds do not yield enough over 4 per cent to show many banks a satisfactory margin of profit.

Mr. CELLER. Mr. Chairman, will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. CELLER. Is the gentleman aware that in New York State attempts are being made to allow savings banks wider range in their investments so that they in turn may grant a greater yield or continue to pay what they do now to their depositors?

Mr. McFADDEN. Yes.

Mr. CELLER. And that is along the lines of the gentleman's thought?

Mr. McFADDEN. Yes. Quoting further from a speech of Mr. Mitchell along this same line, he calls attention to the increasing cost of bank operations and the competition for business, whereby banks are finding themselves between the upper and the nether millstones of high interest rates paid on deposits and the diminishing yields on investments. He says the subject is pressing because the general trend of money rates is likely to be downward for some time to come, which must have a tendency to still further reduce the return on high-grade securities.

That leads me to make the remark that in the economic conditions which are confronting not only the business interests of the country but the bankers, a word of warning should be issued the depositors and to the country banks throughout the country to stop, look, and listen in connection with the rates of interest they are demanding and paying on these idle funds and to pay attention to the kind of investments that the funds are invested in. We all know here that there are now pending in this House and in the Senate committee bills asking Congress to investigate the subject of brokers' loans. My friend from Iowa [Mr. DICKINSON] some time ago put in such a bill. To-day in the Committee on Banking and Currency of the House a hearing on the La Follette bill has been held on this subject of brokers' loans, the attention of Congress being directed to the large amounts of investments by banks in that class of loans in the city of New York, asking that the matter be curbed. Some people are suggesting that the management of the Federal reserve system should curtail brokers' loans.

Those loans are made possible at this time, in my judgment, after the study I have made, because of the coming into New York from the country of this vast amount of idle money. It is an important subject, and I wanted to say just a few words to the House and to the country along those lines.

I am sure the American people need no one to tell them that since the World War we have changed from a debtor Nation to a creditor Nation. But very few realize that our prosperity and wealth is bringing many changes in our banking and financial practices.

Those who are responsible for the operation of our Federal reserve banks, large commercial banks, and our finance companies have a stewardship, the responsibility of which they fully realize, but which the American people do not fully appreciate. Nor do the American people realize the work which is being done to-day and which will show its benefits in the to-morrows.

When I was in England last year it afforded me considerable pride when meeting their bankers to compare them in my own mind's eye with those at home. I always knew we could be proud of our financiers, but many Americans have not this opportunity of comparison.

Of course, the very existence and operation of our Federal reserve banks, together with the praise that has come from the bankers of England, should be evidence to all of us that our bankers are cognizant of our new wealth and will guide and conserve this wealth for the American people.

The banks of our country are confronted with a new problem. Their depositors are asking for advice and information about investment trusts and their securities and for information as to what to do.

Now, coupled with this great influx of money comes along the proposition of the development of new methods of investing this vast amount of idle money, and since the passage of the banking act a year ago there has developed the investment trust in this country. It is an important development, and I desire to call the attention of the House and of the country to this development, and it seems to me from the study I have made of it that there is an organization which, if properly handled, might be very beneficial in helping our investors to solve the question of how best to invest their idle funds at this time, with the great plethora of money and lowering of returns on investments.

The investment trust is growing so fast in the United States that almost every day sees a new one created. Over 150 different trusts with resources of over $800,000,000 have suddenly been created. This is one of the startling effects of our becoming a creditor nation. In other words, we now have more money than we have securities, and the buying side of the security business, for the first time, is being organized through the medium of these investment trusts.

When in London, economists, bankers, and investment trust managers prophesied to me, that within the next 10 years the United States would have at least 500 different investment trusts, with resources of over $10,000,000,000.

Now, there can be no question, but that a soundly managed investment trust is of great benefit to the investor of moderate means, and of still greater benefit to the capital market in stabilizing security prices.

Heretofore we have not had these investment trusts in this country. The Congress a few years ago did pass the so-called Edge bill, which really was an investment trust bill, but which provided simply for the accumulation of foreign investment securities to be put into acceptable form for investment of American capital, but that did not permit the investment in investment securities originating in the United States.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. McFADDEN. May I have five minutes more?

Mr. DICKINSON of Iowa. I yield to the gentleman five minutes more.

The CHAIRMAN. The gentleman from Pennsylvania is recognized for five minutes more.

Mr. McFADDEN. When we created the system of Federal land banks we created under national law an investment trust for farm mortgages—and thus given the farmers a savings in interest annually of $180,000,000.

My chief concern about our investment trusts is their future growth. Will our trusts protect the savings of our American investors, or will millions be lost through unsound management? This same thought was expressed in a recent editorial in the London Economist which said, speaking about American trusts—

> They may be compelled to proceed by the method of trial and error along the path trodden by Englishmen 40 or 50 years ago * * * and that many of these American trusts would scarcely be recognized as legitimate investment trusts in Great Britain, nor would their methods receive universal approbation.

(See Exhibit A.)

The investment trust has been defined as a convenient form of organization, by means of which the funds of many investors are brought together for the sole purpose of investment, so as to give the investor of moderate means the same advantages that the large capitalist receives. Thus, the small investor is able to obtain the two important things usually lacking in the investment of small funds. First, the detailed attention of men who make investment their business; second, the wide and adequate distribution of investment risks. (See Exhibit B.)

For more than 60 years the investment trust has been a favorite medium of investment in England and Scotland. Their soundly managed investment trusts have stood the test of wars and panics. They have been through every possible upheaval and diversity in the securities market. They are popular in England and Scotland to-day. (See Exhibit C.)

Mr. Edgar Higgins, of New York City, authority on investment trusts, who has studied them in Great Britain, and who has had considerable experience in their management, tells me that these years of operation in England and Scotland have taught some very valuable lessons:

> First. That the management must be unbiased in the selection of investments, for any affiliation which tends to warp free judgment is harmful.
>
> Second. That the management can not give too much care to diversification. This is clearly shown by their usual restriction to not less than 20 different investments which, in actual practice, is always exceeded, for now the average holdings of a trust are well over 500 different securities.
>
> Third. That the management should make complete operation and earning statements and lists of holdings to the public periodically.
>
> Fourth. The necessity of not paying out all of their earnings in dividends, but withholding and reinvesting a large part, thereby building up a large protective surplus.

These 60 years have also developed an orthodox form of capitalization which most of the English trusts resemble to-day.

A brief description of such a typical trust may be helpful. These British trusts do not resemble our great American trust companies. They are totally different. Their sole business is the investing and reinvesting of their capital in a widely diversified group of securities. They do not conduct a general banking business, nor distribute securities. They are not holding companies nor finance companies.

Suppose we examine a typical Scottish or English trust with a capitalization of £2,000,000 ($10,000,000), consisting of—

Bonds (debentures) 4 per cent	$5,000,000
Preferred stock 5 per cent (preference)	2,500,000
Common stock (ordinary)	2,500,000
Total capitalization	10,000,000
Accumulated surplus (25 per cent)	2,500,000
Total resources	12,500,000

Now, assume that the gross income of this trust was 8½ per cent, or $1,062,500. After deducting the expenses of $50,000 (one-half of 1 per cent of the capital), and taxes of $148,000, there is left a net of $864,500. This sum covers the bond interest charges of the 4 per cent bonds four times. The balance is more than five times the preferred dividends. And finally, the common stock has available for dividends, $21.50 for each $100 of common.

The various classes of securities issued by these investment trust suits different types of investors. For the widow who must seek safety of principal, the debenture bonds are the best investment. For the business man of limited means, the preferred stock is suitable. For the wealthy man the common stock is desirable.

What sort of investments do these trusts own can best be answered by giving actual figures taken from a typical British trust's annual report. The total number of different investments in this one was 873.

(1) The distribution among different classes of investments was—

	Per cent
Idustrial	47.67
American and foreign railways	19.01
Banks and financial	11.74
Government securities and municipal loans	10.15
Miscellaneous	11.43
Total	100.00

(2) The classification, according to localities, was—

	Per cent
Great Britain	38.13
Dominions	12.73
South America	27.42
United States	9.05
Continental Europe	4.87
Asia and Africa	4.36
Mexico	3.44
Total	100.00

(3) The types of the securities were—

	Per cent
Bonds	40.29
Preferred stocks	17.42
Common stocks	42.29
Total	100.00

What have been their earnings on their investments? Again let us take a trust's actual figures which are based upon cost.

	From interest and dividends	Market profits realized
	Per cent	*Per cent*
1917	7.55	0.63
1918	7.20	1.33
1919	8.15	1.09
1920	7.78	1.33
1921	7.60	.10
1922	7.75	.18
1923	7.11	.50
1924	7.29	.06
1925	7.67	3.11
Average	7.52	1.15

It will be seen that the yearly average earnings of the nine years was 8.67 per cent.

In seeking information about the experience of British trusts, Mr. Robert L. Smitley, of New York City, authority on business and economic books, also adviser to Harvard Business School and many American and foreign universities, informs me that there is no specific English book about investment trusts, but that the best article written by an Englishman, dealing with the subject is a chapter in Powell's Evolution of the Money Market. (See Exhibit D.)

Mr. Smitley has obtained for me articles from the London Economist which tell of the British trials and their experiences from 1882 up to 1925. (See Exhibit E.)

Because the foregoing records are not available to the general public, there is much confusion among the various States in respect to their proposed "blue sky laws" or regulations. The State of New York attorney general's recent and hastily compiled report is an example of this. It has been revised three times. (See Exhibit F.)

The States of Utah and California require that an investment trust make public its list of holdings. (See Exhibits G and H.)

That much information is needed by commercial and investment bankers and the lawmakers regarding investment trusts is shown by Exhibits I and J.

When half of the investments in our American trusts are in foreign securities, it may be necessary to place investment trusts under the regulation and control of the Federal Reserve Board by amending the Federal reserve act.

THE FUTURE OF INVESTMENT TRUSTS

Since the World War the wealth of the United States has increased enormously. Our people year by year are growing richer, and have more and more funds available for investment. Within recent years the supply of investment funds has become greater than the supply of good investments. Because of this abundant investment money the coupon rate on new investment issues has been steadily reduced—from 8 per cent during the war to less than 6 per cent at the present time, with the future outlook for 5 or even 4 per cent.

Mr. O'CONNOR of Louisiana. Is not that a surprising statement, in view of the unemployment of labor and the depression of the farming interests at this time?

Mr. McFADDEN. I do not think it is as serious a question of unemployment as the gentleman indicates, and I think agriculture is in a better condition now than it was last year, although I know there is suffering in some places.

Mr. BLANTON. Mr. Chairman, will the gentleman yield right there?

Mr. McFADDEN. Yes.

Mr. BLANTON. With regard to there being "suffering in some places," does the gentleman believe in the old scriptural injunction, "Cast thy bread upon the waters and it shall return to thee manyfold after many days"? The gentleman from Pennsylvania and myself were strong proponents for women's suffrage, and some years now have passed and the gentleman from Pennsylvania has now one lady opponent and I have two, so that we have bread coming back to us. [Laughter.]

Mr. McFADDEN. Apparently; yes.

Mr. MANLOVE. Mr. Chairman, will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. MANLOVE. I heard a very distinguished gentleman from Boston make the statement last night that there was eight times as much money in the savings banks of this country at the present time as there was 10 years ago, and I heard another gentleman make the statement that there were six times as many children from the homes of laborers in the higher institutions of learning as there have been in any other period in the history of the world. If that is true, I think to a certain extent that would bear out the gentleman's statement that there was a period of prosperity.

Mr. O'CONNOR of Louisiana. Mr. Chairman, will the gentleman permit another observation?

Mr. McFADDEN. I have only a few moments more. I do not want to take up the time of the House.

It is an economic law that investment capital will always flow where it will receive the largest return. Just as the superabundant capital of Great Britain in 1885–1895 sought remunerative foreign investments, so the superabundant capital of America is now seeking high-yield investments in foreign countries.

And just as the investment trust enabled British investors to obtain increased returns with greater safety, so our trusts should enable American investors to get higher yield, wider diversity, and greater safety in both domestic and foreign securities.

The rapid establishment of investment trusts in this country during the past three years gives evidence that this type of institution will continue to grow in number and in resources. Of course, some of these trusts will be more successful than others, depending upon the ability, integrity, and foresight of their management. That, after all, is the basic test of success of any financial institution.

There is no department of investment which deserves greater attention from the American public than the investment trusts. We have loaned upward of $12,000,000,000 in foreign countries. The prospect for many years to come is for additional foreign loans. Hence, the American public will of necessity become an increasingly large holder of foreign investments through the medium of investment trust.

A bulletin of the Federal Reserve Board in 1920 said:

> The investment trust enjoys many advantages not usually available to the individual investor. A company formed for the purpose of investment is in a position to investigate the financial condition of undertakings in which funds may profitably be invested. The officers of such a company develop the habit of forming dependable judgments of economic conditions in foreign countries and the conditions of the investment market.

In view of this situation, the near future must inevitably witness the creation of more and more investment trusts in the United States.

Great Britain in its 60 years of investment trust management, has developed many worthy traditions by which America, if wise, should benefit.

Without denying to the British any of the praise they so well deserve we can reasonably expect that our wisely managed investment trusts will produce a record as superior to the British trusts as our industrial and banking system excels theirs. I desire to now call your attention to a statement by Ellis J. Powell on the evolution of the money market, a most important historical and analytical study, Exhibit D, and several other exhibits on this important subject, which I have referred to.

EXHIBIT A

[From the London Economist, November 5, 1927]

Investment trusts in America: Among the by-products of America's attainment of the status of a great creditor nation has been her virtually new discovery of the British investment trust. To those whose memories of conditions in Great Britain go back even a moderate number of years, there is an element of intense personal interest in the spectacle of a virile and wealthy people, who received their financial schooling as inhabitants of the most influential debtor nation in the world's history, confronted with dramatic suddenness with the responsibilities and perplexities inseparable from their new position, and compelled to proceed by the method of trial and error along the path trodden by Englishmen 40 or 50 years ago. American financial knowledge and psychology, American money market machinery, and American law itself, have all been built up in response to the necessities of the "debtor régime," when the Nation's prime task was the finding, by some means or other, of sufficient new capital to insure the continuous exploitation of the resources nature had so lavishly provided. To-day the position is reversed. New money is constantly seeking fresh channels of investment, and in the process of somewhat hastily extemporizing the necessary technique, that peculiarly British institution, the investment trust, has come in for a large share of attention. According

to Mr. Edgar Higgins, an American observer who has done much valuable pioneer work in this respect, there are to-day just over 100 investment trusts in the United States, with resources of approximately $500,000,000, some 95 of which have been formed during the last three years. Many of these companies, however, would scarcely be recognized as legitimate investment trusts in Great Britain, nor would their methods receive universal approbation. Rather, less than half the total companies are, in fact, investment trusts properly so called—corporations which have issued debentures, preferred and common stocks to the public, and invested the proceeds in a large number of securities covering many sections of the American field. With them are identified a number of well known and highly reputable banking houses. Of the remainder, the so-called bankers' share organizations are in a very different category.

They generally proceed by way of purchasing as few as 10 well-known stocks or bonds (frequently all arising out of a single industry) and depositing them with a corporate trustee, which proceeds to issue against this collateral either trustee shares, bankers' shares, bond shares, or investors' certificates. Apart from the narrow basis on which the whole is organized, difficulty is frequently experienced in changing the collateral security, and the element of constant alertness for new possibilities, which is so marked an attribute of the best British trust company management, is almost entirely absent. A third type is the "Massachusetts trust," managed by trustees or a fiscal agent, and a fourth the "common-law trust," managed by a company, which either participates in earnings or receives a fixed fee for management. The last-named is largely a cooperative organization. Investors may withdraw their money at any time, and no corporation taxes are paid on earnings. So far only four such trusts have been formed. Mr. Higgins believes that the rapidity with which the whole movement has developed may have been conducive to much mistaken policy. He would seem to consider that the investment trust has come to stay as a part of America's financial machinery, but that it has scarcely touched the fringe of many problems, the solution of which is vital to its success. Early next year it should be possible to form an idea of the financial results of some 80 different American trusts, and the figures should make interesting reading, in view of the fact that many have issued debentures and preference stocks at 6 per cent, while about 5 per cent is a fair average present yield on good common stocks in the American investment market.

EXHIBIT B

[From The World, Sunday, November 27, 1927]

(By John A. Crone)

* * * * * * *

There is, therefore, nothing magical about this latest financial fashion. Using the investor's funds as tools, and with the same aim as a savings bank or insurance company, the investment trust endeavors to employ the money safely and profitably, and in so doing is subjected to the same fundamental, economic, and financial laws as any other business.

The investment trust—announcements to the contrary—is not like a savings bank or insurance company, except in so far as it affords a medium for savings and offers diversified investment.

A savings bank pays all depositors the same rate of interest, and, subject to certain legal limitations, a depositor may demand the return of his deposits. The investment trust pays interest or dividends according to the type of risk purchased—in this respect it resembles the insurance company—and it is not obligated to redeem its securities on the demand of the buyer thereof.

Savings banks and insurance companies employ deposits and premiums to buy securities—which are legally prescribed—much in the same manner as an investment trust, but the latter is not publicly regulated or supervised, frequently pays no State taxes, and in some States is not legally recognized.

Since savings banks and insurance companies in this country provide vehicles for savings to the person of average means, it is natural that the investment trust originated elsewhere.

* * * * * * *

Just when the public was becoming acquainted with bankers' shares the numerous modifications of the five trust forms and the finance and holding company, banks began to call their security companies "investment trusts." There are, therefore, to-day "promotion" trusts, "underwriting" trusts, "financing" trusts, and many other financial forms loosely classified as investment trusts and often claiming to be like the original Scottish investment trust.

DIVIDE THEMSELVES INTO TWO CLASSES

The multitudinous varieties of investment trusts, from the point of view of issuance and redemption of securities, divide themselves into two broad classes. The one, based on the Scottish type or its many variations, creates a new security by setting up the investment trust as an intermediary between the investing public and the securities acquired as an investment. These trust securities may be sold like any corporate obligation. The other, applying the principle of joint ownership, issues participations which must be turned into the trust, which draws out a certain portion of the pooled funds for redemption.

Viewed from the point of management there are two general types, the discretionary and limited or fixed trust. Management is supreme in the former and is merely an auxiliary in the latter. Studied from their corporate form "investment trusts" can be grouped under four classifications. They are: (1) The bankers' share companies; (2) the corporation type, which resembles the British trusts, issues debentures, preferred, and common stock; (3) the Massachusetts trust, managed by trustees or a fiscal agent; and (4) the common law trust, managed by a company which participates either in part of the earnings or obtains fixed fee for management. One of the distinctive features of the latter type is that investors may withdraw their money at any time.

* * * * * * *

The best test of an investment trust would be its performance over a period of years. Since most of these organizations are new, however, other measures of standards must be applied. Management is of prime importance. Like Mr. Higgins and many students of the investment trust, the writer believes the management should lay all of its cards on the table. The life-history idea of each director or manager is not a bad way of finding out whether the persons you are trusting your money with are worthy of that confidence.

EXHIBIT C

In 1926 the London Financial Times in an editorial said:

"The safe investment of money at good yields is by no means an easy problem, but becomes more of an exact science with an investment trust company than with the average individual whose capital is limited and to whom mistakes may be serious.

"In spite of all the care exercised when making investments where it is sought to combine high rates of interest with good security, no one can help making mistakes at times, but in the case of investment trust companies only a comparatively small portion of their funds is placed in any one security, while their holdings are widely spread in different countries and in various kinds of investments. Consequently, the influences which were responsible for loss in one country or in one class of security may also be responsible for improvement in other countries or in some other class of security, and in the main the accounts submitted prove a balance well on the right side.

"The private investor is undoubtedly beginning to realize more and more the advantage of placing his money in the securities of the investment trust companies, where not only satisfactory dividends can be counted on, even in bad times, but where the risk of loss of capital, inherent to any business, is reduced to a minimum through the sound distribution of risk, both geographically and in the varied nature of the investment held."

EXHIBIT D

[Powell's Evolution of the Money Market]

THE FINANCIAL TRUSTS—"INVESTMENT BY PROXY" AND ITS EXTENSION

[From Powell's "Evolution of the Money Market"]

In spite of the large sums lavished in financing the "new" nationalities and in equipping the ephemeral joint-stock ventures of 1826, as well as the innumerable railway projects which followed them, it remains true that down to the accession of Queen Victoria a huge proportion of investment was on mortgage. The reason, as Sergeant Onslow told Parliament in 1825, was that land was "the best and readiest security[1] which could be offered for money." The solicitor general said at the same time, that nine out of every ten estates in the kingdom were loaded with mortgages—one of the results of the terrific taxation necessitated by the Napoleonic wars. A multitude of small investors clung to the funds. Baring said in 1830 that out of the holders of the 274,823 stock accounts then on the books of the Bank of England, 250,000 did not receive a greater half-yearly dividend than £100, and the number of half-yearly dividends of £500 did not exceed 2,000. Of course, when the early Victorian public completely lost its head, as it did in the railway mania, the investing class was temporarily recruited from all sections of the community. The Government return of railway shareholders, issued in 1846, shows that there were upwards of 20,000 subscribers to the lines and branches seeking authorization in one session alone. These recruits included attorneys' clerks, college scouts, butchers, coachmen, dairymen, beer sellers, butlers, footmen, and mail guards. But, broadly, the proposition remains true that these classes did not enter the arena of investment for many years after the railway craze.

---

[1] In its primary legal significance the word "security" still refers only to money secured on property, and not to investments in the stocks or shares of a company or the issues of a public authority. This limited antique meaning it will be taken to have in a will, unless the context clearly indicates that the testator used it as synonymous with "investments." So said Lord Justice Romer as recently as 1904. (Re Rayner, 1904, ch. 1, p. 189.)

When the mortgage began to go out of favor investment in stocks and shares of the industrial type, as well as in the best class of foreign bond, was still a privilege restricted to the wealthy. A typical list of shareholders of the mid-Victoria period will be found to include practically only representatives of the wealthy, landed, and professional classes. Their holdings, moreover, were all in large blocks.[2]

Middle-class respectable people, especially, believed that all money invested outside the pale of government securities was embarked in speculation. They had yet to learn the meaning and solidity of a first-class industrial debenture with a huge margin behind it. The best that could be said of the nervous middle class in the sixties was that it was beginning to lose its nervousness.

"It is unnecessary," observed Arthur Crump in 1866,[3] "to remark that the number of persons who do remove their money for better investment is certainly increasing." These were the timid pioneers who had hitherto ranked railway stocks among purely speculative purchases, quite unfit for the investor. But after the Overend-Gurney crisis they began in a gingerly fashion to study traffics and to watch yearly reports. The small capitalist, however, still clung to the funds and the savings banks. With the latter we have already dealt (ante, p. 277), and with regard to the former it may suffice to say that in 1869 there were 5,065 Government stock accounts of less than £30 in the books of the Bank of England, and no less than 481 of them were under £5 in amount.[4] In 1870 came the elementary education act, and from that period to the present time there have been working the influences which have now created the modern investing public, its personnel numbered by hundreds of thousands, and representing every class of society except the absolutely destitute.

A "FELT WANT" IN INVESTMENT

There was good reason for mid-Victorian nervousness in the matter of investment. The traditions of the railway mania were yet comparatively fresh, and the tragedies of unlimited liability loomed large in the public eye. Inexperienced credulity had been the prey of roguery and imprudence in all directions. "There is no doubt that within the last 20 or 30 years enormous sums of money, representing the savings and accumulation of the individual interest of this country, have been dissipated and lost in the attraction of new but unsound investments."[5] Discouraged by these unwelcome episodes the aspiring possessors of surplus funds thought they knew that good investments were to be had, yet distrusted their own judgment in the selection of them. To would-be investors, in that frame of mind, the proposition of investment by proxy under good auspices was not unattractive. On the other hand, the opportunity of dealing with large aggregates of money by means of distributed risks certainly possessed a charm for the early exponents of investment trust finance, though it may be doubted if they realized whereunto this would grow.

For the moment their business was to aggregate the money of a large number of proprietors into the capital of an investment trust company, and then to employ the fund thus created to the best advantage suggested by the knowledge, experience, and skill of the various groups of city men who had placed themselves at the head of these new undertakings. So it is that in the establishment of the investment trusts we have really a distinct factor of the money market,[6] a species of the genus company which is as worthy as insurance to rank as an independent force, fulfilling a definite (and now indispensible) function.

THE TRUSTS A LATE DEVELOPMENT

Investment trusts[7] were practically unknown to the early money market. The long list of enterprises floated in the boom year 1825 includes many enterprises which look like financial trusts, but on examination prove to be something different. A so-called investment bank[8] with a capital of 4,000 shares of £50 each proposed to deal with "life interests, policies of insurance, contingent and reversionary interests, ground rents, improved rents, rent charges, and other property." "The objections to speculative theories," said the prospectus, "can not apply to the present proposed institution, which possesses nothing adventurous in its character."

A united British and foreign-loan company capitalized at £2,500,000 offered[9] 4 per cent, and intended to "facilitate" transactions in foreign securities, and to make advances on public works in progress in the United Kingdom. An Irish investment and equitable loan bank (capital, 10,000 shares of £50 each) adopted[10] the same program, so as to "cause British wealth to flow in Irish channels." The Equitable Investment Society and the Metropolitan Investment Society[11] were merely schemes for buying "landed property," especially near the metropolis. The first of the investment trusts, in the modern sense of the term, appear to have been the International Financial Society and the London Financial Association, both established in 1863. The business of the London Financial Association was defined as the lending of money on railway securities, provided the lines were finished. But criticism was offered of any loans on unfinished lines, because if the contractor failed the company must either lose what it had advanced or become more deeply involved by putting up money to complete the work. An undertaking of this type was an attempted compromise between the distrust of the investor and the necessity for carrying on railway enterprise. The railway could not wait for the public temper to change, or for its securities to filter slowly into the hands of investors. Therefore it deposited its securities with a finance company, and the latter agreed to accept the railway's debts for a specified sum. The finance companies were able to sell their shares at high prices to investors, who imagined that they had placed a buffer between themselves and the industrial risk. It was only when the unrealizable character of the securities had begun to be apparent that the weakness of the system stood out in glaring conspicuousness.

PRINCIPLES OF TRUST OPERATION

The best early enunciation of the principle involved in the investment trust company is contained in the prospectus of the Foreign and Colonial Government Trust, issued in 1868:

"The object of this trust is to give the investor of moderate means the same advantages as the large capitalist in diminishing the risk of investing in foreign and colonial government stocks, by spreading the investment over a number of different stocks and reserving a portion of the extra interest as a sinking fund to pay off the original capital.

"A capitalist who at any time within the last 20 or 30 years had invested, say, £1,000,000 in 10 or 12 such stocks selected with ordinary prudence, would, on the above plan, not only have received a high rate of interest, but by this time have received back his original capital by the action of the drawings and sinking fund, and held the greater part of his stocks for nothing.

"Some parties, believing that it would be a convenience to the public if such a mode of investment were made generally accessible, have made arrangements by which well-selected Government stocks, to the value of £1,000,000 sterling, will be placed in the names of the following trustees, viz:

"The Right Hon. Lord Westbury.
"The Lord Eustace Cecil, M. P.
"G. M. W. Sanford, Esq., M. P.
"George Wodehouse Currie, Esq., M. P.
"Philip Rose, Esq."

---

[2] In my Mechanism of the City I illustrated this point by contrasting the personalities in the list (dated April 21, 1864) of the shareholders of the Alamillos Co. with the last return on the Selfridge file. In the case of the Alamillos shares the first 25 names on the list represent the occupations annexed, together with the number of shares inserted in brackets: A wharfinger (300), a solicitor (60), a brass manufacturer (107), a vice admiral (825), a firm of merchants (55), a professor of chemistry (10), a broker (285), a gentleman (550), another gentleman (350), a copper smelter (350), a doctor of medicine (52), a civil engineer (75), a treasury official (26), a spinster (136), a banker (50), a lady of title (3), a clergyman (10), a gentleman (1,000), a member of the stock exchange (16), a clergyman (100), a solicitor (321), a member of Parliament (207), an architect and surveyor (50), a decorator (30), and a banker's clerk (21). In contrast with the comparatively elevated social status of these investors we get in the Selfridge list such shareholders as a cabinetmaker (25), a commercial traveler (50), a gas collector (10), a clerk (30), a hospital nurse (10), a domestic servant (5), an outfitter's assistant (5), a farmer (100), a dressmaker (5), a housekeeper (5), a schoolmistress (10), a lady's maid (10), a grocer (5), an ironmonger (10), a valet (40), a printer (10), a caretaker (2), a governess (30), and a bespoke tailor (3).

There was originally an idea that shares of small amount—especially bank shares—would attract an inferior class of holder. So thought the 1836 committee. But, as Gilbart pointed out in 1859 (Logic of Banking, p. 222), the only effect of reducing the size of the share—originally, at all events—was to increase the number held by the average shareholder, and not to attract small capitalists. "In the banks of £100 shares," said Gilbart, "each proprietor has taken upon an average 28 shares, on which he has paid the sum of £444. In the banks of £20 shares each proprietor has taken 43 shares and paid £359. In the banks of £10 shares each proprietor has taken 52 shares and paid £400, while in the only bank of £5 shares each proprietor has taken 117 shares and paid £585."

[3] Banking, Currency, and the Exchanges, p. 244.

[4] Letter of the governor [Crawford] to the Chancellor of the Exchequer [Lowe], Jan. 25, 1870.

[5] Stock Exchange Commission, 1877-78, Report, p. 10.

[6] The money market is generally said to comprise four factors: (1) The Bank of England; (2) the "check-paying banks," as Mr. Withers calls them, in order to distinguish public banks from private mercantile houses, who, although they do an acceptance and quasi-banking business, have no customers who are entitled to draw checks upon them; (3) the bill brokers and the mercantile and discount houses; and (4) the stock exchange. In the present survey, however, the joint-stock companies and certain specialist forms of joint-stock enterprise like insurance, and the trust, finance, and investment companies have been treated as distinguishably separate factors of the money market.

[7] The word "trust," as here employed, signifies an organization totally different from a "trust" in the American sense of a monopoly control of some commodity or facility. This distinction is very important. The English investment trusts are not monopolies, and have no monopolistic ambitions.

[8] Times, January 7, 1825. The advertisement appeared for several days.

The trustees had decided that a certain group of dividend-paying foreign and colonial stocks should be selected for purchase with the funds of the trust—namely, Austrian, Australian, Argentine, Brazilian, Canadian, Chilean, Danubian, Egyptian, Italian, Nova Scotian, Peruvian, Portuguese, Russian, Spanish, Turkish, and United States bonds—not more than £100,000 being invested in the stock of any one government. The average rate of interest on the investment in these stocks was given as 8 per cent, while profits were expected from the repayment at par of a large number of them, purchased considerably below that figure. The certificates of £100 each were to bear 6 per cent interest and to be issued at 85. This, as a matter of fact, was an investment trust in the modern sense of the term. Designed for the benefit of the middle-class investor in the later sixties, it was destined, as we shall see, to be the model of another trust, issued under practically the same auspices, nearly 50 years later, for the purpose of attracting a democratic clientele by a direct appeal to the "people."

THE DISTRIBUTION OF THE RISKS

On the part of all the investment trusts of this period there was the clearest recognition of the protection afforded by the geographical distribution of the risks, itself a specialized application of one of the principles of insurance. "Our great safety," said the chairman of the Government's Stock Investment Co., "is having a wide area in which we trade instead of depending upon one municipal capital or one country. We have 40 or 42 different investments, that is, investments secured by different governments."[12] The insurance element was specifically mentioned in the prospectus of the Submarine Cables Trust, issued in 1871, which called attention to the advantage of standardized investment "by distributing the risk over a number of kindred undertakings and making one insure the other." One risk was to be offset by another, so that the investments might almost be described as a group of cooperative insurers. The prospectus of the Gas, Water & General Investment Trust urged that "the capital of the company will be spread over a large number of securities in such a manner that, by the principle of average, the investor will obtain a good rate of interest, without being subject to violent fluctuations in dividends or exposed to the necessarily precarious nature of an investment in any one concern, however sound." Yet another specialized form of this financial trust was the mortgage company, whose business, as ultimately elaborated, might be described as long-dated banking. For instance, in Australia the settler sometimes experienced difficulty in obtaining an advance for a term of years. The banks were disinclined to accommodate him except by means of short-dated promissory notes and accommodation bills. At this period they would not, as a rule, advance their money on mortgage, though their practice became less rigid later. Their discount of promissory notes and bills was generally subject to the condition that there should be a second name to them. This necessitated the settler obtaining the acceptance or indorsement of the merchant to whom he was consigning his wool or other produce, and for this accommodation, of course, he had to pay. The result was that the commission, added to a bank charge of probably 9 or 10 per cent, was a very real obstacle to the progress and settlement of the colonies. The problem to be solved was the provision of the means of lending money for a term of years at a reasonable rate, and the solution was the formation of such companies as the Trust & Agency Co. of Australia, which directly cultivated that class of business with considerable success.

THREE DISTINCT TYPES OF "CREDIT SHOP"

By this time, then, the rise of the trust and investment companies enables us to discern in activity the three classes of "credit shop"[13] each selling the same commodity, but each specializing in a particular species of it, clearly differentiated from that sold by the other two. The bank sells short credit only. The finance company caters for a class of business which requires a much longer credit than a banker can give, consistently with his duty of maintaining his assets in liquid form. The investment trust company, again, enters a given transaction for a much longer period than a finance company, if, indeed, it does not purchase the investment for permanent holding. It was the attempt to combine these three functions in one enterprise which led to the collapse of the Birkbeck Bank. The capital had been obtained on a building society basis, while the deposits were sought as if the institution receiving them was a bank in the strict sense of the word. Finally, when the capital and the deposits were aggregated, the funds were employed as if the company was an investment trust, not liable to be called upon to repay any part of the money which was employed. The same fate would probably have waited on the scheme proposed in the sixties by the town clerk of Liverpool, for empowering municipalities to establish savings banks, and to employ a third of the deposits in municipal undertakings such as waterworks. At all events, the Australian banking crisis of the early nineties was an example of the consequences which followed an abandonment of sound banking principles in the attempt to combine long-term loans with the liability to pay specie on demand.

BOLD EXTENSIONS OF THE TRUST PRINCIPLE

From 1884, when the Mercantile Investment & General Trust was founded, to 1890 there was quite an epidemic of trusts. Attempts to form bank share trusts were indeed unsuccessful, owing to the refusal of the great banking companies to accept the trusts as shareholders. But as regards other trust enterprises, no less than 12 were established in 1889, under the stimulus of Mr. Goschen's conversion of consols. The reduction of the interest created a demand for investments which were in effect a mixture of stocks, in the belief that an average of second-rate—or even third-rate—holdings would give a return greatly superior to that obtainable on consols without the introduction of any really abnormal risk. The sponsors of the Nitrate & General Investment Trust Co. early in 1889 urged that the average yield of the holdings of a trust company could be materially raised by including in its holdings the stocks even of very speculative enterprises. It was proposed, therefore, to invest some part of the funds of this trust "in the best of the nitrate companies which have been introduced to the London market." Nor did nitrate represent the most speculative of the industries which the growing boldness of the investment trusts tempted their directors to touch. The African Gold Share Investment Co. did not actually propose to form companies or to purchase properties, but it was prepared to guarantee and provide capital for gold-mining enterprises on favorable terms, and in this way it was believed that the high yield obtainable on the shares of these undertakings would raise the average return on the capital invested. Finally we have a reversion to mortgages. The Union Mortgage Banking & Trust Co. initiated, with a capital of £2,000,000, a scheme for lending on the first mortgage of improved agricultural property in the United States, so as to combine the advantages of that species of security with the higher yield obtainable in a "newer" country than Great Britain. The proposal was that the company should receive money from investors at a fair rate of interest in exchange for its debentures. These were, in turn, to form a charge on all its mortgage investments, reserve fund, uncalled capital, and other assets. The money was then to be invested—and here once more is the crucial point of the whole argument—"at a higher rate of interest in small amounts, thus acquiring the guaranty for safety afforded by the law of average."

The prospectus of the River Plate & General Investment Trust Co. (capital £1,000,000) defined the maximum single risk to be taken. The business of the company, the directors said, was that "of distributing its capital over a number of different securities on the principle of averages, no investment being made exceeding £10,000 in any one undertaking without the unanimous resolution of a meeting of the trustees." Candor requires the admission that some of the investment trust enterprises of the Baring crisis year were not so much genuine finance and investment trusts as gigantic relief funds, designed to take huge blocks of securities from various parties who found it inconvenient to go on "nursing" them. Further, under the stimulus of a popular craze of the familiar type which gives us mining and rubber booms, these undertakings launched out into insurance, executorship, trusteeship, safe deposit, loan and commission business of every sort and kind, the sale and purchase of land on commission, agency, and company promotion, with results that became only too familiar to the investor in the early nineties. The existence of these abuses of the principle, however, need not blind us to its undeniable utility when operated under skillful and honest administration.

THE TRUSTS AND THE "PEOPLE"

The theory that the trust companies represent, at all events in one of their aspects, an endeavor to provide investment by proxy on behalf of a class insufficiently experienced to act on its own account was strikingly confirmed when, on March 20, 1914,[14] there appeared the prospectus of the People's Trust Co. (Ltd.). This venture was obviously modeled on the Foreign & Colonial Investment Trust, which had been established 46 years before (ante, p. 469). Messrs. Glyn, Mills, Currie & Co. were the bankers of the later enterprise, and a member of their firm had been a trustee of the earlier undertaking. One of the trustees of the Foreign & Colonial Trust was Mr. Philip Rose, of Baxter, Rose & Norton, whose successors, the firm of Norton, Rose, Barrington & Co., were solicitors nearly half a century later to the People's Trust. But the most striking and suggestive analogy is found in the fact that while the earlier trust was formed, as we have seen, "to give the investor of moderate means the same advantages as the large capitalist," the later undertaking was "established to extend to the working and industrial classes" a form of investment much appreciated by a richer clientele. The prospectus proceeded to say that the new company would "enable even the smallest capitalist to acquire an interest in English and foreign railways, colonial and foreign loans, and

[12] Meeting, January 2, 1873.

[13] This word "shop" is immemorially attached to banking and credit business. In the very early days of Martin's there is a charge paid to a useful functionary for "killing the bugges in the shop," and as late as 1814 we find the Craven Bank inserting in its balance sheet, "By banking shop and outbuildings now purchased, formerly rented only, £488." The reason for the survival of the word is, of course, the fact that the banker's business was originally only a subordinate function actually carried on in a shop devoted to other purposes.

[14] See the Financial News of that date for the prospectus.

great commercial undertakings, and to share in large financial operations.

The company will adopt the principle that has been found to work so well with existing trust and investment companies of distributing its capital over a wide area and in a large number of undertakings, and it has been proved that by so doing a satisfactory return can be obtained without taking undue risks. Thus, in 1868 it is the man of moderate means who is invited to invest by proxy, but in 1914 the gradual devolution of capitalistic capacity has made it desirable to provide investment by proxy for the "working and industrial classes." As there is no class at a more modest level than this from which investors may be recruited, we may correctly say that the opportunity of advantageously investing money has been now brought within the reach of everybody who has money to invest.

TRUST FUNCTIONS HAVE BEEN MODIFIED

About the general success and the pronounced importance of these companies as factors of the modern money power there, of course, can be no two opinions. One has only to look around at the vast aggregation of influence represented by the Lord St. David's group or by other powerful trust companies to see how well the principle works and how thoroughly it has adapted itself to the needs of the period during which it has been elaborated. Whether, however, the system is destined to remain permanently necessary in the form in which it first functioned is another matter altogether. Originally the investment trusts represented the standardized investor. They sought to aggregate the funds of people who were too nervous or too inexperienced to invest their own money. In that way they enabled this class of moneyed individual to secure financial benefits which had otherwise been out of his reach. The aggregation professed to take all the precautions with regard to the distribution of the risks and the mixture of the types which a prudent investor of the shrewdest stamp would have adopted for the protection of his own money. Its directors seldom changed investments once made. They awaited redemption and collected interest meanwhile. Nowadays, at the point in the evolution of the trust company which has so far been reached, this ideal still survives and new trust companies are still created. But while the trust company still functions for the present in its original form it is becoming less a means of vicarious investment than a recognized and necessary factor of the modern money power, taking its share in the guidance of the policy of the great financial hierarchy which now controls the economic destinies of the world.

WIDELY EXPANDED FUNCTIONS

It watches the market, changes its investments, gets out of this and into that as the economic or political ebb and flow suggest. It competes for underwriting, and in that way not only makes money when the issue goes well, but acquires new holdings on bed-rock terms where it is "stuck" with part of the stock or shares which it has underwritten. Further, a very important and characteristic function of the modern trust company is its work in city salvage. An enterprise which has a valuable property and good prospects finds itself at the end of its capital resources. The time is not congenial for a public issue; how, then, is the company to be maintained in existence and saved from the loss of all the capital already expended on its property? The answer is that the trust company will be prepared, on terms, to elaborate a reconstruction scheme and to guarantee its success—that is to say, to guarantee that if the shareholders do not come forward with sufficient funds, it will itself put up the money. In this way, companies which have reached the end of their tether are frequently snatched from disaster and almost as frequently transformed into prosperous enterprises. Of course, the position of their affairs must stand the scrutiny of expert examination. But that is rather a gain than a loss from the point of view of the financial fabric as a whole. These activities, almost entirely characteristic of the post-Baring period, constitute quite a different program from that which was originally undertaken in the eighties. There are two reasons for the change. The one is that the existence of a centralized money power did not fully dawn upon the world until the Baring crisis had demonstrated its immeasurable potency for good; the other is that the modern middle-class investor is now, on the whole, sufficiently educated to do his investment work for himself, selecting his own securities and keeping them in his own strong-box or at his own bank. In the earlier decades he was delighted to discover that responsible persons would accept the charge of his money, and invest it in such a manner that he could get a safe 4 per cent upon it. Nowadays he takes the responsibility himself; and he is all the more inclined to do so because he can get 5 per cent with perfect safety, without the intervention of a trust at all.

The finance, investment, and mortgage trusts, however, remain as standardized corporate investors, in that it is their constant and very successful endeavor to raise the rate of return on their money without infringing the canons of financial prudence. Their invocation of the law of average makes them self-insurers; so that, inasmuch as they possess a specialized skill, the risk is taken by those who are capable of measuring it. "To confine speculation to those who have aptitude and training for it and to discourage stock and commodity gambling is one of the economic problems of the day."[25] There is only a minor element of gambling to be considered in the case of the trust companies, but there is an undeniable assumption of a legitimate (and socially beneficial) financial risk on the part of those who have aptitude and training for it. The great trust and investment companies, again, are a class of strong holders, performing a fruitful function at all times, but most of all in days of market stress. A trained investor (whether an individual or a corporation) is a "good" holder, whereas his untrained, nervous conferee is a "bad" one. The difference between the accumulation of stock in "good" hands or "bad" may be of great moment to market conditions, and consequently to the prices of securities, in the hour of stringency. It may mean the difference between stress and crisis or between crisis and panic. The cool heads of the managers of a great trust company are not turned by crisis or by the threat of panic. They do not rush to fling everything on the market. They are more likely to steady it by timely purchases. As they are in constant communication with the other controlling influences of the money market, their trained and fearless cooperation is one of the bulwarks of the financial fabric itself. It will possess an augmented and invigorated potency when the movement toward a completely centralized control of the allied insurance function, vast in influence and resources, shall at length be crowned with realization.

In Germany the rôle of the trust company is to some extent filled by the subsidiary banks (Tochtergesellschaften), which carry on industrial finance by means of capital supplied by the parent company. Occasionally they are regarded as branch banks, but they are not truly such in the English sense.

EXHIBIT E

[From The Economist, April 29, 1882]

THE PECULIARITIES OF TRUSTS AND TRUST COMPANIES

Last December, when commenting upon the Railway Investment Co.—a "trust" which, being successfully placed, has since found imitators—we remarked that while the inducements offered by such undertakings would probably become more and more appreciated by small investors, they were "only adapted to the averaging of profits of securities which are fully paid up. For such an undertaking would be seriously jeopardized by the failure of a security upon which a succession of calls were possible." Yet within the past few days the prospectus of a Bank Share Trust Co. has appeared, all the directors of which are already bank directors; and while the proceeds of the trust are to be invested in bank shares having uncalled capital liabilities, the trust shares themselves are to be "fully paid, and free from all liability." Let us see how this is to be accomplished. It must be admitted, in starting, that the shares in well-established banks are very sound investments; that, as a rule, they yield a handsome return (generally over 5 per cent) to the buyer; and that it is probable they are improving properties, the reason being that for investment purposes they have not more than made good the general fall in 1878, while almost all other investments have advanced largely. Hence it may be conceded, for sake of argument, that the shares of banks which have well taken root are more than ordinarily safe, profitable, and improving. There still, however, remains the question of the liability, which subscribers to the trust are to be wholly freed from. If we accept the verdict of the counsel consulted, we must believe that "under no circumstances could a shareholder in the proposed company be rendered directly liable for any calls on the shares held by the company, or indirectly liable beyond the amount (if any) remaining unpaid on his shares." There are bank shares to bearer, like those of the Imperial Ottoman and Anglo-Austrian Banks, which are, of course, free from liability. But these are avoided; and the prospectus of the company contains the following important provisos:

"This company will invest its funds only in shares or stock of banking companies having their head office in the United Kingdom or the British colonies, subject to the following conditions—

"(a) No shares will be bought except those of banks where the liability is limited, either by charter or by act of Parliament.

"(b) No investment of more than 5 per cent of the company's capital will be made in any one bank.

"(c) No investment will be made in any one bank to an extent involving an uncalled liability of more than 5 per cent of the capital of the company.

"(d) The only authorized investments will be in some of the banks named in the schedule hereto, which may, however, be from time to time extended by the company in general meeting.

"Ample provision is made under the articles for the registration of the shares bought by the company in the names of proper persons, at least two as to each set of shares, for the protection of the company, and for the indemnity of those who may act as its trustees, in cases where the company itself is not accepted as transferee."

The capital being placed at 1,500,000*l*, it therefore remains that no investment in any bank can reach more than 75,000*l*; but as a rule they must be below that sum. For instance, London and Westminster

[25] H. R. Seager, Introduction to Economics, p. 176.

Bank shares are of 100*l* each, 20*l* paid, and the liability of 80*l* per share will limit the investment to about 9,000 shares, worth 63,000*l*. The order to purchase any similar amounts of shares in some of the smaller banks named on the schedule would greatly enhance their market values, for bank shares are, as a rule, steadily held, and the more steadily when prices are rising. But, apparently, as the names of 65 banks are mentioned, it is contemplated to obtain a very extensive range of small holdings; and as it is probable that many of the banks may refuse to register the trust, it is proposed to employ trustees for this purpose. The questions arise: Are these trustees to receive any payment for their services? Can responsible men be got to become sponsors for the trust, even after obtaining the "indemnity"? And will not the knowledge that they may be acting in the same capacity in respect to a large number of other bank securties render them undesirable shareholders? These are matters for the bank directors and managers to consider carefully. Again, let us suppose that 4 per cent (60,000*l*) of the capital were invested in a bank, and that at a time of pressure that bank failed, and called up out of its reserved liability a further 60,000*l*. In this case the holdings would be swelled up to 120,000*l*, or to 45,000*l* beyond the limit of 5 per cent. Or, without failure, banks have been known at such times to make calls upon their shareholders, which would also necessitate the overstepping of the 5 per cent limit. Various points for question thus arise in considering the details of the scheme.

But the question of registration of a fully-paid company as proprietor is the one difficulty in the path of this trust, and we shall be much interested to see the matter put to the test; for, if successful, it will open the door to many imitators. In the admittedly all but impossible event of the entire capital being lost through failures, we can not think that our courts of law would hold the shareholders free from liability. But apart from this, the entire difficulty of registration might have been overcome without the employment of go-betweens and without raising the question whether the trust can be permitted to hold the shares in its own name. If, for instance, the shares of the trust had been of 20*l* each instead of 10*l*, as now fixed, and the amount called had, as at present, been 10*l*, there would have been an uncalled liability, which, with the restrictions mentioned in the prospectus, would have been quite a nominal liability, yet at the same time amply sufficient. Neither should we think the subscribers to the concern would have been less numerous. Of this we are quite convinced, that no trust can ever override a legal obligation to pay calls, and the prospectus before us says that the company has no intention whatever of doing so. But banks are not by any means unmindful as to the names admitted upon their lists of shareholders. They would certainly have no liking for weak trustees; and we have, before now, known questions raised and asked with respect to registrations which may well be revived in the instance before us.

[From the Economist, July 10, 1886]

The question of dividends paid in the past ought not, therefore, to be the sole gauge which should determine an investor in the selection of a trust company. He should, if he is wise, be guided much more by the names of those who are responsible for the management of the concern. He must remember that his money, when transfused into so much stock of a trust company, is in reality employed at the will of other people in the purchase or sale of shares and bonds which they select, and in the choice of which he has no voice. It might easily happen that one year a company made a large and attractive rate of profit through some lucky manipulation of stocks held by the trust; but next year the investor might find himself with a largely diminished income, or even with no return at all, through the bungling of those to whose superior wisdom in making investments he so trustingly confided. This, of course, is an extreme case; but it is worth emphasizing that trustees, honest, capable, and above suspicion, should be regarded by the investor as of far more account than brilliant dividends or glowing promises.

* * * * * * *

There is only one more point to which it appears necessary at this moment to refer, and that is, the publication in the annual report of a list of the securities held on behalf of the trust, in order that the stockholders may be satisfied as to what is being done with their money.

* * * * * * *

The directors would have done wisely, we think, after the report of the special committee appointed to investigate the matter if they had followed the plan adopted by other companies in announcing frankly to their constituents how their money is represented. Indeed, we regard it as absolutely necessary for the protection of the shareholders that a list of the securities held should be an integral part of the annual report, and that all the changes in the company's investments during the year should be specifically stated, in order that it may be seen how far the directors' operations have been beneficial to the company, and how far they have been mere stock-jobbing. It is difficult to see what possible harm or disadvantage to the company could arise from such publication, and the gain to shareholders—present and prospective—would be enormous. We are of opinion, moreover, that all the securities held should be revalued once a year by an independent stockbroker to be appointed by the shareholders, after the fashion of an auditor; and that no dividend beyond a fixed rate, say, 5 per cent, should be allowed to be distributed until any shrinkage in market value during the year had been provided for in some equitable way. This would not necessarily involve the subtraction of the whole amount of the depreciation from the profits of the year, for that would be unreasonable; but some kind of sinking fund might be constituted for the replacement of such capital as happened to be lost through default or liquidation, or (as is now the case in the Railway Share Trust), the depreciation might be carried to a separate account, no higher dividend than 5 per cent being allowed to be distributed whilst the account remained in debt. At present most of the companies appear to divide their profits up to the hilt, trusting that when the time comes for realizing any of their securities they will reap a handsome profit in every case.

[From The Economist, July 21, 1888]

Recently, however, investors have changed in their taste, having become, indeed, quite eager to subscribe to almost any new trust undertaking which has appeared to be of a bona fide character. This has been largely due, of course, to the conversion of the national debt, which, by reducing the rate of interest obtainable on nearly all securities, made it necessary for many investors to increase their income by placing their money in securities of what may be called a "contingent" character; and in order to enable them to do this with the minimum of risk, a number of new trust companies came into existence. As a result, the market for these securities has become, as we have said, one of considerable importance, and hence they have now been placed in a separate section of the London official list.

* * * * * * *

There is one other point in regard to trust companies to which attention may be drawn, and that is the tendency to specialize or restrict the character of the new undertakings which are formed. It seems to be a favorite idea to have trust companies for almost all the different classes of securities, and thus we have had, for instance, an undertaking formed to hold only brewing shares, another for mining shares, etc. But in a number of instances, in which this idea of specializing the trust has been worked out, the results have been decidedly unsatisfactory. To see this we need only look at the Railway Investment Co., which owns home railway ordinary stocks, mainly those of the so-called heavy lines, and as a result of the decline in their dividends the company has fared so badly that half of its stock—the deferred half—stands at nearly 75 per cent discount. We have a similar instance in the Globe Telegraph & Trust, which owns telegraph securities, mainly those of the Atlantic cable companies, and the Submarine Cables Trust is also another case in point. But, indeed, it is very obvious that the real principle of a trust company is departed from when its capital is invested in a limited class of stocks, all of which are subject to the same influences. When this is done, an investor might better invest his money directly, for he utterly fails to obtain that reduction of risk to a minimum which results from the distribution of capital in small amounts over a very wide area—the fundamental principle of a sound trust. In fact, it is almost a truism, that in proportion as a trust is specialized, so it loses its distinctive character and use, while the wider its sphere of operations is made, the more does it fulfill those functions for investors, which they are usually unable to perform for themselves.

[From The Economist, April 6, 1889]

There is, moreover, another difficulty arising out of this characteristic of the directorates of trust companies. At the present time it is exceedingly difficult to find sound securities bearing good rates of interest, for all the investment brokers are alert to pick up anything cheap, in order to supply the needs of their clients. * * * As a matter of fact, it needs but little experience to know that in present circumstances the efficient management of a trust company is no sinecure, but needs the almost exclusive use of much knowledge and vigilant attention, and we fail to see how, in many cases, the companies are at all likely to get this from directors who can give to each only a fraction of their time and minds. * * * only about 4½ per cent. Upon such yields as these it is evident the trust companies can only pay small dividends, and, in so far as they are investing in these stocks, it must mainly be in anticipation of a profit to be obtained by an advance in prices, which is speculation pure and simple. On the other hand, if they are investing in more risky stocks, it is doubtful if their own securities will prove so stable as most people anticipate. In fact, we can not help thinking that the existence of a good many recent trust companies is due partly to the desire for easy directorates, and partly to attraction of the fat investment business which such companies afford. And in many cases investors, instead of buying the trust companies' stocks, would be likely to do better by forming a small trust or selected holding of securities for themselves.

[From the Economist, June 21, 1890]

In the first place, the employment of the word "trust," as a description of the business proposed to be undertaken, is to a very large extent misleading. It is true that some of the companies invest a greater or smaller proportion of their capital in readily marketable securities, and thus by spreading their risks obtain upon their investments a fairly steady rate of interest. This is, of course, a useful function to perform, for it is possible, and even very probable, that a board composed of experienced men of business may make a better selection of stocks than an individual investor would be able to make. The experience of the older trust companies has shown, however, that transactions of this description, though safe enough when properly and judiciously conducted, seldom yield anything like a high rate of interest upon the capital employed, and it is perfectly obvious that the extravagant profits obtained within the past few years by the group of companies to which we have more than once alluded could not possibly have been derived by averaging the interest secured on their investments.

* * * * * * *

And there is another point which should not be left out of sight. The Financial Trusts, as a rule, in presenting their accounts simply show in a line what the profits of the year have been, without specifying in what way the profits have been made. Information given in that way is obviously insufficient. The accounts should show in separate items the interest obtained on investments, the amount earned as commission on the introduction of new companies, and the profit derived from underwriting operations. With these facts before them, shareholders would have the means of ascertaining what proportion of their profits came from regular sources, and what from merely ephemeral transactions, and with this knowledge they would be able to judge whether, in fact, the game was worth the candle. And, finally, it should be clearly shown upon what basis the profits are assessed, whether by actual receipts or by the temporary fluctuations in the value of securities. In the absence of such information, shareholders simply participate in a blind pool, an arrangement satisfactory enough to those who are behind the scenes and regulate their operations accordingly, but scarcely of a kind to satisfy a prudent investor. Very probably any attempt to enforce the suggestions we have made would be strenuously resisted by the founder directors, who have made such a rich harvest by adopting the Financial Trust idea, but, in default of such information, we can not but think that investors should be very cautious, indeed, when dealing with undertakings of the kind.

* * * * * * *

There is all the more necessity to raise these questions at present, because other trust companies will soon be making up their accounts, and it is very desirable that right methods of valuation and of dealing with apparent profits should be adopted. And the secrecy which the companies maintain as to the nature of their investments renders it essential that the public mind should be assured that the capital is not being squandered. That policy of concealment is greatly to be deprecated, and we are astonished that shareholders should consent to it. It impairs confidence at all times, and it can not but have very prejudicial results upon the market estimation of those institutions if there should be reason to apprehend that proper care is not being taken to maintain their capital intact.

[From The Economist, May 2, 1891]

A LESSON FROM THE LATE TRUST COMPANIES' MANIA

It has now been made very evident that the gambling trust companies would, as a whole, have fared much better if, instead of buying in 1889 at the top of the wave, they had simply let their funds lie idle until the present time and gone in for their securities when the inevitable drop had followed. Instead of that they operated when securities were sustained by the glamor cast over them by a previous long-continued rise and combined together so as to carry that rise still further. Even when the investors began to hold back, they still went on, and the result is that when they were so full up that they could absorb no more, prices came down with a run, and they must now hold on in the hope of a recovery at some future time. It is all very well to say that they intended to turn over their capital and not to hold on at the prices of 1889. While they could sell to the public they did so, and many of them made large profits. But they were gamblers' profits, lightly come by and lightly lost, and whereas even 12 months back practically the whole of these companies stood at a premium in the market, many at a high premium, as we write the majority are at a discount, and only those which were early in the field and began buying before the rise had taken full effect are at a premium. Some were enabled to amass substantial reserves before the fall took effect, and these have the advantage now, though probably a long wait is before them, and others are happily not materially embarked in South American or other of the most risky securities in vogue during the late mania. But in the following list it will be seen the depreciation of the past 12 months has been universal, and their founders were altogether wise who transferred their founders' rights to the companies started for the purpose of buying them up at a convenient time.

We have here included the best known among these undertakings, and there are many of the later formed trusts which would make a worse comparison. But we have no desire to paint them as a class unfairly, nor to decry the principle of the trust company so long as investments are effected judiciously and there is effort to make money fast by illegitimate means. Those trusts which for a time made such a grand show by underwriting new securities were, we held, mainly gambling concerns, and appropriated the word "trusts" as a blind. We considered their business and profits precarious in the extreme, and that they ought to sail under their true colors, and as the underwriting business is now dead for a time, their shareholders will soon find out, if they have not already done so, that our contention was right. In the majority of instances they are now crippled, and it will be found that in many respects their constitution is faulty. For instance, at this juncture they would have a very fair prospect of making money if they could extend their investments. At the present general depreciation there is a prospect of bettering their principal by judicious buying, which certainly did not offer itself two years ago. Yet two years, even one year, ago, they were free operators, whereas now, when there is a genuine opening, their hands are tied. This, it may be said, is the way of the financial world. Prices are low, because funds are locked up and the world is too poor to buy, and prices have been and will be high when available capital is large, and there is the confidence which the possession of capital affords. But distrust and confidence are not always the result of the absence or possession of available capital, and the time is probably coming when capital will right itself, and that before confidence in any but what are regarded as the very safest investments returns. Just now there is room even for a recovery in consols, and those who have funds will find that better returns may be realized by taking up safe securities than have been within reach for a long time.

But these financial trusts are out of the running. Some of them, it is true, have uncalled capital, but they would be nervous about calling it up, even if it were not already pledged as security for debenture issues. Nor can they, in the present distrust attaching to them, make further issues of capital, with a view to buying what there is a good expectation will recover in due season. Nevertheless it is obvious that the trust established at the present time has a far better prospect of making money and of a profitable future than was the case during the mania of two years back. The underwriting business certainly would not pay, and in making this statement we have not taken it into consideration. As we hold, the legitimate trust company is that which spreads a large capital over a great many securities, and averages the return upon those securities in the dividend paid to the shareholder, who, on his part, when investing in such a company's shares, is really investing in, say, 40 or 50 securities. Such a trust is a shareholder's mutual insurance company, and it should be worked reasonably as regards cost, and almost automatically. For such there would be ample room now. But the past excesses of the trust companies, due largely to the founders' element in their constitution which urged them on to speculate—for founders desired rather to see them make high profits even for a short time than to do a safe and steady business—have so crippled them that they are unable to avail themselves of the opportunity. They are compelled to let chances of future profits pass, because they have tied up all their available capital, and so impaired their credit that their power of floating debentures upon which they so greatly rely can not be exercised. Happily the founders are about played out, and the depreciation of 30 per cent, at which the shares of the Founders' Stock & Share Trust stands, is an evidence of the fact.

[From The Economist, July 11, 1891]

THE RATIONALE OF TRUST COMPANIES

It is not at all surprising, in view of the condition of the stock markets during the past 9 or 10 months, that the tone adopted by the chairmen of those of the trust companies which have held meetings recently has been rather apologetic than congratulatory. The promoting and underwriting business has been practically at a standstill, and the default or considerable shrinkage in the interest upon River Plate "securities," in which so many of the trust companies are interested, has naturally told very seriously upon the income divisible among the shareholders. If the directors of these undertakings have made mistakes in sinking too much of their capital in Argentine bonds and shares, as many of them undoubtedly have, they have this consolation, if their shareholders have not, that they erred to a much smaller extent than financiers of eminence, such as the Barings and the Murrietas. And the trust company directors may fairly claim that although some of *their investments* have turned out unfortunately, at all events temporarily, the soundness of the principle upon which the trusts were originally founded has in nowise been disproved. Although we have had occasion more than once or twice to criticize freely the proceedings of many of these companies, we have frankly admitted that the principle upon which the earlier formed trusts were worked possessed considerable advantages for the moderate investor. As Sir C. E. Lewis said at the meeting of the New York Municipal Trust Co. on Thursday, "You minimize to the individual proprietor the amount of loss and risk, although one can not answer for it that the directors in making investments for a trust or any other company shall always have a sufficient amount of foresight or prophetic power." This sentence really puts the matter in a nutshell. A trust properly conducted does for the small investor what the rich capitalist can do for himself, while its corporate capacity and its holding of securities enables it to borrow for fixed periods at comparatively low rates of interest, and with the money so borrowed to take up and hold various classes of stocks and shares yielding a higher rate of income. In this way trusts obtain what it is the fashion, in dealing with banking proceedings, to call a "profit margin"—that is, the difference between the amount of interest which they pay upon their debentures and the interest or dividends which they secure from the employment of the funds borrowed by them.

But with these advantages there frequently exist considerable disadvantages also. It sometimes happens, for instance, that in cases where the amounts invested are comparatively small, the income of the trust is largely, and often disproportionately, absorbed by directors' fees and other establishment charges. The shareholder, therefore, loses an undue amount of the revenue which his capital earns by leaving its investment in other hands. It is further to be remembered that in several of the companies only a small proportion of the nominal value of the shares is called up, the balance being held as security for debentures. The shareholder thus makes himself liable for what may be his whole fortune for the sake of obtaining a very moderate yield upon the amount per share actually called up. In these cases it becomes very much a question whether the game is worth the candle—whether, in fact, the investor had not better run his own risks directly than lay himself open to the chance of being ruined in company with a body of copartners. In the past, we admit, there has been no necessity to make calls to satisfy debenture holders; but who shall say that such an experience is beyond the bounds either of possibility or of probability, especially in connection with the trusts which are large holders of South American bonds and shares? The point is one which no prudent investor can afford to ignore, and it is one that may at any moment present itself in very palpable form. Again, it is to be borne in mind that in most of the trust companies, which have so far been favored with prosperity, the cream of that prosperity has been taken by the holders of founders' shares, whose interest in a given company is infinitesimal in comparison with that of the general proprietary body and who would suffer little or nothing if the concern were to collapse to-morrow. We have so frequently dealt with the preposterous inequity of the founders' share principle that we need not enlarge upon the subject now, though it is emphatically one that investors in trust companies should consider very carefully. These are some of the disadvantages of the system which have to be set against the advantages of spreading capital over a variety of securities and thus minimizing the risks to individual holders and of the capacity to borrow for fixed periods at low rates of interest.

But there are two other phases of the trust business to which it is not inopportune to direct attention. We refer to questions of publicity in the matter of investments and of valuation in regard to the securities held. Many of the companies, as our readers are doubtless aware, publish no list of the investments made by the directors, and the shareholders are thus left in the dark as to the employment of their capital. Generally speaking, a proprietor has the admitted right—he always has the equitable right—of calling at the office and examining a list of the securities held; but even this privilege, if such it can be called, is withheld from the shareholders of the Preference Securities Trust. At a recent meeting one of the shareholders stated that an application to see the list of securities had been refused, and the chairman, Mr. Stanley Dent—a gentleman who is officially connected with five other kindred undertakings—justified the refusal on the ground that the information thus obtained might be put to an improper use. A company which adopts such a policy as this is neither more nor less than a "blind pool," and it is really surprising that a body of presumably intelligent shareholders should tolerate this kind of thing for a moment. And there is the other proceeding so generally adopted, of putting the securities down in the accounts at cost price and dividing profits wholly without reference to depreciation, which may and often does represent the loss of a considerable amount of the capital. We can not but regard this as a very dangerous practice to pursue, and if evil follows from it the shareholders in the companies will have themselves to thank. We do not, of course, hold that securities should be written up or down in the balance sheets in accordance with casual fluctuations in their market prices. But when there has been a fall, such as that in Argentina and other South American securities, which there is no prospect of being retrieved for years to come, if at all, a balance sheet based upon cost prices is most delusive.

[From the Economist, January 30, 1892]

LATER PHASES OF THE TRUST CRAZE

The disclosures which have been made recently with regard to the operation of some of the trust companies established within the past few years, and more especially in reference to the results of those operations, have naturally excited a good deal of interest not only among the shareholders directly affected but throughout the proprietary bodies of kindred undertakings. In the majority of these cases a policy of secrecy has been observed in relation to the investment of the funds with which the respective boards of directors have been provided, and in some cases any inquiry by a shareholder has been treated as a sort of impertinence. In the case of the Law Debenture Corporation, for example, the "temporary investments" made by the board have admittedly been of an unfortunate character, though their selection was the result of the combined wisdom of 18 gentlemen eminent in the legal profession, for on the sale of a portion of these investments a loss of about £10,500 was incurred, and the balance could only be realized at a depreciation of about £20,000. In other words, nearly 10 per cent of the sum invested has practically disappeared, and yet a shareholder who asked for a list of the securities held was met with a blank refusal. Another phase of the trust business was brought out in the action of the Trustees, Executors & Securities Insurance Corporation *v.* Sir John Pender, in which the directors of the corporation endeavored to make their ex-colleague responsible for the loss sustained upon an investment which he introduced, as if the very fact that a security was believed in by one member of the board could excuse the other directors from making proper inquiries. When one remembers how handsomely these gentlemen are paid to perform their duties, it is not a little surprising that such an action should ever have been brought, for the case was a public admission of the fact that the directors, as a body, had neglected an essential part of their duties. But a more glaring instance of the risks run by investors in the modern trusts has been furnished by the investigations of the committee appointed in December to inquire into the proceedings of the Imperial and Foreign Investment and Agency Corporation.

The committee's report shows that the corporation was formed in November, 1889, and that a sum of about £10,000 was spent in promoting it, that sum having been provided by the founders, apart from £2,142, which figured in the first balance sheet as preliminary expenses. The subscriptions received from the public up to December 2, 1889, were disappointing, amounting to 54,904 shares of £10 each, although the directorate was what it is the fashion to call a strong one, including Messrs. A. Balfour, B. J. Bosanquet, C. C. Case, C. S. Grenfell, A. A. Huth, and F. D. Sassoon. If the directors had been wholly free to act they would probably have decided not to proceed to allotment, but the money provided by the founders having been so largely dipped into, they appear to have fallen an easy prey to the broker who represented Messrs. C. de Murrieta & Co., and who agreed on behalf of that firm to subscribe for 12,000 shares if the corporation purchased from them certain securities. The bargain was struck, and the following securities, at a cost amounting to £252,571, were brought within market quotations from Messrs. Murrieta: £15,000 Costa Rica Government "A" 5 per cent bonds; £10,000 Entre Rios Provincial Government 6 per cent 1886 bonds; £25,000 ditto 1888 bonds; £10,000 ditto Central Railway 6 per cent mortgage bonds; £10,000 ditto extension bonds; £20,000 Argentine Northern Central Railway extension 5 per cent Government mortgage bonds; £20,000 Santa Fé and Reconquista Railway 5 per cent mortgage bonds; £20,000 ditto Western Central Colonies Railway 5 per cent mortgage bonds; £20,000 Interoceanic Railway of Mexico 6 per cent debenture bonds; £15,000 ditto 7 per cent preference (1,500 shares of £10 each); £5,000 Bieckert's Brewery 5 per cent debentures; £10,000 ditto (500 shares of £20 each); £20,000 Chignecto Marine Transport 5 per cent mortgage railway debentures; £20,000 ditto 7 per cent preference (1,000 shares of £20 each); £20,000 Cordoba Central Northern Section Railway stock; £7,500 Electricity

Supply for Spain (1,500 shares of £5 each); and £5,000 Costa Rica Railway 6 per cent second debentures.

A small portion of these securities was afterwards realized at a loss, but the bulk is still the property of the corporation, and shows a shrinkage of value of £114,358 as between the price at which the purchase was made and the medium stock exchange quotation of December 31, 1891. The total depreciation on the securities held by the corporation is said to amount at current market values to £205,000, and among the investments no return is being received upon stocks which cost about £200,000. These are, of course, very serious figures, and they prove conclusively that the shareholders were well advised in obtaining a thorough investigation into their affairs. The directors' reply to the committee's report was lame and inconclusive in the extreme, resting mainly on the ground that the events of the past two years could not have been foreseen.

Without going into the further particulars of these typical cases, certain broad considerations arise which call for the careful attention of the investing public. First, as to the policy of secrecy with regard to the investments held, which is so much in vogue. The directors of the companies adopting this policy demand that implicit trust shall be placed in their financial knowledge and judgment in return investors are entitled, at least, to demand that on the part of the directors the utmost prudence and care shall be exercised in the investment of the funds placed at their disposal. Can it be said, however, that the blind confidence the shareholders are compelled to place in the directorate has been justified by its results? That, we should think, no one will ever attempt to assert. The compact has evidently been a most inequitable one to shareholders, and those of them who consent to continue to act are only too likely to come to further grief. Secondly, it is to be borne in mind that if large profits are to be earned large risks must be incurred, and if large profits are not made, the founders obtain no return upon their capital, for it is obvious to the merest tyro in financial matters that the investment of a given amount of money in a variety of sound stocks such as a trust should hold will not produce an average net income of over 7 or 8 per cent per annum, the rates usually distributable upon the ordinary shares before the founders participate in the net earnings. The existence of founders' shares is, therefore, an incentive to the directors of these companies to engage in risky, speculative business, which but from motives of self-interest would be left severely alone.

Nor is it to be forgotten that when troubles arise and provision has to be made for temporary depreciation or actual loss, it is the ordinary shareholders primarily who have to submit to whatever sacrifices may be necessary, although with the return of the good times, which we all hope for, the profits which the capital of the ordinary shareholders may earn will be largely absorbed by those in whose interest the risky business, which has produced all the mischief, has been entered into. In the case of the Law Debenture Corporation, for instance, the net balance of £21,000, instead of being distributed among the ordinary shareholders, or written off on account of the depreciation shown in the value of the securities, was carried forward, and may in the future go to swell the return upon the founders' shares. It comes to this, that the very people who have been responsible for the inability of a company to pay a dividend may in the course of time benefit from the misfortunes which they have themselves created. Again, in the case of the Imperial & Foreign Investment & Agency Corporation, the reason put forward by the board against an application to the court for a reduction of the capital, is that the reduction would "unduly benefit the holders of founders' shares to the detriment of the deferred stockholders, and would likewise be disadvantageous to the holders of preferred stock." And the claim has been put forward, that in the event of a winding up the founders would be entitled to a moiety of the reserve fund. Thus, from first to last the influence of the founders' system is a most baneful one, and the sooner it is put an end to the better it will be for investors generally.

There is one other point to be mentioned. One excuse that has been put forward for refusing to publish a list of securities is that it would be unfair to disclose to the world the fact that the debentures of one or more companies had been taken by a trust upon certain terms, and we can quite understand this desire for secrecy in the light of the circumstances which have lately been made public as to the terms upon which some of these debentures have been subscribed for. If these are to be taken as typical instances, it is scarcely surprising that both parties to the transaction should be anxious to avoid publicity. But the public interest demands that these secret issues of debentures should be impossible, for the ordinary trade creditors of the undertakings issuing them are placed in a very disadvantageous position from being unacquainted with the real position of those with whom they are doing business. We have no desire to take up an unduly pessimistic attitude in reference to the trust companies and their methods; but it is highly desirable that the people who have invested so vast an amount of money in these undertakings should recognize the risks they are running, and determine, come what may, that they will not be participators in "blind pools," no matter how eminent and experienced the directors may be who have their money to deal with. The practice of living in a "fool's paradise" is never a satisfactory one, and it is especially to be avoided where important financial interests are concerned.

[From the Economist, December 8, 1894]

TRUSTS AS COMPANY PROMOTERS

After the painful experience of the past three or four years, it might have been thought that such of the so-called "trusts" as have not been brought to utter grief would have been taught the expediency of confining themselves to their legitimate business. Their proper function is to act as the medium through which investors, by having their risks spread over a large number of well-selected securities, may realize a somewhat better and more steady income than if they acted for themselves. But the great majority of them are not content with this modest but useful rôle. Eager to earn large profits for their founders, they adventured on the perilous field of company promoting and underwriting. And the disastrous results of that policy everyone knows. It has involved the loss of millions of money, has proved the ruin of hundreds of too credulous investors, and by destroying confidence, has done much to deepen and prolong the depression of trade, from which the whole country has suffered.

It was to be hoped that the lesson thus painfully taught had been taken to heart, and that this form of financial abuse had been checked once for all.

[From the Economist, June 1, 1895]

MOVEMENTS IN TRUST SECURITIES

Since we dealt at length with the movements in the prices of the principal trust securities in our issue of September 8 last, the appreciation in market valuations, which had then been going on intermittently since the close of 1893, has considerably increased, the recovery from the lowest points touched during the period of greatest depression having in several instances varied from 20 to 40 per cent. That such an improvement should have taken place is not surprising, for, on the one hand, the prices of stock exchange securities generally have advanced to a greater or less extent; and, on the other hand, with the restoration of confidence the better-class trust stocks have come in for a larger amount of attention from the investing public. There can be no doubt that the securities of many of the trusts were quite unduly depreciated a couple of years ago, when the Winchester House scandals were forcing themselves into prominence, and when, amongst unthinking people, the very name of trust had become a byword and a reproach. That the companies which had from their commencement adhered strictly to the principles upon which they were actually as well as ostensibly formed would sooner or later live down the effects of being classed with the "blind pooling" concerns which masqueraded under the title of trust was certain, more especially in those cases where investors have the means of ascertaining from their published lists what securities the companies hold, and the kind of provision that has been made for depreciation where depreciation exists. To some extent the appreciation which has recently taken place has been due to the larger profits earned, but for the most part it is based upon a more sentimental foundation.

* * * * * * *

Many of the trusts still persist in withholding from the proprietors particulars of the investments held, though the number is considerably smaller than it was a few years ago, and in a few cases averages of the holdings are stated without full details; but, speaking generally, there is an evident disposition among those who conduct these undertakings, even of the less-assured character, to "forswear sack and live cleanly," the rise in market valuations generally having enabled them to realize stocks of doubtful permanent value, and thus to put their houses in order.

[From the Economist, March 19, 1898]

TRUST COMPANIES

The issue of the reports of a large number of trust companies for the year 1897 affords an opportunity of reviewing the present position of these undertakings. The underlying idea of a trust company, we have always conceded, is a good one, enabling the investor to spread his risk over a large number of securities giving a good average return, and thus avoiding the risk of serious or total loss involved in placing a limited amount of capital in one or two securities not of the first class.

The majority of the trust companies formed in such numbers about 10 years ago unfortunately failed to confine their operations strictly to this class of business, but undertook the flotation or underwriting of new companies and any financial business which promised to return a large profit. These operations, however, necessarily involved serious risks, and while they did for a time give handsome results, and created a temporary boom in the trust companies' stocks, they finally resulted in heavy losses, and in the case of some of the companies at least a narrow escape from complete disaster.

The directors, where they have not been ousted from office, have gained wisdom from experience, and, for a number of years past, the companies have in nearly all cases pursued a cautious policy,

and have undertaken little business beyond that of watching their investments, and weeding out from time to time the less desirable among the securities held. That, however, has proved a very difficult task, as the stocks were, in most cases, purchased at a period of inflation, and many of them having fallen into default, the companies have made very small distributions upon their deferred stocks, such surplus revenue as they have secured being required for writing off losses or depreciation.

[From the Economist, January 8, 1910]

The object of a properly managed trust company is to minimize the possibilities of loss in investment by spreading securities more widely than a single man can spread them and by obtaining the advice of able financiers as directors. The principle itself, which amounts to a kind of mutual insurance among investors, is undoubtedly sound; but we need scarcely point out that it may easily be abused, and that the success of a trust company must depend entirely on the management. Consequently it is essential before buying shares to look back at past history, see how the profits have fluctuated and how well the dividends have been maintained, and find the sort of price and yield that the market has generally provided in former years.

* * * * * * *

In considering the shares of these trust companies investors ought to consider very carefully the allowance made for depreciation and the relation between the realizable and nominal value of the securities. The information provided in the reports is often not full enough to allow of detailed calculations, but wherever it is possible the list of shares held should be examined closely, as one ought to understand the nature of the companies' assets before buying its stock, and apart from a scrutiny of the published list an investor can not tell into what market he is really putting his money. For this reason a trust company that publishes a list of securities is always preferable to one that does not.

[From the Economist, March 4, 1911]

The investor who wants the stability which is given to investments by distribution of the risk over a large area yet does not wish to split his capital into trifling amounts, may always fall back upon the stocks constituting the capital of the trust companies themselves. Among these he will find securities returning various rates of interest up to 6 per cent, the debenture and preference stocks mostly being securities of a high order, while some of the ordinary and deferred stocks have good prospects of appreciation, yet return yields equaled by few investments of similar standing. On the other hand, there is a special amount of risk due to the fact that everything depends on the conduct and discretion of the directors.

[From the Economist, March 2, 1912]

TRUST COMPANIES' FINANCE

A trust company in the ordinary sense is nothing more than a company formed to buy investments with its capital for the sake of the income to be obtained from them. The investor in the stock of a trust company knows that his security is not represented by one or a dozen investments, but by stocks and shares of governments, municipalities, railways, and industrials in every part of the world where capital can earn an attractive rate. To the investor of moderate or considerable means the idea of handing his money to a group of persons to invest as they think fit, paying the expenses of an office, staff, and board of directors out of the income, may seem a rather foolish proceeding when the idea of a trust may be carried out in the holdings of an individual by selecting stocks in every market which appears to offer an attractive return. This view might be justified if the individual had the whole of his time to devote to his investments, and could constantly be changing or rearranging them. The control of a number of investments involves much trouble, even apart from the necessity of "watching" them, for out of the whole official list of industrials, or, in fact, any of the 5 per cent stocks, but a small proportion have not changed their form in some way or other within 10 years or so. The policy of spreading risks which has been so undeservedly boomed in recent years has undoubtedly something to recommend it in theory, but to the ordinary investor it is practically worthless. If he spreads his risks over 10, or even 20, mediocre investments to "raise the yield," instead of buying one really safe one, he but multiplies the chance of loss of a portion of his capital. Only by purchasing a very large number with risks distributed in each particular "geographical" selection can the effects of depression in a particular portion of the globe be minimized. In a trust company of quite moderate dimensions we find that the list of investments exceeds 300 different securities. How many individuals would care to be bothered with the holding of one-third of this number?

[From the Economist, March 8, 1913]

SOME TRUST COMPANIES

A trust company is based upon the principle of specialization in the art of investment. For this object a board of directors highly competent in finance and an experienced staff should be chosen, who will devote themselves to the care of the company's funds. It might seem that by the time the cost of administration had been met and the various officials properly remunerated for their ordinary work and for special tours to distant parts of the world the return to the shareholder would not be satisfactory. But the profit of judicious investment and the loss of foolish investment are both so large that expert advice is thoroughly well worth paying for, and a good trust company can provide them at a smaller rate per cent owing to the large capital over which the total cost is spread.

The two factors of most importance in the success of one of these companies are proper management and a favorable time for starting business. The company launched in a period of high stock exchange values should be avoided, for whenever a slump comes it will be faced with a large depreciation in its investments and the rash shareholder will have the unpleasant experience of seeing big slices of his capital written off. An intending investor should scrutinize with great care the list of persons in control; he should estimate the qualifications, examine the history and success of other undertakings with which they are connected, and generally satisfy himself that they are competent to be trusted with his money. Their good management will show itself in the judicious selection of investments. The class of business is what Mr. Withers describes as "speculative investing," or the combination of high yield with capital appreciation. An investment trust searches for intrinsic values and picks up securities which have fallen out of public favor to keep them until the return of popularity. A slump in any particular market provides opportunities to these concerned who make bargain purchases to be turned over at a profit after the renewal of confidence. In the same way during trade depression the trusts will buy industrials at cheap prices, which can be realized at the height of the returning boom. They hold freely debenture, preference, and ordinary stocks, and when their fixed interest-bearing securities are depreciating they stand to gain on their ordinary capital investments. In addition to making profits in this way there is a source of revenue closed to the ordinary investor but open to trust companies in the underwriting of new issues. This is a very profitable business, for if the public subscribes in full the trust simply takes the commission, without having advanced any money, but even if the issue is a failure the company has an investment from whose cost is deducted the underwriting commission and the profit on that portion which went to the public.

Thus, if an issue is made on which the commission of underwriters is 3 per cent, and of which one-half is taken by the public, a trust company obtains its stock at six points discount on the issue price. It is often in a position to take a profit on this at once, but if it decides to retain it as an investment the book value is low. This explains the leaning of trust companies toward new issues, and it may be added that the expert advisers of these companies know far more about the prospects of a new issue than the uninstructed public is able to learn from the prospectus.

* * * * * * *

Trust companies passed through troublesome times in the nineties, and many were compelled by the Baring crisis and other adverse circumstances to reduce their capital. Much was learned, however, from adversity, and the quality of management has improved considerably. The "canny" Scot, as was perhaps to be expected, has shown himself successful in this form of enterprise, and Scottish companies are, on the whole, in a stronger position than English ones, but the unfit are now practically eliminated.

* * * * * * *

A trust company is not bound to make good depreciation in the value of its capital assets out of the revenue of the year before declaring dividends, but in the interests of sound finance it is clear that depreciation due to loss of earning power ought to be made good; any further depreciation allowances will enhance the dividend prospects of the company as a whole. Trust company valuations individually may perhaps teach the shareholder very little; they may, in fact, be misleading. This view was put forward by Mr. P. W. Campbell, the chairman of the largest and most successful Scottish investment company, in the following words: "I am one of those who think it rather a pity to lay emphasis on valuations made at any particular date. All such valuations are, I think, misleading when values are abnormally high, as they sometimes are, and equally misleading when values are abnormally low, as we may fairly say was the case at December 31 last." This is perfectly true. Nevertheless, the trust company shareholder sometimes has a little intelligence himself, and regular valuations show him whether a particular company's affairs are being conducted with success, especially if he is able to compare its record of a few years with those of similar concerns.

[From the Economist, May 31, 1919]

INVESTMENT TRUST COMPANIES AND WAR FINANCE

Among securities of a purely investment character, it would be difficult to find a group with a better record of stability, once the

initial effects of the outbreak of war had spent themselves, than the stocks of well-managed investment trust companies. In the first year of war, dividends in several instances were reduced, and there was a consequent fall in the prices of the ordinary stocks, but since then the dividends—though in one or two cases still below the immediate pre-war distributions, have been steadily rising, so that as compared with, say, two years ago, the prices of investment trust company ordinary stocks are generally substantially higher, though the prices of gilt-edged stocks have depreciated during the same period. The prices of the debenture and preference stocks, too, though affected by the general fall in security values, have derived support from the fact of the larger margin of security provided by the growing ordinary dividends and the better quality of the investments behind them, and, in the majority of cases, show an improvement in value.

Chief, perhaps, among the factors affecting trust companies during the war period was the treasury scheme for mobilizing American and other securities for the support of the foreign exchanges. Trust companies were particularly large holders of such stocks, and on such of them as they have lent to the treasury they have received the extra one-half per cent interest. The treasury, however, was particularly anxious to purchase outright large quantities of American stocks, and therefore negotiated for the acquisition of the greater part of those owned by the trusts. Some of the companies were not too keen on turning over a big proportion of their assets and finding fresh investments, but they have not suffered in the result. A large part of the capital previously in American stocks is now in British Government securities, on which the return is as good or better than on the American stocks, because the latter, in a good many cases, included a few nondividend payers. The effect, on the whole, was to provide the companies with free capital just at the time when it could be invested to the best advantage, whereas in normal times such conditions necessarily imply an unfavorable market for the raising of new capital by the companies.

* * * * * * *

One word of warning may not be out of place, now that the Stock Exchange is becoming more active and, owing to the removal of new capital-issue restrictions, any kind of scheme may be put before the public so long as the capital is not to leave the country. The trust company principle is sometimes abused by individuals wishing to secure command of capital for furthering their own plans or to enable them to saddle the investor with their own "lame ducks." A successful trust company is the work of years of careful and honest investment by its directors, whereas a new one comes before the investor with no such record. Therefore an investment in the securities of any new venture simply means that money is being handed to its directors for them to employ practically as they please.

[From the Economist, April 11, 1925]

INVESTMENT TRUST COMPANIES

The advantages of the investment trust company are gradually beginning to be realized by small investors. For many years it has been a popular form of investment with those who were able to discover the favorable position in which such undertakings were placed. As Viscount St. Davids, at the recent annual meeting of the Premier Investment Co., pointed out, in referring to the successful progress made by investment concerns, "The investor in any one of these companies does not run any one overwhelming risk; there is no huge investment that might wreck the company if it went wrong. Secondly, their investments are spread about in a great number of different countries; and, thirdly, the money is put into investments of very many different kinds, the result being that the risks are successfully and widely spread. Then I should say that another reason of this success is that the investments are made by men who have learned the investment business, and are more or less experts. You may say, 'But a private individual may do just as well.' Of course, he may do just as well if he is an intelligent man and gives a great deal of thought to his investments—in fact, if he does with his own private investment what the directors of an investment trust do with other people's money. But even then the private investor has two disadvantages as compared with the investment trust. The first is that many of the best things are offered privately to the investment trusts before they are put upon the market; and the second is that, as regards a great number of securities, the investment trusts are able to get into them by underwriting, and, therefore, they get them at lower prices originally than the outside investor is obliged to pay."

[From the New York Telegram, February 7, 1928]

STATE OFFICE USED TO HELP TRUST STOCK—"AMATEURISH" SURVEYS BY OTTINGER'S STAFF HAVE WIDE DISTRIBUTION—USEFUL IN SHARE SALES—PASS JUDGMENT ON INVESTMENT COMPANIES, THOUGH EXPERTS HESITATE TO DO SO

By Carl Randau, New York Telegram financial writer

Through nation-wide distribution of partial and amateurish surveys of investment trusts, Attorney General Ottinger has permitted his office to be used, apparently unwittingly, to tout individual security issues, an investigation by the New York Telegram reveals.

Three times in less than three months supposedly authoritative, yet vitally different surveys have been published by the State. The first contained praise primarily for one class of trusts and for particular members of that class. It also contained unfavorable observations about another class of trusts and of particular members thereof.

The second report, which was merely a slightly altered version of the first, withdrew several of the unfavorable references. The third report, published as a "supplemental" survey, contained numerous important modifications in the statements concerning the trusts which had been more or less reflected upon in the original report.

TRUSTS USE REPORTS

The first report was useful to one group of trusts in backing up their sales literature, while the third is now being used by another group.

Though broadcast with the "compliments of Albert Ottinger, attorney general, State of New York," the surveys were not actually prepared by him. Immediate supervision of the job was intrusted to Timothy J. Shea, assistant attorney general, in charge of the bureau of securities of the State department of law.

When requested by the Telegram to explain the alteration in the reports, Shea at first refused to be quoted, a position from which he relented only slightly.

"I wish the reports to speak for themselves," he said. "I am proud of them and stand by everything they contain. While I welcome a full and free discussion of the whole subject, I think I have had my say in the reports."

Shea brushed aside discussion of particular changes in the reports. It was made clear that he sees no impropriety in his action of compiling official documents in such a manner that they lend themselves to private exploitation.

He prides himself on conducting his office without regard to precedent and consequently is little interested in whether his office or other offices of the State have previously made a practice of boosting or discrediting private legitimate ventures.

ACCEPTED AS VALUABLE DOCUMENT

Shea apparently attaches little significance to the fact that the first report was much more widely distributed than the "supplemental" report. Instead he is particularly pleased to find that many State officials, economists, and writers have accepted the original report as a document of great value. Whether they all learn of the subsequent changes is not a matter of serious moment.

When all three reports are studied together there is revealed an interesting succession of modifications.

The first of the surveys appeared in the middle of November. It was followed only a few days later by a corrected version. The third came from the press early in January, but did not receive its widest distribution until the past few days.

The surveys, or at least the first of the lot, purported to represent a dispassionate and comprehensive report on the problem of the investment trust in all its varied forms. As such it was expected, among other things, to be of use to the legislature in the framing of new laws. The second and third versions bear evidence of attempts to escape from hasty conclusions in the first.

Actually the three have been described as a gossipy collection of observations, with unnecessary comments concerning the merits or demerits of individual private enterprises.

FAVORS DISCRETIONARY TYPE

In addition to passing out quite freely verdicts on individual organizations, the authors of the reports also undertook to sit in judgment on the various types of investment trusts.

Many of the bankers and legal experts of Wall Street still hesitate after years of investigation to express definite opinions on what should be the proper activities of investment trusts, nor have they been able to agree on definitions. The representatives of the State, however, displayed no such hesitancy.

Shea and his assistants, after investigating the problem a short time, expressed themselves in favor of investment trusts of the discretionary or management type as opposed to the fixed or semifixed types.

They found, among other things, that the cost of raising capital for the fixed or rigid trusts was higher; that the possibilities for loss were greater; that they afforded their promoters unusual opportunities to unload stock acquired at lower prices, and that there were many weaknesses in their trustee agreements.

This emphasis on the dangers, real and imagined, surrounding the fixed or rigid trusts was offset by no little praise of the good points of discretionary, or management, trusts.

BOTH HAVE GOOD FEATURES

Thus the State reserved its severest criticism for the trusts which largely eliminate speculative features and possible errors of management and its freest commendation for those which must forever depend on the judgment and trading ability of their executives. Actually, of course, both types have highly commendable features.

Furthermore, an effort was made to show that the United States Government favors the trading type of trust. It so happens that in 1922 a former assistant director of the Bureau of Foreign and Domestic Commerce was sent to London and Edinburgh by the Department of Commerce to investigate and report on investment trusts.

From this routine action by the Government the following far-fetched conclusion is drawn: "It would appear, therefore, that the influence of the United States Department of Commerce has been in the direction of the general management type of investment trust."

The United States Government has also sent men abroad to study and report on the Japanese beetle.

The State's report not only rendered assistance to certain discretionary trusts and interfered with the sales of fixed trust issues, but was accepted throughout the country as an important and authoritative document.

MANY ASK FOR REPORT

According to the attorney general, "a veritable flood of requests for copies of the document overwhelmed the various branches of the State department of law."

Some of the places the first report was read with avidity may be learned from the attorney general, who comments as follows on the demand:

"From the governors of the Federal reserve banks they came; from investment trust associates in every State in the Union, Canada, and England, the cradle of this form of investment enterprise; from the various securities commissions and law departments of the several States; from the universities scattered over the country, with pressing demands from the directors of their departments of economics.

"From business associations and aggregations of every character, banking, industrial, public utility, mercantile; from chambers of commerce and boards of trade in every section of the country; from editors of publications devoted to business discussions; from authors of books and dissertations upon economic subjects; from students pursuing the academic as well as economic curricula, eager for information for incorporation in theses; from legislators within and without the State, judges and magistrates; from every source they came, and in such profusion as to tax the facilities of the department of law to meet the response."

ACCEPT REPORT WITHOUT STUDY

Business and financial leaders in Wall Street also in many cases have accepted the report as authoritative, sometimes without study, simply because it was issued by the State.

But even while these reports were being sent out as representing the State's best effort in a thorough study of investment trusts the attorney general's staff was compiling a supplemental report.

The extent to which statements contained in the first report were subsequently modified will be discussed in a second article to-morrow.

UTAH INVESTMENT TRUST SECURITIES RESTRICTED—STATE COMMISSION ISSUES REPORT REQUIRING COMPLETE PUBLICITY OF PORTFOLIO AND APPROVAL OF SUBSTITUTION

The Utah Securities Commission has issued a report enumerating requirements which must be complied with before investment trust securities can be qualified for sale in Utah. Among these requirements is that whenever substitution is made in trusts of the discretionary type the trust managers must obtain the approval of the commission before they can continue the sale of shares.

A complete list is required of the holdings in the portfolio of the investment trust and statement of the current value of such holdings, together with the name of the exchange on which each holding is listed and a statement relative to the distribution of such holdings, together with the volume of trading during the last three months prior to purchase of such holdings.

A full statement of all substitutions made must be filed annually, such statement to include prices received for the security sold and the prices paid for the securities purchased, together with the dates of the transactions. This is intended to determine the efficiency of the discretionary power.

A statement showing separately the income of the trust from interest and dividends on the securities and other property held, and the income to the trust incident to trading operations also must be filed annually. Against this statement of income there must be set up a statement of all expenses incurred, including costs of administration, brokerage, and commission charges for trading; payments, if any, for supervisory service or investment advice, and taxes deducted from gross profits. These figures will determine definitely the advantage to the investor measured in income from trading profits over and above the return to the trust from interest and dividend income on securities held.

A statement is necessary showing how the price of trust shares or certificates of beneficial interest issued against the stock deposited with the trustees is arrived at. This statement must show whether a percentage or a definite sum in dollars and cents is added to the aggregate value of the deposited property to determine the aggregate selling price of the shares, or certificates, issued against each unit. This also should show the amount figured into the selling price for brokerage and commissions in purchasing the underlying stock.

Whenever a substitution is made a statement must be made setting forth consistent reasons for such substitution.

INVESTMENT TRUST RULING—CALIFORNIA ORGANIZATIONS MUST SUBMIT QUARTERLY STATEMENTS OF CONDITION, COMMISSIONER ANNOUNCES

(Special to the Wall Street Journal)

LOS ANGELES.—Organizers of investment trusts in California henceforth must agree to furnish stockholders and State corporation commissioner with financial statement every three months, according to decision of Corporation Commissioner Jack Friedlander. Financial statement which will be furnished newspapers by commissioner must show all securities bought or sold during three months' period, stocks, or other securities held at end of quarter, their market value and purchase price.

Commissioner is also considering question of underwriting fees and organization profits in connection with formation of investment trusts, number of which have increased in the past year and may decide on arbitrary fee limited to 10 per cent of amount invested. Commissioner's action is believed to be the first adopted by any State to give full publicity to operating investment trusts in effort to curb mismanagement of investors' funds.

[From the Wall Street Journal, November 30, 1927]

REGULATING INVESTMENT TRUSTS

(Editorial from Boston News Bureau)

It is a fine thing to lock the stable door before the horse is stolen. One might also foil the thieves by hamstringing the horse. Which is the distinguished attorney general of New York proposing to do in his suggested measures for regulating investment trusts?

As Boston has been something of a pioneer in the investment-trust field, and as New York is necessarily the leading market for investment-trust securities, Mr. Ottinger's proposals have been read with interest by Boston bankers. Briefly, he would have legislation placing investment trusts under supervision of the State banking department, liberalizing the tax laws with regard to such institutions, requiring investment trusts to deposit a minimum forfeit in New York State or United States Government bonds with the State, and limiting the power of investment trusts to issue bonds.

All this sounds like a set of regulations for a banking institution. Emphatically the investment trust is not a bank. The individual who demands extreme safety for his funds, a fair rate of return, and ready availability may satisfy his requirements through the mutual savings bank. In New York as in Massachusetts he will find an abundance of such institutions ready to serve him.

The investment trust, on the contrary, is a pool of funds to be invested on behalf of a large number of investors by a more or less expert management. It offers investors a greater degree of diversification and in general more careful supervision than they could possibly obtain with their own funds. As in any business enterprise an investment in such a venture will fluctuate in value largely in accordance with the ability of the management. Barring fraud, however, it is difficult to conceive of any such losses in an investment trust as may overtake the investor in, say, an industrial enterprise.

Discussion of the Ottinger proposals is certain to serve a good purpose. Having grown from practically nothing to $600,000,000 of assets in a few years the investment-trust movement has taken on something of the aspect of a boom. Under these conditions there is a tendency on the part of some investors to regard the investment trust as a mysterious instrument for assuring profits of 10 per cent per annum or more without risk. There is likewise a temptation to the unscrupulous to enter a field in which public interest is so keen. If public attention is directed to the fact that something more than the name "investment trust" is needed to assure character and competence in management, much good will have been accomplished.

It is a matter for congratulation that so thorough an investigator as Attorney General Ottinger has found no evidence of fraud in investment-trust financing or management to date. With the Martin Act behind him he is amply equipped to deal with it if it should arise. Since he is so equipped, is haste needed in enacting restrictive legislation? We have seen plenty of examples of the evil of overregulation by government in other fields. It would be unfortunate to hamper unnecessarily the development of so valuable an instrument of finance as the investment trust.

EXHIBIT J

[From the New York Journal of Commerce, November 30, 1927]

THE INVESTMENT TRUST SITUATION

Announcement that the joint legislative committee on banking investments will not take action upon the proposed plan of reform or regulation of investment trusts, which has been prepared by the attorney general's office, will naturally be received with some mixture of feeling by the community. Undoubtedly many bad investment trusts have been formed, and equally clearly many trusts which mean quite well have been employing unsound or objectionable tactics in the development of their business. The need of better and more honest methods is incontestable.

Two doubts, however, assail the nonpartisan observer who looks into the situation. One is the question whether the situation is ripe for legislative treatment. The incomplete and half-baked character of the recommendations recently made in the attorney general's investigation and the apparent lack of understanding of investment-trust principles which prevails in many quarters show that the principles of investment-trust management, whether understood by experts or not, have at all events not been sufficiently worked out to find acceptance on a general basis. Legislators find it hard enough to legislate carefully when there is pretty general acceptance of fundamental ideas in a given field.

The other doubt which must trouble many a mind relates to the question whether we have not already plenty of law on this subject. The investment trust is, in effect, a kind of trust company, and there is a good deal of argument in support of the view that the best supervision over our investment trusts will be that which comes from wise examination by the banking department. That the banking department has quite adequate power to do this work is the opinion of not a few persons. If so, the exercise of such power is the quickest and probably the most effective way of succeeding. It should result in compelling investment trusts to be sincere with the public, and that is the main requisite.

While doctors are thus disagreeing, the prospective investment trust patron or investor will do well to make a careful study of what he is purchasing and make up his mind accordingly.

Mr. DICKINSON of Iowa. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and Mr. SNELL having as Speaker pro tempore assumed the chair, Mr. TREADWAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (H. R. 11577) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes, had come to no resolution thereon.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted—

To Mr. STEVENSON, at the request of Mr. HARE, for three days, on account of illness.

To Mr. WARREN, for one week, on account of death in his family.

FARMERS' PRODUCE MARKET

Mr. HARE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the bill recently passed by the House providing for a farmers' wholesale produce market by printing a statement signed by commission merchants of this city with reference to the location of that site.

The SPEAKER pro tempore. The gentleman from South Carolina asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. HARE. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

FEBRUARY 13, 1928.

To the honorable COMMISSIONERS OF THE DISTRICT OF COLUMBIA:

A petition appeared in the public press of Saturday purporting to be signed by a certain group of commission merchants, in which it was stated that they have made arrangements to acquire the Patterson tract and intend to locate their business houses there when they are required to move from their present location.

This is to notify the Board of Commissioners and Congress that the undersigned commission merchants and wholesalers of perishable food products, representing the bulk of the wholesale business in market supplies of the city of Washington, do not consider the Patterson tract suitable for a wholesale-market area and do not propose to locate there.

The report to Congress made by the Board of Commissioners on December 15, 1927, under an act passed March 3, 1927, disapproved the Patterson tract with this conclusion:

"After a careful review of all available data bearing upon the subject, the conclusion has been reached that the following sites should be eliminated from further consideration, namely, * * * Eckington site No. 3 (Patterson tract).

"It is believed that the foregoing locations are not reasonably adapted to the needs of a farmers' market because of remoteness or lack of adequate transportation facilities, and also because there is no reasonable probability that there would be established adjacent to any one of these locations a general wholesale produce center."

The promoters of the plan to locate market houses on the Patterson tract state that it is their purpose "to establish a modern marketing community, with each of the related groups properly placed and with adequate provision for the future growth of all units, and we request your cooperation in creating a food handling and distribution terminal commensurate with the size and dignity of the city * * *."

It is of prime importance to the public that the wholesale market houses be located at a railroad terminal where carlot receivers of perishable freight can deliver direct from the cars and eliminate the high cost of drayage and rehandling. This would reduce the price of food sold at wholesale and at retail. Otherwise this cost must be passed on to the ultimate consumers. There are no freight rail facilities into the Patterson tract and there is no probability that there ever will be.

It is true that the Patterson tract is close to the union passenger station but the fact is that the bulk of perishable freight delivered in this city from the South, North, and West is unloaded at the terminals in southwest Washington.

Passage to and from the Patterson tract is limited to Florida Avenue, which already carries very heavy traffic movement during business hours, and if a wholesale marketing center were established there the resulting congestion on this one artery would demoralize the operation of market functions.

It is claimed that the Patterson tract is close to the center of population and close to the center of the buying public. In reference to this it is to be noted that the buyers for the market stores, hotels, restaurants, and other large users of perishable food products who regularly patronize the wholesale market houses and the farmers' market have strongly urged the concentration of a wholesale food area in southwest Washington adjacent to the rail and water terminals and the municipal fish market, where they can organize their quantity buying on the most economical and efficient basis.

It must be apparent that the dealers who have been prevailed upon to sign the petition for your cooperation in developing the Patterson tract for wholesale marketing purposes were not actuated by a sound belief that it is the logical place for this business, but rather by the hope of big profits or bonuses through the promotion of a speculative land deal which could not possibly work to the general benefit of Washington and should not have the sanction of the board of commissioners or of Congress.

It has been generally conceded that the wholesale market for perishable food, including the farmers' market, ought not be disrupted and scattered over several sections of the city, but for economy of operation should be concentrated in a wholesale food area having all necessary facilities for this purpose.

In accordance with this natural alignment it is the intention of the undersigned merchants representing all branches of the wholesale perishable food industry to locate their business houses in the approved area of southwest Washington.

HOWARD UNIVERSITY

Mr. TARVER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD relative to the conference report on the Interior Department appropriation bill, acted upon on yesterday.

The SPEAKER pro tempore. The gentleman from Georgia asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. TARVER. Mr. Speaker, it may be accepted as a primary rule of logic that a proposition which is just does not require misrepresentation in its defense.

The Howard University appropriation has been acted on favorably by Congress (without statutory authority, however) for so many years that its propriety is accepted as a matter of course, and it is doubtful if many Members of the House have examined and analyzed the arguments by which it is sought to justify it.

I intend to discuss only one feature of these arguments at this time, and that, in the main, only in so far as it unjustly reflects upon my own State.

On February 28, 1928, the conference report upon the Interior Department appropriation bill was called up in the House for consideration, and the previous question being ordered immediately no opportunity was afforded for debate. In connection with that report the House passed upon the Senate amendment appropriating $390,000 for Howard University for negroes, in Washington.

Under leave granted to extend his remarks, the gentleman from Michigan [Mr. CRAMTON] has inserted in the RECORD on pages 3821–22 certain alleged statistics relative to the distribution of Federal funds appropriated for educational purposes as between whites and negroes in 17 States of the Union. It is the evident purpose to justify appropriations to Howard University upon the theory that negroes are discriminated against in the allocation of funds appropriated by the Federal Government for educational purposes, and the Southern States, with a few northern ones in which separate educational institutions are maintained for whites and negroes, are used to illustrate the contention. The alleged statistics, among other errata, contain the statement, in effect, that for "four-year collegiate education" the Federal Government appropriates $571,296 to the State of Georgia, and that of this amount the negroes receive the benefit of only $19,667.

The statistics purport to have been furnished by Howard University. Alleging their fallacy as I do, I think it advisable to call attention, first, to certain other statistics furnished heretofore by this institution to the Committee on Education, which has reported H. R. 279, intended to legalize appropriations to that university.

It should be noted in this connection that the Committee on Education, of which I am a member, in reporting H. R. 279 has relied entirely upon statements made by educators representing Howard University for its facts; and at the present session of the Congress declined to have hearings on the bill, although 12 members of the committee were new and did not participate in previous hearings, but upon the basis of 1926 hearings on a similar measure consisting, except for a short introductory statement by Mr. CRAMTON, entirely of statements by two representatives of Howard University, reported the bill favorably.

As indicating the nature of the information upon which the committee relied, I desire to incorporate in my remarks a statement addressed by me to the chairman of the Committee on Education, with attached exhibits:

Hon. DANIEL A. REED,
Chairman Committee on Education,
House of Representatives.

MY DEAR MR. REED: Under permission granted me by the committee, I desire to file the attached documents to be incorporated in the record of hearings had on H. R. 279, a bill to amend section 8 of the act incorporating Howard University.

It will appear from the record that hearings had by the committee during the Sixty-ninth Congress on H. R. 8466 and H. R. 393 were considered upon the hearing relative to the instant bill. The documents are offered with reference to statements appearing on pages 19 and 20 of the hearings had during the Sixty-ninth Congress to the effect that Congress appropriated $3,759,742 directly to schools and colleges in the South through the Department of the Interior; that of this sum only about $150,000 is allocated to colored schools; that at least $625,000 should be so allocated; and that there is discrimination against the negro in the allocation of such funds in the South. These statements were made by Doctor Durkee, president of Howard University. Incorporated therein at the top of page 20 of said hearings appears a list of universities alleged to be southern universities, with figures opposite each one alleged to show amounts received by them from the Federal Government. In this list of "southern" universities appears Delaware College, Montana and New Mexico Colleges of Agriculture and Mechanic Arts, Utah Agricultural College, Oregon State Agricultural College, the University of Arizona, the West Virginia University, two colleges in Oklahoma, as well as universities and colleges in Kentucky, Maryland, and Missouri.

To confute the charge of unjust discrimination against the negro in the allocation of Federal funds appropriated directly to Southern universities and particularly with reference to Georgia, I attach hereto:

1. A statement from Chancellor Charles M. Snelling, of the University of Georgia.

2. A statement from Hon. John J. Tigert, Commissioner of Education.

In lieu of attaching copies of the documents referred to in Commissioner Tigert's statement, I digest tables 11 and 25, pages 36 and 69, "Land-grant Colleges, 1925," which show:

17 States (including 11 States usually referred to as the South, and in addition, Delaware, Kentucky, Maryland, Missouri, Oklahoma, and West Virginia) received from Morrill-Nelson (land-grant college) funds for fiscal year ending June 30, 1925	$850,000.00
Received by colored institutions in States named	250,365.18
14 States (excluding from States above named, Delaware, Oklahoma, and West Virginia) received	700,000.00
Received by colored institutions in said 14 States	225,365.18
11 States (excluding Delaware, Kentucky, Maryland, Missouri, Oklahoma, and West Virginia from the 17) received	550,000.00
Received by colored institutions in said 11 States	204,990.18

Respectfully.

M. C. TARVER,
Member of Congress Seventh Georgia District.

UNIVERSITY OF GEORGIA,
OFFICE OF THE CHANCELLOR,
Athens, Ga., January 28, 1928.

DEAR MR. TARVER: I beg to acknowledge the receipt of your telegram of to-day and in reply would say that I have always understood that under the first Morrill Act, that of 1862, the entire proceeds came to the University of Georgia and have been used by this institution since that time, except the $2,000 per annum appropriated by our trustees to the North Georgia Agricultural College as a part payment of the salary of the president of that institution. As for the share of the negroes in the funds arising from that act, the State of Georgia agreed to appropriate the sum of $8,000 per annum for the use of the Negro race. This money first went to the Atlanta University and later on was transferred to the Georgia Industrial College at Savannah, a part of the University of Georgia system.

When the question of an equitable division of the funds from the Morrill-Nelson Act of 1890 came up, there was more or less discussion and the question was finally settled to the satisfaction of the Federal Government, the division to be made as follows: Two-thirds to the University of Georgia for the whites and one-third to the Georgia Industrial College for the negroes. This division, which was agreed to by the Government more than 30 years ago, has been adhered to since. These funds are now divided as follows: To the University of Georgia, $33,333.34; to the Georgia Industrial College, $16,666.66.

It was pointed out at the time this basis of division was agreed to, and it is true now, that the cost of providing adequate instruction for the negroes was much less than that of procuring similar services for the whites and that under the terms of the division agreed on the negroes would get equal educational facilities for the amount of money thus distributed. It was also shown that the relative demand for this type of education was much less among the negroes than among the whites and thus called for the expenditure of less money relatively.

I call your attention to the fact that the colored population of Georgia is but very little more than one-third the total population of the State, and that on population basis the present practice of division is equitable.

The State of Georgia has been appropriating for a number of years the sum of $10,000 per annum to the Georgia Industrial College. Last summer the State provided in the general appropriation act for that institution the sum of $57,666.66 for the year 1928 and a similar sum for 1929. Thus it is seen that the State has increased its appropriation for the maintenance and support of the college for negroes nearly six times the original sum. The requests of the trustees of that institution, acting in conjunction with the department at Washington, were fully met by the General Assembly of Georgia.

Trusting that this will give you the information desired and assuring you of my appreciation of your interest in the institution over which I have the honor to preside, I beg to remain,

Yours very truly,

CHAS. M. SNELLING, *Chancellor.*

DEPARTMENT OF THE INTERIOR,
BUREAU OF EDUCATION,
Washington, January 30, 1928.

Hon. MALCOLM C. TARVER,
House of Representatives, Washington, D. C.

MY DEAR MR. TARVER: The Secretary of the Interior is charged with the supervision of the administration of the funds received by the several States through the provision of the Morrill-Nelson Acts of 1890 and 1907.

The division of these funds is fairly stable and has been practically unchanged since 1918. Each State, Alaska, Hawaii, and Porto Rico receive $50,000 annually under the Morrill Act of 1890 and the Nelson amendment of 1907, totaling $2,550,000 each year. In Georgia the provisions of the act were accepted by a joint resolution approved November 26, 1890, and Section XVII provides that one-third of said fund shall be for the colored students. The division of the funds between institutions for white students and those for colored students in States where a distinction is made in the admission of white and colored students was proposed by the individual States and was approved by the Secretary of the Interior, except in the case of South Carolina. The division proposed by South Carolina was not deemed equitable by the Secretary of the Interior, and that State was not certified for any funds, until Congress enacted a law authorizing the payment of the funds, notwithstanding the objections of the Secretary of the Interior thereto.

We have forwarded under separate cover two publications (marked copies) "Land-Grant Colleges, 1925" and "Federal Laws and Rulings Affecting Land-Grant Colleges." The former shows the division of the Morrill-Nelson funds between institutions for white and colored students (p. 59); the actual funds are shown on page 36 (white) and page 69 (colored). The latter publication (pp. 5–10) gives the Morrill-Nelson Act in full with rulings.

Information on other Federal funds appropriated for the land-grant colleges should be obtained from the departments which supervise the expenditures. The Smith-Hughes funds are in charge of the Federal Board for Vocational Education and the Hatch-Adams, Smith-Lever, and other funds are controlled by the Department of Agriculture.

Cordially yours,

JNO. J. TIGERT, *Commissioner.*

It will be observed from reading the statistics furnished by the Bureau of Education that instead of $3,759,742 being received by southern colleges and universities through the Department of the Interior, as alleged by Doctor Durkee, only $550,000 is annually received by colleges and universities in the 11 Southern States in which the bulk of the Nation's colored population resides, of which $204,990.18 is allocated to negro institutions, instead of only $150,000 out of nearly $4,000,000, as charged. If Missouri, Kentucky, and Maryland are included, the proportion allocated to negro institutions is $225,365.18 out of a total of $700,000. It will be observed that the 11 Southern States referred to have a total white population according to the statistics submitted by the gentleman from Michigan [Mr. CRAMTON] of 17,029,013, and a total colored population of 8,055,760. The colored population is approximately 32 per cent of the total; the colored institutions are allotted approximately 37 per cent of Federal funds appropriated for educational purposes through the Department of the Interior, so the charge of discrimination made before the committee against Southern States in the allocation of educational funds received through that department falls to the ground.

The representatives of Howard University, abandoning as it seems the position taken by Doctor Durkee, have furnished to Members of Congress, or at least to the members of the Committee on Education, certain alleged statistics which do not purport to relate only to Federal funds for educational purposes disbursed through the Department of the Interior, but to the distribution "of Federal and State funds for four-year collegiate education and the relation of the distribution to the population in 17 States having separate schools for white and negro students." As a part of the document so furnished are included tables of alleged statistics with reference to three particular States, Georgia, Louisiana, and Mississippi, these negroes having apparently selected these States for attack by reason of the fact that the minority report on H. R. 279 is signed by Representatives from these States, the gentleman from Mississippi, Doctor LOWREY, the gentleman from Louisiana [Mr. DE ROUEN], and myself.

The gentleman from Michigan [Mr. CRAMTON] in inserting in the RECORD the statistics so furnished him omitted, for reasons with which I am not familiar, the tables dealing particularly with Louisiana and with Georgia. It is apparent, however, that the entire procedure of the preparation of the statistics has been intended to justify the pending legislation upon the theory that Federal funds appropriated to the States for educational purposes are improperly allocated as between the races in the South, and it is with the particular purpose of refuting this charge, rather than to discuss the merits and demerits of H. R. 279, that I am inserting this matter in the RECORD.

An examination of the figures inserted by Doctor Durkee in the committee hearings in 1926, to which I have heretofore referred, in view of their palpable fallacy, ought to have discouraged the gentleman from Michigan [Mr. CRAMTON] from inserting the new tables of statistics now relied upon. The source of information upon which he relies, Howard University itself, is necessarily prejudiced in the matter; and fairness, it seems, would have required that he verify the information thus procured from interested parties before inserting it in the CONGRESSIONAL RECORD, where it stands as an unjustified assault upon the South in the matter of allocating Federal funds received for educational purposes.

In discussing briefly the table appearing on page 3711 of the RECORD, it should be noted at the outset that there are no funds appropriated by the Federal Government to the States designated "for four-year collegiate education," the language used in describing the table. It should be remembered in the same connection that representatives of Howard University before the committee in 1926 stressed the function of that institution in affording professional training to negroes and that nowhere is there a Federal dollar available to the States for the professional education of whites. Since we are referring to annual appropriations, the provisions of the Morrill Act of July 2, 1862, are not involved; but from the pioneer educational act of the National Congress provided that the funds thereby provided should be devoted—

to the endowment, support, and maintenance of at least one college, where the leading object shall be, without excluding other scientific and classical studies, and including military tactics, to teach such branches of learning as are related to agriculture and the mechanic arts. (See code, title 7, section 304.)

The next legislation making Federal appropriations to the States for educational purposes was the act approved August 30, 1890, as amended March 4, 1907, known as the Morrill-Nelson Act. It authorizes the appropriation annually to each State and Territory of $50,000—

to be applied only to instruction in agriculture, the mechanic arts, the English language, and the various branches of mathematical, physical, natural, and economic science, with special reference to their application in the industries of life. (See code, title 7, sec. 321.)

The Smith-Hughes Act of February 23, 1917, authorizes annual appropriations totaling $6,000,000, administered by the Federal Board for Vocational Education—

for the purpose of cooperating with the States in paying the salaries of teachers, supervisors, or directors of agricultural subjects, and teachers of trade, home economics, and industrial subjects, etc. (See code, title 20, sec. 11.)

An appropriation of $1,000,000 per year, administered by the Federal Board for Vocational Education, is authorized under the civilian rehabilitation act, approved June 5, 1924—

for the promotion of vocational rehabilitation of persons disabled in industry. (See code, title 29, sec. 31.)

Agricultural extension work is provided for in the act approved May 8, 1914, on that subject, under the direction of the Department of Agriculture, and—

no portion of said moneys shall be applied, directly or indirectly, to * * * college-course teaching, lectures in colleges, etc.—

But to—

giving of instruction and practical demonstrations in agriculture and home economics to persons not attending or resident in said colleges. (See code, title 7, secs. 342, 345.)

If there is any other Federal appropriation to the States which might by any stretch of the imagination be denominated a fund for "higher education," it is that providing for agricultural experiment stations under direction of agricultural colleges; but Georgia's part of this, by express provision of the law itself, is paid, not to any college, but to the Georgia Experiment Station. (Code, title 7, sec. 383.)

Of what appropriations then is the $571,296 made up, which it is claimed in these erroneous statistics, inserted in the RECORD by the gentleman from Michigan [Mr. CRAMTON], is received by my State of Georgia (presumably annually, since no other time limit is given), "for four-year collegiate education," of which, it is claimed, negroes receive the benefit of only $19,667? It may be presumed that $50,000 of it is represented by the appropriations received under the Morrill-Nelson Act, "for instruction in agriculture and the mechanic arts," of which one-third is allotted to negro institutions, or $16,666.67. Let us

next suppose that the Howard University statisticians have included in the total, appropriations made under the Smith-Hughes Act for vocational education. This fund is administered by the State board for vocational education, whose plans must be approved by the Federal Board for Vocational Education, who presumably have done their duty in seeing to it that the Negro race has not been discriminated against. The opportunities provided by the fund are not in the nature of "four-year collegiate education." However, construing it as properly coming in the table inserted in the RECORD, what are the facts with regard to it?

The amount received last year by Georgia was $194,469.14. (See 11th Ann. Rept., Federal Board for Vocational Education, p. 40, table 9.)

During the year which closed June 30, 1926, the Georgia State Board for Vocational Education cooperated with 117 schools in maintaining departments of vocational agriculture. Of this number, 71 were high schools, 10 district agricultural and mechanics schools, and 35 negro schools. In these schools 137 teachers of vocational agriculture were employed whose salaries were paid in part from Smith-Hughes funds. * * * These teachers gave systematic instruction in all phases of practical agriculture to 4,956 pupils. Of this number * * * 1,184 were enrolled in the negro schools. (9th Ann. Rept., Ga. State Board for Vocational Education, p. 3.)

Why, if Georgia is to be charged with the reception of the Smith-Hughes fund for purposes of "four-year collegiate education" and "higher education" in arriving at the total of $571,296, is she not given credit in the table inserted in the RECORD by Mr. CRAMTON for the portion of these funds used in maintaining vocational agricultural instruction in the 35 negro schools out of the total of 117? If there is a seeming discrepancy in the number of negro students as compared with whites in the schools in question, it may easily be accounted for by the failure of the negro to interest himself in vocational education to the same extent as the whites. At any rate, no credit is given to Georgia in the statistical table referred to for the part of this fund expended for negroes; which might be fair enough, since that table purports to relate only to "four-year collegiate education," were it not apparent that the statistician, from some such sources as the Smith-Hughes fund for vocational education, must have procured the amounts necessary to pad the $50,000 received by Georgia under the Morrill-Nelson Act up to the $571,296 which she is charged in the table referred to with having received from the Federal Government for higher educational purposes. If charged in the table with having received it for the purposes mentioned, why not give her credit for the part of it spent on the Negro race, instead of, in effect, denying that she expended any of it for negro education?

Let us next, in an effort to get the amount received by Georgia from the Federal Government for "four-year collegiate education" up to the sum mentioned in the alleged statistics inserted in the record, suppose that the statistician considered that Federal appropriations made under the Smith-Bankhead, or civilian rehabilitation act, should be counted a part of the higher educational appropriations. If so, the sum received by Georgia last year under this act was $16,657.94. (See 11th Ann. Rep., Federal Board for Vocational Education, p. 62.) This fund, as that received under the Smith-Hughes Act, is administered by the Federal and State boards for vocational education. It is used for training and placing in employment those who are disabled from accident, disease, or from congenital conditions.

Call it higher education if you will. Its purpose is high enough. Never has there been any charge in my State that negroes have been discriminated against in the administration of this fund. Many negroes have been aided by it. The picture of one of them, a hopeless cripple for life who was taught a trade by which he might earn a living, is published on page 59 of the ninth annual report of the Georgia State Board for Vocational Education as an illustration of their work. And yet, if Georgia is charged with the Smith-Bankhead fund in making up the total of $571,296 in the statistics inserted in the record as received by her for "four-year collegiate education," she is given no credit for the use of any part of the fund for the Negro race.

The appropriations which I have detailed as to amount make a total to Georgia from the Federal Government for the last fiscal year of $261,127.08. Where the remainder of the $571,296 is supposed to have come from I have no means of knowing, nor do I, as a matter of fact, know the Morrill-Nelson, Smith-Hughes, and Smith-Bankhead funds are included in that total. The statistician is conveniently silent as to what particular funds he is referring to. But when he says that Georgia received for "four-year collegiate education" from the Federal Government $571,296, and that of this amount only $19,667 was received by negroes, he makes an unjust assault upon my State as a basis for asking an illegal and unconstitutional appropriation from Congress for the higher education, and especially professional education, of negroes. Had he said that of the $50,000 Morrill-Nelson fund, Georgia allocates $16,666.67 to the negroes, he would have been correct.

It is difficult to conceive, that, by a wild stretch of the imagination, the statistician may have included in the total mentioned by him appropriations handled by the Department of Agriculture for agricultural extension work and the Georgia Experiment Station. None of that money is spent in affording education in any college.

If it has been included in the total charged to Georgia "for four-year collegiate education," it is only necessary to point out that this money is spent in practical demonstration work among the negroes as well as the whites, and there is no way of figuring out just how much goes for the benefit of one race and how much for the other. But that is no reason for charging the State with having received it for purposes of "higher education" and having devoted all of it to whites to the exclusion of the negro.

I have discussed the table inserted by Mr. CRAMTON in so far as it relates to Federal funds received by Georgia for "four-year collegiate" or "higher educational" purposes, and the allocation of such funds as between the races. I have not discussed other items in the table, including statistics relating to other States, which I have not studied but which I have no doubt are equally fallacious with those I have discussed, and with the statistics heretofore referred to as having been submitted by Doctor Durkee at committee hearings in 1926. It may be that in view of the fact that the Howard University appropriation has been made again, as it has been for 49 years, some gentleman may wonder why I go to the trouble to insert in the RECORD with such detail the facts relating to this matter. May I say in explanation, if any be necessary, that there is too often a disposition among gentlemen to accept alleged statistics, tabulated by alleged authorities, at their face value, just as the gentleman from Michigan [Mr. CRAMTON] did in this case. I feel sure he made little or no investigation of the matter or he would not have inserted the table in the RECORD containing, as it does, an inferential, unwarranted charge against my State; and I consider it my duty, in so far as I am able, to have the true facts appear. In addition to this, there is soon to be voted on by the House H. R. 279, which proposes to legalize future appropriations to Howard University, and the gentleman from Michigan [Mr. CRAMTON] in inserting this table made reference to that fact and invited reference to the table in the same connection.

If gentlemen of the House see fit to legalize appropriations to a negro university not even under public supervision or control for the higher education, and particularly the professional education of negroes, when not a single Federal dollar is available for the professional education of whites in the various States, I can only register my objection; but I am determined that it shall not be done on the theory that Southern States, and especially my own State, treat the negro unjustly in the distribution of Federal funds received for educational purposes—at least without the true facts being made to appear.

Howard University does not even serve a nation-wide need of the Negro race so much as it serves a local need. Referring to the table inserted in the record of hearings had during the Sixty-ninth Congress, on page 15, it appears that of a total of 2,032 students, 1,952 were residents of the United States, and that of this number 598 were residents of the District of Columbia and 521 were residents of the States of Maryland, New Jersey, Pennsylvania, and Virginia, making a total of 1,119, or more than one-half, who came from a territory either comprised in or within a short distance of the District of Columbia. Ten Southern States, where the bulk of the negro population in this country resides, excluding Virginia, furnished only 395 students.

In this country there are 7,000,000 adults who can neither read nor write, and millions of children growing up to comprise part of the same class unless vigorous action is taken for their relief. I am unwilling to neglect them and at the same time vote to make appropriations not authorized by law for the professional education of negroes residing largely in and close around the District of Columbia.

STATEMENTS OF BELGIAN AMBASSADOR, EX-SENATOR LENROOT, LONDON TIMES, AND OTHERS DEALING WITH CHANG-YEN-MAO SUIT

Mr. FREE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD in regard to certain statements appearing on page 3664 of the CONGRESSIONAL RECORD, and following, of date of February 28.

The SPEAKER pro tempore. The gentleman from California asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. FREE. Mr. Speaker, there having appeared in the CONGRESSIONAL RECORD, of February 28, certain statements about which misunderstanding might arise with regard to Secretary Hoover's connection with a lawsuit involving certain Chinese mining properties, I felt it my duty, as Representative of Mr. Hoover's district in the Congress to make a statement with regard to the matter.

Realizing that former Senator Lenroot had occasion some time ago to investigate this case thoroughly, I asked him to address a letter to me fully explaining Mr. Hoover's connection with this matter. I herewith submit Senator Lenroot's reply, together with statements made by the Belgian ambassador and others.

These fully dispose of the matter, and I wish to add my own feeling of indignation at this sort of infamous and slanderous politics.

Senator Lenroot's letter to me is as follows:

FEBRUARY 29, 1928.

Hon. ARTHUR M. FREE,

House of Representatives, Washington, D. C.

MY DEAR MR. FREE: I am glad to respond to your inquiry about Mr. Hoover in connection with a Chinese foreign lawsuit concerning events of 28 years ago which is mentioned in the CONGRESSIONAL RECORD of February 28.

In view of the whispering slanders on this subject, some of Mr. Hoover's friends some time since asked that I make an independent investigation of this subject through the examination of the entire record. I have examined the reports of the evidence and the judgment in this lawsuit. I am able to say categorically that neither the evidence nor the judgment reflect on the character or integrity of Mr. Hoover.

On the contrary, his connection with the matter was honorable in every way and it was largely upon his testimony that the Chinese were restored to their rights.

Mr. Hoover had signed certain contracts as an agent of others at the request of all parties, but the suit was not directed at him; he was not a defendant, but a witness. There was absolutely no judgment against Mr. Hoover rendered at any time.

An examination of the actual issues in the case shows that even had he been a defendant the actual lawsuit offers no basis for criticism against him.

The suit involved a contract between Chinese, Belgian, English, and German interests growing out of a reorganization of a Chinese industrial concern in financial difficulties, and was brought in the English court. The contracts were negotiated by agents of their respective nationalities, with the assistance of the Belgian and other legations in China. Mr. Hoover was engaged as an engineer, and later, for a short time, the manager. The real question in the case was as to the binding effect of a certain memorandum signed by Mr. Hoover as agent of one of the parties together with other agents, it being provided in said memorandum made at the time of the reorganization, that a Chinese board was to participate in the management of the company and the former Chinese director general was to continue. During Mr. Hoover's administration the contract was complied with, although difficulties arose over custody of title deeds which Mr. Hoover insisted on having placed in care of a bank, in the name of the company for the protection of all parties.

Some eight or nine months after the reorganization was completed a change of stockholders' control took place. Mr. Hoover retired from the concern as manager, and the group which came into control then repudiated a portion of the contract made under the reorganization by ignoring the Chinese local board of directors. Out of the change in control a bitter quarrel grew up amongst the diverse national interests. But when the issues were finally drawn it became simply a question as to whether or not the said supplemental memorandum was to be carried out. The Chinese complainants in bringing their action naturally asked as an alternative that the original contracts be rescinded and certain properties in the reorganization be restored.

The judgment declared the memorandum to be valid and binding, dismissed all other questions except as to damages for breach of the contract, and, upon appeal, even this was dismissed as to the concern for which Mr. Hoover had acted as agent.

The case was of considerable public interest at the time and was carefully reviewed editorially in the London Times of March 2, 1905. The Times summary of the actual issues is in accord with the above. Incidentally this review does not even mention Mr. Hoover.

Unprincipled persons circulated slanderous stories on this subject a few years ago. They were investigated by an eminent firm of lawyers and exploded at that time, and now they are picked up out of the gutter for use in the present campaign. At the time Baron de Cartier, the Belgian ambassador to the United States, who at the time of the reorganization mentioned represented Belgian interests, wrote a letter vigorously denouncing these slanders upon Mr. Hoover, as did likewise the chairman of the company and various lawyers in the case. I append these statements hereto.

Sincerely yours,

IRVINE L. LENROOT.

---

113 EAST SEVENTY-THIRD STREET,

New York City, December 15, 1927.

DEAR SIR: It is now over five years since some of Mr. Hoover's friends consulted me as to the best way to smoke out and punish the unknown person or persons responsible for the political whispering campaign of slander concerning his connection with the Chang Yen Mao lawsuit decided in the English courts over 20 years ago. As I advised at that time these vague insinuations hardly seemed worthy of attention, but nevertheless, at their request to my firm, then Perkins & Train, we undertook to ascertain, if possible, who was responsible for these malicious misstatements, to review the entire evidence in a litigation nearly a quarter of a century old and in which most of the litigants and attorneys were dead, and to bring the guilty parties to book by instituting both civil and criminal proceedings against them. We were unable to trace the origin of these slanders for no one had the temerity to stand up and publicly repeat the falsehoods.

Upon their recrudescence we again took up the matter, and on this occasion we communicated with all those still alive who were in any way conversant with the facts, that we might be prepared to deal with such persons if we could find them.

The outstanding fact is that Mr. Hoover was not even named as a defendant in this lawsuit—his relation being that of a witness upon whose testimony the plaintiff won his case for restitution to the office as a director, and the absurdity of these charges is that all the defendants, even after the loss of the case, have remained Mr. Hoover's friends ever since.

It might be of service if I should review the whole matter as we found it to be.

The litigation which has been made the basis of the totally unwarranted attack on Mr. Hoover arose out of a quarrel between four different groups of stock and bondholders in a coal-mining enterprise in China, of which he was at the age of 24 the engineer and for a few months the general manager. Of these different groups one combined certain Chinese and German interests and there were two separate British groups and a Belgian group, all having diverse interests.

In 1900, as a result of the Boxer disturbances, the property, which had never been very successful, was greatly damaged by the war, and the properties were seized by the Japanese, German, and Russian Governments and occupied by their troops. The interest upon the bonds was defaulted and the creditors threatened to take the property.

Mr. Hoover had been in China for about a year previously, acting as engineer for the Chinese Government, was familiar with the property and acquainted with some of the parties concerned. His engagement having been terminated by the flight of the Chinese Government, he was about to leave China to accept other employment when Mr. Detring with the cooperation of Chang, both of them realizing the potential value of the mines and being anxious to save the property, asked him to convey certain written authorization to the London representatives of the bondholders, with a view to their interesting new foreign capital and reorganizing and recovering the property from seizure.

The plan was duly undertaken, the reorganization took place, and Mr. Hoover was sent back to China as engineer to the mines. An English lawyer and a Belgian lawyer, each representing the interests of his own countrymen, were sent to Tientsin to carry out the reorganization, with which Mr. Hoover was to have nothing to do. The transfer of the assets of the original company to the new company occurred in February, 1901, at which time two instruments were executed, one a conveyance of the assets, and the other a separate "memorandum" providing for the proper representation of the Chinese in the management. Mr. Hoover signed this memorandum as agent at the request of one of the principals. Chang was given the post of director general, and a local board of directors on which the Chinese were duly represented was instituted, as provided in the memorandum, while Mr. Hoover continued for some months as manager. The Belgian interest soon after obtained control of the management, and Mr. Hoover resigned and returned to the United States.

The Belgians, after Mr. Hoover's departure, finding that they were impeded in their work by the interference of the Chinese officials, simply brushed them aside and repudiated the memorandum and the Chinese, naturally aggrieved, sent Chang to London to compel the company to recognize the memorandum and carry out its terms by which their interests were guaranteed.

The parties to the action in chancery were Chang Yen Mao and the old Chinese company, plaintiffs, versus the Moreing group and The Chinese Engineering & Mining Co. (Ltd.), controlled by the Belgian and Turner British groups as defendants. Mr. Hoover was not even a defendant in the action. The plaintiffs asked that the court declare the memorandum binding upon the defendant (the reorganized) com-

pany, or in the alternative that the conveyance of the property should be set aside with a general claim for damages. At the trial, which took place in February, 1905, Mr. Hoover was an important, if not the most important, witness, and largely by virtue of his testimony the Chinese were able to establish their contentions.

He testified explicitly that he had no idea that the memorandum would ever be questioned, that he had always insisted that it be carried out, that it had been carried out at all times while he was connected with the management, and the result of the litigation was that the court held the memorandum valid, as Mr. Hoover had always contended, and stayed all proceedings save those against the corporation defendant, holding that it alone could be held responsible for damages if any had been occasioned by the refusal of the Belgians to recognize the terms of the memorandum in China. There was obviously no judgment against Mr. Hoover.

There was nothing in the testimony reflecting upon Mr. Hoover's conduct in any way, it was through his lips that the plaintiffs substantiated their claim, and to suggest that he could possibly be responsible for a breach of contract arising after he had left the employ of the corporation is a wanton defamation.

These various groups continued four-corner quarrels over financial questions until they finally settled matters among themselves, in which Mr. Hoover had no part whatever.

As Mr. Hoover's personal honor was involved we felt that it would not be regarded as overzealous to secure assurances from those still surviving who had personal knowledge of the matter, and among them is the following letter from his excellency, the Belgian ambassador:

AUGUST 29, 1917.

DEAR HOOVER: I have been astonished to hear mis-statements with regard to your connection with the Chinese Engineering & Mining Co., which operated in the Kaiping mines during the period when I was Belgian Chargé d'Affaires in China. As such I looked after the very large Belgian interests in that enterprise and had personal knowledge of all the facts relating to the transfer of the property, some of which led subsequently to litigation in the English courts. Throughout your administration of the company's affairs, both as chief engineer and as director, you acted concededly for the best interest of all the stockholders, Chinese, Belgian, and English alike, with the highest sense of honor, and the termination of the litigation was a complete vindication of your conduct and largely turned upon your testimony. The best proof of this lies in the fact that the Belgians interested in these properties were the very men who called upon you to come to the assistance of their country in its extremity.

Very sincerely yours, E. de CARTIER.

The significance of the letter which follows is obvious from the fact that Mr. Hoover testified against the interests of the corporation of which the signer was the chairman of the board of directors:

22, AUSTIN FRIARS,
London, E. C., 2, April 18, 1923.

DEAR SIR: Referring to our interview to-day on the subject of Mr. Herbert C. Hoover's connection with the affairs of the Chinese Engineering & Mining Co. (Ltd.), which was formed in the year 1901, and the litigation in the years 1905 and 1906 arising out of it at the instance of the late Chang Yen Mao, I repeat what I then stated, viz, that I have been intimately acquainted with these matters from their inception, having been a director of the original company and being chairman of the board of directors of the present company, which was formed in 1912, and I am able to say that there is no ground for any suggestion that Mr. Hoover's conduct in relation to the matters in question has been other than of a perfectly honourable character. You are at liberty to make use of this letter in any way that you may please.

Yours faithfully,

W. F. TURNER.

The following letter is from the only surviving barrister in the case:

8, OLD SQUARE,
Lincoln's Inn, W. C., May 1, 1923.

DEAR SIR: With regard to the litigation between Chang Yen Mao and the Chinese Engineering Co. and Messrs. Bewick Moreing & Co., I was one of the counsel in the case.

The case was tried so many years ago that I can not profess to have any recollection of the details of the case, but so far as my recollection goes there was no evidence in that case which in any way reflects on the honour or integrity of Mr. Herbert C. Hoover.

I am yours faithfully,

T. R. HUGHES.

The only persons in a position to complain of Mr. Hoover's conduct or testimony in the case were the British and Belgian groups against whom his testimony lay. Yet these same British groups all of them engaged his engineering services in after years, and the Belgian group were identical men who appealed to him to undertake the relief of Belgium upon which they intrusted their lives and their own enormous contributions implicitly.

In conclusion, permit me to say that, were it not for the possible misrepresentation of this matter as filthy political defamation, it would be difficult for me to see why there was any necessity for engaging the services of my firm for the purpose of reviewing his part in this long-defunct litigation, where the ensuing operations were carried on with great profit for many years to the satisfaction of the Chinese and Europeans alike, and whereby his positive and disinterested testimony assisted in procuring justice for all parties concerned.

Faithfully yours,

ARTHUR C. TRAIN.

DEAR SIR: I have just heard to my intense surprise that some kind of an attack has been made on Mr. Hoover in the United States of America, suggesting that it was shown in the course of the lawsuit brought by Chang Yen Mao in connection with the Chinese Engineering & Mining Co. (Ltd.), that he had in some way acted improperly. This allegation is entirely unfounded.

His opponents, whoever they are, seem to have gone a long way back for this invention, considering that this refers to matters of 27 years ago. I had the conduct of the case on behalf of one of the defendants in the action, so I know all about it and have refreshed my memory by referring to the papers.

The action was brought to secure the compliance with certain agreements, chiefly the reinstatement of Chang Yen Mao as head of the Chinese board of directors. Mr. Hoover was not a party to this action—his only connection with it was as a witness.

The plaintiff claimed that he had transferred the mining property in question to the defendant company in a creditors reorganization on the faith of the provisions of a written memorandum dated February 19, 1901, which has reference, among other things, to the constitution and the board of directors of the company, and which had been signed by Chang and one of his associates named Detring and by agents of European principals. Mr. Hoover being present was asked to sign this memorandum. The main question in the action was as to whether this memorandum was binding upon the company and my clients; and as an alternative plea the plaintiff asked that if it was held not to be so binding the transfer of the property should be set aside on the ground that it had been represented to him that this memorandum was binding, and it was only in this legal sense that it was suggested that there had been any complaint.

As a matter of fact, it was proved by the evidence at the trial that this memorandum had been prepared by the Chevalier de Wouters and a Mr. White Cooper, an English solicitor representing the bondholders and reorganizers of the company with the assistance of Chang's representative, Mr. Detring, and Mr. Eames, an English barrister.

The sworn evidence Mr. Hoover gave on the subject was to the effect that this memorandum was binding and he insisted that it should be carried out, and that it was so carried out during the short time he was engaged on the property; that its repudiation was due to a subsequent change in control, the succeeding managers complaining of interference by the Chinese in proper management. Similar evidence was given by other witnesses.

It was made perfectly clear that in the opinion of all parties at the time that it was perfectly binding.

Before the trial took place there had been some question as to whether the company could give effect to some of the provisions of this memorandum which related to the management of the company, but in the course of the trial it was conceded by all the defendants that the document was in every way binding upon the defendants. Any charge therefore at once fell to the ground.

Now, this is what the judge (Mr. Justice Joyce) said about it in the course of giving judgments:

"Now, His Excellency Chang declined to execute the transfer because it did not contain any statement of the arrangements for which he had stipulated with respect to, amongst other things, the constitution and management of the new company into which the Chinese company was to be transformed * * *. Ultimately His Excellency was induced with difficulty to accede to a proposal of Mr. White Cooper that the terms, on account of the absence of which from the transfer he declined to execute, should be embodied in another document, being the memorandum I have already spoken of to be executed at the same time as the transfer.

"Under this arrangement His Excellency was assured by the representatives of the other parties to the transaction that the memorandum was, as it was expressed to be, the ruling document, and to be acted upon, or in other words, would be binding and would be carried into effect. It was upon the faith of and reliance upon these assurances that His Excellency was induced to affix his seal to the two versions of the transfer. Mr. White Cooper, a member of a firm of English solicitors, who acted for the European principals, prepared the draft of the transfer as also the memorandum and he attested their execution."

In the course of his judgment the judge went on to say:

"The memorandum is now, I may almost say admittedly, binding, as indeed it always was," and an order of the court was accordingly drawn up containing a declaration to that effect.

The case was appealed by the defendants upon question of costs, etc., and the previous judgment considerably modified in favor of the defendants; and the claim against my clients for damages was dis-

missed; but, as I said before, that was not a matter in which Mr. Hoover was concerned.

Some criticism was raised as to the forcible possession of certain bearer-title deeds at Mr. Hoover's direction when manager. As a matter of fact, these deeds were not taken by force but were rescued from corrupt use by certain Chinese officials and placed in a foreign bank and in escrow for all parties; there was absolutely nothing in it—except loyalty to the concern.

I am afraid that you will find this rather a long letter, but I have thought it best—even at the expense of brevity—to give chapter and verse for my statements, which should, in case of need, once and for all establish the preposterous character of the unwarranted insinuations which have been made against Mr. Hoover, and that there was nothing in the proceedings which in any way reflected upon his integrity or honor—quite to the contrary.

Yours sincerely,

HARRY G. ABRAHAMS,
Michael Abrahams Sons & Co.

LONDON, ENGLAND.

[Extract from London Times editorial, March 2, 1905]

Stripped of details, the point at issue in the action was simple. Chang-Yen-Mao was director general of a Chinese company formed in 1882 to work certain mines in the Provinces of Chi-li and Jehol. Fresh capital was required for the undertaking, and Mr. Detring, a German, who was a commissioner of customs in China and also a director of the company, was authorized to take measures to raise the necessary capital. He put himself in communication with the defendants, Moreing & Co., and the result was that by a conveyance of February 19, 1901, all the property of the plaintiff company was transferred to the defendant company. The contention of the plaintiff was that this transfer was executed upon the express condition that a memorandum of even date should be executed, and should be binding upon the new company. One of the conditions was that the shareholders, Chinese and foreign alike, should have equal votes; that the company should be managed by two boards, English and Chinese; that Chang-Yen-Mao should continue to be director general; and that the Chinese board should manage the property of the company in China. These provisions, it was said, had not been carried out. The new company refused to recognize them. The Chinese board was powerless; a manager was sent out who said he knew nothing of the memorandum; and the official business of the company was not transacted at Tientsin. The plaintiff sought a declaration that the terms of the memorandum were binding upon the company or that the deed of transfer should be set aside.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed without amendment a bill and a joint and concurrent resolution of the House of the following titles:

H. R. 8227. An act authorizing the Sunbury Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Susquehanna River at or near Bainbridge Street, in the city of Sunbury, Pa.;

H. J. Res. 141. Joint resolution to authorize the President to invite the Government of Great Britain to participate in the celebration of the sesquicentennial of the discovery of the Hawaiian Islands, and to provide for the participation of the Government of the United States therein; and

H. Con. Res. 25. Authorizing the Clerk of the House of Representatives to make certain changes in the engrossed copy of the bill (H. R. 10635) entitled "An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1929, and for other purposes."

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the amendments of the Senate Nos. 12 and 46 to the bill (H. R. 9136) entitled "An act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1929, and for other purposes."

ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 121. An act authorizing the Cairo Association of Commerce, its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Cairo, Ill; and

H. R. 5679. An act authorizing the Nebraska-Iowa Bridge Corporation, a Delaware corporation, its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River between Washington County, Nebr., and Harrison County, Iowa.

ADJOURNMENT

Mr. DICKINSON of Iowa. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 3 minutes p. m.) the House adjourned until to-morrow, Thursday, March 1, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Thursday, March 1, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

Navy Department appropriation bill.

COMMITTEE ON AGRICULTURE

(10 a. m.)

To insure adequate supplies of timber and other forest products for the people of the United States, to promote the full use for timber growing and other purposes of forest lands in the United States, including farm wood lots and those abandoned farm areas not suitable for agricultural production, and to secure the correlation and the most economical conduct of forest research in the Department of Agriculture, through research in reforestation, timber growing, protection, utilization, forest economics, and related subjects (H. R. 6091).

COMMITTEE ON WORLD WAR VETERANS' LEGISLATION

(10 a. m.)

To amend the World War veterans' act, 1924 (H. R. 10160).

COMMITTEE ON THE MERCHANT MARINE AND FISHERIES

(10 a. m.)

To further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States (S. 744).

To promote, encourage, and develop an American merchant marine in connection with the agricultural and industrial commerce of the United States, provide for the national defense, the transportation of foreign mails, the establishment of a merchant-marine training school, and for other purposes (H. R. 2).

To amend the merchant marine act of 1920, insure a permanent passenger and cargo service in the North Atlantic, and for other purposes (H. R. 8914).

To create, develop, and maintain a privately owned American merchant marine adequate to serve trade routes essential in the movement of the industrial and agricultural products of the United States and to meet the requirements of the commerce of the United States; to provide for the transportation of the foreign mails of the United States in vessels of the United States; to provide naval and military auxiliaries; and for other purposes (H. R. 10765).

COMMITTEE ON IMMIGRATION AND NATURALIZATION

(10.30 a. m.)

To amend the immigration act of 1924 by making the quota provisions thereof applicable to Mexico, Cuba, Canada, and the other countries of continental America and adjacent islands (H. R. 6465).

COMMITTEE ON THE POST OFFICE AND POST ROADS

(10 a. m.)

To amend Title II of an act approved February 28, 1925, regulating postal rates (H. R. 9296).

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. DICKINSON of Iowa: Committee on Appropriations. H. R. 11577. A bill making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes; without amendment (Rept. No. 789). Referred to the Committee of the Whole House on the state of the Union.

Mr. BURTON: Committee on Foreign Affairs. H. R. 10167. A bill to authorize the President to accept the invitation of the Cuban Government to appoint delegates to the Second International Emigration and Immigration Conference to be held at Habana, commencing March 31, 1928; without amendment (Rept. No. 790). Referred to the Committee of the Whole House on the state of the Union.

Mr. BURTON: Committee on Foreign Affairs. H. J. Res. 211. A joint resolution to amend public Resolution 65, approved March 3, 1925, authorizing the participation of the United States

Government in the International Exposition to be held in Seville, Spain; without amendment (Rept. No. 791). Referred to the House Calendar.

Mr. KNUTSON: Committee on Pensions. H. R. 10479. A bill granting double pensions to dependents under existing pension laws in all cases where an officer, warrant officer, or enlisted man or student flyer of the United States Army dies or is disabled due to aircraft accident; with amendment (Rept. No. 792). Referred to the Committee of the Whole House on the state of the Union.

Mr. FISHER: Committee on Military Affairs. H. R. 11134. A bill to authorize appropriations for construction at military posts, and for other purposes; with amendment (Rept. No. 793). Referred to the Committee of the Whole House on the state of the Union.

Mr. HAUGEN: Committee on Agriculture. H. R. 10374. A bill for the acquisition of lands for an addition to the Beal Nursery at East Tawas, Mich.; with amendment (Rept. No. 798). Referred to the Committee of the Whole House on the state of the Union.

Mr. HAUGEN: Committee on Agriculture. H. R. 11074. A bill to promote the agriculture of the United States by expanding in the foreign field the service now rendered by the United States Department of Agriculture in acquiring and diffusing useful information regarding agriculture, and for other purposes; without amendment (Rept. No. 799). Referred to the Committee of the Whole House on the state of the Union.

Mr. WHITE of Maine: Committee on the Merchant Marine and Fisheries. S. 2317. An act continuing for one year the powers and authority of the Federal Radio Commission under the radio act of 1927; with amendment (Rept. No. 800). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. FROTHINGHAM: Committee on Military Affairs. H. R. 4653. A bill for the relief of Virgil W. Roberts; without amendment (Rept. No. 794). Referred to the Committee of the Whole House.

Mr. FROTHINGHAM: Committee on Military Affairs. H. R. 4935. A bill to authorize the appointment of First Lieut. Clarence E. Burt, retired, to the grade of major, retired, in the United States Army; with amendment (Rept. No. 795). Referred to the Committee of the Whole House.

Mr. FURLOW: Committee on Military Affairs. H. R. 7409. A bill to authorize the appointment of Capt. John J. Campbell, resigned, to the grade of captain, retired, in the United States Army; with amendment (Rept. No. 796). Referred to the Committee of the Whole House.

Mr. JOHNSON of Illinois: Committee on Military Affairs. H. R. 3892. A bill for the relief of George W. Sampson; with amendment (Rept. No. 797). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 11504) granting an increase of pension to Ella M. O'Bryan; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 11452) granting a pension to Mary E. Nix; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 11453) granting a pension to Mrs. Atwood P. Latham; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DICKINSON of Iowa: A bill (H. R. 11577) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes; committed to the Committee of the Whole House on the state of the Union.

By Mr. GARNER of Texas: A bill (H. R. 11578) authorizing the B and P Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Rio Grande at or near Weslaco, Tex.; to the Committee on Interstate and Foreign Commerce.

By Mr. JONES: A bill (H. R. 11579) relating to investigation of new uses of cotton; to the Committee on Agriculture.

By Mr. LEAVITT: A bill (H. R. 11580) to authorize the leasing or sale of land reserved for administrative purposes on the Fort Peck Indian Reservation, Mont.; to the Committee on Indian Affairs.

Also, a bill (H. R. 11581) to extend to the Northern Cheyenne Indians of Montana rights and benefits under certain treaties; to the Committee on Indian Affairs.

Also (by departmental request), a bill (H. R. 11582) to authorize the cancellation of the balance due on a reimbursable agreement for the sale of cattle to certain Rosebud Indians; to the Committee on Indian Affairs.

By Mr. TILLMAN: A bill (H. R. 11583) granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across the White River at Cotter, Ark.; to the Committee on Interstate and Foreign Commerce.

By Mr. BELL: A bill (H. R. 11584) to amend the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920, and acts in amendment thereof, approved July 3, 1926; to the Committee on the Civil Service.

By Mr. BROWNE: A bill (H. R. 11585) to establish fish-cultural station and auxiliary stations at points in the State of Wisconsin; to the Committee on the Merchant Marine and Fisheries.

By Mr. McSWAIN: Joint resolution (H. J. Res. 224) to ascertain which was the first heavier-than-air flying machine; to the Committee on Military Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ASWELL: A bill (H. R. 11586) for the relief of John Callaghan; to the Committee on Claims.

By Mr. BEGG: A bill (H. R. 11587) granting a pension to John Corbin; to the Committee on Pensions.

By Mr. CANFIELD: A bill (H. R. 11588) granting an increase of pension to Sarah E. Baker; to the Committee on Pensions.

By Mr. CROWTHER: A bill (H. R. 11589) granting an increase of pension to Catherine Van De Bogart; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11590) granting an increase of pension to Mary M. Smoke; to the Committee in Invalid Pensions.

By Mr. DICKINSON of Missouri: A bill (H. R. 11591) granting a pension to Sarah E. Hudson; to the Committee on Invalid Pensions.

By Mr. DOWELL: A bill (H. R. 11592) granting a pension to Louisa Siples; to the Committee on Invalid Pensions.

By Mr. DYER: A bill (H. R. 11593) for the relief of Arkla Lumber & Manufacturing Co.; to the Committee on Claims.

Also, a bill (H. R. 11594) for the relief of Eugene J. Spencer; to the Committee on Military Affairs.

By Mr. EVANS of California: A bill (H. R. 11595) granting an increase of pension to Joseph Lightstone; to the Committee on Pensions.

By Mr. HOGG: A bill (H. R. 11596) granting compensation to Bertha M. Freeze; to the Committee on World War Veterans' Legislation.

Also a bill (H. R. 11597) for the relief of Samuel Kelly; to the Committee on Military Affairs.

Also, a bill (H. R. 11598) for the relief of Ulysses G. Vance; to the Committee on Claims.

By Mrs. LANGLEY: A bill (H. R. 11599) for the relief of Frank M. Lyon; to the Committee on War Claims.

By Mr. MOORMAN: A bill (H. R. 11600) granting a pension to Sarah A. Nugent; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11601) granting a pension to Henry G. Day; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11602) granting a pension to Clay Franklin Pack; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11603) granting a pension to Mrs. Carey Brown; to the Committee on Invalid Pensions.

By Mr. MOORE of Virginia (by request): A bill (H. R. 11604) for the relief of J. Linwood Johnson; to the committee on the District of Columbia.

By Mr. MORROW: A bill (H. R. 11605) granting a pension to Charles S. Rawles; to the Committee on Pensions.

By Mr. REECE: A bill (H. R. 11606) granting an increase of pension to Arthur D. Warden; to the Committee on Pensions.

By Mr. REID of Illinois: A bill (H. R. 11607) for the relief of Capt. Roger H. Young; to the Committee on War Claims.

By Mrs. ROGERS: A bill (H. R. 11608) granting a pension to Bridget Fennell; to the Committee on Pensions.

By Mr. SPEAKS: A bill (H. R. 11609) granting an increase of pension to Sarah J. Rhinehart; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11610) granting an increase of pension to Sarah J. McCauley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11611) granting an increase of pension to Margaret Steadman; to the Committee on Invalid Pensions.

By Mr. THURSTON: A bill (H. R. 11612) granting an increase of pension to Eliza E. Patton; to the Committee on Invalid Pensions.

By Mr. WARE: A bill (H. R. 11613) granting an increase of pension to Molly Tarvin; to the Committee on Invalid Pensions.

By Mr. WELSH of Pennsylvania: A bill (H. R. 11614) for the relief of Oliver Ellison; to the Committee on Military Affairs.

By Mr. WILLIAMS of Illinois: A bill (H. R. 11615) granting an increase of pension to Sarah E. Davis; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

4687. By Mr. ARENTZ: Resolution of Lyon County, Nev., Farm Bureau, urging Congress to support Navy plan for construction of an ammunition plant at Hawthorne, Nev.; to the Committee on Naval Affairs.

4688. Also, resolution of Lyon County, Nev., Farm Bureau, urging Congress to support bill introduced by Mr. ARENTZ for appropriation of funds for construction of dam and reservoir on the Schurz (Nev.) Indian Reservation; to the Committee on Indian Affairs.

4689. By Mr. BACHMANN: Petition of Madge Smith and numerous other citizens of McMechen, W. Va., protesting against the Lankford compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

4690. By Mr. BARBOUR: Petition of residents of the seventh congressional district of California, protesting against the Lankford Sunday bill (H. R. 78); to the Committee on the District of Columbia.

4691. Also, telegram of Merced County Council of Parent-Teacher Association, Livingston, Calif., urging passage of Box bill; to the Committee on Immigration and Naturalization.

4692. By Mr. CARTER: Petition of Carl G. Brown, president of the California Society Sons of the American Revolution, urging the passage of legislation increasing the allowance to each soldier of the Reserve Officers' Training Corps to $36; to the Committee on Military Affairs.

4693. By Mr. CROWTHER: Petition of residents of Schenectady, N. Y., against compulsory Sunday observance; to the Committee on the District of Columbia.

4694. By Mr. CULLEN: Resolution of Order Sons of Italy in America, No. 635, Brooklyn, requesting that October 12 be observed as Columbus Day; to the Committee on the Judiciary.

4695. By Mr. CURRY: Petition of citizens of the third California district, against House bill 78; to the Committee on the District of Columbia.

4696. Also, petition of 1,026 citizens of the third California district, protesting against the enactment of House bill 78; to the Committee on the District of Columbia.

4697. By Mr. DEMPSEY: Petition of citizens of Niagara County, N. Y., favoring the Gibson retirement bill (H. R. 7369); to the Committee on the Civil Service.

4698. Also, petition of citizens of Niagara County, N. Y., protesting against Sunday observance bill (H. R. 78); to the Committee of the District of Columbia.

4699. Also, petition of citizens of Pendleton, N. Y., favoring the Lankford Sunday observance bill; to the Committee on the District of Columbia.

4700. By Mr. EVANS of California: Petition of W. I. T. Hoover and approximately 260 others against the Navy program; to the Committee on Naval Affairs.

4701. By Mr. EVANS of Montana: Petition of Anna Solum and other residents of Kalispell, Mont., protesting against the passage of House bill 78, the Lankford Sunday observance bill; to the Committee on the District of Columbia.

4702. Also, petition of J. E. Huff and other residents of Bozeman, Mont., protesting against the passage of House bill 78; to the Committee on the District of Columbia.

4703. By Mr. FENN: Petitions of sundry citizens of Hartford and Southington, Conn., protesting against the passage of House bill 78 or any other bills relating to compulsory Sunday observance; to the Committee on the District of Columbia.

4704. By Mr. ROY G. FITZGERALD: Petition of 29 citizens of Dayton, Ohio, protesting against the passage of House bill 78, making Sunday observance compulsory in the District of Columbia; to the Committee on the District of Columbia.

4705. Also, petition of the New York Young Republican Club, approving House bill 500, for the retirement of disabled emergency Army officers of the World War, and urging that Congress take early action on the same; to the Committee on World War Veterans' Legislation.

4706. Also, petition of 56 citizens of Dayton, Ohio, requesting an increase in pensions for veterans and widows of veterans of the Civil War; to the Committee on Invalid Pensions.

4707. By Mr. FRENCH: Petition of 60 citizens of Weiser, Idaho, protesting against enactment of House bill 78, or any compulsory Sunday observance bill; to the Committee on the District of Columbia.

4708. By Mr. GALLIVAN: Petition of Patrick J. O'Sullivan, 116 West Sixth Street, South Boston, Mass., urging early and favorable consideration of House bill 9502, providing for a 30-day vacation for employees of the Post Office Department; to the Committee on the Post Office and Post Roads.

4709. By Mr. GARBER: Letter of Elizabeth Barnett, 411 East Eleventh Street, Pomona, Calif., in support of Evans bill for Civil War widows; to the Committee on Invalid Pensions.

4710. Also, telegrams of Dr. D. D. McHenry, of Oklahoma City, Okla., and secretary St. Anthony Clinical Society, Oklahoma City, Okla., in support of Robinson amendment to House bill 1; to the Committee on Ways and Means.

4711. Also, letter of J. B. Landers, secretary-manager Industrial Peace Insurance, in opposition to House bill 7759 and Senate bill 1482; to the Committee on the Judiciary.

4712. Also, letter and resolution of Hack Saw Manufacturers Association of America (Inc.), 14 Wall Street, New York, in support of House bill 11, "fair trade act"; to the Committee on Interstate and Foreign Commerce.

4713. Also, letter and resolution of Fraternal Order of Eagles, Wisconsin State Aerie, Neenah, Wis., in support of House bill 4548 and Senate bill 3027, in regard to the retirement of disabled emergency Army officers; to the Committee on Invalid Pensions.

4714. Also, petition of sundry residents of the eighth congressional district, Oklahoma, in protest to the passage of House bill 78, for compulsory Sunday observance; to the Committee on the District of Columbia.

4715. By Mr. HADLEY: Petition of sundry residents of Everett, Wash., and vicinity, protesting against the Lankford Sunday closing bill; to the Committee on the District of Columbia.

4716. Also, petition of sundry residents of Blaine, Wash., protesting against the Lankford Sunday closing bill; to the Committee on the District of Columbia.

4717. By Mr. KETCHAM: Petition of John W. Broxholm and 24 other residents of Hartford, Mich., favoring the passage of House bill 78, the Lankford bill; to the Committee on the District of Columbia.

4718. Also, petition of Nora Green and 44 other residents of Berrien County, Mich., protesting against the passage of House bill 78 or any other bill providing for compulsory Sunday observance; to the Committee on the District of Columbia.

4719. Also, petition of F. M. Thurston and 22 other residents of Sturgis, Mich., favoring the enactment of the Lankford bill (H. R. 78); to the Committee on the District of Columbia.

4720. By Mr. KING: Petition signed by C. J. Hampton, 836 South Henderson Street, Galesburg, Ill., and 25 other citizens of Galesburg, against compulsory Sunday observance; to the Committee on the District of Columbia.

4721. By Mr. LETTS: Petition of Dan MacNeill and sundry other citizens of Davenport, Iowa, protesting against the passage of House bill 78; to the Committee on the District of Columbia.

4722. By Mr. MAJOR of Missouri: Petitions of citizens of Sedalia, Mo., protesting against the passage of the Lankford bill (H. R. 78); to the Committee on the District of Columbia.

4723. By Mr. MEAD: Petition of several employees of United States Steamboat Inspection Service in support of House bill 492; to the Committee on the Civil Service.

4724. By Mr. MORROW: Petition of Club O Ten, Roswell, N. Mex., protesting against enactment of Box bill restricting Mexican immigration; to the Committee on Immigration and Naturalization.

4725. By Mr. O'CONNELL: Petition of the Thurston Fruit Co. (Inc.), New York City, opposing the passage of House bill 10362, to amend the tariff act of 1922, paragraph 770; to the Committee on Ways and Means.

4726. Also, petition of the Street & Smith Corporation, publishers, of New York City, opposing section 611 and requesting that the same be stricken from the proposed revenue act; also requesting that instead of repealing section 612 the same be clarified; to the Committee on Ways and Means.

4727. Also, petition of the North American Water Works Corporation, New York City, favoring the passage of House bill 11026, to provide for the coordination of the public health activities of the Government; to the Committee on Interstate and Foreign Commerce.

4728. Also, petition of the Dixie Post, No. 64, Veterans of Foreign Wars of the United States, National Sanatorium, Tenn., favoring the passage of the Rathbone bill (H. R. 9138); to the Committee on Pensions.

4729. Also, petition of the District of Columbia Federation of Women's Clubs, Washington, D. C., favoring the passage of the Capper-Gibson bills (S. 1907 and H. R. 6664); to the Committee on the District of Columbia.

4730. By Mr. PRALL: Resolution passed by the Friendship Council, No. 44, Junior Order of the American Mechanics of the State of New York (Inc.), Port Richmond, Staten Island, N. Y., received from Frank W. Hugi, recording secretary, relative to 3,000,000 aliens in the United States illegally and unlawfully; to the Committee on Immigration and Naturalization.

4731. By Mr. SANDERS of Texas: Petition of W. M. Stuart and several other citizens of Van Zandt County, Tex., in behalf of the Hudspeth bill to prevent gambling in cotton futures and to make it unlawful for any person, corporation, or association of persons to sell any contract for future delivery of any cotton within the United States, unless such seller is actually the legitimate owner of the cotton so contracted for future delivery at the time said sale or contract is made; to the Committee on Agriculture.

4732. By Mr. SPEAKS: Petition signed by Mr. Samuel E. Keith and some 60 citizens of Franklin County, Ohio, urging that all Civil War widows be granted an allowance of $50 per month; to the Committee on Invalid Pensions.

4733. By Mr. THATCHER: Petition of numerous citizens of Louisville, Ky., protesting against the enactment of compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4734. Also, petition of numerous citizens of Louisville, Ky., protesting against the enactment of compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4735. Also, petition of numerous citizens of Louisville, Ky., protesting against the enactment of compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4736. Also, petition of numerous citizens of Louisville, Ky., protesting against the enactment of compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4737. Also, petition of numerous citizens of Louisville, Ky., protesting against the enactment of compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4738. Also, petition of numerous citizens of Louisville, Ky., protesting against the enactment of compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4739. By Mr. WEAVER: Petition of sundry citizens of Haywood County, N. C., protesting against House bill 78, the Lankford Sunday observance bill; to the Committee on the District of Columbia.

4740. By Mr. WINGO: Petition of certain citizens of Pike County, Ark., indorsing increased pensions for veterans of the Civil War and their widows; to the Committee on Invalid Pensions.

4741. By Mr. WOOD: Protest of M. R. Lowenstine, of Valparaiso, Ind., against the enactment of Senate bill 1572; to the Committee on the Post Office and Post Roads.

4742. Also, petition of sundry citizens of Lake County, Ind., protesting against an increase of the present quotas of immigrants to this country; to the Committee on Immigration and Naturalization.

SENATE

THURSDAY, *March 1, 1928*

The Chaplain, Rev. Z. Barney T. Phillips, D. D., offered the following prayer:

Almighty God, the fountain of all wisdom, who knowest our necessities before we ask and our ignorance in asking, have compassion, we beseech Thee, upon our infirmities, strengthen us, we pray Thee, with Thy Holy Spirit, and daily increase in us Thy manifold gifts of grace, the spirit of wisdom and understanding, the spirit of counsel and knowledge and true godliness. And those things which for our unworthiness we dare not and for our blindness we can not ask, vouchsafe to give us for the worthiness of Thy Son, Jesus Christ our Lord. Amen.

The Chief Clerk proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed the following bill and joint resolutions, in which it requested the concurrence of the Senate:

H. R. 9040. An act to establish the standard of weights and measures for the following wheat-mill, rye-mill, and corn-mill products, namely, flours, semolina, hominy, grits, and meals, and all commercial feeding stuffs, and for other purposes;

H. J. Res. 192. Joint resolution to provide for the coinage of a medal in commemoration of the achievements of Col. Charles A. Lindbergh; and

H. J. Res. 223. Joint resolution making an additional appropriation for the eradication or control of the pink bollworm of cotton.

CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Ferris	La Follette	Sheppard
Barkley	Fess	McKellar	Shipstead
Bayard	Fletcher	McLean	Shortridge
Bingham	Frazier	McMaster	Simmons
Black	George	McNary	Smith
Blaine	Gerry	Mayfield	Smoot
Blease	Gillett	Metcalf	Steck
Borah	Glass	Moses	Steiwer
Bratton	Gooding	Neely	Stephens
Brookhart	Gould	Norbeck	Thomas
Broussard	Greene	Nye	Tydings
Bruce	Hale	Oddie	Tyson
Capper	Harris	Overman	Wagner
Caraway	Harrison	Phipps	Walsh, Mass.
Copeland	Hayden	Pine	Walsh, Mont.
Couzens	Heflin	Pittman	Warren
Curtis	Howell	Ransdell	Waterman
Cutting	Johnson	Reed, Pa.	Watson
Dale	Jones	Robinson, Ark.	Willis
Deneen	Kendrick	Robinson, Ind.	
Dill	Keyes	Sackett	
Edge	King	Schall	

Mr. GERRY. I wish to announce that the Senator from New Jersey [Mr. EDWARDS] is necessarily detained from the Senate on account of illness in his family.

The VICE PRESIDENT. Eighty-five Senators having answered to their names, a quorum is present.

HOUSE BILL AND JOINT RESOLUTIONS REFERRED

The following bill and joint resolutions were severally read twice by their titles and referred as follows:

H. R. 9040. An act to establish the standard of weights and measures for the following wheat-mill, rye-mill, and corn-mill products, namely, flours, semolina, hominy, grits, and meals, and all commercial feeding stuffs, and for other purposes; to the Committee on Agriculture and Forestry.

H. J. Res. 192. Joint resolution to provide for the coinage of a medal in commemoration of the achievements of Col. Charles A. Lindbergh; to the Committee on the Library.

H. J. Res. 223. Joint resolution making an additional appropriation for the eradication or control of the pink bollworm of cotton; to the Committee on Appropriations.

ENROLLED BILLS SIGNED

The VICE PRESIDENT announced his signature to the following enrolled bills, which had previously been signed by the Speaker of the House of Representatives:

H. R. 121. An act authorizing the Cairo Association of Commerce, its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Cairo, Ill.; and

H. R. 5679. An act authorizing the Nebraska-Iowa Bridge Corporation, a Delaware corporation, its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River between Washington County, Nebr., and Harrison County, Iowa.

PETITIONS AND MEMORIALS

Mr. WALSH of Massachusetts presented memorials of sundry citizens of Boston and other municipalities in the State of Massachusetts, remonstrating against the passage of the so-called Brookhart bill (S. 1667) relative to the distribution of motion

pictures in the various motion-picture zones of the country, which were referred to the Committee on Interstate Commerce.

He also presented petitions of sundry citizens of Boston, Cambridge, and Medford, and of sundry other citizens, all in the State of Massachusetts, praying for the prompt passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

Mr. SIMMONS presented a petition of sundry citizens of Jackson County, N. C., praying for the prompt passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

Mr. FRAZIER presented the petition of Walter D. Sundquist and 63 other citizens of Wilton, N. Dak., praying for the adoption of measures to clarify the interference situation in radio broadcasting so as to improve radio reception, which was referred to the Committee on Interstate Commerce.

Mr. BARKLEY presented petitions of sundry citizens of the State of Kentucky, praying for the prompt passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

Mr. HOWELL presented a petition of sundry citizens of Polk County, Nebr., praying for the prompt passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

Mr. WILLIS presented a petition of sundry citizens of Cincinnati and Norwood, in the State of Ohio, praying for the prompt passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

Mr. COPELAND presented a letter, in the nature of a petition, from Capt. Fritz Nelson, immigration secretary, the Salvation Army, at New York, N. Y., praying for the passage of the bill (S. 2271) to permit the admission, as nonquota immigrants, of certain alien wives and children of United States citizens, which was referred to the Committee on Immigration.

He also presented a resolution adopted by the transportation committee of the Buffalo (N. Y.) Chamber of Commerce, opposing the passage of the bill (S. 1760) to increase the capital stock of the Inland Waterways Corporation and protesting against the Government continuing the operation of transportation facilities, which was referred to the Committee on Interstate Commerce.

He also presented petitions of sundry citizens of Yonkers and Edinburg, in the State of New York, praying for the prompt passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

He also presented resolutions adopted by De Witt Clinton Council, No. 190, Junior Order United American Mechanics, of Yonkers, N. Y., favoring the passage of legislation providing for the registration of all aliens in the United States and providing for alien deportation, and also requesting that no further postponement be had in the execution of the national-origins provision of the existing immigration law, which were referred to the Committee on Immigration.

REPORTS OF COMMITTEES

Mr. STECK, from the Committee on Military Affairs, to which was referred the bill (S. 2733) to amend the military record of Joseph Cunningham, reported it with amendments and submitted a report (No. 445) thereon.

Mr. GERRY, from the Committee on Naval Affairs, to which was referred the bill (S. 1852) to correct the naval record of John Lewis Burns, reported it without amendment and submitted a report (No. 447) thereon.

DELAWARE RIVER BRIDGE, BURLINGTON, N. J.

Mr. DALE. Mr. President, from the Committee on Commerce I report back favorably, without amendment, the bill (H. R. 7948) to extend the times for commencing and completing the construction of a bridge across the Delaware River at or near Burlington, N. J., and I submit a report (No. 446) thereon. I ask unanimous consent for the immediate consideration of the bill.

There being no objection, the bill was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

OHIO RIVER BRIDGE AT RAVENSWOOD, W. VA.

Mr. NEELY. I ask unanimous consent for the present consideration of the bill (H. R. 6073) granting a permit to construct a bridge over the Ohio River at Ravenswood, W. Va.

There being no objection, the bill was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with an amendment to strike out all after the enacting clause and insert:

Be it enacted, etc., That in order to facilitate interstate commerce, improve the Postal Service, and provide for military and other purposes, E. M. Elliott, Chicago, his heirs, legal representatives, and assigns, be, and is hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Ohio River, at a point suitable to the interests of navigation, at or near Ravenswood, W. Va., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon E. M. Elliott, Chicago, his heirs, legal representatives, and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. That said E. M. Elliott, Chicago, his heirs, legal representatives, and assigns, is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of tolls so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. After the completion of such bridge, as determined by the Secretary of War, either the State of West Virginia, the State of Ohio, any public agency or political subdivision of either of such States within or adjoining which any part of the bridge is located, or any two or more of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches, and any interest in real property necessary therefor, by purchase or by condemnation or expropriation, in accordance with the laws of either of such States governing the acquisition of private property for public purposes by condemnation or expropriation. If at any time after the expiration of 20 years after the completion of such bridge the same is acquired by condemnation or expropriation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value; (2) the actual cost of acquiring such interest in real property; (3) actual financing and promotion costs, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interest in real property; and (4) actual expenditures for necessary improvements.

SEC. 5. If such bridge shall be taken over or acquired by the States or public agencies or political subdivisions thereof, or by either of them, as provided in section 4 of this act, and if tolls are thereafter charged for the use thereof, the rates of tolls shall be so adjusted as to provide a fund sufficient to pay for the reasonable cost of maintaining, repairing, and operating the bridge and its approaches under economical management, and to provide a sinking fund sufficient to amortize the amount paid therefor, including reasonable interest and financing cost, as soon as possible under reasonable charges, but within a period of not to exceed 20 years from the date of acquiring the same. After a sinking fund sufficient for such amortization shall have been so provided, such bridge shall thereafter be maintained and operated free of tolls, or the rates of tolls shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper maintenance, repair, and operation of the bridge and its approaches under economical management. An accurate record of the amount paid for acquiring the bridge and its approaches, the actual expenditures for maintaining, repairing, and operating the same and of the daily tolls collected, shall be kept and shall be available for the information of all persons interested.

SEC. 6. E. M. Elliott, Chicago, his heirs, legal representatives, and assigns, shall within 90 days after the completion of such bridge file with the Secretary of War, and with the Highway Departments of the States of West Virginia and Ohio, a sworn itemized statement showing the actual original cost of constructing the bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, and upon request of the highway department of either of such States shall, at any time within three years after the completion of such bridge, investigate such costs and determine the accuracy and the reasonableness of the costs alleged in the statement of costs so filed, and shall make a finding of the actual and reasonable costs of constructing, financing, and promoting such bridge; for the purpose of such investigation the said E. M. Elliott, Chicago, his heirs, legal

representatives, and assigns, shall make available all records in connection with the construction, financing, and promotion thereof. The findings of the Secretary of War as to the reasonable costs of the construction, financing, and promotion of the bridge shall be conclusive for the purposes mentioned in section 4 of this act, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act, is hereby granted to E. M. Elliott, Chicago, his heirs, legal representatives, and assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

The title was amended so as to read: "A bill authorizing E. M. Elliott, of Chicago, his heirs, legal representatives and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Ravenswood, W. Va."

MISSISSIPPI RIVER BRIDGE AT HICKMAN, KY.

Mr. BARKLEY. I ask unanimous consent for the present consideration of the bill (H. R. 7921) authorizing A. Robbins, of Hickman, Ky., his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Hickman, Fulton County, Ky.

Mr. CURTIS. It is in the regular form of a bridge bill?

Mr. BARKLEY. Yes; in regular form.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MISSISSIPPI RIVER BRIDGE AT NEW ORLEANS

Mr. BROUSSARD. I ask unanimous consent for the present consideration of the bill (H. R. 10298) to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near New Orleans, La. I have just talked to the chairman of the subcommittee on commerce in charge of the bill and he has consented to my asking that the bill be considered at this time.

Mr. CURTIS. Has the bill been reported from the Committee on Commerce?

Mr. BROUSSARD. The Senator from Vermont [Mr. DALE] is chairman of the subcommittee and he authorized me to ask for its consideration at this time. The permit is about to expire and the parties interested would like to have it extended.

Mr. SMOOT. An extension of time for how long?

Mr. BROUSSARD. One year to commence and three years to complete. The permit will expire on the 2d of March.

Mr. CURTIS. I ask unanimous consent that the Committee on Commerce be discharged from the further consideration of the bill and that the bill be placed on its passage.

There being no objection, the Committee on Commerce was discharged from the further consideration of the bill, and the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

RECOMMITTAL OF BILLS

On motion of Mr. GEORGE, the following bills were recommitted to the Committee on Military Affairs:

A bill (H. R. 2294) for the relief of George H. Gilbert; and

A bill (H. R. 4655) for the relief of David E. Goodwin.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as follows:

By Mr. BRUCE:

A bill (S. 3440) to vacate certain streets and alleys within the area known as the Walter Reed General Hospital, District of Columbia, and to authorize the extension and widening of Fourteenth Street from Montague Street to its southern terminus south of Dahlia Street; to the Committee on the District of Columbia.

By Mr. WALSH of Massachusetts:

A bill (S. 3441) granting an increase of pension to Mary Frary; to the Committee on Pensions.

A bill (S. 3442) to admit to the United States Chinese wives of certain American citizens; to the Committee on Immigration.

A bill (S. 3443) to permit persons on the active or retired list of the military or naval forces to receive compensation under the World War veterans' act, 1924, as amended, in lieu of active or retired pay; to the Committee on Finance.

By Mr. BRATTON:

A bill (S. 3444) granting a pension to Daniel Armijo (insane); and

A bill (S. 3445) granting a pension to George H. Bain (with accompanying papers); to the Committee on Pensions.

By Mr. COPELAND:

A bill (S. 3446) for the relief of Allan MacRossie, jr.; to the Committee on Claims.

By Mr. ASHURST:

A bill (S. 3447) granting a pension to Clair Childers; to the Committee on Pensions.

By Mr. NEELY:

A bill (S. 3448) granting an increase of pension to Mary Gocke; to the Committee on Pensions.

By Mr. FRAZIER:

A bill (S. 3449) granting an increase of pension to Lucy A. Freeman (with accompanying papers); to the Committee on Pensions.

By Mr. CAPPER:

A bill (S. 3450) granting a pension to Oakey F. Albright (with accompanying papers); to the Committee on Pensions.

By Mr. BAYARD:

A bill (S. 3451) granting an increase of pension to Catherine Fluehr (with accompanying papers); to the Committee on Pensions.

A bill (S. 3452) for the relief of George W. Abberger; to the Committee on Claims.

By Mr. ROBINSON of Indiana:

A bill (S. 3453) to confer jurisdiction upon the Court of Claims to hear and determine the claim of Clara Percy; to the Committee on the Judiciary.

By Mr. METCALF:

A bill (S. 3454) granting an increase of pension to Hortense J. S. Church (with accompanying papers); to the Committee on Pensions.

By Mr. THOMAS:

A bill (S. 3455) granting a pension to Sarah J. Pummel; to the Committee on Pensions.

By Mr. REED of Pennsylvania:

A bill (S. 3456) allowing the rank, pay, and allowances of a colonel, Medical Corps, United States Army, to the medical officer assigned to duty as personal physician to the President; to the Committee on Military Affairs.

By Mr. WILLIS:

A bill (S. 3457) to amend section 58 of the act of March 2, 1917, entitled "An act to provide a civil government for Porto Rico, and for other purposes"; to the Committee on Territories and Insular Possessions.

By Mr. WALSH of Massachusetts:

A joint resolution (S. J. Res. 104) for the relief of Katherine Imbrie, widow of the late United States Vice Consul Robert Whitney Imbrie; to the Committee on Foreign Relations.

By Mr. REED of Pennsylvania:

A joint resolution (S. J. Res. 105) providing for the issuance of a special postage stamp in commemoration of the one hundredth anniversary of the first run of a locomotive in America; to the Committee on Post Offices and Post Roads.

AMENDMENT TO TAX BILL—LIENS ON REAL PROPERTY

Mr. FLETCHER submitted an amendment intended to be proposed by him to House bill No. 1, the tax reduction bill, which was referred to the Committee on Finance and ordered to be printed.

MUSCLE SHOALS

Mr. HEFLIN. Mr. President, I submit an amendment in the nature of a substitute which I may desire to offer to the Senate Joint Resolution 46, relative to Muscle Shoals, now the unfinished business of the Senate. I ask that the proposed substitute may be printed and lie on the table.

The VICE PRESIDENT. The amendment in the nature of a substitute will be printed and lie on the table.

CONSTUCTION OF RURAL POST ROADS

Mr. McKELLAR submitted an amendment intended to be proposed by him to the bill (S. 2327) to amend the act entitled "An act to provide that the United States shall aid the States in the construction of rural post roads, and for other purposes," approved July 11, 1916, as amended and supplemented, and for other purposes, which was referred to the Committee on Post Offices and Post Roads and ordered to be printed.

CALF-LEATHER INDUSTRY

Mr. COPELAND. Mr. President, the condition of the calf-leather industry of the United States was brought to the attention of the Congress about three years ago and the Department of Commerce and the United States Tariff Commission, under a joint resolution introduced by me, made an investigation of the causes of depression in that industry, and the effect of foreign competition, calf leather being on the free list. A detailed report was accordingly submitted to the Congress under date of February 11, 1925, in which it was shown that the foreign tannery wage on an average was 67 per cent below the American scale.

The average wage per hour for tannery workers then paid in the United States was 52.7 cents, whereas those of five principal tanning countries of continental Europe ranged between 12 and 20 cents, and it is the competition from these countries that is being so keenly felt. It hardly need be said that American tannery workers could not even begin to subsist on such poor wages.

It was also shown in this report that European tanners in particular occupy a strategic position as regards the securing of lower priced tanning materials, dyes, and other chemicals essential to the production of calf leather, the report showed.

Since the 1925 report of the Department of Commerce was submitted to Congress very little improvement has been made in the depressed condition of the calf-leather industry. Indeed, the situation is worse, viewed from the interests of both the tanner and the laboring men employed by him.

Therefore it seems timely to ask the United States Tariff Commission to make another inquiry as to the extent of the sales of foreign calf leather in the United States and the difference in the wages of tannery workers in the United States and competitive countries. I ask for the reading of the resolution which I send to the desk.

The Chief Clerk read the resolution (S. Res. 163), as follows:

Resolved, That the United States Tariff Commission is hereby requested to investigate and report to the Senate the extent of sales of foreign calf leather in the United States since January 1, 1925, and the rates of wages paid calf tannery workers in the United States and competing countries.

Mr. COPELAND. In view of the pressing nature of the conditions existing in the industry, I ask unanimous consent for the immediate consideration of the resolution.

Mr. SMOOT. I ask the Senator to let it go over until tomorrow. I think I can get for him the information which he desires. If not, I shall have no objection to the resolution.

Mr. COPELAND. Very well.

The PRESIDING OFFICER (Mr. THOMAS in the chair). The resolution will go over.

WITHDRAWAL OF PAPERS—J. H. ORR

On motion of Mr. CAPPER, it was—

Ordered, That the papers filed in support of S. 2135, Sixty-eighth Congress, for the relief of J. H. Orr, be withdrawn from the files of the Senate, no adverse report having been made thereon.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed without amendment the joint resolution (S. J. Res. 88) authorizing the erection on public grounds in the District of Columbia of a stone monument as a memorial to Samuel Gompers.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 10286) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1929, and for other purposes, requested a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. BARBOUR, Mr. CLAGUE, Mr. TABER, Mr. HARRISON, and Mr. COLLINS were appointed managers on the part of the House at the conference.

APPROPRIATIONS FOR THE WAR DEPARTMENT

Mr. WARREN. I ask the Chair to lay before the Senate the action of the House of Representatives just received on House bill 10286.

The PRESIDING OFFICER (Mr. THOMAS in the chair) laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 10286) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1929, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. WARREN. I move that the Senate insist upon its amendments, that the invitation of the House for a conference be accepted, and that the conferees on the part of the Senate be appointed by the Chair.

The motion was agreed to; and the Presiding Officer appointed Mr. REED of Pennsylvania, Mr. JONES, Mr. WARREN, Mr. HARRIS, and Mr. FLETCHER conferees on the part of the Senate.

PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that the President had approved and signed the following acts:

On February 27, 1928:

S. 1154. An act to authorize the use by the county of Yuma, Ariz., of certain public lands for a municipal aviation field, and for other purposes.

On February 28, 1928:

S. 1425. An act to remove a cloud on title.

On February 29, 1928:

S. 1759. An act to authorize appropriation of treaty funds due the Wisconsin Pottawatomi Indians.

NATIONAL FOREST RESERVATION COMMISSION

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read and referred to the Committee on Public Lands and Surveys:

To the Congress of the United States:

I am transmitting herewith for the consideration of the Congress copies of resolutions adopted by the National Forest Reservation Commission at its meeting held on February 18, 1928, together with letters from the Secretary of Agriculture relating to the proposed addition of certain public lands to the Fremont National Forest, in the State of Oregon, and the Bighorn National Forest, in the State of Wyoming, which have been submitted by the President of the National Forest Reservation Commission.

CALVIN COOLIDGE.

THE WHITE HOUSE, *March 1, 1928.*

[NOTE.—Resolutions accompanied similar message to the House of Representatives.]

THE RADIO SITUATION

Mr. DILL. Mr. President, a few days ago I made some remarks about the radio situation and referred to the House amendment which was pending at that time. I have had further information regarding it which has caused me to reconsider some things I said about the amendment. I ask to have inserted in the RECORD a statement by Representative DAVIS, of Tennessee, printed in the United States Daily of February 29, 1928, on this subject, and also the last page and a half of the House committee report on Senate bill 2317.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

BILL TO REALLOCATE RADIO WAVE LENGTHS IS DEFENDED BY REPRESENTATIVE DAVIS—PRESENT DISTRIBUTION OF STATIONS AND POWER IS CRITICIZED AS UNFAIR TO LISTENERS

Representative DAVIS (Democrat), of Tullahoma, Tenn., on February 28 issued a statement defending the proposal for an equitable distribution of radio wave lengths and station power as provided in an amendment to the radio bill (S. 2317).

The amendment was adopted by the House Committee on Merchant Marine and Fisheries at the instance of Mr. DAVIS and will be included in the bill as it will be reported to the House. The committee already has given the measure as amended its approval and authorized the preparation of a favorable report. The full text of the statement of Mr. DAVIS, which is a reply to a recent statement of O. H. Caldwell, a member of the Federal Radio Commission, follows:

The intemperate attack upon the distribution clause contained in the radio bill favorably reported by the House Committee on the Merchant Marine and Fisheries given to the press by Commissioner O. H. Caldwell shows conclusively that such a clause is necessary to insure relief from the present unfair and discriminatory distribution.

The radio act passed by the last Congress authorizes an equitable distribution and indicated to the commission that Congress desired such a distribution. However, this provision was wholly ignored by the commission. The amendment in question directs what the committee conceived to be a proper distribution.

DISTRIBUTION OF POWER AND WAVES CRITICIZED

The existing law divides the country into five zones, the first four zones being of substantially equal population, and the fifth zone being of considerably less population but much larger geographical area. According to the present set-up the number of broadcasting licenses and the station power they are authorized to employ are as follows:

Zone	Number stations	Total station power in watts	Percentage of station power
1	138	213,055	35.30
2	115	116,805	19.34
3	102	47,105	7.80
4	215	164,870	27.31
5	131	61,785	10.24
Total	701	603,620	100.00

The third zone, with the largest population of any of the zones and by far the largest area except the fifth zone, is granted but 7.8 per cent of the total station power. The second zone, with but 40,000 less population and a much larger area and embracing the cities of Philadelphia, Pittsburgh, Detroit, Cleveland, Cincinnati, and Louisville, has but little more than half of the station power authorized in the first zone. The six New England States, with nearly a third of the population of the first zone, have less than an eighth of the power. In the fourth zone, Illinois, with about a fourth of the population of that zone, has more than half of the power granted the stations in the 10 States of that zone. Instances of such gross discriminations could be extended indefinitely.

Commissioner Caldwell proceeds upon the false premise that the zones with stations and power in excess of their quota must be reduced to the basis of the third zone, which has the smallest number of stations and power. Surely Mr. Caldwell knew that the provision required no such thing; it simply provides for an equalization as between the zones. The equalization could be brought about by an increase of power in the zones now so deficient in power, or by both reductions and increases. Manifestly such a course should be followed.

Members of the Radio Commission have been credited with the statement that there should be a substantial reduction in the present number of stations, particularly in the congested areas. Stations for elimination have been placed as high as 300. Mr. Caldwell indicated at the hearings that he favored the elimination of about half that number.

It is recognized by those familiar with the situation that there are too many broadcasting stations in certain congested areas, and there is much complaint from the listeners in such areas. The air is cluttered up and reception frequently very unsatisfactory, not to speak of the fact that the citizens in such areas are unable to get reception from outside stations with any degree of satisfaction. Consequently such a situation is not only unsatisfactory from a local standpoint but it deprives neglected sections of the country of wave lengths and power to which they are justly entitled.

Proceeding upon his false premise, Mr. Caldwell undertakes to show the havoc that would be played in New Jersey, and in order to magnify his argument he very improperly charges to New Jersey the Radio Corporation Station WJZ with 30,000 watt power, which is a New York station with its broadcasting apparatus in New Jersey. As a matter of fact, under the present frame up New Jersey has less than one-twelfth of the station power accorded that zone, although it has over one-eighth of the population. Of course, all of his conclusions based upon a false premise are likewise incorrect.

EQUAL ALLOCATIONS FOR ZONES ASKED

The amendment in question is as follows:

"The licensing authority shall make an equal allocation to each of the five zones established in section 2 of this act of broadcasting licenses, of wave lengths, and of station power; and within each zone shall make a fair and equitable allocation among the different States thereof in proportion to population and area."

Of course, this provision would be administered in connection with all the other provisions of the act, including the provision in the same paragraph and immediately preceding the distribution clause, which is as follows:

"The licensing authority, if public convenience, interest, or necessity will be served thereby, subject to the limitations of this act, shall grant to any applicant therefor a station license provided for by this act."

We take the position that the citizens in one section of this country are entitled to the same consideration as a like number in another section.

Mr. Caldwell pretends to be concerned in the interest of the listeners, but his words and actions do not so indicate.

He makes a spacious and misleading argument with respect to the ownership of radio receiving sets. According to the estimates of a responsible radio magazine, such sets in the United States are distributed among the different zones in the following proportion: 24.2 per cent in the first zone; 21.04 per cent in the second zone; 15.97 per cent in the third zone; 25.01 per cent in the fourth zone; 13.11 per cent in the fifth zone.

If better treatment is accorded stations in the third zone, so that the citizens therein can get decent reception, there will be a large and immediate increase in receiving sets in that zone. Commissioner Lafount has just had changes made in 70 stations to improve reception in his, the fifth zone.

We are dealing with the subject from the standpoint of the public generally and the listeners in particular. The public is certainly not concerned alone in a few high-powered monopoly stations. They are also interested in sectional, State, and local stations. We want such a distribution of stations, wave lengths, and power that the listeners can satisfactorily hear any stations they desire, and not be compelled to listen only to a few favored stations as is now the case.

BENEFITS TO LISTENERS PREDICTED UNDER ACT

Mr. Caldwell states that the enactment "of this abominable redistribution clause" will wreck "our present wonderful radio broadcasting structure." It may wreck the plans of a few high-powered monopoly stations and their affiliated chain stations to preempt the broadcasting field, but it will vastly improve the broadcasting structure from the public standpoint.

Mr. Caldwell's libelous designation of this clause is in keeping with his denunciation of provisions in the bill, which are enacted into the present law, against the acquirement of vested rights and providing that persons financially interested in the radio industry should not be eligible to membership on the Federal Radio Commission; and his characterization as "vicious in the extreme" of another provision then in the bill, but now in the act, providing that a station license shall be refused to any person, firm, or corporation "which has been found guilty by any Federal court of unlawfully monopolizing or attempting to monopolize radio communication, through manufacture or sale of radio apparatus or which has used unfair methods of corruption."

The Radio Commission has cleared 25 channels or wave lengths between the range of 600 and 1,000 kilocycles, decidedly the most valuable range. On 24 of these channels they have placed chain stations, including the high-powered monopoly stations; on these 24 cleared channels they have placed a total of 31 chain stations. They have granted to the stations on these wave lengths more station power than is granted to the remaining stations, approximately 624 in number, which are crowded together on the remaining 64 less-desirable wave lengths.

The broadcasting stations owned by the General Electric, Westinghouse, Radio Corporation of America, and the National Broadcasting Co., which is owned by the said three companies, are given an aggregate station power of 213,000 watts.

Mr. Caldwell sarcastically complains that Congress has failed to provide funds for personnel and equipment for the Radio Commission. After the enactment of the radio bill creating the commission in the last Congress, the only appropriation bill in which appropriations could be made for the Radio Commission was the deficiency appropriation bill which failed of passage because of the Senate filibuster. During the present Congress the deficiency bill was quickly enacted, and the independent offices appropriation bill, which properly embraces the appropriation for the Radio Commission, has passed the House, and the commission did not ask that there be included in either of those bills any more than the salaries of the commission, its secretary, and perhaps a very few other subordinate officials; at any rate, the appropriation which they asked for was included.

Mr. Caldwell stated in the recent hearings that he did not think that the commission needed any expert advisers—he doubtless preferred to perform that function himself.

Mr. Caldwell also complains that the Senate has not confirmed three members of the Radio Commission. He is more responsible for that situation than anybody else.

It remains to be seen whether Mr. Caldwell and those for whom he is speaking and for whom he has been acting will be able to arrogantly dictate to Congress a legislative policy.

[House of Representatives, Seventieth Congress, first session, Committee on the Merchant Marine and Fisheries, Rept. No. 800]

* * * * * * *

Your committee has added a new section which deserves the thoughtful consideration of the House. The second paragraph of section 9 of existing law has been the subject of much controversy. Some have contended that it imposed the obligation upon the commission to distribute stations, power used, and wave lengths equitably among the States. Others have insisted that the 1927 act directed the commission to so locate stations and to so distribute power and wave lengths to them that there might result equitable service to the people in the different parts of the country. It is now urged by many persons in the third zone that the people in the States of this zone have neither a fair proportion of stations, of power, or of desirable wave lengths, nor do they receive the service to which they are entitled. Like complaints have come from other zones and States.

This third zone has a greater percentage of the population of the United States than either of the other zones and is second in area. It has, however, the smallest number of stations, with less power authorized to be used by them than any of the other zones. It has very few stations with power in excess of 1,000 watts. Figures as to these items change often. The following table may not be strictly accurate, but it represents the present situation with substantial correctness:

Analysis of broadcasting licenses

	Population	Population (per cent)	Area (square miles)	Area (per cent)	Number of stations	Total station power in watts	Percentage of station power	Stations with over 1,000 watts
Zone 1	24,378,131	22.73	129,769	3.63	138	213,055	35.30	10
Zone 2	24,337,341	22.69	247,517	6.93	115	116,805	19.34	8
Zone 3	24,826,050	23.14	761,895	21.33	102	47,105	7.80	4
Zone 4	24,492,986	22.83	658,148	18.42	215	164,870	27.31	30
Zone 5	9,213,720	8.59	1,774,447	49.68	131	61,785	10.24	8
Total	107,248,228	100.00	3,571,776	100.00	701	603,620	100.00	60

It is not to be concluded from the set-up here disclosed that the licensing authority has been guilty of intentional discrimination against this third zone. Prior to the present radio law there was no authority to control the location of stations. It does no violence to truth to say that prior to March, 1927, stations were built whenever and wherever applicants desired and that there was no legal power to control either the use of wave lengths or power. The present commission on its assumption of authority found conditions not much different than they now are. It is perhaps idle to consider whether the commission during the past year could or should have brought about a redistribution. This amendment looks to the future. It declares in terms the duty of the licensing authority to make an equal allocation among the five zones, of broadcasting licenses, of wave lengths, and of station power and provides that within each zone there shall be an equitable allocation among the States thereof in proportion to population and power. The equality here sought is not an exact mathematical division. That may be physically impossible. The language does not contemplate the withdrawal of station licenses, of power and of wave lengths from others, and an impounding thereof in the absence of applications from the third or other zones therefor. It does not suggest that the requirement of the law of a showing of public interest, convenience, or necessity as the basis for the grant of a license, or that other provisions of the law are to be waived. It is intended, however, to require of the licensing authority that as soon as may be and in proper cases licenses in number and in kind shall be granted to applicants from this third zone and other sections of the country sufficient to bring equality in the particulars specified. If, however, within the entire United States the saturation point is now reached and additional stations or additional power or other wave lengths may not be granted in a particular zone without prejudice to all, then it necessarily follows that there must be worked out a redistribution of the stations and of the power and of wave lengths now authorized. This equality does not necessarily require the reduction of all other zones to the level of the least favored. It might be achieved by raising all to the plane of the highest, or it might be effected by a combination of new grants and a redistribution of existing licenses. There is no warrant for the assumption that the first of these alternatives is the only way in which this problem can be worked out. The amendment declares a desired end but does not presume to direct the commission as to the steps necessary to attain the result sought. Your committee does not believe that it seeks either an impossible or an unreasonable solution. It is not anticipated that this purpose will be immediately accomplished but we conceive it to be basically right and recommend that the commission should proceed to make such allocation as will reasonably meet this rule as speedily as it may be done.

PROPOSED STREET RAILWAY MERGER IN DISTRICT OF COLUMBIA

Mr. BROOKHART. Mr. President, I read from the Washington Herald a statement in reference to the traction situation in this city:

John H. Hanna, president of the Capital Traction Co., declared that should the merger fail to go through his company certainly would ask an increased fare and get it. Prospects of a higher fare in any event were seen in the fact that, even granting the estimated savings through a merger, the estimated return under the present rate would total a fraction under 6 per cent. The companies insist upon a return of 7 per cent.

Mr. President, it is with some desire to raise an issue as to the proposed return of 7 per cent that I rise at this time. I would like to ask the Senator from Kansas [Mr. CAPPER] chairman of the Committee on the District of Columbia, as to the situation with reference to the rate question that is being considered.

Mr. CAPPER. I will say to the Senator from Iowa that there is no measure of any kind, bill, resolution, or otherwise, before the Committee on the District of Columbia, or any other committee of the Senate that I know of, which involves the merger of the transportation lines in the District of Columbia.

Mr. BROOKHART. In what shape is it pending that brings on this publicity?

Mr. CAPPER. The merger matter is now before the Public Utilities Commission of the District of Columbia in the form, apparently, of an agreement reached by the transportation companies of this city whereby they propose to form a merger. The Public Utilities Commission are holding hearings and inquiring into the merits of the merger plan. When they have concluded their hearings, if they see fit to approve the program agreed to by the transportation companies, the Public Utilities Commission will, under the terms of the merger act passed by Congress, submit to Congress for ratification or rejection the merger plan.

Mr. BROOKHART. The matter then will come before the Senate for action?

Mr. CAPPER. Yes; and let me add that nothing can be done in the District of Columbia, so far as a merger of the transportation lines is concerned, without ratification and approval by Congress.

Mr. BROOKHART. I thank the Senator from Kansas.

Mr. ROBINSON of Arkansas. Mr. President, may I ask the Senator from Kansas if the Public Utilities Commission have the power to raise or lower rates for the carrying of passengers on street cars in the District of Columbia?

Mr. CAPPER. I think they have.

Mr. ROBINSON of Arkansas. It appears that a rate of 8 cents is being charged in the District and has been charged, I think, since about the beginning of the war period. Does the Senator from Kansas know of any large city in the United States where a fare greater than that is being collected?

Mr. CAPPER. I do not. Furthermore, I can conceive of no situation that might arise which would justify or warrant any increase by the transportation companies in the rates now charged the people of this city.

Mr. ROBINSON of Arkansas. The object which prompted me to say anything in this connection grows out of the fact that it has seemed that a reduction might be made in the fares which are being charged in the District of Columbia. The present rate was imposed during the war period. It is very high. Eight cents, I think, is as high as is being charged and collected anywhere in the country. Of course, there are 6 tokens sold here for 40 cents, but that is not very different from a rate of 8 cents for a single fare.

I recognize as a fundamental principle of economics and of law that those who invest their moneys in any enterprise affected with a public interest have the right to a reasonable return on their investment when their business is honestly and economically administered.

Mr. CARAWAY. Will the Senator pardon me for just a moment?

Mr. ROBINSON of Arkansas. I yield to the Senator from Arkansas.

Mr. BROOKHART. I think I have the floor.

Mr. ROBINSON of Arkansas. If the Senator declines to yield, I shall wait and take the floor in my own right.

Mr. BROOKHART. I wanted to make a suggestion in answer to what the Senator has just said.

Mr. ROBINSON of Arkansas. I have not concluded what I was going to say. I should like the Senator from Iowa to yield to my colleague.

Mr. BROOKHART. I, too, want all questions to be asked which any Senator may desire to ask, but I should like to complete my statement before yielding the floor.

The senior Senator from Arkansas has suggested that the rate of fare is too high, and there are some fundamental economic reasons why it is too high. It is to those I desire to call the attention of the Senator and of the Senate.

In the first place, the rate of a 7 per cent return is too high for any public utility anywhere in the United States; it is extortionate; and I will give the Senate the facts on which I base that conclusion. The return on the whole production of the American people, including all their work, all their labor, all their capital, all increases in property values, all depreciation of the dollar, every item that goes into the measure of value in the United States, is only about 5½ per cent a year.

Why should the public-utility industry be singled out by commissions and courts and be given a return far above the average return on all the American capital? It is almost a guaranteed industry; it has been given a valuation that on an average is considerably more than its investment. Then, it has a command of the law, even of the common law, that it shall have a reasonable or adequate return upon that investment. That makes it the most stabilized investment we have next to Government bonds themselves, and yet we find constantly, and going without challenge almost, the suggestion that it shall have a 7 per cent return, when the average return on the whole peoples' capital, labor and all, is only 5½ per cent.

Mr. CARAWAY. Mr. President, will the Senator from Iowa permit me to interrupt him now?

Mr. BROOKHART. I yield to the Senator.

Mr. CARAWAY. Mr. President, if the Senator will examine the charters of the street-car companies in the District he will find that they were required under those charters to sell six tickets for a quarter. There has not been any repeal; there has not been any amendment of those charters. A public utilities commission was created here, which has exercised its ingenuity to raise fares, and I have no doubt that it is not within the power of the courts here to compel them to comply with their charters. They are violating them every day. If I might be permitted to say so, it looks to me like—and I regret to say it, but I wish to say it while the chairman of the committee is present—it looks like when we get a Committee on the District of Columbia it finally ceases to function except in a one-sided way. There is a cry going up, of course, all the time for letting the people back home pay all of the taxes for the District of Columbia, and every demand for a special privilege receives immediate approval.

A long time ago I introduced a bill, for which I never could get any consideration at all, that would have regulated street-car fares here and forced a merger, by requiring the commission to grant a charter to a bus line to run along the lines of the street-railway company that would not comply with its charter. I can not get any consideration for that bill; but there is a demand now for a consolidation and for a 7 per cent return, which is an outrage.

Mr. BROOKHART. I think the 7 per cent claim grows out of a comparison with the earnings of certain other lines of business; but the question I want to ask is why should a commission or a court pick out some particular line of business or some group of business industries that has a high return and then say a utility shall have an equal return? Why should not they consider every line of business and determine the average? If they will do that, it will be found that a reasonable return for a public utility will not much exceed 4 per cent. We talk about the earnings of industries and about great prosperity in the United States at this time and then give the public utilities a return by law through our commissions and our courts equal to the returns under such prosperity; but whose prosperity is it?

I have figures from the Department of Commerce showing that 177,000 corporations in the United States since 1922, more than five years, have operated at the enormous loss of nearly $2,000,000,000 a year. We have prosperity for only a few industries, the public utility is one of those industries by the special favor of the law.

Mr. CURTIS. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Kansas?

Mr. BROOKHART. I yield.

Mr. CURTIS. I do not want to ask the Senator a question, but I desire to suggest to him that under the rule during the morning hour debate is limited to five minutes.

Mr. BROOKHART. Very well; I shall discontinue my remarks at this time.

ERADICATION OF PINK BOLLWORM

Mr. WARREN. From the Committee on Appropriations I report back favorably without amendment the joint resolution (H. J. Res. 223) making an additional appropriation for the eradication or control of the pink bollworm of cotton. I ask unanimous consent for the immediate consideration of the joint resolution.

Mr. ROBINSON of Arkansas. Let the joint resolution be read.

The VICE PRESIDENT. The joint resolution will be read.

The joint resolution was read, as follows:

Resolved, etc., That to enable the Secretary of Agriculture to meet an emergency caused by a serious outbreak of the pink bollworm of cotton in western Texas, and to prevent its spread to other parts of Texas and to adjoining States, including the same objects and under the same conditions specified under the heading "Eradication of pink bollworm" in the agricultural appropriation act for the fiscal year 1928, there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the additional sum of $200,000, to remain available until June 30, 1929.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

Mr. WARREN. Mr. President, this additional appropriation is called for by the Agricultural Department, whose agents have been on the ground where this scourge is being experienced. The department asks that an appropriation of $200,000 be made; in fact, an appropriation of that sum has already been embodied in the agricultural appropriation bill in the House of Representatives, and this sum may be deducted from the appropriation which is carried in that bill, but it is desired that the amount may be made immediately available. That is all that is embraced in the bill.

Mr. ROBINSON of Arkansas. I understand the situation to which the Senator from Wyoming refers is emergent?

Mr. WARREN. It is very emergent.

Mr. ROBINSON of Arkansas. And it is necessary that prompt action shall be taken in order to prevent the spread of this pest.

Mr. WARREN. It is so considered.

Mr. BRATTON. Mr. President, I have no objection to the consideration of the joint resolution if it will not lead to debate and interfere with the unanimous-consent order for this morning.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. SHEPPARD. Mr. President, I ask unanimous consent to have inserted in the RECORD at this point a telegram to Representative BUCHANAN, of Texas, from Dr. C. L. Marlatt with reference to the situation. Doctor Marlatt is chairman of the Federal Horticultural Board and is personally investigating conditions in Texas in connection with the pink bollworm.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

MARFA, TEX., *February 27, 1928.*

J. P. BUCHANAN,

House of Representatives, Washington, D. C.:

Clean-up of gins and regulation of cotton and seed should begin at once in west Texas area. Can the amount which is to be made immediately available be released for use now by joint resolution of Congress? Urgency fully warrants such action.

C. L. MARLATT.

PUEBLO INDIAN LANDS

The VICE PRESIDENT. Morning business is closed. The Chair lays before the Senate, pursuant to the order of yesterday, the amendment of the House of Representatives to the bill (S. 700) authorizing the Secretary of the Interior to execute an agreement with the Middle Rio Grande conservancy district providing for conservation, irrigation, drainage, and flood control for the Pueblo Indian lands in the Rio Grande Valley, N. Mex., and for other purposes. The question is on agreeing to the amendment proposed by the Senator from Kansas [Mr. CURTIS], which will be stated by the Secretary.

The CHIEF CLERK. On page 3, line 20, after the word "lands," it is proposed to insert "except such part thereof as the Indians shall themselves farm."

Mr. BRATTON. Mr. President, I desire to suggest an amendment to the amendment of the Senator from Kansas. The amendment I suggest is to add to the amendment the words "not to exceed 4,000 acres."

Mr. CURTIS. Mr. President, I am willing to accept that modification. Since the debate of yesterday I have talked with the officials of the Indian Bureau, and they say that 12,000 acres will be all that will be required for many years to come for the use of the Indians.

The VICE PRESIDENT. The question is on the amendment as modified to the amendment of the House.

Mr. LA FOLLETTE. Mr. President, before the amendment is acted upon, I should like to suggest to the Senator from Kansas that there be added to his amendment additional words reading as follows:

But no collection for reimbursement from proceeds of leases of any Indian acres shall exceed in annual amount the payment made annually by white acres of like character toward the amortizing of the share of said white acres in the indebtedness of the Middle Rio Grande conservancy district.

Mr. CURTIS. Mr. President, I have not had an opportunity to study the amendment suggested by the Senator from Wis-

consin, but it seems to me that what it provides would be the attitude of the department in any event.

Mr. LA FOLLETTE. The amendment suggested by me would simply assure the result of the amendment of the Senator from Kansas. As I understand, if he shall incorporate in his amendment the words which have been suggested by the Senator from New Mexico, the result will be to throw a much larger additional burden upon the acres which are not actually farmed by the Indians.

Mr. CURTIS. That is, the 11,000 acres?

Mr. LA FOLLETTE. The purpose of my amendment is to protect those acres in Indian ownership from an excessive rate of collection; in other words, although I do not agree with the justice of loading these additional acres with this larger debt, I believe if protection were incorporated in the bill so that the large additional debt would be paid off over a much longer period of time, that some justice would be secured for the Indians.

Mr. BRATTON. Mr. President, will the Senator from Kansas yield to me?

Mr. CURTIS. I yield.

Mr. BRATTON. I hope the amendment suggested by the Senator from Wisconsin will not prevail. The amendment of the Senator from Kansas in its present form will give the Indians the right not only to farm their present area of 8,346 acres free of debt, free of obligation, and free of reimbursement, but it will give them the right to farm 4,000 additional acres without obligation or reimbursement of any kind from the proceeds of that land. In other words, it will give the Indians the use of 12,000 acres of land plus, susceptible of heavy production, because it would be reclaimed and could be cultivated in an intensive manner.

Mr. LA FOLLETTE. But, Mr. President——

Mr. BRATTON. If the Senator will permit me to complete my statement, I wish to say that all the Government would look to, then, for its reimbursement would be the proceeds of leases upon land that is now practically worthless to the Indians. To say that it would be oppressive can not be sustained by the facts, as I understand them. The amendment suggested by the Senator from Wisconsin, if adopted, not only will jeopardize the passage of the bill but will defeat the legislation as he of necessity must understand. Furthermore, it is a departure from any legislation which I know anything about upon this or kindred subjects.

Mr. LA FOLLETTE. If the amendment which I have suggested to the amendment of the Senator from Kansas is going to be resisted, then I wish to discuss the entire bill upon its merits before the amendment shall be adopted.

Mr. BRATTON. I do not resist the amendment of the Senator from Kansas.

Mr. LA FOLLETTE. I understand that.

Mr. BRATTON. I am willing to accept it in the form in which we have discussed it.

Mr. CURTIS. Mr. President, I yield the floor if the Senator from Wisconsin desires to proceed.

Mr. LA FOLLETTE. Mr. President, I have served for approximately two years upon the Indian Affairs Committee. Senators well realize that to take a position in opposition to that sponsored by a Senator, or, as in this case, the two Senators from a State, is not a pleasant one. Nevertheless, I conceive it to be my duty as a member of the Committee on Indian Affairs to oppose legislation on this floor and in the committee which, after due consideration and such investigation as I am able to make, I feel is not in the interest of the Indians and perpetrates upon them an injustice.

In carrying out the conception of my obligation as a member of that committee I have on numerous occasions opposed the attitude and the position taken by Senators from States in which Indians were concerned in legislation under consideration. So long as I am a member of that committee I shall continue to follow that course.

In my judgment, Mr. President, the action contemplated in this bill, if the House amendment shall prevail, is a breach of faith with the six Pueblo Tribes involved.

If Indians were not concerned in this matter, Mr. President, if the negotiations which led up to the approval of Senate bill 700 as it passed the Senate by interested parties had been made by white citizens, in my judgment this action would not be contemplated, nor would an attempt be made to justify it.

This matter has been in controversy for some time. In 1926 a bill was introduced containing a provision that nothing should be done unless the consent of the Indians was obtained. That bill failed of passage; but the Indian tribes involved, through their duly authorized councils, rejected that bill even with that proposal in it. Then the conservancy district, realizing, I believe, that they could not pass this legislation unless they obtained an indorsement of the Indians involved, concerning the features of Senate bill 700, then proposed to them.

In that connection, Mr. President, I desire to call attention to the action taken by the council representing these tribes which assembled at Santa Domingo pueblo on September 17, 1927. The resolution is as follows:

> The council of all the New Mexico pueblos * * * adopts and recommends to the councils of the several pueblos the following:
>
> First. We recognize the importance of the Rio Grande River problem to all of northern New Mexico and to the Pueblos. The Pueblos, no less than their white neighbors, want to see the floods controlled, the water for irrigation increased, and the water-logged lands restored to cultivation.
>
> Second. The council holds itself absolutely uncommitted to any detail of engineering or financing plan, and to any surrender of land for reservoirs or any other conservancy purpose. The council will duly consider the physical and general financing details of any river project when the officers of the Middle Rio Grande conservancy district, and especially the engineers, have completed their study. We are informed that such study has not yet been completed. Subject to the above—
>
> Third. (a) We shall oppose any plan threatening the destruction of any Pueblo village, now or in the future.
>
> (b) If any reimbursable debt be placed on Pueblo lands, we insist that it be no larger than the amount justified by the direct Pueblo benefits.
>
> (c) We insist that our existing improved acreage—

That, Mr. President, refers to the 8,346 acres in controversy in this connection—

> or its equivalent in lands newly reclaimed, shall remain free from debt of whatever character and from all charges for water. We are opposed to any plan under which the amount of free water for irrigation, which the Pueblos now use or which may be recovered under the Pueblos lands act, or through the independent suits authorized in that act, shall be diminished.
>
> (d) If any reimbursable debt be placed on Pueblo lands of whatever character we insist that such debt be payable out of a share of the crop yield exclusively from the newly developed lands—

That is, from the 15,000 acres—

> but in any case at a rate not exceeding one-fortieth part in any one year.
>
> (e) We insist that any legislation involving the Pueblos in the conservancy project shall contain guaranties against the allotment of our lands.
>
> (f) We are opposed to any condemnation of Pueblo lands for conservancy, and we insist that any land required from the Pueblos shall be agreed to and described in the enabling act.
>
> (g) Because of the many complicated issues involved, we urgently recommend that no effort be made to provide authorization or money involving the Pueblos in the conservancy project in any general appropriation bill or deficiency appropriation bill, but that any legislation sought shall in the first instance be a special act authorizing an appropriation, and shall be considered by the Indian Affairs Committees as well as the Appropriations Committees of Congress.

Mr. President, Senate bill 700 as introduced, as supported by the Department of the Interior and the Indian Office, and as reported from the Committee on Indian Affairs of the Senate unanimously, and as passed by the Senate, contained substantially all of the provisions asked for by these Indians at their formal tribal council meeting; and I think it is of interest to the Senate that on December 1, 1927, Pearce C. Rodey, attorney for the conservancy district, addressed a letter to Hon. Richard H. Hanna, attorney at law, Albuquerque, N. Mex., who represented the Indians and advised them concerning their interests in this conservancy development. Some attempt has been made here to infer that because Judge Hanna was employed at a nominal fee by the American Indian Defense Association in connection with certain other matters he therefore is in some way influenced by the Indian Defense Association in the position which he takes upon the matter now in controversy before the Senate. I have not the honor of the personal acquaintance of Judge Hanna, but I am informed that he is one of the most distinguished members of the bar of the State of New Mexico; and I submit that his statements with regard to this matter are worthy of consideration regardless of whether or not he is employed or under retainer by the American Indian Defense Association in some other matter.

Mr. BRATTON. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. BLEASE in the chair). Does the Senator from Wisconsin yield to the Senator from New Mexico?

Mr. LA FOLLETTE. I shall be glad to yield.

Mr. BRATTON. I am more fortunate than the Senator from Wisconsin in the particular regard he is now discussing. Judge Hanna is an outstanding citizen and one of the ablest lawyers

in the State of New Mexico. His character and his reputation can not be assailed. I do not agree with him in the particular matter we are now discussing; but, that question aside, it is my pleasure to assure the Senate that Judge Hanna is one of the leading citizens of New Mexico, and as good a man as can be found anywhere.

Mr. LA FOLLETTE. I am glad to have the Senator make that statement, because when this matter first came up for consideration and I made some suggestion about the position of Judge Hanna in this matter, the Senator from New Mexico made reference to the fact that he was under retainer by the American Indian Defense Association, and the clear implication of that statement was that this attorney would therefore be influenced in his statements concerning some other proposition. If the Senator from New Mexico did not intend to make that implication in his statement, I am glad to have given him the opportunity to amplify it in the RECORD, because I submit that the language which the Senator used was subject to that inference.

Mr. BRATTON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin further yield to the Senator from New Mexico?

Mr. LA FOLLETTE. I do.

Mr. BRATTON. It was not so intended, Mr. President. The Senator from Wisconsin referred to the fact that Judge Hanna was attorney for the Indians, and I replied to the suggestion. "Under the employment of the Indian Defense Society," the secretary of that society being the one that has espoused the opposition to this bill, and has inspired a nation-wide opposition to it to the best of his ability. I expressly acquit Judge Hanna of any improper motives in this or any other matter, but I can not say that for some others in connection with the Indian Defense Society.

Mr. LA FOLLETTE. Mr. President, I do not propose to be drawn into any controversy between Mr. Collier and the Senator from New Mexico. They can settle that controversy between themselves; but I do desire to say that I have come in contact with Mr. Collier during the last few years, I have found him to be reliable, and I have found him to be conscientious in his effort to protect the rights of American Indians.

Mr. BRATTON. Mr. President, if the Senator will yield, I regret exceedingly that I can not share the view of the Senator from Wisconsin with reference to Mr. Collier.

Mr. LA FOLLETTE. The Senator is entitled to any opinion he desires to have in the matter, but I think I have had as long an acquaintance with Mr. Collier as the Senator from New Mexico has had, and I reiterate the statement which I just made concerning him.

On December 1, 1927, Mr. Pearce C. Rodey, the attorney for the conservancy district, addressed a letter to Hon. Richard H. Hanna, and I desire to quote only one paragraph from the letter. He said:

> We have conceded practically all that was ever asked in those resolutions—

Referring to the resolutions adopted by the Indians which I have just read—

> that you sent to me, and have considered all the suggestions that came through you or those you represent. Of course, the Indians have really a gratuity under this bill for the present cultivated acreage; and inasmuch as the lien can not be enforced as to the other lands so long as title thereto is held by the Indians, this gives ample protection against the enforcement of the lien.

On page 31, part 1, of the hearings upon Senate bill 700, as introduced, and which, I think, fully protected the rights of the Indians in this matter, there are set out a number of telegrams addressed to Mr. Collier, signed by the governors of the various pueblos, and also by Sotero Ortiz, president of the council of all the New Mexico pueblos. The import of those telegrams is approval of the bill as introduced, which they were subsequently informed carried out the resolutions adopted by them in 1927. I desire, without reading, to have those telegrams incorporated as a part of my remarks.

The PRESIDING OFFICER. Is there objection?

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

ISLETA, N. MEX., *January 19, 1928.*

JOHN COLLIER, *Washington, D. C.*

To whom this may concern:

On December 1, 1927, a meeting was held at Santo Domingo, N. Mex., of all the river pueblos and formally instructed John Collier, secretary Indian Defense Association, to represent the pueblos in obtaining protection on conservancy matters.

ANTONIO ABEYTA,
Secretary New Mexico All Pueblo Council.

ALBUQUERQUE, N. MEX., *January 19, 1928.*

JOHN COLLIER,

57 Bliss Building, Washington, D. C.:

Be it resolved by the council of all the New Mexico pueblos assembled at Santo Domingo, N. Mex., January 19, 1928, for the consideration of Senate bill No. 700, regarding appropriation by the Government in aid of the Rio Grande conservancy district as it relates to Indian lands, as follows:

First, that we are opposed to any reimbursable debt against the Indians, even as to newly reclaimed lands, considering this a burden too heavy for us to bear; second, that we are strongly in favor of the provisions of said bill for the protection of Indian lands and rights; third, that though doubtful of ultimate benefit to the Pueblo Indians if the costs to be advanced by the Government are charged against the Indians as a reimbursable debt, we are aware of the fact that conservancy legislation affecting Indian lands is likely to be enacted and we renew our expression of faith in and authorization to the American Indian Defense Association and John Collier to represent our interests in that regard, and ask them specifically to support in any proposed legislation, including Senate bill 700, such provisions as said bill contains for the benefit of the Indians, not including any reimbursable debt, and if a reimbursable debt is unavoidable, which we should regret, you are authorized to support said Senate bill 700 in its entirety; fourth, the following pueblos being present and voting unanimously; for this resolution—Taos, Santa Clara, San Juan, Nambe, San Ildefonso, Santo Domingo, Tesuque, San Felipe, Santa Ana, Cohito, Sandia.

COUNCIL OF ALL THE NEW MEXICO PUEBLOS,
By SOTERO ORITZ, *President.*
CLETO TAFOYA, *Secretary.*

ALBUQUERQUE, N. MEX., *January 19, 1928.*

JOHN COLLIER, *Washington, D. C.:*

Although not present at Domingo meeting, we have signed resolutions of pueblo council at our own meeting in Salete, and join, with other pueblos, in expressing satisfaction with your work on conservancy bill and in authorizing you to use best judgment in supporting Senate bill 700 in whole or in part.

JOSE PADILLA, *Governor Isleta Pueblo.*

DOMINGO, N. MEX., *January 19, 1928.*

JOHN COLLIER, *Washington, D. C.*

DEAR MR. COLLIER: You are hereby given full authority to support, in whole or in part, the pending Rio Grande conservancy bill on behalf of this pueblo.

JUAN ABILA,
Governor Sandia Pueblo.

DOMINGO, N. MEX., *January 19, 1928.*

JOHN COLLIER, *Washington, D. C.*

DEAR MR. COLLIER: You are hereby given full authority to support, in whole or in part, the pending Rio Grande conservancy bill on behalf of this pueblo.

LORENZO SANCHEZ,
Governor San Felipe Pueblo.

DOMINGO, N. MEX., *January 19, 1928.*

JOHN COLLIER, *Washington, D. C.*

DEAR MR. COLLIER: You are hereby given full authority to support, in whole or in part, the pending Rio Grande conservancy bill on behalf of this pueblo.

TOMASITO TENORIO,
Governor Santo Domingo.

DOMINGO, N. MEX., *January 19, 1928.*

JOHN COLLIER, *Washington, D. C.:*

Santa Ana pueblo sends full authority speak for us all hearings Senate bill 700, and send heartfelt thanks for work you have already done.

JOSE REYLEON,
Lieutenant Governor.

DOMINGO, N. MEX., *January 19, 1928.*

JOHN COLLIER, *Washington, D. C.*

DEAR MR. COLLIER: You are hereby given full authority to support, in whole or in part, the pending Rio Grande conservancy bill on behalf of this pueblo.

AMBROSIO MARTINEZ,
Governor San Juan Pueblo.

DOMINGO, N. MEX., *January 19, 1928.*

JOHN COLLIER, *Washington, D. C.*

DEAR MR. COLLIER: You are hereby given full authority to support, in whole or in part, the pending Rio Grande conservancy bill on behalf of this pueblo.

VICTORIANO SISNEROS,
Governor Santa Clara Pueblo.

DOMINGO, N. MEX., *January 19, 1928.*

JOHN COLLIER, *Washington, D. C.*

DEAR MR. COLLIER: You are hereby given full authority to support in whole or in part the pending Rio Grande conservancy bill on behalf of this pueblo.

JULIO ABEGATO,
Governor Tesuque Pueblo.

DOMINGO, N. MEX., *January 19, 1928.*

JOHN COLLIER, *Washington, D. C.*

DEAR MR. COLLIER: You are hereby given full authority to support in whole or in part the pending Rio Grande conservancy bill on behalf of this pueblo.

LOUIS ORTIZ,
Governor Cochiti Pueblo.

DOMINGO, N. MEX., *January 19, 1928.*

JOHN COLLIER, *Washington, D. C.:*

Advise Senate committee you have full authority—speak for us in all matters relating to conservancy bill. We are all behind you.

LORETO VIGIL,
Governor Nambe Pueblo.

DOMINGO, N. MEX., *January 19, 1928.*

JOHN COLLIER, *Washington, D. C.:*

San Ildefonso pueblo sends you its consent to represent it in all hearings on the conservancy bill, S. 700.

ANTILANO MONTOYA, *Governor.*

SANTA FE, N. MEX., *January 19, 1928.*

JOHN COLLIER, *Washington, D. C.:*

Although not affected by conservancy, we were present Domingo meeting and send you full support and appreciation for your work on behalf of pueblos.

TASO PUEBLO,
By MANUEL CORDOVA, *Governor.*

Mr. LA FOLLETTE. Mr. President, I desire to read a telegram dated at Albuquerque, N. Mex., January 20, 1928, appearing on page 33 of the hearings, and signed by Hanna & Wilson, Mr. Wilson being a partner of the Judge Hanna to whom I have just referred. This is addressed to John Collier, and reads:

ALBUQUERQUE, N. MEX., *January 20, 1928.*

JOHN COLLIER, *Washington, D. C.:*

As counsel for each pueblo affected by conservancy district, attended general meeting September 17 where pueblos took definite stand on conservancy, and subsequent meeting December 1, where they renewed position demanding protective measures in conservancy bill and gave you unqualified authority represent them in obtaining such protection. Also attended meeting January 19, where Senate bill 700 read in full Spanish and Indian languages and discussed from all angles. Indians much relieved by protective measures in bill and passed resolution authorizing you speak for them. Indians opposed any reimbursable debt but feel if such debt unavoidable the safeguards contained in bill are absolutely necessary. We have represented this Indian attitude in number of informal meetings local conservancy heads and believe they realize solidity of Indian feeling.

HANNA & WILSON.

Mr. President, following that long controversy, following the indorsement given by these pueblos to this bill, it was reported unanimously from the Senate Committee on Indian Affairs in the form of Senate bill 700. It was passed in the Senate by unanimous consent, it went to the House, there it was amended without explanation given, the House striking out the protective features which the Indians have insisted upon in every step taken in this controversy. It was brought back here in the form of a message from the House of Representatives, and passed without any explanation of the changes which had been made in the House.

It then became necessary to move for reconsideration. The bill was rereferred to the Senate Committee on Indian Affairs, and there, after a hearing, the committee divided very closely, only one majority being secured for the report of the bill to this body in the form in which it now is before us.

It should not be necessary to discuss the merits involved in this question, following the action of repudiation by the House of Representatives in their action in this amendment, and by the Senate committee in reporting this bill, a repudiation of the understanding upon which these Pueblo Indians supported and indorsed the original bill.

I submit it as my judgment that if this proposition had been presented de novo before the Senate Indian Affairs Committee in the form in which it is now before the Senate that committee never would have reported the bill in its present form. If there had been a real investigation into the merits of this controversy, if we had had a full attendance of the committee, in my judgment that committee never would have authorized the report of this bill.

The cry is raised that unless we are willing to accept the House amendment no legislation can be passed at this session of Congress. I do not pretend to be prophet enough to predict as to whether or not that assumption is correct, but until this body has exercised every legislative step to bring justice to these Indians it has not fully discharged its obligation. If we accept the assumption of the Senator from New Mexico that this legislation can not pass without either attempting to amend the House amendment and send it back to the other body, where it will come up on the floor and be discussed on its merits, or else reject the House amendment and demand a conference, we will not have exhausted our legislative remedies and we will not have discharged our full obligation.

Mr. President, the gratuity features in Senate bill 700 as reported from the committee originally were based, in my judgment, upon a recognition of the fact that this 8,346 acres, cultivated since known historical times by these Pueblo Indians, would not receive sufficient benefits under this proposal to justify assessment against them of the large amount of $67.50 an acre, which is proposed in the bill as it now is before us.

I defy any Senator to examine the record of the Senate Indian Affairs Committee upon this measure, or the proceedings before the House Appropriations Committee on it, and find any showing of facts as to the benefits which this 8,346 acres will receive as a result of this bill. As a matter of fact, in so far as those hearings touch upon that question, they show, I think, clearly a recognition of the fact that the Indians are not to receive any such benefit on these 8,346 acres as is provided in this bill.

In that connection I wish to draw attention to the statement which has been previously quoted by Mr. Reed, the engineer in chief for the Indian Bureau on reclamation matters. Appearing before the committee on January 20, 1928, Mr. Reed declared:

> The only relief that the Indians will have, of course, is on the main canal, which will serve not only their lands but the lands below. The distributing system and everything except the main carrying canals will be handled by the Indians.

Further he stated:

> As a physical fact, the Indian system and the white man's system of distribution will be separate except in so far as those lands that have passed from Indian ownership—the lands within the pueblos that have passed from Indian ownership to white men—the title to which is now being worked out by a committee that was appointed for that purpose.

Mr. Reed stated further:

> I do not know of another irrigation system in the United States, and I think I know every one of them, that has physical conditions similar to what we have here. This is a shoe string, with a canal passing down one side. The Indian lands take-out would be project expense. But the moment the water leaves the take-out it is on Indian land, and would not be subject to white use excepting on the lands that I have described as having passed out of Indian ownership.

He stated further, on page 22:

> These Indians have had a system that has served their purpose, perhaps to them satisfactorily, but not scientifically. They still think that they can go on and exist and perhaps prosper under the same conditions. The lands that have become waterlogged have become so not from acts of the Indians but as the result of civilization.

The other day, when the Senator from New Mexico had the floor, I referred to a statement of Mr. Burkholder, the engineer for the conservancy district, in his appearance before the House Appropriations Committee on the Interior Department appropriation bill for 1929. These are the only statements which I have been able to find concerning this question of the controversy over how much the 8,346 acres are to be benefited. The Senator from New Mexico on yesterday maintained that they would receive a benefit amounting to $67.50 per acre, but I submit that he did not furnish to the Senate any definite, detailed statement as to what that benefit would consist of, even though he was pressed to do so by my colleague.

Three of the maps which I have been able to obtain concerning these pueblos make an interesting showing. I am sorry that I have not had an opportunity to prepare them in sufficient size so that they could be used here in the Chamber, because I think a physical picture of exactly the situation that exists there would be of help to the Senate in arriving at a conclusion.

In connection with the statement concerning the 8,346 acres now under cultivation by the Indians, and which have been under cultivation for at least 300 years, I desire to bring to the attention of the Senate a report made by the Pueblo Lands Board, created under authority of the Pueblo lands act of 1924. That board consists of a chairman, appointed by the President of the United States, a member appointed by the Attorney General, and a member appointed to represent the Secretary of the Interior. This report deals with the Santo Domingo pueblo. The board states:

The two main bodies of cultivated Indian lands, a part of this 8,346 acres under discussion, lie in the vicinity of the pueblo west of the Rio Grande and directly opposite the pueblo on the river's right bank. Much of the lands that the Indians irrigate and farm is of the very best quality, rich alluvial soil, with just sufficient mixture of sand to prevent its baking. Some of the land is too sandy. Some of it would be benefited by drainage, but on the whole—

I direct the attention of the Senate to this language—

But on the whole the land they cultivate is better in quality and in much better present condition as to drainage than most of the agricultural lands in the valley between White Rock Canyon and San Marcial, whether Indian or non-Indian. Generally these Indians cultivate their land as well or better than most of the non-Indian landholders in the valley.

One other point from this report:

There is ample water ordinarily for the cultivation of all the Indian and non-Indian land now cultivated within this grant. It is probable that an effective reorganization of all the irrigation and drainage systems of the Middle Rio Grande Valley, which includes this and several other pueblo areas, if accompanied with effective provisions for flood control, will enhance the effectiveness and productivity of the land within the Santo Domingo pueblo already cultivated and also enable the irrigation of some additional land. The Indians themselves, however, if they are to be charged with any appreciable burden of such improvement, could not well stand such burden. It should always be borne in mind that their rights to the water for the irrigation of the lands they have cultivated can not be interfered with.

Mr. President, there is much said in behalf of the bill because it is alleged to confirm the rights of the Indians to water. A little later in my remarks I shall demonstrate that that means absolutely nothing to the Indians. Their rights to the water are absolutely and amply protected and can not be taken from them except by act of Congress.

Mr. COPELAND. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from New York?

Mr. LA FOLLETTE. I yield.

Mr. COPELAND. As a matter of fact, have not these lands been cultivated by the Indians for many hundreds of years?

Mr. LA FOLLETTE. Much is made of a statement by Mr. Pearce Rodey, attorney for the Rio Grande conservancy district, in which he said, and I think I quote him correctly or substantially correctly at least, that it has been said that 23,000 or 25,000 acres were cultivated in prehistoric times. The Assistant Commissioner of Indian Affairs picked up that statement and reiterated it without support before the Committee on Indian Affairs of the Senate. But so far as history tells us the lands have been cultivated for more than 300 years by these Indians through their own initiative and through their own system of irrigation which they themselves constructed.

Mr. COPELAND. Then there is no doubt about the rights of the Indians to the water powers and the irrigation ditches?

Mr. LA FOLLETTE. There is no question about it. There is in controversy now some land which the Indians claimed had been taken away from them before the year 1910 by the whites, but in so far as their rights to the 8,346 acres and to the water are concerned, there is no question that they are absolutely in full possession of them, and they can not be diminished or set aside except by a plenary act of Congress.

Mr. COPELAND. If the Senator will bear with me a moment, I have not had the pleasure of hearing everything the Senator said. I trust he will address himself at some time to the question of whether the cultivated lands will actually be benefited.

Mr. LA FOLLETTE. I have been addressing myself to that question, and I have given such information as I could find from a perusal of the hearings. I went into that subject before the Senator entered the Chamber. I desire to say, however, and I think perhaps it would be of interest to the Senator from New York, that Dr. W. J. Spillman, of the Department of Agriculture, a recognized agricultural expert and economist, was one of those who formed the committee of investigation of Indian matters which has been working with the Department of the Interior. In connection with that work he made a visit to the Middle Rio Grande district and made a general survey of conditions there. I desire to call the attention of the Senator from New York to his statement as quoted by the senior Senator from North Dakota [Mr. FRAZIER] before the committee. It appears on page 60 of the hearings:

I think that if the original principles involved in the bill—

That is, the bill S. 700 as reported from the committee, and not the bill in its present form—

are not adhered to, it ought not to be passed. Unless the original principles can be adhered to, I would oppose this bill as a vicious piece of legislation. It would mean that the Indians could not possibly pay for it. Anyone with experience in irrigation matters knows that the white man could not pay for it. If they want to put the Indians in a position to redeem themselves and make them civilized, they can never do it in this way, as it is entirely unjust to the Indians.

Mr. COPELAND. Mr. President, if the Senator will yield a moment further, it has seemed to me that the only possible justification for putting such an enormous debt upon the raw lands of the Indians would be a material benefit to the cultivated lands.

Mr. LA FOLLETTE. No such benefit has been shown. Let me recall to the mind of the Senator from New York that when the bill S. 700 was first introduced it had the indorsement of the Bureau of Indian Affairs, Department of the Interior, and was indorsed by the Pueblo Indians themselves after most careful consideration. That bill contained a gratuity feature so far as the 8,346 acres of land were concerned, and it was upon that consideration, and that consideration alone, that the consent of the Indians to the passage of the bill was obtained. Now, we are confronted with a situation where the bill has been fundamentally and radically changed, and yet there is no showing made as to the benefits which would accrue to the 8,346 acres of land except the general statement made by the Senator from New Mexico [Mr. BRATTON] that in his opinion they would be benefited to the extent of $150 per acre.

Mr. COPELAND. Mr. President, will the Senator yield again at that point?

Mr. LA FOLLETTE. I yield.

Mr. COPELAND. As I understand it, there really is added to the mortgage on the raw land about $500,000, which is put there on the theory that a large improvement is made to the cultivated lands.

Mr. LA FOLLETTE. The Senator is correct in that statement.

Mr. COPELAND. That means that there is placed upon the raw lands a mortgage——

Mr. LA FOLLETTE. A debt.

Mr. COPELAND. A debt which, as I view it, could never be met.

Mr. LA FOLLETTE. A debt of $109 an acre.

Mr. COPELAND. In my section of the country if a farm were mortgaged for $109 an acre, it would be lost to the owner; so I take it that these raw lands are practically lost if this great burden is placed upon them. Does the Senator take that same view?

Mr. LA FOLLETTE. I am apprehensive, if the bill passes in its present form, unamended, that so far as the 15,000 acres are concerned they will ultimately pass from Indian ownership.

Mr. COPELAND. Certainly the Indians can never pay the enormous debt which is proposed to be placed upon them.

Mr. LA FOLLETTE. Not granting the justice of burdening these acres to that extent, I believe that the Indians could pay out if they were given a long period in which to do it and ample protection specified in the bill. But under the terms of the bill the Secretary of the Interior will fix the rate at which the Indians are to repay.

Mr. BRATTON. Mr. President, will the Senator yield to me?

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from New Mexico?

Mr. LA FOLLETTE. I am glad to yield.

Mr. BRATTON. I disclaim any intention to interfere with the Senator while he is making his address, but let me remind him and also the Senator from New York of the fact that as long as the Indians own this land the lien is not foreclosable and that the Government can not take more than the proceeds of the leases upon the raw lands. How can the Indians be harmed if the legislation relieves them of what has been characterized as an intolerable condition gradually creeping upon them, which will drive them out of the valley and which will compel them to sever their tribal relations and go elsewhere, a thing that is of supreme importance to them?

Instead of their being confronted in the future with the condition that their land will become water-logged and alkali,

and instead of their little villages being moved, under the terms of the bill their present 8,300 acres will be reclaimed in a modern way. Instead of irrigating it in a crude fashion they will irrigate it and cultivate it in a modern way.

The value of the land will be increased from its present value of approximately $25 an acre to from $150 to $200 per acre. In addition the yield upon that acreage will be increased perhaps fourfold. That is the thing that will occur to the present 8,300 acres, with the added fact that their water rights, which are now uncertain, undetermined, and unadjudicated, will become certain, determined, and adjudicated, and given a priority over any other rights in the district, as well as security against loss by abandonment or nonuse. That is the change that will occur as to the 8,300 acres.

Then as to the 15,000 acres, which is absolutely worthless to the Indians now, it is proposed to take that land and reclaim it at Government expense and make it worth a great deal of money, from $150 to $200 per acre. Under the amendment proposed by the Senator from Kansas [Mr. CURTIS], which I have accepted, the Indians will be entitled to use 4,000 acres without compensating the Government in any wise, so that they will be using the 12,000 acres of irrigated land with a modern system of reclamation. Then the Government takes the proceeds of the leases and applies them to reimbursing the Treasury, and that is all the Government gets as long as the Indians own the land, be it 50 years or 100 years or 200 years.

If any injustice or hardship shall be worked under this bill, it will be upon the Treasury of the United States and not upon the Indians. I desire to put these facts clearly in the RECORD to demonstrate that the argument of the Senator from Wisconsin [Mr. LA FOLLETTE] is based upon a misconception of the situation as it now exists, for he overlooks the fact that these Indians can not continue to live in that valley; they will be driven out, and the whites likewise will suffer the same fate.

Mr. COPELAND. Mr. President, they will be driven out by reason of the water-logging of the land and the alkalinity of the soil?

Mr. BRATTON. They will be driven out, as the Senator suggests, by the water-logging and the alkalinity of the soil. The water line is gradually rising.

The Senator from Wisconsin has stated that nobody has shown how the present acreage will be benefited. I said yesterday, and I want to repeat now—and then I am not going to interrupt the Senator any further——

Mr. LA FOLLETTE. I do not want the Senator to feel under any compunction about interrupting me; I am very glad to have him do so, because he was very kind to me when he was discussing the matter.

Mr. BRATTON. As to the benefit that will be derived by the 8,300 acres, I pointed out yesterday that the Indian Bureau has acted in conjunction with the district for more than a year now in developing this plan. We appropriated $50,000 in order that the Indian Bureau might cooperate with the district and might follow this plan as it was developed. The Indian Bureau has done that through its staff of engineers; its chief engineer is a member of the consulting board; so that the guardian of the Indians has kept in touch with this plan as it has developed. The Bureau of Indian Affairs has stamped its approval upon the project in so far as the improvement of Indian conditions is concerned. It has never departed from the course and never doubted its wisdom.

Moreover, the staff of engineers in the district and the consulting board of the district, composed of some of the most eminent engineers of the country, have stated that it will be an improvement, that it is being developed along proper and conservative lines, and that it should be encouraged.

Mr. President, I repeat that this bill, although different from what was contemplated at the outset, is not unjust to the Indians; it is not harsh upon the Indians. If it were, I would be the last one to stand here and defend it. I believe I know as much about the conditions there as does the Senator from Wisconsin; I believe my colleague [Mr. CUTTING] knows as much about conditions there as does the Senator from Wisconsin; I believe the Representative of New Mexico in the Chamber at the other end of the Capitol knows as much about conditions there as does the Senator from Wisconsin; I believe the governor of the State, who has sent an urgent telegram here indorsing the bill in its present form, and who is familiar with conditions, knows more about the conditions than do those who are opposing the bill.

The opposition to this legislation does not spring from the Indian Bureau; it does not spring from those who represent the State; but it springs from the secretary of the Indian Defense Society.

Mr. LA FOLLETTE. Mr. President, the Senator from New Mexico raises the cry that is always raised here when matters of this kind are in controversy. If through all the history of Indian legislation the arguments and wishes of Senators and Members of the other House representing the States in which Indian lands and Indian property are situated had been accepted by this body, a much blacker record so far as the Indians are concerned would have been written than has been written.

I stated at the outset that it was not a pleasant task for me to rise on the floor and oppose a measure supported by the two Senators from New Mexico, but I am convinced that an injustice is being proposed, that a violation of an agreement or a substantial agreement between the Indian tribes and the conservancy district is about to be committed if this measure shall be enacted into law in its present form.

Mr. President, the Senator from New Mexico thinks that the only lien which can be enforced so long as the Indians own this land is that against the proceeds from the land, but if the entire yearly proceeds shall be taken under the reimbursable feature of the proposed act, as they may be taken, of course the interest of the Indians and their desire to retain ownership in this land will have passed; they would not be tempted to go onto this land to farm it, and then at the end of the year have the proceeds taken from them and turned over under the reimbursable features of this measure. That, Mr. President, is my reason for stating that I am apprehensive if this bill shall pass in its present form that ultimately the 15,000 acres or a large portion of that acreage will pass from Indian ownership into the ownership of the whites.

Much has been said on the floor about the diminution of Indian lands and it has been charged that that was due through the years to the encroachment of water upon those lands. As a matter of fact, I think I shall be able to show that the encroachment and resulting lessening of Indian lands occurred between about 1870 and 1910.

Mr. President, in my judgment, such loss of land as the Indians have sustained during their occupancy has been largely due not to water-logging but to the encroachment of the whites upon Indian property. That has resulted in a controversy. Finally Congress enacted the Pueblo lands act in 1924 in order to settle that controversy and to establish procedure whereby the controversy between the Indians and those whites who, the Indians claimed, had encroached upon their lands could be adjudicated. I call attention to the fact that the adjudications with regard to the Santo Domingo pueblo, which, by the way, is within this conservancy district, have just been completed. There were contested about 641.8 acres, to which the Pueblos held title but which were occupied by the whites. Of that area, 550.71 acres were decreed to the whites and 91.9 acres to the Indians. That is an example, Mr. President, of how some, at least, of this loss of acreage on the part of the Indians has taken place.

Mr. KING. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Utah?

Mr. LA FOLLETTE. Will the Senator from Utah permit me to complete the statement?

Mr. KING. Certainly.

Mr. LA FOLLETTE. I desire to direct the attention of the Senate to certain figures, which I take from hearings, concerning the question of the diminishing Indian acreage. I direct attention to the statement on page 350 of the hearings of 1923 on House bill 13452 of that session of Congress. The Assistant Commissioner of Indian Affairs furnished a table showing the Indian acres which the six tribes located in this conservancy district had under cultivation. According to his figures, the area was 4,841 acres. In 1927, according to the statement made on page 360 of the hearings before the House Appropriations Committee, there were 7,513 acres, which, I think, demonstrates the fact that these Indians have not been losing their land as a result of water-logging to any great extent. Doctor Spillman informed me that these Indians as a result of experience through all the years had selected their lands on the higher areas and expressed the opinion that if there was any danger from water-logging it was the result of the advance of civilization and not of faulty irrigation on the part of the Indians.

Mr. CUTTING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from New Mexico?

Mr. LA FOLLETTE. I yield to the Senator.

Mr. CUTTING. I did not hear the Senator when he began his last statement. From whom did he get that information?

Mr. LA FOLLETTE. I obtained the information from Dr. W. J. Spillman, of the Department of Agriculture, a recognized authority on agricultural problems and an economist of note, who visited this area in connection with the investigation which he was making for the Department of the Interior.

Mr. CUTTING. May I ask the Senator whether Doctor Spillman is an authority on the history of New Mexico?

Mr. LA FOLLETTE. Mr. President, I did not ask the doctor about that; but I assume, as he is a scientific man, that he made a careful and impartial investigation.

Mr. FRAZIER. Mr. President, will the Senator yield?

Mr. LA FOLLETTE. I yield.

Mr. FRAZIER. I should like to say, in regard to that, that for a number of years Doctor Spillman has made a special study of irrigation projects under the Department of Agriculture all over the country; and I think he is probably as well posted on irrigation projects as anyone connected with the Agricultural Department.

Mr. CUTTING. It was merely the historical statement that I questioned.

Mr. LA FOLLETTE. Mr. President, it is asserted here over and over again that if this project goes through, these 8,346 *acres will be* benefited fourfold. I submit that the fact which is in the record that 3,500 Indians are now living on this area, and therefore that each 2½ acres supports an Indian, is sufficient contravention of the suppositious statement that the benefit to these 8,346 acres will be fourfold in character.

Also, Mr. President, it is reiterated over and over again, as a justification for what is being done in this bill with regard to the 8,346 acres, that the value of this land is to be enormously enhanced. The Senator from New Mexico talks about figures of $150 to $200 an acre. I do not know why he stops at $200. Why did he not go on? In that connection, however, I want to submit for the attention of the Senate and for the RECORD a statement contained in a publication entitled "Department of the Interior, United States Reclamation Service, in cooperation with the State of New Mexico. Reports and recommendations for the reclamation of the Middle Rio Grande Valley of New Mexico, 1924." Vernon L. Sullivan was the consulting engineer. Here is what he has to say concerning valuation:

> Present valley land valuations under existing uncertain conditions are about $100 for first-class irrigated land; $50 per acre for second-class irrigated land; $17.50 for alkali and salt grass land; $12.50 for swamp or submerged land; $17 for timberland; and river-bed areas, nothing.
>
> These lands, when drained, the alkali content is easily removed by leaching or irrigating, and when properly reclaimed their valuations would average far above $100 per acre over and above any reclamation costs that might be necessary to provide funds for the reclamation of the valley.

I also desire to read briefly from a table appearing on page 14 of that report, in which he says:

> Before reclamation—
>
> In figuring up the total valuations—
>
> First-class acres at $100 per acre.
>
> After reclamation—

I assume he refers to first-class acres—

> $100 per acre.

Mr. President, it is admitted that under the terms of this bill as now drawn the 15,000 acres to be newly reclaimed will bear a reimbursable debt of $109 per acre. Senators in this Chamber who come from regions of the country where irrigation projects are in progress know better than I do that that is an excessive charge per acre to lay against any reclamation project. As stated by Doctor Spillman, a white farmer could not carry that load, let alone an Indian farmer.

Mr. KING. Mr. President, will the Senator yield?

Mr. LA FOLLETTE. I yield to the Senator from Utah.

Mr. KING. I ask for information. If the amendment of the Senator from Kansas [Mr. CURTIS] is accepted, which withdraws 4,000 acres from the 15,000 and renders it immune from payment, would not the burden placed upon the residue be much greater than $109 an acre?

Mr. LA FOLLETTE. I have not figured it out for the 4,000 acres; but on the suggestion that there should be 5,000 acres withdrawn, which was made yesterday on the floor, I figured out that the 10,000 acres would bear a burden of approximately $163.44 per acre.

It is not any defense to say that this lien can not be foreclosed, when it is provided that the proceeds from the leases are to be taken to pay this debt. Assuming that 5,000 acres of this newly reclaimed area were given to the Indians for farming purposes, and the other 10,000 acres were to bear a debt of $163.44 per acre from proceeds of leases, does any Senator contend that any Indian would continue to own that land or make an effort to farm it? He might just as well be a peon, because every cent of the proceeds from that land could be taken, under the terms of this bill, for the reimbursement of the charges which are made against the other lands. It comes down to a simple proposition—that in exchange for this area which the Indians are to be given, 10,000 acres, improved and irrigated, will ultimately pass into white ownership.

Mr. BRATTON. Mr. President——

The PRESIDING OFFICER (Mr. THOMAS in the chair). Does the Senator from Wisconsin yield to the Senator from New Mexico?

Mr. LA FOLLETTE. I yield.

Mr. BRATTON. The point the Senator has just made, in regard to the 4,000 acres——

Mr. LA FOLLETTE. I said "5,000 acres," Mr. President, because I had not made the calculation for 4,000.

Mr. BRATTON. Leaving 10,000 acres to be leased, and the proceeds of the leases to be applied to reimburse the Treasury—with that in mind, the Senator has just made the statement that the remaining 10,000 acres would bear a debt of $163 per acre, and about that he complains.

Mr. LA FOLLETTE. Does the Senator controvert that?

Mr. BRATTON. I want to call the Senator's attention to the fact that his position is to advocate that the Indians not only have a gratuity for the 8,300 acres, but that they must have a gratuity for 12,000 acres, because he waves that aside and complains that the debt is upon the remaining land. He overlooks the fact that the Government is reclaiming 12,000 acres of land and enhancing its value and improving the conditions, as I have endeavored to point out. He waves that aside as though that were not to be considered, and confines his view of the bill to the remaining 10,000 acres of land, and complains because the debt upon it is too heavy, forgetting that the Indians will be using the 12,000 acres in the manner I have indicated.

The pending bill amounts to this, and the Senator can not controvert this, that the total cost of reclaiming the Indian lands shall not exceed $67.50 per acre, and that the total cost of reclaiming white-owned lands is $77 per acre.

Mr. LA FOLLETTE. Seventy-six dollars and twelve cents, is it not?

Mr. BRATTON. Approximately $77, I think. It has been stated as $77. The Indian cost shall never exceed $67.50 per acre; but in figuring the reimbursement the cost is laid against the raw land that is now worthless to the Indians. The Senator can not continue to say, and I am sure he will not continue to say, that the cost is $109 an acre and $163 an acre, when, under the bill, it is not to exceed $67.50 per acre—a remarkably low figure.

Mr. LA FOLLETTE. I shall continue to make that statement, Mr. President, because my contention is that there is no justification for the claim that $67.50 per acre of benefits is to flow to these 8,346 acres of land; and I have argued here in vain if I have not impressed those Senators who gave me their attention on that point.

What this really comes down to is that the proponents of this measure, having been checked in their efforts to secure this bill with the gratuity feature in it covering these 8,346 acres, now contend that a benefit of $67.50 per acre will accrue to these 8,346 acres, because otherwise there would not be a vestige of an argument to justify the passage of this bill in its altered form, and altered, as I have pointed out, after the consent of the Indians had been formally given to its passage with the gratuity feature in it.

In that connection, Mr. President, I want to read a telegram from Sotero Ortiz, who for five and a half years has been president of the council of all the Pueblos involved in this matter. It was addressed to Mr. Collier under date of February 10:

> We Pueblos never would have indorsed the conservancy bill unless we were promised freedom from reimbursable debt in all matters connected with our existing improved lands, because it is a betrayal of faith and ruin to us Pueblos if the reimbursable debt, $1,500,000, placd on newly reclaimed acreage.

Under date of February 12, 1928, Judge R. H. Hanna wired the senior Senator from New Mexico [Mr. BRATTON] as follows:

> Do not feel authorized to waive reservations made by all Pueblo council, and am requesting Collier to take up discussion of these matters with you. Conservancy district, through Robey, in letter to me dated December 1—

Which I have already quoted—

> referring to resolution, says we have conceded practically all that was in the resolution, and also the Indians have really a gratuity under this bill for the present cultivated areas.

I also desire to read into the RECORD in part a telegram addressed to Mr. Collier from Mrs. Mary Austin. She is the

author of numerous books. One of them, The Land of Journey's Ending, is a standard historical and geographical treatise on the history of the Spanish occupation of the Southwest. She is also the author of The Land of Little Rain. I read in part from Mrs. Austin's telegram of February 23:

Urge all friends of Indians to oppose Senate bill 700 until amended to do justice to the Pueblo Indians of Middle Rio Grande Valley. From beginning Indians, through their representatives, sought cooperation and reasonable adjustment. Sudden alteration of bill without consulting Indians' representatives suggests premeditated betrayal, which will be resented by all honest citizens of State as a blot on its good name and an unnecessary destruction of valuable, economic, and cultural asset.

Mr. President, there is one other fact in connection with this situation that I want to draw to the attention of the Senate. In 1926 Mr. Pearce Rodey, attorney for the conservancy district, addressed a letter to Mr. John Collier concerning the cost at which they then thought they could reclaim these Indian acres. He said:

Of course, if it is found that only 15,000 or 20,000 acres of Indian lands can be properly reclaimed, then an appropriation of $600,000 or $800,000 would be sufficient. The chief engineer—

That is, Mr. Burkholder—

says that if it will help the bill at this time it might be wise to cut the appropriation to authorize, say, $700,000.

The attorney for this conservancy district and the engineer in 1926 estimated, respectively, that they could reclaim this Indian land for $35 or $40 per acre. Now, we find that this enormous increase is asked, and I reiterate that there is no showing in the record, either before the Senate Indian Affairs Committee or before the House Appropriations Committee, which justifies the assumption that these 8,346 acres are going to get any such benefit as is claimed by the Senator from New Mexico.

In connection with this debate, Mr. President, much has been made of the fact that the Assistant Commissioner of Indian Affairs, Mr. Meritt, has switched his position and given indorsement to the bill as it is now before the Senate. The Senator from New Mexico directed my attention particularly to Mr. Meritt's statement, which appears on pages 54 and 55 of part 2 of the Senate committee hearings. Mr. Meritt said:

First. The bill before the committee permits an agreement to be entered into between the Secretary of the Interior and officials of the district, and we propose to put in that agreement every provision that is possible for the protection of the Indians.

In answer to that, Mr. President, I submit that the Indian Bureau is indorsing this bill in its present form, and hence the statement of the Assistant Commissioner of Indian Affairs means nothing.

Mr. Meritt continued:

Second. Only lands susceptible of economic irrigation and cultivation within the Indian pueblos can be included under this bill, and the Secretary of the Interior is to determine what lands shall be included, and what lands he shall construe as susceptible of economic irrigation and cultivation. Therefore the district officials can not include any Indian lands within that district that are not subject to economic irrigation and cultivation.

In answer to that suggestion, I think it is clear that its only import is that new lands can not be included, to be paid for by the Government and the district, unless in the Interior Department's judgment they can be drained or irrigated. I see no protection in that statement for the 8,346 acres which form, in my judgment, the principal contention in connection with this bill.

Mr. Meritt said further:

Third. The cost of the improvements to this land is limited to $67.50 per acre over the entire 23,000 acres; $67.50 is not an excessive cost for irrigation.

Mr. President, in answer to that, I desire again to call attention to the statement made by Mr. Rodey, the attorney for the district, and by Mr. Burkholder, the engineer, in 1926, that this land could be reclaimed for approximately $35 to $40 per acre.

Mr. Meritt said:

Fourth. Another benefit the Indians will receive is the provision in the bill that the entire amount, 8,346 acres, has a guaranteed water right. That is a great protection to those Indians. Under the present conditions the Indians have no guaranteed water right on the 8,000 acres. There is no treaty provision with the Pueblo Indians that guarantees them any protection in their water rights. Therefore those Indians will not get the benefit of the decision of the Supreme Court in the Winters case, and for that reason it is a great protection for the Pueblo Indians to have this provision in the bill, and that is one of the provisions we insisted should go into the bill, after visiting the irrigation project.

Fifth. The water rights of the 15,000 acres are recognized in this bill, and they are protected in this bill. That is for the new land. The water rights, old as well as new, shall not be subject to loss because of nonuse or abandonment as long as title shall remain in Indians, pueblos, or individuals. That is another very great protection to the Indians of these pueblos.

Mr. President, it is my information that the laws of the State of New Mexico, including the statutes of limitation and laws of adverse possession, have no effect on Pueblo land grants, which are in no manner subject to the laws of the State of New Mexico. Whatever water rights the newly reclaimed Indian acres possess can not be taken away by any future operation of the New Mexico State laws. No new water rights are given to those acres by the pending bill.

There was at one time a question as to whether the New Mexico Territorial statutes of limitation and adverse possession applied to Pueblo grants, but when New Mexico became a State it renounced all sovereignty over those grants, and since 1912 no State laws have been operative on or affecting the Pueblo land grants.

In other words, Mr. President, the reference to water rights in this bill adds nothing to the water rights which the Indians now have and as to which they are secure in their possession unless they should be taken from them by a plenary act of Congress. The statutes of New Mexico can not apply to this question of water rights.

If there is any necessity to give citations for the contention which I have made, I refer to the enabling act for New Mexico, passed in 1910, and the New Mexico State constitution adopted in 1912. I wish to direct the attention of the Senate to the fact that the constitutionality of the provision to which I have referred was settled by the Supreme Court in 1914 in the so-called Sandoval case.

The sixth of Mr. Meritt's alleged benefits to the Indians under this bill is as follows:

Sixth. The 8,346 acres shall not be subject by the district to any pro rata share of any future operation and maintenance or betterment work performed by the district.

That is another very great protection to those Indians. In all future years they will not be called upon to pay any operation and maintenance cost for the irrigation of lands within the pueblos now protected, which amounts to 8,346 acres.

Mr. President, that is merely a statement of the fact that the Indians can keep what they already have.

Mr. Meritt said next:

Seventh. The reimbursement shall be made out of rentals of newly reclaimed lands. In other words, the Indians occupying the 8,346 acres will not be called upon to pay out of the proceeds from their cultivated lands any of the reimbursable charges for the improvements. The reimbursable charges will be taken out of the rentals of the newly reclaimed lands.

That, of course, is a reiteration of the argument made by the Senator from New Mexico, and which I have endeavored to-day to controvert, namely, that these 8,346 acres will not receive the substantial benefit which it is claimed by the Senator from New Mexico they will receive, and which is the only justification upon which this bill in its present terms could possibly be supported in this body.

Mr. Meritt said, eighth:

There will be no lien upon the 8,346 acres for improvements or betterments.

That, Mr. President, falls in the same category as his statement No. 7. He said, ninth:

Ninth. Liens on the newly reclaimed land shall not be enforced during the period that the title shall remain in pueblos or in individual Indian ownership.

That is another protection to the Indians, because in ordinary legislation that provision does not obtain.

Mr. President, I submit, in response to that contention, the fact that the reimbursement is to come from the lands while in Indian ownership from the proceeds of leases; that is, from the agricultural yield of the land.

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which is Senate Joint Resolution 46.

Mr. CURTIS. I understand that the Senator from Nebraska, who is in charge of the unfinished business, is unable to proceed with it this afternoon. I therefore ask unanimous consent that the unfinished business may be temporarily laid aside.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BRATTON. I ask unanimous consent that the Senate may continue the consideration of Senate bill 700.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New Mexico? The Chair hears none, and the Senator from Wisconsin will proceed.

Mr. LA FOLLETTE. Mr. President, in the second place, in response to the ninth item which the Assistant Commissioner of Indian Affairs lists as one of the reasons for supporting the bill, I should like to say that no lien, so far as I know, has ever been enforced against Indian lands under debt to the extent of alienating the ownership of the land from the Indians, and no steps could be taken under existing law.

The *reimbursable* liens generally are exactly like the land lien in the present bill, and repayment comes from sale of the land after the death of the Indian owner or from the proceeds of oil, timber, and so forth. In other words, it seems to me that the ninth argument the assistant commissioner advances, like some of the others, means nothing.

His next reason is as follows:

> The department shall be recognized in all matters pertaining to the operation of the district in the ratio that the Indian lands bear to the total acreage of lands within the district. We will have a voice in the management of that conservancy district, and we can at any time have absolute control of conditions within the pueblos involved in this conservancy district.

The Assistant Commissioner of Indian Affairs favors the bill in the form in which it is now presented to the Senate, and I for one find little consolation in so far as the Indians are concerned in that statement.

Eleventh, said Mr. Meritt:

> Indian lands are not taxable as long as held by Indians. Under the terms of this bill they will not be required to pay any taxes as long as they own the lands, and they are in Indian ownership, either individual or tribal.

There is nothing in the bill about taxation. The lands do not pay any taxes now any more than any other lands held in trust for the Indians are paying taxes. So that statement means nothing.

> Twelfth. Indians are not required to pay any interest on moneys advanced by the Government. Under the terms of this bill they will not be required to pay interest for the loan of this money, even if it is not returned to the Government within 100 years.

So far as I know, no reimbursable loans to any Indians have ever been required to pay interest to the Government, and so, of course, in so far as this defense in support of the bill is concerned, it falls to the ground.

> Thirteenth. The Indians will get a very great benefit by reason of flood protection under the terms of this bill. That land is subject to flood, and property there has been destroyed because of floods, but under the terms of this bill the Indians will get the benefit of flood protection.

The statement made by Mr. Meritt concerning flood protection to these Indians is not supported in the hearing. No showing was ever made as to any considerable damage the Indians have ever suffered as the result of floods. Of course, the Indians at any time of high water occasionally have their ditches washed out, but they are repaired and have been repaired for 300 years by the Indians themselves on the ditches or laterals. So that to say that now they are in a position where they have to have immediate flood control and relief is absurd. As a matter of fact, I am informed that in 1921, a year of high water, when the town of Pueblo was flooded, none of the Indian land in controversy was damaged by flood. A few low main river bridges were washed out, but in so far as the contention is advanced that the Indians are in immediate need of flood control the statement of the commissioner is not supported by the facts. Certainly it is not supported by any showing in the record.

Let me say in passing that there are interests in New Mexico that do want flood control, but they are not the Indians. The urban centers in New Mexico are very anxious for flood control and flood prevention, which may result from the bill. It is not the Indians who are asking for flood control. It is the urban communities of New Mexico which are interested. When they could not get this gratuity of half a million dollars or more against the 8,346 acres of land they were so anxious for flood control—and I refer to the white urban centers in New Mexico—that they now take the position that it is perfectly justifiable to charge the Indians with the debt in order that they may get it at once.

Let me repeat what I said at the outset, that this body of the Congress will not have discharged its obligation in this matter, in view of the controversy which has arisen, until it has exhausted every legislative step which can properly be taken in the matter. I say that it has not exhausted those legislative steps merely because an amendment is put on a bill in the House and we are then informed that the legislation can not pass. It is argued that we must accept the House amendment without either amending the House text and thus sending back to the floor of the House where it would come up on its merits, or else rejecting the House amendment and asking for a conference with the House. In my judgment, it is absurd for Senators to say that until we have taken those steps and find ourselves in absolute and utter disagreement with the House, such legislation can not be enacted.

Now to go on with Mr. Meritt's alleged arguments in favor of the bill:

> Fourteenth. I want to emphasize that the Indians will also receive a very much increased value for their property by reason of the terms of this bill. It will cost the Government $67.50 to irrigate this land, but the Indians will have property, after it is irrigated, estimated to be worth anywhere from $150 to $200 an acre.

I have already submitted the statement, particularly that made by Mr. Vernon Sullivan, the consulting engineer, that land in this valley will be worth approximately $100 an acre, and, at the outside, $150 an acre, even after all the work that is contemplated in the bill shall have been undertaken.

> Fifteenth. The Indians, under the terms of this bill, will not be required to pay any of the irrigation charges so far as the 8,356 acres are concerned out of their products, but the white lessees will pay practically all of the reimbursable charges that are enforced under the terms of this bill.

Mr. President, upon what theory could the Assistant Commissioner of Indian Affairs make that statement? The only theory, as I see it, upon which he could have made that statement is that some of this land is going to pass into white ownership; because, so far as the terms of this bill are concerned, the white lessees will not pay one cent of the reimbursable debt on the Indian lands. They will pay a rental as high, and no higher, than the rental they would have to pay on the 80,000 acres of land owned by the whites that are to be reclaimed. This bill provides that the reimbursement shall come from the proceeds of leases. That means that it will come from the moneys received by the Indian owners of land from the leases, and as I have previously pointed out, if these newly reclaimed acres shall be shouldered with this enormous burden there will be no motive for the Indians to retain their ownership, because all of their proceeds may be taken under the reimbursable provisions of the bill. So much for the argument made by this alleged guardian of these Indians on behalf of this indefensible bill.

Mr. President, the issue raised here is an important issue. It comes up again and again in legislation where the whites have interests and the Indians have interests which are in conflict. I had believed that during recent years the attitude of Congress had changed; that there was a recognition of the long line of injustices which have been perpetrated against the Indians by legislation through the years of the history of this Government. It had seemed to me that the attitude, especially of this body, had changed; that we had reached a point where a majority of the Senate would look upon these questions in conflict between the Indians and the whites with an impartial eye, would weigh all the evidence, and come to a just determination; but it seems, Mr. President, that perhaps that is not to be the case in so far as this bill is concerned.

Much work has been done on both sides of this Chamber to line up Senators for the bill. That has been accomplished by ex parte statements. Perhaps the votes have been gathered in to "put across" this injustice to the 3,500 Pueblo Indians—peaceful, civilized Indians—who over the years of written history have never waged warfare against the United States. They are a simple, agricultural folk. Under the laws of New Mexico they are disfranchised. They can make no protest at the ballot box for what may be done here in their name.

Mr. President, if this can be done, if such an injustice may be perpetrated in the name of the Indians, then this Chamber has about-faced, and we must prepare to wage continued battles against the encroachment of the white interests upon the interests of the Indians, as was the case when my illustrious father came to this Chamber in 1906. Single-handed and alone he fought time after time against legislation which contained contemplated injustices against the Indians. As a result of that contest which he waged here year in and year out, I think he impressed his point of view with regard to

the Indians upon the Members of this body. But now we are confronted with a situation where an agreement with these Indian tribes is about to be violated without their consent, a committee of this Chamber, by a majority vote of one, having been induced to report out this breaching of that understanding.

Mr. President, we are now told that the votes have been gathered in to perpetrate and consummate this injustice. If that be true, and if the roll call shall demonstrate that fact, then in a few years we shall be called upon to pass remedial legislation to undo this injustice which is contemplated with regard to these Indians.

Now let me say a few words with regard to the amendment which I have offered to the amendment which has been proposed by the senior Senator from Kansas [Mr. CURTIS]. The proviso on page 3 of the House amendment reads:

Provided, That such reimbursement shall be made only from proceeds of leases from the newly reclaimed Pueblo lands. * * *

At that point in the proviso the amendment the Senator from Kansas proposes to add the words:

except such part thereof as the Indians shall themselves farm.

The Senator from Kansas has accepted an amendment offered by the Senator from New Mexico [Mr. BRATTON], adding the words at the end of his amendment, "not to exceed 4,000 acres." So not more than 4,000 acres of this newly reclaimed land will be subject to the exemption.

My amendment provides:

but no collection for reimbursement from proceeds of leases of any Indian acres shall exceed in annual amount the payment made annually by white acres of like character toward the amortizing of the share of said white acres in the indebtedness of the Middle Rio Grande conservancy district.

The purpose of the amendment which I have offered—I have only offered it because in the extremity of the situation it appears that perhaps it is all we may obtain—is to permit the Indian owners to repay out of the 11,000 acres which they may have under lease no more rapidly than the white owners of land of like character shall pay. The result of the pending legislation, if enacted, will be to burden the 11,000 acres with an enormous debt, but if my amendment shall prevail it will permit the repayment of that debt over such a long period of years that it will protect the Indians against an exorbitant rate of collection.

I had hoped that we could reach a compromise upon this question, but the Senator from New Mexico has served notice that he will resist my amendment. I desire once more to say that I would not have offered the amendment except for the fact that the Senator from Kansas has offered his amendment. In my judgment, this bill should have been amended in such manner as to conform in general terms with the provisions of Senate bill 700 when it was reported unanimously from the committee and unanimously passed the Senate.

I hope, Mr. President, that the amendment which I have offered to the amendment of the Senator from Kansas may prevail.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Wisconsin [Mr. LA FOLLETTE] to the amendment proposed by the Senator from Kansas [Mr. CURTIS].

Mr. FRAZIER. Mr. President, it seems almost useless to discuss this measure further. There are only a few Senators on the floor, and apparently those who are not here have made up their minds on the question; at least, that would seem to be the case. There is a great deal of interest being taken in the measure, however; and, of course, the record which is made may be of some value in future cases that may arise concerning the Indians.

The Senator from Wisconsin has gone into the question very fully, and has, I think, given a very fair interpretation of the whole measure. One statement that he made near the close of his remarks rather interested me and that was that the Indians of New Mexico could not vote under the constitution of that State.

Mr. CUTTING. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from New Mexico?

Mr. FRAZIER. I yield.

Mr. CUTTING. I will say for the information of the Senator that the statement made by the Senator from Wisconsin to which he has just referred is not entirely correct. The Pueblo Indians of New Mexico have the same rights which they had under the Mexican Government and which were guaranteed to them by the treaty of Guadalupe Hidalgo and by the enabling act, namely, that they may vote if they pay taxes. That is the legal status of the Indians of New Mexico to-day.

Mr. FRAZIER. In other words, if the Indians of New Mexico do not pay taxes they can not vote; and, of course, the Indians who are on these allotments or reservations under the protection of the Government do not pay taxes, and therefore do not vote.

It seems to be the attitude of some people that the Indians do not amount to much; that they have no rights to be considered. They have been crowded back out of the way to make way for civilization, and some people in the past and some people still seem to feel that the Indians should be further crowded out of the way to give the best of their lands to the white people, who might cultivate them and make better use of them, in a way, than the Indians are making.

In the past, treaties have been made with the Indians by the United States Government. In many instances those treaties have unquestionably been violated. There have been times in the history of Indian legislation when, after treaties have been made solemnly pledging the Government of the United States to carry out the provisions of those treaties with the Indians, Members of one House or the other of Congress would introduce a measure which seemed to be in violation of the treaty. The Members would state that they knew the case; they knew what the situation was; they knew what was needed. They may have been perfectly sincere in their statements; but many times those bills have been forced through both Houses of Congress and have proved afterwards to be violations of the treaty that had been made with the Indians; and many cases are now pending in the courts, especially in the Court of Claims, growing out of the apparent violations of treaties.

In every session of the Congress since I have been here the Indians and their representatives have come before the Indian Affairs Committee and asked for the privilege of going into the Court of Claims to establish claims against the United States Government for violation of treaties, and many of those requests have been granted; and there are many cases now pending in the Court of Claims of the United States to test out the violation or the claimed violation of those treaties.

Two or three years ago I was on a subcommittee of the Indian Affairs Committee that went to Minnesota to investigate Chippewa Indian affairs in that State. Some of those Indians, it is true, spoke through interpreters, but, nevertheless, they seemed to be mighty well informed and to know what they were talking about. Those Indians told what their treaties had been and how they had been violated, some of them violated by act of Congress here, by measures put through Congress by Representatives from the State of Minnesota, to the detriment of those Indians. The result of the investigation was that the committee recommended the passage of a measure to give the Chippewa Indians of Minnesota the right to go before the Court of Claims and establish their claims there against the Government of the United States. The bill was passed in the Senate. It went over to the House and was referred to the Committee on Indian Affairs over there. That committee changed the measure considerably, and it came back here amended so that the attorneys for the Chippewa Indians claimed that it would be useless. It was referred back to the Committee on Indian Affairs here, and we put up a fight, and the bill was put back in its original form, and finally passed; and the Chippewa Indians, through their attorneys, have cases filed in the Court of Claims to establish their rights.

I might go on almost indefinitely and cite cases where the Indians have been defrauded.

Since I have been in Congress a Member of the Senate from one of the Southwestern States introduced a bill here, and it was indorsed by the Indian Bureau, too, as I recall. It was found that that bill, if passed, would wipe out the rights of a lot of Indians in that State; it would wipe out the title to their lands. Of course, that Senator said that he knew all about the situation, because he was there, and represented those Indians, and he had been over the ground, and knew all about it. The bill was finally defeated, or at least that part of it, and it was amended so as to make it quite a fair bill, I understand; but I mention that to show you that sometimes even the representatives of the State which proposed legislation is to affect, either through misinformation or something else, have not known what the situation is.

Last spring it was my privilege to visit some of the Southwestern States of this country and to visit several Indian reservations there. I went across a bridge out in one of those Western States for which the Congress appropriated some $300,000, and made it a reimbursable charge to the Indians. It was on the Pima Reservation. It was a very fine bridge. It originally had electric lights on it. It was out about 15 miles from any town, as I recall, but on a public highway; and, of course, a bridge was needed there for this highway between two of the large cities of that State; and the bridge was very finely

equipped. There had been electric-light fixtures on it, and all that. They had been taken off, but it was evident that there had been electric-light fixtures there. That bridge is near the end of the reservation. The Indians, in going to the town where they do their trading have a fording place that they use almost all the year around, as I understand; but at times the water is too high, and perhaps they come around on the bridge. But the main use of the bridge was for the white tourists and white settlers who travel there, and not for the Indians, and yet its cost was made a reimbursable charge against the Indians.

On the Pima Reservation, which is the home of one of the so-called peace tribes of Indians, there were old irrigation ditches, or what seemed to be irrigation ditches, that those Indians had used years and years ago. In fact, in some places there were trees a foot or more in diameter growing in those old ditches that the Indians had used. Back as far as the Civil War time the Indians of the Pima Reservation produced a lot of wheat and furnished it to the United States Government, which needed it at that time, and they did it through the irrigating project on their own land. You may ask why the Pima Indians are not using those irrigation ditches now. I will tell you—because a Government irrigation project was put through up above them on the river, and the water was all taken for the white settlers, and the Indians were left without any water to irrigate their lands; and so they are dry farming now, except in the few places where they can get water from deep wells to irrigate.

It is claimed that the Coolidge Dam, which is now under construction out there, will take care of those Indians. I hope it will, but there is a little doubt in my mind yet whether they will be taken care of under the proposed project.

There are many instances of that kind. Why, I recall, since I have been a Member of the Senate, that a bill was passed through the House in regard to the Indians out in one of the Southwestern States. It came here, and a Member of the Senate from that State reported the measure from the Indian Affairs Committee for passage here; and when it was explained to him what the bill really meant, he got up here on the floor of the Senate and fought that bill to the last ditch.

The bill now under discussion is not a new proposition at all. It has been under consideration for several years, and I can not understand why there is all this rush about getting it through at this time. It is said that if we do not agree to the present amendment of the House the bill will fail to pass, and it will be a great detriment to the Indians and to the whites down there in New Mexico. The Indians have lived there for some 300 years that we know of, and in all probability they lived there for hundreds of years before the white people knew anything about them, and the chances are that they could continue to live there for a long time to come even if this project should not go through.

Back in the last Congress, on April 19, 1926, a bill was introduced in both the House and the Senate for practically the same measure. An interesting thing, however, is that that bill only asked for an appropriation of $1,200,000 for the Indian lands; and it was stated that the work could be done for even less than that if necessary. Engineers who had made two surveys of that project stated that the work could be done for even less than the $1,200,000—probably for seven or eight hundred thousand dollars if necessary. Then the present bill was introduced in both the House and the Senate at the beginning of this session. The original bill, as it was introduced at this session, authorized an appropriation of $1,752,000 plus. Then there was a conference between the engineers and the representatives of the conservancy district of New Mexico and the Indian Bureau, and the authorized appropriation was cut down to $1,593,000; and that is the way it now stands. It seems just a little strange that there is such a difference in the amount of the appropriations that have been asked for.

Mr. BRATTON. Mr. President, will the Senator yield?

Mr. FRAZIER. I am glad to yield.

Mr. BRATTON. I do not want to interrupt the Senator, but I do not want him, without knowledge of the facts, to leave the Senate under a misapprehension of the facts.

The figures stated in the bill introduced in April, 1926, were made nearly two years ago, before the survey of this project had advanced practically at all, and before the engineers had any comprehensive data comparable with the data they have to-day. That accounts for the variance between the figures in that bill and the figures in the bill to-day.

As to the figure in the bill we are now discussing being reduced from $1,700,000 plus to $1,593,000 plus in the figure originally found in the bill 10 per cent was allowed for contingencies—a thing that is very common in construction of this and other kindred kinds. In discussing the matter with the bureau and before the committees it was decided to remove the allowance of 10 per cent for contingencies, and fix the exact figure they agreed upon as the maximum cost. That was done.

I think the Senator and the Senate should know those facts.

Mr. FRAZIER. I recall that 10 per cent proposition; but at the time the bill was introduced in 1926 it was stated before the Indian Affairs Committees of both the House and the Senate that two surveys had been made up to that date.

Mr. BRATTON. Upon that, if the Senator will suffer another interruption, those surveys were not made by engineers of the district; and if the Senator is laboring under that belief he is mistaken. One of those surveys was made in 1923, as I now recall, by a man named Gault, an engineer in the Bureau of Reclamation. He did not represent the Bureau of Indian Affairs. He did not make a survey of this particular area, but he made one of the entire Rio Grande Valley. In the following year an engineer of El Paso, Tex., named Sullivan, made another survey of the Rio Grande Valley. Neither of those surveys was confined to the area embraced within this bill, and neither of those engineers had in mind the project we are now considering.

Mr. FRAZIER. On February 19, 1927, Representative MORROW, of New Mexico, made a statement, which is to be found in the CONGRESSIONAL RECORD on page 4246, in which he stated that—

> The engineers estimate that under the project the cost for irrigation and drainage, not including storage, is about $35 per acre.

There seems to be lots of difference of opinion in regard to the cost of this irrigating project, and judging from the history of irrigating projects, they generally cost a lot more than the estimates.

Mr. BRATTON. Mr. President, will the Senator suffer a further interruption?

Mr. FRAZIER. Certainly.

Mr. BRATTON. The Senator recalls that there is a letter in the record, over the signature of Doctor Mead, which states that the average cost of reclamation during the last five years has been about $90 per acre. When that fact is taken into account, coupled with the conclusion reached by the consulting engineers from several States, the engineers for the bureau, and the engineers for the district, how can the Senator assert that the cost here is excessive, in the face of the combined judgment of all engineers who have dealt with the proposition?

Mr. FRAZIER. Mr. President, I was only quoting engineers, and figures that have been given, and the only assertion I will make in regard to the excessive cost included in this bill is in regard to the amount of Indian land that is now under cultivation, and has been for years and years, the 8,346 acres. There was nothing in the hearings, so far as I can recall, to show that it would cost $67.50 an acre on that 8,346 acres to put it in shape for this project.

Mr. BRATTON. Mr. President, will the Senator permit another interruption?

Mr. FRAZIER. Certainly.

Mr. BRATTON. The difficulty in which the Senator finds himself is his utter unfamiliarity with the facts. If this land is reclaimed, the present antiquated system of ditches will be utterly disregarded. The district would not use those ditches in any sense. That land would be reclaimed as raw land would be, because the system which the Indians have now is worthless, and could not be used in giving that land a modern system of irrigation. So that, so far as the cost of construction is concerned, that land might as well be raw land as to be in the shape in which it is now.

Mr. FRAZIER. It has been said in the hearings that the Indians were going to do all the work except on one main ditch.

Mr. BRATTON. That relates to maintenance, not construction. It relates solely to maintenance, when the water is turned out of the canal onto the Indian lands.

Mr. FRAZIER. As I understand it, this particular land of the Indians is a little differently situated from a great many irrigating projects, and practically all that is needed is just one main ditch, and the water will be let out in laterals and will be easily taken care of and easily provided for.

Mr. BRATTON. In response to that the Senator stated a while ago that he made a trip through the Southwest last year. Let me ask him if he went on this project then, or at any other time?

Mr. FRAZIER. No; I have never been to this project.

Mr. BRATTON. The difficulty under which the Senator is laboring is his utter unfamiliarity with conditions. I have endeavored as best I could to help him overcome that handicap.

Mr. FRAZIER. I appreciate the endeavor of the Senator from New Mexico.

I want to go on now with a little history of this bill. Senate bill 700 was introduced in the Senate and a similar bill was introduced in the House. Before they were acted upon by the committees, amendments were suggested. Those amendments were agreed upon at conferences participated in by practically all concerned. I have telegrams here to show that the Indians had agreed to the provisions of the original bill. Apparently it had been difficult to get the Indian council of Pueblos down on this land to agree to the bill that was wanted. But the proponents of the project finally got them to agree to the bill as it was amended and finally referred to the committees in each House.

After a hearing before the committee in each House the bills were reported out and went to the calendars. The Senate committee bill passed the Senate and went over to the House. When the House bill was reported from the committee and was reached on the floor of the House the Representatives from New Mexico, as I recall, moved to substitute the Senate measure for the House bill, and that was done. Then a member of the Committee on Appropriations of the House rose and made a motion to strike out everything after the enacting clause and to insert a substitute measure. The substituted measure was similar to the original, but with two or three very vital changes, and those vital changes absolutely violated the agreement and the promises that were made to the Indians in order to get them to indorse the measure.

The Senator from New Mexico nor anyone else will dare stand up here on the floor of the Senate and deny that statement.

If the time has come when we are going to disregard the promises we make to the Indians, if we are going to treat them as children, or worse than children, and as not entitled to any consideration, then let us agree to this House amendment. If we are going to live up to our promises, let us keep those promises, and insist on the original bill as referred out by both committees and passed by the Senate.

The Indians down there were told that there would be no charge against the 8,346 acres which they have cultivated for hundreds of years. It is said that in prehistoric times they cultivated 25,000 acres down in that valley. Perhaps they did; but since white men have lived in that country, since we have had a history of the country, 3,500 Indians have lived on that land and apparently have gotten along pretty well. One of the engineers has said that this land is their bread and butter, and everyone concedes that they have made a fairly good job of the work on that land.

The Senator from New Mexico says that if this new project should go through it would undoubtedly increase the fertility of that soil fourfold. Perhaps it might; but after that land has been farmed for centuries it is pretty hard to make me believe that a little additional water put on the land would increase the fertility fourfold.

Mr. KING. Mr. President, will the Senator yield?

Mr. FRAZIER. I yield.

Mr. KING. The fact of the matter is that those Indians do not require additional water. They have a priority. They were the first settlers. Their rights were antecedent to all other rights. They have no desire for additional water supplies. There is more water than the original settlers require. So that no claim can be made, with any validity, that this measure would increase the water supply for that 8,346 acres, because, as stated, that land requires no additional water rights.

Mr. FRAZIER. Further than that, Mr. President, these Indians have not only been cultivating this land for hundreds of years, but if there is any water-logging it is due. as has been stated in the hearings several times by engineers and representatives from that section of the country who know the situation, to civilization and not to anything the Indians have done. As long as the Indians are wards of the Government, it seems to me, in view of the fact that they have cultivated that land for hundreds of years and made their living there, that if any change is to be made, the expense should be borne by the Government and not charged up to those Indians. That was what the original bill, as introduced here and passed by the Senate, provided.

Mr. President, the Senator from Wisconsin has introduced a number of telegrams and statements from people who are interested in this matter, representatives of the Indians and others who are very much interested and feel that an injustice will be done to the Indians if the House amendment shall be agreed to. I have here a telegram that was sent to the junior Senator from Maryland [Mr. TYDINGS], which states:

BALTIMORE, MD., *February 28, 1928.*

Senator MILLARD F. TYDINGS,
United States Senate, Washington, D. C.:

Large group Baltimore women, including heads of several large women's organizations, in meeting assembled with Fortnightly Club strongly urge that Senate bill No. 700 be so amended as to fully protect interests of Pueblo Indians, and that you, as our representative, advise the Senate of our wishes in this matter.

ANNA N. KAY, *Secretary.*

I also have a telegram addressed to Senator WALSH from Santa Fe, N. Mex., which states:

SANTA FE, N. MEX., *February 27, 1928.*

Senator WALSH,
Senate Office Building, Washington, D. C.:

We insist upon our objection to the Cramton amendments to conservancy bill, S. 700, and believe they would be dangerous to the future welfare of the Pueblo Indians, and we indorse S. 700 as originally reported out of committee and passed by the Senate for the reason that it definitely safeguards the interest of the Indians.

EXECUTIVE COMMITTEE NEW MEXICO
ASSOCIATION ON INDIAN AFFAIRS,
MARGARET MCKITTRICK, *Chairman.*

Mr. President, I could read many other statements of that kind, but I do not know that it is necessary, so much has been said and so many telegrams have been inserted in the RECORD already.

These 8,346 acres which have been under cultivation all these years by the Indians, and off which they have made their living, it seems are right in line where the water for this project will have to come in order to furnish water for this land and the rest of the project. It is a fact that one of the engineers stated that the present irrigating project of the Indians was not worth one cent to this conservancy project, and that may be true. Nevertheless, the present system is worth a lot to the Indians, because they have made a living off that land for centuries.

There is a very grave doubt in my mind as to whether or not this proposed project will increase the value of the Indian land to any material extent; that is, I believe it would not cost the project the $67.50 an acre that is to be charged up against the Indian land.

Of course, under the Cramton amendment the 8,346 acres would be exempted from this reimbursable charge, but it is placed on the balance of the land, the other 15,000 acres, making a total charge against the 15,000 acres of something like $109 per acre, which is, of course, a higher charge than is made against the white land, and it seems to me it is absolutely unfair.

More than that, it would mean, I believe, confiscation of that land ultimately. There is something in our Constitution which says that property may not be taken away from our citizens without due process of law, but the Indians apparently are not considered in that connection.

Mr. KING. And with just compensation.

Mr. FRAZIER. Yes; and with just compensation, but the Indians obviously are not considered as coming under the Constitution of the United States. It would seem so at least, not only in this case but in hundreds of other cases in the treatment of Indians in this great Nation of ours.

The amendment which the Senator from Kansas [Mr. CURTIS] has offered would be of some help. Undoubtedly it would be of some help, because it would allow the Indians to take 4,000 acres of what would be reclaimed land under the provisions of the bill and farm it. That would be of some assistance, undoubtedly. In the hearings the other day the Assistant Commissioner of Indian Affairs, Mr. Meritt, stated that even with all of the $1,500,000 plus made reimbursable against the 15,000 acres of Indian lands under the Cramton amendment, it would still be of benefit to the Indians. Perhaps it would be of benefit to them. It would be of benefit to the Indians if we would add on another $500,000, but it would be violating the promises that have been made to the Indians, and it would be unfair.

Mr. FESS. Mr. President, will the Senator yield?

Mr. FRAZIER. Certainly.

Mr. FESS. It has been reported to me that the proponents of the bill are not averse to the Curtis amendment and the opponents of the bill are not averse to it. Why not act upon the Curtis amendment and pass the bill?

Mr. FRAZIER. The information that has come to the Senator is hardly correct.

Mr. FESS. Then I beg the Senator's pardon for the suggestion.

Mr. FRAZIER. I just made the statement that it would be of only slightly more benefit than the Cramton amendment.

Mr. FESS. But it would not be satisfactory?

Mr. FRAZIER. It would not be satisfactory to the Indians or their representatives, the people who are here representing them, and, according to the word we get from their council itself, it would not be satisfactory to the Indians.

Mr. FESS. Then I was misinformed. I had understood the Curtis amendment would adjust the difficulty.

Mr. FRAZIER. No; there is nothing to that effect, so far as I know, and I have been receiving telegrams and statements from the Indians. The Indians themselves, through their council, authorized Mr. Collier to represent them, and while there was some difference of opinion as to the way he is representing them, yet I believe he is doing his utmost to be sincere and to represent them as they would like to be represented.

The other day, in the hearings before the committee on the House bill as amended, the Assistant Commissioner of Indian Affairs, Mr. Meritt, made the statement that this would be of some benefit to the Indians, even with an additional $1,500,000 plus placed against the land. Perhaps it would be of some benefit to them to have an improved irrigating project. Nevertheless the Indians are getting along pretty well, and they are not satisfied apparently with the suggested improvement, unless their 8,346 acres shall be taken care of without any expense to the Indian lands.

Of course, as to the reimbursable part of it, it is said that the Indians will never pay; but there have been instances where lands allotted to Indians had a reimbursable charge against them, and when the Indians died the land was sold to pay the reimbursable debt. Undoubtedly what has occurred in the past will occur in the future. I think the proposition for the total amount of the appropriation of $67.50 per acre for the total number of acres, including the 8,346 acres that has been under cultivation and irrigation all these years, is absolutely unfair to the Indians.

The Curtis amendment would be of some benefit, undoubtedly, or would be some improvement over the way the House amended the bill; but even with the amendment which the Senator from Kansas offered, the bill is still unfair to the Indians and violates the promises that have been made to them and, in my estimation, for that very reason should not be passed.

As I said, if we are going to take the attitude of disregarding the promises we have made to the Indians and disregarding our understandings and even treaties with them, then let us go ahead and enact legislation without consulting the Indians; but after we have gone to all the trouble of spending two or three years' time apparently in getting the Indians to consent to a bill to take care of the irrigation project in the Rio Grande Valley, after we have gone to the trouble of holding hearings in both Houses and having the hearings printed, taking the time of the Members of both Houses hour after hour, it seems to me a little inconsistent to disregard now the promises made to those Indians and to enact such legislation as is proposed by the House amendment.

Mr. HAYDEN. Mr. President, with respect to the promises made to the Pueblo Indians to which the Senator from North Dakota has just referred, I may say that at the time the promises were made there was no one present authorized to speak for Congress. In other words, it is perfectly feasible for certain gentlemen interested in developing a conservancy district in New Mexico, and certain Indians whose lands are to be a part of that district, to agree that the Indians shall receive a gratuity appropriation of half a million dollars. All the interested parties in New Mexico may have agreed that they would endeavor to induce Congress to make a gratuity appropriation to that extent, but the Congress alone can make the appropriation. Congress never made any promise to the Pueblo Indians, and no one with authority to speak for Congress ever made any promise to the Pueblo Indians that a bill would be passed granting a gratuity appropriation to that extent.

Mr. FRAZIER. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from North Dakota?

Mr. HAYDEN. I yield.

Mr. FRAZIER. That may be true. Nevertheless, according to telegrams which have been read into the RECORD and of which I have copies on my desk, the Indians were consulted, and their attorney, Mr. Hanna, and their representative, Mr. John Collier, were consulted. Hearings were held before their council and they agreed, apparently, to the provisions proposed. Mr. Rodey, the attorney for the conservancy project, wired to them saying that the provisions they asked for were agreed to. Hearings were held by the committee of the Senate and an agreement was reached by that committee. The bill was voted out and passed by the Senate. Hearings were held in the House and the bill was reported out there and went to the calendar of the House. Then amendments were made by the House, violating the promises made to the Indians and which had been considered by committees in both Houses, without a word of explanation on the floor of the Senate or the floor of the House before those changes were agreed to.

Mr. HAYDEN. Nevertheless no one had authority to speak for Congress. The only way Congress can speak is by the final enactment of the bill. We can only judge the future by the past. We can only judge this legislation by other legislation which has heretofore been enacted. I can say, and I speak advisedly because I served for more than 15 years on the Committee on Indian Affairs in the House of Representatives, that at no time in the past 15 years has Congress enacted any law granting a gratuity appropriation for the construction of Indian irrigation work of any consequence, and at no time to the extent of $500,000.

Mr. KING. Mr. President, will the Senator permit an inquiry?

Mr. HAYDEN. Certainly.

Mr. KING. I accede to what the able Senator from Arizona said, that no one perhaps is authorized to speak for Congress. Undoubtedly the Indians, if not their attorneys, and I think their attorneys had the impression—I am sure the Indians had—that the Indian Bureau was authorized to speak for the General Government and that any promise or representation made by the Indian Bureau would receive validation at the hands of the Congress.

Mr. HAYDEN. The Senator from Utah, I am sure, would not permit a bureau to speak for Congress?

Mr. KING. I grant that we do not permit, at least we ought not to permit, bureaus to speak for us. I think we permit executive officials and bureaus to speak too much for Congress, and we are afraid to legislate until we get their approval upon proposed legislation. But conceding that there was no one there who might speak for Congress and that no one did speak for Congress, if the Indians made a proposition predicated upon the assumption that only $1,000,000 was to be reimbursable and they assented to the Rio Grande conservancy project upon the hypothesis that $1,000,000 only was to be reimbursable and the residue was to be a gratuity, and if they were mistaken because the Congress would refuse to accept their view, then obviously if we are to proceed upon the theory of contractual relations, they entered into a tentative agreement upon a wrong hypothesis. The minds of the parties have not met and fairness would seem to require that we halt any further proceedings until the Indians have further opportunity to investigate the matter and determine whether they would be willing to accept a contract or a proposition the basis of which is that the entire amount shall be reimbursable out of the Indian funds.

Mr. HAYDEN. I want to point out to the Senate that the only general statute there is relating to the subject of Indian irrigation projects requires that the Federal Government shall be fully reimbursed for all such expenditures. That law appears in section 386 of the United States Code. It is the act of February 14, 1920, and reads as follows:

> The Secretary of the Interior is authorized and directed to require the owners of irrigable lands, under any irrigation system constructed for the benefit of Indians and to which water for irrigation purposes can be delivered, to begin partial reimbursement of construction charges, where reimbursement is required by law, at such times and in such amounts as he may deem best, all payments hereunder to be credited on a per-acre basis in favor of land in behalf of which such payments shall have been made and to be deducted from the total per-acre charge assessed against such land.

There is another section of the code which relates to operation and maintenance charges that likewise directs that wherever possible the Federal Government shall be reimbursed. In other words, no one can find any authority of law anywhere for the appropriation of money for the construction of an Indian irrigation project unless the sums appropriated are made reimbursable.

Mr. FRAZIER. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. FRAZIER. We can find some precedents, though, those things on which attorneys like to base their arguments so much. The senior Senator from Montana [Mr. WALSH] made the statement the other day, in discussing some measure from his State involving the Flathead Indian power proposition, that there was an irrigating project for the Indians, as I recall, with some $200,000 or more expended, where the money was a direct appropriation and not reimbursable.

Mr. HAYDEN. That may be true in the Northwest, where the Indians know very little about irrigation and where they were never even farmers but lived as hunters until the white man came. In the Southwest there are two tribes of Indians, the Pueblos on the Rio Grande in New Mexico, and the Pimas on the Gila River in Arizona, who have been irrigating their lands from time immemorial. Take the Pima Indians of Arizona, who can only make a living by the cultivation of their lands by irrigation. What has been required of the Pimas? In all instances the irrigation appropriations made for their

benefit have been made reimbursable; a charge has been made against the Pima Indians for the full amount of the expenditures made by the United States. But in all cases there has been done what it is proposed to do in this bill. The lien or charge upon their land is not to be enforced and they shall not lose title to it so long as the land remains in Indian ownership.

The practical effect is that charge is made on the books of the Treasury Department for any sum expended for the irrigation of Indian lands. The collection of that expenditure depends entirely upon the progress made by the Indians. There is no time limit in this bill nor in any similar bill which provides that upon a certain day the Indian shall pay a certain amount and that if he does not pay that amount he shall lose his land. That would be wholly unfair and unjust because the Indian can not be expected to have the same ability to meet his obligations as a white farmer.

Mr. FRAZIER. There was a time limit put on the original bill and that was stricken out by the Cramton amendment to the bill, but this bill has a new feature that has never, so far as I know, been included in any other Indian irrigation project; that is, to reimburse the expenditure out of the proceeds of the leases of the land.

Mr. BRATTON. Mr. President, will the Senator from Arizona yield to me?

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from New Mexico?

Mr. HAYDEN. I yield to my friend from New Mexico.

Mr. BRATTON. The Senator will recall as to that feature that the Indian Bureau and the Indian Defense Society were in accord and urged that very provision in the bill, and no objection was raised to it until the measure came back here from the House of Representatives.

Mr. FRAZIER. No objection was raised, because of the gratuity appropriation to take care of the 8,346 acres.

Mr. BRATTON. Yes; and the whole question all gets back to that. It turns not upon whether repayment shall be made from the proceeds of leases, but upon whether the appropriation shall be a gratuity or reimbursable; that is the whole question.

Mr. FRAZIER. That makes a lot of difference. The Indians agreed to a bill with this $500,000 gratuity appropriation; they have not agreed to anything else.

Mr. HAYDEN. Mr. President, I have before me the laws affecting the irrigation of Indian lands in Arizona; and if any Senator is interested I shall be glad to read their text with respect to the question of repayment. All of these laws provide for full reimbursement to the United States just as this bill so provides. The pending measure, therefore, follows the precedents now well established that there shall be a charge against the Indians for any money expended in their behalf for irrigation purposes, payable when? Whenever the Indians can afford to pay it. That is all that it amounts to. The time and manner of collection is left entirely in the hands of the Secretary of the Interior under such rules and regulations as he may prescribe. That is the provision in the laws relating to the Pima Reservation under the San Carlos project, and that is the provision here. At no time in all the years I have been a Member of Congress have I found Congress or the Bureau of Indian Affairs unwilling to listen with sympathy to pleas in behalf of the Indians, nor has any tribe of Indians ever been compelled to make reimbursable payments which could not be justified.

Mr. FRAZIER. Mr. President, if the Senator will yield to me, I desire to state that I recall some ten or twelve million dollars of reimbursable charges against the Indians have been collected by the Treasury Department throughout the United States in past years.

Mr. HAYDEN. That is a very fine showing and justifies the faith which Congress has in the Indians. It is entirely proper that such collections should be made. Congress is getting away from the old idea that the Indian should be furnished with something for nothing. We can not make good citizens of them on that basis. Under the old system of rounding up Indians on reservations, giving them rations, furnishing them with gratuities, the Federal authorities bred in them not a desire to work but a desire to loaf; not a desire to improve themselves as other citizens do, but a desire to obtain what they could from the Government for nothing. That is a wrong policy. Congress should not give any able-bodied person anything without effort on his part, whether he be a white man or an Indian.

Mr. FRAZIER. Mr. President, will the Senator yield to me?

Mr. HAYDEN. I yield.

Mr. FRAZIER. I wonder if the Senator would want to take the other horn of the dilemma and say that we should not take Indian property away from them for nothing?

The Indians of the Southwest especially have been crowded back into the desert; in many instances the best land, the only land that it would seem to me any human being could live on, has been taken by white people and the Indians crowded back. Then when the white man needs bridges in order to travel over the country they are built and the charge is made reimbursable against the Indians. That is fair, is it?

Mr. HAYDEN. Can the Senator tell the Senate where in the Southwest any land which they were occupying has been taken away from the Indians? I ask the Senator to name the place and the Indian tribe.

Mr. FRAZIER. Oh, my goodness——

Mr. HAYDEN. Will the Senator be kind enough to do that? I have lived in the Southwest all of my life, and I know of no such instance. In the State of Arizona to-day over 20,000,000 acres of land are reserved for Indians—some of the very best land in the State. No Indian has been driven off any land that he was actually farming in Arizona or New Mexico. The Senator can not point to the place nor the tribe nor the time.

Mr. FRAZIER. I visited several Indian reservations in Arizona, and if the land I saw there is the best land there is in Arizona I pity the rest of it.

Mr. HAYDEN. But the Senator has not answered my question. Will he name the tribe of Indians from whom land has been taken or designate the tract of land or the time when it was taken? I am anxious to know.

Mr. FRAZIER. We have passed several bills at this session, so-called department bills, recommended by the Bureau of Indian Affairs, making provision concerning lands out there belonging to the Indians that would have been taken away from them if it had not been for the legislation which we passed.

Mr. HAYDEN. The only legislation to which the Senator can possibly refer is a bill affecting certain lands granted to a railroad company. The lands were embraced in alternate sections which were granted to promote the construction of a transcontinental railroad many years ago. Congress has provided that if Indians are actually residing on any of the alternate sections the railroad company may select an equal area of other lands in the same State. That is the only legislation to which the Senator might have reference. No Indian has been driven off his land. The Senator has made the very broad assertion that Indians in the Southwest have been robbed of their lands. I insist that no such a thing has taken place and that he can not point to the tribe nor the land nor the time when Indians were robbed of any area that belonged to them.

Mr. FRAZIER. I am sorry that I have not the information for the Senator at this time, but, as I understand, the reservations there have been narrowed several times and the Indians have been crowded back, if you please—that is what I call it—and I do not see how the Senator can controvert that statement. The size of the reservations has been reduced time after time and probably will be reduced further.

Mr. HAYDEN. Upon the contrary, the size of the reservations in the Southwest has been increased time after time.

Mr. FRAZIER. That may be true in certain instances.

Mr. HAYDEN. If the Senator will examine the record he will find that much more land has been added to the reservations in Arizona than has ever been taken away from them.

Mr. FRAZIER. On what does the Senator base the size of the reservations in the first place? The Indians owned all of that territory a few years ago?

Mr. HAYDEN. The Indians had a right to roam over it and kill game upon it. Mere occupancy is not ownership. More land than the Indians ever actually used has been reserved for them and they now have the full benefit of it. The Senator can not justify his statement by the facts in any record.

Mr. President, it is the duty of Congress to do justice to the Indians because of the peculiar position which they occupy as wards of the Government. Here is a proposal in the interest of a great community, extending up and down the Rio Grande, of which the Pueblo Indians are a part. That community can not expand, it can not prosper unless the Indians who live in it do their share in order to develop it. It is very easy when any development of this kind is proposed, just as it is in the case of a drainage district or an irrigation district, for some individual to say, "My particular tract of land is so situated that this general improvement will not benefit me to the extent that it would somebody else, therefore I will not take part in the common effort." That is a narrow, selfish view to take. The only way that a community can prosper is for all of its members to unite and carry forward the work of development. That is what has to be done in this case. The white men and the Indians must combine if either is to advance.

What is proposed in this instance? I might illustrate it in this way: Suppose I were the owner of two tracts of land, one which I was cultivating in an inefficient manner and another tract which was waste. In this instance about 23,000 acres are involved and, with the amendment offered by the Senator from Kansas [Mr. CURTIS], the Indians are to use about 12,000 acres and the other half is to be reclaimed from a waste and an unprofitable condition. Suppose that some philanthropist were to come to me or a kind and paternal government, as is the case in this instance, and say, "I will improve the land on which you are now living, make it more profitable for you to cultivate it, give you a better water supply. I will likewise improve the waste tract for you, and I will take all of my reimbursement from the waste land and not from the cultivated land"; that would be a parallel case to the one now before us. In this instance no Pueblo Indian will ever be required to go down into his pocket and pay anything from any income that he may derive from his land toward the repayment of irrigation and drainage works which will be constructed for his benefit. There is nothing in this bill which can be construed to mean that any Pueblo Indian at any time will be required to pay one cent toward reimbursing the United States. The reimbursement will come entirely from the rental of the excess lands which are now waste and useless.

Mr. FRAZIER. If in that case and in other cases under the reimbursable provisions of which the Senator speaks, the Government is never going to collect anything, what is the use of making the expenditure reimbursable? Why not make it a gratuity? That is what it amounts to.

Mr. HAYDEN. Under the plan proposed in this bill the United States can be fully reimbursed, just as all the expenditures made to obtain water for the Pima Indians in Arizona will be reimbursed, but the United States is not going to be reimbursed in the sense that the Indian has to pay a certain amount on a certain day or lose his land. The Federal Government in course of time will get its money back for this expenditure from income derived from the now waste lands. Therefore the whole amount expended in behalf of the Pueblo Indians for this development is placed upon the books of the Treasury as a charge against them. But the Indians themselves are never to be required to pay a cent out of their own income. All reimbursement is to come from the proceeds of the rentals of excess lands. What injustice can possibly be done to the Indians? Land which is now waste and worthless, from which they can gain no income, is to be developed by a generous Government, which will furnish the money without interest and take its chances, however many years may elapse, of getting its money back.

It seems to me that under such circumstances the Congress ought to do what is best for the community as a whole, when it is clearly demonstrated that no Indian at any time will be in any manner injured. For that reason I shall support the bill. I shall support it because I believe that whenever an occasion of this kind arises, we should realize that Congress can not be guided solely by the wishes of the Indians or take the word of some group of friends of the Indians or the word of some people who are organizing a conservancy district, as in this instance. We must do what is best for all concerned, including the Federal Government, and if we satisfy ourselves that no Indian can at any time either lose any of his land or be required to pay any of his own money, then certainly there is no possibility that any injustice can be done to any Indian. Therefore the House amendment should be agreed to and the bill should be passed.

Mr. CUTTING. Mr. President, I should like to have the privilege of having read from the desk two telegrams I have received, one from the Governor of New Mexico, and one from the chairman of Indian welfare of the New Mexico Federation of Women's Clubs.

The VICE PRESIDENT. Without objection, the telegrams will be read.

The legislative clerk read as follows:

ALBUQUERQUE, N. MEX., *February 9, 1928.*

Senator BRONSON M. CUTTING,
Senate Building, Washington, D. C.:

This refers to Senate bill 700 as amended by House, which has received Senate concurrence. Our people are not concerned as to reimbursable features of bill, but we are vitally interested in enactment of legislation proposed, and personally I feel that bill as amended and passed by Senate is best possible for all concerned. Will appreciate any assistance you can lend toward sustaining concurrence.

R. C. DILLON, *Governor.*

Mr. FRAZIER. Mr. President, will the Senator yield right at that point? That statement seems to me rather peculiar, inasmuch as the governor states that "our people are not concerned in the reimbursable features." Perhaps it is because the Indians down there do not vote.

The legislative clerk read as follows:

NEW YORK, N. Y., *February 19, 1928.*

Senator BRONSON CUTTING,
United States Senate, Washington, D. C.:

As chairman of Indian welfare of the New Mexico Federation of Women's Clubs representing over 3,000 club women I urge passage of House bill 700, no matter whether with or without reimbursement. I disapprove of Collier's attitude in the matter.

Mrs. MAX NORDHANS.

Mr. CUTTING. Mr. President, I do not intend to take very much of the time of the Senate. The opponents of this bill have spoken for about three hours this afternoon, and obviously it would take an equal length of time to refute their arguments in detail. I think the Senator from Arizona [Mr. HAYDEN] has given a very clear idea of the fallacy that underlies all their arguments; namely, the fallacy that Indians in the Southwest have been treated in anything like the same manner as the Indians in the rest of the country.

The intimation has been made, both by the Senator from North Dakota and by the Senator from Wisconsin, that probably my colleague and I are not cognizant of conditions in the State; that the Member of Congress on the other side of the Capitol is not cognizant of those conditions; that the governor of the State is not cognizant of them; and that the innumerable citizens of New Mexico who feel that this measure must be passed to benefit both whites and Indians do not understand the conditions.

I do not think any of us pretend to be engineers. We have laid before the committees, and incidentally before the Senate, the report of the engineers who examined the project, and we believe that they all sustain us. The Senate has also been presented with the opinion of the Indian Bureau. It may be that the gentlemen who are speaking against us have better information about our conditions; but there is one kind of information they do not have, and that is the general background and the history which underlies this particular legislation.

The Rio Grande Valley, as I think Senators understand, is a very peculiar part of the United States. The district which we are considering is a district 150 miles long, and most of it is about 1 mile wide. There are a few broader tracts, constituting what may be called oases in the middle of this desert. These oases were settled on in prehistoric times by these tribes of Pueblo Indians, six of them in the area that is now in question. Naturally, those tribes of Indians picked the best land they could find along the river. Those Indians are living in exactly the same area, with the same lands, with the same architecture and buildings that they were living in when Europeans first came out there, and that means a very long period of historical record.

The first European to visit the country was Cabeza de Vaca, who walked from the coast of Florida to the city of Mexico by way of New Mexico in 1528. We have his records. We have the records of the Coronado expedition, which practically started the white settlement in New Mexico. The date of that was 1540. From that time to this those Pueblos have remained in possession of the lands which they possessed originally. As I think the Senator from Arizona said, that condition does not apply in any part of the United States except the Southwest.

The sixteenth century is generally considered a cruel century, and we hear of the Spanish conquerors, and perhaps some of us who were born in this part of the country think they were a cruel set of men. The fact remains that they treated the Indians better than anybody else has treated them who came from Europe in the early days. They came out nearly a century before the Pilgrim Fathers; and yet what has happened to the Indians in the East? Where are the Hurons, or the Iroquois, or the Pequots, or the Narragansetts? Even in later times the Chippewas and the Menominees, and such Indians in the Northwest, have been segregated, as I understand, and placed on reservations.

We are dealing here with an entirely different situation. These are Indians who never wandered, who have always been in exactly the settlements they are in now.

It is true that in the seventeenth century there was a great outburst of anti-Christian sentiment. The Pueblo Tribes rose up, massacred the Franciscan missionaries, and drove the Spaniards out of the territory for 12 years. After the Spaniards came back they did not retaliate in any way. They conquered the Indians, but they did not dispossess them or drive them out of their lands. They took none of their privileges away from them. They settled on what land remained after the really first-class land had been left in Indian possession. That statement applies after the territory we are speaking of passed under Mexican

sovereignty; their possession was guaranteed when the United States, under the treaty of Guadalupe Hidalgo, took over the territory. The same guaranties were preserved in the enabling act and in the constitution of New Mexico.

Mr. KING. Mr. President, will the Senator yield?

Mr. CUTTING. I yield.

Mr. KING. I think the Senator should state that the number of Spanish settlers in the district to which he refers was always very inconsiderable. There was a larger repository of Spanish blood in California; but in Arizona and New Mexico, and farther up, in the southern and southwestern part of Colorado and the southern part of Utah, there was scarcely any Spanish blood at any time, as I recall history.

Mr. CUTTING. Mr. President, I beg to take issue with the Senator on that point. The records of the Spanish conquerors in New Mexico are a matter of history. They can be traced under all the Spanish governors. We know just what Spaniards settled in each particular place, and the number of the invaders, as they may be called. That population increased. At the time the United States took over the territory, which I suppose is the time to which the Senator is referring, the Spanish population was the same as it is now—that is to say, around 150,000 to 200,000—and, of course, that was immeasurably superior to the few thousands of Pueblo Indians who were on the land.

I think that background does make a difference when Senators get up here and tell about the terrible injustices which have been done the Indians all over the country.

I see that the opponents of this bill, in a statement they have gotten out asking for a veto in case the bill should pass, state that—

> If the Senate can be led to indorse such a proposal, the century of dishonor has not come to an end.

Mr. President, there has been no century of dishonor so far as New Mexico is concerned. There have been four centuries of complete good faith.

When the United States took over the territory which we now call New Mexico, they took over not only these Indian pueblos but the Spanish population which had been settled there for at least 300 years. Those Spanish people had been just as remote from European or American civilization and culture as any part of the Pueblo Indians. They were totally unfitted to cope with the advances of Anglo-Saxon civilization.

The territory which they owned was exploited by the land grabber and the carpetbagger from the East. Those people to a large extent lost their rights, lost their lands, and were reduced to poverty. That never happened to the Indians. Nothing was ever done by the Federal Government for those Spanish-speaking people. When we consider the millions of dollars that have been spent on Porto Rico and the Philippines to educate the people of those distant possessions in the English language and in Anglo-Saxon ideas, it is fair to remember that those advantages never were given to New Mexico or to the Spanish-speaking majority of the population of New Mexico in any degree.

These Pueblo Indians, on the other hand, have been treated well. They have had admirable schools. Everything has been done for them. Many of them are graduates of Carlisle and other institutions of learning outside of New Mexico, and almost all have been to the Pueblo schools in Albuquerque and Santa Fe. Moreover, they have been protected against any exploitation. Their rights are guaranteed by the United States. They have the right to vote if they choose to pay taxes. If they do not, they remain wards of the Government, and nothing can be done against their interests.

I mention this background because it has, I think, something definitely to do with the subject now before the Senate. I want to compare for a moment the position of the descendants of the conquerors with the descendants of the people they are supposed to have conquered, and especially with regard to this particular bill. It is obvious that the bill will benefit all settlers in this valley, but it is equally obvious that it will benefit the Indians in proportion far more than the white settlers.

The whites, of course, pay taxes and interest. The Indians pay none.

The whites are assessed $76 an acre. As has been very clearly shown by my colleague, the Indians are assessed $67.50 an acre.

The whites pay the principal in 40 years. The Indians can have their time extended indefinitely within the discretion of the Secretary of the Interior.

The whites have to pay for the operation and maintenance of the irrigation system. The Indians are guaranteed against operation and maintenance charges in perpetuity.

The Indians receive priority water rights on the entire amount of acreage now under cultivation; that is, the 8,000 acres. They receive equal rights on the 15,000 acres to be added to cultivation.

The water rights in the old section, as well as the new section, are not subject to loss in case of nonuse or abandonment so long as the title remains in Indian ownership. That is something to which, of course, the white settlers have no claim whatever.

There is no lien against the lands now under cultivation. There is to be no enforcement of the lien against the newly reclaimed lands as long as the title remains with the Indians. To all practical intents and purposes, this probably means forever.

The bill not only trebles or quadruples the value of the Indian lands placed under cultivation, but it also trebles their extent.

It is no wonder that the Assistant Commissioner of Indian Affairs, who hoped for the gratuity clause in this legislation, has since testified that even without the gratuity clause this is the most generous piece of Indian legislation which has been passed by Congress in the last 15 years.

Mr. BRATTON. Mr. President, will my colleague yield to me just there?

Mr. CUTTING. Yes, sir.

Mr. BRATTON. While my colleague is on this subject, I have just been advised by the Assistant Commissioner of the Bureau of Indian Affairs that at no time did the Bureau of Indian Affairs make any promises or give any assurances to the Indians regarding the provisions of this bill; and any assertion to the contrary must of necessity be a mistake. That should become a matter of record.

Mr. CUTTING. I am glad to hear the statement of my colleague. I was sure that that was the case.

Mr. KING. Mr. President——

The PRESIDING OFFICER (Mr. DILL in the chair). Does the Senator from New Mexico yield to the Senator from Utah?

Mr. CUTTING. I yield.

Mr. KING. I am sure that anybody who reads the record, the hearings before the House committee and the hearings before the Senate committee, and the statements made by the Assistant Commissioner of Indian Affairs, Mr. Meritt, can not fail to be impressed with the thought that the Indian Bureau did recommend the $500,000 plus as a gratuity, and the bill which they first indorsed called for that as a gratuity. If that was not a promise, certainly persons reading the record would reach the conclusion that it was the equivalent of such.

Mr. CUTTING. Mr. President, I think it is very obvious, from Mr. Meritt's statement, that he prefers the bill with the gratuity clause in it. I am willing, for the sake of the argument, to agree with the Senator that the bill might be better with the gratuity clause in it. My colleague and I supported it in that form. Mr. Meritt's statement is, however, that even without the gratuity clause, it is the most beneficial piece of Indian legislation we have had in a long time. I do not think there is anything inconsistent in Mr. Meritt's position in that respect. But Mr. Meritt surely was not in any position to promise what Congress would see fit to do with regard to this matter.

This is a bicameral legislature, and the House of Representatives, of course, has to be considered in this matter. The parliamentary situation is simply such at this time that the bill can not pass in the original form. It must pass in this form or in none other.

Mr. LA FOLLETTE. Mr. President, will the Senator yield?

Mr. CUTTING. I yield.

Mr. LA FOLLETTE. Will the Senator explain what that parliamentary situation is?

Mr. CUTTING. I do not think we have to go into this thing in great detail. I am sure the Senator is just as familiar as I am with the fact that enough opposition has been developed in the House to the bill with a gratuity feature in it as to make it absolutely certain that it can not pass in that form.

Mr. LA FOLLETTE. Just what is that opposition? There is nothing in the RECORD that I have been able to find to show it. All that we have before us, so far as the official record in this matter is concerned, is that the House exercised its right to attach an amendment to the Senate bill. We have nothing but the statements made by the senior Senator from New Mexico, and now reiterated by the junior Senator from New Mexico, that unless the Senate pass the measure without further attempt to investigate the matter before the House, or to exercise its right to amend the House amendment, the legislation must fail. There has been so much of that kind of loose statement made here that I should like at this time to have some specific understanding of just what the parliamentary situation is that prevents the Senate from amending this amendment in such manner as it sees fit.

Mr. BRATTON. Mr. President, will my colleague yield to me?

Mr. CUTTING. I yield.

Mr. BRATTON. In reply to what the Senator from Wisconsin characterizes as so much loose talk, I want to say to him that the Congress will not abandon a policy that has prevailed unbroken for 15 years. The Senator knows that this whole controversy revolves around the policy of whether appropriations like this one are going to be reimbursable, or in the form of a gratuity.

Mr. LA FOLLETTE. Mr. President——

Mr. BRATTON. The Senator will allow me to complete my statement. The reimbursable policy has obtained for the last 15 years. It was inaugurated in 1913. This bill will not pass with a gratuity feature in it, and if the Senator will take as much time to investigate that as I have done, and as my colleague has done, he will reach the same conclusion, namely, that the policy of making appropriations for reclamation of Indian lands reimbursable is not going to be broken as to this bill, or any other legislation in the near future. It is the unbroken policy that has obtained for 15 years. That fact makes it impossible to enact this legislation in the form of an exception to such general policy. That has been investigated thoroughly, and the Senator must have advised himself about it.

Mr. LA FOLLETTE. Mr. President, I should like to ask the Senator if there were not reimbursable features concerning Indian water rights for agricultural purposes in the last appropriation bill that passed at this session of Congress.

Mr. BRATTON. For agricultural purposes?

Mr. LA FOLLETTE. Yes.

Mr. BRATTON. I am speaking about reclamation projects. I do not know as to the other. I am informed by the Bureau of Indian Affairs, and from other sources, that this policy of making appropriations for reclamation of Indian lands has obtained now for about 15 years, and there are those who are strongly committed to it. I am absolutely convinced that the policy will not be departed from in this case.

Mr. LA FOLLETTE. Mr. President, if I may trespass further on the time of the junior Senator from New Mexico, and let me say to him that I have no disposition to break the connected character of his argument——

Mr. CUTTING. I yield.

Mr. LA FOLLETTE. I requested a more definite statement of the basis upon which the Senators from New Mexico founded their contention that this legislation must pass in this form or not at all, and all that I get from the Senator is a statement to the effect that his information indicates that there has been a policy since 1913 of making all Indian reclamation work reimbursable. Waiving, for the moment, the question of whether or not the Senator's information is correct in that matter, it still does not explain the particular situation in which this bill rests.

The Senate can amend the bill in such a manner as it thinks is just under the circumstances, and can then message the bill over to the House. The question will come up on the floor of the House and be discussed there on its merits. As I stated in my remarks this morning, until the Senate has either taken that course or taken the course, which is perfectly legitimate, of rejecting the House amendment and asking for a conference, I maintain that it has not exhausted the perfectly legitimate and usual procedure in matters of this kind.

Mr. KING. Mr. President——

The PRESIDING OFFICER (Mr. HEFLIN in the chair). Does the Senator from New Mexico yield to the Senator from Utah?

Mr. CUTTING. I yield.

Mr. KING. It seems to me that the two Senators from New Mexico, able and earnest as they are, postulate a static condition, namely, that there must be appropriated one million five hundred ninety and odd thousand dollars, and in order to give reasonableness to such an enormous appropriation, they assume that the entire twenty and odd thousand acres are to be reclaimed. They forget that 8,346 acres have been reclaimed; that there are valid rights, of which the Indians may not be deprived, rights which were sanctified, if that is a proper term, by the enabling act under which New Mexico came into the Union, and by the constitution of New Mexico. The rights of those Indians were confirmed and may not be taken from them. Those Indians are not asking that those 8,346 acres shall be reclaimed. They have already been reclaimed. They are not asking for water rights or for the protection of their water rights. They have valid rights of which they may not be deprived by the State of New Mexico or by the Federal Government.

Therefore, the whole question is not as to this question of a gratuity, one of $500,000 plus. We may remit that, if the Senators will consent to the elimination of the $596,000 from the bill, and seek an appropriation of $1,000,000, and then allocate that to the 15,000 acres which are to be reclaimed, making approximately $67 per acre as the basis. If that were done, there would be no controversy, in my opinion.

Mr. CUTTING. Mr. President, may I say to the Senator that, admitting for the moment that the Indians have a legal claim on the 8,346 acres, on the water rights, and everything else concerned, in the course of time all that would be of absolutely no value to them whatever, from a practical point of view. I think my colleague has clearly shown to the Senate that the water level along the Rio Grande Valley is constantly rising, that each year there is less land available, and that the land that is available is getting more and more water-logged and more and more filled with alkali, and less and less useful for any practical purpose. I have not fixed that figure of $1,5[illegible]3,000. That was figured after a very careful calculation of the proportionate benefits which the Indians were to derive as compared with the rest of the valley. I accept that in perfect good faith, coming from a committee of expert engineers and two very able committees of the House and the Senate, as the proper figure. I have not calculated it; I am sure it is correct.

I am sure that if the Senator from Utah came before us with a proposition with regard to his State of this sort, my colleague and I would gladly accept any figure he would give; and the same applies to the State of Wisconsin or to the State of North Dakota. I say this in the best of feeling, because I know that these Senators are entirely sincere in speaking for what they consider the best interest of the Indians. We feel otherwise. We feel that the Indians are going to get more benefit out of this legislation, in proportion, than any other citizens of New Mexico.

If somebody were to come before the Senate and state that this bill as we propose it were too generous to the Indians, I think we should have a very much more difficult time to prove the merits of our proposition. I do not think it is too generous, because I think we ought to lean over backward in the attempt to do justice to the Indians at all times. But surely, when the very gentleman who is opposing the bill now has testified before the Senate committee that if such a bill is not passed the Indians will be faced with what has been described as the supreme evil, that of being compelled, because of the growth of population, to break up and go out to distant places, it seems very evident that we, in proposing this bill, are attempting to save the Indians from a calamity which has not been visited on them in the course of the last 400 years and from which they alone have perhaps been spared out of all the tribes of Indians in the country. With the exception, of course, of the Indians in Arizona, who came into the United States under the same terms, I believe these are the only Indians who have been living undisturbed down the centuries on the lands which they have occupied since prehistoric times. If this bill does not pass, according to Mr. Collier himself, these Indians are going to have to move out. They are going to lose their rights, which they have valued and maintained for the last 400 years to our knowledge, and for possibly many hundreds of years before that.

How can any friend of the Indians, or supposed friend of the Indians, under these circumstances, argue that if the bill shall pass in its present form the Indian pueblos will be urged to obtain a veto, and if they do not obtain a veto to contest the constitutionality of this act in the courts?

Mr. LA FOLLETTE. Mr. President, will the Senator yield?

Mr. CUTTING. I yield.

Mr. LA FOLLETTE. Does the Senator from New Mexico think that Mr. Hanna is not a friend of these Indians?

Mr. CUTTING. Mr. President, I think that Mr. Hanna is a very sincere friend of the Indians. I think Mr. Hanna has been misinformed as to the conditions prevailing in Congress. I have a long telegram from him, by the way, which I think perhaps I might read.

Mr. LA FOLLETTE. The Senator has inferred that other Senators who do not live in New Mexico are uninformed in regard to this matter, but the Senator would hardly infer that Mr. Hanna, who lives in Albuquerque, and who has been the attorney for these Indians in this matter, is not informed, I take it.

Mr. CUTTING. His telegram starts:

> From information reaching me I fear that Senate debate on conservancy bill may create strong impression that appropriation is excessive.

It goes on along those lines. There are two pages of it. But the basis of the whole discussion is the fact that information has reached him from Washington on which he bases his recommendations as to what is to be done. Mr. Hanna not being here,

is not in a position to discuss the relative benefits which may accrue to the Indians from this bill or from some other bill, as we might amend it, because he does not understand the parliamentary situation, which my colleague and I are trying to make clear to the Senator from Wisconsin.

Mr. LA FOLLETTE. I would like to ask the Senator if Mr. Hanna is not the one who, in his telegrams, suggests that an effort will be made to secure a veto or to test it in the courts?

Mr. CUTTING. No; I do not refer to Mr. Hanna. It was Mr. Collier from whom I had a letter on that question.

Mr. LA FOLLETTE. If the Senator will read the telegram, I think he will find that suggestion embodied in it.

Mr. CUTTING. For the information of the Senator I shall be glad to read the entire telegram:

ALBUQUERQUE, N. MEX., *February 27, 1928.*

Hon. BRONSON N. CUTTING,
United States Senate, Washington, D. C.:

From information reaching me I fear that Senate debate on conservancy bill may create strong impression that appropriation is excessive and constitutes an injustice to Indians, thereby precipitating a fight for veto which might, and probably would, prove fatal to appropriation at this session. Can not believe that it is the policy of Congress or executive branches of Government to place burden by lien or reimbursable debt upon present cultivated areas of the pueblos, yet careful study of Cramton bill assures this result. If compromise could be reached before to-morrow and amendments accepted curing bill with assurance of appropriation for conservancy work understand necessity for conference exists, but can not believe that CRAMTON or his associates would desire or have the power to block favorable action—

All pure assumptions, of course, as the Senator will realize—

Importance of matter from State standpoint clearly requires cooperation and avoidance of antagonisms if success is attained. Believe success through compromise and acceptance of amendments more certain and that attitude of CRAMTON and apparent belief that his wishes must be accepted constitute greater jeopardy to desired success of conservancy measure. I know that a nation-wide fight for the veto of the measure as it is now presented to the Senate will be made, and I am greatly desirous of eliminating this dangerous element and express the hope that your last-hour effort will help accomplish the result.

R. H. HANNA.

It is quite obvious from the telegram that Judge Hanna believes the bill ought to pass, that it is a valuable piece of legislation. He is alarmed for fear there will be a veto. He wants to eliminate what he considers the dangerous elements in the bill. He believes the necessity for a compromise exists.

Mr. LA FOLLETTE. Mr. President, will the Senator yield further?

Mr. CUTTING. In just a moment, if the Senator will pardon me. Judge Hanna "can not believe" that Mr. CRAMTON and his associates would desire or have the power to prevent favorable action. I think the Senator from Wisconsin will agree with me that that is not a matter which Judge Hanna can decide from Albuquerque, N. Mex.

Now I am glad to yield to the Senator from Wisconsin.

Mr. LA FOLLETTE. In so far as Judge Hanna's statements are directed to the legislation, I note that he states "after careful consideration of the Cramton amendment." Also I would like to suggest to the Senator that he characterizes Judge Hanna's fears with regard to this legislation as assumptions. I would like to reiterate that I characterize the statement of the Senator from New Mexico that the legislation can not pass unless we take the bill exactly in the form in which it is now presented as also an assumption.

I would like to make one further statement, if the Senator will permit me, that no one is contending here against any legislation at all, but those who are opposed to the legislation in the present form are contending that the Senate could go further in its attempt to secure the legislation that it has gone at this time.

Mr. CUTTING. May I ask the Senator from Wisconsin a question?

Mr. LA FOLLETTE. I am delighted.

Mr. CUTTING. If he could be convinced that the bill would have to pass in its present form or not at all, would he be in favor of this legislation or of no legislation at all?

Mr. LA FOLLETTE. In the first place let me say that I would be opposed to the bill in its present form until every effort has been made to reach an agreement with the House of Representatives that will protect the interests of the Indians in this matter, as I see them, until the Senate has amended the bill to make that protection of their interests and sent it to the House, where it can come up on its merits on the floor of the House, rather than to take a sub rosa statement of some Member of the House that he is not going to let the bill pass unless the Senate recedes. I do not think we have discharged that obligation.

In regard to the Senator's question as to whether or not, if I were convinced, after the Senate had taken that action, that the bill could not pass except in its present form, I would like to say that in my judgment the interests of the Indians would be protected if the legislation failed of passage at this session of Congress and it could be taken up at the next session of Congress. I would prefer to see a fight made here by the Senate now for the legislation and efforts put forward to get it in a form which would be just to the Indians. If that can not be done at this session of Congress, I would prefer to have the fight made at the next session of Congress rather than to sacrifice the interests of the Indians as I see them.

Mr. CUTTING. It is quite obvious that that is not the position of Judge Hanna, and that is the reason why I read his telegram in full. The Senator from Wisconsin suggested that Judge Hanna had been one of the men who had mentioned the possibility of making a fight in the courts on the constitutionality of the bill. So far as his telegram to me goes, that is not the case.

Mr. LA FOLLETTE. My suggestion with regard to Judge Hanna was that he made a suggestion concerning the possibility of its veto.

Mr. CUTTING. Then I misunderstood the Senator. But the fact remains that the only letter which suggested a testing of the constitutionality of the matter came from Mr. Collier, saying that six Pueblo Tribes, if they failed to obtain a veto, would seek an injunction and fight the matter to the highest court.

Mr. LA FOLLETTE. The Senator does not contend they have not a right to do that?

Mr. CUTTING. I do not contend anything of the sort. I contend that no true friend of the Indians could possibly urge them to take any such action.

I think I have about covered the situation. There may be some other Senator who wants to speak on the matter. As I said, it is the most important matter that has come before the State of New Mexico since statehood. It is as important to the Indians as to any other citizen of the valley, and probably more important. I submit that every true friend of the Indians will support the measure in the form in which it is at present before the Senate, with the amendment suggested by the Senator from Kansas.

Mr. DILL. Mr. President, I am interested in the pending measure from only one standpoint, namely, the reimbursable feature. If the policy which has been established in the Congress for a long period of years, of making such appropriations reimbursable, is to be abandoned, it opens the door to what I consider a very dangerous situation in that connection. I do not understand, from what I can learn of the legislation, how anybody can seriously contend that the money should not be reimbursed as are all other appropriations for the development of Indian property.

Mr. KING. Mr. President, will the Senator yield?

Mr. DILL. Certainly.

Mr. KING. That is not the only question involved.

Mr. DILL. It is a very big question that is involved.

Mr. KING. If we eliminate the alleged gratuity of $593,000 and charge the Indian lands with $1,000,000 so that the land to be reclaimed would pay approximately $67 an acre, approximately what is paid by the white people, there would be no controversy, at least so far as I am concerned.

Mr. DILL. The land that is to be reclaimed, as I understand it, is now waste land.

Mr. KING. Oh, no.

Mr. DILL. That is the statement made here.

Mr. KING. There are 8,346 acres which have been reclaimed and which have been cultivated for many years, and the theory is that they will put the 8,346 acres into the entire aggregate acreage and charge those acres theoretically, but still put all the burden upon the 15,000 acres.

Mr. DILL. I think the 15,000 acres could well afford to bear that burden, because otherwise they would never have been developed. The proposal that the money should not be reimbursed is to me indefensible in the face of the long established policy of Congress of requiring the reimbursing of all such appropriations. I do not desire to take further time on the matter, but I did want to make just that statement.

Mr. BRUCE. Mr. President, I send to the desk a telegram which I should like to have read. It relates to the present debate.

The PRESIDING OFFICER. The telegram will be read, as requested.

The Chief Clerk read as follows:

BALTIMORE, MD., *February 28, 1928.*

Hon. WILLIAM CABELL BRUCE,

United States Senate, Washington, D. C.:

Large group Baltimore women, including heads of several large women's organizations, in meeting assembled with Fortnightly Club, strongly urge that Senate bill 700 be so amended as to fully protect interests of Pueblo Indians, and that you as our representative advise the Senate of our wishes in this matter.

ANNA N. KAY, *Secretary.*

Mr. McKELLAR. Mr. President, I wish to say to those who are in charge of the bill that I do not intend to delay its further consideration more than 10 minutes. I desire to speak for about that length of time upon another matter.

Mr. BRATTON. I thank the Senator for his assurance.

FEDERAL AID TO ROADS

Mr. McKELLAR. Mr. President, I was glad to note in his December message that the President thought well of Federal participation in road building. I regret, however, that he said: "National participation, however, should be confined to trunk-line systems." In this I think the President has made a mistake. Only a small proportion of the people of the United States live on trunk-line systems, and I believe as many of the people of the United States as possible are entitled to good roads. There are already in existence splendid trunk-line roads.

Mr. President, the Federal aid to roads movement got its first great impetus in the House of Representatives in 1912. I was then serving there and I was placed upon a special committee to draft a Federal aid to roads law. Tennessee was particularly honored by the then Speaker, Champ Clark, when he put both Congressman JOSEPH W. BYRNS and myself on that committee. We reported out a bill known as the Shackleford bill, but it failed of passage and there were many failures before the bill finally became the law. However, the present road act was finally enacted into law on July 11, 1916. Shortly after that, when the question of appropriation was up, we were virtually in the throes of a war and the then President had indicated that he did not desire money to be spent for roads at that time. The late Senator Bankhead was chairman of the Post Offices and Post Roads Committee at the time, and he and I called on the President and got him to recommend a liberal appropriation. Later on the appropriations were made even more liberal, and to-day under the impetus given to road building by Federal aid we are developing a vast and splendid system of good roads throughout the country.

The Federal Government is specifically authorized by the Constitution to establish post roads. There can be no possible constitutional objection to this system. The first Federal-aid road was begun in the administration of Mr. Jefferson, who was an ardent advocate of good roads. So that Federal aid to roads is not only constitutional but it is Democratic, as it was begun by the founder of our party.

The value of good roads to the country can not be estimated. When this national aid to roads act was passed there was not even a State highway commission in Tennessee, but I went to Nashville in 1915 and urged the passage of a highway commission bill so that Tennessee could have the advantage of the Federal aid act, when passed, and a bill was passed by the legislature and from the very beginning Tennessee has received her full share of the benefits of the Federal aid act. On July 31, 1916, I made a speech in the House of Representatives, being then a Member of that body, on benefits to Tennessee from the Federal road law, which speech I closed as follows:

I am very proud of the part I have taken in securing this much-needed piece of national legislation. It is one of the many great pieces of legislation enacted by this Democratic administration. It will accomplish great things for Tennessee, and it will give an impetus to road building in our State that it has never had before. The various counties are already doing much in that line, but with the example of the State and National Governments before them they will accomplish greater and larger things. This is my firm belief.

Mr. President, the belief that I then entertained has been more than realized.

The total mileage of Federal-aid projects completed in Tennessee up to date is 900 miles. The total mileage of Federal-aid projects under construction is 250 miles. The total of Federal payments on completed projects is $12,284,761. The total paid by the State on these projects is $13,652,093. The total Federal payments on projects under construction up to November 30, 1927, was $2,161,181. This, added to combined projects above, makes the total $14,446,942.

I have recently obtained from the Bureau of Roads full information in reference to Federal-aid roads built in Tennessee.

Mr. President, I ask that there may be inserted in the RECORD at this point in my remarks tables furnished me by the Bureau of Roads showing the types and location of completed Federal-aid projects in Tennessee as of November 30, 1927.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

Type and location of completed Federal-aid projects in Tennessee, November 30, 1927

Location	Project No.	Length
CONCRETE ROADS		*Miles*
Athens to McMinn-Bradley County line	28	14.5
Humboldt to Gibson-Madison County line	29A	2.3
Madison-Gibson County line toward Humboldt	29B	7.4
Brighton to Covington	31B	7.3
Millington to Shelby-Tipton County line	31C	3.9
Town of Sale Creek to Soddy Creek	35	7.4

Camden to Benton-Carroll County line	94	8.0
Wayne-Lawrence County line to Waynesboro	99	11.8
Total		117.0

I next quote the facts and figures on partly constructed highways. Probably the principal highway through Tennessee is the one from Memphis in a general northeasterly direction to Bristol. I give the data as to that road furnished me by the Bureau of Roads:

Memphis to Bristol

Location	Federal-aid project No.	Status	Distance (miles)	Type of surface
Memphis to point about 5 miles east.	None.			
Point about 5 miles east to Shelby-Fayette County line.	36BCD	Construction	18.8	Concrete.
Shelby-Fayette County line to Fayette-Tipton County line.	36A	Completed	7.9	Do.
Tipton-Fayette County line to Tipton-Haywood County line.	204A	do	4.7	Do.
Haywood-Tipton County line to Brownsville.	100	Construction	16.1	Do.
Brownsville to Haywood-Madison County line.	70	Completed	6.1 3.9	Do. Rock asphalt.
Madison-Haywood County line to Jackson.	69	do	14.6	Concrete.
Jackson to point 8 miles northeast.	51D	Construction	7.9	Graded and drained.
Point 8 miles northeast of Jackson to Huntingdon.	51ABC	Completed	26.3	Do.
Huntingdon to Carroll-Benton County line.	21	do	12.3	Bituminous macadam.
Benton-Carroll County line to Camden.	94	do	8.0	Gravel.
Camden to Benton-Humphreys County line.	9	do	7.0	Do.
Humphreys-Benton County line to Burns.	None.			
Burns to Dickson-Cheatham County line.	46	do	9.9	Bituminous macadam.
Cheatham-Dickson County line to point 2 miles from Cheatham-Davidson County line.	205	do	9.5	Graded and drained.
Point 2 miles from Cheatham-Davidson County line to point near Belleview.	75A	Construction	7.4	Concrete.
Terminus of project 75A to terminus project 75B.	74	Completed	2.3	Bituminous macadam.
Terminus project 74 to McLean.	75B	Approved	2.5	Graded and drained.
McLean to Nashville	87	Completed	2.5	Bituminous concrete.
Nashville to Davidson-Rutherford County line.	56	Construction	13.0	Concrete.
Rutherford-Davidson County line to Murfreesboro.	47	Completed	15.5	Bituminous macadam.
Murfreesboro to Readyville	48B	do	10.6	Do.
Readyville to Rutherford-Cannon County line.	48C	Approved	.7	Do.
Cannon-Rutherford County line to Woodbury	49	Completed	6.6	Do.
Woodbury to Cannon-Warren County line.	48A	Construction	8.6	Do.
Warren-Cannon County line to McMinnville.	65	Completed	12.2	Do.
McMinnville to Warren-Van Buren County line.	202	do	13.4	Do.
Bridge over Caney Fork	203	Construction	.1	Reinforced concrete bridge.
Bridge over Caney Fork to Sparta.	201	Completed	14.0	Bituminous macadam.
Sparta to White-Cumberland County line.	38	do	13.5	Do.
Cumberland-White County line to Rockwood.	None.			
Rockwood to Kingston	85	do	10.0	Rock asphalt.
Kingston to Roane-Loudon County line.	45A	Construction	11.6	Concrete.
Loudon-Roane County line to Loudon-Knox County line.	45B	Approved	8.0	Not determined.
Knox-Loudon County line to Point near Knoxville.	41	Completed	12.8	Rock asphalt.
Terminus project 41 to Knoxville.	None.			
Knoxville to Rutledge	210	Approved	7.0 5.7 17.6	Bituminous concrete. Graded and drained. Not determined.
Rutledge to Tate Springs	None.			
Tate Springs to Kingsport	14	Completed	50.1	Bituminous macadam.
Kingsport to Bristol	95, 97, 98	do	22.7	Concrete.

I next give the data in connection with the road from Chattanooga to Knoxville.

Chattanooga to Knoxville

Location	Federal-aid project No.	Status	Distance (miles)	Type of surface
Chattanooga to Hamilton-James County line.	78C	Approved	9.8	Not determined.
James-Hamilton County line to James-Bradley County line.	78B	Construction	6.4	Graded and drained.
Bradley-James County line to Cleveland.	78A	Completed	9.2	Concrete.
Cleveland to Bradley-McMinn County line.	58	Construction	10.1	Do.
McMinn-Bradley County line to Athens.	28	Completed	14.5	Do.
Athens to point 2 miles north.	60B	Approved	2.1	Not determined.
Point 2 miles north of Athens to McMinn-Monroe County line.	60A	Completed	7.0	Concrete.
Monroe-McMinn County line to Lenoir City.	None.			
Lenoir City to Loudon-Knox County line.	207	do	5.2	Do.
Knox-Loudon County line to point near Knoxville.	41	do	2.8 12.8	Do. Rock asphalt.
Terminus Project 41 to Knoxville.	None.			

Next from Memphis to Fulton, Ky.

Memphis to Fulton

Location	Federal-aid project No.	Status	Distance (miles)	Type of surface
Memphis to Millington	8	Completed	16.1	Bituminous macadam.
Millington to Covington	31BC	do	11.2	Concrete.
Do	31A	Construction	9.8	Do.
Covington to Tipton-Lauderdale County line.	30	Completed	5.1	Bituminous macadam.
Lauderdale-Tipton County line to Ripley.	32	do	7.7	Do.
Ripley to Dyersburg	39ABC	do	22.2	Concrete.
Do	39D	do	.1	Bridge.
Dyersburg to Newbern	52	do	8.3	Bituminous concrete.
Newbern to Dyer-Obion County line.	81B	Construction	7.5	Graded and drained.
Obion-Dyer County line to Obion.	81C	Approved	3.8	Not determined.
Obion to Troy	81A	Construction	5.8	Graded.
Troy to Union City	54	Completed	9.5	Concrete.
Union City to South Fulton	64	Construction	10.0	Do.

Next from Nashville to Chattanooga.

Nashville to Chattanooga

Location	Remarks
Nashville to Murfreesboro	Federal-aid projects Nos. 56 and 47 common with Memphis-Bristol route.
Murfreesboro to Chattanooga	No other Federal-aid projects on the route.

Next from Alabama line, through Nashville and Gallatin, to the Kentucky line.

Alabama line, through Nashville and Gallatin, to Kentucky line

Location	Federal-aid project No.	Status	Distance (miles)	Type of surface
Alabama Line to Pulaski	25	Completed	19.2	Rock asphalt.
Pulaski to Columbia	40A	do	7.1	Bituminous macadam.
Do	40B	Construction	12.5	Do.
Do	40C	do	9.4	Concrete.
Columbia to Maury-Williamson County line.	26	Completed	11.9	Rock asphalt.
Williamson-Maury County line to Nashville.	None.			
Nashville toward Gallatin	206	Completed	3.7	Bituminous concrete.
Terminus of project 206 to terminus project 67A.	67B	Approved	.5	Grade separation.
Terminus of project 67B to Davidson-Sumner County line.	67A	Construction	5.6	Rock asphalt.
Sumner-Davidson County line to Gallatin.	63	Completed	12.8	Do.
Gallatin to Kentucky line	None.			

Mr. McKELLAR. From these facts and figures, Mr. President, which I shall not undertake now to elaborate, it is seen what Federal aid is doing for Tennessee. While these through lines have not all been completed with Federal aid, they have been filled in by the counties or by the State in a way that now gives us a good system of through highways. It will be seen from examining the figures that the Federal-aid projects have cost an average of about $30,000 a mile, which is a reasonable cost when we remember that some of them were built during and just after the war. The building of these roads has given a wonderful impetus to road building throughout the State, and though Federal aid has continued only a period of 10 years we have established in our State an excellent system of roads.

Mr. President, we must take no backward step on the question of road building. Instead of that, we should move forward and progress. I have introduced another bill providing for Federal aid to rural post roads. I hope to get it reported out of the committee and passed soon. It ought to become the law. Nothing so helps a country as a good system of roads. There should be hard-surfaced roads connecting every county seat not only in Tennessee, but connecting county seats in every State in the Union. The Government can not better spend its money than to spend it on Federal aid to roads. As a member of the Post Offices and Post Roads Committee of the Senate I have taken part in all legislation providing for Federal aid to roads, and a most active part, and am one of the authors of the present amended law, and I take pride in the fact that I have had the opportunity in this way of aiding in building up the road system, not only of my own State, but the road systems of the Nation.

PUEBLO INDIAN LANDS

The Senate resumed the consideration of the amendment of the House of Representatives to the bill (S. 700) authorizing the Secretary of the Interior to execute an agreement with the Middle Rio Grande conservancy district providing for conservation, irrigation, drainage, and flood control for the Pueblo Indian lands in the Rio Grande Valley, N. Mex., and for other purposes.

The PRESIDING OFFICER (Mr. HEFLIN in the chair). The question is on agreeing to the amendment of the Senator from Wisconsin [Mr. LA FOLLETTE] to the amendment of the Senator from Kansas [Mr. CURTIS] as modified.

Mr. KING. Mr. President, the debate upon the pending measures has consumed considerable time and covered the important questions involved. The Senators from New Mexico have, with ability and zeal, presented their views and submitted arguments in favor of the bill as amended by the House. The Senators from Wisconsin [Mr. LA FOLLETTE] and North Dakota [Mr. FRAZIER] in an able and comprehensive manner assembled the facts and presented arguments against the House amendment. So far as I know the material facts have been presented and the case is ready to be closed and the judgment of the Senate taken. However, before the final vote I desire to give to the Senate my views upon the measure before us and to state some of the reasons which will compel me to vote against the bill.

For a number of years the inhabitants of the Rio Grande Valley in New Mexico have been interested in developing an irrigation and reclamation project and in protecting their property from devastating floods. The Rio Grande River flows through this valley for more than 150 miles, and there can be irrigated, if the waters of the river are properly conserved and distributed, approximately 132,000 acres of land. Within the valley there have resided for hundreds of years groups of Indians known as the Pueblos. When the Spaniards first entered the Rio Grande Valley in New Mexico they found a large number of Indians who were engaged in agricultural and pastoral pursuits.

They had houses and lands and personal property and were cultivating many thousand acres of land upon which they produced abundant crops for their sustenance. These Indians were peaceable and inoffensive, and had attained a higher standard of civilization than many tribes in the territory now embraced within the United States. Their villages were located upon the highlands, and by means of dams and ditches water was diverted at many places from the river and conveyed to and upon the lands which they cultivated. The land irrigated by them yielded valuable agricultural crops, and because of their agricultural pursuits it gave to them permanent habitats. There were a number of these pueblos extending up and down the valley for many miles. The maximum number of acres of land irrigated by the Indians in those early days was greatly in excess of the area now cultivated by the Indians.

With the advent of the Spaniards and the changed conditions which subsequently occurred, together with the movement of Americans westward as the United States became settled, the number of Pueblo Indians diminished, and the area of the lands owned and occupied by them materially decreased. At the present time there are about 3,500 Pueblo Indians occupying a portion of the lands which their ancestors owned and possessed hundreds of years ago. They hold the lands of each separate group or pueblo in communal form, and each pueblo in many ways is a distinct and corporate entity. These Pueblo Indians farm approximately 8,340 acres, being a portion of the lands which have been occupied and farmed for hundreds of years by their forefathers.

In the hearings upon this and other similar bills, and during the debate, intimations have been made that the Indians do not have an indefeasible title to the lands which they occupy and the waters which they use for irrigation and domestic purposes. The argument has been made in favor of the pending bill that it is a protective measure and will assure the Indians title to the lands which they now occupy and the waters which they now use for irrigation purposes, as well as those which they will in the future use upon additional lands which will be brought under cultivation.

Mr. President, in my opinion, the Pueblo Indians have suffered at the hands of the Government and of the white man. Little by little encroachments have been made upon their holdings and lands which have come down to them from past centuries. In my opinion, the United States has not always been a faithful guardian of these patient and inoffensive Indians and has looked on with complacency and indifference while they have been despoiled of their possessions. The limits of their lands have been narrowed by unjust invasions, and trespasses committed upon their property have been asserted as the foundation of alleged newly acquired titles by such trespassers.

Mr. President, legislation is not needed for the protection of these Indians. If the Government and the Indian Bureau would discharge the duties resting upon them, no further exploitation of these Indians would occur. Legislation, however, has been sought in the past to further deprive the Pueblos of their lands. A commission created by Congress is now investigating the claims set up by white men, and I am told that it has been established that prescriptive rights have been asserted against the Indians as a result of which they will be deprived of many hundreds of acres of land.

Mr. President. as I have stated, the Pueblo Indians trace their land titles back for hundreds of years. They were recognized by the Spanish conquerors, and under the treaty of Guadalupe Hidalgo the rights of the Pueblo Indians were recognized. To justify this legislation upon the ground that the rights of the Indians will be protected seems the height of irony. The United States can not divest the Indians of their rights either in land or water. There is a solemn obligation to protect the Indians from the trespasses and invasions of white men and guard them against exploitation.

The rights of the Pueblo Indians to land were not derived from New Mexico. The enabling act for the State required a compact that the State should surrender to the Congress of the United States all jurisdiction and right over the lands of any Indians deriving title from the United States or any prior sovereignty, and reserving jurisdiction to the United States over these lands until the title of the Indians had ceased to exist. By the constitution of the State of New Mexico these conditions were accepted, and the constitutionality of the same has been affirmed by the Supreme Court of the United States.

The waters used for irrigation upon the lands of the Pueblo Indians was an appurtenant to the land, and the Indians owned the same as well as the lands in fee. Certainly, no one can challenge the right of the Pueblos to the use of the waters of the Rio Grande River which they and their ancestors have used for hundred of years. The right to the use of the waters which they have appropriated can not be denied them, and no legislative fiat is required to confirm their title or to make it more secure.

Mr. President, the intimations that these Indians have lost their land and water because of the invasions and trespasses of white people, or that their rights may be jeopardized by further invasions, is a reflection, just or unjust, upon the Government of the United States, and those charged with the protection of the Indians. This legislation is not urged by the Indians; it emanates from the white inhabitants of the Rio Grande Valley. Within the valley is the city of Albuquerque, and many thousands of American citizens have found homes in this part of New Mexico. The greater portion of the lands within the Rio Grande Valley has been acquired by American citizens. The facts brought to the attention of Congress show that the Rio Grande Valley suffers from floods and high waters, that farms are inundated and property destroyed. The floods have seriously

injured property within the city of Albuquerque and have destroyed property of great value owned by railroad companies. It is conceded that the floods should be controlled and steps taken to improve the irrigation systems within the valley, and to drain some portions of the lands which have become waterlogged and suffer from alkaline deposits. Of the approximately 132,000 acres of arable land 23,000 acres are concededly owned by the Indians, the residue by American citizens.

As stated, the Indian lands are not in one block, but in pueblos, and are interspersed with the lands of white settlers. To protect the city of Albuquerque and the railroads and the valuable properties of those residing in the valley, a conservancy district was organized under the laws of the State of New Mexico. The corporation so organized is to construct the necessary dams and flood-control works, irrigation systems, and provide for drainage where required. The estimated cost of the project is $11,829,000. The total area benefited is 132,000 acres, 23,000 of which are Pueblo Indian lands. Apparently the project will not be carried forward unless the Government assumes the burden of meeting certain charges allocated to the Indian lands. Accordingly, the bill before us has been prepared and authorizes an appropriation out of the Federal Treasury aggregating $1,593,311. I should state that there should be added to this sum $50,000 which was appropriated last year for investigation and preliminary purposes.

It is conceded that the Indians are now irrigating 8,343 acres of land, and that the project when completed will enable them to irrigate an additional 15,000 acres. The claim is made that the entire project is halted until Congress makes provision for the costs chargeable against the Indian lands.

In April, 1926, the first conservancy bill was introduced. It called for an appropriation of $1,200,000. When representatives of the Pueblos insisted that the amount to be charged to the Indians was too great, whether viewed from the standpoint of Indian reimbursement or as a Government gratuity, the conservancy district through its attorney, under date of June 4, 1926, stated:

> Of course, if it is found that only 15,000 or 20,000 acres of Indian land can be properly reclaimed, then an appropriation of $600,000 or $800,000 would be sufficient. The chief engineer, Mr. Joseph Burkholder, says that if it will help the bill at this time it might be wise to consent to cut the appropriation authorized to $700,000, and if it is found out later that more land can be developed and reclaimed, then we will seek additional money later.

This statement means that the reclamation or development of 20,000 acres of Indian lands could be accomplished for a maximum of $800,000, although the chief engineer places it at $700,000. The cost per acre would be, according to the attorney, Mr. Rodey, $40, and according to Mr. Burkholder, the chief engineer, $35 per acre. It is not stated that 20,000 acres of the Pueblo lands are to be irrigated and reclaimed, but the demand is now made for an appropriation of $1,593,311.

It is admitted that the Indians now irrigate 8,340 acres; that they have an irrigation system which, although not modern, has met in a satisfactory manner the requirements of the Indians. The project therefore is not for the benefit of these irrigated Indian lands. No one questions the title of the Indians to these lands or their right to divert waters from the river for their irrigation. Indeed, these lands have a primary right to the use of the waters from the Rio Grande River; it is a vested right; it is one of which the Indians can not be deprived. If the principles of equity were to be strictly applied in this case, the remaining 15,000 acres of lands owned by the Indians which it is claimed will be brought under irrigation upon the completion of the project would be recognized as entitled to the use of the waters of the Rio Grande River. These lands were at one time irrigated, and the Indians have done nothing which forfeited their rights to the perpetual use of sufficient of the waters of the river for the irrigation of their lands.

However, the point is not being made that the conservancy district should complete the project without some contribution from the Indians or the Government. It is a question, however, of prime importance as to what sum should be contributed to the enterprise to meet any fair charge laid against pueblo lands not now irrigated.

I have quoted what was said by the chief engineer when he fixed $35 per acre as an adequate and fair sum to be paid. It must be remembered that this project is essentially one for the benefit of the white residents of the State of New Mexico. It is of the utmost benefit to the city of Albuquerque and the railroad companies, which have many millions of dollars invested in railroad property. It is for the benefit of thousands of white settlers who are engaged in agricultural and industrial pursuits. That the project is a worthy one and should be carried out, I cheerfully concede. But I repeat that the enterprise is for the white man, and he will be the principal beneficiary.

In my opinion, the conservancy district should be satisfied with but a small consideration from the Government in behalf of the Indians. Considering the claims of the Indians that the valley was once theirs, that the waters of the Rio Grande had flowed over, upon, and through the lands of their forefathers for many hundreds of years; I say, considering all these things and the fact that the Pueblo Indians now own but a moiety of their former possessions and have received but little, if any, consideration for the lands now claimed and owned by the whites, this enterprise should be carried forward with but an inconsiderable charge imposed upon the Pueblo Indians. But the contrary is true. The bill as amended will impose a burden of approximately $150 per acre upon the Indian lands, which will be liable for the payment of the more than $1,593,311 to be advanced out of the Federal Treasury.

Mr. President, there is one aspect of this case that has been emphasized by the Senator from Wisconsin [Mr. LA FOLLETTE] and which is important enough to deserve further brief consideration. The Indian Bureau and the representatives of the conservancy district, in order to advance the project, represented to the Pueblo Indians that $593,311 of the advancement made by the United States Government should be regarded as a gratuity and not reimbursable by the Indians or from any Indian funds. The Indians were slow to give any indorsement to the conservancy project. When the costs were first reported from $25 to $40 per acre for the reclamation of their nonirrigated lands, there was an abatement of opposition, and, indeed, a disposition to give support to the project. Later, when the conservancy engineers estimated higher costs for the completion of the project, further consideration of the matter was required. Finally, the Indians assented to legislation which would impose upon the Indian lands that were to be brought under irrigation a charge of $67.72 per acre.

The Indian Bureau, as the hearings disclosed, supported that view, and aided in securing the assent of the Indians to legislation which imposed no greater burden than that just stated. A bill passed the Senate carrying this understanding into effect. The House reported the same provision, but an amendment was offered, without explanation, and adopted by the House, which changed the entire sum of $1,573,000 from a gratuity to a reimbursable obligation, and to a lien upon the lands of the Indians. The Pueblo Indians never assented to this bill. Indeed, since they have learned of this change they have protested vigorously against the passage of the bill. Their attorneys have wired objections, and Congress has been made aware of the fact that if the bill is passed in the form in which it now appears the Indians will charge the Government with perfidious conduct.

The bill as it came back from the House and as it was again reported from the Senate committee provides that $1,573,311, to be advanced by the Government, shall be reimbursed; that it shall be a charge upon the 15,000 acres, which it is claimed will obtain water for irrigation purposes. This sum will constitute a lien upon the 15,000 acres; but this proposition has been modified, if I understand the amendment offered by the Senator from Kansas [Mr. CURTIS].

This amendment provides that from the 15,000 acres which will, it is assumed, obtain water from the conservancy project when completed, 4,000 shall be subtracted and freed from the obligation to pay any proportion of the $1,593,311 appropriated by the Government to aid in the completion of the project. However, the result is merely to augment the burden placed upon the remaining 11,000 acres. This area will have to meet the entire payment and will be subjected to a lien until the entire obligation is discharged.

It is obvious that this enormous burden can never be paid, and that the lands sooner or later will pass out of the hands of the Indians. If the bill becomes a law with this amendment incorporated therein, it will mean that water for each acre of the 11,000 will cost $150. Manifestly, the obligation can never be discharged. It is preposterous to impose upon the land such a burden and to assume that it will be met. Under the bill as amended the white settlers obtain their water rights for $76 per acre. But this bill proposes to tax the 11,000 acres of Indian lands which it is alleged will be reclaimed and irrigated $150 per acre for water to irrigate the same.

The Senator from Kansas [Mr. CURTIS] when offering his amendment indicated, if I correctly interpret his remarks, that these 11,000 acres would be leased to white men. The conclusion was forced upon me from his statement that the Indians could never assume the burden of paying for the water, and that in the end they would lose both the land and the water. Those familiar with the reclamation of arid lands and the conversion of raw lands of the West into fields and farms

appreciate the hardships and burdens incident to the task. Notwithstanding the claimed fertility of the Rio Grande Valley, I do not hesitate to affirm that the lands which are to be irrigated under the conservancy project will not in this generation or the succeeding one be worth $150 per acre, including the appurtenant water right. There is evidence in the hearings that lands owned and farmed by the white settlers with primary water right range between $50 and $100 per acre.

Mr. President, the practical workings of this bill, if it shall become a law, will show the wide departure from the assumptions and hypotheses indulged in by some of its advocates. I hope I shall be pardoned for emphasizing the proposition that this conservancy measure is for the benefit of the people of Albuquerque and the railroads and the 50,000 inhabitants within the Rio Grande Valley. It will immeasurably benefit them, increase the value of their property, and materially add to their wealth. It will have the effect of diminishing the rights of the Indians, of jeopardizing the residue of their holdings; and will eventuate in their losing the 11,000 acres together with any water right appurtenant thereto, all of which is subject to the payment of a lien amounting to $150 per acre.

Mr. President, the Indians will lose through the operation of this bill, and the Government of the United States will never be reimbursed for the sum of $1,593,311, which it will be called upon to contribute under the terms of the pending bill. In my opinion, when the full implications of this measure are brought home to the Pueblo Indians they will experience a feeling of resentment and will regard themselves as victims of governmental betrayal.

Mr. President, as I perused the hearings and listened to the debates, I could not repress the thought that the bonds of the conservancy district which it is expected will be issued, depend for a market upon the Government contributing to the project the sum of $1,593,311. This large amount constitutes part of the amount required to carry out the plan of the district. When I first examined the hearings I was somewhat mystified at the frequent assertions that the Pueblo lands within the district were to be taxed at the rate of $67 per acre for the water rights which they were to obtain. At the same time statements were made that the water rights acquired by white settlers would cost them $76 per acre. I soon discovered that a fiction was brought into the discussion, and that it was intended to dull the sharp edge of any criticism that might emanate from those who were interesting themselves in behalf of the Indians. But I soon discovered that the 8,343 acres of lands now being farmed by the Indians, and which had primary water rights, indeed rights superior to any other lands in the entire valley, were being included within the estimated area of Indian lands that were to receive water rights under the conservancy project.

In other words, it was assumed, and it gave color and the appearance of equity to the proposition, that the Indians were to be treated in a more generous manner than white persons who obtained lands and water rights. In my opinion, it was most disingenuous to convey the impression that lands which had vested and unassailable rights were to be assigned to the same category as raw lands or at least lands upon which water had not been used for many years. The Indian lands, which have been farmed and irrigated for centuries, possess their own irrigation system. It may not be modern, but it supplies the necessary water for the production of abundant crops. Those who are acquainted with the West know that the early settlers constructed dams and canals and ditches and diverted the water from the rivers and streams for the irrigation of the lands which they were reclaiming. With the advent of more settlers the importance of additional lands for homes and farms was perceived. Engineers of standing devised improved methods for conserving the water and securing a more economic use of the same. In many instances reservoirs were constructed and the high waters impounded; secondary rights grew up and were recognized, but in all of these mutations and transitions the rights of the first settlers were recognized; their rights were primary and superior, and subsequent appropriators were relegated to a secondary and subordinate status. So the Pueblo Indians, tracing their rights for hundreds of years, may be placed in the same category.

But the fiction that the entire 23,000 acres of Indian lands were to be irrigated under the conservancy project, and only because of it, gave to it a prestige, and perhaps a moral standing, that it might not otherwise have enjoyed. But we now learn that the bill, as amended, places upon the 11,000 acres of lands owned by the Indians a burden of $150 per acre, whereas the water rights obtained by the white settlers will cost them but $76 per acre.

Mr. President, the advantages, and I am guilty of repetition, resulting to the city of Albuquerque, to the railroads, to the business and industrial enterprises of the Rio Grande Valley are so great that they could afford to supply, without cost, water for the irrigation of this 15,000 acres of Indian lands which it is claimed will obtain water when the conservancy project is completed. But in no event should any portion of the Indian lands be subjected to a higher charge than that placed upon the water rights acquired by the white settlers.

Mr. President, if the Government contributed but a million dollars to the enterprise, it would be acting in a generous manner toward the Indians. If the chief beneficiaries of the project—namely, the white inhabitants of the Rio Grande Valley—are unwilling to furnish to the Indians water for the 15,000 acres, then I am willing that the United States should appropriate a million dollars for the purpose of supplying the 15,000 acres of land owned by the Indians and not now irrigated, sufficient water for the irrigation of the same, the amount to be reimbursible extending over a long period of years. A contribution at this time of that sum should be all that the persons interested in the project should require under any circumstances. The cost per acre upon this basis would be $66.66. I submit that that is a heavy charge and one which will require many years for the Indians or their lessees to meet.

Perhaps I am not quite in accord with my friends, the Senators from Wisconsin [Mr. LA FOLLETTE] and North Dakota [Mr. FRAZIER]. As I understood them, they contended that the contribution of the Government above a million dollars should be regarded as a gratuity and not be reimbursable. My opinion is that if any contribution is to be made to the project by the Indians or by the United States, it should not exceed $1,000,000, and that amount should be repaid to the United States during a series of years by the Pueblo Indians, who would receive from and under the conservancy district a good and sufficient water right for 15,000 acres of lands owned by them. In my opinion, a proposition of this kind should be accepted by the conservancy district. A million dollars to be paid by the Government would give an impetus to the enterprise and enable the district to sell its bonds and push the work of construction to a speedy conclusion.

The remark has been made by the supporters of this bill that the Senate must accept the House amendment making the $1,573,000 reimbursable or the bill will fail. Mr. President, I do not accept that view. The House, in my opinion, will not defeat the bill. The Senate has a right to reject the amendment, and it should not be coerced by the threats of the bill's defeat into accepting a proposition which does not meet the judgment of the Senate.

Mr. LA FOLLETTE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Wisconsin?

Mr. KING. I yield.

Mr. LA FOLLETTE. Does not the Senator feel that the Senate, if convinced that its previous action on Senate bill 700 was sound, should take every legislative step possible in order to bring about an acceptance of that position by the House?

Mr. KING. I agree with the Senator. The Senate is not required to abdicate its function. It is part of the legislative branch of the Government. The Senate has the right to insist upon a fair consideration of measures originating in the House or which are amended in the House and returned to the Senate. With respect to the amendment now under discussion which was offered in the House it is my opinion that the body at the other end of the Capitol, and I am offering no criticism whatever, has not had an opportunity to consider it or to pass upon it. The Senator from Arizona [Mr. HAYDEN], in supporting the amendment, invited our intention to a statute calling for reimbursability for expenditures made in behalf of Indians. Conceding that Congress in the past has adopted a policy requiring reimbursements for advances made to wards of the Government, it does not estop this or future Congresses from adopting a different policy. Legislative bodies may not claim the virtue of consistency. Congress is often illogical—I was about to say gloriously inconsistent—as most human beings are in their daily conduct and activities.

However, Mr. President, the situation presented in the matter before us finds no parallel in former legislation. The case is unique, and the situation requires rational and just and fair treatment. In my opinion, such treatment is not being accorded the Pueblos in the bill before us. Having promised the Indians, as was done by the Indian Bureau and by representatives of the conservancy district, that they would not be required to pay to the Government in excess of a million dollars, and having secured their assent to a plan, imposing upon them an obligation to that extent, we may not now, as I view the case, increase their obligations. Certainly this can not be done with-

out their consent. It would subject us to just criticism and to the charge of Punic faith if, over their protest, we should saddle them with an obligation of $1,593,311.

Mr. President, I would rather see this legislation fail than to give the Indians any just ground to charge that they had been betrayed. I would rather see it fail than to impose upon them the heavy load of paying more than a million and a half dollars to secure water for the irrigation of a few thousand acres of land. I can not help but feel that they are the owners of sufficient of the waters of the Rio Grande River to irrigate 23,000 acres of land. They are now receiving only sufficient for the irrigation of 8,343 acres. The water is in the river. Only a few generations ago their fathers appropriated sufficient of the waters of the river to irrigate all of the land which it is contended will be cultivated upon the completion of the conservancy project. At any rate, Mr. President, I can not bring my judgment to support this bill in view of the facts as I understand them. I shall, therefore, vote against it.

The senior Senator from New Mexico [Mr. BRATTON] is greatly interested in the measure. He has made a superb fight and has conducted himself, as have his colleagues, in an honorable manner. I have no criticism to make of the Senators from New Mexico. The fact that the senior Senator, who is one of my dearest friends, gives his support to this measure standing alone would lead me without investigation to support it. There is no man in the Senate for whom I entertain a higher regard than the senior Senator from New Mexico. May I say that his name and fame will pass the boundaries of his own State? The future, in my opinion, will have higher honors to bestow upon him. But, Mr. President, it is our duty to weigh the questions presented for our consideration. We can not shirk the responsibilities resting upon us. Having considered this measure as best I could I am compelled to vote against it and sincerely hope that the Senate will return the bill to the House so that the Members of that body may have full opportunity to consider all provisions of the measure in its present form, and the consequences if it should become law.

Mr. President, I confess to a feeling of sympathy and compassion for the red men of our country. Whenever measures are presented for our consideration involving them or their interests, I feel an added responsibility resting upon me. Knowing that the Indians have been exploited and robbed and plundered, I regard it as an imperative duty of the Government and of the legislative branch of the Government to defend and protect them and to adopt every proper measure that will contribute to their welfare and to their moral and material advancement.

Mr. President, those who are conversant with the history of the Indians of our country from the days of the landing of the Pilgrim Fathers to the present time will be forced to the conclusion that the white man has often proven a cruel and ruthless master. The Indians were regarded as savages, and too often white settlers were cruel and relentless toward them. I was interested in the statement made by the junior Senator from New Mexico [Mr. CUTTING] in reference to the Conquistadores. His position was, if I understood him, that the Spaniards were more generous and chivalrous in their dealings with the Indians than were the Anglo-Saxons who subsequently came to America. I shall not indulge in comparisons. We all remember the statement, oft repeated, that the Pilgrims when they first landed fell upon their knees and then upon the aborigines. The Spaniards who conquered Mexico and Peru and other parts of the New World were not merciful. Certainly they did not observe a high standard of chivalry. Speaking generally of these conquering forces, they carried on war in a merciless manner. Many of them were filled with avarice, and in seeking for gold and precious metals they cared little for human life. They exterminated the inhabitants of Haiti, Porto Rico, and many of the Caribbean Islands. Most of the peoples whom they encountered were docile and inoffensive, but they fell victims to the cruel treatment of the Spanish invaders. After destroying peoples, the black man from Africa was brought to the Caribbean Islands and to the mainland of the Western Hemisphere. There are some Spanish historians who do not defend the atrocities and cruelties of their countrymen.

If it were pertinent to the question under discussion, I think it could be demonstrated that in North America the Indians were often robbed and plundered and subjected to cruel and inhuman treatment. Their lands were taken from them; treaties were made only to be violated by the Government. They have been treated as an inferior race and subjected to the wrongs and indignities which puissant peoples inflict upon weak and backward races.

I believe that our Government should be just to the Indians and be a faithful guardian over them. Congress should be solicitous for their welfare and should adopt wise and humane measures that will contribute to their civilization and their spiritual, moral, and material development. The American people are proud of the achievements of their country and of the high station which it occupies among the nations of the world. We do not hesitate to criticize European nations possessing colonies and condemn, often in savage terms, the alleged acts of cruelty perpetrated by powerful nations upon the inhabitants of colonial possessions.

We have a trust which we may not ignore. There are more than 300,000 Indians under the control of the United States. Their rights must be protected. I repeat that the obligations of the trustee are sacred and must be discharged. We can no longer treat the Indians cynically and cruelly. We can not deprive them of their lands or violate treaties. We must adopt different methods of dealing with the Indians. In my opinion we have failed to solve the Indian problem and are largely responsible for the woes and sorrows and tragedies which have come into their lives and for the lack of progress made by those who should have been the objects of our deepest solicitude and care. It is time to appraise the results of our more than 100 years of guardianship. We need new teachers and new leaders to guide the United States in its relations with the Indians. We talk much of psychology and its application to our educational system. We need a new Indian psychology. If we could, so to speak, burn the books which have guided us in dealing with the Indians and set out upon new paths, it would be better for the Government and infinitely better for the Indians.

Mr. LA FOLLETTE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Edge	La Follette	Sheppard
Barkley	Ferris	McKellar	Shipstead
Bingham	Fess	McMaster	Smith
Black	Fletcher	McNary	Steck
Blaine	Frazier	Mayfield	Steiwer
Blease	George	Metcalf	Stephens
Borah	Gerry	Moses	Thomas
Bratton	Glass	Neely	Tydings
Brookhart	Gooding	Norbeck	Tyson
Broussard	Hale	Nye	Wagner
Bruce	Harris	Oddie	Walsh, Mass.
Capper	Harrison	Overman	Walsh, Mont.
Caraway	Hayden	Phipps	Warren
Copeland	Heflin	Pittman	Waterman
Couzens	Howell	Reed, Pa.	Watson
Curtis	Jones	Robinson, Ark.	Wheeler
Cutting	Kendrick	Robinson, Ind.	Willis
Deneen	Keyes	Sackett	
Dill	King	Schall	

The PRESIDING OFFICER. Seventy-four Senators having answered to their names, a quorum is present. The question is upon agreeing to the amendment offered by the Senator from Wisconsin [Mr. LA FOLLETTE] to the amendment offered by the Senator from Kansas [Mr. CURTIS] as modified.

Mr. LA FOLLETTE. I ask that the clerk state the amendment pending to the amendment, and upon that question I ask for the yeas and nays.

The PRESIDING OFFICER. The clerk will state the amendment to the amendment.

The CHIEF CLERK. The modified amendment of the Senator from Kansas is, on page 3, line 20, to insert after the word "lands" the words "except such part thereof as the Indians shall themselves farm, not to exceed 4,000 acres."

At this point the Senator from Wisconsin proposes to insert:

But no collection for reimbursement from proceeds of leases of any Indian acres shall exceed in annual amount the payment made annually by white acres of like character toward the amortizing of the share of said white acres in the indebtedness of the middle Rio Grande conservancy district.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Wisconsin [Mr. LA FOLLETTE] to the amendment of the Senator from Kansas [Mr. CURTIS] as modified. On that question the Senator from Wisconsin asks for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. FLETCHER (when his name was called). I have a general pair with the Senator from Delaware [Mr. DU PONT]. Not knowing what his position would be on this matter, I transfer the pair to my colleague the junior Senator from Florida [Mr. TRAMMELL], who is unavoidably absent, and vote "nay."

Mr. GLASS (when his name was called). I have a general pair with the senior Senator from Connecticut [Mr. McLEAN]. In his absence I withhold my vote.

Mr. NYE (when his name was called). I desire to announce that on this question I have a general pair with the senior Senator from Missouri [Mr. REED]. I find that I can transfer the pair to the senior Senator from Nebraska [Mr. NORRIS], who is unavoidably absent. I make that transfer and vote "yea."

Mr. TYSON (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. GOFF]. I transfer the pair to the junior Senator from New Jersey [Mr. EDWARDS] and vote "nay."

The roll call was concluded.

Mr. JONES (after having voted in the negative). The senior Senator from Virginia [Mr. SWANSON] is necessarily absent. I promised to take care of him with a pair. I understand, however, that he would vote on this question as I have voted. Therefore I will allow my vote to stand.

Mr. TYDINGS. I am paired with the Senator from Oklahoma [Mr. PINE]. I transfer that pair to the Senator from Delaware [Mr. BAYARD] and vote "nay."

The result was announced—yeas 14, nays 57, as follows:

YEAS—14

Blaine	Frazier	McMaster	Shipstead
Borah	Howell	Neely	Wheeler
Brookhart	King	Nye	
Copeland	La Follette	Schall	

NAYS—57

Ashurst	Edge	McKellar	Steiwer
Barkley	Ferris	McNary	Stephens
Bingham	Fess	Mayfield	Thomas
Black	Fletcher	Metcalf	Tydings
Blease	George	Moses	Tyson
Bratton	Gerry	Oddie	Wagner
Broussard	Gooding	Overman	Walsh, Mass.
Bruce	Hale	Phipps	Walsh, Mont.
Capper	Harris	Reed, Pa.	Warren
Caraway	Harrison	Robinson, Ark.	Waterman
Couzens	Hayden	Robinson, Ind.	Watson
Curtis	Heflin	Sackett	Willis
Cutting	Jones	Sheppard	
Deneen	Kendrick	Smith	
Dill	Keyes	Steck	

NOT VOTING—23

Bayard	Goff	Norbeck	Shortridge
Dale	Gould	Norris	Simmons
du Pont	Greene	Pine	Smoot
Edwards	Hawes	Pittman	Swanson
Gillett	Johnson	Ransdell	Trammell
Glass	McLean	Reed, Mo.	

So Mr. LA FOLLETTE's amendment to the amendment was rejected.

The VICE PRESIDENT. The question recurs on the amendment of the Senator from Kansas [Mr. CURTIS], as modified, to the amendment of the House of Representatives.

The amendment to the amendment was agreed to.

The VICE PRESIDENT. The question now is on the House amendment as amended.

Mr. LA FOLLETTE. Upon that I ask for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. FLETCHER (when his name was called). Making the same announcement as on the previous vote with reference to my pair and its transfer, I vote "yea."

Mr. GLASS (when his name was called). Making the same announcement with reference to my pair as on the previous vote, I withhold my vote.

Mr. JONES (when his name was called). Making the same announcement as I did on the previous vote with reference to my pair with the senior Senator from Virginia [Mr. SWANSON], who, I understand, would vote as I shall vote on this question, I vote "yea."

Mr. NYE (when his name was called). Repeating the announcement made on the previous vote with reference to my pair with the senior Senator from Missouri [Mr. REED], I find that I can transfer the pair to the senior Senator from Nebraska [Mr. NORRIS]. I make that transfer and vote "nay."

Mr. TYDINGS (when his name was called). On this vote I am paired with the senior Senator from Oklahoma [Mr. PINE]. I transfer that pair to the senior Senator from Delaware [Mr. BAYARD] and vote "yea."

Mr. TYSON (when his name was called). I have a pair with the junior Senator from West Virginia [Mr. GOFF]. I transfer the pair to the senior Senator from New Jersey [Mr. EDWARDS] and vote "yea."

The roll call was concluded.

Mr. REED of Pennsylvania (after having voted in the affirmative). I have a general pair with the Senator from Delaware [Mr. BAYARD], but I am authorized to say that if he were present he would vote the same as I have voted. Therefore, I allow my vote to stand.

The result was announced—yeas 59, nays 13, as follows:

YEAS—59

Ashurst	Edge	McKellar	Smith
Barkley	Ferris	McNary	Steck
Bingham	Fess	Mayfield	Steiwer
Black	Fletcher	Metcalf	Stephens
Blease	George	Moses	Thomas
Bratton	Gerry	Neely	Tydings
Brookhart	Gooding	Oddie	Tyson
Broussard	Hale	Overman	Wagner
Bruce	Harris	Phipps	Walsh, Mass.
Capper	Harrison	Pittman	Walsh, Mont.
Caraway	Hayden	Reed, Pa.	Warren
Curtis	Heflin	Robinson, Ark.	Waterman
Cutting	Jones	Robinson, Ind.	Watson
Deneen	Kendrick	Sackett	Willis
Dill	Keyes	Sheppard	

NAYS—13

Blaine	Frazier	McMaster	Wheeler
Borah	Howell	Nye	
Copeland	King	Schall	
Couzens	La Follette	Shipstead	

NOT VOTING—22

Bayard	Goff	Norbeck	Simmons
Dale	Gould	Norris	Smoot
du Pont	Greene	Pine	Swanson
Edwards	Hawes	Ransdell	Trammell
Gillett	Johnson	Reed, Mo.	
Glass	McLean	Shortridge	

So the amendment of the House of Representatives as amended was agreed to.

THE CALENDAR

Mr. CURTIS. Mr. President, I ask unanimous consent that at the conclusion of the routine morning business to-morrow the morning hour be devoted to the calendar for the consideration of unobjected bills, commencing where we left off on the last call of the calendar.

Mr. ROBINSON of Arkansas. Mr. President, a number of Senators have indicated to me a desire that such an arrangement shall be made. I have no objection to it.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and the Senate (at 5 o'clock and 17 minutes p. m.) adjourned until to-morrow, Friday, March 2, 1928, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 1, 1928

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY

David E. Kaufman, of Pennsylvania, to be envoy extraordinary and minister plenipotentiary of the United States of America to Bolivia.

PUBLIC HEALTH SERVICE

Surg. Leslie L. Lumsden to be senior surgeon in the Public Health Service, to take effect from date of oath, in place of Senior Surg. Henry S. Mathewson, deceased.

UNITED STATES ATTORNEY

Joseph A. Tolbert, of South Carolina, to be United States attorney, western district of South Carolina. (A reappointment, his term having expired.)

UNITED STATES MARSHAL

Samuel L. Gross, of Texas, to be United States marshal, northern district of Texas. (A reappointment, his term having expired.)

CONFIRMATIONS

Executive nominations confirmed by the Senate March 1, 1928

MEMBER FEDERAL BOARD FOR VOCATIONAL EDUCATION

Perry W. Reeves to be a member of the Federal Board for Vocational Education.

UNITED STATES MARSHAL

Douglas Smith to be United States marshal, middle district of Alabama. Reappointment.

POSTMASTERS

ALABAMA

Charles L. Jackson, Ashford.
Oliver P. Williams, Henagar.

William A. Giddens, Jones Mills.
Ora B. Wann, Madison.
Thomas C. Latham, Marvel.

COLORADO

Bessie Salabar, Bayfield.
Alice A. Blazer, Elizabeth.
John C. Straub, Flagler.
Ben H. Glaze, Fowler.
Paul C. Boyles, Gunnison.
Edward F. Baldwin, Nucla.
John R. Munro, Rifle.

CONNECTICUT

Marshall Emmons, East Haddam.
Sidney M. Cowles, Kensington.

FLORIDA

Mary Conway, Green Cove Springs.

KANSAS

Harry Morris, Garnett.
Joseph V. Barbo, Lenora.
Forrest L. Powers, Le Roy.
George J. Frank, Manhattan.
Nora J. Casteel, Montezuma.
Anna M. Bryan, Mullinville.
Andrew M. Ludvickson, Severy.

MASSACHUSETTS

Fred C. Small, Buzzards Bay.

MICHIGAN

Melvin A. Bates, Grayling.
Patrick O'Brien, Iron River.
Wilda P. Hartingh, Pinconning.

MINNESOTA

Ernest J. Grunst, Alpha.
William Peterson, Atwater.
George E. Anderson, Austin.
Philip P. Palmer, Backus.
William F. Priem, Bellingham.
Agnes Doyle, Bovey.
Christ Bottge, Correll.
Ida V. Lund, Farwell.
Charles J. Johnson, Garfield.
Oscar W. Erickson, Kensington.
Herman C. Rustad, Kerkhoven.
Cline C. Barker, Kinney.
Bennie C. Vold, Maynard.
Clarence J. Hertzog, Proctor.
Edwin Nelson, Wendell.
Joseph Trojohn, Woodlake.
Milton P. Mann, Worthington.
Henry Groth, Wright.

MISSOURI

Edward A. Birkmann, Beaufort.
James D. Kochel, Canalou.
Ethel M. Cozean, Elvins.
George Thayer, Flemington.
Samuel H. Hudson, Granby.
Joseph P. O'Hern, Hannibal.
John M. Schermann, Hermann.
Hattie Stierberger, Union.

NEW YORK

John G. McNicoll, Cedarhurst.
Elmer C. Wyman, Dover Plains.
Margaret T. Sweeney, East Islip.
John E. Duryea, Farmingdale.
Wallace Thurston, Floral Park.
Ruth W. J. Mott, Oswego.
Fred L. Seager, Randolph.
Elmer Ketcham, Schoharie.
Ralph C. Reakes, Truxton.
John T. Gallagher, Witherbee.

NORTH DAKOTA

William H. Lenneville, Dickinson.
Charles L. Erickson, Lankin.

OHIO

Arthur L. Vanosdall, Ashland.
Edward M. Barber, Ashley.
Charles E. Kniesly, Bradford.
Charles R. Ames, Bryan.
Andrew L. Brunson, Degraff.
Wade W. McKee, Dennison.
Ida H. Cline, Kings Mills.
William H. Snodgrass, Marysville.
Clem Couden, Morrow.
La Bert Davie, New Lexington.
George B. Fulton, North Baltimore.
Iris L. Bloir, Sherwood.
Charles O. Eastman, Wauseon.
Ben F. Robuck, West Union.

OREGON

William A. Morand, Boring.
Elmer F. Merritt, Merrill.
William I. Smith, Redmond.

PENNSYLVANIA

Harry C. Myers, Holtwood.
John H. Francis, Oaks.
A. Milton Wade, Quarryville.
Newton E. Arnold, Roslyn.

TENNESSEE

William F. Osteen, Chapel Hill.
Ben M. Roberson, Loudon.
Peter Cashon, Dukedom.

TEXAS

Charles H. Bugbee, Clarendon.
Gustav A. Wulfman, Farwell.
Theodor Reichert, Nordheim.
Silas J. White, Rising Star.

UTAH

Ivor Clove, Enterprise.

WEST VIRGINIA

James T. Akers, Bluefield.
Josephine B. Marks, Walton.

HOUSE OF REPRESENTATIVES

THURSDAY, *March 1, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O God of wisdom, God of love, we thank Thee for a faith that rises to a high certainty. We praise Thee that we are enfolded within the arms of Thy eternal mercy. We are so grateful that Thy beloved Son has swept aside all ideas of a throne of iron, of law, of icy intellect, of marble heart, and reflected Thee as a loving Father. Oh, the wonderfully rich meanings of that word! They could never be conveyed by power, intellect, or authority, but they are easily set forth by the deep sentiments which cluster about the word "Father." We are Thy children. Thou dost help us to meet despondency with courage, disappointment with resignation, weakness with strength, and fear with hope. Oh, this life with its tasks and opportunities, with the mighty day in which we live! Forbid that it should be to us just a partial eclipse of doubt and dueling, but a call, a high-sounding call to God and our country, in whose mirrors we shall be judged. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed without amendment the bill (H. R. 5818) authorizing J. H. Peacock, F. G. Bell, S. V. Taylor, E. C. Amann, and C. E. Ferris, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near the city of Prairie du Chien, Wis.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 2820. An act authorizing the Secretary of War to loan certain field guns to the city of Dallas, Tex.

SENATE JOINT RESOLUTIONS AND BILL REFERRED

Joint resolutions and a bill of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred to the appropriate committee, as follows:

S. J. Res. 23. Joint resolution providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by Gen. George Rogers Clark and his army, and authorizing an appropriation for construction of a permanent memorial of the Revolutionary War in the West and of the accession of the old Northwest to the United States on

the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779;

S. J. Res. 72. Joint resolution to grant permission for the erection of a memorial statue of Cardinal Gibbons;

S. J. Res. 98. Joint resolution authorizing the selection of sites and the erection of monuments to John Bunyan and William Harvey in Washington City, D. C.; to the Committee on the Library.

S. 2820. An act authorizing the Secretary of War to loan certain field guns to the city of Dallas, Tex.; to the Committee on Military Affairs.

THE LATE HON. A. E. B. STEPHENS

Mr. COOPER of Ohio. Mr. Speaker, I ask unanimous consent for the present consideration of the order which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the order.

The Clerk read as follows:

Ordered, That Sunday, the 11th day of March, at 2 p. m. o'clock, be set apart for addresses on the life, character, and public services of the Hon. A. E. B. STEPHENS, late a Representative from the State of Ohio.

The SPEAKER. Is there objection to the present consideration of the order?

There was no objection.

The order was agreed to.

CONTESTED-ELECTION CASE OF HUBBARD *v.* LAGUARDIA

Mr. COLTON. Mr. Speaker, I am directed by the Committee on Elections No. 1 to call up a privileged resolution and ask for its present consideration.

The SPEAKER. The gentleman from Utah calls up a resolution, which the Clerk will report.

The Clerk read as follows:

House Resolution 128

Resolved, That Hon. FIORELLO H. LAGUARDIA was duly elected a Representative from the twentieth congressional district of the State of New York to the Seventieth Congress and is entitled to his seat.

The resolution was agreed to.

WAR DEPARTMENT APPROPRIATION BILL

Mr. BARBOUR. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 10286) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1929, and for other purposes, with Senate amendments, disagree to the Senate amendments, and ask for a conference.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. GARRETT of Tennessee. This is agreeable to the minority?

Mr. BARBOUR. I have taken it up with the minority Members and it is agreeable to them.

There was no objection.

The Chair appointed the following conferees: Messrs. BARBOUR, CLAGUE, TABER, HARRISON, and COLLINS.

LEAVE OF ABSENCE

Mr. COOPER of Ohio. Mr. Speaker, I have been requested to announce the absence of my colleague the gentleman from Ohio, Mr. TATGENHORST, on account of illness.

GEN. ARMANDO DIAZ

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent to address the House for three minutes.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. LAGUARDIA. Mr. Speaker, with profound sorrow I announce to the House that taps has sounded again in the camp of one of the allied nations with which we were associated during the World War. This time it has called to the last muster Gen. Armando Diaz, who was commander in chief of the allied forces at the Italian war front.

It may be truly said of this great general that he was "the noblest Roman of them all." General Diaz assumed command of the forces at the Italian front after the Caporetto drive. It was he who turned a crushing defeat into an unrelenting offensive. It was the plan then of the Central Powers to break through that front in order to attack France on the south, and not only establish another front, but release a great many divisions from the Italian front over to the western front. Diaz maintained the line at the Piave, and from that moment not only stopped the offensive, but started a counter offensive which never stopped until the entire defeat and surrender of the Austrian forces. The Diaz defense saved the day for the Allies. The Diaz offense made final and complete victory possible.

It was the privilege of but a very few Americans to serve under his command. It was in the month of June, of 1918, that the first detachment of American aviators reported to him for duty. Italy had trained some 750 American boys in flying, and but 60 of us were sent for active duty on the Italian front.

This detachment of 60 American flyers were received by General Diaz with the same cordiality and enthusiasm as if it had been a complete division of troops. The same day he personally visited each aviation field where the American boys were distributed for duty.

General Diaz visited this country a few years ago, was made an honorary citizen of the city of New York and other cities of the United States. He was an honorary member of every military organization of this country. In his death his country has lost a great patriot and a great soldier; this country has lost a good friend, and the American soldier has lost a real buddy.

SUBCOMMITTEE OF THE COMMITTEE ON THE DISTRICT OF COLUMBIA

Mr. GIBSON. Mr. Speaker, I ask unanimous consent that the subcommittee of the Committee on the District of Columbia, making a survey of the government of the District, may sit this afternoon and to-morrow during sessions of the House.

The SPEAKER. Is there objection to the request of the gentleman from Vermont?

There was no objection.

PRESENTATION TO HON. LISTER HILL

Mr. McSWAIN. Mr. Speaker, I ask unanimous consent to extend my remarks by printing in the RECORD my own remarks made on presenting a beautiful silver tray to the Hon. LISTER HILL, of Alabama, before the Committee on Military Affairs, on the occasion of his marriage recently.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. McSWAIN. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I insert the following proceedings on the presentation of a silver tray by the members of the Committee on Military Affairs of the House of Representatives to Hon. LISTER HILL, of Alabama:

Mr. REECE. Mr. Chairman, I suggest that Mr. McSWAIN has a matter of importance which he might with propriety bring up at this time.

Mr. JAMES. I thought that you withdrew that bill. We voted that other bill out, did we not?

Mr. McSWAIN. Mr. Chairman, there are certain things I do not like to do behind closed doors. I want the public to know where I stand on certain things.

Last week, while the gentleman from Alabama was away, he wired to several members of this committee importuning us not to take action on Muscle Shoals until he returned; and it was well that he did so importune us, because we were just ready to act, and would have acted in a very few minutes but for the fact that we got his wire. [Laughter.] His influence with the committee is so great that we postponed action until he could arrive.

Gentlemen, when a member of this committee or any Member of the House, or any man anywhere, decides to put old things behind him and to declare, "Behold, all things are new," it is such an event in the life of man that it is well that it should be marked in some way; that some sort of landmark should be erected; and the members of this committee evidently have decided to put such a landmark just at this stage in the life of our friend, Mr. HILL of Alabama.

We later found out why he was away from our midst and why it was necessary for him to see that action should be postponed. It is evident that he himself did not postpone action while he was away, and in order to mark that notable event in his life we have decided to present to him this token of our esteem and regard, that he and his may know that we not only love him but that we fraternally sympathize with him at this stage in his life. [Applause.]

We picked this [exhibiting silver tray] not only for its beauty but also for its utility and for the fact that it will last through the coming generations, in order that his children, his grandchildren, and his great-grandchildren may find this testimonial of the esteem and regard and, in fact, love that we have for him.

This bears the inscription, "Presented to Hon. LISTER HILL by the members of the Committee on Military Affairs, House of Representatives, Congress of the United States, February 20, 1928." For fear that he might forget the significance of February 20, 1928, we have marked that date rather than this date (February 28, 1928) as the date of presentation. On behalf of the members of the committee, Mr. HILL, we present this tray to you and to your bride. [Applause.]

Mr. HILL. Mr. Chairman, and my colleagues of the committee, I assure you that I deeply appreciate this very beautiful present so graciously presented to me from you by my good friend Mr. MCSWAIN.

Of the many beautiful expressions of friendship that have come to me in these past few days, nothing has touched me more or will be a sweeter memory to me than this very beautiful present. I am sure that Mrs. Hill will share in my appreciation, and I shall look forward to the pleasure of bringing her here to the committee at a very early date and presenting her to each of you, and letting her, too, have the opportunity and the pleasure of thanking you. From the depths of my heart I thank you. [Applause.]

SAMUEL GOMPERS

Mr. LUCE. Mr. Speaker, I ask unanimous consent to take from the Speaker's table Senate Joint Resolution 88, authorizing the erection on the public grounds of the District of Columbia of a stone monument as a memorial to Samuel Gompers. The House committee has acted favorably on the resolution.

The SPEAKER. The Clerk will report the title.

The Clerk read the title, as follows:

Senate joint resolution (S. J. Res. 88) authorizing the erection on public grounds in the District of Columbia of a stone monument as a memorial to Samuel Gompers.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

Resolved, etc., That the Director of Public Buildings and Public Parks of the National Capital be, and he is hereby, authorized and directed to select a suitable site and to grant permission to William Green, president, and Frank Morrison, secretary, of the American Federation of Labor, for the erection, as a gift to the people of the United States, on public grounds of the United States in the city of Washington, D. C., other than those of the Capitol, the Library of Congress, the Mall, and White House, of a stone monument in memory of Samuel Gompers: *Provided,* That the site chosen and the design of the memorial shall be approved by the Joint Committee on the Library, with the advice of the Commission of Fine Arts, that it shall be erected under the supervision of the Director of Public Buildings and Public Parks of the National Capital, and that the United States shall be put to no expense in or by the erection of the monument.

Mr. LUCE. Mr. Speaker, it is hardly necessary for me to say that Samuel Gompers was an outstanding American citizen. He was not only a faithful and capable representative of the interests that he so long championed but also he contributed sound judgment to the solution of many vexed problems affecting the welfare of the people of the United States. In view of this, it may be well made a matter of record that your committee believes the commemoration of his services by the erection of such a monument in the Capital of the Nation will be fitting and commendable.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was ordered to be read a third time, was read the third time, and passed.

EDGAR WALLACE

Mr. BANKHEAD. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting some comments on the death of the late Edgar Wallace, legislative representative of the American Federation of Labor.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. BANKHEAD. Mr. Speaker, a vast number of the Members of the House who knew him well and loved him greatly, were profoundly grieved over the sudden and unexpected passing away of Edgar Wallace. For a number of years he had been the legislative representative of the American Federation of Labor at the Capitol, and in that capacity he had come into intimate contact with most of the Members of the House. The great organization for labor, to which he gave the best and last years of his life acted with great wisdom in selecting Edgar Wallace for the very responsible position he held. It was a trust that required for its proper exercise a rare combination of sound judgment, dignified diplomacy, and the knowledge of his mission in all its details. All of these qualifications to an unusual degree Mr. Wallace possessed.

He knew as few men did the cause of the workingman. In his own experience he had run the whole gamut of the man in overalls. He knew its toil, its hardships, its inequalities of opportunity as well as its dignified, though limited, compensations. During the long course of his affiliation with the workers of America he had not only shared the rigors of men who toil as an actual laborer himself, but he had also been part and parcel of that splendid leadership which had fought for the principle that "labor is not a mere commodity of commerce," and he happily lived to see the principle not only recognized but amplified in the statutes of his country. To that accomplishment no man added more than Edgar Wallace. He was equipped for his task. He had sweated in the grime of the coal pit. He knew the cause of the toiler. He was editor of a great labor journal. He served in the World War. He was the protagonist for a cause. He was an able advocate for the uplift of humanity.

His counsel on labor problems was of great value to the committees of Congress in framing legislation. They had confidence in the man. They respected his candor and his courage and gave great weight to his conclusions.

This man who has gone at last to rest from his toil has served well his day and generation. He was a real crusader for justice, and I feel honored to have enjoyed the privilege of his friendship. In his going away his great organization has met an irreparable loss, Congress is deprived of a dependable counsellor, humanity is deprived of the service of an earnest advocate, and many of us have lost a cherished friend. Peace to the soul of Edgar Wallace.

REVISION OF REMARKS

Mr. GARRETT of Tennessee. Mr. Speaker, I desire to propound a parliamentary inquiry relative to the business of the House. I think it is a parliamentary inquiry, at least it will be stated in a parliamentary way. Every once in so often some question arises as to just what liberty there is in the revision of remarks by inserting in the RECORD matter that occurs in the course of a colloquy between Members. I think it would be informing to the House if our memories could be refreshed by having from the Chair a statement in the nature of a ruling, such as lies within the power of the Chair touching this question. I therefore propound the inquiry as to what liberty is allowable in the revision of remarks in the matter of making insertions in colloquies?

The SPEAKER. The Chair thinks that the inquiry of the gentleman from Tennessee is timely and pertinent. A few days ago the question arose, but the Chair was not called upon to decide it because unanimous consent was asked and given. The Chair at the time took occasion to look up the precedents and has one or two before him.

The Chair is not advised of any rule of the House that covers the situation directly. The general theory as to the revision and extension of remarks can be put in this language: Although a Member has the right to revise his remarks with the approval of the Speaker, he has not the right to extend those remarks except in the case where the House has expressly given permission to do so.

That has been held by several speakers, among them Speaker Kiefer and Speaker Randall. Therefore in order to extend remarks the Chair thinks that permission must be given by the House; but on the question of revision of remarks a Member may do so without permission of the House, but must have consent of the Speaker.

On a further development of the question, where remarks are made in colloquy during the running debate, what is the proper rule with reference thereto? The present occupant of the chair on May 17, 1926, ruled as follows in response to a parliamentary inquiry:

Generally speaking, the Chair understands the rule to be that a Member in the course of debate may not alter any language that he used which affects the context or affects the remarks of the gentleman who interrupts him.

There are quite a number of decisions upon which that decision was based, all primarily laying down the proposition that a Member may not revise his remarks in such a way as to affect the remarks of another.

The Chair thinks that the mere change of a word or two could be made in the remarks during colloquy, but that change must not be such as would affect the position of either gentleman engaged in the debate, or the purport of the debate. Mr. Speaker Reed on December 13, 1897, said:

It has always seemed to the Chair that when the RECORD was to be corrected, and where there was a controversy upon a particular point, either the correction should be made with the consent of the other Member or Members participating or should not be made at all.

Mr. Speaker Randall on one occasion said:

I think it wise that permission in such cases should be under the control of the Chair.

On the whole, the Chair thinks that under the precedents the proper procedure should always be that no correction be made

in the remarks made during a colloquy between Members which would in any way affect the position of either Member, without the approval of the other.

Mr. BEGG. Mr. Speaker, will the Chair tell the House just what right a Member has after he secures the right to revise and extend his remarks? What does the phrase "extend my remarks" mean, in the judgment of the Chair?

The SPEAKER. The Chair thinks that if the remarks are not made in colloquy, the Member may extend to any reasonable extent.

Mr. BEGG. Does that mean his own remarks, or does that carry with it authority to put anything in that the Member wants to put in? That is the question I desire to raise. In other words, if I secure the privilege to extend my remarks, is there any limitation upon me as to what I can put in the RECORD in the nature of a newspaper or magazine article or anything else?

The SPEAKER. The Chair thinks that extension is limited to an extension of the remarks the gentleman himself makes, and that specific authority would be necessary to extend remarks by printing newspaper and magazine articles or other documents. The Chair thinks a Member would not have that right unless he receives specific authority from the House.

Mr. BEGG. Then it is the judgment of the Chair that every Member who incorporates other than his own remarks in an extension, without specific permission, is technically violating the privilege?

The SPEAKER. The Chair thinks so.

Mr. LAGUARDIA. The Chair suggested that where a Member desires to revise his remarks, which, I take it, means polishing them up so that they read smoothly, the permission of the Speaker should be obtained.

The SPEAKER. That is the general rule.

Mr. LAGUARDIA. Should that request be made as a matter of record, the same as permission to extend is obtained from the House, or is a mere informal request to the Speaker sufficient?

The SPEAKER. The Chair thinks it is an informal matter.

Mr. CASEY. Mr. Speaker, I rise to ask for information. In view of the ruling the Speaker has just made with respect to the extension of remarks in the RECORD, I would like to ascertain if under this ruling I had the consent of the House to extend certain matters in the speech which I made on the coal miners' strike some time ago. Members will recall that I stated during my remarks that I quoted from certain documents and stated I did not have sufficient time to complete my address, but that under the leave granted me to extend I would insert copies of injunctions and other matter which I mentioned on the floor of the House at the time. The insertion of copies of injunctions and the other matter of which the Members were so anxious to get copies were not my own personal remarks, but I incorporated them in the speech I delivered under the leave of the House to extend. In view of the decision the Speaker has just made, I am wondering whether I am within the rule.

The SPEAKER. The Chair does not recall the precise form of the request, but if the gentleman asked and obtained permission to extend his remarks by incorporating various documents to which he referred, he would undoubtedly have the right to do so.

Mr. CASEY. I did that, and I called attention to the documents that I would insert.

The SPEAKER. Then unquestionably the gentleman had the right to extend his remarks in the manner in which he did.

Mr. CASEY. Mr. Speaker, in view of the ruling just made upon the question of the right of Members to add language into the remarks of another Member of the House, without his consent, during a running debate, the Speaker stated that the question arose the other day, but that he was not called upon to decide it. Mr. Speaker, that is correct. I raised the question, and the reason I did not call upon the Speaker to render a decision at that time was that I understood the gentleman from Nebraska [Mr. SIMMONS], while addressing the House, to say that he believed he had the right to do what he did. Other Members of the House who have talked to me about this matter say they understood him to have used the word "believed." Believing that the gentleman from Nebraska had used the word "believed" I took it as an admission on his part that he had violated the rules of the House and I, therefore, did not press for a decision on the question by the Speaker, but when I read the RECORD the following morning I found that instead of using the word "believed" he used the word "believe." He is recorded as saying:

> I believe that I was entirely within the rules.

I had proposed to ask the Speaker to rule on this question, but in view of the fact that the gentleman from Tennessee has already done so, and the Speaker having ruled that the question I raised the other day was a violation of the rules of the House, I have nothing further to say about it.

The SPEAKER. The Chair holds that where remarks are made during a colloquy or debate, no change is permissible in the remarks either of the gentleman himself or the gentleman with whom he was engaged in debate without the full consent and approval of the other gentleman.

PERMISSION TO ADDRESS THE HOUSE

Mr. RANKIN. Mr. Speaker, I ask unanimous consent that on to-morrow, Friday, immediately after the reading of the Journal and the disposition of business on the Speaker's table, I may proceed to address the House for 15 minutes.

The SPEAKER. The Chair will call the gentleman's attention to the fact that this would be a special order to follow the gentleman from New York [Mr. SIROVICH] on Friday. The gentleman from Mississippi asks unanimous consent that, following the remarks of the gentleman from New York, he may address the House for 15 minutes. Is there objection?

Mr. SNELL. Reserving the right to object, Mr. Speaker, would the gentleman be willing to take that time on the general debate on this bill?

Mr. RANKIN. I will state to the gentleman that I am not willing to divide the time in the general debate to that extent.

Mr. SNELL. To-morrow we hope to finish up the appropriation bill. I think we have been very generous in the allotment of time in general debate, and the gentleman can ask for the special privilege while we are reading the bill.

Mr. RANKIN. This a matter that does not come within the exact scope of the agricultural appropriation bill. I usually do not make long speeches, and I am only asking now for a few minutes. But if I can not have this time and there is any objection I would prefer to take it on another day.

Mr. SNELL. The gentleman can take it under general debate.

Mr. RANKIN. I prefer not to ask it under general debate.

The SPEAKER. Is there objection?

Mr. SNELL. I object.

The SPEAKER. Objection is heard.

REVISION OF REMARKS

Mr. CHINDBLOM. Mr. Speaker, may I say a word in regard to the matter that has just been discussed? The rules of the House, and I think the precedents, do not have any specific provision with reference to incorporating other matters than the Member's own remarks under leave to extend, but I recall that during the last Congress on a number of occasions objection was made to the granting of leave to extend unless the request was coupled with the proviso that the extension should include only the speaker's own words; and at that time the Speaker announced that he would like to have it understood that whenever a request was made for leave to extend, it would include only the remarks of the Member making the request, unless it was specifically stated at the time that other matter would be included in the extension. In the absence of a rule or in the absence of a precedent definitely making that the practice, it seems to me it would be well during this Congress to have the understanding that whenever a request is made for leave to extend, it shall include only the Member's own remarks, unless the request specifically provides for the inclusion of other remarks.

The SPEAKER. The Chair thinks the gentleman is correct. The Chair thinks it is unquestionable that that is the practice, that where merely the general request is made to have the privilege to revise and extend, a Member may not incorporate anything except his own remarks, and the only circumstances under which he can insert something other than his own remarks is where he asks specific leave and refers specifically to the documents he desires to insert.

Mr. CHINDBLOM. Let us hope that practice will be followed.

AGRICULTURAL APPROPRIATION BILL

Mr. DICKINSON of Iowa. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 11577, the agricultural appropriation bill.

The motion was agreed to.

The SPEAKER. The gentleman from Massachusetts [Mr. TREADWAY] will please take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 11577, the agricultural appropriation bill, with Mr. TREADWAY in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration

of the bill H. R. 11577, the agricultural appropriation bill, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 11577) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1929, and for other purposes.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield myself 30 minutes.

The CHAIRMAN. The gentleman from Iowa is recognized for 30 minutes.

Mr. DICKINSON of Iowa. Mr. Chairman and gentlemen of the committee, it is my purpose during the 30 minutes I have here to divide my time into three parts and to discuss three topics in my discourse. First, I want to explain a little something about the expansion of the agricultural program as it is involved in the present appropriation bill; second, I am going to try to show that I am not inconsistent in any of my statements or declarations, so far as the protective-tariff policy is concerned; and, third, I am going to make just a few remarks with reference to the necessity of the equalization fee in the farm relief legislation.

When this subcommittee of the Committee on Appropriations began its hearings of the estimates of the Budget for the next fiscal year it found there was an expansion program for research that has been asked for by various farm organizations and other associations interested in farming and farm products. On account of this we found it was necessary to have more extensive hearings than have heretofore been held on an agricultural appropriation bill, because this expansion in research work has to do with trying to help solve the farm questions of this country. In other words, we find that the blueberries in Maine have their maggot troubles, that the corn in Iowa has the corn borer, that the vegetable has its bug, that the apple has its canker, and that cotton has its weevil. We have gone over the whole list and made an effort to expand the research work of the Department of Agriculture in such a way as to attempt, at least, to meet many of the perplexing problems that are now facing the people who are producing food commodities in this country. That being the case, we have had more extensive hearings. We have gone into the various items carefully and we have brought in a bill which I believe is an effort, at least, to reach out and determine whether or not there is a remedy for the various plagues that beset the farmer in the matter of the producing of his crops.

However, we found a great many Members of the House who believe that when you start any research work in the Department of Agriculture it never stops, but such is not the case. We have put in the RECORD a statement showing that numerous agricultural projects have been started and have been concluded. The findings have been published and the record is there for the benefit of those interested in the production of the particular commodity. So when you start a research project it is not a continuous project from then on, but there comes a time when the department says its work has been closed; it has done all it can do, and for that reason it is ready to make a final report and close that project.

In my judgment the Department of Agriculture has gone a long way in making a great many of the producers of this country know what is the difference between profit and loss. They have taken the old apple orchard that was useless for producing fruit and have made a profitable project out of it by reason of the spraying process. They have gone into creameries; they have gone all along the line and they have determined the best methods by which the producer of any commodity can be sure he will have a fair crop and thereby have something as a reward for his labors.

I believe this is a very comprehensive start on a new research program in the Department of Agriculture.

In my judgment, it is a worthy project and it ought to be carried on. The subcommittee and the Committee on Appropriations in ratifying the report of the subcommittee has been very liberal in its allowances for these various projects. For instance, a great many people did not know there was a bee business in this country until the gentleman from Louisiana appeared before the committee and asked for a special appropriation to permit his people to discover a method by which they can box up hives of bees and ship them from Louisiana to the Northern States, where they can not raise so many bees on account of the cold weather. We are giving them a little consideration by reason of the fact that the State of Louisiana has been affected by deflation and floods more, probably, than any other State in the Union. I could go on and cite various other instances, but I am hoping that with this explanation you will read the report filed with this bill and see the effort this committee has made to reach out and solve these various difficulties. It seems every vegetable has its pest; that every fruit has some handicap in its production; that the old cornfield is no longer sure, after it has been planted, that it is going to produce a crop of corn, and that cotton is no longer a certain crop. For that reason we must reach out into these various endeavors and do the best we can to determine whether or not we can make it more certain that a good crop is going to be produced when a field is once planted in any vegetable, cereal, or grain. I am not going into a detailed discussion of the items of this bill, because that will come under the five-minute rule, at which time we will give you any information we have secured. It is all in the report and in the hearings. Therefore, I am not going into a detailed consideration of the various items.

In my judgment, this committee has done something toward establishing farm relief. Some of you have heard something about farm relief, and we have done something toward starting farm relief in this piece of legislation now before this committee. [Applause.]

For some reason—and I notice it was again brought up on the floor of the House yesterday—there seems to be a misunderstanding as to certain votes cast by certain Members on the Republican side of the House with reference to an appeal from the decision which was laid on the table. It has been mentioned by the gentleman from Alabama [Mr. BANKHEAD]; it has been mentioned by the gentleman from Arkansas [Mr. OLDFIELD]; it has been mentioned before the Committee on Agriculture by the gentleman from Texas [Mr. JONES] and by the gentleman from Texas [Mr. CONNALLY].

Now, as a matter of fact, I have never had any trouble with my record as being an inconsistent record. I have always been for protection. I am for protection now. The Democrats are largely coming over into the protection camp and the only question is as to how fast will they come and how fast can they get in under the protective policy. That is all. [Applause.]

Mr. MANSFIELD. No; there is another question, if the gentleman will permit.

Mr. DICKINSON of Iowa. There are a good many. I have only a short time, and therefore I do not want to be interrupted.

Next, there have been certain declarations with reference to what is going to happen on the tariff, and there has never been any question about where certain Members stood with reference to a protective tariff, and I do not believe there is any question now, even in the minds of the Democrats where most of the Members stand. But when we came in here on a question of appeal from the decision of the Speaker of the House of Representatives as to where a resolution should finally rest, it was decided that it should go to the Clerk of the House. The Democrats wanted to force it to the Ways and Means Committee. It was concluded by the organization of the House that it should rest with the Clerk of the House, and they asked the Republicans of the House to vote accordingly to maintain the Republican organization of the House, and I voted with them. [Applause.] Why? Because the very position I hold in the House is on account of the fact that there are enough Republicans in the United States to keep enough Members of Congress here on this side of the House so that the gentleman from Illinois can be chairman of the Committee on Appropriations and I can be chairman of one of the subcommittees, and I am very pleased to have the distinction of serving in this session of Congress on the subcommittee having in charge the agricultural bill.

Mr. MADDEN. I want to say to the gentleman and to the House that the gentleman has made a great record as chairman of that committee. [Applause.]

Mr. DICKINSON of Iowa. I thank the chairman of the committee.

Mr. BANKHEAD. Did I understand the gentleman to say——

Mr. DICKINSON of Iowa. I do not want to yield just now. I will attend to the gentleman from Alabama before I get through, because I have a few remarks I am going to make with reference to his speech.

Mr. BANKHEAD. I am very glad to hear that.

Mr. DICKINSON of Iowa. Do not worry, I will take care of it. [Laughter.]

As a matter of fact, when that resolution came over here from the Senate it was not a resolution for the adjustment of tariff schedules. It was a resolution for an adjustment of tariff schedules downward, and it did not specify any schedules, as I remember.

Now, I am not for a revision of the tariff downward on agricultural schedules. I have never been for a revision of the tariff downward on agricultural schedules, and I still stand

by the record that I made and the statement I made with reference to the adjustment of the tariff schedules.

I think some of the schedules are too high, and when the proper time comes I shall vote, if I have an opportunity to vote, to see that there is an adjustment made with reference to those schedules; but will you tell me wherein any tariff schedule was involved in the resolution that now rests with the Clerk of the House? Is it any more notice to the Ways and Means Committee if it rests within the archives of their own committee than it is when filed with the Clerk of the House? Why? Because it is the record of the United States Senate. It is the judgment of the United States Senate. It is their declaration that they would like to see some adjustment of tariff schedules, and when it comes over here and rests with the Clerk of the House it is not only notice to every member of the Ways and Means Committee but it is notice to every Member of the House, on both the Democratic and the Republican sides, that such is the declaration of the United States Senate on the tariff question. Therefore, the Ways and Means Committee is just as much charged with the responsibility of carrying out that resolution, if they want to, when it is resting with the Clerk of the House, as though it rested with the clerk of the Ways and Means Committee.

I want to say to my good friends on the Democratic side, if you are going to make a campaign issue you had better find something more than simply a reference of a resolution of the United States Senate before you charge the Republican Members with bad faith, because they were simply carrying out a decree and a decision of their Speaker, and they were supposed to stay by the organization of their side of the House because it is the organization by which they hold their preference in this House.

Mr. MADDEN. I assume also that when we revise the tariff we want to revise it ourselves and not let the Democrats do it.

Mr. DICKINSON of Iowa. Yes; I am for that.

Now, one thing more. It was also said when I introduced my resolution for an increase of tariffs on agricultural commodities that it was inconsistent with my vote to send to the Clerk of the House the resolution of the Senate. Let us see about this. You know and I know that the Ways and Means Committee had already reached a decision that there should be no general revision of tariff schedules. This being the case, there is only one of two ways you can approach the tariff problem, that is either to raise the schedules on the things upon which we can agree or to reduce the schedules on the things upon which we can agree.

Now, as a matter of fact, I believe every Democrat will admit that if you should try to reduce any schedules you would not be able to get it through. As a matter of fact, if you got it through both the House and the Senate, you probably could not get it signed by the President. So what is the use of trying to do a foolish thing and say to the country that we are going to try to reduce a lot of tariff schedules when, as a matter of fact, you know, and all of you knew at the time you voted on the appeal from the decision of the Chair on the tariff resolution, you were not able and would not be able to get a reducing-tariff program through this House.

Mr. BULWINKLE. Will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. BULWINKLE. Assuming for the sake of the argument that what the gentleman says in regard to the tariff is true, then does not that same situation apply to his support of the McNary-Haugen bill?

Mr. DICKINSON of Iowa. Did the gentleman vote for the McNary-Haugen bill?

Mr. BULWINKLE. I did not.

Mr. DICKINSON of Iowa. As a matter of fact, the McNary-Haugen bill is simply an effort to put the farmers and the stuff they produce down in your district under the protective tariff schedules of this country. That is the whole purpose of it, and as a matter of fact, some of you have never been able to get so converted to the protective-tariff principles that you are willing to have your farm commodities come within the provisions of that law, and therefore you voted against it.

Mr. BULWINKLE. What I asked the gentleman was this: The gentleman stated that the President would veto any effort to reduce the tariff.

Mr. DICKINSON of Iowa. Yes.

Mr. BULWINKLE. Now, I am asking the gentleman if the President will not do the same thing to the McNary-Haugen bill?

Mr. DICKINSON of Iowa. Oh, I am coming to that, and I am going to give the gentleman a chance to redeem his record and to vote for it before we get through with this session of Congress.

Mr. O'CONNOR of Louisiana. Will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. O'CONNOR of Louisiana. If the gentleman is correct in principle, why is it that so many Republicans who are in favor of a high protective tariff voted against it?

Mr. DICKINSON of Iowa. Go ask them for their explanation; do not ask me.

Mr. O'CONNOR of Louisiana. Is it too difficult for the gentleman to explain?

Mr. DICKINSON of Iowa. I do not know their minds, but let me say to the gentleman that if he wants flood relief in Mississippi he had better get in on the farm relief, because we are all on the same creek—we live up above and you live down below, and if you want us to help you you had better help us.

Mr. O'CONNOR of Louisiana. Does the gentleman think that is an answer to my question?

Mr. DICKINSON of Iowa. I think it is a good answer. I think there are many people in your section of the country who are absolutely in sympathy with us.

Mr. O'CONNOR of Louisiana. I asked the gentleman why so many protective Republicans——

Mr. DICKINSON of Iowa. I told the gentleman to go and ask them their reason.

Mr. ABERNETHY. Will the gentleman yield?

Mr. DICKINSON of Iowa. Yes; I will yield to the blueberry man of North Carolina. [Laughter.]

Mr. ABERNETHY. I want to ask the gentleman, as he is a high-protective-tariff man, why is it he can not get the Members on that side to go with us in favor of the McNary-Haugen bill and get relief to the farmers?

Mr. DICKINSON of Iowa. Why, I am doing more missionary work among these fellows than anyone else.

Mr. ABERNETHY. Has the gentleman been able to get the man at the White House to change his attitude?

Mr. DICKINSON of Iowa. I advise the gentleman from North Carolina to read my remarks in the RECORD to-morrow morning.

Mr. ABERNETHY. I can not wait. I want to hear you now. [Laughter.]

Mr. DICKINSON of Iowa. As a matter of fact I will discuss that a little later.

Mr. ABERNETHY. I want to know if the gentleman is going to get all the protective-tariff folks to go with him on the McNary-Haughen bill?

Mr. DICKINSON of Iowa. I am getting more all the time.

Mr. ABERNETHY. How many have you got?

Mr. DICKINSON of Iowa. We have got enough over here. The trouble is that the gentleman wants me to do the job all at once.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield three minutes to the gentleman from Florida [Mr. SEARS].

Mr. SEARS of Florida. Mr. Chairman, when the Creator of all things had painted the sky its wonderful blue, which no artist has been able to rival in beauty, he decided in the tropical section something was lacking, and he gave to it its final tint. Then paraphrasing, "His paint brush dropped into the ocean," and that blue, which so many of you who have visited Florida have admired and marveled at, was given its brilliant hue. To add to this beauty He also created the most wonderful automobile course in the world, which is kept in perfect condition by the ebb and flow of the tide. To those who have not had the pleasure of going down there, you will find that the above is true by visiting Florida and greater Daytona.

Mr. Chairman, in life each one has his part to play. There are men who become great lawyers, doctors, who become leaders in their profession, and Speakers, like ours, who rules with fairness and justice. We have had great soldiers, and we are all proud of that great young American, that wonderful American manhood, "Lindy." [Applause.]

To-day, there is in the gallery, where we have had the pleasure of entertaining other men like York and others, a man whose nerves are made of steel, but whose heart is large and like a woman is modest and timid. I take pleasure in introducing to you him, who recently broke the world's record on that wonderful race course at greater Daytona at a speed of 215 plus miles an hour. It is no wonder that he broke the world's record, because his machine evidently attempting to rival the beauties of the sky and ocean was named the Bluebird—Capt. Malcolm Campbell, of Great Britain. [Applause.]

Mr. DICKINSON of Iowa. Now, I want to come to the equalization fee. There has been a great deal of discussion here as to whether or not any farm relief legislation without the equalization fee would be effective. I presume that nearly all the comments in the press and among Members of the House is on the fear that the equalization fee will not be effective and

finally will become a tax against the producer. As a matter of fact, I have no fears of that kind, and I want to explain the machinery, as I see it, with reference to the equalization fee, and why if you are going to have farm relief you want an equalization fee provision in it. Otherwise it will not be effective.

An equalization fee is for the purpose of bringing a commodity within the provisions of the machinery. An equalization fee is a substitute for what they call consolidation and organization in big business that brings the product within the control. The man who thinks that by agreement of the producers themselves they are going to be able to go out and bring in cooperative machinery enough to control the price is wrong, because they will not make sufficient progress in the next 25 years to bring enough of any commodity within the control of the organization to have a controlling effect on the market of the commodity.

Therefore, in order to bring the hundred and one producers of various commodities within the provisions of the bill, it is necessary that you bring them in with some legislative machinery. Oh, but you say, we would have to have the consent of all of the producers before we could do that. No. When the Congress passed the Federal reserve act they did not go out and ask the national bankers of the country whether or not they wanted to come within the provisions of that act. They just said that by reason of the fact that they were bankers under a Federal charter, and in order to become a part of the machinery, they were to be allocated within the provisions of the machinery, and that they must thereby function under the provisions of that machinery. That is just what we are doing with the equalization fee. But if the loan provisions of the bill will carry the commodity and sell it at a stabilized price, then I am a believer in it, and I believe that if the board finds that that can not be done with the loan provisions, then they ought to have the additional machinery whereby they can bring that commodity within their control, and it is only by doing that that you are ever going to stabilize the price.

Mr. Chairman, there is a misapprehension about the farm-relief program. A great many people think we want higher prices all of the while. Such is not the case and such has never been the case. All we want is to take out the dips, to take out the ups and downs, to take out the fluctuations, that always fluctuate low when the farmer is selling and high after the farmer has sold. Therefore the thing that we want to do is to carry this program along and stabilize prices—not a high price, not a low price. That is the reason why you want the machinery of the McNary-Haugen bill enacted into law. You may say that the farmer has always gotten along and that you guess he always will.

The farmer in every European country, when he faced the same crisis that we are facing here, has always lost and has gone down and down to where he has never been able to revive himself. If you do that in America, you are going to decrease the production and also the valuation in every phase of commercial life in this country. That is what will happen if you permit the farmers to continue to lose their buying power, which is the thing that sustains the industries of the country and the commercial concerns of the country. Therefore, I want to see machinery provided whereby we can bring these producers within the machinery and stabilize the price for their benefit. A great many people say that that will cost us more money to live. It will not. All it will do will be to transfer from the speculator the commission margins to the producer of a particular commodity. It will not cost the consumer any more, because we are now finding that we charge what the consumer will pay and not what you have the ability to charge. I can recall that three or four years ago they said that all you had to do was to have an agreement that you were going to raise the price of sugar, and they about doubled the price of sugar in less than six weeks. Then, within 60 days the consumption of sugar in the United States decreased 60 per cent, and they had to reduce their prices because the people would not pay the big price. We know that when we raise pork and sell it in Brother BULWINKLE'S district in Tennessee——

SEVERAL MEMBERS. North Carolina.

Mr. DICKINSON of Iowa. North Carolina—and I ask the pardon of the gentlemen from Tennessee——

Mr. BLACK of New York. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. BLACK of New York. Would the gentleman tell us specifically how they expect to eliminate the middleman by this proposition?

Mr. DICKINSON of Iowa. It will not eliminate the middleman. It will eliminate the speculation of this middleman.

Mr. BLACK of New York. Why?

Mr. DICKINSON of Iowa. Because they will not be able to fluctuate the prices by getting out scare heads. What they do now is to get out a scare head. Let me give you a concrete illustration which affects the district of the gentleman from Louisiana [Mr. O'CONNOR], who always wants flood relief, but not farm relief. What did they do down there? They had a great flood in the Mississippi Valley and it destroyed a lot of the cornlands along the Mississippi River.

As time went on they said that the great corn crop of the Mississippi Valley was going to be wasted; and then they found that the acreage was so much that the crop was going to be reduced, and the speculators put up the price of corn 12 cents within less than two weeks. Why? On the scare head that you were going to have a shortage of corn. What happened? A little later they gave out scare heads that the Lord had sent the sunshine and that He was sending June weather in September, and that they were going to have a splendid crop; and then they put the price down 16 cents when there had not been any change in the condition with reference to the corn crop at all.

Mr. BLACK of New York. I do not want the gentleman to consider me unfriendly, but why can not the farmers, through the medium of the instrumentality set up by this bill, do the same thing in an artificial way through the power they obtain through legislation, as was done by the speculators through the action of the flood?

Mr. DICKINSON of Iowa. Because the farmer is not of a speculative turn of mind. There would be no way of getting together a movement among the farmers that could possibly react quick enough so that they could get that quick action up and down.

As a matter of fact, I find that farm boards and farm-board machinery, when once established, are just as dependable as a Federal Reserve Board or a Tariff Commission, or other functionaries of the Government. You can not charge that because they happen to be dealing with a farm program they are not going to be less honest and dependable than the other commissions concerned and those who work on various boards of the Government.

Mr. KVALE. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. KVALE. The gentleman has spoken of the speculators. Does not the gentleman think that the reason why the McNary-Haugen bill is not now on the statute books is because the gamblers' exchanges—the cotton and grain exchanges—and the boards of trade are opposed to it?

Mr. DICKINSON of Iowa. I know they are opposed to it, and I never found anyone in that type of business who favored this legislation, because I think they are afraid it will affect their business and their margins.

Mr. O'CONNOR of Louisiana. Mr. Chairman, will the gentleman yield there?

Mr. DICKINSON of Iowa. Before I yield I would like to ask the gentleman if he is going to vote for or against it?

Mr. O'CONNOR of Louisiana. I will vote for the Aswell bill if you and your people would let that bill come up under the rule.

Mr. BROWNING. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. BROWNING. The gentleman thinks the machinery of the McNary-Haugen bill will stabilize the price. What we want to know is whether or not the average price to the farmer is going to be made higher than it is now? If you are not going to raise it, what benefit will come from it?

Mr. DICKINSON of Iowa. Let me ask you this question: If you take out the fluctuation and give its equivalent to the farmer, will he not get more than he gets now?

Mr. BROWNING. Of course.

Mr. DICKINSON of Iowa. Can there be any question but that if you take out the speculative margin the farmer will get more than he gets now?

Mr. BROWNING. He will if it does not cost more to the consumer.

Mr. GREEN of Florida. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. GREEN of Florida. From the statements made by the gentleman to-day and in the past, we would conclude that the gentleman has made a careful study of the farming problem. I will ask the gentleman how he feels about extending the tariff rate so that we can exclude the fruits and vegetables that come in from Mexico and elsewhere and compete with the products of Florida?

Mr. DICKINSON of Iowa. I recall that a number of gentlemen have introduced bills that include vegetables and various farm commodities, beans, vegetables, fruits, and so forth, to help the producer of these commodities in this country.

Mr. GREEN of Florida. Will the gentleman go a little further and assist us in bringing from the Committee on Ways and Means such a revision of the tariff as will enable these products to be protected? Many of our farmers are producing at a loss to-day.

Mr. DICKINSON of Iowa. They are just getting into the same class where the Iowa farmers have been in for six years. We have been operating at a loss for a long time.

Mr. GREEN of Florida. I think we ought to get behind the Ways and Means Committee, which is dominated by the gentleman's party, and bring about such a revision.

Mr. DICKINSON of Iowa. Will you stand to put it through?

Mr. GREEN of Florida. I will stand for the protection of vegetables and fruits raised in my State. [Laughter.]

Mr. DICKINSON of Iowa. I want to say that if we could put this questionnaire often enough and get a lot of these Democrats committed, we would have a chance of getting real relief legislation.

Mr. KVALE. Mr. Chairman, will the gentleman yield?

Mr. DICKINSON of Iowa. Yes.

Mr. KVALE. The gentleman knows that I have consistently supported the McNary-Haugen bill, including the equalization fee.

Mr. DICKINSON of Iowa. That is correct.

Mr. KVALE. Will the gentleman explain to this House why he has come into my district in Minnesota and campaigned against me and in favor of a gentleman whose congressional manager was opposed to the enactment of the McNary-Haugen bill?

Mr. DICKINSON of Iowa. It happens that I had a conversation with the man who opposed the gentleman, and he was just as much in favor of the McNary-Haugen bill as the gentleman is, and he was a member of my party, and you are not.

Mr. KVALE. The gentleman referred to, Mr. J. C. Morrison, was opposed to the McNary-Haugen bill. Now, is the gentleman a Republican first, and a friend of the farmer after that?

Mr. DICKINSON of Iowa. I am for both all the time. [Applause.]

It seems to me to be fitting to put in a short history of the legislative program for farm relief.

I will indicate the various McNary-Haugen proposals for surplus control which have been before Congress during the last four years:

(1) HOUSE

(Sixty-eighth Congress, first session)

H. R. 9033. Agricultural export corporation: Original McNary-Haugen bill with "ratio price" provision. Introduced by GILBERT N. HAUGEN (Iowa). Reported from committee May, 1924. Rejected by the House of Representatives June 3, 1924; 223 nays, 155 yeas.

SENATE

S. 3091. Agricultural export corporation: Original McNary-Haugen bill with "ratio price" provision. Introduced by Senator CHARLES L. MCNARY (Oregon). Reported from the committee April 16, 1924. Not voted upon.

(2) HOUSE

(Sixty-eighth Congress, second session)

H. R. 12390. Farmers' export corporation: Second McNary-Haugen bill, without "ratio price," based on making tariff effective. Introduced by GILBERT N. HAUGEN (Iowa). Reported from the committee February 26, 1925. Not voted upon.

SENATE

S. 4206. Farmers' export corporation: Second McNary-Haugen bill, without "ratio price," based on making tariff effective. Introduced by Senator CHARLES L. MCNARY (Oregon). Reported from the committee February 26, 1925. Not voted upon. The above bill was offered as an amendment to the naval omnibus bill by Senator ROBERT B. HOWELL (Nebraska). Rejected March 3, 1925; 69 nays, 17 yeas.

[NOTE.—The Agricultural Committee in the House introduced a cooperative marketing bill based upon the recommendations of the President's agricultural conference. This bill was defeated in the House by the cooperative measure introduced by Congressman L. J. DICKINSON (Iowa). Neither of these bills was addressed to the subject of surplus control and neither came to a vote in the Senate.]

(3) HOUSE

(Sixty-ninth Congress, first session)

THIRD M'NARY-HAUGEN BILL

Based upon the Dickinson bill (H. R. 6563).

H. R. 11603. Federal farm board: Directed to act through cooperatives; "fair and reasonable" price provision (suggested by Senator Cummins) included. Introduced by GILBERT N. HAUGEN (Iowa). Reported from the committee April 27, 1926. Rejected by the House of Representatives May 21, 1926; 212 nays, 167 yeas.

SENATE

THIRD M'NARY-HAUGEN BILL

S. 7893. Federal farm board: Directed to act through cooperatives; "fair and reasonable" price provision (suggested by Senator Cummins) included (as committee amendment in Senate committee). Senator GEORGE W. NORRIS chairman. Reported April 19, 1926. Rejected by the Senate June 24, 1926; 45 nays, 39 yeas.

(4) HOUSE

(Sixty-ninth Congress, second session)

FOURTH M'NARY-HAUGEN BILL

H. R. 15474. Federal farm board (revised) directed to act through cooperatives; no special price provision. Introduced by GILBERT N. HAUGEN (Iowa). Reported from the committee January 18, 1927. S. 4808 was substituted, and passed House of Representatives February 17, 1927; 214 yeas, 178 nays. Vetoed by Calvin Coolidge in closing hours of Congress.

SENATE

FOURTH M'NARY-HAUGEN BILL

S. 4808. Federal farm board (revised) directed to act through cooperatives; no special price provision. Introduced by Senator CHARLES L. MCNARY (Oregon). Reported from the committee January 24, 1927. Passed Senate February 11, 1927; 47 yeas, 39 nays. Vetoed by Calvin Coolidge in closing hours of Congress.

(5) HOUSE

(Seventieth Congress, first session)

FIFTH M'NARY-HAUGEN BILL

H. R. 7940. Federal farm board, revised (retaining principles, but meeting most of the objections of the veto): Introduced by GILBERT N. HAUGEN (Iowa).

SENATE

FIFTH M'NARY-HAUGEN BILL

S. 1176. Federal farm board, revised (retaining principles, but meeting most of the objections of the veto): Introduced by Senator CHARLES L. MCNARY (Oregon).

In considering sentiment for the McNary-Haugen bill it is important to note that following the close of the second session of the Sixty-eighth Congress in the spring of 1925, the farm organizations changed their method of approach to the problem.

The original McNary-Haugen bill, defeated in the House of Representatives in June, 1924, provided a Government corporation and contained the "ratio price" provision. The second McNary-Haugen bill, introduced in the second session of the Sixty-eighth Congress, provided for a Government corporation, omitted the "ratio price" features, and relied upon making the tariff effective by control of supply.

In the tentative draft of the Dickinson bill, prepared in the spring of 1925, the idea of a Government corporation authorized to buy and sell or to direct activities in buying and selling was abandoned, and the theory of a Federal farm board operating through cooperative marketing associations primarily and other agencies secondarily was substituted. This theory was carried through the surplus control legislation, rejected by the House of Representatives in the spring of 1926 and by the Senate during the same session of Congress. Legislation based upon this theory was passed by both Houses of Congress in the second session of the Sixty-ninth Congress and vetoed by President Coolidge. This theory of legislation is contained in both the House and Senate bills introduced by Congressman HAUGEN and Senator MCNARY, respectively, in the Seventieth Congress.

The "equalization fee" principle has been embodied in all of the surplus control legislation, known as the McNary-Haugen bills, from the introduction of the first bill to the present time.

Briefly, the bill now in Congress provides for a farm board authorized, upon petition of the growers of a majority of a particular commodity, to assist in removing, storing, and disposing of the surplus portion of the commodity, this to be accomplished by entering into agreements with cooperative associations or other agencies, the losses, costs, and charges to be paid from the funds secured from the collection of the "equalization fee." The principle is as old as government itself. It is that all beneficiaries of an undertaking in behalf of the public welfare shall contribute ratably toward paying the cost. It is new in name only. It is permissive legislation supplemented by sufficient government authority to enable the growers of a commodity to stabilize the price of that commodity by regulating its flow to market, the costs to be distributed as widely as the benefits—that is, over all the growers of the commodity.

It is important to note that this theory of legislation has been overwhelmingly indorsed by farm organizations. During all

the hearings on this legislation, covering months of time over several years, not a single responsible farm organization or cooperative marketing association has appeared before the committee in either House in opposition to the measure. It is true that one organization, the National Grange, has favored the debenture plan, which is an indirect subsidy, since it proposes to divert tariff revenues to pay a bounty on exports. However, as late as in the spring of 1927 Mr. Taber, the master of the National Grange, while advocating the debenture plan, refused to oppose the McNary-Haugen bill, while on a previous occasion Doctor Atkeson, the Washington representative of the Grange, appeared before the committee on behalf of the McNary-Haugen bill. I think it is a fair statement to make that farmers have been more nearly united in their support of the McNary-Haugen bill than were the railroads in support of the various measures passed affecting them, the banks in the support of the Federal reserve act, or, indeed, the manufacturers as a whole in the support of particular tariff schedules.

The reason for the change by farm organizations in the method advocated for surplus control from a Government corporation to working through cooperative associations may be attributed to three major factors:

First. The attitude of farm organizations and cooperative associations;

Second. The attitude of Congress; and

Third. The attitude of the President.

THE ATTITUDE OF FARM ORGANIZATIONS AND COOPERATIVE ASSOCIATIONS

First. The farm organizations and cooperative associations for a time believed that the control of surplus could be managed by cooperative organizations. They have learned, however, that it is impossible for a voluntary association to sustain the market on primary agricultural commodities at the expense of their membership alone because the outsider gets the benefits of an increased price without bearing any of the expense or burdens incident to the activities of the association.

Farm organizations and cooperative associations believe, however, that with the assistance of the Government to help them spread the costs as widely as the benefits are distributed—that is, over the whole commodity—they can do the job.

THE ATTITUDE OF CONGRESS

Second. Congress by enacting the Capper-Volstead Act of 1922 and the act of 1926 to create a division of cooperative marketing, as well as by numerous other acts, such as the rural credits act of 1923 looking toward better credit facilities for cooperatives, has accepted the policy of cooperative marketing as a national policy.

The Capper-Volstead Act authorizes associations of producers of agricultural products which under certain conditions are exempt from antitrust restrictions. Persons engaged in the production of agricultural products are permitted to act together in associations, corporate or otherwise, with or without capital stock, in collectively processing, preparing for market, handling, and marketing in interstate and foreign commerce such products of persons so engaged; provided that such associations are operated for the mutual benefits of the members thereof, as such producers. The association is limited to dividends not in excess of 8 per cent per annum and can not deal in the products of nonmembers to an amount greater in value than such as are handled by it for members.

The act of 1926—H. R. 7893—created a division of cooperative marketing in the Department of Agriculture to provide for the acquisition and dissemination of information pertaining to cooperation; to promote the knowledge of cooperative principles and practices; to authorize cooperative associations to acquire, interpret, and disseminate cooperative and marketing information, and for other related purposes.

THE ATTITUDE OF THE PRESIDENT

Third. From the time President Coolidge succeeded President Harding, upon almost all appropriate occasions he has expressed sympathy with the development of cooperatives and the hope that the problem might be solved by them.

For example, in his first message to Congress, December 6, 1923, he said:

> He (the farmer) must have organization. His customer with whom he exchanges products of the farm for those of industry is organized, labor is organized, business is organized, and there is no way for agriculture to meet this unless it, too, is organized. * * * Systems of cooperative marketing created by the farmers themselves, supervised by competent management, without doubt would be of assistance, but they can not wholly solve the problem.

In this Lincoln Day dinner speech at the National Republican Club in New York February 12, 1924, he said:

> I have already encouraged organization and cooperative marketing that organized agriculture may cope with organized industry.

At the Livestock Exposition in Chicago December 3, 1924, he said:

> It [the Government] must encourage orderly and centralized marketing as a substitute for the haphazard and wasteful distribution methods of the past. The principle of cooperation in producing, financing, buying, and marketing must be encouraged to the utmost practicable development.

Before the National Cooperative Marketing Conference January 6, 1925, he said:

> As a last word, let me assure you again of the profound sympathy which your Government feels for all your efforts, and its eager purpose to help in every practical way the achievement of the ends you are seeking.

He told the members of the American Farm Bureau Federation on December 7, 1925, in Chicago:

> The most important development of late years has been the cooperative movement. * * * I propose actively and energetically to assist the farmers to promote their welfare through cooperative marketing.

In his message to the Sixty-ninth Congress, first session, December, 1925, he said:

> It has appeared from all the investigations that I have been able to make that the farmers as a whole are determined to maintain the independence of their business. They do not wish to have meddling on the part of the Government or to be placed under the inevitable restrictions involved in any system of direct or indirect price fixing which would result from permitting the Government to operate in the agricultural markets.

In his message to the second session of the Sixty-ninth Congress, December, 1926, he said:

> The development of sound and strong cooperative associations is of fundamental importance to our agriculture.

In the same message he said:

> In my opinion cooperative marketing associations will be important aids to the ultimate solution of the problem. It may well be, however, that additional measures will be needed to supplement their efforts. I believe all will agree that such measures should not conflict with the best interests of the cooperatives, but rather assist and strengthen them. * * *

In his message to the Seventieth Congress early this month, December, 1927, he said:

> The main problem which is presented for solution is one of dealing with a surplus production. It is useless to propose a temporary expedient. What is needed is permanency and stability * * *. Price fixing and subsidy will both increase the surplus instead of diminishing it. Putting the Government directly into business is merely a combination of subsidy and price fixing aggravated by political pressure. * * * The Government can * * * assist cooperative associations and other organizations in orderly marketing and handling a surplus clearly due to weather and seasonal conditions. * * * While it is probably impossible to secure this result at a single step, and much will have to be worked out by trial and rejection, a beginning could be made by setting up a Federal farm board or commission of able and experienced men in marketing, granting equal advantages under this board to the various agricultural commodities and sections of the country, giving encouragement to the cooperative movement in agriculture, and providing a revolving loan fund at a moderate rate of interest for the necessary financing. Such legislation would lay the foundation for a permanent solution of the surplus problem. * * * Cooperative marketing especially would be provided with means of buying or building physical properties.

The vote on the McNary-Haugen bill in the last session of Congress shows how widely the conviction prevails that this legislation is desirable. Fifty-seven per cent of the Democrats voting and 52 per cent of the Republicans voting in both Houses favored the bill. The charges that the affirmative votes were due to various trades among Members of Congress are probably without substantial foundation to a greater degree than is usual in a piece of major legislation.

I think it is fair to say that the opposition comes from the sections primarily industrial, and from groups now interested in handling the farmer's products who fear that their interests may be adversely affected by the successful development of cooperatives.

The first class wants the farmer to restrict his production to the demand of domestic markets in order that industry may monopolize our export trade. This attitude first became ap-

parent in the report of the President's Agricultural Conference in January, 1925, which contained the recommendation:

There must, therefore, be established a balanced American agriculture by which production is kept in step with the demand of domestic markets and with only such foreign markets as may be profitable.

The recently published report of the special commission of the United States Chamber of Commerce and the National Industrial Conference Board leaves no doubt in my mind of the purpose of certain interests to industrialize the Nation at the expense of agriculture. Yet, according to Virgil Jordan, chief economist of the National Industrial Conference Board, the capital invested in agriculture in 1919 more than equaled that invested in our manufacturing industries, mines, and railroads combined. Agriculture normally exerts a purchasing power for nearly $10,000,000,000 worth of goods and services of other groups annually. This purchasing power of our agricultural groups is five or six times the amount of our industrial exports, exclusive of the products of the farm.

Why, then, I ask, should agriculture be submerged and its foreign markets given up for the benefit of industries in limited sections of the country?

Business had better take stock of its leadership.

The issue threatens to remake the political map of the United States, since the welfare of agriculture is more to be desired than the welfare of political parties or of any individual. There can be no doubt in the mind of any observer of the meetings of the great farm groups in the Middle West and South of the determination of these groups to secure economic justice, regardless of the effect upon political parties.

The economic position of agriculture can be epitomized by the simple statement that since 1910 farm debts have increased from about $4,000,000,000 to more than $12,000,000,000 in 1920, and has increased since that time. Farm-property values have declined since 1920 more than $20,000,000,000.

Further information on the equalization fee of the legislature can best be gained by rereading the speech of Senator JAMES E. WATSON in the United States Senate February 10, 1927.

THE EQUALIZATION FEE

I

No farm legislation can be made helpful that does not provide some method of taking care of surplus production, and in my judgment the only sound way to do this necessary thing is by means of an equalization fee.

The opposition to surplus control legislation has picked the equalization fee as the vital point in this legislation, and special efforts have been made to eliminate it from any bill that may be passed by Congress.

One by one the objections which for years have been urged against farm relief legislation have been abandoned except the one to the equalization fee.

The most unreasoning opponent no longer denies that the condition of agriculture is desperately bad; and all but a few concede that there is nothing in present conditions and tendencies which promises relief. Only a negligible number any longer deny that the agricultural situation justifies constructive aid by the Government.

The plain and simple terms of the measure supported by representative farm organizations have convinced, if they have not silenced, the partisans who have been shouting "price fixing" and "Government in business," but every opponent of this legislation joins in the chorus of opposition to the equalization fee.

The entire controversy, in Congress and out of it, over farm legislation has finally resolved itself into this proposition from the opposition:

"Any farm legislation within reason, provided it contains no equalization fee."

The reason for all this is obvious. Surplus control legislation without the equalization fee would be unworkable and ineffective without Government subsidy. The fee is the crux of the whole situation.

II

Although opposition to the equalization fee has been voiced many times in Congress, in personal discussions, and in the press, one will have difficulty in recalling more than two definite reasons for opposition to it. Some argue that it is unconstitutional; others, that farmers do not want it.

The purpose of the equalization fee is (a) to raise funds from trade in a commodity to enable farmers to manage temporary and seasonal surpluses in ways that will prevent such surpluses from driving the price of the whole crop to unprofitable levels, and (b) to distribute the costs and benefits ratably to all the marketed product.

Whatever plan may be employed will involve cost, expense, and financial risk. Our export surplus of wheat can not be handled in a way to maintain a domestic price level in keeping with American standards of living and with domestic industrial prices without involving costs, trade risks, and losses. Surplus cotton can not be carried over from years of large crops to years of small crops without expense and some risk of loss. In a word, stabilization of agriculture can not be accomplished by theorizing and talking about it, but must be accomplished in the market places by actual transactions in actual commodities. Such transactions require money and involve possibilities of gains and losses.

Who shall manage such transactions? Who shall furnish the money, and who shall take the risks? There is but one proper answer—the farmers themselves. How will farmers themselves get the money to do these necessary things? By voluntary action, or through a device created by legislation? That is the issue now before Congress.

The opponents of this legislation admit the deplorable condition of farmers; they admit that control of surplus is a practicable remedy, but they contend that it should be done by voluntary action through cooperative associations and without an equalization fee.

III

Theoretically the banks of the country could have cooperated in the control of their credit resources and brought stability without Federal legislation, but actually the task was impossible. Theoretically the stockholders of all the banks could have organized central banks, which could have done many of the things which Federal reserve banks are now doing to adjust the supply of bank credit to the legitimate needs of the country. But, in reality, it was impossible to secure the necessary unity of action by so large a number of stockholders. Legislation was necessary to compel bankers to do what they should do, but would not, by voluntary action. Therefore, Congress, by the device of the Federal reserve law, created the plan of stabilization and compelled national banks to provide ratably the capital necessary to operate it.

Theoretically it was possible for the many railroad corporations and the many organizations of railway labor to set up by voluntary action agencies necessary to stabilize railroad labor conditions. Actually, effective voluntary cooperation was impossible. Hence, by the device of the Railway Labor Board, Congress sought to provide the necessary supplement to voluntary action.

Theoretically, railroad companies by voluntary cooperation could have established uniform standards of car equipment to permit free interchange of cars, but actually such cooperation was impossible; hence universal acceptance of uniform standards of equipment was compelled by Federal action through the Interstate Commerce Commission.

Theoretically it has always been possible for bankers and business men to establish uniform practices with respect to bills, notes, drafts, etc., but actually it has been impossible, and uniformity came only through the device of negotiable instruments legislation.

Theoretically it has always been possible for shippers of fruit and vegetables to establish uniform sizes and shapes for boxes, barrels, and crates by cooperative action, but experience proved to the contrary, and Congress by the device of a Federal law supplemented cooperative effort and compelled all shippers to use the same size and shape of containers.

Theoretically it was possible for labor to organize so completely that all Government work would be done on an eight-hour basis; but practically it was impossible and Congress stepped in and did by law what cooperation alone could not do.

This list of examples might be extended indefinitely to prove that when the public good can not adequately be served by voluntary cooperation it has been the settled policy of our Government to provide by legislation the means to the desired end. Frequently it is nothing more than a device by which the minority may be required to conform. The device varies with the subject matter. It was compulsory stock subscription in the case of the Federal reserve law; it was a fine in the case of the uniform containers law.

When we consider the basic and fundamental aspects of the surplus control bill its similarity with much familiar and accepted legislation becomes apparent. There are differences in method and detail, of course, just as different methods of taxation are employed with different classes of property; but in all cases the aim and purpose is the same—to have all classes of property contribute to the support of government.

Every industry is in some respects different from every other industry, and a legislative device that will aid one may not benefit another.

The surplus control act with the Federal Farm Board, the stabilization fund, and the equalization fees are for agriculture what the Federal reserve act is for banking; the transportation act for railroads; the immigration law, the eight-hour law, and numerous other labor laws for labor; the tariff act for industry and innumerable other Federal laws are for the special interests they serve.

IV

It may be argued that it is possible for all wheat growers to cooperate in handling wheat exports in a way that will maintain a domestic price in keeping with American standards of living and American industrial prices, but actually it is impossible.

It may be argued that it is possible for all cotton growers to cooperate in withholding the unneeded parts of their crop from the market in years of large production and feeding it back again as needed, but actually such a thing is impossible.

The same is true of all other crops. All farmers will never join cooperative-marketing associations, just as all national banks would never voluntarily join the Federal reserve system, and all shippers would never use the same kind of containers.

A fraction of a group will not voluntarily assume the entire cost of a service to the entire group. Quite a number of farmers' cooperatives in the United States have undertaken to stabilize markets by carrying seasonal surpluses over into the next year, but in every such case the effort has failed, and in some cases the cooperative itself has been wrecked.

A fraction of the producers of wheat, even a large fraction, can no more assume the entire cost of stabilizing the wheat market on an American basis than a voluntary local improvement association can assume the entire cost of building levees or good roads.

A fraction of the producers of cotton, even a large fraction, can no more assume the entire cost of stabilizing the cotton market through cooperative associations than a few national banks can voluntarily assume the maintenance of the Federal reserve system.

V

The equalization fee is a new thing in name only. The principle involved in it is as old as the Government itself. It is this: That all beneficiaries of an undertaking in behalf of the public welfare shall contribute ratably toward paying the cost.

It will cost money to manage surpluses and stabilize markets for farm crops. The producers of each crop—all of them, not a few of them—should pay the cost and bear the losses, if any, because they will be the direct beneficiaries. What better way can be devised for doing that than collecting a small fee on each marketed unit of the crop?

We are told that such a fee would be unconstitutional. Such a statement is merely an opinion; and the same thing has been said of every important legislative act of Congress since the Government was founded. Many lawyers, including the very able lawyers employed by the House and Senate to aid committees in preparing legislation, hold that the equalization fee is constitutional. Many of the ablest lawyers in both Houses take the same view. No one has yet answered the constitutional argument of the late Senator Cummins, of Iowa, in the Senate as reported in the CONGRESSIONAL RECORD of June 19, 1926.

Congress has never refused to pass an important measure because a few men claimed it was unconstitutional. Why make an exception in the case of farm legislation?

VI

It is asserted that farmers do not want farm relief if they must pay an equalization fee.

There is no fact basis for such an assertion. Prolonged hearings have been held by committees of the House and Senate on bills carrying an equalization fee since 1924. The record does not disclose that a single farmer has appeared to protest against it. Surely, if farmers are strongly opposed to it, some evidence of that fact would have found its way into the record of these hearings.

On the contrary, practically every farmers' cooperative and farm organization, whose members produce the commodities named in this bill, is supporting this legislation.

These facts raise the question who represent farmer opinion and farmer sentiment—Washington politicians, grain exporters, the United States Chamber of Commerce, business lobbyists, or the farmers' own organizations?

Why should not farmers be willing to pay a small equalization fee to get profitable prices? The farmers of the South paid to somebody what amounted to a fee of $35 a bale loss on their cotton in 1926 because they did not have a chance to pay a $2 a bale equalization fee to take the surplus off the market. The wheat, corn, and hog producers are paying more than the amount of an equalization fee every year in the form of losses because they have no effective method to maintain profitable prices.

VII

To offer Government loans to farmers as a substitute for an equalization fee is to do a useless thing. Loans are useful and necessary in business, but they can not properly be used or substituted for original capital. In like manner commodity stabilization funds must consist of original capital drawn from the particular industry to be stabilized and not of loans from the Government to some of the people in the industry.

As losses and costs of stabilizing farm crops must be paid out of the stabilization funds there will be need for periodical or occasional replenishment. Funds for that purpose should be provided by the particular crop industry through an equalization fee.

If the stabilization funds should be secured by loans alone, impairment of them by costs and losses resulting from operations could only be made good with further loans. Merely to state this method is to expose the utter fallacy of stabilizing crops by use of loans.

The equalization fee will serve three principal purposes. It will provide the capital fund for managing surpluses, it will prorate the cost equitably upon all the marketed units of the commodity, and it will operate in some degree as a restraint upon overproduction.

Under no conceivable circumstances can loans by the Government, or any other agency, accomplish any one of these three purposes. Therefore no loan plan can properly be called an adequate stabilization plan.

VIII

Some have objected to an equalization fee on the ground that it involves some degree of compulsion; that farmers will rebel against the collection of a fee on their products. There is a measure of compulsion in the bill, as there is in all law. No law is ever needed to require people to do that which all of them will do voluntarily.

The terms of the bill prevent its application to any commodity unless the spokesmen and representatives of the producers of that commodity ask for it. When that happens the bill would require the collection of the fee upon all the marketed units of that commodity. The principle involved is fundamental in popular government.

There is much more compulsion, and of the same kind, in the Federal reserve act than is proposed in the surplus control act. During the debate on the bank bill in the recent Los Angeles convention of the American Bankers Association, Mr. Max B. Nahm, vice president of the Citizens National Bank and Bowling Green Trust Co., of Bowling Green, Ky., said:

"The Federal reserve system can be preserved only by conscripted capital. You can conscript the capital only of national banks. The law does not allow you to reach the State banks.

"I say that the Federal reserve system can exist only on a conscripted capital. During the Revolutionary War the continental States had no authority, and the Revolutionary War was won by private subscriptions of Washington and Morris and the Government of France. During the Civil War the United States could not sell its bonds, and Salmon P. Chase and Jay Cooke raised $2,000,000,000 through the national banking system. In the last war you sold $25,000,000,000 of bonds through the Federal reserve easier than they did $2,000,000,000."

In the course of the same debate, Mr. H. H. McKee, president of the Capitol National Bank, of Washington, D. C., said:

"We can not have a Federal reserve system in this country that is not based upon the compulsory membership of national banks that are under the sole and supreme authority of the Federal Government, that can make them contribute the capital and the assets to that great system to make it function."

If it was right to compel all national banks, the willing and the unwilling, to provide the capital funds necessary to stabilize the banking business, how does it become wrong to require a minority of farmers to contribute a small fee to stabilize their particular branch of the agricultural industry?

Everybody knows that a majority of the national banks opposed the passage of the Federal reserve act. It is equally well known that a majority of interested farmers' organizations favor the passage of the surplus control bill with the equalization fee provision.

The Federal reserve act became operative when passed by Congress. The surplus control bill will apply to a particular commodity only when the spokesmen and representatives of the commodity ask for it to be applied. It is not nearly so arbitrary and compulsory in character as the banking bill.

National banks can not relieve themselves of the requirements of the Federal reserve act, but farmers may relieve themselves of the provision of the surplus act when there is no need for it.

It is beyond the point to say that these comparisons are inapt because national banks are chartered by the Government. Their stockholders are citizens and their investments are private property and just as much under the legal and moral protection of the Constitution and the Government as are farmers and their property. If it is a right and moral policy of government to require owners of national-bank stock to pay an assessment into a capital fund to stabilize the banking business, why is it not a right and moral policy to require owners of farm crops to pay a small fee into a capital fund to stabilize the branch of agriculture?

IX

Another frequently heard objection is that surplus control legislation is new and novel and an untried experiment.

In the very nature of things all fundamental legislation must be new and untried and to that extent an experiment. The interstate commerce act was an untried experiment when it was passed. So was the national bank law, the original protective tariff law, and all new legislation.

It was impossible to know in advance exactly how any of these laws would operate. The same is true of surplus control legislation. The condition of farmers is desperate and threatens the prosperity of other classes. While this is not the first time in history that agriculture has been unprofitable, there are in the present situation many factors which were not present in other depressions and which give special significance to present conditions.

The surplus control bill proposes a plan which is new as legislation, but old as business practice. It aims to make it possible for producers of farm commodities to create with their own money stabilization funds which will be employed to stabilize the market for these crops by a sound business method. If all the wheat or all the cotton in the country were

produced by a relatively small number of people, such legislation might not be necessary because the producers could "get together" and stabilize their markets as the steel market and many others are stabilized. But with farming in the hands of millions of men legislation is required to secure stability.

Nobody can guarantee the complete success of the plan. Experience may and probably will suggest changes. More than 30 provisions of the Federal reserve act have been modified since its enactment and many others are now pending.

To oppose surplus control legislation because it is new and untried is not only illogical but it is a discrimination against farmers because it makes a requirement of them that is not made of other classes when they seek legislation—that is final perfection and guarantee of perfect operation.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The committee informally rose; and Mr. RAMSEYER having assumed the chair as Speaker pro tempore, a message in writing from the President of the United States was presented to the House of Representatives by Mr. Latta, one of his secretaries, who also announced that on February 28, 1928, the President had approved bills of the House of the following titles:

H. R. 5501. An act authorizing the Hermann Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Hermann, Gasconade County, Mo.;

H. R. 5502. An act authorizing the Washington Missouri River Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Washington, Franklin County, Mo.;

H. R. 5722. An act authorizing the Rogers Bros. Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Ashland, Ky.;

H. R. 6639. An act authorizing the Centennial Bridge Co., of Independence, Mo. (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Liberty Landing, Clay County, Mo.;

H. R. 6991. An act authorizing the erection of a nonsectarian chapel at the Army medical center in the District of Columbia, and for other purposes;

H. R. 8106. An act authorizing F. C. Barnhill, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Arrow Rock, Saline County, Mo.; and

H. R. 8107. An act authorizing Frank M. Burruss, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Miami, Saline County, Mo.

AGRICULTURAL APPROPRIATION BILL

The committee resumed its session.

The CHAIRMAN. For the information of the committee the Chair will state that the gentleman from Iowa [Mr. DICKINSON] has used 1 hour and 36 minutes and the gentleman from Texas [Mr. BUCHANAN] has used 2 hours and 16 minutes.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield to the gentleman from West Virginia [Mr. BACHMANN] 15 minutes.

The CHAIRMAN. The gentleman from West Virginia is recognized for 15 minutes.

Mr. BACHMANN. Mr. Chairman, West Virginia is not getting a square deal in the enforcement of the Federal prohibition law, and has not since it has been in the sixth prohibition enforcement unit, attached with 27 counties in the western district of Pennsylvania and 3 counties in Maryland. I have realized this situation for the past year and have given the matter considerable study.

I was much pleased with the ability and character of Federal Prohibition Commissioner J. M. Doran, who is charged with the duty of enforcing the Federal prohibition law. The first conference I had with him convinced me of the fact that he knows what is going on in West Virginia, and I am confident that he will endeavor to correct the situation in so far as he possibly can. Doctor Doran wants efficient prohibition enforcement, and I am of the opinion that he realizes the system used in one State may or may not work satisfactorily in another.

I am not personally acquainted with Mr. John D. Pennington, administrator in charge of the sixth prohibition unit at Pittsburgh, but I understand him to be a very fine gentleman, and what I say here is not intended in any way as a reflection upon him or his ability.

The sixth prohibition unit is composed of the State of West Virginia, containing 55 counties, 27 counties in western Pennsylvania, and 3 counties in Maryland. Headquarters for the unit are maintained at Pittsburgh, Pa.

The total annual appropriation allocated to the sixth prohibition unit is $539,640, of which amount the prohibition administrator at Pittsburgh estimates he is expending approximately $100,000 in West Virginia. In other words, our 55 counties in West Virginia are receiving less than one-fifth of the appropriation, while 27 counties in Pennsylvania and 3 counties of Maryland receive the balance of over $400,000. Personally, I do not believe—in the absence of proof to the contrary—that West Virginia is even getting $100,000 of this appropriation, because the only officials allotted to West Virginia are 2 deputy prohibition administrators, 3 clerks, and 14 agents, making a total of 19 employed, who receive an aggregate salary of $38,000, leaving $62,000 of the appropriation for railroad fares, hotel bills, and other expenses of officials of the Pittsburgh office for traveling over the State of West Virginia endeavoring to become acquainted with the 19 officials stationed in West Virginia, the court officials, and the people generally. Much better use could be made of this $62,000 if, with the other $38,000 allocated for salaries, it could be spent by a West Virginia administrator, owing his allegiance to the Federal Government and the people of the State, free from Pennsylvania domination.

In this connection it might be interesting to note that the counties in the western district of Pennsylvania have in the Pittsburgh office the following employees: One prohibition administrator, 1 assistant administrator, 1 attorney, 2 assistant attorneys, 4 junior attorneys, 52 prohibition agents, 19 prohibition inspectors, 2 investigators, 2 spirits inspectors, 58 clerks, 1 mechanic, 1 laborer, and 1 messenger, totaling 145. One hundred and forty-five employed in the Pittsburgh office to enforce the law in 27 counties in Pennsylvania, who receive an aggregate salary of $278,820. What part the mechanic, laborer, and messenger play in the enforcement of prohibition in western Pennsylvania, I do not know, but they surely are not thought to be of much service in West Virginia. We seem to get along fairly well with 14 agents, 3 clerks, and 2 deputy administrators, and without a mechanic, laborer, and messenger.

In order to understand what progress our State is making as compared with the 27 counties in Pennsylvania, I went to the office of the Attorney General and was startled and surprised to learn that the western district of Pennsylvania does not put into the Federal Treasury, as a result of fines collected, a sum in any measure proportionate to that which it receives. In fact, it does not collect enough in fines to pay the salaries of the 145 employees in the Pittsburgh office. The earnings, in fines, of the western district of Pennsylvania amounted, during the fiscal year 1927, to $169,661, while its employees' salaries amounted to $278,820.

In West Virginia more than $100,000 was collected in fines, and the salaries of the officials and employees amounted to only $38,000. The Pennsylvania district does not turn back one-half of what it spends, while West Virginia turns back into the Treasury more than it receives.

I learned, also, at the Attorney General's office, that for the fiscal year 1927 there were commenced in West Virginia 3,092 prohibition cases; in Pennsylvania, 1,606 cases. There were terminated in West Virginia 2,846 cases and in Pennsylvania 1,307 cases. There were 2,406 convictions in West Virginia and 1,230 in Pennsylvania. There was 1 acquittal in West Virginia and 10 in Pennsylvania. There were 2,395 pleas of guilty in West Virginia and 1,217 in Pennsylvania. The aggregate amount of fines in West Virginia was $142,975, and in Pennsylvania $177,946.

On an appropriation of less than $100,000 (while the western district of Pennsylvania had over $400,000), there were 1,486 more cases commenced in West Virginia than in Pennsylvania. There were 1,539 more cases terminated, 1,176 more convictions, 9 less acquittals, and 1,178 more pleas of guilty. In this connection the Federal court in the southern district of West Virginia, presided over by Judge George W. McClintic, leads every judicial district in the United States in the number of convictions, pleas of guilty, and cases handled during the fiscal year 1927.

It is claimed that some of the employees of the Pittsburgh office are sent into West Virginia, as conditions seem to warrant, to teach West Virginia how to enforce the law in our own State. This is the crux of the evil, for it militates against efficient prohibition enforcement. West Virginians know West Virginia and its people and are more capable of enforcing the law in West Virginia than Pennsylvanians or those from other States. The agents stationed in West Virginia work up their evidence and their cases, acquiring their information from West Virginians, and when they are about ready to raid or arrest, some of the Pennsylvania officials step in and take the credit

duly belonging to the West Virginia agents. This is not only discouraging but hinders proper enforcement.

We West Virginians believe that the prohibition law in West Virginia can be better enforced by taking West Virginia from the dominating influence of western Pennsylvania and placing it in a unit by itself. We do not believe that Pennsylvanians are as capable of enforcing the law in West Virginia as are West Virginians, any more than we believe that West Virginians are as capable of enforcing the law in Pennsylvania as are Pennsylvanians. The problems in both States are different. We have no brewery problems; they do in Pennsylvania. Liquor made in West Virginia is used in West Virginia, and most of the liquor brought into West Virginia comes from Pennsylvania and Maryland. Very little, if any, leaves the State. West Virginia is a mountainous State, and the capturing of stills in the mountains is a dangerous and hazardous undertaking. West Virginians understand these problems.

Everyone who understands the situation or who is charged with the duty of enforcing the prohibition law in West Virginia agrees that West Virginia should be in a unit by itself; that it would be more economical for the Government; that there would be better cooperation and more satisfactory enforcement.

At present the Volstead Act is enforced in West Virginia by the State law. Federal warrants are not used. In practically all cases warrants for search and seizure and for arrest are issued by justices of the peace. Arrests and searches are made under these warrants, and then in a large number of cases information is filed in the Federal courts against those taken into custody under the State warrants. Practically all search and seizures and arrests are made by the State constabulary, in many cases assisted by the county sheriffs and State prohibition officers. It can readily be seen that under this system, to have successful cooperation for the enforcement of the law, Federal officers should at least have considerable acquaintanceship with State officers. Were West Virginia in a unit by itself more harmony would prevail.

I have given this matter considerable study for the past year. I have talked with prohibition agents; I have talked with officials of the Federal courts in both the northern and southern districts of West Virginia. I have a letter from Hon. William E. Baker, judge of the District Court for the Northern District of West Virginia, who says:

> I have observed for some time past that enforcement in the northern district has not been as efficient as it formerly was. * * * It is my personal opinion that should West Virginia be made a separate unit with West Virginians in charge, and rules and regulations prescribed that are applicable to West Virginia—which might not work in Pittsburgh or Pennsylvania—we would have much more satisfactory administration of the prohibition law than we have had in the past year or so.

And a letter from Hon. Arthur Arnold, district attorney for the northern district of West Virginia, who says:

> There has been, is, and will continue to be a prevailing and overwhelming sentiment among West Virginians for the creation of the State of West Virginia as an individual unit in the administration of the national prohibition law. I am strongly in favor of such action, and if the Prohibition Bureau in Washington were at all familiar with the geography and topography of the State of West Virginia and knew West Virginians and understood the situation as we do, the bureau would not hesitate to take this desired step, because of the benefits not only from an administrative standpoint but from the viewpoint of enforcement itself. * * * West Virginians will not be satisfied until it is accomplished.

And a copy of a letter sent by Hon. Russell Furbee, assistant district attorney, to Judge Baker, in which he says, in part:

> When I first assumed the position of assistant United States attorney and for about a year and a half thereafter West Virginia was a separate unit, as you know, and I sincerely say that during that time we had in this district, in my opinion, the most successful Federal prohibition enforcement that we have ever had. I think that you will recall that we had more good cases and a much larger number of prohibition cases than we have had at any time since. It may be that the system that is now in vogue as compared with the system then in vogue is responsible for this difference, but I can not make myself believe that the system could bring such a material difference. I believe that when West Virginia was a unit by itself that the agents had more confidence in each other; there was a greater spirit of cooperation and loyalty to each other than is now in vogue. I believe that they felt more keenly their individual responsibility and were given probably more latitude in working out means for prohibition enforcement. The same trouble with enforcement that was brought out when West Virginia and Virginia were together has not been removed since West Virginia has been attached to Pennsylvania, and I know that every effort has been made to eliminate the same. And I can not help but think that the difficulties encountered now are due primarily to rules and regulations prescribed which would apply in Pennsylvania, but would have very little, if any, application in West Virginia. I say this because I am convinced that the prohibition enforcement problems are different in the two States, and the methods to be used in the two States of necessity must be different.

And a letter from Hon. H. N. Bradley, former assistant prohibition administrator for West Virginia, who said:

> * * * Our citizenship should not be placed in the embarrassing position of being tacked on to the tail of western Pennsylvania nor any other subdivision of a State.
>
> We now have men in the service in West Virginia who have spent years in the service, and have been through the mill of experience with reference to this matter and have weathered the storm, and their character is above reproach. They stand well in their community, have the confidence of and the respect of all good citizens. It is not necessary for me to name them, but in your own city of Wheeling there is one George Heide, who has been in the prohibition department for more than five years, has forgotten more about the enforcement of prohibition than some of the fellows who are over him will ever learn. * * *
>
> To my mind, prohibition can not be enforced successfully unless the men engaged in the service have the confidence and respect of the good citizens of a community in which they are working. We do not confide in men that we do not know, nor give information to agents who are strangers, nor "cast our pearls before swine." To successfully solve this great problem we must have men in the service with tact, rigid honesty, moral stamina, sound judgment; impelled by patriotic motives, familiar with the conditions as they are, and a sincere desire to see West Virginia go forward in this matter in a proper way.
>
> The agents in the service must have as a leader a man in whom they have confidence, one that is in friendly relations with the local authorities in the several subdivisions of the State, a man who is capable of leading rather than driving men, and also, and possibly the most important, he should be a man who will see that all violators are brought to justice on evidence secured in a proper way, so that the United States attorney's office can submit the evidence with confidence to the Federal judges, and the juries composed of men within the State who are to pass on each case and arrive at a verdict according to the evidence produced. This can not be done, in my opinion, by people outside the State who have no particular interest in the peace, welfare, and best interests of the citizenry of the Commonwealth.

And a letter from Judge George W. McClintic, judge of the District Court for the Southern District of West Virginia, who lately called upon Prohibition Commissioner Doran personally and urged the necessity of West Virginia being placed in a separate unit. Judge McClintic says:

> The Federal prohibition department has ceased to function in this district. It is true that they might get their names on a lot of warrants, but they are simply taking other people's thunder and not showing any work of their own. I went to the Prohibition Commissioner with the hope that we could get some West Virginians who understood West Virginia and who were at least able to stand up in the eyes of the public and pass inspection as prohibition officers. * * * I appreciate your good intentions and hope you will be successful.

And I have other letters from prohibition agents, all recommending that West Virginia be placed in a separate unit. Senator GUY D. GOFF and practically the whole of the West Virginia delegation in Congress favor this movement. Senator GOFF wired Doctor Doran as follows:

> I am strongly and earnestly in favor of making West Virginia a separate unit. I am unalterably opposed to tying our State to Pennsylvania. It is impracticable, as the loose enforcement of the prohibition law in many of the larger areas of the State proves. * * * I am governed solely by facts and not in any instance by opinion.

I have no personal interest in this matter, but am moved solely by the fact that I want the great State of West Virginia to have a square deal, and am willing to use every effort to have the State placed in a separate unit for prohibition enforcement, in so far as it is in my power to bring it about. [Applause.]

Mr. BUCHANAN. Mr. Chairman, I yield to the gentleman from North Carolina [Mr. ABERNETHY].

Mr. ABERNETHY. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD relative to radio legislation, and in connection with those remarks I wish to insert an article written by Congressman DAVIS, of Tennessee.

The CHAIRMAN (Mrs. KAHN). The Chair does not think the gentleman can do that in committee; it is in order to do that only when the House is in session.

Mr. ABERNETHY. Very well.

Mr. BUCHANAN. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. HUDSPETH].

Mr. HUDSPETH. Gentlemen of the committee, a friend of mine, a Member of Congress, asked me a short while ago when I was going to make a tour of Europe. He said he had visited some very interesting places over there. I told him that whenever I had completed a tour of the United States, and familiarized myself with my own country, I might then consider making a tour of Europe or going into foreign countries. Some day, gentlemen, I want to visit the great State of Iowa, the home of my friend, the chairman of this subcommittee on agricultural appropriations [Mr. DICKINSON]. I want to see the splendid hogs they raise up there. I want to see where you finish Texas beef, which we some day will and should now finish at home, and then ship it back to Texas to be consumed down there by our producers, after feeding it your splendid Iowa corn I hear so much about. I want to visit the granite hills of the great State of New Hampshire, from whence comes my good friend, Mr. WASON, a valuable member of this subcommittee on agiculture appropriations. Also I would like to visit the great State of Maine, the home of my affable friend BEEDY, and the State of Washington, from whence comes another member of this subcommittee, Congressman SUMMERS, who has aided me in getting agricultural and livestock appropriations. I have never had that pleasure. I was on the edge of Washington at one time, but did not get far across the line. I believe that every man who represents a district in Congress ought to visit every part of this great Republic, and familiarize himself with the needs of all our people—he would be in a position to make a better Congressman. That is my judgment. Gentlemen, I want to be fair to every interest when I cast my vote, and first-hand knowledge enables you to be fair.

Now, let me say, gentlemen of the committee, before I take up the subject which I want to discuss briefly, that I appeared before the subcommittee, which prepared this appropriation bill, twice. The great livestock and agricultural interests of my district asked a great deal in the way of appropriations that would be beneficial in the better production and sale of their products, and the protection of same from pests and disease. I want to say to you, after reading this bill, and I have read it carefully, that in my judgment, not only have the great livestock interests been taken care of to a greater extent than in any other measure I have ever seen come before this House, but the agricultural interests all over this country have been fairly well taken care of. [Applause.]

I want to say that in behalf of this subcommittee, and furthermore I want to say that I never received more courteous treatment than I received from this committee. I trespassed upon the time of this subcommittee longer than I felt their patience should permit in presenting matters affecting the livestock and agricultural interests of my section of the country, but they heard me patiently and exhibited a sympathetic attitude.

Now, as to the minority members—the two Democrats on this committee. The gentleman from Texas [Mr. BUCHANAN] is a very active and able member of this committee, and is a man who has given careful study to the problems of agriculture and the livestock producer. Of course, if you would hear us joke one another, you would think we might be angry, but that never happens. I have known the gentleman for 25 or 30 years. He was up in years when I first knew him and I was a young boy. [Laughter.] I want to say to you that in those days he was an able official, and I say this in all seriousness of my friend BUCHANAN. We have been friends for 25 years, and we will be friends until the eyes of one of us close in death. [Applause.] I want to say this in regard to that gentleman. He was an able district attorney, and has the best record, I believe, of any man who has ever held that position in my State. He prosecuted men whether they were worth millions or came from among the humble class. He prosecuted them if they were guilty, but he did not prosecute innocent men. He was that kind of a just and fair man. He was an able representative in the Texas Legislature, and fought for the interests of the farmer and stockman, as he tries here to represent every part of this great State in these great industries which his committee represents. I have often said, and this is no campaign declaration, that if the people in his district knew him as we know him here, and this applies just as strong to the Republican Members as of his own party, there would never be any opposition to JAMES P. BUCHANAN. [Applause.]

Also my good friend from Louisiana, the Hon. JOHN N. SANDLIN. He has been a distinguished member of the district bench in that great State. He has given great thought to the problems that have come before this subcommittee affecting agriculture and livestock, and his counsel carries great weight with both parties when this bill comes before us for consideration.

Gentlemen, as far as I have been able to ascertain—and I took this bill home and read it last night—I have not very many suggestions to offer. I feel they have done the best they could and stay anywhere close to the Budget estimate. I will say to my good friend from Washington whom I see directly in front of me, Doctor SUMMERS, that you gentlemen deserve the praise of this House in your earnest endeavor to look after all portions of our country in making up your final estimates. I did not get everything I asked for, but I think probably I got everything you could give me without greatly raising the Budget estimate. I feel that, as a matter of justice to this subcommittee, I ought to make that statement.

Mr. DICKINSON of Iowa. Will the gentleman yield?

Mr. HUDSPETH. Yes.

Mr. DICKINSON of Iowa. As far as the chairman of the subcommittee is concerned, and I believe I voice the sentiment of the other members of the subcommittee, the gentleman is always welcome before our committee.

Mr. HUDSPETH. Thank you, sir. I know I have been made to feel that way; not only myself, but I saw dozens of other gentlemen there, from Kansas and from other States, presenting matters that I knew nothing about, such as the Japanese beetle, and so on. Every one of them got a most sympathetic and respectful hearing and were heard with a patience that I have never seen exhibited in many other committees. They were permitted to explain their propositions at great length and were received with the greatest courtesy. They were received with that courtesy which is due from one gentleman to another. I feel that, in justice to these members, I ought to make that statement, because I appeared before the subcommittee probably a greater number of times than most other Members of this House.

I appeared before the subcommittee with regard to the loco weed, a weed which greatly affects livestock in my country. That was something which was new to you gentlemen but was not new to us out in the great livestock section of west Texas. I wanted something done which would enable my people to produce better beef and more beef, and the subcommittee was kind enough to include an appropriation for a survey of the loco weed in order to see what can be done to destroy it finally.

I secured $15,000 for eradicating the blowfly, which produces the screw worm, and $50,000 additional for the grub in the backs of cattle, which damages the hide, which will enable the Federal Government to eradicate same; and a substantial increase for Texas especially, and throughout the country, of the appropriation for the destruction of predatory animals, rodents, and rats that destroy valuable crops.

I feel that a committee which has brought out a bill as fair as this bill appears to me to be ought to be commended by this House.

Now, there is a serious question which confronts my people to-day, or a great many of them. It is the pink bollworm. So far as Texas is concerned, it has only appeared in the district I try to represent here this year and one county in my friend Congressman JONES's district. It is a serious pest. It might destroy the great cotton-producing section of Texas; and this subcommittee has recommended an appropriation of $687,000, if I mistake not, for that purpose, $200,000 made available at once, which I insisted upon to my friend BUCHANAN, and he brought it out, or greatly aided.

Therefore, when this committee brings in an appropriation of $687,000, of which $200,000 is made available at once by the Federal Government, to join with my State to investigate and control this great menace that is now in six counties in my district in the northern part and in two counties in the southern or Big Bend section, it is starting a great work for my farming people, and I thank them.

Now, this does not mean the creation of a noncotton zone. But if any zone is declared, it should be only, in my judgment, and from what information I have received from reliable people in that section, a regulated zone where cotton is permitted to be planted.

If a noncotton zone is declared, there is an erroneous idea in my State in the minds of many people that the Federal Government does pay for all the damage. Heretofore the Government has paid, as I understand it, one-third where they absolutely blot out the planting of cotton in a certain district for five or six years. I am of the opinion that the Federal Government should pay at least half, and in this case, where the State has no funds, and, as our legislature is not in session, and a noncotton zone may be declared by the Texas Pink Bollworm Commission, then our Government, as a just remuneration to our farmers, should at once appropriate sufficient money, immediately available, to pay all loss if a noncotton zone is declared.

I believe in State rights and the good Democratic doctrines of Thomas Jefferson and Andrew Jackson, but our farmers should not be out any portion of their losses for a year. No; not for a day. They are mostly poor people and should be reimbursed immediately, and the only immediate way to reimburse them is through a resolution appropriating sufficient money to meet their losses in noncotton zones, by this Congress. You will understand that the authority to create either a regulated or a noncotton zone is lodged just where it should be, and where it should ever remain, in the Pink Bollworm Commission of Texas. I am opposed to the Federal Government, or any of its agencies, ever being vested with such authority. The State of Texas should never relinquish any such authority to the Federal Government. But the other precedents have been that the Federal Government has paid one-third and the State two-thirds. This can only be done by a decree of the State pink bollworm commission, created by the Legislature of Texas and appointed by Governor Moody; that is, the creation of zones. Then the Federal Government comes along and necessarily ratifies that action.

Lots of my people have wired me to have the Federal Government not to create a noncotton zone. The Federal Government does not create any zones at all. The only way they might protect the people of another State is to establish what you might call a quarantine. If the State did not regulate it, if the State did not declare a noncotton zone, the Government could decree that no cotton should be shipped out of Texas if the pink bollworm was thought to be such a menace to other cotton-growing sections. The only way they could come near to creating a zone is to declare a quarantine around my State, they tell me, if the State failed to take necessary action.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. HUDSPETH. Gentlemen, I thank you and this committee for the great consideration shown my people. [Applause.]

FURTHER MESSAGE FROM THE SENATE

The committee informally rose; and Mr. RAMSEYER having assumed the Chair as Speaker pro tempore, a message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed without amendment a bill and joint resolution of the following titles:

H. R. 10298. An act to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near New Orleans, La.; and

H. J. Res. 223. Joint resolution making an additional appropriation for the eradication or control of the pink bollworm of cotton.

The message also announced that the Senate insists upon its amendments to the bill (H. R. 10286) entitled "An act making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1929, and for other purposes," disagreed to by the House of Representatives, and agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. REED of Pennsylvania, Mr. JONES, Mr. WARREN, Mr. HARRIS, and Mr. FLETCHER to be the conferees on the part of the Senate.

AGRICULTURAL APPROPRIATION BILL

The committee resumed its session.

Mr. BUCHANAN. Mr. Chairman, I am going to yield myself one-half minute to make this statement. There are 20 Members on this side of the House who have requested time and have as yet not been accommodated. The number of minutes requested ranges from 10 minutes to 1 hour. I want to state to them here and now that it will be impossible and an injustice to those who have not been accommodated to grant any extensions of time to those who are accommodated in the future. Therefore I hope that no man will ask for an extension of time at my hands because if he does, he will not get it.

I yield 30 minutes to the gentleman from New York [Mr. CELLER].

Mr. CELLER. Mr. Chairman and gentlemen of the committee, the Committee on the Merchant Marine and Fisheries yesterday afternoon filed a report on a bill which would have the effect of amending the radio act of 1927. This act in general provided that all radio service must be equitably distributed and allocated to the various five zones into which the country is divided. The division has been on the basis of service.

Some of the Members of the House, finding fault with that manner and type of division, have influenced the committee to formulate a new doctrine of division, so that in the language of the reported bill, section 9 of the radio act of 1927—

shall be amended by striking out the second paragraph and inserting in lieu thereof the following:

"The licensing authority shall make an equal allocation to each of the five zones established in section 2 of this act of broadcasting licenses, of wave lengths, and of station power, and within each zone shall make a fair and equitable allocation among the different States thereof in proportion to population and area."

In other words, they seek to divide the country, not along the lines of service but that the division shall be along the lines of station power and stations. We might term this amending clause the "equal-license clause."

Radio, gentlemen of the committee, affects intimately the lives of some 30,000,000 people of this country. Probably one-fourth of all the families in the United States listen at some time or other to radio broadcasting programs. So you see the matter is of considerable consequence, and it is important that the men and women of this committee should know exactly the nature of this amendment.

There are 680 stations. The number of stations varies from day to day in pursuance of changes made by the Radio Commission. One hundred and twenty-six of these stations split time—that is, they split the same wave lengths. Five hundred and fifty-four of them operate simultaneously. So that in the main we might say there are 554 stations operating at one given moment in the United States.

The chairman of the Committee on the Merchant Marine and Fisheries, Mr. WHITE of Maine, in his report on page 3, says there are 701 stations. Mr. DAVIS, the gentleman from Tennessee, also indicated the other day there were 701 stations. Their figures are not accurate. At this writing I am informed by the Radio Commission that there is a total of but 680 radio stations. Deducting therefrom the number of stations that split time and wave length there are actually but 554 stations. Both Mr. WHITE and Mr. DAVIS have allowed this error to creep into their figures and their conclusions must therefore necessarily be askew.

Now, how are these 554 stations divided, or how were they divided and allocated by the Radio Commission which has been functioning for just one year?

In the first zone, which takes in the New England States and the eastern seaboard with a population of about 23,000,000, there are 95 stations with station power of 202,400 watts.

The second zone, which takes in the States of Michigan, Ohio, West Virginia, Kentucky, Pennsylvania, and so forth, with a population of about 24,000,000, has 93 stations, and a station power wattage of 103,700.

The third zone, which takes in practically all the Southern States, has a population of about 25,000,000, and has 88 stations with a wattage station power of 45,570.

The fourth zone, which takes in such States as Illinois, Indiana, Missouri, Iowa, Minnesota, North and South Dakota, Kansas, with a population of about 25,000,000, has 166 stations and a station power wattage of 139,000.

The fifth zone, which takes in the Pacific coast, has a population of a little over 9,000,000, with 112 stations and a wattage station power of 60,620.

Herewith find a table which indicates the zones, stations, and power:

Zones	Average population	Number of stations	Power in watts
First	23,000,000	95	202,400
Second	24,000,000	93	103,700
Third	25,000,000	88	45,570
Fourth	25,000,000	166	139,000
Fifth	9,213,920	112	60,620
Total	105,000,000	554	551,000

I was curious to discover how the stations were divided in terms of Congressmen and Senators, figuring 435 Congressmen and 96 Senators. The following table is interesting:

	Power per Member of Congress	Station per Member of Congress
Zone 1	1,771	0.833
Zone 2	942	.863
Zone 3	367	.710
Zone 4	1,123	1.340
Zone 5	1,010	1.900
Zone average	1,041	1.045

It will be noticed that there is approximately one station for every Representative and Senator. See how close the average is between zones 1, 2, and 3.

Now, complaint has been registered in the House that zone 3, the southern zone, did not receive a fair deal at the hands of the Radio Commission. Members claim that they have the largest number of people living in that zone, and they have the least number of stations.

There may be some just cause of complaint on the part of the South, but know this, my good friends, radio is a new art, or a new science, if you wish. Not very much has been discovered with reference to it—much remains to be discovered in this art or science and it would not be well to tether or circumscribe it with too rigid legislation. We must give it an opportunity to spread, an opportunity to develop. We should not be guided by the adoption of some mathematical formula that stations shall be equally divided, because you know and I know and those of us who use the radio know that stations like WEAF and WOR and KDKA may be heard all over the United States, and that WJZ in the State of New Jersey can be heard in every nook and corner of any hamlet of the United States, in the Virgin Islands, and in Porto Rico and has actually been heard in every continent on the globe. It matters not where a station may be. It is where it is heard that counts. It is the service it renders that matters. So we must not use mere figures or numbers to determine what shall or what shall not be the policy. Merely dividing the country equally as to stations will not help us. We must allow the question to be solved by the best engineering talent.

But I fear the Committee on the Merchant Marine has not followed that procedure; they have been interested too much in figures or mathematics. They have lost sight of the fact that the business at hand is of a highly technical nature. Too much sectional politics has crept into the discussion.

Now, the committee in its amendment provided that there shall be this equal distribution—equal numerical distribution—as though the stations throughout the country were a sort of pie with one-fifth of the pie to be given to each of the five zones.

There are three methods of procedure open to the Radio Commission if you pass this amendment:

First. Increase the power and stations of the lowest zone to the maximum.

Second. Equalize the stations and power of all zones, but do this gradually over a period of time.

Third. Reduce all zones to the minimum.

The amendment in question forces you to adopt the third method. There is no choice as we shall see. Let us examine the first suggested method; that is, to scale up those zones which are insufficient in power and stations to the maximum.

You would bring up zone 3 with 88 stations and the station power of about 45,000 watts; bring it up to the station power, say, of zone 1, New England, New York, and so forth, with a station power over 200,000 watts and 95 stations. Radio engineers tell us that you can not do that; to do that would make confusion worse confounded, because the radio spectrum would become blurred as it were, or, to use another figure, the bucket is overflowing. We have too many stations already and we can not add to them, or rather add to the number of wave lengths, without causing a great deal of havoc and confusion.

Then again if you adopt that policy of lifting up the lower-power zones to the higher-power zones it does not follow that the radio broadcasting owners in the South would willingly make application for higher power or more stations. You can not force them to come up to the standards that exist in other zones. So that method of procedure fails. Then, from the scientific standpoint, it is quite impossible.

What is the second method of procedure? It is a gradual equalization in order to give some sort of satisfaction to the Members of this House from the South and from some of the other complaining zones—although I must say at this moment I believe most of the complaints have come from the Members from the Southern States and not elsewhere—I would create an equalization, but would do it gradually, not with one fell swoop, not suddenly, as you require it to be done by this proposed amendment. The amendment uses mandatory language. Those of you who are familiar with the interpretation of statutes and the construction of various acts know that where the word "shall" is used—and you use the word "shall" in this amendment—those who are in authority to enforce the act must act. They have no discretion. It is their duty mandatorily to put into effect the provisions of the act. In this amendment you do not give them time. You say that it must be done, and since the amendment will go into effect immediately, then this so-called leveling process would have to go into effect immediately. I say that that is wrong. You could easily do it within a proper time, and if a proper amendment were brought forward I would willingly support it. I am told that of the 554 simultaneous stations—that is, stations operating at one given time—300 can be taken off the air "for cause." When I say "for cause" I mean for legal cause, because the radio act provides that proceedings may be instituted against stations which offend against the radio act of 1927 or which offend against the rules and regulations laid down by the Radio Commission. Numbers of those 300 stations have been guilty of "jumping" their wave lengths, and others have been guilty of failing to abide by orders of the commission, which confines their broadcasting to certain periods of time.

As a result of the disobedience of the mandates and orders of the commission, some 300 of these stations can be taken off the air. Then what would follow? There is the opportunity to the men from the South. They could insist, and rightly so, that those stations and the station power inherent in them be given to zone 3, and then without any undue disturbance, with all fairness and justice, there would be brought about a just and equitable distribution of stations.

The third procedure, which is the procedure of this amendment, is that there would be a scaling down to the lowest level. There is no other alternative left. All of the other zones which have preponderance of stations would have to come down to the level of zone 3, and there would have to be taken from zone 1 a number of stations to make an equal distribution and division between the southern zone and the north and western zones.

Mr. McKEOWN. Mr. Chairman, will the gentleman yield?

Mr. CELLER. Yes.

Mr. McKEOWN. I wish the gentleman would explain to this House why the other zones would have to come down to the third zone. The first zone, in which the city of New York is located, is one of the small zones, so far as area is concerned, and has a population of 24,000,000 people, approximately. It is allowed 193,000 watts power, whereas the southern zone, with a large area, with more population, has only 45,000 watt power, and the zone in Pittsburgh and Philadelphia, with 40,000 less population than the first zone, are granted barely more than half the power of the first zone. Why would it be necessary to bring those down?

Mr. CELLER. With all due respect to the gentleman's observation, I believe that he has an improper slant on this whole problem. Let us take zone 1 and zone 3. The gentleman resides in zone 3 and I reside in zone 1. I have taken the trouble the last few days to determine the radio population, not the population in general, but the radio population in zone 3 and zone 1. The southern zone has, shall we say, 30 per cent negro population. It may be more. Does not that have an effect on the situation? Comparatively few of the negroes in the gentleman's State have radio sets, and you can not bunch the colored population together with the white population and base your demands upon the combined total. The gentleman knows that the negro in the South is the victim of great poverty and is unable to purchase radio sets. It is quite improper to use general population as a standard. The test is, what is the radio population?

Mr. McKEOWN. Will the gentleman give the committee information as to what per cent of the people own radio sets, as compared with the North, and also will the gentleman tell the House in counting radio population the difference between an unfortunate negro population who do not have many receiving sets, and a lot of foreign population that can not understand the English language?

Mr. CELLER. Oh, that is beside the point.

Mr. SCHAFER. Can not they understand music?

Mr. CELLER. I will answer the gentleman from Oklahoma, however, and say this: I shall be very glad to put into the RECORD the number of people who listen and have receiving sets in the various States of zone 3, and compare that with the number of people who listen and have receiving sets in zone 1. I shall not take the trouble to read the individual States, but I will give you the total. The actual radio population in zone 3, the gentleman's zone, is 1,037,950, and the actual radio population in zone 1 is 1,444,000.

Receiving sets, January 1, 1927

ZONE 3	
Texas	277,550
Oklahoma	100,750
Arkansas	52,000
Louisiana	83,200
Mississippi	49,400
Alabama	68,250
Tennessee	97,500
Georgia	91,750
North Carolina	91,550
South Carolina	48,100
Florida	77,900
	1,037,950

ZONE 1 (EXCLUSIVE OF PORTO RICO AND VIRGIN ISLANDS)	
New York	655,850
New Jersey	193,700
Maryland	81,900
Delaware	13,650
District of Columbia	42,900
Connecticut	79,950
Rhode Island	43,550
Massachusetts	239,200
Vermont	21,550
New Hampshire	27,650
Maine	44,200
	1,444,100

In rough figures the radio population of zone 1 is just under 50 per cent greater than the radio population of the gentleman's zone, while the said zone 1 has less than 10 per cent more stations than zone 3. That is, zone 3 has 88 stations and zone 1 has 98 stations. Zone 1, with a little less than 50 per cent more population, should have a little less than 50 per cent more stations.

When it comes to station power the amount of watts allotted to zone 3 is insufficient, but who is to blame for that? The South has not petitioned for high-powered stations as has the North. Had such requests been received I do not believe the Radio Commission would have discriminated against the South.

I will also say this: I made direct inquiry of the Radio Commission, and I discovered this, that zone 3 had actually received 12 new stations during the past year, and zone 1 has not received any except one at Saranac Lake, for the veterans in the veterans' hospital, and even then that station was for a very limited period, from 10 o'clock to 12 o'clock in the morning, with a very low power. So that you see the Radio Commission, after all, has been trying to deal out even-handed justice, not only in the gentleman's State, but in mine. It has refused hundreds of applications in the North and the West, and has actually granted 12 applications for new stations in the gentleman's zone.

Mr. McKEOWN. Mr. Chairman, will the gentleman yield there?

Mr. CELLER. In a moment. The complaint has been made that the farmers are the ones who are suffering from this alleged unfair allocation of stations. I have gone to the trouble to see how the farmers actually fare in the gentleman's State and in the other neighboring Southern States, and I find that comparatively very few farmers have radio sets or listen in on the radio.

Let me read some very significant figures in reference thereto. These figures are as of date January 1, 1927. I tried to get figures to date, but I could not get them. In Alabama there are two hundred and thirty-seven thousand and odd farms, and in that large number of farms we find only some 6,000 radios. Ninety-seven per cent of the farmers of Alabama have no radios. Only 3 per cent of the farmers of that State have radios.

Take Arkansas as another example. Only 7 per cent of the farms have radios. In Florida only 3 per cent of the farms have radios. In Louisiana only 2 per cent have radios. In Mississippi only 1 per cent; in North Carolina, 3 per cent; in South Carolina, 4 per cent; in Tennessee, 4 per cent; in Texas, 8 per cent. The above comprise the States of zone 3. These figures show the reason why there are fewer stations in the South. The station owners only go where there is business; where there are listeners; where there is a demand for the broadcasting of programs.

Now, what is the situation in reference to the farmers in my State? Be it known that we have a great many farmers in New York and in the other States included in zone 1. Forty-two per cent of the farmers in New York have radios; 25 per cent of the farmers in Connecticut have radios; 22 per cent of the farmers in Maryland have radios; 75 per cent of the farmers in Massachusetts have radios; 41 per cent of the farmers in New Hampshire; 52 per cent of the farmers in New Jersey; 64 per cent of the farmers in Rhode Island; 32 per cent of the farmers in Vermont.

Now, what is the situation with reference to the farm population in zone 5, that zone being along the Pacific coast? I am just giving these interesting comparative figures. We find in Arizona 17 per cent of the farmers have radios. We find that in California 34 per cent of the farmers have radios. We find that in Colorado 42 per cent of the farmers have radios. In Idaho, 25 per cent; in Montana, 40 per cent; in Oregon, 34 per cent; in Utah, 7 per cent; in Washington, 28 per cent; in New Mexico, 4 per cent.

In other words, complaint is made that the farmers have not been receiving proper radio consideration in zone 3. But there are comparatively few farmers that have radio sets there, and so, surely, that argument vanishes into thin air.

Mr. McKEOWN. Will the gentleman yield there?

Mr. CELLER. Yes.

Mr. McKEOWN. On what authority does the gentleman give his figures?

Mr. CELLER. I am reading from a volume by a radio engineer, Edgar H. Felix, a member of the Institute of Radio Engineers and contributing editor of the magazine called Radio Broadcast.

Mr. McKEOWN. Does the gentleman contend that when one station in his zone alone has 5,000 more watts than all the stations that he speaks about and which have been licensed in the South—does the gentleman think that is quite fair, in view of the fact that the more area you have, the more power you need, and the more congested the population, the less power you need?

Mr. CELLER. With respect to those stations in New York and those in New Jersey and Illinois, of which the gentleman speaks, the owners thereof were willing to take their chances in 1920 and 1921, but the men in the South, the business men in the South and in other States, were afraid to take the chance. Now, these men having come into the field in the early days of radio, and having spent vast sums of money in the development of radio and in the erection of all these broadcasting stations, equipped with the most delicate and intricate kind of machinery, and having furnished the funds for all sorts of engineering talent for the development of their stations and the promotion of the science and art in general, they are entitled to the advantage. The gentleman from Oklahoma is a good enough lawyer to know this also, that no matter what you do in this House, you can not take away their vested rights, try as you will. Those stations having been in existence since 1921, 1922, and 1923, they have a right to continue. Their owners were the pathfinders. They blazed the trail. They are entitled to their gains.

I say this also, as I said before: There is some justification for the gentleman's complaint, and there is a remedy, but you have selected an improper remedy. You ask that this be done immediately at one fell swoop, and you would force the Radio Commission with mandatory language.

I would have you do it this way: When a station violates the law or a rule or regulation, take that license away. You have a right to do so; and then give those stations and power to your State and the other complaining States.

I will say to the gentlemen from New Jersey—and I would like them to listen if they are in the room, and the gentlemen also from Massachusetts, and Ohio, and Illinois, and Washington, and California—hearken well at the attempt to cut down your stations. Let me read to you what is going to happen in your States if this amendment goes through.

I am sure you will hear from your constituents if you vote for this amendment, and I am informed, gentlemen, that an attempt may be made on the next Monday suspension day to pass this bill under suspension of the rules without any semblance of debate.

Here are the cuts in number and power of broadcast stations imposed by equal license clause:

	Power (watts)		Number of stations	
	Present	Proposed	Present	Proposed
New Jersey	49,000	3,200	25	7
New York	119,000	11,000	67	20
Massachusetts	19,000	3,750	18	2
Pennsylvania	57,000	12,000	33	24
Ohio	23,000	8,000	25	18
Illinois	55,000	8,000	70	15
New Mexico	5,050	2,200	3	4
Washington	10,700	2,200	19	4
California	26,000	9,000	50	17

Mr. McKEOWN. Will the gentleman yield?

Mr. CELLER. Yes.

Mr. McKEOWN. I am interested in the gentleman's statement that these pioneer builders have acquired vested rights in the air of this country. The gentleman is the first man who has had the courage to come and tell us here in Congress that that was the contention of these pioneer constructors, that they have prior rights in the air; but the gentleman will admit that if his pioneer stations should be entitled to 50,000 watts, which is 5,000 watts more than all of the stations in zone 3, that is no reason why you should still retain 193,000 watts as against Pennsylvania, West Virginia, Kentucky, and Ohio, where they have only half the watt power that you have in your zone.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. CELLER. May I have additional time in which to answer the gentleman?

Mr. SANDLIN. The gentleman heard the statement of the gentleman who has charge of the time on this side, and in view of that statement I would not feel warranted in yielding further time.

Mr. CELLER. I am sorry I have not the time to answer the gentleman.

Under leave to extend my remarks I offer the following: Commissioner Caldwell, of the Radio Commission, a very able radio engineer, has pointed out that the amendment in question

imposing equal powers and wave lengths would require the reduction of all zones to the level of the least favored. He says:

Since the southern zone (third) has only 45,000 watts total power, this figure would also become the limit of power for the important first zone, which includes New Jersey, the Eastern States, and New England.

Of this 45,000 watts total first-zone power, New Jersey, e. g., would be entitled to its "equitable" proportion under the clause, presumably based upon its population and area. New Jersey has one-eighth of the population and one-twentieth of the area of the first zone. Striking an average between these fractions, we obtain one-fourteenth. One-fourteenth of 45,000 watts is 3,200 watts.

Thus, 3,200 watts would, under the proposed redistribution of the radio-station powers, be the total power available for the entire State of New Jersey, which now has nearly 50,000 watts.

With 3,200 watts available for all 17 stations in New Jersey, several alternatives are offered.

(A) All New Jersey stations might be closed down except the two which undoubtedly have the largest audiences, WJZ and WOR. These stations, with powers and investments, respectively, of, WJZ 30,000 watts, $500,000, and WOR 5,000 watts, $175,000, could then be continued to serve the public; but with their powers cut to, say, 2,600 watts and 600 watts, respectively. So we would have:

	Watts
WJZ	2,600
WOR	600

All other stations closed down.

B. Or if it is assumed that the clause indicates that New Jersey must have its equitable proportion of the total number of stations per zone (which is 93), one-fourteenth of 93 gives, say, 7 stations for your State. Power of 3,200 watts among the present 7 largest stations in New Jersey could then be divided proportionately as follows:

	Watts
WJZ	1,920
WOR	320
WFG	320
WLWL	320
WODA	65
WGL	65
WHAP	65

All other stations closed down.

Similarly, in New York State WEAF and WGY would have to be cut to 5,000 watts each, WNYC to 50 watts, WHN to 50 watts, and so on.

Corresponding calculations can be performed for other States, showing the havoc to radio listeners, East, South, and North, which such a law would bring, for these New York and New Jersey stations furnish programs to the whole country, and particularly to the South.

Much criticism has been heaped upon the Radio Commission and Commissioner Caldwell particularly, and the latter has said some intemperate things about Congress, but when we consider how shabbily Congress has treated the commission, one can not blame Caldwell too much for his becoming impatient and supersensitive. Congress has hamstrung the commission. It appropriated no funds so that the commission could operate, employ experts, or purchase necessary stationery and apparatus. To date, three commissioners have received no salary whatsoever. Three of them are yet to be confirmed by the Senate. These commissioners feel the uncertainty of their tenure. The permanency of their appointment hangs by a thread. No wonder there has been difficulty in fixing a policy. Their path was made all the more difficult by the death of Colonel Dillon in October and Admiral Bullard in November. Added to that, Bellows resigned in November. The present board consists of Caldwell, an engineer; Pickard, newspaper man; Lafount, business man; and Sykes, a lawyer, who is chairman. A fifth man is yet to be appointed by the President. Is not Congress to blame for some of this muddle?

If the amendment goes into effect one third of the radio sets in this country would be rendered useless. One-third of the 7,000,000 sets now in use would be sent to the junk pile by this new provision. Mr. Baker, of the National Association of Broadcasters, says:

Surveying the stations as they are now located, in the terms of this provision, indicates that the commission would have to scale down the power and readjust the allocations in such a way that the highest powered station in the country could utilize only 1,000 watts, meaning that the largest dependable service area of any station would be a radius of between 50 and 75 miles, and this would not be entirely dependable.

The committee entirely disregards the fact that approximately one-third of the receiving sets in use in the United States to-day are located beyond a 50-mile radius from any station. Accordingly, under the terms of this provision, fully one-third of the listeners could obtain dependable service from no radio station in existence to-day.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield 20 minutes to the gentleman from Washington [Mr. SUMMERS].

Mr. SUMMERS of Washington. Mr. Chairman, your committee reports the Agricultural appropriation bill after more than 120 hours of hearings during which 1,300 pages of testimony were taken. The index lists 550 witnesses, and special subjects considered—as a matter of fact literally thousands of items in behalf of agriculture were considered. The bill carries $132,308,849.88, of which $71,000,000 is for Federal-aid roads and $6,500,000 for national-forest roads and trails. To this may be added $11,010,500 permanent annual appropriation, making a grand total of $143,319,349.88.

The scope of the work done by the department in behalf of producers and consumers of farm products comprises many exceedingly interesting and instructive chapters of scientific and economic endeavor. Time will not permit every Member to consider all of this material. Therefore from this wealth of data I have selected what I believe will give a comprehensive understanding of the bill and the activities of the department.

It is easy to criticize when some bureau does not meet with our approval, but I want to say the value of the Department of Agriculture to this country is beyond appraisal or estimate.

In addition to its own several buildings the department has under lease 22 buildings or parts of buildings in this city. The rentals run from $35,000 down to $360 for an alley structure. Total rentals are $175,300. The department employs 4,831 persons here in the District and 16,871 outside the District of Columbia, a total of 21,702 civil-service employees. A very large number but small in comparison with 308,740 in the Post Office Department; 51,532 in the Treasury; 42,292 in the War Department; 43,425 in the Navy Department; and even less than the Veterans' Bureau, which employs 23,696.

The activities of the department extend around the earth, as my remarks will show, and into the forests and orchards and fields and gardens and herds and into the earth and in the air and into every kitchen in the United States.

Insular experiment stations $246,400

Agricultural experiment stations are maintained at Sitka, Kodiak, Matanuska, and Fairbanks in Alaska. The principal function of these stations is the development of a type of agriculture suited to the respective regions.

Small fruit and vegetable experiments, animal husbandry, grain and forage crops, root crops, stock breeding, dairying, and general farming are studied at the various stations.

The Hawaii station is endeavoring to diversify the agriculture of the Hawaiian Islands without disturbing the major agricultural activities—sugar production and pineapple growing. The station also is supervising boys' and girls' club work on all the islands.

The Porto Rico station is directed to the development and diversification of agriculture in general.

The Guam station is endeavoring to develop a type of tropical agriculture suited to the island of Guam and its people.

At the Virgin Islands station the principal investigations in progress are designed to diversify the agriculture of the islands and develop it along new lines. The principal agricultural industries of the islands at this time are sugar production and stock raising, and the station is giving attention to the problems of plant and animal breeding for the improvement of present stocks. Experiments are in progress for the improvement of corn and for restoring Sea Island cotton production to its former importance.

Farmers' cooperative demonstrations $1,462,640

This appropriation is available for salaries of employees of the Department of Agriculture with headquarters in Washington, general office expenses, and for cooperation with State agricultural colleges in carrying on extension work in agriculture and home economics in all its phases through the payment of field salaries of county agricultural agents, county home demonstration agents, club workers, farm management demonstrators, and the necessary supervising officers located in the various States.

Cooperative agricultural extension work $1,300,000

These funds supplement the permanent annual appropriation of $4,580,000 provided under the Smith-Lever Act of May 8, 1914, paid direct to the State colleges of agriculture as Federal aid for the promotion of extension work in agriculture and home economics. Programs of work and expenditures under Federal Smith-Lever funds are supervised by the Department of Agriculture.

Agricultural exhibits at fairs $103,300

This appropriation covers the preparation and display of agricultural exhibits at State and interstate fairs and expositions. Several million people are reached annually through agricultural exhibits which are designed to instruct as to better practices and encourage their adoption and to present the results of the

department's research and other activities in an interesting and effective way.

Cooperative farm forestry $60,000

This appropriation is utilized in the cooperative employment of extension foresters in the various States who are engaged in carrying out the work specified under section 5 of the Clarke-McNary reforestation act, and provides specifically for assisting owners of farms in establishing, improving, and renewing wood lots, shelter belts, windbreaks, and other valuable forest growth, and in growing and renewing useful timber crops.

Weather Bureau $2,705,000

Provision is made for continuing during 1929 the maintenance of a radio broadcasting station at Washington, D. C., in the aid of aviation and for employees in Washington engaged upon the scientific meteorological, climatological, river and flood, marine, and solar radiation work of the bureau.

Provision is made for the maintenance of the field stations of the Weather Bureau. One hundred and ninety-six of these are regular stations—that is, stations manned by commissioned personnel, and 1,965 are substations, the observers at which are paid wages ranging from 25 cents per observation to $40 per month.

Horticultural protection $31,500

The field activities in the investigational, observational, and forecast work in the protection of horticulture is of great service to horticultural interests, principally in California, Washington, Oregon, and New York. The employees paid from the appropriation travel almost continuously during certain periods of the year and by means of intensive observational and forecast work enable fruit growers and others to protect their fruit culture from frost by means of smudges, and so forth, to conduct extensive spraying of trees at a propitious time, and to harvest crops with the least danger of loss as a result of adverse meteorological conditions.

Aerology $266,500

These funds provide for activities both in the field and at Washington, D. C., in connection with the protection of air navigation and the aid of general forecasting by means of the study and observations of the upper air. The work in the field is conducted by means of kite flights and theodolite observations on free balloons. Self-recording instruments on the kites give a record of temperature, pressure, humidity, wind velocity, and other meteorological data. Observations on free balloons show the velocity and depth of air currents.

BUREAU OF ANIMAL INDUSTRY

Inspection and quarantine of livestock $732,300

Work done under this head includes the eradication of scabies in sheep and cattle, the States most heavily infected with sheep scabies being Arizona, New Mexico, Wyoming, California, Texas, Colorado, South Dakota, Oregon, and Nebraska, and those chiefly involved with cattle scabies being Nebraska, Texas, Montana, South Dakota, Colorado, Kansas, Wyoming, and New Mexico; the supervision of interstate transportation of livestock at stockyards, involving the inspection of millions of animals, dipping where necessary, and the cleaning of thousands of cars; and the inspection of animals offered for import, maintenance of quarantine stations, supervision of importation of hides, hay, straw, and so forth, inspection of animals for export, and of vessels carrying such animals.

Mr. O'CONNELL. Will the gentleman yield?

Mr. SUMMERS of Washington. Yes.

Mr. O'CONNELL. The gentleman is making a most interesting address. I am very much interested in it, and I would like to ask whether the gentleman can insert approximately how much has been appropriated this year for the Bureau of Animal Industry?

Mr. SUMMERS of Washington. I have not before me the totals for the Bureau of Animal Industry, but I have them for the different activities of the bureau. In the report the gentleman will find the total given.

Mr. O'CONNELL. It is a very important branch of the department.

Tuberculosis eradication $5,736,310

Mr. SUMMERS of Washington. The object of this work is to arrest the spread of tuberculosis among livestock through campaigns for the control and eradication of this disease, in cooperation with State agencies. This appropriation represents the contribution of the Federal Government in the shape of indemnities for animals slaughtered and in the general supervision of the work. The movement was started as a Federal-aid proposition, and the States look to the Federal Government for leadership. Contributions by the States toward the prosecution of the eradication campaigns amount to approximately $11,000,000 per annum. Of the 58,000,000 cattle in the United States 19,000,000 were tested or under observation during 1927.

Eradicating cattle ticks $719,200

This appropriation is used cooperatively for the payment of salaries and travel and office expenses of veterinarians and agents in Virginia, North Carolina, South Carolina, Georgia, Alabama, Florida, Mississippi, Louisiana, Arkansas, and Texas, engaged in the eradication of the southern cattle tick, which spreads splenetic fever among cattle. As counties are cleared up they are released from Federal quarantine, and their livestock may then be shipped north without restriction. The States generally are contributing larger sums to this work than the appropriations provided by the Federal Government. The work is done under State law and regulation, Federal money being expended for supervision, to insure that all measures of eradication are so carried out as to warrant the release of cleaned areas from quarantine.

Animal husbandry investigations $510,200

Activities under this paragraph include: (1) Studies of problems in sheep and goat production, breeding, and management. The work is done principally at Beltsville, Md., Middlebury, Vt., Miles City, Mont., McNeill, Miss., Newell, S. Dak., and at the sheep station in Idaho. Laboratory studies on wool are also under way. (2) Studies of problems relating to cost of production, grazing, feeding, wintering, fattening, and breeding of beef cattle are conducted in West Virginia, Texas, and several other States. (3) Swine feeding and breeding investigations are also carried on under this appropriation. (4) Poultry studies under way, chiefly at Beltsville, include work on inbreeding, the influence of thyroid in the ration on feather growth as connected with molt, on inheritance of egg production and egg hatchability, egg shape as a determining factor in sex, and value of vegetable proteins as food for poultry as contrasted with proteins from animal sources in relation to improved egg production. (5) Other work under this item includes studies of horse breeding, feeding, and management chiefly at Middlebury, Vt., and in Wyoming, genetic and nutrition research performed at the animal husbandry farm at Beltsville, Md.

Diseases of animals $266,140

The general investigational work relating to animal diseases is done under this appropriation. Some of the more important problems now being studied are contagious abortion, including field and laboratory work at Bethesda, Md., and here in Washington; stock poisoning by plants, including summer studies in the Rocky Mountain region and laboratory work in Washington; round worms and other intestinal parasites of sheep at McNeill, Miss.; internal parasites of hogs, and the development of the McLean County, Ill., system of sanitation at Moultrie, Ga.; studies of anthelmintics and mange mites; miscellaneous pathological and biological studies. The pathological experiment station at Bethesda, Md., is maintained under this item.

Eradicating hog cholera $463,070

Hog cholera control work is now carried on cooperatively with 32 States. In carrying out the control work, Bureau of Animal Industry veterinarians stationed in cooperating States investigate reported outbreaks, make autopsies to diagnose the disease, hold demonstrations of the serum treatment, train laymen to administer this treatment in sections where there are no veterinarians, give advice on disinfection, and address meetings of farmers on the subject of hog cholera and its control; in short, keep in close touch with conditions and render expert aid on the spot.

This item also provides for the enforcement of the virus-serum toxin act. This work requires the inspection in 60 cities of 91 establishments producing anti-hog cholera serum, hog-cholera virus, aggressins, bacterins, vaccines, and so forth. All animals offered are closely inspected, and all operations supervised to insure the production of effective protective remedies.

Hog-cholera research work which resulted in the discovery of the serum now used to combat cholera, is now directed to perfect the method of immunization, first by cheapening it, and second by obviating failures that now occur at certain times.

Eradicating dourine $27,800

Dourine, a syphilitic disease of horses, is found now in Arizona and South Dakota, almost entirely on the Indian reservations. In combating the disease the Office of Indian Affairs takes samples of blood of suspected horses, and these samples are sent to the laboratories of the Bureau of Animal Industry for testing. The results of such tests are reported back to the Indian Office, and horses which show presence of the disease are slaughtered, and the owners indemnified by the Indian Office. The Bureau of Animal Industry also investigates reported cases of dourine outside of the Indian reservation.

Enforcement of the packers and stockyards act $410,000

The packers and stockyards act is designed to prevent and correct irregularities or abuses that may exist in the operations of persons engaged in the livestock and meat-packing industry. Unfair, unjustly discriminatory, or deceptive practices, the control of prices, or the establishment or monopolies in connection with the buying or selling of livestock in commerce, and the handling of meat or meat products in commerce are defined as violations. Provision is made for supervision of rates and charges of stockyard owners and market agencies at public markets. The act requires that rates and charges shall be reasonable and nondiscriminatory. The Secretary of Agriculture may fix such rates and charges.

Meat inspection $2,218,400

This fund, together with a permanent annual appropriation of $3,000,000, is used for the purpose of enforcing the provisions of the meat inspection act. This law requires that all meat or meat food products transported interstate or abroad be inspected by the Federal Government.

Eradication of foot-and-mouth and other contagious diseases of animals $100

It is well understood that the sum specified would be utterly inadequate to meet the expenses of any outbreak of foot-and-mouth disease. In each case Congress has provided sufficient funds in special enactments in deficiency acts. The present item provides that where an emergency exists which threatens the livestock industry the Secretary of Agriculture may make expenditures from any unexpended balances of appropriations heretofore made by Congress for foot-and-mouth disease.

Several outbreaks of foot-and-mouth disease have occurred in this country. It is the policy of the department to employ the promptest and most strenuous measures to stamp out the disease the moment it appears in order to guard the immense livestock interests of the country from tremendous losses.

Dairy investigations $452,000

Under this appropriation scientific investigations of the fundamentals of the dairy industry are conducted. These investigations embrace (a) the breeding, nutrition, and management of dairy cattle, with a view to increasing the average milk and butterfat production of dairy cows through the application of scientific and economical methods; (b) market milk investigations involving research in sanitary methods for improving city milk supplies, studies of the relative efficiency of different types of dairy machinery, the relative efficiency and economy of various methods of sterilizing dairy utensils on the farm and in milk plants, efficiency of milk-plant operation, transportation of milk, and studies of factors affecting the commercial value of milk and cream, such as the effect of various feeds on the flavor and odor of milk, viscosity of cream, foaming of milk, and so forth; (c) laboratory investigations of problems concerned in the manufacture and utilization of dairy products and by-products, such, for instance, as the manufacture of Swiss and other so-called foreign cheeses, investigations of the bacteriological and chemical problems of milk, as grading milk for manufacturing purposes, the taxonomy and physiology of the casein-digesting bacteria of milk, and factors which affect the lactic-acid fermentation, condensing and evaporation investigations to ascertain the causes of coagulation of evaporated milk in sterilization, manufacture of milk powders, including methods of making skim-milk powder especially adapted for bread making, the improvement of the keeping quality of milk powder, the effective utilization of skim milk through the manufacture of poultry feeds, the discovery of processes for the manufacture of other by-products such as the separation of the protein from whey in soluble form, and such investigations of bacteriological and other problems in the manufacture of ice cream; and (d) investigations of dairy manufacturing problems on a commercial scale, the introduction into new territories of improved processes for the manufacture of butter, cheese, and other dairy products and by-products; investigations of methods for increasing milk and butterfat production of dairy cattle through dairy herd improvement and bull associations; the introduction of such methods as are found most efficient; inspection of renovated butter factories; and the supervision of the packing of butter for the United States Navy.

BUREAU OF PLANT INDUSTRY

Pathological laboratory $114,440

The problem dealt with in this laboratory involves laboratory, greenhouse, and field experiments with bacterial and fungous diseases and the various field and garden crops and ornamentals.

The plant-disease survey project covers the study and recording of the geographical distribution, prevalence, and rate of spread of plant diseases in the United States, and estimates of losses caused by plant diseases.

The mycology project covers the collection, preservation, and identification of all plant parasites and other fungi having relation to injury or destruction of economic plants and plant products. Investigations in mushroom culture are also carried on.

Fruit diseases $174,400

The work under this paragraph includes the investigation of diseases of fruits and fruit trees, including citrus and subtropical fruits, grapes and small fruits, the fruit rots and decays, and the diseases of the pecan and other nut diseases. Experiments are conducted on a large scale in the control of fruit diseases by spraying, by disinfection, by eradication, and by other methods.

Citrus canker eradication $40,000

The Bureau of Plant Industry, in cooperation with the Gulf States, is conducting a campaign for the eradication of citrus canker, a bacterial disease of citrus fruits and trees, by the thorough inspection of nurseries and citrus groves, formalin treatment of infected soil, protective spraying of groves exposed to infection, and destruction of diseased trees. As a result of the vigorous campaign, the disease has been practically eliminated, but scattered infections still occur sporadically.

Forest pathology $150,000

The work done under this paragraph consists of investigations of such diseases of forest and shade trees as are of serious economic importance, with a view to the control of these diseases. Examples of diseases under investigation are the white-pine blister rust, the chestnut blight, the heart rot of Douglas fir, and of many other tree diseases.

Blister rust control $445,020

Under this item cooperative programs are conducted for the suppression and control of white-pine blister rust. Control programs in the eastern and western United States are being prosecuted jointly by the department and the responsible State agencies in the affected States.

Vegetable and forage diseases $200,500

Investigations are carried on dealing with diseases affecting potatoes, vegetables, forage, and other crops, including incidental work on cotton and ornamentals, to determine their cause, the conditions of temperature, humidity, and so forth, under which they develop, the localities where they are most serious, the losses incurred, the methods of disease transmission from plant to plant and field to field, the means of overwintering, and, finally, to develop control measures for the various troubles. Investigations are also carried on in cooperation with the Bureau of Agricultural Economics in connection with the transit, marketing, and storage of vegetables, to determine the cause of the trouble encountered, and whether they originate in the field or after shipment.

Crop physiology and breeding $90,160

The following work is conducted hereunder: Citrus breeding, undertaken primarily to secure new oranges, lemons, and similar fruits equal in quality to the standard sorts now grown commercially in the United States, but possessing a greater degree of resistance to cold and disease; date culture and breeding, with the object of establishing commercial date culture in the United States; incidental breeding work on dates to create new varieties especially suited to American conditions; and Smyrna-fig culture and breeding work.

Plant nutrition $16,780

Plant-nutrition investigations deal with the growth, development, and composition of plants as affected by the length of day, the influence of certain crops on other crops following in the rotation, the plant-food elements, and the relative plant-food requirements of crops commonly grown in rotation. The work is carried on with the same personnel as the tobacco investigations.

Cotton, rubber, and other tropical plants $255,800

The work under this item is directed chiefly to acclimatization and adaptation in the southern and southwestern United States of varieties of cotton, corn, and other crop plants of tropical origin; the breeding of superior varieties of cotton and the improvement of cotton-culture methods under boll-weevil conditions; and investigations of rubber-producing possibilities in the United States, Philippine Islands, West Indies, Canal Zone, and elsewhere in tropical America.

Work in hard-fiber production is carried on in the Philippine Islands and Porto Rico, flax in Michigan and Oregon, and hemp in Wisconsin and Kentucky.

Drug and other plants $58,200

Scientific studies are made of the methods of producing, drying, and preserving crude botanical drug crops which may be grown in this country, such as safflower, hemp, and perilla, the oils from which are a satisfactory supplement to linseed oil. Work is also in progress on the introduction and establishment of essential oil crops, the products from which are extensively used by the manufacturers of perfumes and medicinal preparations. The successful introduction of the Japanese mint plant, from which the commercial supply of menthol is obtained, is a conspicuous example.

Nematology $54,340

These investigations deal primarily with the study of minute eel-worms or nemas, certain species of which infest the roots of important crop plants and seriously injure them. Some species of nemas are found to be beneficial, destroying insects or other species of injurious nemas.

Seed laboratory $70,000

Samples of seeds submitted by farmers, seedsmen, and others are tested to determine the proportion of pure seeds present, the kinds and proportion of weed seeds present, and the germination of the pure seed. In enforcing the Federal seed act, samples of all shipments of seeds subject to the act are drawn by customs officials at the time of entry. These samples are examined to determine whether or not they comply with the requirements of the Federal seed act. Each year collaborators are appointed who collect from seed dealers samples of various commercial seeds. These are examined for the presence of adulterations, and purchases based on these samples are made through the collaborators. The analyses of the purchase lots which are found to be adulterated or misbranded, together with the names of the dealers from whom purchased are published. This form of publicity has eliminated in a large way the sale of adulterated or misbranded forage-crop seeds in the United States.

Cereal crops and diseases $745,000

Cereal investigations cover methods of production, methods of improvement, and methods of control of the diseases of wheat, rye, emmer, spelt, oats, barley, rice, corn, grain sorghums, broomcorn, proso millet, seed flax, and buckwheat; also the eradication of the common barberry, an intermediate host of the wheat rust. The 13 States interested in spring-wheat production are cooperating to eradicate the common barberry throughout this area as a means of controlling epidemics of black stem rust of wheat. Since the cooperative campaign began in 1918, the States have aided the Federal Government in financing the work; in the fiscal year 1927 the 13 States contributed $88,197 and the Federal allotment was $375,000.

Tobacco investigations $60,000

Tobacco investigations include all phases of growing, curing, and handling tobacco, with the exception of tobacco insects and their control. The work consists of observations on the growing plant and technical examination of leaf tobacco produced under specially controlled conditions. The aim is to determine the relation of the chemical composition to the quality of leaf tobacco, the causes of poor burning qualities, relation of the nutrition of the plant to the aroma, color, and other important characteristics, factors controlling the nicotine content, the causes of parasitic and nutritional diseases, the specific effects of each of the nutrient elements on the development of the plant, and the nature of the processes of ripening, curing, and fermentation.

Alkali and drought-resistant crops $23,920

Under this appropriation studies are made to ascertain the adaptability of various crop plants to alkali soils and to soils having a limited water content and to determine the physiological effects of alkali and of drought upon the growth of plants. An important phase of the investigational work is the development of a type of long-staple cotton thoroughly adapted to irrigated land in Arizona and California.

Sugar plants $196,000

Projects under this item consist of a study of the diseases of sugar beet, sugar cane, and sorgo; collection of data on distribution of the diseases; by determination of the nature and amount of losses due to such diseases, laboratory investigations of the biological aspects of the diseases; and the application of control measures determined by field and laboratory experiments. Improvement of the desirable properties of sugar beet, sugar cane, and sorgo, such as increased tonnage and sugar content, resistance to diseases and adaptability to new conditions, are brought about by foreign exploration for new varieties and breeding with stock so obtained.

Botany $47,780

The work carried on under this item includes the identification of plants for the various bureaus and branches of the department and for other organizations and individuals doing similar work. For this work of identification the office maintains an authentically named collection of cultivated plants, and for wild plants it uses the National Herbarium. The domestication and improvement of one of our wild fruits, the blueberry, has been undertaken. These investigations have developed the fact that many wild plants supposed to be difficult or impossible of cultivation can be grown readily if given the types of soil they require.

Dry-land agriculture $208,050

The office of dry-land agriculture was organized in 1905 for the purpose of investigating the problems of the agricultural development of the Great Plains area. This area includes all of Montana, North and South Dakota, Nebraska, Wyoming, Colorado, Kansas, Oklahoma, Texas, and New Mexico lying between the 5,000-foot contour on the eastern slope of the Rocky Mountains and the ninety-eighth meridian of longitude. All this region is classed as semiarid. The normal annual precipitation ranges from as low as 10 inches to as high as 30 inches, by far the larger portion of it, however, having from 12 to 15 inches. The conservation of moisture is the all-important major problem of the agriculture of this entire region. This project can be subdivided into a very large number of minor problems, such as depth and manner of plowing, tillage after plowing for preparation of seed-bed, intertillage between rows during growth of rowed crops, alternate cropping, and so forth.

Western irrigation agriculture $142,095

The object of this appropriation is to investigate agricultural conditions and determine by field studies and experiments in crops, rotations, and cropping methods best suited to successful farming in the arid and semiarid regions of the western United States, and, in cooperation with the Reclamation Bureau of the Department of the Interior and the various State experiment stations interested, to work out methods of improving these conditions.

Nut culture $44,040

These investigations are devoted to a study of the important commercial nut crops of the United States, including almonds, walnuts, and filberts on the Pacific coast, and pecans and other native nuts of the South and the eastern part of the United States. Special studies are being conducted in connection with almonds and walnuts in California and pecans in the South Atlantic and Gulf States.

Pomology $240,000

Fourteen thousand three hundred and forty dollars will be expended for investigations in removing arsenical spray residues and to study the keeping quality of fruits treated for removing arsenical spray residues. The effect of the washing treatment and the incomplete drying upon the keeping quality of apples is of greatest importance, as the preliminary tests indicate the danger of serious rot epidemics. There is great need for experimental work on the use of disinfectants with the wash water and of extensive storage experiments on treated apples.

The work also includes investigations of the production of grapes, deciduous small fruits, citrus, and other orchard fruits and their improvement by breeding or by methods of culture, together with investigations upon improvements in utilization, either by canning, drying, or other forms of preservation, and the behavior of these fruits in transit and in storage. A portion of the transportation studies are carried on in cooperation with the Interstate Commerce Commission.

Gardens and grounds $89,500

This appropriation provides for the maintenance of a range of 32 greenhouses, at which is carried on the following work: The inspection and fumigation of plants; the propagation of blueberries and evergreen shrubs; general hybridization work; seed testing; experimental work with citrus and other tropical fruits; propagation of plants for ornamenting the grounds of the department and those of the Weather Bureau; the growing of a collection of grapevines for miscellaneous experimental work; experimental work with alfalfa, clover, cowpeas, and beans; experimental work with florists' crops, including roses, carnations, and chrysanthemums; producing and growing a collection of hybrid amaryllis bulbs; plant-breeding work; and pathological work of the Bureau of Plant Industry.

Horticulture $140,000

Under this paragraph investigations are conducted on the production, handling, and breeding of potatoes and other truck crops, and on the behavior of these perishable products, with

especial reference to shrinkage and deterioration in storage and in transit. A portion of the transportation studies are carried on in cooperation with the Interstate Commerce Commission.

Nursery stock investigations $21,800

These funds are used for studies relating to the production and uses of fruit trees and ornamental stock under American conditions, to provide the needs of American nurseries. The investigations include apple, pear, peach, plum, and citrus stocks propagated from seed, as well as through vegetative means.

Arlington Farm $57,000

Arlington Farm, Virginia, is used for the maintenance of the facilities required to make the farm a suitable field laboratory for the investigational units of the department in Washington.

Foreign plant introduction $190,000

Foreign agricultural exploration work for the purpose of assembling promising varieties of fruits, vegetables, or other plants for testing in different regions of the United States has been carried on in various parts of the world. Extensive correspondence is carried on with cooperators, botanic gardens, nurserymen, and others in all parts of the world for exchange of new plant material. The new varieties are held under quarantine observation for a sufficient period and later are distributed to cooperators, State experiment stations, and others able to carry on satisfactory tests.

Forage crops $142,500

Ten thousand dollars for expansion work with soy beans and miscellaneous legumes and grasses and of winter cover crops in the South.

Within the past decade the soy-bean acreage has increased from 500,000 to 2,500,000 acres, and new uses for the crop are being constantly developed. The varieties are so numerous and the possibilities of breeding varieties more suitable for oil or for some other quality so great that these trials must be extended rather than curtailed. There is no reason why varieties suitable for forage or for the production of oil, oil meal, or human food should not be developed for most parts of the United States. It is hardly necessary to enlarge on the opportunities waiting for work with velvet beans, cowpeas, Brazilian peanuts, pigeon peas, and other legumes of that type.

Under this appropriation field studies are conducted at field stations throughout the United States, and cooperative relations are maintained with nearly all of the State experiment stations and the insular experiment stations, pertaining to the production and improvement of all crop plants used for forage either as hay, fodder, silage, or pasture; and, incidentally, of all plants used for green manuring, turf production, and soil binding. Among the more important groups of plants concerned in these investigations are the grasses, clovers, alfalfa, sorghums, millets, soy beans, field peas, velvet beans, vetches, melilots, cacti, and lespedezas.

Biophysical laboratory $35,812

Under this item the bureau is charged with the investigation of the physical laws involved in the growth and reproduction of plants. Viewing the growth and reproduction of plants from this angle, investigation of more urgent problems that involve the response of agricultural plants to heat, light, moisture, electric currents, and the chemical composition of the soil are undertaken.

Mr. O'CONNELL. Will the gentleman yield?

Mr. SUMMERS of Washington. Yes; I yield.

Mr. O'CONNELL. Where are those soy-bean locations?

Mr. SUMMERS of Washington. They are grown throughout the United States, as far as I am informed. They are grown in the Mississippi Valley, some out in the far West, and I believe in the far East. This crop was almost unknown in this country a few years ago, but it is now grown in the sections mentioned and in the South.

FOREST SERVICE

Protection and administration of the national forests $6,344,000

During the calendar year 1926 fire destroyed over a billion feet of timber on 596,000 acres of Government land on the national forests. A careful estimate places the damage at over $4,500,000. The public is becoming intolerant of such losses on these vast public properties upon which industry is steadily becoming more dependent for its supply of raw material. The sum of $2,464,808 was expended for fighting fires on the national forests in the season of 1926, and all but a small part of this sum was required to fight fires which should have been checked while small, or prevented altogether had the bureau been properly equipped.

Fighting forest fires, aerial fire control, land classification, sanitation, and fire-prevention equipment and supplies, range investigations, planting on national forests, forest resources, improvements on national forests, distribution of forest planting stock, and many other items, some of which I shall discuss, come under this general head.

The national forests are not fully appreciated by the people of the whole country, and sometimes I think not wholly appreciated by the Members of Congress.

Mr. O'CONNELL. I would say to the gentleman that I have been in most of them and I appreciate them.

Mr. SUMMERS of Washington. They do not belong to any section of the country. They belong to all of the people of the United States. In many of the States from 25 to 75 per cent of the lands are in national forests and public lands, and therefore not on the tax rolls. If on the tax rolls, they would pay $14,000,000 annual taxes to the States. It becomes rather burdensome for some of the States to conduct all of the activities of the State, because of this large area of national forests and public lands lying within them. So it is not always an advantage to have these national forests in a State, because no tax returns come from them and often it is necessary for the State to build the roads leading up to them in order that they may be utilized and sometimes to do a great deal of the work through them; and still we have a pretty hard struggle to get out of the Federal Treasury anything like a reasonable amount of funds for the proper care and protection of these forests. The timber which is lost by reason of forest fires belongs to your State just the same as it does to mine. Not very much of it is in my district, although much of it is in the Rocky Mountains and the Western States. The public is becoming intolerant of these great losses of timber, much of which could be prevented if we had proper fire protection and if we had the necessary roads leading up to and into the forests, so that when a fire is first discovered it could be combated while small.

It is a very sad sight to see a great forest fire licking up and destroying within a few hours timber that has required from three hundred to a thousand years to grow. Such destruction should not be permitted to continue, but it will continue till we have roads and trails by which we may more readily reach the conflagration.

Forest products investigations $505,000

The bulk of forest products research is done at the Forest Products Laboratory, Madison, Wis., where there is a staff of trained foresters, engineers, and chemists equipped with laboratories and other facilities. These specialists are constantly engaged in the laboratory, at industrial plants, and in the forest in experimenting on and studying the best ways to use wood, with the major object, of reducing waste of timber and prolonging our forest supplies, and also of increasing the value of timber and thus encouraging its growth as a crop. The Forest Service is therefore attempting to insure adequate timber supplies for our national needs by (1) growing timber on the national forest and encouraging timber growing on privately-owned lands, and (2) through forest products research, encouraging a less wasteful use of our present timber supply and that to be grown in the future.

A few examples will illustrate the work. The laboratory has developed practical means of making paper from species hitherto unused for that purpose, thus tending to reduce the great pressure on our spruce and aspen supplies. It has made a nation-wide study of lumber grading and developed the basic foundation for standard lumber grades recently adopted by the lumber and wood using industries. It has developed methods of kiln-drying lumber that are greatly reducing waste from poor seasoning of wood. It has developed box and crate making into a science that not only saves wood but a vast loss of commodities in shipment. Besides these and many other similar projects which have immediate importance and application, the laboratory has done a great deal of fundamental research on the chemical and physical nature of wood, this work being of basic importance in developing new uses for wood.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield the gentleman five additional minutes.

Mr. SUMMERS of Washington. I know of a paper-pulp mill costing a couple of millions of dollars, and that is but one unit of three or four units that are to follow, which is utilizing waste material from a big sawmill, that would otherwise be burned. For 75 years this waste has been burned, but through the work of the forest-products laboratory, supplemented by private funds to the extent of about $100,000, a new method has been devised by which they use a variety of wood which grows in great quantities in the West. In the past they have not been able to use this wood, because of the resin it contains. Here is a waste product salvaged, which I should say is worth

many millions of dollars every year, and thereby the forests are conserved.

Mr. BLACK of New York. Will the gentleman yield?

Mr. SUMMERS of Washington. I yield.

Mr. BLACK of New York. I understand that for years they have been using this by-product as a binder on State roads. They have been using it in New York State for 10 years anyway.

Mr. SUMMERS of Washington. What particular product does the gentleman refer to?

Mr. BLACK of New York. The by-products of a pulp mill, to which, as I understand, the gentleman was referring.

Mr. SUMMERS of Washington. No; I was referring to the by-products of a sawmill that uses Douglas fir, a material that they had not been able to use for paper making previously.

Silvical investigations $354,000

The Department of Agriculture several years ago adopted a program of establishing 11 regional forest experiment stations. The funds under this appropriation are used for the upkeep of these stations. Each station has a staff of trained foresters, who study the forests of their region to ascertain how to control the forest-fire evil, make current logging practices less destructive, cut old timber so a new crop will start naturally, or, if natural reproduction fails, determine what trees are best to plant and how to plant them, how much timber different kinds of forest land can produce; in short, how best to grow timber crops.

Forest-fire cooperation $1,100,000

Of the total of $1,000,000 available for work in 1928, under the first three sections of the Clarke-McNary reforestation act, $950,000 is used for cooperating with the States in the prevention and suppression of fire on forest lands in State and private ownership. Thirty-six of the 39 timber-producing States now receive cooperation of this nature. The Federal fund is allotted to the States on the basis of the estimated cost of protecting State and private forest lands, and on the basis of a budget prepared in accordance with an agreement with each State. Federal expenditure is made in the form of reimbursement to the State for the Government's pro rata share of expenditures incurred on the basis of the budget submitted. The expenditure of funds and the results secured are carefully inspected in every cooperating State. The cooperation is not continued unless reasonable standards are attained.

Timber-taxation studies: Under authority of the Clarke-McNary law the department expends in the neighborhood of $50,000 yearly for a nation-wide study of forest taxation. The general property tax is difficult of application to forests, because trees require many years to reach maturity, and recurrent annual taxes on growing timber without corresponding annual returns from which to pay the taxes are a discouragement to reforestation. The study aims to determine just how heavily forests are now taxed as compared with other forms of property, the effect of present tax methods on reforestation, and possible modification in tax methods to insure fairness both to the timberland owner and to the local communities dependent on tax revenues. The study is in charge of a tax expert, aided by a small staff of economists and foresters, and involves field studies of tax records, tax methods, values of forest properties, sources of local revenue, and constitutional and legal constrictions on forest-tax reform.

Cooperative distribution of forest-planting stock $75,000

This $75,000 is provided for conducting work under section 4 of the Clarke-McNary law and is allotted to 36 States. These allotments are made primarily for the establishment of new nurseries, the enlargement of existing nurseries, and the purchases of seed, all in connection with the distribution of forest-planting stock for use on farms. As in forest-fire cooperation, the States make the original disbursements and claim reimbursement for the Government's pro rata share of the expenditures incurred. Total State budgets for the current fiscal year amount to $325,000.

Under this item the work is being carried on under the bill put through this House by the gentleman from New York [Mr. CLARKE] a few years ago. Reforestation is going on throughout the country and I think the House should know that provision is being made, and will continue to be made, to replenish our forests as provided in that bill, and also to protect them as is provided in another provision of the same bill.

Mr. CLARKE. May I interrupt the gentleman a moment?

Mr. SUMMERS of Washington. Yes.

Mr. CLARKE. I hope a little later to-day or to-morrow to present to the House the story of the great reforestation movement that has gone on and to show how under the leadership of the Clarke-McNary bill, 41 States are cooperating in this wonderful, forward-looking enterprise.

Mr. SUMMERS of Washington. Many of the undertakings of the Department of Agriculture read like romance. It is the most interesting work I have been engaged in during the almost 10 years I have been in Congress. I appreciate my position as a member of the committee that prepares the agricultural appropriation bill. It is a pleasure to serve under the genial leadership of Mr. DICKINSON of Iowa, and with Mr. BUCHANAN, ranking Democratic member, who has been connected with agricultural legislation and appropriations for many, many years, and with Mr. WASON of New Hampshire and Mr. SANDLIN of Louisiana, who with myself, constitute the committee. We work congenially. Our hearings, as I have said, have been very extensive, but they have been interesting and have brought out the real work that is being done in behalf of the people by this department of the Government.

Mr. LOWREY. Will the gentleman yield a moment?

Mr. SUMMERS of Washington. I yield to the gentleman from Mississippi.

Mr. LOWREY. I want to express my appreciation for this wonderfully interesting and informing speech and to say that I hope the gentleman will have many copies of it published and I want to pay for my share of them to send to the farmers in my district. I am sure other Members will be glad to do the same thing. The gentleman has given us some very valuable information.

Mr. SUMMERS of Washington. I may say to the gentleman from Mississippi that while I have made this address very comprehensive, and I have thought perhaps too comprehensive, it is the only way I could give a picture of what is being done. I have not had in mind having any copies printed because it is a rather lengthy speech, but that can be done, of course, if there is a demand.

Acquisition of additional forest lands $1,000,000

This appropriation is used to carry out the policy established by Congress through the enactment of the act of March 1, 1911 (36 Stat. 961), and confirmed and extended by the act of June 7, 1924 (43 Stat. 653). Under the first act 22 purchase areas (now consolidated into 18) have been established, of which 48 per cent of the purchasable area, 2,835,601 acres, has been acquired or approved for acquisition to date at a total cost of $14,007,775.91, exclusive of administrative costs of purchase. The completion of purchases within these areas, with the possible addition of two or three other areas needed to round out the system, will cost approximately $25,000,000. Under the second act, two purchase areas have been established, one in Michigan and one in Minnesota, within which the area purchased or approved for acquisition to date is 57,140 acres valued at $57,484.96. Three other areas in the Lake States are in readiness for presentation to the National Forest Reservation Commission for approval, and the entire program in the Lake States under the act of June 7, 1924, contemplates the acquisition of a total of 2,500,000 acres of land at an estimated cost of $6,250,000.

Payments to States and Territories from the national forests fund $1,285,000

Twenty-five per cent of all money received from each national forest during any fiscal year is paid at the end thereof by the Secretary of the Treasury to the State or Territory in which the national forest is situated, to be expended as the State or Territorial legislature may prescribe for the benefit of the public schools and public roads of the county or counties in which the national forest is situated. When any national forest is in more than one State or Territory or county, the distributive share to each from the proceeds of the forest is proportionate to its area therein.

Cooperative work, Forest Service $1,500,000

All moneys received as contributions toward cooperative work in forest investigations, or the protection and improvement of the national forests, including deposits received from timber purchasers to cover the cost to the United States of disposing of brush and other débris resulting from cutting operations in sales of national forest timber, are covered into the Treasury and constitute a special fund, which is appropriated and made available until expended as the Secretary of Agriculture may direct, for the payment of the expenses of the investigations, protection, or improvements by the Forest Service, and for refunds to the contributors of amounts paid in by them in excess of their share of the cost of the investigations, protection, or improvements. Annual report is required to be made to Congress of all moneys received as contributions for such cooperative work.

Roads and trails for States, national forests fund $530,000

An additional 10 per cent of all moneys received from national forests during each fiscal year is available at the end thereof, to be expended by the Secretary of Agriculture for

the construction and maintenance of roads and trails within the national forests in the States from which such proceeds are derived.

BUREAU OF CHEMISTRY AND SOILS

Agricultural chemical investigations $246,000

It is proposed to investigate the needs of domestic cane growers, particularly in Louisiana.

A study of the causes of the deterioration of foods will be made. Large economic losses are caused after the harvesting of the raw products, during transportation, and after their transformation into manufactured food products.

Increased funds are needed for the study, development, and application of equipment and processes for taking off and curing hides and skins. The work contemplated on hides and skins is a continuation and expansion of the bureau's part in the broad program of research on the conservation of hides and skins already initiated by the department, and carries the indorsement of numerous organizations of those engaged in farming, cattle raising, dairying, and other agricultural pursuits, and of the hide and leather industries. The bureau's part in the program deals with the elimination of an estimated annual loss of $20,000,000 in raw materials, which arises from improper skinning and curing.

Increased funds are provided for extending fundamental investigations on the chemical properties and utilization of lignin. Lignin constitutes about one-third of the dry material of straw, corncobs, cornstalks, and other similar farm waste. Its chemical utilization is one of the most important problems confronting the agricultural industries at the present time. Among the possible industrial uses for lignin already developed by the bureau may be mentioned its use in the manufacture of tanning materials, dye intermediates, varnishes, lacquers, and organic chemicals.

Under this appropriation basic scientific research in agricultural chemistry is carried on, and the results of such research are applied to the solution of problems involved in the production, preservation, and profitable utilization of farm crops. Studies are made with a view to increasing the protein content of wheat and other grains, thus enhancing both nutritive and market values. The chemical composition of a great variety of feedstuffs is determined with especial reference to the nutritionally essential amino acids, in order to furnish practical feeders with information that will enable them to make the most economical combinations of available feedstuffs. Studies are made of the vegetable oils in order that they may be more profitably utilized. Methods for manufacturing marketable products from cull and surplus fruits and vegetables are developed. Improvements are made in processes for manufacturing paper and for tanning leather. Carbohydrate investigations are conducted. Studies are made of the physiological effects of foods and drugs on the human organism. Investigations are directed toward finding the causes and reducing the losses from deterioration and spontaneous combustion in grains and other farm crops.

Color investigations $72,921

Experiments to develop processes for the manufacture of fast dyes in order to make this country independent of any foreign country are carried on under this appropriation. American manufacturers now produce vat dyes of brilliant color and lasting quality as the result of processes developed in this work for making cheaply and of remarkable purity phthalit anhydride, one of the essential dye intermediates, which formerly could be obtained only in Germany. More than 300 dyes, chemicals, and drugs can be manufactured from this one intermediate. More than 20 other processes have also been worked out. Work is done on dyes used as biological stains in identifying the various microorganisms that produce disease. Without stains of known composition, disease producing bacteria can not certainly be identified.

The CHAIRMAN. The time of the gentleman from Washington has again expired.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield the gentleman five additional minutes.

Mr. SUMMERS of Washington. For instance, they are finding that out of cornstalks and wheat straw and that sort of thing they are able to make permanent dyes. They are also able to make out of these waste materials the mouthpiece and other parts for telephones and material of that kind. This is a very valuable work that I doubt if any of us appreciate unless we dig into these extensive hearings or unless you should have the patience to follow through the remarks I am making, which, after all, are taken largely from the 1,300 pages of hearings to which I have referred.

Sirup and sugar investigations $35,234

This work has for its object the development of improved methods for the manufacture of cane, sorghum, maple, and other table sirups and their application in the industries. Chemical problems relating to the maximum yield of sugar from cane and from beets are investigated in order to assist manufacturers of domestic sugar to increase their yield and also to bring larger returns to the growers of cane and of sugar beets.

Insecticide and fungicide investigation $44,800

Of this, $10,000 will be used for continuation during 1929 of work on insecticides and fungicides to meet the excess spray residue situation, which is emergent.

Under this item chemical problems relating to the composition, manufacture, action, and application of insecticides and fungicides are investigated. The object of the work is to develop chemical compounds for the more effective control of insects and fungi which are cheaper and better than those in general use in order to reduce the enormous losses that occur from these causes in the growing of crops. This work is carried on in cooperation with the Bureau of Entomology and Plant Industry.

Plant-dust explosions and farm fires $42,743

Ten thousand dollars will be used for the study of farm fire prevention.

The annual fire loss in the United States is approximately $570,000,000, and it has been estimated that $150,000,000 is due to losses on farms and in rural communities. These figures do not take into consideration the losses due to the deterioration and spoilage of farm products, which is closely related to the spontaneous-combustion phenomenon. It has been estimated that about 3,500 lives are lost annually as a result of farm fires.

Investigations are made of the causes of the destructive dust explosions that occur in flour mills, grain elevators, threshers, and other manufacturing plants where plant dusts are generated, and methods are developed for preventing such explosions. The research work of the bureau has been practically confined to the dust-explosion hazards in the grain-handling industry which have caused extensive losses of life and property. Records of approximately 270 dust explosions in plants in the United States and foreign countries have been obtained. In 66 of these explosions 444 lives were lost, and in 83 of them 780 people were injured. The total money loss in 132 explosions was approximately $32,917,000, an average of more than $250,000 for every explosion. The bureau is conducting special research investigations to determine the causes of these explosions and the circumstances favorable to their origin. More than 21,000 establishments in various industries in the United States, manufacturing products with an annual value in excess of $6,779,449,000, are subject to the dust-explosion hazard. The bureau investigations have shown that extensive losses have also been experienced from dust explosions and fires in grain-threshing machines, particularly in the Pacific Northwest, and from cotton-gin fires in the Southwest.

Fertilizer investigations $290,000

The fertilizer industry is on the verge of producing ammonia for fertilizer purposes. It is essential that this be converted into a diversification of nitrogen compounds for agricultural use. Among these are urea, nitrates, and organic ammoniates. The fundamental work on these problems must be intensified. The successful solution of these problems will be of material benefit to the farmer.

The most conspicuous constituent of the modern complete fertilizer being soluble phosphate, it is highly desirable that this ingredient be made obtainable in some more desirable form than the present low-grade acid phosphate. Intensified research must be expanded to obtain this fertilizer essential in more concentrated forms. Potash, for which the farmer is still largely dependent on Europe, should be obtained from the large American sources already surveyed. A chemical investigation of these raw materials is essential. Many other fundamental fertilizer studies are under way.

Soil survey investigations $253,000

This work comprises the surveying, mapping, and classifying of the soils of important areas in different parts of the country. The purpose is to acquire a knowledge of the soils and construct a soil map of the United States for use of those interested in the development of agriculture. The soil survey determines what the soils are, where they are, the predominating types, and how much there is of each kind, furnishing a fundamental basis on which to establish experiments and to interpret results.

Soil microbiology ---------- $40,840

Experiments with pure cultures of legume bacteria are carried on throughout the United States. Commercial cultures for legume inoculation are inspected for the purpose of determining those of inferior quality. Rotation experiments are conducted in the field and in the greenhouses at the Arlington Farm to determine whether the nitrogen balance of the soil can be maintained without using chemical fertilizers.

Soil fertility investigations ---------- $126,850

The work comprises a fundamental study of the biochemical relationships existing between plants, soils, and fertilizers and is carried on through field experiments and laboratory and greenhouse studies. It includes the testing of many fertilizer ratios or formulas in order to ascertain the ratio best suited for profitable crop production in particular regions. Comparative values of the various nitrogen carriers, and phosphate carriers as used in commercial fertilizers are under investigation in order to ascertain the particular carriers best suited for any specific crop or soil.

The Bureau of Soils points out to us that soil erosion takes twenty times as much fertility from the soil every year as the growing of crops, and still this is a matter that up to this time has had only haphazard or very little consideration. Some counties contain very large areas which have been cut into gullies and made wholly useless now, and perhaps for all time to come, whereas such erosions could have been prevented had proper attention been given and proper emphasis laid on this work at an earlier date.

BUREAU OF ENTOMOLOGY

Deciduous-fruit insects ---------- $319,500

The work being carried out with the funds available under this appropriation consists of life history studies on and the development of means of control for insects attacking such deciduous fruits as apple, plum, peach, and so forth, as well as those injurious to grapes, nuts, blueberries, and so forth. It provides for investigations on such well-known pests as the codling moth, apple maggot, plum curculio, peach-tree borer, grape leaf hopper, pecan weevil, and so forth. It also includes investigations conducted to determine means of artificial control other than application of arsenical sprays or dusts. It provides for large-scale experiments in orchards and vineyards to determine the best and most economical means of controlling, with different insecticides, injurious insects. It includes the research of the Japanese and Asiatic beetles. These investigations involve experiments to determine means of preventing spread of these pests; the development of artificial natural means of controlling them. The results of these investigations are published in the form of bulletins, circulars, and leaflets, and are distributed to interested growers and others.

Tropical, subtropical, and ornamental plant insects ---------- $113,000

The investigations carried on under this appropriation include studies on the biology of insects injurious to tropical, subtropical, and ornamental plants and the development of means for their control.

The results of these investigations are of service to the citrus industry, the date industry, the bulb industry, the florists, and to nurseries and companies dealing with landscaping ornamentals.

Truck-crop insects ---------- $228,090

The work done under this appropriation includes life history studies on and the development of means of control of insects attacking truck and garden crops, such as peas, beans, spinach, turnips, potatoes, sweet potatoes, and so forth, and such related crops as sugar beets and tobacco. It provides for investigations of such well-known insects as the Changa, the seed-corn maggot, cucumber beetles, the onion maggot, vegetable weevils, the tomato fruit worm, the potato beetle, the pea aphis, the sweet-potato weevil, the sugar-beet leaf hopper, the Mexican-bean beetle, the bean leaf hopper, and so forth. It also provides for investigations of aphids and other insects injurious to berries, and includes the study of the biology of those forms which transmit Mosaic diseases. It includes investigations on a variety of soil-inhabiting wireworms, cutworms, and white grubs which attack truck and garden crops. The investigations on artificial, cultural, or natural means of controlling the Mexican-bean beetle are also included under this appropriation. The results of these investigations are disseminated to growers and others interested by means of bulletins, circulars, leaflets, and advice is given freely to many applicants through correspondence.

Forest insects ---------- $185,000

The principal activities of the branch of forest insects are the study of insects affecting forest trees, insects affecting forest products, shade tree and hardy shrub insects, cooperative forest insect control and gipsy and brown tail moth research.

Cereal and forage insects ---------- $433,740

The principal projects on which work is now being done are alfalfa weevil, hessian fly, chinch bug, grasshoppers, forage insects, cereal insects, and European corn borer research.

Cotton insects ---------- $280,000

The work done under this appropriation consists of investigations on the biology of and the development of means of control of insects injurious to cotton, and includes studies on such well-known insects as the cotton boll weevil, the Arizona weevil, the pink bollworm, the cotton stainer, cotton flea hopper, etc. It provides for experiments on spraying, dusting, and so forth, leading to the control of these insects and includes the development of various types of dusting machinery including the necessary attachments used in dusting by airplane. It also includes the investigation on the pink bollworm. The information gained from these investigations is given to the public in the form of publications issued by the department and other statements given through the press and to correspondents.

Insects affecting man and animals ---------- $80,180

The work done under this appropriation includes investigations on the biology of and the determination of means for control of insects affecting man, cattle, horses, sheep, goats, poultry, and other animals and birds, including studies on such well-known insects as fleas, flies, mosquitoes, the cattle grub, the horn fly, the wool maggot, the screw-worm, poultry lice, mites, ticks, and so forth. Certain phases of the investigations are done in cooperation with the Bureau of Animal Industry and the United States Public Health Service. The work is primarily that of developing means of control rather than the application of such remedies. The results of these investigations are given to the public through the regular department publications, press releases, and correspondence, and they also serve as a basis for eradicative operations conducted by other agencies.

Stored-product insects ---------- $51,900

The investigations now being conducted under this appropriation are: (1) Insects attacking wheat, corn, all small grains, and cereal products, including breakfast foods, the products of flour mills, bakeries, and so forth; (2) weevils attacking beans and peas; (3) insects attacking dried fruits in California; (4) insects that are destructive to articles in warehouses, such as fabrics, furniture, and so forth; (5) investigations into the possibilities of cold-storage temperatures in preventing losses to agricultural products in storage; (6) investigations of new and useful fumigants that may lessen the present danger that exists in the use of fumigants now recommended; and (7) a general, though necessarily limited, study of household pests, such as bedbugs, cockroaches, clothes moths, and so forth.

Taxonomy and interrelations of insects ---------- $130,000

The work done under this appropriation consists of the study of insects as such, and includes: (1) The identification and classification of insects; (2) the study of their structures; (3) the study of their relation to climatic factors; (4) the recording of their abundance and general movement; (5) the furnishing of advice as to their probable usefulness in new areas in assisting in the suppressing of other forms which are injurious. It is primarily of a service nature. By supplying the names for insects the specialists employed under this appropriation furnish a key to the records on injury, habits, distribution, and means of control, as determined by previous study, to all other units of the bureau, to agricultural colleges, State experiment stations, and other agencies investigating injurious or beneficial insects. There are over 650,000 described species of insects. Many of these are injurious; many are beneficial. Many of those which are beneficial look so much like those which are injurious that only a specialist who has access to large collections and libraries can distinguish between the injurious and beneficial. The determination made by these specialists is the starting point of most entomological investigations, and it is through their work that we realize that undesirable aliens, like the Mexican fruit worm, and so forth, have entered our country. This service is of the greatest value to all field investigators and on its accuracy much depends. The study of the structures of insects is not only a necessary part of the science of their classification but the results obtained are of use to those who deal with devising means of control.

Bee culture ---------- $49,380

The funds under this appropriation are being used for the study of the behavior of bees to ascertain the responses of bees

to artificial and natural stimuli to the end that beekeepers may utilize to the utmost the natural habits of bees in increasing the production of wax and honey.

BUREAU OF BIOLOGICAL SURVEY

Maintenance of mammal and bird reservations $69,000

The bureau supervises 77 Federal big-game and bird reservations and administers and maintains warden forces upon the more important of these reserves. The five big-game refuges are:

The Winter Elk Refuge at Jackson Hole, Wyo.
The Montana National Bison Range.
The Wing Cave Game Preserve.
Sullys Hill Game Preserve, S. Dak.
Niobrara Reservation, Nebr.

Economic investigations $595,500

The bulk of this appropriation is expended in serving the public through the development of practical methods for the control or eradication of injurious rodents and predatory animals, and the demonstration of these methods to farmers, stockmen, orchardists, and others interested in the destruction of these animals. Extensive campaigns on the national forests in the West and on other areas and in local communities are carried on for the wholesale destruction of rodents and predatory animals. This work is conducted by trained men who are stationed in rodent and predatory animal infested States and who cooperate with State and county officials, associations of stockmen and farmers, and individuals. These cooperative agencies, in addition to the individual service rendered, contribute to the work nearly twice the amount of money expended by the Federal Government.

Biological investigations $40,000

This scientific work conducted by the biological investigations division is the fundamental basis for most of the bureau's activities. It includes biological surveys of States; technical laboratory studies on the classification of North American birds and mammals; studies the habits of mammals in relation to crops and forests, conducted chiefly from stations at Tucson, Ariz., and Puyallup, Wash. The division conducts field investigations of big game mammals; studies the distribution and migration of birds, through censuses of waterfowl and other birds in which about 3,000 cooperators take part, and banding of birds by 1,200 cooperators as a means of securing data on seasonal and local movements of birds.

Protection of migratory birds $163,000

This project consists of the enforcement of the migratory bird treaty and Lacey Act by maintaining a warden service throughout the State to the limit of available funds, and by cooperating with State and local authorities in the work; in conducting necessary investigations of migratory birds to obtain information required in connection with the administration of the laws and regulations; supervision of importations of foreign birds and other animals into the United States, including inspection service at ports of entry to prevent the introduction into this country of injurious species; and the assembling of data and publication of the annual game-law bulletin, game-law poster, directory of game-protection officials, and other information.

Reindeer, game, and fur bearers in Alaska $100,000

From headquarters at Fairbanks, Alaska, in cooperation with the Alaska Agricultural College, are conducted investigations, experiments, and demonstrations for improving and increasing the reindeer industry in Alaska, and the results attained are made known to reindeer owners, who are benefited by adopting the improved methods. This department cooperates with the Bureau of Education in connection with the reindeer under the latter's control.

Upper Mississippi River refuge $40,000

This appropriation is being used for the acquisition of land and land and water areas to be set apart as a wild life and fish refuge along the upper Mississippi River, as authorized by the act of June 7, 1924.

BUREAU OF PUBLIC ROADS

Road building and maintenance $70,000

Maintenance of experimental highways and experiments in the use of local materials and road construction and maintenance studies.

Agricultural engineering $244,290

The agricultural engineering activities of the Bureau of Public Roads are carried forward under three major subdivisions: (1) Irrigation, (2) drainage, and (3) farm structures and mechanical problems. The work is largely of a research character and in general is conducted in cooperation with colleges or other State agencies.

BUREAU OF AGRICULTURAL ECONOMICS

Farm management and practice $372,250

This appropriation covers studies of farm management and farm organization problems, costs of production, farm credit, insurance, taxation, farmers' return for capital and labor, farm ownership and tenancy, labor, land settlement and utilization, and farm-life problems. Recommendations are made for crop and livestock adjustments based upon close study of farm organization and costs and of changing agricultural conditions. Farmers are assisted in keeping records and accounts of their operations. Studies are made with respect to the use, value of land, the classification of lands yet to be brought under cultivation, and the methods of development which will result in the proper use of each class of land. Assistance is given to farmers in obtaining credit, and special studies are being made with regard to farm insurance problems. Farm taxation is being studied in an effort to find means of relieving agriculture of a part of its present heavy burden. The greater part of the work under this appropriation is carried on in close cooperation with State agencies and with other departments of the Government.

Marketing and distributing farm products $715,000

Special studies will be made of transportation, market-price trends; marketing livestock, meats, and wool; marketing dairy and poultry products; marketing hay, feed, and seed; cotton handling and marketing; State cooperation in marketing work; and the development and extension of the agricultural outlook work which involves research studies on the fundamental economic principles underlying the production and marketing of farm products.

Under this appropriation are conducted the research projects connected with the marketing of farm products in general. The work includes the preparation of standards for farm products and conferences with the trade in regard to their use. The methods of handling, grading, packing, shipping, and marketing farm products are studied and recommendations made for improvements. Numerous laboratory problems are under way, such as spinning tests of various types and grades of cotton, and milling, baking, and chemical studies to determine the intrinsic value of wheat. Studies are made for the purpose of establishing additional commercial and scientific uses for cotton and its by-products. All available facts with regard to the production of and probable demand for farm products are published periodically. A number of projects are conducted in cooperation with State agencies covering various marketing problems.

Crops and livestock estimates $738,000

Crop and livestock estimates: This work covers 74 crops in addition to the different classes of livestock.

Foreign competition and demand: Approximately $89,000 of the funds made available under this paragraph are specifically set aside, by proviso, for collecting and disseminating to American producers, importers, exporters, and other interested persons, information relative to the world supply of and need for American agricultural products, marketing methods, conditions, price, and other factors.

Market inspection of farm products $388,455

This service enables any interested party to secure at any point where the service is maintained, an inspection by a representative of the Department of Agriculture and a certificate, which is prima facie evidence in all courts of the United States as to the statements therein contained. These certificates cover the class, quality, and/or condition of agricultural products offered for shipment, or received in interstate commerce. The service has been inaugurated on fruits, vegetables, butter, cheese, eggs, meats, hay, beans, soy beans, and broom corn.

The service is, in a large measure, self-supporting, as fees are collected and turned into the Treasury as miscellaneous receipts. One hundred and ninety-three thousand cars of fruits and vegetables were inspected at shipping point in 1927. Of these 201 reinspections were made at receiving point and 115 cars were rejected. Practically perfect results, only 115 rejections out of 193,000 cars. Shippers tell me that shipping-point inspection is saving more than $5,000,000 annually to shippers and producers and at the same time it offers the only guaranty to the wholesale and retail purchaser. As the author of the shipping point inspection law, I am naturally highly gratified with these results.

Market news service $1,076,355

This item covers the collection and dissemination of market information by telegraph, telephone, radio, and other means. Information regarding the market supply, commercial movement, location, quality, condition, market price, and so forth, on all the principal agricultural products is collected and compiled by representatives of this bureau and given the widest

possible publicity. This furnishes a guide to producers and shippers as to markets where the best demand exists for their products. The leased-wire service extends to Boston, in the north; to Jacksonville, Fla., in the southeast; to Chicago, Minneapolis, St. Paul, Kansas City, and Omaha, west to San Francisco; and south to Fort Worth and San Antonio, Tex., touching various points between these cities. Temporary field stations are operated in producing districts during the movement of important crops, and information is furnished to various points in the field by commercial wires and radio.

Cooperative marketing..... $260,000

The act of July 2, 1926, creating a division of cooperative marketing requires the department to provide for the acquisition and dissemination of information pertaining to cooperation; to promote the knowledge of cooperative principles and practices; to provide for the calling of advisors to counsel with the Secretary on cooperative activities; and to authorize cooperative associations to acquire, interpret, and disseminate crop and market information.

Estimates of grade and staple lengths of cotton..... $400,000

This is a new item for the purpose of carrying into the effect the provisions of an act entitled "An act authorizing the Secretary of Agriculture to collect and publish statistics of the grade and staple length of cotton," approved March 3, 1927.

The act cited directs the Secretary of Agriculture to collect and publish annually, statistics or estimates covering the grades and staple length of stocks of cotton, known as the "carry-over" on hand on the 1st day of August of each year in warehouses and other establishments. Following such publication he is directed to publish at intervals estimates of the grade and staple length of cotton of the then current crop, it being provided that not less than three such estimates shall be published with respect to each crop. It is further provided that in any such statistics or estimates published, the cotton which is tenderable under the United States cotton futures act shall be stated separately from that which may be untenderable. Work of a preliminary nature is being carried on during the fiscal year 1928 with funds provided for this purpose under the appropriation "Crop and livestock estimates."

Enforcement of cotton futures act and cotton standards act.. $207,000

Under both of these acts the department is authorized to promulgate standards for cotton. The cotton futures act provides for the regulation of the cotton-future exchanges and for the classification of cotton delivered on future contracts. Under this act supervision is maintained over designated spot markets, and a cotton price quotation service is maintained. In addition to furnishing authentic information of prices these quotations serve as a basis for the settlement for cotton, other than middling, delivered on future contracts.

The cotton standards act makes mandatory the use of the official cotton standards in interstate and foreign commerce, provides for the classification of spot cotton by representatives of the department, and for the licensing of cotton classers. Universal cotton standards have been promulgated under this act and these have been adopted by the principal foreign cotton exchanges.

Enforcement of the grain standards act..... $758,650

This act requires the Department of Agriculture to promulgate standards for grain, the use of which is mandatory in interstate commerce, and to supervise the inspection of such grain by licensed inspectors. This law involves very heavy service and regulatory work, and constant vigilance must be exercised by representatives of the department in order to prevent violations of the law, such as fraudulent loadings of cars, and so forth, are detected and penalties imposed.

Under this act the department inspects warehouses for the storage of certain farm products, and issues licenses to warehousemen who comply with the provisions of the law. A continuous check is kept upon the operation of the licensed warehouses. The main purposes of the warehouse act are to safeguard the storage of farm products and to furnish a warehouse receipt which will be acceptable as collateral for loans, and thus furnish the farmer with a means of securing credit as an aid to the orderly marketing of his crop. Bankers have strongly indorsed the work of the department under this act, and the licensed warehouse receipt is being universally accepted as collateral. The original act covered only cotton, grain, wool, and tobacco. Under a subsequent amendment, warehouses may now be licensed for the storage of other agricultural products, and regulations under the act have been extended to cover peanuts, potatoes, broomcorn, dry beans, dried fruits, and sirups, both cane and maple, canned foods, and cottonseed.

Enforcement of the standard container and produce agency acts..... $30,000

The standard container act is a regulatory act whose administration is carried on largely through educational work with package-manufacturing concerns. The law provides for standard specifications for climax baskets and baskets and containers for small fruits, berries, and so forth. Manufacturers are manifesting an increasing desire to cooperate with the department in securing the enforcement of the law and voluntarily submit samples of the containers which they intend to manufacture. A very large number of sample containers are tested and the manufacturers notified of changes which are necessary to bring such containers within the provisions of the act.

The produce agency act covers three important propositions: It makes it a misdemeanor (1) for anyone receiving perishable farm products in interstate commerce for or on behalf of another to dump, abandon, or destroy the products so received without good and sufficient cause therefor; (2) for anyone receiving such products for or on behalf of another in interstate commerce to fail, knowingly and with intent to defraud, to account truly and correctly therefor; and (3) for anyone receiving such products in interstate commerce, for or on behalf of another, to make any false statement, knowingly and with intent to defraud, concerning the handling, condition, quality, quantity, sale, or disposition thereof.

BUREAU OF HOME ECONOMICS

Home-economics investigations..... $120,000

The bureau maintains no field stations, the investigational work in home economics being performed in Washington, and the results disseminated in the form of bulletins and other publications. The principal projects under way include studies of food composition, nutritive value, methods of preparation, and use, in order to furnish information in a practical form for the more effective utilization of these products. Special emphasis now is being given to dietary studies, problems of feeding young children, vitamin and mineral content of food, home canning methods, and the extension of the use of soft wheat flour. Economic studies also are carried on in order to furnish information to guide the housewife in wise buying. An effort is being made to determine what is an adequate standard of living for the farm family, these studies involving detailed analyses of expenditures for food and clothing and a special investigation of household accounts and their use in planning a household budget. Since so large a proportion of the family resources in time and money goes to clothing, special studies are being made to furnish information as to wise choice, care, and construction of clothing.

PLANT QUARANTINE AND CONTROL ADMINISTRATION

Enforcement of foreign plant quarantines..... $500,000

These funds provide for the payment of salaries and miscellaneous expenses in connection with the enforcement of foreign plant quarantines, the purpose of which is to regulate the importation of nursery stock and other plants and plant products; to prevent movement of cotton and cottonseed from Mexico into the United States; and to prevent the entrance of such insects as the pink bollworm, the Mexican fruit worm, and so forth, into this country.

Preventing spread of pink bollworm of cotton..... $687,800

The work under this item is for the control and eradication of the pink bollworm in Texas, New Mexico, Arizona, and elsewhere. It provides for the prevention of the movement of cotton from restricted areas except under Federal inspection and certification and the enforcement of all quarantine regulations against this pest. It also provides for the supervision of the treatment and crushing of infested seed; and for necessary scouting to determine spread or new outbreaks in the United States and in Mexico near the border.

Preventing spread of moths..... $556,380

These funds are being used to prevent further spread of the gipsy moth and the brown-tail moth in this country. The extermination of the gipsy moth is sought in its present restricted area in the State of New Jersey as well as the extermination of isolated colonies in the barrier zone, a strip of territory averaging 25 to 30 miles in width along the western border of the New England States, and the area in New York east of the Hudson River. This strip extends from Long Island Sound to the Canadian border. New Jersey is making annual appropriations for work in that State and cooperates with the department. Field work in the territory east of the barrier zone is carried on by the States concerned, the Federal-control work being confined to the New Jersey area and the barrier-zone territory. New York is carrying on the work in certain

areas west of the zone under the same plan as that conducted by the department in the barrier zone.

Inspection and certification of shipments of plant material which might carry the gipsy or brown-tail moths into new areas and the enforcement of quarantines relating to these two pests are also provided for under this item.

Preventing spread of European corn borer..... $887,660

The work done under this appropriation provides for the prevention of spread of the European corn borer, the enforcement of the quarantines, and for the clean-up of heavily infested areas in order to prevent the further long-distance spread of this insect. During 1927 nearly $9,000,000 was expended in a "corn borer clean-up campaign."

Preventing spread of Mexican fruit worm..... $100,000

This is a new item to cover regulatory activities on the Mexican fruit worm. The presence of this pest in the lower Rio Grande Valley of Texas is a menace to the entire southern fruit industry from Florida and Georgia to California.

The work done under this appropriation provides for the eradication of the Mexican fruit worm by the maintenance of a host-free period during the summer months, and for the prevention of its spread by the enforcement of quarantines. It also provides for any other regulatory measures necessary to eradicate this pest in the United States.

Certification of exports..... $30,000

This project provides for the certification, as to freedom from injurious insects and plant diseases, of fruits, vegetables, and plants intended for export in order that they may meet the sanitary requirements of foreign countries.

Grain futures administration..... $135,000

This appropriation provides for the administration of the provisions of the grain futures act of September 21, 1922, which brings under the supervision of the Federal Government certain phases of the business conducted on all grain future exchanges in the United States. This law requires that adequate records be kept by members of these exchanges of all transactions in grain for both cash and future delivery, and that such records shall be subject to inspection by the Federal Government; that reports respecting such transactions shall be made to the Secretary of Agriculture upon request; and that the dissemination of false and misleading information about crop and market conditions be prevented; that manipulation or attempts to manipulate or corner the grain futures market be suppressed. It also prohibits discrimination by grain future exchanges against cooperative associations of producers who desire membership and who agree to meet the conditions lawfully required of other members, except in respect to patronage dividends, and provides for investigation and dissemination of information concerning grain marketing.

In carrying out the provisions of the act, daily reports are required from the clearing members of the contract markets, showing volume of trades and open contracts in the various grains and futures. These reports are checked for inaccuracies and compiled, and the figures concerning the volume of trades are made public daily. The reports are then carefully studied with a view to determining the factors which influence grain prices. In order to keep a further check on the possibilities of manipulation, reports of individual accounts are required from members and individuals themselves, when their trading exceeds certain specified amounts, which for the Chicago Board of Trade is one-half million bushels. Whenever it appears that the transactions of any individual or group of individuals is of such character as to have undue influence on prices, the matter is then referred to the business conduct committee on the exchanges for appropriate action. In addition to the studying of these reports, general observations are made of the activities of the entire grain-marketing machinery and a constant check is made of the market news and gossip relating to crop and market conditions with a view to determining authenticity, locating sources, and correcting false and misleading information.

Enforcement of the food and drugs act..... $938,000

This appropriation provides for the enforcement of the Federal food and drugs act, commonly called the pure food law. The purpose of this act is to prevent the shipment into interstate or foreign commerce and the manufacture and sale in the District of Columbia and other territory in which the Federal Government has jurisdiction of adulterated or misbranded foods and drugs. To enforce this act it is necessary to maintain supervision of the enormous volume of foods and drugs shipped within its jurisdiction. This requires the inspection of food factories, the examination of shipments, the analysis of samples, and the presentation of evidence in court.

Enforcement of the tea importation act..... $41,055

Under the tea act every consignment of tea imported into the United States is inspected both as to purity and quality. A board of tea experts determines a suitable standard for tea each year, and no tea for beverage purposes is permitted entry into the United States that falls below that standard. Before the enactment of the tea importation act much low-grade tea that was unfit for use was sent to the United States.

Enforcement of the insecticide act..... $215,000

Out of 2,000 shipments of various insecticides and fungicides sampled and examined under the act during the last two years more than 600 were found to be worthless for killing insects and others were found to contain chemicals that seriously injured the trees or crops upon which they were applied.

The insecticide act places upon the department the responsibility of regulating interstate shipments and importations of insecticides and fungicides into the United States at the various ports of entry. The provisions of the law are designed to protect farmers, fruit growers, market gardeners, and stock and poultry raisers from fraudulent, misbranded, and adulterated insecticides and fungicides. Products used to rid the household of insects and disinfectants, germicides, and so forth, which are used to combat or kill bacteria also come within the scope of the work. The enforcement of the law has had a marked effect upon the industry engaged in the manufacture and sale of insecticides and fungicides, and each year sees progress in the direction of more truthful statements and a higher quality in most of the products on the market. However, the manufacturing and use of insecticides and fungicides has tremendously increased since the inception of this regulatory work, and the Insecticide and Fungicide Board is constantly confronted with new problems and new products requiring inspection. Especially important at present are disinfectants, boll-weevil remedies, lice preparations, calcium arsenate, lime-sulphur preparations, and fungicides used on the Pacific coast. Provision is made for experiments and demonstrations in livestock production in southern United States, $54,000, and experiments in dairying and livestock production in western United States, $60,000.

Forest roads and trails..... $6,500,000

The funds made available by this item are used for the following purposes:

(1) Forest highways: For the survey, construction, and maintenance of roads which are necessary to the administration, protection, and development of the national forests but which are of greater value to the States, counties, or communities within or near the forests than to the Federal property itself. The difference between this appropriation and the Federal aid provided for by other sections of the Federal highway act is that the forest highway fund is based upon the ownership of land by the Federal Government and is made in order that this may be developed and protected.

(2) Forest road development: For the survey, construction, and maintenance of roads and trails which are necessary to the administration, protection, or development of the national forests and which are of greater value for this purpose than they are to the States, counties, and communities within or near the forests. Of the total expenditure to date, 35 per cent has been used for the construction and maintenance of trails primarily for use in protecting the national forests from fire. During the past few years Congress has authorized, for forest roads and trails, several millions more than have been expended. The language of the bill now before us permits the utilization of that accumulated fund.

Federal aid highway system..... $71,000,000

This item provides funds for cooperation with the several States in the construction of the Federal aid highway system under the terms of the Federal highway act. This system comprises approximately 185,000 miles of the main highways of the country selected by the States and approved by the Secretary of Agriculture. Federal aid road work was started under the Federal aid road act in 1916. Up to October 31, 1927, provision had been made for the improvement with Federal aid of 78,841.3 miles of highway. Since 1925 authorizations for the work have been at the rate of $75,000,000 per year. Under these authorizations the work has been carried forward by the Secretary of Agriculture acting through the Bureau of Public Roads, and funds are appropriated as required to make payments to the States. Accumulated Federal highway funds are also available under this bill.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield 10 minutes to the gentleman from Iowa [Mr. COLE].

Mr. COLE of Iowa. Mr. Chairman and gentlemen, my purpose in asking time to address the House for a few minutes is to get into the RECORD some facts about the administration of the so-called flexible clause in the tariff act.

In his remarks yesterday the gentleman from Arkansas [Mr. OLDFIELD], whom we all recognize as one of the leaders on the

Democratic side of the House, made a reference to the increase in the duty on pig iron. He tried to contrast that action on the part of the President with the attitude of the same President toward agriculture.

I recall also that a Senator from the same State [Mr. CARAWAY] at the St. Paul conference on agriculture held last spring made a similar reference to this matter. Mr. CARAWAY in a dramatic manner said that the President, after he had vetoed the McNary-Haugen bill, "with the same pen" signed the proclamation increasing the duty on pig iron by 50 per cent. Fifty per cent for industry and not a cent for agriculture!

Eloquent phraseology! But when the facts are connected up with these phrases the eloquence is dissipated.

In response to many inquiries, I looked up the facts last spring, and I sought yesterday to inject some of them into the speech of the gentleman from Arkansas [Mr. OLDFIELD].

Was the President in increasing the duty on pig iron guilty of showing undue favoritism for so-called industry?

When the present tariff act was passed what is known as section 315 was included. Under this section inequalities in rates that arise may be corrected without awaiting the action of Congress. It was hoped that quick and responsive action would be taken under this section, but such hopes have long since been dissipated.

Applications for increases or decreases in rates under this so-called flexible clause are referred to the United States Tariff Commission. A somewhat tedious procedure must be followed by the commission, including inquiries as to the cost of the articles affected both at home and abroad. When a recommendation is made by the commission, and then only, the President may act or he may refuse to act.

In the six years, I think, over 600 applications for changes in rates have been filed, and, I think, in less than 30 have the investigations been completed by the Tariff Commission.

I have the exact facts as of last July. At that time the applications so made had reached 573. In 23 cases reports had been made to the President and in 15 of these increases had been proclaimed by the President.

Six of these increases affected chemical products. Since the World War we have made efforts to develop our chemical industries, for the war taught us the need of such developments. These increases were as beneficial to agriculture as to industry.

Four of the increases affected agricultural products, namely, wheat, wheat products, butter, and cheese.

The five other increases related more or less to so-called industries, such as taximeters, men's sewed straw hats, print rollers, gold leaf, and pig iron. None of these industrial increases is important unless it be pig iron.

What are the facts about the increase on pig iron? How big a boon was that to industry? In the Fordney-McCumber law the duty on pig iron was placed at 75 cents a ton, certainly not an excessive duty on the face of it. It was at least not a prohibitive duty, for since its enactment whole cargoes of such iron have been shipped into the United States, some of them from so far away as British India, where men still labor for 30 cents a day, more or less, and generally less.

After an investigation stretching over years the Tariff Commission recommended to the President that the duty be increased the full amount permissible under section 315; that is, 50 per cent.

In an oratorical speech delivered by an orator like my friend from Arkansas and in the presence of an audience not acquainted with the facts, "50 per cent" sounds like an astounding increase for a "wicked industry."

But when that 50 per cent is reduced to facts and cents, we find that it amounts to only 37½ cents on a whole ton, or 2,000 pounds, of pig iron. This increase made the duty on pig iron $1.12½ a ton. That still is neither large nor prohibitive, for pig iron is still being imported, displacing similar materials from American mines mined by American labor and puddled, or whatever the process is, by American labor receiving American wages instead of 30 cents a day in India.

Mr. OLDFIELD. Will the gentleman yield?

Mr. COLE of Iowa. I will.

Mr. OLDFIELD. Has the gentleman the figures as to how much pig iron was imported and how much exported?

Mr. COLE of Iowa. No; I have not.

Mr. OLDFIELD. Will the gentleman put them in his speech?

Mr. COLE of Iowa. I will try and get the figures.

If all orators would deal in facts instead of seeking effects, they would mention also that the President "with the same pen" that he signed the increase of 37½ cents a ton on pig iron signed the increase on butter from 8 cents a pound to 12 cents a pound, another 50 per cent increase. They omit this fact because they do not want the people of the country to know that the President has taken thought of agriculture as well as of industry.

In the Underwood tariff, enacted by the party of which my colleague from Arkansas is an exponent on the tariff, the duty on butter was placed at 2½ cents a pound. That was the consideration that the gentleman's party gave to this great dairy product in which farmers from one end of the country to the other are interested. That rate was certainly no "sop" to the farmer.

Under that low duty butter was imported at such a rapid rate, displacing American butter in our home markets and depressing prices, that in the emergency tariff enacted in 1921, when the Republicans came into power, the duty was increased to 6 cents a pound. But imports still continued and so the duty was increased to 8 cents a pound in the act of 1922.

Even under a duty of 8 cents a pound we continued to import butter, sometimes at the rate of 30,000,000 pounds a year, not only from Denmark and Holland but from Australia and New Zealand.

The dairy interests then applied for relief under the flexible clause. After careful investigations as to costs of producing butter at home and abroad, the Tariff Commission recommended the increase and the President proclaimed it, signing with the same kind of a pen, if not the same pen, that he later used in declaring the increase on pig iron.

With that magic pen the President increased the duty on butter 4 cents a pound, or $80 a ton, while the increase on pig iron—that oratorical sop to industry—was only 37½ cents a ton.

Mr. EVANS of California. What is the tariff on butter now?

Mr. COLE of Iowa. The increase made by the President, let me repeat, was 4 cents a pound, making the present rate 12 cents a pound. The increase amounts to $80 a ton on butter, as compared with an increase of 37½ cents a ton on pig iron.

Mr. W. T. FITZGERALD. Will the gentleman insert in his remarks what the tariff is on poultry, with especial reference to incubator chickens being brought in from Canada?

Mr. COLE of Iowa. I will try to get them, but I am not sure that I can on such short notice.

It may not be irrelevant, incompetent, or immaterial to say that the farmers are willing to pay 37½ cents a ton more for their pig iron so long as they can get $80 a ton more for their butter. The difference between 37½ cents and $80 is quite material to them.

By marketing nine and a fraction pounds of butter at the increase of 4 cents a pound they can pay the increased duty of 37½ cents on a whole ton of pig iron. And a ton of pig iron when reduced to nails, barbed wire, and even farm machinery goes quite a ways even on a modern farm.

Mr. BANKHEAD. Mr. Chairman, will the gentleman yield?

Mr. COLE of Iowa. Yes.

Mr. BANKHEAD. Do I understand from the gentleman's remarks—and it seems to be so indicated—that he is entirely satisfied with the present industrial schedules of the Fordney-McCumber Tariff Act as affecting the interests of the farmer and his State?

Mr. COLE of Iowa. I would not want to make the sweeping statement that I am entirely satisfied. I do not know that I am entirely satisfied with anything, not even with the plan of salvation. [Laughter.] But I think that on the whole I am satisfied. I am willing to accept the existing industrial schedules until and unless evidence is submitted that is conclusive to me that they ought to be changed. [Applause.]

Mr. BANKHEAD. My question was aroused by the fact that some of the representatives from the gentleman's section of the country have been charging that the industrial schedules were too high and oppressive as against the farmer, and that unless they could get certain characters of farm relief, in justice to the farmers of their country, they would be compelled to attack the exorbitant industrial schedules of the Fordney-McCumber Tariff Act.

Mr. COLE of Iowa. I think that some of the industrial schedules in comparison with the present agricultural schedules are too high; but, for one, I am not in favor of leveling them down. I am not in favor of punishing industry, throwing men out of work for the sake of getting some benefit for agriculture. That is not the way that I would go at it. I would not destroy the purchasing power of my customer and hope to get anything out of the transaction for myself. Rather I would level the agricultural schedules up, and that is what we are going to ask for, and I think it will be given us if the Republican Party is in power.

I do not think any man from my State is in favor of punishing industry, but we are all in favor of getting a little more for agriculture, and I think we are entitled to it.

Conditions have been changed entirely since the Fordney-McCumber Tariff Act was enacted, especially with reference to agriculture. In making that tariff act I think they granted us all that we asked for at that time. But the conditions were different then and they are different now. The changes that have been brought about in agriculture since 1922, I think, entitle us to certain increases in tariff rates on agricultural products.

Mr. BANKHEAD. So that the gentleman seems to think that a raise in the agricultural schedules in the tariff will very largely meet the present difficulties of the agricultural sections without other relief?

Mr. COLE of Iowa. I would not want to make that sort of a sweeping statement, either. I do not like to make sweeping statements of any kind at any time. I do not like to make any statements unless I know the facts on which they are based.

Mr. LOZIER. Mr. Chairman, will the gentleman yield?

Mr. COLE of Iowa. Yes.

Mr. LOZIER. The gentleman does not take issue with the statement of Secretary Wallace and President Coolidge that the domestic price of farm commodities sold in America is controlled by the price in the world market? The gentleman is in harmony with the attitude and claim of Secretary Wallace and President Coolidge on that question, is he not?

Mr. COLE of Iowa. That question is a big order and I can not undertake to answer it here. I would be very glad to discuss that if I had an hour's time, but now I want to hasten on and finish my speech.

Mr. OLDFIELD. The gentleman does not expect the present Congress, which is Republican in both Houses, to increase these duties on agricultural products, does he?

Mr. COLE of Iowa. I am afraid that the present Congress can not reach that question, at least not at this session. The revision of the tariff is, as you know, a year's job, and we have not time to do it now.

Now, I will not dwell longer on that, but before closing I do want to make reference to sugar. The gentleman from Arkansas [Mr. OLDFIELD] made a reference to the tariff on sugar. I do not know what his exact attitude is, but I assume he is in favor and has been in favor of lowering the tariff on sugar.

Mr. OLDFIELD. The present tariff carries a cent a pound. The Tariff Commission reported to the President that $1.23 was sufficient to equalize the difference in the cost of production here and abroad. The President ignored the report of the commission and let it stay as it is. In other words, he called on the Tariff Commission for a report, and when they reported he paid no attention to the report.

Mr. COLE of Iowa. I will say to the gentleman from Arkansas that I am glad the President used his discretion.

Mr. OLDFIELD. Do you want the rate to be made higher on sugar?

Mr. COLE of Iowa. I would not hesitate a minute to put up the tariff on sugar.

Mr. OLDFIELD. You want to put an embargo on sugar, do you?

Mr. COLE of Iowa. Oh, no. Plenty of arguments, however, could be made in favor of increasing the tariff half a cent a pound. In fact I would not hesitate to increase it a cent a pound. I know something about sugar, because I have studied it for six years in connection with my efforts to get a little recognition for corn sugar. I am in favor of the American people supplying their own wants in a much greater degree than they do at the present time. I would put the duty up rather than put it down, and the President of the United States is to be honored on the part of the farmers as much for keeping the duty on sugar up as he is to be honored for raising the duty on butter. [Applause.] By lowering the duty it would be possible to destroy the beet-sugar industry of the country, and to crush the cane-sugar industry of Louisiana.

Those who are acquainted with the beet-sugar industry know that it exists under the present tariff rates on a very slender margin of profit, if profit at all. We are now producing sugar at the rate of 1,000,000 tons a year from beets. The beet fields are scattered over the country. They glorify diversified agriculture. Beet money is like butter money, an ever present help to the farmers. Labor in the factories also is benefited.

We are still importing nearly two-thirds of the sugar we consume. Would the gentleman from Arkansas import it all? Is a cane field in Cuba more to him than a beet field in Arkansas?

Mr. OLDFIELD. If you make the sugar tariff as high as 10 cents a pound, no doubt we could produce all the sugar we consume in this country. Would you favor that?

Mr. COLE of Iowa. I would avoid making such a sweeping statement as a duty of 10 cents a pound.

Mr. OLDFIELD. Would the gentleman raise it to the point where this country can produce all the sugar we use?

Mr. COLE of Iowa. No. I would not be in favor of that. I do not think we could achieve all of that within reason. At present, however, we are importing over 60 per cent of our sugar, and are growing only one-third of the sugar we consume. I would like to see the time come when we would produce 66⅔ per cent and import only the other third, 33⅓ per cent.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. DICKINSON of Iowa. I yield to the gentleman five minutes more.

The CHAIRMAN. The gentleman is recognized for five minutes more.

Mr. LOWREY. Mr. Chairman, will the gentleman yield?

Mr. COLE of Iowa. Yes.

Mr. LOWREY. The gentleman speaks of not being very well satisfied with the present plan of salvation. I was wondering if he had as little chance of getting by on that as the farmer has of getting by on the present protective tariff?

Mr. COLE of Iowa. I think I should be satisfied if I had the farmer's chance. [Laughter.]

Mr. BLACK of New York. You mean the snowball farmer's?

Mr. COLE of Iowa. No. I never talk about any farmers except actual farmers. I do not even talk about landowners.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. COLE of Iowa. Yes.

Mr. MADDEN. Speaking of the duty on sugar, would the gentleman favor a tax on corn sugar of 10 cents a pound?

Mr. COLE of Iowa. No. But I have this assurance, that by the middle of June or earlier——

Mr. MADDEN. This year?

Mr. COLE of Iowa. Yes; we shall be producing sugar from corn at the rate of 1,000,000 pounds a day. We have had a hard fight and it has not yet been entirely won. Corn sugar is an American sugar that is coming to the front, and all the forces of evil can not keep it down! [Applause.]

Mr. W. T. FITZGERALD. Mr. Chairman, will the gentleman yield?

Mr. COLE of Iowa. Yes.

Mr. W. T. FITZGERALD. Is the yield in corn sugar 25 per cent?

Mr. COLE of Iowa. It is about 23 pounds from a bushel.

Mr. MADDEN. And how is artichoke sugar coming on?

Mr. COLE of Iowa. So far as the artichoke sugar is concerned, that is being developed by the Bureau of Standards, with the encouragement of the great committee headed by the gentleman from Illinois [Mr. MADDEN]. His committee are entitled to the credit for that development, because it has seen fit to give the Bureau of Standards another $25,000 to carry on those experiments.

Mr. COLTON. Mr. Chairman, will the gentleman yield?

Mr. COLE of Iowa. Yes.

Mr. COLTON. Has the gentleman incorporated in his bill a provision against the mixing of this corn sugar with honey?

Mr. COLE of Iowa. Yes. There is a provision to that effect. We have no desire to interfere in any way with honey.

I will conclude by saying that there is now pending before the Tariff Commission another increase on a major agricultural product, corn. The duty on that staple is now 15 cents a bushel. We are asking that it be increased 50 per cent, or to 22½ cents a bushel. The Tariff Commission, as usual and as always, is full of delays, but I doubt not that when they get ready to make their recommendation the President, still using that same pen, will declare it.

Mr. BANKHEAD. Mr. Chairman, will the gentleman yield?

Mr. COLE of Iowa. Yes.

Mr. BANKHEAD. I was in hopes that the gentleman would make some reference to the reduction of the tariff on farm implements and machinery. Our people in Alabama are hoping for something of that kind, because thus far they have only received a reduction on Mexican bobwhite and paintbrush handles.

Mr. COLE of Iowa. I am glad your farmers are satisfied with the relief that has been granted on bobwhites.

The CHAIRMAN. The time of the gentleman from Iowa has again expired.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. CLARKE]. [Applause.]

PROGRESS UNDER THE CLARKE-M'NARY ACT (JUNE 7, 1924)

Mr. CLARKE. Mr. Chairman, I am especially pleased to have in my audience Brother Westcott, who fought in the Civil War with my father.

On June 7, 1924, the President signed the Clarke-McNary bill establishing a national forest policy for the United States.

Since that time I have been actively at work seeking to bring to the States the vision of the possibilities through cooperation in reforestation that could be theirs under this bill; the response, even in this brief period, has been so wonderful that I set forth in the RECORD in great detail a report of progress dedicated to service to all the children of all the to-morrows.

In the fiscal year 1925 the Federal appropriation available for cooperation with the States in the protection of State and privately owned timberland against fire was $400,000. This appropriation has increased under the Clarke-McNary law to $1,000,000 for the fiscal year 1928.

The number of cooperating States has increased from 29 in 1925 to 36 in 1928.

The area of forest land classified as needing protection has increased from 272,629,000 acres to 359,209,000 acres, and the area of forest land that is actually being protected has increased from 163,000,000 to more than 196,000,000 acres.

At the present time all but one of the important timber-producing States have at least made a beginning in the protection of their forest lands against fire. This showing speaks for itself. Without doubt the extension of forest fire protection over a larger area of forest land and the giving of better protection to many areas were given distinct impetus by the provisions of the Clarke-McNary law.

Under the provision of this law the Forest Service which administers it has sought to have funds expended in forest-fire prevention activities and the prompt suppression of small fires as contrasted to fighting large fires. In other words, more and more emphasis has been put upon the prevention of large fires. Just as much money may be spent that way, but if the efforts are successful there will be to show for it unburned timberland.

Clarke-McNary funds have been used in part during the last two years to help finance an experiment on Cape Cod. This was an experiment in forest-fire prevention. Special patrolmen were put to work on a limited area on Cape Cod. A series of talks was given each year by some one connected with the State forest service before schools, chambers of commerce, and so forth, in that region, and literature was distributed among all people visiting the region during the summer. The Cape Cod population increases several fold during the summer season, and the cape, in fact, is very much dependent upon the influx of summer visitors and summer residents for its income. The continuance of this source of revenue to the local people is dependent to a large degree upon keeping this region beautiful. That, in part, was the reason for carrying on the experiment in this particular location. Further, the vegetation is such that forest fires burn very rapidly and are set quite easily. The results of the experiment have been very interesting. Briefly, in two years the expenditures for forest-fire activities have been less by 11 per cent than under the old system, and the acreage of land burned over has been reduced by 72 per cent. If the experiment continues successful, it may point the way to a line of activity that should be followed more extensively in other States than is the case at present. So far at least the experiment has proved very much worth while.

Expenditures by the States in forest-fire prevention and suppression have amounted to nearly $2,000,000 in each of the last three years, while private expenditures have varied from $500,000 to $1,900,000. The total of State and private expenditures has been nearly treble that of the Federal Government during the same period.

Previous to the enactment of the Clarke-McNary law 18 States were maintaining forest nurseries and distributing forest trees to people within their borders who wished them for reforestation purposes. In the fiscal year 1926, the first year in which appropriations were available under the law, the number of States jumped to 29; Porto Rico also took up this activity. In the fiscal year 1927, 32 States, also Porto Rico and Hawaii, engaged in the distribution of forest trees to farmers in cooperation with the Forest Service under the Clarke-McNary law. In the present fiscal year 1928, 34 States in addition to Porto Rico and Hawaii are cooperating in this project. There is no question that the Clarke-McNary law has been a very distinct stimulus to this activity.

In the year just previous to the enactment of the law farmers were planting from 12,000,000 to 15,000,000 trees a year, a number sufficient to cover 12,000 to 15,000 acres of land. In the year 1927 there were distributed to farmers in the cooperating States 24,500,000 trees, or enough to plant, in round figures, 24,500 acres of land. During the year 1928 it seems perfectly safe to assume that forest trees to the number of 40,000,000 to 50,000,000 will be planted by farmers and organizations in these cooperating States. The effect of the law has been not only to increase the amount of planting by farmers but it has given a nation-wide aspect to this form of activity.

Cooperative expenditures by the Federal Government for the growing and distribution of trees to farmers increased from $45,000 in 1926 to $71,000 in 1927. Expenditures by the States increased in the same period from $223,000 to $242,000.

The law provides for the collection and distribution of forest-tree seed. At the request of State foresters the Forest Service undertook in the fall of 1927 to collect a large quantity of red-pine seed. This kind of seed is rather difficult to procure, and in the past few years State foresters have been obliged to pay from $10 to $22 a pound for it. The Forest Service is fortunately situated in respect to collecting red-pine seed, because on and near the Minnesota National Forest this pine occurs abundantly and probably reaches better development than in any other part of the United States. As a result of efforts put forth by the Forest Service in that region, about 1,500 to 1,800 pounds of seed will be secured and made available to State foresters at a cost of about $5 a pound. Orders have already been placed by State foresters for 1,300 pounds.

Section 5 of the Clarke-McNary law provides for cooperation with the States in assisting owners of farms to improve their farm woods. The effect of the passage of the law was reflected in an immediate large increase in the funds allotted and expended by the States, an increase of about 60 per cent or about $12,000 over the 1924 expenditures. This increase kept up at about the same rate in 1926 and 1927, with the result that during the fiscal year 1927, 30 States expended nearly $85,000, or an increase of about 350 per cent over 1924.

The availability of Federal funds for the first time in the year 1926 was largely responsible for 26 States engaging in cooperative farm forestry, whereas only 6 were carrying on such a project in 1924, before the passage of the act. Thirty-one States are cooperating during the present fiscal year of 1928.

During the fiscal year 1926 a total of 9,972 farms in 558 counties reported better practice in growing timber as a farm crop. Of these, 3,358 consisted of better management of existing woodlands, 3,651 making forest plantations mostly in worn-out or idle land, and 1,675 planting windbreaks for the protection of crops or farmsteads. In showing the results of forestry demonstration, 2,284 woods or field meetings were held for the benefit of the adult farmer.

Each extension forester is carrying on the teaching of timber growing to agricultural county agents and the public by means of meetings held in public halls and schoolhouses, by means of distributing quantities of Federal and State literature, posters, and leaflets, and by exhibits.

Progress in forest legislation during the last three years has been noteworthy. Georgia, Idaho, Missouri, Oklahoma, Mississippi, Florida, South Carolina, and Delaware made provision during that period for forestry departments, the appointment of State foresters, and the protection of forest lands against fire. Illinois created a department of conservation, with forestry included, in its field of duties; Rhode Island strengthened its forestry organization by putting it under the Department of Agriculture.

Compulsory forest-fire patrol of forest lands has been provided by the States of Idaho and West Virginia, and Idaho has made the disposal of slash resulting from logging operations mandatory throughout the State. As an aid to forest-fire prevention the States of Massachusetts and Pennsylvania have joined others in giving the governor power to close the fishing and hunting season in periods of grave fire danger. New Hampshire has found its portable sawmills a source of danger to the woods; in order to keep a better line on where these are operating, legislation was passed requiring all such mills to register with the State forester, and thus keep him advised of their location. In general, the fire laws were strengthened in the States of Montana, Oregon, California, Pennsylvania, Washington, New York, Nevada, and Utah.

Section 3 of the Clarke-McNary law makes provision for the study of forest taxation. The Forest Service is now proceeding on that study under the guidance of Doctor Fairchild, who now has a staff of six or eight technical men and a clerical force at work. Field work commenced in the Lakes States region over a year ago and is now practically complete, and, although the office work for Wisconsin and Minnesota will continue during the winter months, Doctor Fairchild plans to commence work in the Pacific Northwest next June and will probably at the same time carry on work in at least one other region. It will be five years perhaps before the study can be completed. In the meantime the Forest Service work can not say with any finality what the provisions of an ideal forest tax law should be as to any particular region, but in due course we should have full information that should be of great assistance, because it

will be the best judgment of those who see the picture of forests in all of its economic, industrial, and other far-reaching aspects.

The great difficulty with forest taxation in America has been that it seems to have been the concern mostly of foresters and lumbermen and that our public-revenue authorities and the local assessors have had such a short-time view of the problem instead of recognizing it in the long-term view as a factor in permanent land utilization.

FORESTS AND FLOODS

No far-seeing man but what realizes that every forest fire in the Mississippi Valley and all the valleys of its tributaries makes a contribution to floods. Every abandoned farm, and millions of idle acres that are now a total economic loss, poor lumbering, overgrazing, and other personified selfish practices tend sooner or later to add their contribution to the crest of some flood. It is estimated that 30 per cent of the volume going down the great Father of Waters is soil or silt. Trees with their branches reaching outward and upward slow up action of the melting sun, delay the run-off, and all are contributing factors in diminishing the volume flowing to the sea.

FOREST RESEARCH

Three great forestry conferences have been held to consider the wider utilization of wood products, and direct, tangible results of these conferences are the result. The University of Wisconsin in its forest-products laboratories is giving courses to logging superintendents, to wood bosses and forest rangers that are forward looking and forest conserving.

Congressman MCSWEENEY has introduced a bill that should have the early consideration of the Congress seeking to enlarge the activities in research work.

My own State of New York is leading the way in the planting of trees. Practically 26,000,000 trees were planted from our State nurseries in 1927. Beloved Tom Luther, as an individual, for the fourth year in succession has planted over a million trees. The New York Development Association (Inc.) has just set forth upon a program that calls for the planting of 1,000,000,000 trees in the next 15 years. Our women's clubs, Boy Scouts and Girl Scouts, farm and home bureaus and the 4-H clubs, all are engaged in tree-planting projects that set up in the youngsters' minds ideas of constructive activities rather than destructive ones. "Bending twigs and inclining trees" is one great incident of service, and much of this great inspirational, helpful work is directly attributable to the national leadership in reforestation under the Clarke-McNary bill.

Senator Hewitt, able and farseeing, has introduced two bills in the New York State Legislature, one providing for funds and the formation of a committee to study forest problems in the State of New York and make definite recommendations; the other to provide for a possible bond issue up to $100,000,000 to carry forward a 20-year program in the State of New York, and appropriating for the carrying out of this program up to $5,000,000 annually.

The demand of to-day is that the bill just passed by the Senate, known as the McNary bill, S. 1181, and introduced in the House by Congressman WOODRUFF, is the need because it makes available upon passage and approval of the bill by the President, $1,000,000; available July 1, 1928, $2,000,000; available July 1, 1929, $3,000,000; available July 1, 1930, $4,000,000; available July 1, 1931, $4,000,000; available July 1, 1932, $5,000,000; available July 1, 1933, $5,000,000; available July 1, 1934, $5,000,000; available July 1, 1935, $5,000,000; available July 1, 1936, $6,000,000; in all for this period, $40,000,000, to be available until expended.

This McNary-Woodruff bill may be properly termed "a supplementary law to create a fiscal policy covering section 7 of the Clarke-McNary bill of 1924," and bringing it to a fuller fruction.

GYPSY MOTH

We all feel that the work of preventing the spread of the gypsy moth is of vital importance; and the expenditure, at least, equal to last year should not be cut down to hamper this work in the barrier zone. The Bureau of the Budget estimate reduced the amount to be expended from $686,000 to $556,380 a year, a loss of $130,000. Every student familiar with this work feels that this cut should not be allowed, as do I, or else we will have another corn-borer problem on our hands and forests wiped out. The penny wise, pound foolish, picayune cutting down of such appropriations is a short-sighted policy and the Congress, which is the final authority, should not permit it.

May I intrude further on your time and patience by picturing again what I saw when traveling with the Senate reforestation committee in New England as to the great ramifications of helpfulness that come through a national reforestation policy.

In the New England States, largely in New Hampshire, is the White Mountain National Forest. Why a national forest instead of a State forest is the question that naturally propounds itself, and here is my explanation: It was my privilege to be invited by the select committee of the United States Senate to accompany it in its investigations that were carried on in 18 different States. We held our meeting in New York State and journeyed to Boston; from Boston our objective was this White Mountain National Forest.

As we journeyed toward it, we traveled for miles along the Merrimac River. We found community after community with their great manufacturing establishments dependent upon that stream for the employment offered to many thousands of people, dependent upon the evenness of the flow of that river for power that was harnessed, used, then harnessed and used again. We found the increase in the flow of the water and the steadiness of the flow of the Merrimac, even to its lowest reaches in Massachusetts, was due to this national forest way up in the New Hampshire hills. Looking to the west you could see the Vermont hills, and trickling down through the valleys were streams, feeders of the mighty Connecticut. With extreme fluctuation in the flow of the river largely eliminated because the run-off of the water was slower, due to the forests, with a greater amount of water in the river during the entire year, meaning increasing the depth of the flow by 5 or 6 inches, thanks to a national forest in the hills of New Hampshire. As we journeyed down the Androscoggin River into Maine we found history again repeating itself, mills and more mills, water power after water power, employment and more employment to thousands of people.

We also learned that during the summer in that national forest well over 2,000,000 people spent their vacations. So it follows, as the day the night, that every New England State shared in the benefits of a national law that is gradually building up a greater White Mountain forest, that will prove of immense service in every phase of the economic and industrial life of the New England States as well as in the commerce of the Nation. We need such national forests established in and about this State and in and about many of the other forest regions to the north, south, and west. The first national forest has been created under the Clarke-McNary bill—when the President by Executive order took out of the War Department and placed under the Secretary of Agriculture about 79,000 acres of the Fort Bennings, Ga., military reservation, and we expect to dedicate it to growing more trees for our people, and there are other military reservations to follow (two in New York State). And it is up to the States to enlarge on and broaden out their State policy of reforestation and get it going, so that they can join hands with the National Government in a program that shall tell the world of to-day that they are not falling down in their opportunity to bring back to our hills and dales the trees, to adorn and make more helpful the to-morrows, under that national leadership offered in the Clarke-McNary bill.

Theodore Roosevelt, that great American and pioneer conservationist, said:

> A people without children would face a hopeless future. A country without trees is almost as helpless; forests which are so used that they can not renew themselves will soon vanish, and with them all their benefits. When you help to preserve our forests or plant new ones you are acting the part of good citizens.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield five minutes to the gentleman from Missouri [Mr. MANLOVE].

Mr. MANLOVE. Mr. Chairman, a few days ago I introduced a bill, the general purpose of which was to increase the tariff on certain farm and agricultural products. At the present time I desire only to ask permission to introduce in the RECORD as a part of my remarks a comparative schedule which gives the present duty contained in the tariff law, together with the proposed duty which is incorporated in my bill. I feel the passage of this measure would be of material benefit to the agricultural and fruit-growing as well as the entire population of our country. [Applause.]

I ask unanimous consent, Mr. Chairman, to extend my remarks in the RECORD in the manner indicated, and I yield back the remainder of my time.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The statement referred to follows:

Commodity	Present duty	Proposed duty
Cattle, weighing less than 1,050 pounds each.	1½ cents per pound	3 cents per pound.
Cattle, weighing 1,050 pounds each or more.	2 cents per pound	4 cents per pound.
Fresh beef and veal	3 cents per pound	6 cents per pound.
Tallow	½ cent per pound	3 cents per pound.
Oleo oil and oleo stearin	1 cent per pound	Do.

Commodity	Present duty	Proposed duty
Cattle hides, dry and salted	Free list	8 cents per pound.
Cattle hides, wet salted	do	6 cents per pound.
Calfskins, dry or dry salted	do	16 cents per pound.
Calfskins, wet salted	do	10 cents per pound.
Swine	½ cent per pound	3 cents per pound.
Fresh pork	¾ cent per pound	Do.
Bacon, hams, and shoulders, and other pork, prepared or preserved.	2 cents per pound	4 cents per pound.
Lard	1 cent per pound	2 cents per pound.
Lard compounds and lard substitutes	4 cents per pound	4 cents per pound.
Extract of meat, including fluid	15 cents per pound	30 cents per pound.
Meats, fresh, prepared, or preserved, not specially provided for.	20 per cent ad valorem.	30 per cent ad valorem.
Milk, fresh	2½ cents per gallon	10 cents per gallon.
Sour milk or buttermilk	1 cent per gallon	2 cents per gallon.
Cream	20 cents per gallon	40 cents per gallon
Milk, condensed or evaporated, in hermetically sealed containers, unsweetened.	1 cent per pound	2 cents per pound.
Milk, condensed or evaporated, in hermetically sealed containers, sweetened.	1½ cents per pound	3 cents per pound.
Milk, all other	1⅜ cents per pound	2¾ cents per pound.
Whole-milk powder	3 cents per pound	6 cents per pound.
Cream powder	7 cents per pound	14 cents per pound.
Skimmed-milk powder	1½ cents per pound	3 cents per pound.
Malted milk and compounds or mixtures of, or substitutes for milk or cream.	20 per cent ad valorem.	40 per cent ad valorem.
Butter	12 cents per pound	16 cents per pound.
Oleomargarine and other butter substitutes.	8 cents per pound	Do.
Cheese and substitutes therefor	5 cents per pound, but not less than 25 per cent ad valorem.	10 cents per pound, but not less than 40 per cent ad valorem.
Birds, live; poultry	3 cents per pound	6½ cents per pound.
Birds, all other, valued at $5 or less each	50 cents each	75 cents each.
Birds valued at more than $5 each	20 per cent ad valorem.	40 per cent ad valorem.
Birds, dead, dressed or undressed; poultry	6 cents per pound	12 cents per pound.
Birds, all others	8 cents per pound	16 cents per pound.
Birds, all of the foregoing, prepared or preserved in any manner and not especially provided for.	35 per cent ad valorem.	70 per cent ad valorem.
Eggs of poultry, in the shell	8 cents per dozen	15 cents per dozen.
Whole eggs, egg yolk, and egg albumen frozen or otherwise prepared or preserved, and not especially provided for.	6 cents per pound	15 cents per pound.
Dried whole eggs, dried egg yolk, and dried egg albumen.	18 cents per pound	53 cents per pound.
Corn or maize, including cracked corn	15 cents per bushel of 56 pounds.	30 cents per bushel of 56 pounds.
Corn grits, meal, and flour, and similar products.	30 cents per 100 pounds.	60 cents per 100 pounds.
Bananas, green or ripe	Free list	50 cents per bunch.
Cherries, in their natural state, sulphured, or in brine.	2½ cents per pound	2½ cents per pound.
Pitted cherries, in their natural state, sulphured, or in brine.	do	5 cents per pound.
Maraschino cherries and cherries prepared or preserved in any manner.	40 per cent ad valorem.	50 per cent ad valorem.
Beans, not specially provided for, green or unripe.	½ cent per pound	3 cents per pound.
Beans, dried	1¾ cents per pound	5 cents per pound.
Beans, in brine, prepared or preserved in any manner.	2 cents per pound	Do.
Onions	1 cent per pound	3 cents per pound.
Garlic	2 cents per pound	2 cents per pound.
White or Irish potatoes	50 cents per 100 pounds.	1 cent per pound.
White dried, dehydrated, or desiccated potatoes.	2¾ cents per pound	5 cents per pound.
Potato flour	2½ cents per pound	Do.
Tomatoes, in their natural state	½ cent per pound	3 cents per pound.
Tomato paste	40 per cent ad valorem.	40 per cent ad valorem.
Tomatoes, all other, prepared in or preserved in any manner.	15 per cent ad valorem.	Do.
Vegetables in their natural state, not specially provided for.	25 per cent ad valorem.	Do.
Vegetables if cut, sliced, or otherwise reduced in size, or if parched or roasted, or if pickled, or packed in salt, brine, oil, or prepared or preserved in any other way and not specially provided for; soy beans, prepared or preserved in any manner; bean stick, miso, bean cake, and similar products, not specially provided for; soups, pastes, balls, puddings, hash, and all similar forms, composed of vegetables, or of vegetables and meat or fish, or both, not specially provided for.	35 per cent ad valorem.	50 per cent ad valorem.
Hay	$4 per ton	$6 per ton.
Straw	$1 per ton	$1 per ton.
Horse-radish roots	Free list	40 per cent ad valorem.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield five minutes to the gentleman from New York [Mr. DEMPSEY].

Mr. DEMPSEY. Mr. Chairman, the adoption on the 24th of February by the Committee on Rivers and Harbors of a project for the improvement of the Black River inside Lorain Harbor, Ohio, marks another long and important step in a steadily changing policy as to the improvement of inner harbors on the Great Lakes. That policy has been for the Federal Government to improve the entrance and the outer harbor, and for the locality to provide and maintain the inner harbor.

This policy has entailed a large expense on the different cities on the Great Lakes, and has been in direct contrast with the policy as to ocean ports, where the Federal Government has provided, as a rule, for the entire harbor.

The following is a list of important harbors near the ocean, with a statement of the distance each of them is from the sea, viz:

New Orleans, La., 106 miles from Gulf of Mexico.

Philadelphia, Pa., 105 miles from Delaware Bay.

Baltimore, Md., 151 miles from Hampton Roads; 130 miles Chesapeake Bay.

Richmond, Va., 104 miles from Atlantic Ocean.

Wilmington, Del., 82 miles from Atlantic Ocean.

Jacksonville, Fla., 82 miles from Atlantic Ocean.

Sacramento, Calif., 104 miles from Pacific Ocean; 52 miles bay, 20 miles river, 32 miles canal.

The Government has done the work of providing and maintaining the channels to the harbors of all of these places, and it has also provided the funds and done the work to improve the harbors themselves, a practice which I am far from criticizing, and on the contrary commend.

The exceptions to the rule that the Federal Government will provide only the entrance and the outer harbor on the Great Lakes are the following, where the name of the port is followed by the river connecting with the Great Lakes, on which the Government has expended money, and the amount which has been expended in each instance, viz:

Toledo, 15½ miles of the Maumee River	$4,993,118
Detroit, about 1 mile of the Rouge River	718,283
Chicago, 4 miles of the Chicago River and its branches	1,941,749
Calumet, 5½ miles of the Calumet River, the total expended on river and harbor	4,120,783
Grand Haven Harbor, Mich., on 39 miles of the Grand River and on the harbor	2,128,924

The improvement of the inner harbors and of the streams leading to them in all of the above instances, the adoption of the Lorain project last Friday, and a few days ago the approval of the report for the improvement of Grand Haven Harbor and Grand River, Mich., all mark what General Deakyne, Assistant Chief of Engineers, characterized in the hearing this morning as a tendency to change the policy on the Great Lakes so as to conform to that adopted on the ocean, to wit, for the Federal Government to assume the expense of improving inner harbors and connecting streams, or an equitable part of it, as well as that of the entrance and outer harbor.

This has an important bearing on conditions in Buffalo. The Buffalo River needs straightening, stabilization of its banks, and provision against freshets. A large number of important industries are located along this river, and the difficulty of navigating the Buffalo River, with its tortuous course, caving banks, and liability in the spring and fall to damage from freshets, is a serious loss. All of these disadvantages could be largely, if not wholly, obviated.

There are many great advantages to be derived from having the work of improving Buffalo River done by the Federal Government. First of all it will be of great value to have the Government engineers make a comprehensive and detailed survey of the stream, and determine just what should be done to make it easiest and most economical of navigation, and to reduce the maintenance charges to a minimum. The Federal engineers devote their lives to work of this kind, and they are the only engineers who do any considerable amount of this kind of work. They are naturally, therefore, the best qualified to devise the plan which will bring the best results, and at the lowest cost. They will appreciate and understand, too, what the needs of navigation are, not alone in Buffalo, but on the entire Great Lakes system, of which Buffalo River is a part, and their plan will, therefore, naturally, be one which will coordinate this river with all of the other channels of the Great Lakes, and make it a workable and economically navigable part of these channels.

Next, when once the river has been made a Federal project, it will be maintained on the same basis as the other channels. Progress will, from time to time, be made in deepening and otherwise improving these channels, and the development of this river will go hand in hand with other improvements. At the present moment the Committee on Rivers and Harbors is expecting a report on the deepening of the Great Lakes' channels. This will, it is understood, provide for a depth of 25 feet, instead of the 20 feet, which is that provided by the legislation dealing with these channels. To meet this added depth on Buffalo River will not alone require a large expenditure but it will require expert planning to determine just how it can best be obtained, how bridges and sharp bends should be dealt with, besides a large number of allied but equally important questions. So, not alone from a standpoint of saving

expense to the municipality, but from that of making Buffalo River the really valuable stream it should be for water-borne commerce, it would be of the very greatest importance to have it adopted as a project by the Federal Government.

On the Great Lakes is by far the largest and most valuable water-borne commerce we have. The policy of the Federal Government as to improvements on the Great Lakes system should be liberalized so that valuable streams with a large commerce, like Buffalo Creek, can be modernized, and the commerce on them carried conveniently, expeditiously, and economically.

With an increased diversion of 40,000 cubic feet at Niagara (which is bound to come soon), giving us, as it will, 1,200,000 additional horsepower, we are sure to have a tremendous growth in manufacturing and in freight on the Niagara frontier, and we will need to have the Buffalo River straightened, its banks stabilized, and need an American deep waterway from Buffalo to Olcott, to provide for carrying the frontier freight to and from the East and between the different points on the frontier.

I am very earnestly working for, and hope to secure in the near future, this added diversion for power at Niagara; a deep-waterway canal from Buffalo, by way of Tonawanda, Lockport, and Olcott, to connect Lake Ontario with and make it a part of the Great Lakes system; the improvement of Buffalo River; and the deepening of the Niagara River from Tonawanda to Niagara Falls. With these improvements secured, Buffalo ought soon to be as large as either Cleveland or Detroit. Indeed, Buffalo, the Tonawandas, Niagara Falls, and Lockport will, when these advantages have been realized, become so closely connected as to be practically one great, growing, and prosperous locality, if not one city.

Mr. DICKINSON of Iowa. Mr. Chairman, I yield two minutes to the gentleman from Iowa [Mr. LETTS].

Mr. LETTS. Mr. Chairman and gentlemen of the committee, the whole country at this time is exceedingly interested in all questions relating to radio. I am sure that every Member of this House is making an intensive study of results at the close of the first year of the administration of the radio law. Out in our town we have a man who is one of the pioneers in radio, a man who has made a close study of radio matters from its inception and is now the manager of one of the best stations in the country. I have before me a splendid statement by him which appears in the Davenport Daily Times of February 28. It is somewhat critical of the administration of the law and somewhat critical of Congress and its understanding of the subject and of the provisions of the law. It is analytical of proposed changes with respect to this law.

Mr. O'CONNELL. Is this statement by the gentleman to whom the gentleman from Iowa referred in the first portion of his remarks?

Mr. LETTS. Yes. I think it will be helpful to the Members of this House in understanding the matter if they may have the opportunity to read it. Therefore I ask unanimous consent to extend my remarks in the RECORD by publishing therein this short statement by Dr. Frank W. Elliott, of Davenport, Iowa, who was formerly president of the National Broadcasters Association and at the present time one of the directors of that association.

The CHAIRMAN. Is there objection?

There was no objection.

The statement is as follows:

[From the Davenport Daily Times, February 28, 1928]

ELLIOTT ATTACKS RADIO REGULATION MEASURE PENDING BEFORE CONGRESS; TRUST WOULD CONTROL BROADCASTING

Dr. Frank W. Elliott, past president and now a director of the National Broadcasters' Association and manager of station WOC of Davenport, to-day opened fire on the radio regulation bill pending before Congress.

"It will put broadcasting into the hands of the great Radio Trust," he declared.

The section of the proposed regulatory measure to which Doctor Elliott protests is that which provides for the allocation of stations according to the population and area of the States.

"This would have the effect of closing some of the finest stations in the country, and would provide for others where there are none now and where there is no need or desire for one," he said.

"The radio artists can not be persuaded to leave the centers of population and the smaller stations would be compelled to subscribe to chain programs controlled by the great radio interests.

SITUATION GRAVE

"The radio situation in Washington is exceedingly grave. The House Merchant Marine and Fisheries Committee has just reported the radio bill recently passed by the Senate by adding a proposal which amends paragraph 2, section 9 of the present radio act in such a manner that it requires one-fifth of all license wave lengths and power be allocated to each of the five radio zones without regard to population or area.

"The second part of the proposal requires distribution of this one-fifth equitably, among the several States, in each zone according to population and area. It disregards test of service as evidence by the listeners, and directs every attention to the location of transmitters.

"It must be evident to everyone that a wide variety of programs is necessary for the approval of radio listeners, and that large centers furnish the greatest amount of this talent. Under the proposal, stations not located in the remote sections of the country would be either obliged to close down, or almost entirely curtail their service. Chain programs, which are now rapidly covering the country, will be greatly augumented by this proposal, and it is not difficult to foresee a gigantic network of wires out of the great centers, completely dominating the radio field.

CONGRESS JEOPARDIZES RADIO

"Radio must be intelligently and scientifically controlled. Congress, with its limited knowledge of radio and its tendencies to inject politics into everything it does, will, in my opinion, jeopardize the best interest of the radio public if legislation is passed merely for the purpose of favoring special interests, and of already too powerful commercial combinations. Radio is one of the greatest blessings that this country has ever enjoyed, and it is to be hoped that no such dangerous experiments as those recently proposed by the committee, will ever be adopted by Congress.

"A good example of the lack of wisdom on the part of Congress in the present radio law, as compared with what could have been accomplished had Congress delegated proper authority to the Department of Commerce, is well understood by the listeners of the Middle West. Conditions are not better; they are even worse than under the radio act of 1912. Instead of making any improvement, Congress in trying to safeguard public interest, without an adequate knowledge of the proper methods, and with its apparent distrust of qualified agencies of information, made a monumental hodgepodge of the whole job, and even worse proposals are made in their most recent attempts.

"It is high time for the radio listeners of the country to become aroused and denounce any such impractical proposals. If the proposed amendments should be adopted, radio listeners can expect no benefit or let-up in interferences under such a proposal. On the contrary, they are very apt to be obliged to listen to one or two programs, and under the terms and conditions laid down by the so-called Radio Trust."

Mr. BUCHANAN. Mr. Chairman, I yield 15 minutes to the gentleman from Pennsylvania [Mr. CASEY].

Mr. CASEY. Mr. Chairman, I have a brief statement to make with reference to the rather unfortunate and unpleasant situation which arose in the House the other day between myself and the gentleman from Nebraska [Mr. SIMMONS]. In view of the statement of the gentleman from Texas [Mr. BUCHANAN] that no additional time will be granted, I request that I be not interrupted until I have completed my statement, after which I will be very glad to yield to any one desiring to ask a question.

Mr. Chairman, the other day I rose in my place in the House and made a unanimous-consent request to strike from the CONGRESSIONAL RECORD certain language inserted into my speech without my knowledge or consent, charging at that time that, in my opinion, the language inserted, as it referred to me, was absolutely untrue; and, further, that whoever did this had violated the rules of the House. Considerable interest was shown in the question raised by me by several Members and at the suggestions of the gentleman from Michigan [Mr. CRAMTON] I temporarily withdrew my request for the time being. Later in the day I renewed my unanimous-consent request, the gentleman from Nebraska [Mr. SIMMONS] then being on the floor. The statement I made in the earlier part of the day is as follows:

Mr. CASEY. Mr. Speaker, I rise to make a unanimous-consent request that certain language printed in the CONGRESSIONAL RECORD during my remarks on the District of Columbia appropriation bill the other day, which was inserted without my knowledge or consent—by whom I do not know—be stricken from the RECORD.

I have in my hand the reporter's copy of my speech, just referred to. After the House adjourned on Friday, February 24, I took it to my office and corrected the reporter's copy of the speech I had made during the session of the Committee of the Whole. I then handed the copy to the messenger, as we all do, to take it to the Government Printing Office to be printed in the CONGRESSIONAL RECORD as part of the proceedings of that day. Judge of my surprise and amazement when I read the CONGRESSIONAL RECORD the next morning and discovered that somebody had inserted language into my remarks that did me a great injustice and put me in a rather embarrassing position in the eyes of the Members of the House, because the language inserted as

it referred to me is absolutely untrue; and furthermore, Mr. Speaker, whoever is responsible for this is guilty of a violation of the rules of the House of Representatives.

* * * * * * *

The statement that the bill was reported to the full committee by unanimous consent is untrue and does me a great injustice, because the hearings will show that in the committee I was opposed to the proposition of closing the doors of the public schools to all children not dwelling in the District of Columbia. I opposed it on the floor of the House, which can be verified by the previous day's proceedings, and I was opposed to it when it was under discussion under the five-minute rule. The insertion of this language or any language into my remarks without my consent is a violation of the rules of the House. Mr. Speaker, I therefore ask unanimous consent that the language indicated by me be stricken from the CONGRESSIONAL RECORD.

As I stated a moment ago, later in the day I renewed my unanimous-consent request, and then yielded to the gentleman from Nebraska [Mr. SIMMONS], the chairman of the subcommittee on the District of Columbia appropriation bill.

Quoting Mr. SIMMONS:

Mr. SIMMONS. Mr. Speaker, in the debate in the House last Friday the transcript shows that I addressed the gentleman from Pennsylvania and asked if he would yield. He answered "yes." Then the transcript shows that I stated that "I would like to call the gentleman's attention to the fact that it was thoroughly discussed—that was, the amendment then under consideration—and to the fact that at first the gentleman from Pennsylvania [Mr. WELSH] objected to this being done unless we would take care and not cause any hardship to the children now in the District schools."

"The gentleman was present at the meeting and stated he did not want to cause any hardship for the children then in the schools, and we drafted the amendment to meet the wishes of the gentleman and his colleague from Pennsylvania [Mr. WELSH]."

Then the gentleman from Nebraska continued:

After the adjournment of the House on Friday I corrected some of the transcript of the discussion that was brought to me in my office and went to my residence, which is about 5 miles from the Capitol. Along about 7 or 7.30 o'clock in the evening some one from the reporters' office called me over the telephone and asked if he could read my statement to me over the telephone for approval or disapproval, to save him coming out the 5 miles to my residence with the transcript. He read it to me, and as I remember it, I dictated over the telephone, and whoever it was took it down and read back to me the language to which the gentleman from Pennsylvania objects, I asking that he change my statement so that it would read as follows:

"I would like to call the gentleman's attention to the fact that this paragraph was in the bill when the subcommittee reported to the full committee, and it was printed in italics in the report that the subcommittee presented to the main committee. The gentleman made no objection either in the subcommittee or the full committee to the language being in the bill; the bill was reported unanimously by the full committee; it was thoroughly discussed in the subcommittee and the full committee, and to the fact that at first the gentleman from Pennsylvania objected to this being done, unless we would take care of and not cause any hardship to the children now in the District schools. The gentleman was present at the meeting and stated that he did not want to cause any hardship for the children then in the schools. No one on the committee desires to cause any hardship, and we drafted the amendment to meet the wishes of the gentleman and his colleague from Pennsylvania."

I assumed then and I assume now that I had the right to amplify the statement that I had made by setting out in brief detail the facts covered by the original statement. * * * I believe that I was entirely within the rules of the House in doing what I did. * * * The statements that I made on the floor were the facts then, and the statement that I amplified and stated in the RECORD were the facts when I made them. They are the facts now. However, if the gentleman from Pennsylvania does not want them in the RECORD, I have no objection to their being stricken out of his speech in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania that certain language be stricken out?

There was no objection.

The Speaker of the House, upon a parliamentary inquiry made by the gentleman from Tennessee at the opening of the session to-day, ruled that any Member who inserted language not spoken on the floor of the House or in Committee of the Whole into the speech of another Member without the consent of the other Member is guilty of a violation of the rules of the House of Representatives. The Speaker having decided that question between myself and the gentleman from Nebraska [Mr. SIMMONS], it is not necessary for me to go into that phase of it any further.

Now, I want to direct my remarks to the other phase of this question, as to the correctness of the statement made by the gentleman from Nebraska [Mr. SIMMONS]. I read from his language as it appears in the RECORD. After he had plenty of time to consider it and weigh what he was going to say, he again repeated on the floor of the House and in the CONGRESSIONAL RECORD the outrageous statement he had made a few days previous. I quote from the gentleman's remarks:

Mr. SIMMONS. I would like to call the gentleman's attention to the fact that this paragraph was in the bill when the subcommittee reported to the full committee.

That statement is untrue, because of the fact that the subcommittee was never called together and never passed upon the language as printed in the bill. Then the gentleman goes on:

It was printed in italics in the report that the subcommittee presented to the main committee.

That statement is also untrue, because the subcommittee did not have any meeting from which the bill could be reported; as far as I am concerned, I never saw the report until I secured a copy of it at the meeting of the full committee. The inference is that it was printed in italics and that I knew all about it and did not object to it. It may have been printed in italics, but so far as me seeing the report and agreeing to it or not objecting to it, I repeat there never was a meeting of the subcommittee called to consider the report, therefore I could not have seen it or known what was in it. I do not know who wrote the report, nor do I know who prepared the language in the bill as reported to the full committee and the House. Then the gentleman from Nebraska continues:

The gentleman made no objection either in the subcommittee or the full committee to the language being in the bill.

Of course I did not object. I could not make objection to it in the subcommittee when there was no meeting of the subcommittee called to pass upon the language in the bill or the report. Then the gentleman from Nebraska continues:

The bill was reported unanimously by the full committee, it was thoroughly discussed in the subcommittee and the full committee.

It was not discussed in the subcommittee, because there was no meeting of the subcommittee called for the members to pass upon the bill or the report as prepared by somebody—I know not who. I read further from Mr. SIMMONS's remarks:

And to the fact that at first the gentleman from Pennsylvania [Mr. WELSH] objected to this being done unless we would take care of, and not cause any hardship to, the children now in the District schools.

That statement is true. I also objected to anything being done in the subcommittee or by the full committee or by the House of Representatives or anyone else that was going to be harmful to the innocent children in preventing them from coming into the District and attending the public schools of the District. The gentleman from Nebraska continues (I am still reading from his remarks as they appear in the CONGRESSIONAL RECORD):

The gentleman was present at the meeting and stated he did not want to cause any hardship for the children then in the schools. No one on the committee desires to cause any hardship.

I wish I could believe that to be true. Then the gentleman from Nebraska continues:

And we drafted the amendment to meet the wishes of the gentleman and his colleague from Pennsylvania [Mr. WELSH].

I want to say to the members of the committee that statement is untrue, because I never knew that this provision to close the doors of the public schools to the children was in the bill, I never was consulted about the matter after I positively protested against it going into the bill. Since this question arose I took the liberty to speak to two other members of the subcommittee; I have no desire to involve them or anyone else in this unpleasant and unfortunate situation. I spoke to the gentleman from New York, my colleague [Mr. GRIFFIN], and he informed me he had no knowledge of the subcommittee ever meeting to pass upon the language of the report or the language of the bill.

I also spoke to my colleague from Pennsylvania [Mr. WELSH]. He likewise informed me that he had no knowledge of the subcommittee ever being called together to pass upon the language in the bill or the language in the report, and the first time that we three members of the subcommittee knew what was in the report or in the printed bill was when we were called into a meeting of the full Committee on Appropriations for the consideration of the bill. A copy of it was laid on the table, also a copy of the report, and the chairman of the subcommittee, the gentleman from Nebraska [Mr. SIMMONS], then arose and read from the report such parts of the report as he chose to read; we followed him as best we could to get such information

from his remarks as it were possible with reference to the bill and the report, which the chairman states was unanimously reported from the subcommittee.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. CASEY. Mr. Chairman, I ask unanimous consent that I may proceed for five additional minutes.

The CHAIRMAN. The time is controlled by the gentleman from Texas and the gentleman from Iowa.

Mr. BUCHANAN. So far as I am concerned, I can not grant any extension, in accordance with my statement a while ago. If the gentleman on the other side chooses to give him five minutes, I have no objection.

Mr. CASEY. Mr. Chairman, I ask unanimous consent——

The CHAIRMAN. The Chair must repeat that he is powerless in the matter. Consent must come from the two gentlemen in control of the time.

Mr. CASEY. I was not going to ask unanimous consent to continue but to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent that he may extend his remarks in the RECORD. Is there objection?

Mr. SIMMONS. Reserving the right to object, I would like to have the gentleman from Iowa [Mr. DICKINSON]——

Mr. CASEY. Mr. Chairman, I withdraw the request.

Mr. SIMMONS. I am going to try to get the gentleman additional time. I ask the gentleman from Iowa [Mr. DICKINSON] to give the gentleman from Pennsylvania [Mr. CASEY] five additional minutes.

Mr. DICKINSON of Iowa. Mr. Chairman——

Mr. CASEY. Mr. Chairman, I withdraw my request.

The CHAIRMAN. Which request—for the five minutes or for the extension?

Mr. CASEY. Either or both; my understanding is that I have only one request pending; that is, to extend my remarks in the RECORD, which I have withdrawn.

Mr. BUCHANAN. Mr. Chairman, I yield 20 minutes to the gentleman from Colorado [Mr. TAYLOR].

MAJ. GEN. WILLIAM CRAWFORD GORGAS

Mr. TAYLOR of Colorado. Mr. Chairman and ladies and gentlemen of the House, I am going to ask your indulgence a few minutes to informally talk to you on a matter of sentiment, of national pride.

My wife and I spent the recent holiday recess of Congress, as we have several times before, on a trip to Panama. While there we again visited the wonderful United States Government hospital on the Canal Zone, on our own soil and under our own flag. I want to give you a brief description of that hospital and the impressions it made upon me.

Having in recent years had quite a varied experience with the surgical equipment of numerous hospitals, both Government and private, I feel that I can qualify as an unofficial and nonprofessional expert on hospitals.

THE ANCON HOSPITAL

In 1883 the first French canal company built the old Ancon Hospital on terraces laid out on a reservation of 80 acres on the north and northeast slopes of an extinct volcano about 650 feet high and known as Ancon Hill. The word Ancon is derived from a Greek word meaning an elbow, or a prominent point. It is a splendid and healthy location facing the city and bay of Panama. The hospital was operated by the French Sisters of St. Vincent de Paul. From 1883 to 1889 when the French did their most active work on the canal this hospital was filled with patients. There were more than 5,000 deaths in the hospital and about one-fourth of them were caused by yellow fever quite largely contracted after entering the hospital. In fact, this hospital itself became one of the principal centers for the propagation and spread of yellow fever, because it was not then known that this disease is communicated by the stegomyia mosquito, which breeds only in comparatively clear and clean water. The French sisters beautified the grounds with many ornamental plants and flowers and to protect them from the myriads of ants that abound on the zone they surrounded their flower beds with a concrete curb grooved to hold a ribbon of water. Not only that but the feet of the cots were placed in little pans of water to keep the ants and other insects from crawling up, and the attendants seem to have never noticed the mosquito wigglers swarming in all the stagnant water in all these pans and ornamental bowls of flowers. The wards were not even screened and when yellow-fever patients were brought into the hospital the mosquitoes bred there would promptly suck the poison from their blood and quickly spread it to all the other patients. The yellow-fever ward was known as the St. Charles, and it is authoritatively stated that more people died from yellow fever in this building than in any other hospital in the world. Practically one-third of all the white employees of the French company died of yellow fever and pernicious malaria.

The hospital became a horrible death trap, and remained so until General Gorgas went there. Fortunately for the many thousands that might otherwise have died in this hospital, the old French company became utterly bankrupt in 1889, and from that time for 15 years, until the possession of the canal and all the French property was turned over to the United States in the spring of 1904, the work on the canal was only carried on in a perfunctory manner, and the use of this hospital was luckily insignificant. From 1898 until 1902, General Gorgas had been the chief sanitary officer of Habana. In that capacity he was in close contact with the Walter Reed board in its investigations into the cause and manner of transmission of yellow fever, and he so vigorously put the discoveries of the board into practical application that in seven and a half months, from February 1, 1901, to September 15, 1901, he completely eradicated yellow fever from Habana, where it had existed continuously for over 150 years. He changed Habana from one of the worst pest holes in the world to the beautiful healthful city it is to-day. In March, 1904, General Gorgas with three associates appointed at his request—John W. Ross, Maj. Louis A. Legarde, and Maj. Cassius E. Gillette—was ordered to accompany the Panama Canal Commission as its sanitary adviser for the purpose of protecting the force during the construction of the canal. He promptly made an investigation and made a detailed report of what he and his advisers deemed necessary to clean up that zone and protect the officials and employees; and as a result he was, in April, 1904, ordered to report to the Panama Canal Commission as the chief sanitary officer for the Isthmus. The French company formally transferred the title to all the canal property to the United States on May 4, 1904, and immediately thereafter General Gorgas began work, and he loyally stuck to it day and night for 10 years. In all the history of the world there has never been a more gigantic or important task placed upon any one man. We were very soon to have 40,000 employees on the Isthmus, and their lives were in his hands.

In the olden days the Isthmus of Panama had been the scene of unspeakable villainies, massacres, piracies, and human slavery in its most brutal forms. The whole 40-mile stretch, composing what is now the Canal Zone, was known throughout the world as the "white man's grave." It was one sweltering rendezvous of death and disease. In all the world there was perhaps not concentrated in any single spot so much disease. The Isthmus was largely a damp tropical jungle, intensely hot, swarming with mosquitoes, snakes, lizards, alligators, and all manner of reptile and insect life covered this oozy ground. It was the home of yellow fever, typhus, malaria, and dysentery. At each end of this pestilent neck of land was a small city, Colon on the Atlantic side and Panama on the Pacific, both without underground sewers or piped or clean drinking water. It was a dark and gloomy jungle, the breeding place of all kinds of tropical diseases, especially yellow fever and malaria. At one time 500 young engineers came from France and went to work in the swamps, and not one of them lived to draw his first month's pay. There is a record of the death of 22,819 laborers and no one will ever know the number of unrecorded deaths. It was the stalking ground of death, with the rainy season lasting from about April 15 to December 15, when the people died of yellow fever in four or five days, and the dry season lasting the other four months, when they died of pernicious fever in from 24 to 36 hours. Epidemics always took place whenever the Isthmus was crowded with strangers. This was the appalling condition confronting General Gorgas and his little band of assistants when our Government paid $40,000,000 for it and took over the Canal Zone in May, 1904. Our engineers had the skill, our people had the ambition, and our Government had the money to build the canal. But it never would have been built without the genius of General Gorgas. Within less than two years after he obtained the necessary help and supplies he exterminated the mosquitoes, eradicated yellow fever and malaria, and cleaned up the zone and made possible the building of the canal. Our country would never have tolerated the appalling loss of life—one-third of the entire white population—that the French suffered. We would have been compelled to select Nicaragua for the construction of the canal, and the Isthmus of Panama would be to-day in substantially the same condition that it was 25 years ago.

The Canal Zone is to-day healthier than the average American community. And it is occupied by many thousands of healthy and contented American citizens who are helping to maintain and operate the great canal; but it is doubtful if any American citizens or many people of any kind would be on

the Isthmus to-day if the splendid work of General Gorgas had not been performed.

When he took charge he immediately tore out the old water pots and troughs of the old Ancon Hospital that had been prolifically breeding the yellow fever for over 20 years, and screened the wards, and completely eradicated the mosquito and the yellow-fever breeding in that hospital.

Maj. Louis A. Legarde, who had come there with General Gorgas, was at once installed as the first superintendent of the hospital.

Under the general's direction, and the immediate supervision of Major Legarde, the work of cleaning up the grounds and repairing the buildings was at once begun. The old wooden buildings that had been built over 20 years before, and most of them little used or kept up, were torn down or repaired, rebuilt, remodeled, and greatly enlarged, and many new buildings were built; so that in a comparatively brief period there were within the hospital reservation about one hundred suitable and modern buildings, with a total capacity of 1,200 patients. Our Government has spent many millions of dollars upon this hospital, substituting modern and handsome concrete buildings for the old frame structures, and putting in modern surgical and other equipment. For many years it has been known as "the New Ancon Hospital," and it has been proclaimed by many to be the most beautiful hospital in the world. Every American citizen who can do so should visit the Canal Zone and see this splendid American hospital that is now well known throughout and patronized by many people of Central and South America.

This New Ancon Hospital is a magnificent monument to the spirit of America and the genius of General Gorgas.

On my recent visit, as I walked through some of the magnificent buildings and over the exquisitely beautiful grounds of this great hospital, as I had done several times in former years with General Gorgas himself, and remembered the supreme pride that he took in the buildings and the great development and modern equipment and wonderfully beneficial use and great international success of that hospital, and when I thought to myself of the several other splendid Government hospitals, including the almost equally beautiful Letterman Hospital at the Presidio of San Francisco, named after Major Letterman; and the Tripler Hospital at Honolulu, named after General Tripler; and the great Walter Reed Hospital adjoining our Capital City, named after Maj. Walter Reed; and also several other fine hospitals named after Army physicians who rendered distinguished services to our country, and reflected that the name "Ancon" had no particular meaning or signification that at all warranted that great hospital bearing that name, the thought came most forcibly to me that this hospital, made possible only by General Gorgas, should, as a proper recognition of his services and his genius, and by every reason of fitness, appropriateness, justice, national pride, and patriotism, be named the Gorgas Hospital.

I have scarcely ever in my life had a thought come to me so spontaneously and so forcibly as that did at that time. I could not conceive of how any red-blooded American could object to a tribute of that kind, that is so preeminently fair and so richly merited. No hospital in the world ever more justly deserved to bear the name of its creator.

It seemed to me that if there are a hundred and twenty million people under our flag that there ought to be that many perfectly good reasons why this hospital, which he rebuilt and where he lived and so grandly served his country, should bear the name of one of the greatest men our Nation or the world has ever known. The change will not cost one dollar. It will not injure one human being. It will not affect a dollar's worth of property rights. Congress will honor itself, and each of us will honor our country and ourselves, by making this change. I firmly believe our act will be an inspiration to the youth of America as long as the Stars and Stripes float over our country.

For the purpose of attempting to carry out that thought, on my return to Washington I wrote and introduced H. J. Res. 175 on January 20, 1928, which reads as follows:

Joint resolution to change the name of the Ancon Hospital in the Panama Canal Zone to the General Gorgas Hospital

Resolved, etc., That in recognition of his distinguished service to humanity and as a fitting perpetuation of the name and memory of Maj. Gen. William Crawford Gorgas, from and after the passage of this act the Government hospital within the Canal Zone, near the city of Panama, heretofore known as the Ancon Hospital, shall hereafter be known and designated on the public records as the General Gorgas Hospital.

SEC. 2. That the change in the name of the said hospital shall in no wise affect the rights of the Federal Government, or any municipality, corporation, association, or person; and all records, maps, and public documents of the United States in which said hospital is mentioned or referred to under the name of the Ancon Hospital or otherwise, shall be held to refer to the said hospital under and by the name of the General Gorgas Hospital.

The resolution was referred to the Committee on Military Affairs and that committee promptly and unanimously favorably reported the resolution without any amendment. When it was called to the attention of the Committee on Interstate and Foreign Commerce objection was made to the jurisdiction of the Military Affairs Committee on the ground that matters pertaining to the Panama Canal Zone are, generally speaking, handled by the Committee on Interstate and Foreign Commerce. Thereupon Speaker LONGWORTH referred the resolution to the latter committee, which likewise very promptly and unanimously favorably reported the resolution. The committee recommended one amendment, namely, that it be called "The Gorgas Hospital" instead of "The General Gorgas Hospital." That amendment is perfectly satisfactory to Mrs. Gorgas and to me and I think to all of the general's friends. No title is necessary to his fame. The world knows only one Gorgas.

I may say that I have been very much gratified to receive a large number of commendations of this resolution, and I especially appreciate one from the widow of General Gorgas, as follows:

1661 CRESCENT PLACE,
Washington, D. C.

Hon. EDWARD T. TAYLOR,
House of Representatives, United States.

MY DEAR MR. TAYLOR: I was very much surprised and pleased to hear that you had introduced the joint resolution in the House of Representatives to change the name of Ancon Hospital, in the Panama Canal Zone, to the General Gorgas Hospital.

It is most gratifying to have this recognition of Doctor Gorgas's work in Panama, and I hope this bill may pass.

We lived at Ancon the 10 years we were on the Isthmus, the first 3 years in one of his wards of the hospital. The place is full of memories, and Doctor Gorgas loved it. That the hospital may hereafter bear his name pleases me beyond measure.

Many thanks to you, my dear Mr. TAYLOR, and to the Members who are interesting themselves in this measure.

Cordially,
MARIE D. GORGAS.

JANUARY 26, 1928.

Also a letter from Surg. Gen. Hugh S. Cumming as follows:

TREASURY DEPARTMENT,
PUBLIC HEALTH SERVICE,
Washington, January 27, 1928.

Hon. EDWARD T. TAYLOR,
House of Representatives, Washington, D. C.

MY DEAR MR. TAYLOR: My attention has just been directed to House Joint Resolution 175, introduced by you for the purpose of changing the name of the Ancon Hospital in the Panama Canal Zone to the General Gorgas Hospital.

This is a real inspiration, and I congratulate you for having thought of such an appropriate memorial to this great sanitarian and administrator, whose name will always be inseparably connected with health and sanitation on the Canal Zone.

Sincerely yours,

H. S. CUMMING, *Surgeon General.*

When the bill was before the Committee on Military Affairs the following letter was addressed by Major General Ireland, Surgeon General of the War Department, to Mr. JAMES, the acting chairman of that committee:

WAR DEPARTMENT,
OFFICE OF THE SURGEON GENERAL,
Washington, January 23, 1928.

Hon. W. FRANK JAMES,
House of Representatives, Washington, D. C.

MY DEAR MR. JAMES: In compliance with your request, I have to state that House Joint Resolution 175, introduced into the House of Representatives on January 20, 1928, by Mr. TAYLOR of Colorado, to change the name of Ancon Hospital to General Gorgas Hospital, has been brought to my attention.

It seems to me that this change of name would be a very appropriate way to honor the memory of General Gorgas, who was the head of the sanitary department on the Canal Zone during the entire time the canal was under construction.

May I say that Ancon Hospital does not belong to the War Department, but was built and is administered by the Isthmian Canal authorities.

Very sincerely yours,

M. W. IRELAND,
Major General, the Surgeon General.

Mr. MORTON D. HULL. Will the gentleman yield?

Mr. TAYLOR of Colorado. Yes; I yield to the gentleman from Illinois.

Mr. MORTON D. HULL. The gentleman is familiar with the fact that there is a bill before the House for a Gorgas memorial?

Mr. TAYLOR of Colorado. Yes; and I hope that research laboratory may be built. The idea is a splendid one. Of course, that has nothing to do with the name of this hospital. That memorial building is proposed to be erected in the Republic of Panama at some distance and on the opposite side of the city of Panama from this hospital, as I understand it. If I have time, I will refer to that matter again before I conclude.

I hope some day to see a monument or memorial building or some kind of a structure at some suitable place on the zone or some appropriate recognition of the splendid services of all the great engineers and others who helped to construct that canal: John F. Stevens; Gen. George W. Goethals, chief engineer and chairman of the commission, who passed away a few days ago; and Col. William S. Sibert, the genius of the locks, whose creation of the Gatun Dam and locks and lake added glory to American engineering; and Col. H. F. Hodges and Rear Admiral H. H. Rousseau, of the United States Navy, and many others.

Colonel Gaillard is the only one of all of them that I know of who has received a substantial, well-deserved, and lasting monument to his memory and memorial to his services on the zone. President Wilson immortalized Gaillard's fame as an engineer by issuing an Executive order changing the name of Culebra Cut and naming it after Colonel Gaillard, as follows:

EXECUTIVE ORDER

It is hereby ordered that the portion of the Panama Canal through the continental divide heretofore known as "Culebra Cut" shall hereafter be named "Gaillard Cut" in honor of the late Lieut. Col. D. D. Gaillard, Corps of Engineers, United States Army.

As a member of the Isthmian Canal Commission from March 16, 1907, to December 5, 1913, Lieutenant-Colonel Gaillard was in charge of the work in Culebra Cut until its virtual completion, being compelled to abandon his duties in July, 1913, through an illness which culminated in his death on December 5, 1913. His period of Panama Canal service included the years of most active construction work. He brought to the service trained ability of the highest class, untiring zeal, and unswerving devotion to duty.

I deem it a fitting recognition of Lieutenant Colonel Gaillard's service to the country to rename in his honor the scene of his life's triumph.

WOODROW WILSON.

THE WHITE HOUSE, *April 27, 1915.*

There are three great names that will always stand out in history in connection with the construction of the Panama Canal. The greatest act, an one that will be longest remembered, in my judgment, in the life of President Roosevelt, was in making it possible for the Panamanian Republic to maintain its independence and its existence as a republic, and in taking over the gigantic French fiasco on the Isthmus and making it possible for our country to get possession of the Canal Zone. I think that was the greatest benefit to our country and to humanity of the many acts in his long and marvelously useful and vigorous career.

Next in order is General Gorgas, who is given the credit by every nation in the world, of making it possible for our country to build the canal at that place.

And third, General Goethals, who came there after the work of General Gorgas had made it possible, and was the iron hand, the executive force, and the dominating spirit over the 40,000 employees that drove the work to a successful completion.

Each of those three men was ideally suited for the great task he performed, and not one of their names has been preserved or honored in any suitable way upon that scene of his greatest life work.

Personally, I think the canal ought to have been called the Roosevelt Canal; and I feel that one of the great locks should be named after General Goethals, another one after General Sibert, and that the other lock should be named after the next most deserving person on this great work.

I believe monuments of that kind and at that place would be much more fitting, suitable, and lasting than any others. Stone monuments and bronze statues are temporary and fleeting, and little noticed these days. I do not think great constructions of that kind should permanently retain insignificant and meaningless names. I think this would recognize and encourage patriotism. I feel it is a worth-while idea which has no relation to politics or money-making or other ulterior purpose.

Those great works of engineering skill and genius would be a living and lasting monument to their memory for possibly several hundred years, or at least until our country makes that a sea-level canal, which we will do some time.

However, these are matters that Congress will, I am sure, suitably handle some time.

General Gorgas stands out alone. He was not an engineer. He was a physician; he became the whole world's physician. He made possible the building of the "The eighth wonder of the world," the greatest physical undertaking since the building of the Egyptian pyramids. No one would have ever had any career on the Zone, other than death, if Gorgas had not first cleaned and redeemed that 400-year-old cesspool of disease before they went there. In two years he converted that horrible jungle into a delightful health resort, which it has been ever since.

He passed away nearly eight years ago and our country has not yet, to my knowledge, erected any monument or even a tablet to his memory.

That great hospital that he first made possible and then supervised the construction of, is his natural, permanent, and most suitable, proper, and appropriate monument and memorial; and that honor would not in any way conflict with or detract from the just fame and glory of anyone else. It would be a thousand times more appropriate than a stone monument that would cost a million dollars. From my acquaintance with him I do not believe he would care much for a stone monument or a bronze statue. I believe if he were alive he would very much more appreciate the actions of Congress in passing this resolution than in any of the many other honors that Congress has conferred upon him.

BIOGRAPHICAL SKETCH

I trust the Members of the House would be pleased to have your memories refreshed by a very brief and informal reiteration of a few of the main features of the life and services of General Gorgas. Every one should read his work on "Sanitation in Panama," and also the book entitled "William Crawford Gorgas, His Life and Work."

I am compelled by my limited time to speak rapidly and from memory only, and may not be technically exact. He was born at Mobile, Ala., October 3, 1854. He was the son of Gen. Josiah Gorgas, chief of ordnance of the Southern Confederacy during the Civil War, and who was afterwards president of the University of the South, at Sewanee, Tenn. And also president of the University of Alabama.

His mother was a daughter of Governor Gayle, of Alabama.

General Gorgas spent his boyhood days in part in Alabama and, during the war, with his mother in Richmond, Va., and afterwards in Baltimore, Md. He tried very hard, but failed to get an appointment to West Point.

He attended the University of the South and graduated in 1875, with an A. B. degree. He entered the Bellevue Hospital Medical College of New York, from which he graduated with a M. D. degree in 1879.

On June 16, 1880, he was commissioned in the Medical Department of the United States Army as a first lieutenant.

In 1885 he was sent to Brownsville, Tex., for service in connection with an epidemic of yellow fever. In his work he contracted yellow fever himself and came near dying, but fortunately for the world he recovered and was thereafter immune to that disease.

He rendered such splendid services that he was promoted to the rank of captain that year. While he was stationed at Brownsville, a young lady, Miss Marie Cook Doughty, came there to visit her sister, the wife of an Army officer. She was taken with yellow fever; her recovery was pronounced hopeless; her grave was dug; and Captain Gorgas had agreed to read the funeral services the next day. Instead of that he succeeded in saving her life and married her, and she was his constant companion and splendid helpmate from that time until his death, 35 years afterwards, and she lives here in the city of Washington at the present time. [Applause.]

At the outbreak of the Spanish-American War in 1898 he went to Cuba with our forces. He was promoted to the rank of major, and as the chief sanitary officer of Habana from 1898 to 1902 he made the first actual practical demonstration in the world of the eradication of yellow fever. Yellow fever met its master in Habana for the first time in history. To Gorgas belongs the credit of having originated and executed the methods for the extermination of the stegomyia.

For this distinguished service Congress promoted him to the rank of colonel in 1903, and he was appointed Assistant Surgeon General of the United States Army.

As before stated, in May, 1904, he was appointed chief sanitary officer of the Panama Canal Zone, and held that position 10 years, from before work was commenced until the canal was completed.

In 1907 he was appointed a member of the Panama Canal Commission; and in 1914 he was promoted to the position of Surgeon General of the Army, with rank of brigadier general.

His world-renowned work of wiping out yellow fever and malaria from the Isthmus of Panama and cleaning up the cities of Panama and Colon, exterminating the stegomyia mosquito, and reducing the death rate to less than it was in any State or city in the United States, and thereby, for the first time, making it the healthy place it has been ever since, and making it possible to build the canal, was the greatest and most far-reaching and important work of his life. That was the greatest triumph of his marvelous life.

For that unparalleled service to his country and to the world, Congress in 1915 gave him a vote of thanks and promoted him to the rank of major general.

On October 4, 1918, having reached the age limit of 65 years, he was retired from the Army.

From the time our country entered the World War, on April 6, 1917, until the armistice on November 11, 1918, as Surgeon General of the entire United States Army of over 4,000,000 men, he made the greatest record that has ever been made by such an officer in the world. He organized the greatest, best equipped, and most complete and efficient Medical Corps in all history. He had 35,000 officers and 250,000 enlisted personnel under his command, and built, furnished, and equipped sufficient hospitals in Europe and in the United States to properly care for 4,000,000 men.

For the first time in the history of our country, or any other country it is believed, he had the Medical Corps definitely and specifically specialized, so that all wounds, diseases, and complaints of every kind were treated by a thoroughly competent professional specialist in that line, and thereby reduced the death rate in our Army to below that of any other army in the war.

From the time of his great success in Habana, and especially after his world-famous achievements on the Isthmus of Panama, he was constantly appealed to by nearly every nation to come to them and exterminate the fever and malaria and redeem their stricken districts as he had in Habana and Panama.

From time to time, when he could get away for a short time, he obtained temporary leave of absence and went to Ecuador, Peru, Colombia, Brazil, Venezuela, South Africa, and other countries. After his retirement he was selected as the chief of the Rockefeller yellow-fever foundation, and was constantly eradicating disease-infected places in many countries.

He had the supreme gratification of his life's hope and ambition to eradicate yellow fever from practically the entire world, when at the invitation of the British Government, to investigate some yellow-fever conditions on the West Coast of Africa, he, on May 8, 1920, with his wife and personal staff, sailed for London for that purpose. He reached London safely, and went to Belgium and visited a few days with King Albert, who decorated him with a gold medal in recognition of his services to mankind, and then returned to London, where, on May 30, he had a slight paralytic stroke. He was taken to the Queen Alexandra Military Hospital. King George had before that made an appointment to see the general, and when the King learned of the general's illness, he said:

If General Gorgas is too ill to come to the palace to see me, I shall go to the hospital to see him—

And he did so, and personally presented the general the Insignia of Knight Commander of the Most Distinguished Order of St. Michael and St. George. My understanding is this order of knighthood is the highest distinction that the King of England can confer upon anyone not a British subject.

On July 4, 1920, when throughout our country from Plymouth Rock to the Golden Gate we were proudly celebrating our national independence, in the serene Indian summer of life, at the meridian of his fame, the angel of death beckoned him, and his great soul passed to the great beyond.

King George ordered a formal state funeral in St. Paul's Cathedral, which was conducted with all the honors that could be given a victorious British major general, which is the highest honor that Britain could pay a distinguished American. A leading British periodical published the following description of the funeral:

A riderless horse walked up Ludgate Hill the other day behind its sleeping master; and if a horse can feel and know what happens, its heart must have been breaking—unless there came to it new strength in the pride it felt in the sight of its master sleeping under the Stars and Stripes on his way to St. Pauls.

For what was happening that day up Ludgate Hill was a rare and stirring thing. I looked down from the windows of the little house with green shutters in the very shadow of the dome, and I thought that here, indeed, was a public opinion of which our London and our country and all the entire world might well be proud. For here was no great Englishman, no great Briton, going to his rest; here was a ragged, barefoot boy of Baltimore being carried to St. Pauls after his life work was done.

He had done for the world one of the greatest things that an American brain has ever done; he had made the Panama Canal after thousands of people had died in the attempt.

Now, think how he began his life. This is what he told us:

"I first came to Baltimore a ragged, barefoot little rebel, with empty pockets and empty stomach. My father had gone south with Lee's army. At the fall and destruction of Richmond my mother's house with all that she had was burned, leaving her stranded with six small children. She came to Baltimore and was cared for by friends. These memories are vivid with me and can never be effaced."

And the other day he rode up Ludgate Hill, sleeping his last sleep on earth, wrapped in the Stars and Stripes. There were thousands of men and women and children standing still, there were hundreds of men in khaki passing by, there were ambassadors and other great people, and the lonely woman who was on her way with her hero to conquer disease in Peru when death took him from her. And there was the riderless horse.

All these came up Ludgate Hill, and as the sun poured down on this ancient way, our hearts and ears throbbing with the solemn music of the dead march, we knew that we were looking on the passing of a man whose name would shine for ages in the history of our race.

It seemed good that death should find him here, for so there came our opportunity to do a great man honor. He passed through the great door through which the sun streams into the nave of St. Pauls, and there he lay with Nelson and Wellington and all that mighty host who came this way and passed into the universe.

They will take him to his own land, but in truth he belongs to us all. He was one of life's great helpers, for he cleaned up foul places and made them sweet, and now, as they said of Lincoln, "he belongs to the ages."

The general's remains were brought home on an American transport; the body lay in state for four days in Washington, when it was buried with the highest military honors on one of the most beautiful slopes of Arlington—the Westminster Abbey of America's heroic military dead—overlooking the Capital of the great Nation he loved and served so well.

HIS CHARACTER AND FAME

No words are sufficiently eloquent to do justice to the name and fame of General Gorgas. I knew him for 11 years, not intimately, but fairly well. I had brief visits with him on each of several trips to the zone when the canal was in the course of construction, and a number of times afterwards in Washington. It was a rare privilege to know him and a genuine delight to converse with him. There is nothing that I can say about him that has not been frequently and more eloquently said by others.

He was the most modest and mildest mannered great man I have ever known. He had the engaging simplicity of the truly great. He was quiet and unaffected, and always a courteous and princely gentleman of the old school. His kindly and gracious manner, his invariably courteous and considerate treatment of all, endeared him to everyone. No one could resist being attracted by the pleasing magnetism of his wonderful personality. He was of a retiring disposition, and his sincerity and honesty of purpose inspired universal admiration and confidence.

While his manners were always gracious and dignified, there was always an individual suavity and a kindly smile. He personified and shed around him a light of good will, kindness, fellow feeling, warm-heartedness, and the graciousness and charming simplicity of a true man and a perfect gentleman. A nobler man than whom never lived. He was transparently honest.

While he was the supreme head, the Surgeon General, and chief commander of the 35,000 officers and the 250,000 enlisted personnel under his command in the Medical Corps of the American Army during the World War, he did not depend so much upon giving orders as upon tactfully obtaining hearty and enthusiastic cooperation. He was gentleness, fondness, and poise personified. Yet underneath was the fixed determination of a man who was sure of himself. He had a firm but gentle hand. He had a genial and unaffected love for his fellow man, and he was the most beloved medical officer in the United States Army.

Those truly noble traits were the secret of his marvelous success and the affection that all had for him. He was indeed a servant of mankind and a benefactor of humanity. He was a citizen of the empire of humanity and of the kingdom of man. Napoleon sold the great Louisiana Territory to our country for a song because his army had been annihilated at Santo Domingo by yellow fever.

The name of Gorgas will go down in all history as the man who stamped out of the civilized world forever that horrible

disease. He has freed countless millions from suffering and premature death. He made this world safer for his fellow man. The entire world is much richer and happier because he lived and labored. Historians may differ as to what man has caused the most deaths in the world, but they will never differ as to who has saved the most lives. [Applause.]

In my judgment, our country has produced probably only five names that will go down in history and be revered as long as the human race inhabits this planet. Those great names are George Washington, Thomas Jefferson, Abraham Lincoln, William C. Gorgas, and Thomas A. Edison.

The name of each of them throughout the world will always be an inspiration, a symbol of genius, generosity, and service to humanity.

General Gorgas was America's ambassador of mercy to the whole world. He was America's most distinguished citizen and the world's greatest physician. His field was the human race on this planet. He enriched science and life, and countless posterity will call his name blessed.

His greatest service to humanity was rendered on the Isthmus of Panama, and that is and should be his memorial and his monument for all time.

He was the greatest benefactor the suffering world has ever had. He filled the world with admiration for his unparalleled genius and service to humanity. He belonged to and honored the United States of America. But his fame and his life work now belong to the entire human race. Every nation in the world is proud of him, and nearly all of them have honored him in some way. He not only served his country and his generation nobly and grandly, but the billions of human beings yet unborn will forever owe him an everlasting debt of gratitude. He was the greatest sanitarian the world has ever produced. He was the economic savior of Cuba and the redeemer of the Tropics.

His work and his fame are destined to grow with the years. His life is a glory that stands apart, unrivaled and unapproached. The inspiration of his example extends to the uttermost ends of the earth.

He laid down his life for all humanity—that throughout all the ages the human race might be the legatee, the beneficiary of his genius, his character, and his life work.

He was an honor to our beloved country and to the human race. Fame herself has placed the laurel upon his immortal brow, and as long as time shall carry the record of human achievements every nation on this planet will proudly pay tribute to the memory of William Crawford Gorgas. [Applause.]

Mr. BUCHANAN. Mr. Chairman, I yield three minutes to the gentleman from Ohio [Mr. McSWEENEY].

Mr. McSWEENEY. Mr. Chairman and gentlemen of the committee, I have asked for just a few minutes to express to the House my profound grief at the death of our good friend, Mr. Edgar Wallace, who as you all know was the legislative representative of the American Federation of Labor. When I first came to Congress Mr. Wallace often came to my office, as he continued to do until his death. I talked with him frequently and found that he was not a propagandist, but a man trying to give to me and to other people information along the line of the work he was interested in. I heard several little things from him as to his youth. I asked him to give me some incidents of his boyhood and young manhood. I found that he was born in England, and that when a lad of 11 years of age he worked in the coal mines of Cornwall. He used to lie on his side on the damp floor of the mine and pick with his pick against the black wall and get the coal out and push it down with his feet so that the men could gather it and put it in the cars. His industry and effort led him to come to America. Here he affiliated himself with the workers of this country, and his great sincerity of purpose and his highmindedness and everything that goes to make a conscientious and honest worker gained for him recognition in this great organization, the Federation of Labor, and the intrepid leader of that great organization, Mr. Gompers, made him its legislative representative. Those of you who have had contact with him know that he was ardent, sincere, and supremely honest in everything that he undertook to do for his people. Coming down here and living in Washington did not cause him to forget the hardships of his own youth nor those his colleagues are undergoing who are now members of that great organization. He was always mindful of them. I took an added interest in him, because I was a member of the Committee on Agriculture and he came before that committee four years ago. He said that America could not have a lop-sided prosperity, that the laborers in other fields of industry would suffer if the dollar earned upon the farm was not given its just purchasing power. He came back to our committee, not in an "I told you so" manner, a few days ago and said that his prophecy of four years ago had come true, that the laborers had suffered because a third of the population of America had been cut down in their power to purchase the commodities made by the hands of his colleagues in other lines of endeavor. He was willing to have the farmer aided, even if it resulted in a slight increase in the cost of the things which his fellow laborers had to purchase.

I know that the federation can find among their numbers a worthy successor who will honestly and in a broad-minded way present the cause of the federation.

Hamlet, when leaving this life, said, "I die, thou livest; report me and my cause aright to the unsatisfied." I say to you, Edgar Wallace died; we live. Let us always struggle to report him and his cause aright to the unsatisfied.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. BUCHANAN. Mr. Chairman, I yield 20 minutes to the gentleman from Kansas [Mr. AYRES].

Mr. AYRES. Mr. Chairman, I do not intend to make a tariff speech this afternoon, although that seems to be the order of the day. However, in view of the speech that was made by the genial gentleman from Michigan [Mr. KETCHAM] a few days ago relative to the present tariff law being so beneficial to the farmers of the country, I thought it might be well to make a few observations at this time. I suppose when the gentleman made his speech he was thinking of what was said in the press throughout the country at the time the Fordney-McCumber tariff bill was under consideration, and I think about the time it was passed. I was not in Congress at that time, as I had accepted an invitation from my constituents to come back and visit with them for a couple of years. Therefore, in the language of Will Rogers, I saw it in the press. The report at that time was that the agricultural schedule of the Fordney-McCumber Tariff Act was so framed that it would add anywhere from $250,000,000 to $300,000,000 annually to the income of the agriculturists of the country. This law has been in operation since September, 1922, or five and a half years.

So, if that statement—that it would add anywhere from $250,000,000 to $300,000,000 to the income of agriculture—was true, it seems to me it should have added at this time at least $1,500,000,000 to the income of agriculture.

It may be that the agriculturists of Michigan are receiving their proportion of that $1,500,000,000; but I am quite sure that the agriculturists of the State of Kansas have not received their share, at least I have had no such notice to that effect.

Now, among other things, he said this:

> Now, to sum it all up, my good friends, I trust the logic, the cold logic of these figures, that are impersonal and have nothing of a political flavor in them whatsoever, may speak the cold, hard truth, and I hope they will be consulted by the next one of my good Democratic friends who wants to rise up here and declare that the Fordney-McCumber Act has been responsible for the ills of the farmer.

He says further:

> Putting it now in a final word and in the terms that the farmer himself usually uses, his commodity dollar—in other words, the amount of his commodities that he would have to exchange for commodities of other kinds that he buys, according to the old plan of trade and barter—his commodity dollar was a 70-cent dollar in October, 1922, and in October last it was a 92-cent dollar, or an increase in the relative purchasing power of the farmer's commodity of 32 per cent since 1922.

I do not know just how he arrives at these figures; but I was interested in that statement and asked him to yield, and wanted to ask him some questions; but, of course, he was limited as to time, just as I am this afternoon. But I recollect having written to the Secretary of Agriculture after I came back to Congress and asked him regarding the purchasing power of the farmer's dollar. I have a statement from former Secretary Wallace, who was Secretary of Agriculture at that time, and also a statement from the present Secretary of Agriculture, Mr. Jardine. I asked that the purchasing power of the farmer's dollar be given from the year 1913 up to the year 1925, and here is what the two Secretaries of Agriculture gave me:

	Cents
1913	100
1914	105
1915	103
1916	97
1917	107
1918	112
1919	112
1920	96
1921	84
1922	89
1923	61.3
1924	62.4
1925	60.3

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. AYRES. Not now, if the gentleman please. I am going to make a more elaborate speech on the tariff later on.

Mr. MADDEN. The gentleman is relying on somebody's statement in regard to these figures, is he not?

Mr. AYRES. I simply relied upon the gentlemen whose duty it is to collect those statistics and report what the purchasing power of the farmer's dollar may be. I called upon the Agricultural Department a few days ago and told them I wanted the latest figures, and in reply I received data showing that in 1926 it was 62 cents and in 1927 it was 66 cents.

I am relying upon the statements of the Secretaries of Agriculture on this matter.

Now, if the farmers of the country are so well satisfied with the Fordney-McCumber Act, I should like to know why it is at this session of Congress 61 bills have been introduced to amend the present tariff law; 61 bills. I have them all here, and I want to say that of those 61, 36 of them were introduced by Republicans and 25 by Democrats. I am not going to call attention to all these bills, but I want to call attention to a few of them.

At the beginning of this session of Congress, on the 5th of December, Mr. FRENCH, of Idaho, who is a conservative man, introduced a bill wherein he asked for an increase of tariff rates on such farm products as eggs. On the same day he introduced another bill in which he asked for an increased tariff on butter. He also introduced another bill on the same day asking for an increase of duty on all grass seeds, such as alfalfa and clover seed. Then he introduced still another bill wherein he asked for an increase of the duty on such farm products as peas, both dried and green, and on the same day still another bill in which he asked for an increase of the tariff on onions.

And then Congressman LAMPERT, from the State of Wisconsin, and others from the Northwest country, on the same day introduced a bill asking for a tariff on calf and veal leather. Then the gentleman from Colorado [Mr. TAYLOR] introduced a bill wherein he asked that hides be taken off the free list and put on the protected list. The gentleman from Indiana [Mr. HOGG] introduced a bill wherein he asked that the tariff rate be increased on onions. Then we have another Republican from the northwest country, Wisconsin [Mr. SCHAFER], who introduced a bill asking that calfskins and veal leather be put on the protected list, and then the gentleman from Minnesota [Mr. SELVIG] asked for an increase of the tariff rates on turnips, milk, butter, cheese, poultry, eggs, buckwheat, and a number of other farm products.

Then Representative GOODWIN, from the State of Minnesota, a Republican, asked that the tariff be increased on sago flour. Also, he introduced another bill at that time asking that the tariff be increased on tapioca and tapioca flour. He also introduced another asking that the tariff be increased on Irish potatoes. Then the gentleman from Wisconsin, Mr. LAMPERT, introduced another bill asking that the tariff be increased on peas. Then we have another Republican, the gentleman from the State of Texas, Mr. WURZBACH, and he asked that the tariff be increased on onions. Then we have a Democrat from Montana asking that the tariff be increased upon several farm products.

Mr. MADDEN. Why does not the gentleman give his name?

Mr. AYRES. Then we have last, but not least, the chairman of this subcommittee, Mr. DICKINSON of Iowa. He asked that the tariff be increased on not less than 15 or 20 products which are produced by the farmer, including such articles as corn, and he asked that cattle hides be placed upon the protected list; he asked that the tariff be increased on swine, on raw meats, extracts of meats, and various and sundry articles. Then we have Mr. WURZBACH introducing another bill asking that the tariff be increased on several articles, such as tomatoes, onions, and various articles produced by farmers. Then we have the gentleman from Iowa [Mr. COLE], who spoke this afternoon and said he was satisfied with the tariff on the whole—I do not know what he meant by that statement when I read the bill he has introduced wherein he is asking that the tariff be increased on certain farm commodities. I might go on and on, but time will not permit. As I say, there have been 61 tariff bills introduced at this session of Congress asking for a change in the present law.

Mr. MADDEN. Why did not the gentleman read the names of Democrats who have introduced bills?

Mr. AYRES. I am perfectly willing to read them. We have so far, I think, eight Democratic bills, including one introduced by myself, where they have asked for an increase of the tariff on farm commodities.

Mr. MADDEN. I notice the gentleman was very careful not to read the names of Democrats.

Mr. AYRES. No; I beg the gentleman's pardon. I called his attention in the first place to the fact that there were 25 bills introduced by Democrats and 36 by Republicans. I am perfectly willing to say to the gentleman that I introduced a bill myself to raise the tariff on farm products but at the same time to reduce it on manufactured products which, I think, is the only way by which you can bring about an equality, as far as the tariff is concerned, between manufactured articles and farm products.

Now, last but not least is the gentleman from Michigan, [Mr. KETCHAM], who has introduced a bill which is called the debenture plan. This is what he said in the RECORD, or, at least, he is responsible for this statement because he asked for leave to extend his remarks and said he had had this statement concerning the debenture plan prepared. In that statement it is said:

> Since the inequalities resulting from the tariff system are one of the sources of difficulty, the logical and sensible thing to do is to apply the remedy at that point.

Further:

> Opponents of the export debenture plan usually base their opposition on the plea that it is a subsidy. The plan is no more a subsidy than is the protective tariff.

Then it goes on to say:

> The farmer is asking merely that there be applied to his problem some of the same spirit of tariff adjustment and modification as is already being used to accommodate industry and capital.

Evidently when the gentleman from Michigan was stating the object of the debenture plan he was not as favorably inclined to the present tariff as he seemed to be when he spoke the other day.

So I could go on if I had the time and call attention to many more of the same kind of speeches that have been made by Republican Congressmen as well as some Democratic Congressmen, representing agricultural districts, showing that they are not satisfied with the present tariff. Notwithstanding that fact when the McMaster resolution, which called for a tariff revision during the present session of Congress, was up before the House for consideration a few days ago I am inclined to think the RECORD will show that practically all of the Representatives from the agricultural districts of the West and Northwest voted to table that resolution and not consider it. There were a few exceptions. [Applause.]

Mr. SANDLIN. Mr. Chairman, I yield 20 minutes to the gentleman from New York [Mr. BLACK].

Mr. BLACK of New York. Mr. Chairman and gentlemen of the committee, sincerity from a candidate is a rarity. Hoover, who has done such unusual things as turning from internationalist to American, from Democrat to Republican, from mining engineer to political mechanic, from loud speaker to muffler, has proven sincere as a candidate. He announced that he would follow the Coolidge policies and proved as good as his word by straddling on major problems. He tried to follow Coolidge and he got his trigonometry all tangled up and now he is just another good man gone wrong. He slipped into the Ohio primaries, got his geography all mixed up, went to Florida by mistake, and came back to Washington to start all over again.

But he must have fallen off a horse and got bitten by a fox in his early days hunting in merry England. He calls prohibition a great social experiment and that satisfies the Women's Christian Temperance Union and flaming youth. He says it is a great economic experiment and that satisfies the bootlegger and the professional panhandling dry.

On flood relief he is a bit hazy. He remembers there was a flood, whether it was on the Rhine or the Thames he is not quite sure. Something ought to be done about it. It was good first-page stuff once.

But we should not expect too much of Herbert—he has been hanging around these Republicans eight years and they have been just hanging around. They took one chance. They gave away the naval oil reserves and they got all messed up. So since then they have done nothing at all. [Laughter and applause.]

Herbert himself has been active—if being vocal is being active. If Great Britain ever sees his mimeograph fleet they will want a 5–5–3 ratio on press releases. He has been a sort of combination comptometer, printing press, and radio. He has issued as many statements as a distinguished interrogating Senator and they mean just as much. Howling Herbert is the antithesis of Silent Cal. Every time a cow had a calf the Department of Commerce, alias Hoover, took credit. The responsible bull had to let the political bull christen the youngster. [Laughter.]

Every bulletin from the Department of Commerce was longer than a presidential message—and just as eventful. He has used

up more paper than Wilbur's paper Navy. He was the fellow who played the bass drum and the other doodads in the White House orchestra.

He is qualified, though. He was a sort of substitute President. When Coolidge would get tired doing nothing, Herbert would do it for him. Every time Kellogg had a nervous breakdown, Herbert was a sort of head keeper. When Jim Davis could not settle the coal troubles, Herbert gave him an alibi by proving that even the great god Hoover could not do it. When Jardine got annoyed at the American farmers, Hoover made faces at the British planters. When Wilbur could not put the country to sleep with bedtime stories, Herbert made a speech. He has not always been successful as a kibitzer. When he went over to run the Treasury he backed out before Uncle Andy as if he were leaving his old playmate, King George. He backed out, though, for another reason. Mellon, of course, never kicked the high tambourine like Wilbur, but Herbert was taking no chances.

Of course, Herbert, formerly of Red House, Hornton Street, London, would make a great President. We would be the most efficient unit in the British Commonwealth of Nations. We, in parliament, would have to get satin-knee breeches and silk stockings; also a supply of sawdust for padding the lower limbs. The house of lords at the other end of the Capitol would have to wear those trick wigs of the king's bench. The Democrats would wear white ones, the Republicans blue, and the Northwest group red. BORAH would have all three wigs for lightning-change purposes. Big Bill Thompson would have a blooming governor general over him in the province of Chicago.

My friend TILLMAN the other day in speaking of Hoover had something to say of Mark Antony. But TILLMAN lives too far from Broadway to realize the full dramatic possibilities of his idea, so I would whisper to Julius Cæsar Hoover as he goes forth with all gall—

Yon Cassius Calvin hath a lean and hungry look. Take care, Herbert, old dear, that you are not stabbed in the back with a flapjack. Cheerio!

[Laughter and applause.]

Mr. SANDLIN. Mr. Chairman, I yield 20 minutes to the gentleman from Missouri [Mr. COCHRAN].

Mr. COCHRAN of Missouri. Mr. Chairman and Members of the House, I again desire to invite your attention to the toll-bridge situation. It is my humble opinion that unless the Congress takes some action the people of the country will be in the clutches of another monster, this time a toll-bridge trust. The possibilities of a toll-bridge trust are far from being remote, and I feel I am in a position to-day to disclose facts which warrant this statement.

Members will recall I recently addressed the House on the subject of toll bridges, at which time I stated that in certain cases bonds and other securities issued in connection with the construction of toll bridges were beyond the control of the blue-sky departments of the various States. After talking with bridge contractors, as well as investment bankers, I again assert, in some cases the blue-sky officials have no control over these securities.

My contention is, the Congress in granting consent for the construction of these bridges protects the city, county, or State by the recapture clause, but you do not extend any protection whatsoever to the purchaser of the securities because you wait until after the bridge is constructed before you require the promoter to file a statement of cost. I feel, as it is the Congress that makes the project possible, the Congress should in some way—and I care not how—demand that before the plans and specifications are approved a limitation be placed in keeping with the actual cost of construction, financing, and so forth, plus 10 per cent, on the securities that can be issued.

I proposed to read to the House an article from one of the great newspapers of the United States, the St. Louis Post-Dispatch. I was astonished when I read this article, and I feel you will likewise be astonished. In large type the headlines read:

BRIDGE PROMOTER FOSTERS SCHEMES FOR 33 PROJECTS—TOLL SITES IN CARONDELET DISTRICT AND AT END OF OLIVE STREET ROAD AMONG AGENT'S PLANS—DENIES COMPANY WILL SELL STOCK—EUGENE M. ELLIOTT, OF CHICAGO, SAYS HE IS EMPLOYED TO FIND LOCATIONS FOR STRUCTURES OVER UNITED STATES

The article follows:

A promoter, employed by a large New York financial and engineering firm to locate highway toll-bridge sites and obtain local and congressional franchises for constructing them, is fostering the projects now pending for a bridge over the Mississippi in the Carondelet district and one over the Missouri at the end of Olive Street Road for a short cut to the Kansas City Road.

He is fostering also the projects for other toll bridges—at Hermann, Arrow Rock, and near Independence, Mo., over the Missouri, and at Golconda, Ill., and Augusta, Ky. (near Cincinnati), over the Ohio. In all, he has about 33 toll-bridge schemes scattered about the country. Of these, he says, his principals definitely plan now to proceed with construction of 16, including the Olive Street Road crossing, near Chesterfield; the one at Hermann and the one near Independence, at Liberty Landing. He declines to state where others are located or to enlarge on the financial and physical plans of any of the proposed structures.

WORKS FOR NEW YORK FIRM

The promoter, known in various parts of the country as a "high-pressure salesman," is Eugene M. Elliott, of Chicago, operating a firm of nominal capitalization, E. M. Elliott & Associates (Inc.). He is acting in behalf of J. G. White & Co., of New York. Elliott says he is under contract with this concern to locate sites and arrange franchises for a fixed compensation.

In addition, Elliott points out, he has the opportunity to profit personally in speculation on real estate near bridgeheads. He would not say whether he was indulging in such speculation in the St. Louis district. All franchises, including those already obtained by him from the St. Louis and St. Charles County courts are assigned to White & Co., Elliott says. White & Co. will arrange the financing of the various projects through bonds and debentures, Elliott explains, but will not offer stock for sale. In keeping with terms of the congressional grants, he adds, all promotion and financing costs, including his compensation, will be limited to 10 per cent of construction cost.

Whether any of his compensation will come in securities of bridge companies, Elliott will not say. He does not plan to handle sale of any securities, and he is not licensed in Illinois or Missouri to do so.

LOCATES CHESTERFIELD SITE

Several months ago Elliott located the proposed Chesterfield bridge. After the St. Louis County court granted a franchise for it, and while similar application was pending in the St. Charles County court, a newspaper item about desire of citizens for the Carondelet bridge attracted Elliott, and a representative of his got in touch with Stewart D. Flanagan, a lawyer, president of the Carondelet Improvement Association.

A week ago last night Elliott, visiting St. Louis, addressed that association, which then voted to authorize Flanagan to help the project in any way he could and to arrange for messages to Congressman NIEDRINGHAUS in favor of the congressional franchise. Citizens of Dupo, Ill., also eager for this bridge, attended the meeting. Bills for congressional franchises for the Carondelet and Chesterfield bridges are pending in committee.

At the association meeting Elliott declared a subsidiary of his employer, the J. G. White Engineering Corporation, was studying traffic potentialities of the Carondelet crossing and physical features. He expressed the opinion that this bridge would be built and would pay for itself in a comparatively short time. If it isn't built, he asserted, the franchise will be returned.

TO FORM LOCAL COMPANY

Supposing the bridge costs $3,000,000, Elliott told the gathering, $2,000,000 of the money will be raised through White & Co.'s banking connections and the remainder will be covered by White & Co. Of the income from tolls, he declared, 92½ per cent will be devoted to paying off the funded debt, leaving the balance for profits. A local company will be formed, he said. In a subsequent interview with a Post-Dispatch reporter, Elliott declined to make any further explanation of the financial set-up contemplated. He indicated similar arrangements would be made in the other bridge projects.

Two weeks ago, after delaying for a time in an effort to get a guarantee from Elliott that the Chesterfield bridge would be built, the St. Charles County court granted a franchise there.

Franchises for the toll bridges at Hermann, Arrow Rock, and Liberty Landing, Mo., and Golconda, Ill., have been passed by one House of Congress and are pending in the other. Most of the stock of the Centennial Bridge Co., which has the Liberty Landing franchise, is held in the name of Elliott. At Independence it was stated this company plans to finance itself by preferred stock and bonds sold to the public through banking houses. The Golconda franchise is in the name of Mayor Charles Abbott, of Golconda, who was assured through correspondence of the backing of White & Co.

BETTER BUSINESS BUREAU REPORT

The Chicago Better Business Bureau reported, after an interview with Elliott last summer, that his firm, besides obtaining bridge franchises, had the purpose of forming operating corporations, placing bonds, accepting bids, and supervising engineering, taking as remuneration shares of stock in the companies formed and commissions from construction companies.

Elliott went to Florida in 1922 and became securities sales manager of the firm that built a 6-mile bridge over the bay between Tampa and St. Petersburg. He was successful in this. He bought 27,000 acres of land at the St. Petersburg end and made large personal profits in its sale, as the bridge increased its value. In connection with this business, the Federal Government attached some of his property under a $503,238 claim for income taxes and fines, although Elliott contended his profits then were paper only. Eventually he settled for $122,932.

Elliott, who says he is worth $800,000 to $1,000,000 now, owning a yacht, a St. Petersburg estate, and a Rolls-Royce, has one or two small judgments against him in Chicago, which, he states, "I am paying off as fast as I can."

I have asked the chairman of the bridge committee not to call up any additional bills in which Elliott and associates are interested until I complete my investigation. He has assured me he will not do so. If any bills where the consent to construct is vested in ELLIOTT and his associates are called up I will be compelled to object.

Mr. DENISON. Will the gentleman yield there?

Mr. COCHRAN of Missouri. Yes.

Mr. DENISON. I do not want to be misunderstood about the matter. I understood the gentleman to ask me not to bring up any bills until the next consent day, which I am not going to do, of course.

Mr. COCHRAN of Missouri. Then we misunderstand each other. I want to say that if the gentleman calls up any of these bills before I complete my investigation, I will be compelled to object to them.

Mr. DENISON. Let me keep the gentleman from Missouri straight about the matter. I merely call up these bills as chairman of the subcommittee as a matter of convenience for the Members who introduce them. They come up on consent day, and on the next consent day these bills will come up naturally in their order just as other bills on the Consent Calendar, and I merely told the gentleman from Missouri I did not have any purpose of calling up any bridge bills until the regular consent day.

Mr. COCHRAN of Missouri. I fully understand and I did not mean to convey the impression that the gentleman was calling up these bills for any individuals.

The day following the same paper carried this editorial:

THE TOLL-BRIDGE GAME

The toll road—that relic of ancient times—is practically extinct in the United States, but it looks as though the toll bridge is just coming into its own. Eugene M. Elliott, a high-powered salesman from Chicago, plans to introduce the toll bridge on a grand scale in and around St. Louis. He has various projects in the fire—one over the Mississippi at Carondelet, one over the Missouri at the end of Olive Street road, others at Hermann and Arrow Rock, not to mention projects at more remote localities. It is Mr. Elliott's business to plaster toll bridges upon the populace wherever he can, and it appears he is about to do a thriving business hereabouts.

Mr. Elliott represents J. G. White Co., a huge public utility corporation of New York, which will finance the projects. It is said that not more than 10 per cent of the construction costs will go for promotion and financing. Mr. Elliott gets his cut from this 10 per cent, besides what he can pick up by speculating in lands in proximity to the bridges. Of the income from tolls after the bridges are built, 92½ per cent will go to pay off the funded debt, leaving the rest for profits. Of course, the major part of the financing will be accomplished by selling bonds to the public.

In other words, the public holds the bag. It buys the bonds, putting up money for construction. It also pays tolls to work off the bonds. Eugene M. Elliott and J. G. White Co. jointly furnish the brains and jointly rake in the profits. While we believe thoroughly in rewards for brains and enterprise, we fail to see why the public should let Mr. Elliott and the White company enrich themselves at its expense. The public can build these bridges itself without paying promotion fees and profits to professional organizers.

Painfully and laboriously the public is buying St. Charles Bridge from its private owners. How much better and cheaper it would have been for the State to build this bridge itself! Are we to have a recurrence of this nuisance at Carondelet and at the end of the Olive Street road? Not if public leadership asserts itself and shows some business acumen.

The St. Louis Globe Democrat, another great newspaper, carried the following editorial during the week, which shows where some cities in Missouri are now purchasing old toll bridges. The editorial is as follows:

TEARING DOWN RIVER BARRIERS

Jefferson City business men have about completed organization of a company of civic groups for the commendable purpose of tearing down another toll barrier across the Missouri River. This organization, headed by Mayor C. W. Thomas, has plans for taking over the highway bridge connecting Cole and Callaway Counties at Jefferson City and, in capacity of a holding company, applying the toll proceeds to the discharge of the purchase price, releasing the paid-for structure to the State as soon as earnings have repaid the investment. Thus, with the same plan that is being worked out by a holding company organized in St. Louis and St. Charles County for the purchase of the St. Charles Highway Bridge, the last toll bridge across the Missouri River in the State will be made free.

Under this program at Jefferson City the crossing there will be free of purchase debt in from five to seven years, or almost as soon if not as soon as the St. Charles crossing is open for the public without fee. Within the last few months tolls were lifted from a Missouri River bridge at Kansas City under a Jackson-Clay County bond issue and St. Joseph has voted funds for a free bridge across the river at that point. In the last few years Federal-aid bridges have been built under the McCullough-Morgan law at Waverly, Lexington, Glasgow, and Boonville. Few States bisected by a great stream to compare with the Missouri are so well situated with reference to open passage from one section to the other. Jefferson City is to be specially congratulated by citizens of the State for making the movement unanimous.

But as communities are moving to tear down toll barriers to free passage other movements are on foot for the construction of other toll bridges across the stream in the State. These, of course, are ventures of private capital and the promoters must see potential demand for such structures to offer their money in the undertakings. There can be no objection to such enterprises. But communities so favored can not but anticipate the time when public use will put these proposed bridges, too, on the scales of demand and place them up for public purchase through toll earnings. So the public has a right to view with interest matters of financing and totals of investment they will some day be called upon to assume.

I submit this statement from a great newspaper showing where one individual admits he is promoting 33 projects, some in his own name, some in the names of others, and where he says all such grants are finally assigned to one corporation, warrants the expression that the public is liable to be in the hands of a toll-bridge trust.

I have considerable information regarding the financing of toll bridges, but I want to be fair and not make any statement I can not support with facts.

For the time being I will refer to one project, because that project is mentioned in the article I just read. It is the so-called Gandy Bridge in Florida between Tampa and St. Petersburg. I am still investigating this matter, but I am in a position to disclose now the actual cost of construction of this bridge was $2,100,000. The financing, promotion, and overhead was given at $2,400,000, or 125 per cent above the cost of construction. Bonds and other securities have been issued in connection with this project amounting to $4,900,000. The authority for this statement is the railroad commission of the State of Florida.

Mr. CANNON. Will the gentleman yield?

Mr. COCHRAN of Missouri. I yield to the gentleman.

Mr. CANNON. I notice in the clipping which the gentleman includes in his remarks, or which I presume the gentleman will include in his remarks, that reference is made to the proposed bridge at Hermann, Mo., which was authorized under a bill which I introduced and which recently passed both the House and the Senate. Is it the gentleman's understanding that any one man who is not a resident of Hermann or of the adjoining counties had anything to do with promoting the proposition to authorize the construction of bridges at Hermann, Mo., or Washington, Mo.?

Mr. COCHRAN of Missouri. The only reply I can give to the gentleman is that I read that from an article in a most responsible newspaper—the St. Louis Post-Dispatch. I have not verified the statement, but the St. Louis Post-Dispatch quotes Mr. Elliott himself as saying that the Hermann bridge is one of the projects that is going to be finished.

Mr. CANNON. Does it say that Mr. Elliott had anything whatever to do with securing the introduction or passage of these bills in the House?

Mr. COCHRAN of Missouri. No; nothing whatever.

Mr. CANNON. The only connection, then, according to the gentleman's statement, that Mr. Elliott has with the legislation relating to these bridges is to be had after the authorization is secured.

Mr. COCHRAN of Missouri. So far as I am concerned; yes, sir.

Mr. CANNON. The relations, then, of Mr. Elliott are not with any Member of the House but with the communities to be benefited by these bridges at Hermann and Washington, Mo.

Mr. COCHRAN of Missouri. I have no information whatsoever about that.

The article discloses Mr. Elliott profited by reason of this project. He was the securities sales manager, so the report of

the Better Business Bureau says. If the Congress will order an investigation of all toll-bridge projects to be conducted jointly by the Chief of Engineers of the War Department and the Bureau of Public Roads of the Department of Agriculture, we will get the facts. I am informed such an investigation can be conducted at a reasonable cost, and can be completed in three months. I can tell you now the Bureau of Public Roads has attempted to get at the bottom of some of the projects, but has been denied the information asked for by the promoters. The fact that information has been denied should be sufficient to warrant the Congress to act.

I am informed by Government officials in some instances approaches connect with the Federal-aid road, which I understand is a violation of the law. If this be true it means an individual or corporation charges a toll for the citizen to reach the public highway.

The gentleman from Illinois [Mr. DENISON] has introduced a bill—H. R. 11485. It was only a few minutes ago that I secured a copy. While it appears to be an improvement over existing law, in my examination I failed to find where it affords any protection to the purchasers of the securities prior to the construction of the bridge.

Next year practically all the State legislatures will convene. I sincerely hope the States will see the wisdom of having their State highway departments erect toll bridges, sell bonds, create sinking funds, and after the operating expenses are paid place the balance in sinking funds to be used to pay the interest and retire the bonds so that the bridge will finally pay for itself and then be opened to the public free of tolls.

Mr. CANNON. Mr. Chairman, I ask unanimous consent to proceed for three minutes.

The CHAIRMAN. The control of time is in the gentleman from Iowa and the gentleman from Texas.

Mr. DICKINSON of Iowa. Mr. Chairman, I will yield the gentleman three minutes.

Mr. CANNON. Mr. Chairman, I always listen with interest to anything that my colleague has to say either on the floor or elsewhere. He is one of the most valuable Members of the House. But in this instance he appears to be laboring under a slight misapprehension—in one respect, at least. He vouches for newspaper statements, which he quotes, to the effect that Eugene M. Elliott, of Chicago, has been employed to "obtain congressional franchises" for a number of bridges, and that he is "fostering schemes" for bridges at Hermann, Mo., and elsewhere; and the gentleman proposes that Congress order an investigation.

I introduced companion bills authorizing bridges at both Hermann and Washington, Mo., and the man referred to had nothing whatever to do either with the inception and introduction of the bills or with their passage through the House and Senate. That is conclusively proven by the fact that both bills were introduced in the Sixty-ninth Congress and passed the House before he ever heard of Hermann or Hermann ever heard of him. No promoter, broker, or lobbyist has approached me on the subject either before or after the introduction of the bills authorizing the construction of these two bridges or the bridge across the Mississippi at Louisiana, which was authorized in the same Congress and which will be opened for traffic this month.

As a matter of fact, the bill for the bridge at Hermann was introduced at the request of the commercial club of that city and was indorsed by practically every business and professional man of the community including Hon. R. A. Breuer, judge of the thirty-second judicial district of Missouri; Hon. Charles A. Egley, mayor of Hermann; Judge H. L. S. Stolte, probate judge of Gasconade County; and R. W. Hilte and O. H. Nienhueser, president and secretary, respectively, of the local chamber of commerce and others.

These men or their representatives, I understand, after canvassing a number of propositions, have entered into negotiations with Elliott for the construction of the bridge, but he had nothing whatever to do with legislation granting the franchise. The business men of Louisiana arranged with Compton & Co. to finance their bridge and the citizens of Washington with still another company. Each community after arranging for legislation authorizing construction of their bridge proceeded to make provision independently for its construction and each of the three happened to select a different firm. The suggestion that promoters fostered these three bridges or any one of them or arranged with me for legislation authorizing them is wholly beside the facts. All three bills were introduced and had passed the House in the Sixty-ninth long before even preliminary negotiations had been taken up for their financing or construction.

Now, with the proposal that the State or Federal Government build these bridges I am in heartiest accord. I do not favor toll bridges except as a last resort. But I certainly prefer a toll bridge to no bridge at all. If the gentleman had stood on the banks of these rivers as I have for hours waiting for the ferry or had reached the river too late for the last ferry and been compelled to remain all night he would be glad to pay a bridge toll—especially when such toll is invariably much less than the toll charged by the ferry. In addition to its inconvenience ferriage is attended by some little danger. Only recently an automobile on a ferry crossing the river in my district rolled off the boat and was lost with all occupants. And of course, in winter, when the river is filled with ice, crossing even on a ferry is out of the question. If the gentlemen who are so solicitous about these bridge tolls will consult those who expect to pay them they will find that the prospective patrons are more than anxious for the opportunity to pay the toll and escape the delay, inconvenience and danger and cost of ferriage to which they are subject under present conditions.

There are no public funds available for the construction of these bridges. The local communities have taken up that question with the Missouri State Highway Commission, and I have taken it up with the commission myself; and the commission which has the allocation of all State and Federal highway funds invariably replies that no money is available for such bridges or will be available for many years to come. Furthermore, the Missouri State Highway Commission has written to me officially, indorsing the construction of these bridges by private enterprise. I agree with the gentleman in his advocacy of free bridges, but where it is a choice between a toll bridge and no bridge at all, as it is in this instance, I will take the toll bridge and pay the toll gladly, and every citizen of the communities to be served by these bridges takes that point of view.

I join the gentleman in the hope that the State will see the wisdom of having the highway commission erect such bridges and maintain them toll free, but until it does so erect them let us authorize the communities which need them to build them with private capital under the ample safeguards provided by these bills.

The CHAIRMAN. The time of the gentleman has expired.

Mr. DICKINSON of Iowa. I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. TREADWAY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 11577, the Agricultural appropriation bill, and had come to no resolution thereon.

COMMITTEE ON WAR CLAIMS

Mr. STRONG of Kansas. Mr. Speaker, by direction of the War Claims Committee, I ask unanimous consent that that committee may be authorized to sit during sessions of the House for 30 days, and that is to include the four subcommittees.

The SPEAKER. The gentleman from Kansas asks unanimous consent that the Committee on War Claims and the subcommittees be authorized to sit during the sessions of the House for 30 days. Is there objection?

Mr. GARRETT of Tennessee. Mr. Speaker, the gentleman from Kansas did me the courtesy to speak to me about this a few minutes ago. I understand it is at the request of the committee, and I am sure there is no objection.

The SPEAKER. Is there objection?

There was no objection.

FREMONT NATIONAL FOREST AND BIG HORN NATIONAL FOREST (H. DOC. NO. 192)

The SPEAKER laid before the House the following message from the President of the United States, which was read and, with accompanying papers, ordered printed and referred to the Committee on Agriculture:

To the Congress of the United States:

I am transmitting herewith for the consideration of the Congress copies of resolutions adopted by the National Forest Reservation Commission at its meeting held on February 18, 1928, together with letters from the Secretary of Agriculture relating to the proposed addition of certain public lands to the Fremont National Forest, in the State of Oregon, and the Bighorn National Forest, in the State of Wyoming, which have been submitted by the President of the National Forest Reservation Commission.

CALVIN COOLIDGE.

THE WHITE HOUSE, *March 1, 1928.*

ENROLLED BILL SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled a bill of the following title, when the Speaker signed the same:

H. R. 8227. An act authorizing the Sunbury Bridge Co., its successors and assigns to construct, maintain, and operate a bridge across the Susquehanna River at or near Bainbridge Street, in the city of Sunbury, Pa.

BILLS PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States for his approval bills of the House of the following titles:

H. R. 121. An act authorizing the Cairo Association of Commerce, its successors and assigns to construct, maintain, and operate a bridge across the Ohio River at or near Cairo, Ill.; and

H. R. 5679. An act authorizing the Nebraska-Iowa Bridge Corporation, a Delaware corporation, its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River between Washington County, Nebr., and Harrison County, Iowa.

ADJOURNMENT

Mr. DICKINSON of Iowa. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 5 minutes p. m.) the House adjourned until to-morrow, Friday, March 2, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Friday, March 2, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

Navy Department appropriation bill.

COMMITTEE ON AGRICULTURE

(10 a. m.)

To insure adequate supplies of timber and other forest products for the people of the United States, to promote the full use for timber growing and other purposes of forest lands in the United States, including farm wood lots and those abandoned farm areas not suitable for agricultural production, and to secure the correlation and the most economical conduct of forest research in the Department of Agriculture, through research in reforestation, timber growing, protection, utilization, forest economics, and related subjects (H. R. 6091).

COMMITTEE ON WORLD WAR VETERANS' LEGISLATION

(10 a. m.)

To amend the World War veterans' act, 1924 (H. R. 10160).

COMMITTEE ON THE MERCHANT MARINE AND FISHERIES

(10 a. m.)

To further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States (S. 744).

To promote, encourage, and develop an American merchant marine in connection with the agricultural and industrial commerce of the United States, provide for the national defense, the transportation of foreign mails, the establishment of a merchant-marine training school, and for other purposes (H. R. 2).

To amend the merchant marine act, 1920, insure a permanent passenger and cargo service in the North Atlantic, and for other purposes (H. R. 8914).

To create, develop, and maintain a privately owned American merchant marine adequate to serve trade routes essential in the movement of the industrial and agricultural products of the United States and to meet the requirements of the commerce of the United States; to provide for the transportation of the foreign mails of the United States in vessels of the United States; to provide naval and military auxiliaries; and for other purposes (H. R. 10765).

To amend an act of Congress approved July 3, 1926, being Private Act No. 272, and entitled "An act conferring jurisdiction upon the Federal District Court for the Western Division of the Western District of Tennessee to hear and determine claims arising from the sinking of the vessel known as the *Norman*" (H. R. 10646).

To amend sections 116 and 118 of the Judicial Code (H. R. 5690).

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

393. A letter from the Secretary of the Navy, transmitting draft of a bill "To authorize the Secretary of the Navy to advance public funds to naval personnel under certain conditions"; to the Committee on Naval Affairs.

394. A letter from the Secretary of the Navy, transmitting draft of a bill "For the conservation, care, custody, protection, and operation of the naval petroleum and oil shale reserves, and for other purposes"; to the Committee on Naval Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. WYANT: Committee on Interstate and Foreign Commerce. S. 2800. An act authorizing E. K. Morse, his successors and assigns (or his or their heirs, legal representatives, and assigns), to construct, maintain, and operate a bridge across the Delaware River at or near Burlington, N. J.; with amendment (Rept. No. 801). Referred to the House Calendar.

Mr. LUCE: Committee on the Library. H. R. 11200. A bill donating to the Ohio State Archæological and Historical Society two dedication stones formerly a part of one of the locks of the Ohio & Erie Canal; without amendment (Rept. No. 802). Referred to the Committee of the Whole House on the state of the Union.

Mr. GILBERT: Committee on the Library. H. R. 11482. A bill to amend section 2 of an act entitled "An act to authorize an appropriation for the care, maintenance, and improvement of the burial grounds containing the remains of Zachary Taylor, former President of the United States, and the memorial shaft erected to his memory, and for other purposes," approved February 24, 1925; without amendment (Rept. No. 803). Referred to the Committee of the Whole House on the state of the Union.

Mr. CHINDBLOM: Committee on Ways and Means. H. J. Res. 126. A joint resolution providing for the cooperation of the United States in the Pacific Southwest Exposition in commemoration of the landing of the Spanish padres in the Pacific southwest and the opening of the Long Beach, Calif., world port; with amendment (Rept. No. 804). Referred to the Committee of the Whole House on the state of the Union.

Mr. HAUGEN: Committee on Agriculture. S. 1181. An act authorizing an appropriation to be expended under the provisions of section 7 of the act of March 1, 1911, entitled "An act to enable any State to cooperate with any other State or States, or with the United States, for the protection of the watersheds of navigable streams, and to appoint a commission for the acquisition of lands for the purpose of conserving the navigability of navigable rivers," as amended; with amendment (Rept. 805). Referred to the Committee of the Whole House on the state of the Union.

Mr. LUCE: Committee on the Library. H. R. 10544. A bill to abolish the office of administrative assistant and disbursing officer in the Library of Congress and to reassign the duties thereof; with amendment (Rept. 806). Referred to the Committee of the Whole House on the state of the Union.

Mr. ANDREW: Committee on Naval Affairs. H. R. 9289. A bill to provide additional pay for personnel of the United States Navy assigned to duty on submarine vessels and diving duty; with amendment (Rept. No. 807). Referred to the Committee of the Whole House on the state of the Union.

Mr. JOHNSON of South Dakota: Committee on World War Veterans' Legislation. H. R. 4964. A bill to authorize the city of Muskogee, Okla., to remove and retain title to the boilers from the Municipal Hospital Building recently conveyed by the city to the United States Veterans' Bureau Hospital No. 90, at Muskogee, Okla.; without amendment (Rept. No. 808). Referred to the House Calendar.

Mr. GREEN of Iowa: Committee on Ways and Means. H. R. 10083. A bill to provide for advances of funds by special disbursing agents in connection with the enforcement of acts relating to narcotic drugs; without amendment (Rept. No. 809). Referred to the House Calendar.

Mr. LUCE: Committee on the Library. H. J. Res. 75. A joint resolution authorizing the erection of a monument to the memory of Sacajawea, or Bird Woman; with amendment (Rept. No. 810). Referred to the Committee of the Whole House on the state of the Union.

Mr. LUCE: Committee on the Library. H. R. 8132. A bill authorizing the appropriation of $2,500 for the erection of a tablet or marker at Medicine Lodge, Kans., to commemorate

the holding of the Indian peace council, at which treaties were made with the Plains Indians in October, 1867; without amendment (Rept. No. 811). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. SPEAKS: Committee on Military Affairs. H. R. 851. A bill for the relief of Alfred Chapleau; without amendment (Rept. No. 812). Referred to the Committee of the Whole House.

Mr. HOFFMAN: Committee on Military Affairs. H. R. 9722. A bill for the relief of Allen Nichols; without amendment (Rept. No. 813). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BRITTEN: A bill (H. R. 11616) to authorize alterations and repairs to certain naval vessels; to the Committee on Naval Affairs.

By Mr. BUTLER: A bill (H. R. 11617) for the conservation, care, custody, protection, and operation of the naval petroleum and oil shale reserves, and for other purposes; to the Committee on Naval Affairs.

By Mr. HILL of Alabama: A bill (H. R. 11618) to transfer hairy vetch seed from the dutiable list to the free list; to the Committee on Ways and Means.

By Mr. DYER: A bill (H. R. 11619) to adjust the salaries of criers and bailiffs of the United States district courts; to the Committee on the Judiciary.

By Mr. RAYBURN: A bill (H. R. 11620) to amend subsection (B), section 96, Federal bankruptcy act; to the Committee on the Judiciary.

By Mr. VINSON of Georgia: A bill (H. R. 11621) to authorize the Secretary of the Navy to advance public funds to naval personnel under certain conditions; to the Committee on Naval Affairs.

By Mr. FOSS: A bill (H. R. 11622) to amend the first paragraph of section 7 of the act entitled "An act reclassifying the salaries of postmasters and employees of the Postal Service, readjusting their salaries and compensation on an equitable basis, increasing postal rates to provide for such readjustment, and for other purposes," approved February 28, 1925; to the Committee on the Post Office and Post Roads.

By Mr. MORIN: A bill (H. R. 11623) to authorize construction at the United States Military Academy, West Point, N. Y.; to the Committee on Military Affairs.

By Mrs. ROGERS: A bill (H. R. 11624) to provide double total disability to blind veterans, with an increase in compensation, and for other purposes; to the Committee on World War Veterans' Legislation.

By Mr. LEAVITT: A bill (H. R. 11625) to amend the act of February 16, 1928, entitled "An act granting the consent of Congress to the State of Montana, Valley County, Mont., and McCone County, Mont., or to any or either of them, jointly or severally, to construct, maintain, and operate a bridge across the Missouri River at or near Glasgow, Mont."; to the Committee on Interstate and Foreign Commerce.

By Mr. McDUFFIE: A bill (H. R. 11626) to enable the promotion against the United States of proceedings in the nature of suits in admiralty to establish the claims of and/or by J. W. Hunter, as managing owner and operator of the late American schooner *Three Marys*, on behalf of himself and his coowners or the successor or successors in interest of them or any of them; and the claims of and/or by the successors in interest of J. W. Corry, lately managing owner and operator of the late American schooner *Frederick A. Duggan*, on behalf of themselves and their coowner; by reason of loss and damage suffered and sustained by them as a proximate result of restraint and/or detention, directly or indirectly, of the said schooner *Three Marys*, and as a proximate result of restraint or detention, directly or indirectly, of the said schooner *Frederick A. Duggan*, by authority of the United States, by whatever agency exercised, for the purpose of preventing sailing vessels of the United States from encountering the danger of destruction by enemy submarines; to declare the tribunal to hear and determine such claims; to set up the machinery for such hearing and determination; to provide for the payment of such claims as may be established, and for other purposes; to the Committee on the Judiciary.

By Mr. EVANS of Montana: A bill (H. R. 11627) to provide for the protection of municipal watersheds within the national forests; to the Committee on the Public Lands.

By Mr. JOHNSON of Oklahoma: A bill (H. R. 11628) to authorize the expenditure of $60,000 for certain improvements at Concho Indian School at Concho, Okla.; to the Committee on Indian Affairs.

By Mr. LEAVITT (by department request): A bill (H. R. 11629) to amend the proviso of the act approved August 24, 1912, with reference to educational leave to employees of the Indian Service; to the Committee on Indian Affairs.

MEMORIALS

Under clause 3 of Rule XXII, memorials were presented and referred as follows:

By Mr. VINSON of Kentucky: Memorial of the Senate of the State of Kentucky, memorializing Congress for prompt and favorable action on the Tyson-Fitzgerald bill (H. R. 500) providing relief for disabled emergency Army officers; to the Committee on World War Veterans' Legislation.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BROWNING: A bill (H. R. 11630) granting a pension to Malissa E. Crouse; to the Committee on Pensions.

By Mr. BULWINKLE: A bill (H. R. 11631) granting an increase of pension to Nancy Wild; to the Committee on Invalid Pensions.

By Mr. CANFIELD: A bill (H. R. 11632) granting an increase of pension to Katie Mulford; to the Committee on Invalid Pensions.

By Mr. CARTER: A bill (H. R. 11633) granting an increase of pension to Emily S. Harris; to the Committee on Invalid Pensions.

By Mr. DRANE: A bill (H. R. 11634) for the relief of Carrie S. Abbe; to the Committe on Pensions.

By Mr. DYER: A bill (H. R. 11635) granting permission to Felix Cordova Davila, Resident Commissioner to the United States from Porto Rico, to accept the decoration of "Caballero Comendador" and insignia of the "Royal Order of Isabel la Catolica" tendered him by the Kingdom of Spain; to the Committee on Foreign Affairs.

By Mr. FISH: A bill (H. R. 11636) granting an increase of pension to Margaret A. Monahan; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11637) granting an increase of pension to Ella C. Dunham; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11638) granting an increase of pension to Mary E. Hyatt; to the Committee on Invalid Pensions.

By Mr. FLETCHER: A bill (H. R. 11639) granting an increase of pension to Margaret C. Finch; to the Committee on Invalid Pensions.

By Mr. FREEMAN: A bill (H. R. 11640) granting a pension to Lydia M. Robinson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11641) granting a pension to Emmersancy J. Hayford; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11642) granting a pension to Julia Pleffert; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11643) granting a pension to Edward J. Noble; to the Committee on Pensions.

Also, a bill (H. R. 11644) granting an increase of pension to Lizzie J. Grosvenor; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11645) granting an increase of pension to Harriet E. Ashbey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11646) granting an increase of pension to Carrie Latham; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11647) granting an increase of pension to Elizabeth H. Shelley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11648) granting an increase of pension to Helen M. Steward; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11649) granting an increase of pension to Annie E. Phillips; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11650) granting an increase of pension to Margaret W. Lathrop; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11651) granting an increase of pension to Martha J. Caryl; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11652) granting an increase of pension to Adelaide P. Sawyer; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11653) granting an increase of pension to Emma T. Barnes; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11654) granting an increase of pension to Sarah J. Green; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11655) granting an increase of pension to Mary J. Hayes; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11656) granting an increase of pension to Mary A. Burrows; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11657) granting an increase of pension to Mary Britton; to the Committee on Invalid Pensions.

By Mr. GAMBRILL: A bill (H. R. 11658) for the relief of John Maika; to the Committee on Claims.

By Mr. GOLDSBOROUGH: A bill (H. R. 11659) for the relief of the Charlestown Sand & Stone Co., of Elkton, Md.; to the Committee on Claims.

By Mr. HALE: A bill (H. R. 11660) granting an increase of pension to Ella F. Paige; to the Committee on Invalid Pensions.

By Mr. JENKINS: A bill (H. R. 11661) granting an increase of pension to Clara L. Ross; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11662) granting a pension to Charles Smith; to the Committee on Invalid Pensions.

By Mrs. KAHN: A bill (H. R. 11663) granting a pension to Matilda Wright; to the Committee on Pensions.

By Mr. KENDALL: A bill (H. R. 11664) granting a pension to Isabell Critchfield; to the Committee on Invalid Pensions.

By Mr. REECE: A bill (H. R. 11672) granting a pension to Sara Saylor; to the Committee on Pensions.

By Mr. SANDERS of New York: A bill (H. R. 11673) granting an increase of pension to Ellen I. Willson; to the Committee on Invalid Pensions.

By Mr. SCHAFER: A bill (H. R. 11674) for the relief of the George C. Mansfield Co. and George D. Mansfield; to the Committee on Claims.

By Mr. SHREVE: A bill (H. R. 11675) granting an increase of pension to Ellen Higley; to the Committee on Invalid Pensions.

By Mr. STRONG of Pennsylvania: A bill (H. R. 11676) granting an increase of pension to Anna M. Orcutt; to the Committee on Invalid Pensions.

By Mr. SWICK: A bill (H. R. 11677) granting an increase of pension to Elizabeth Martin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11678) granting an increase of pension to Lucinda B. Mitchell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11679) granting an increase of pension to Savilla A. Barge; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11680) granting an increase of pension to Catherine Ann Miller; to the Committee on Invalid Pensions.

By Mr. VINSON of Kentucky: A bill (H. R. 11681) granting a pension to Joseph L. Short; to the Committee on Pensions.

By Mr. BACON: Joint resolution (H. J. Res. 225) to readmit Cornelia Roosevelt von Zedlitz to the character and privileges of a citizen of the United States; to the Committee on Immigration and Naturalization.

By Mr. W. T. FITZGERALD: Resolution (H. Res. 129) that the sum of $200 be paid to Margaret Elma Naylor for extra and expert services to the Committee on Invalid Pensions; to the Committee on Accounts.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

4743. Petition of sundry citizens of Tulsa, Okla., presenting charges and affidavits against Judge Franklin E. Kennamer, judge of the United States court for the northern district of Oklahoma; to the Committee on the Judiciary.

4744. By Mr. BUCKBEE: Petition of Glen Ketcham and 23 other citizens of Sheridan and Ottawa, Ill., protesting against the Lankford compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

4745. By Mr. BURTON: Resolution adopted by the Fairport Board of Trade, Fairport Harbor, Ohio, requesting that the local financial contribution requested by Congress for the extension of the present breakwater at Fairport Harbor be waived; to the Committee on Rivers and Harbors.

4746. By Mr. ENGLEBRIGHT: Petition of F. E. Brown and 129 citizens of Fair Oaks, Calif., protesting against House bill 78; to the Committee on the District of Columbia.

4747. Also, petition of Mrs. E. L. Robinson and other citizens of Fair Oaks, Calif., protesting against House bill 78; to the Committee on the District of Columbia.

4748. By Mr. MURPHY: Petition of L. E. Holloway, of Columbiana, Ohio, protesting against the passage of the Oddie bill; to the Committee on the Post Office and Post Roads.

4749. By Mr. FRENCH: Petition of eight citizens of Holcomb, Idaho, protesting against enactment of House bill 78, or any compulsory Sunday legislation; to the Committee on the District of Columbia.

4750. By Mr. FULBRIGHT: Petition of Civil War veterans and auxiliary organizations of Cape Girardeau, Mo., in favor of House bill 7206; to the Committee on Invalid Pensions.

4751. By Mr. GALLIVAN: Petition of William Smith, first vice president, Cigar Makers International Union, 202 Dudley Street, Roxbury, Mass., protesting against passage of House bill 9195, pertaining to Cuban parcel-post arrangements; to the Committee on Ways and Means.

4752. By Mr. GARBER: Letter of Cheney Bros., manufacturers, of South Manchester, Conn., in support of the Capper-Kelly bill, known as the resale price maintenance bill; to the Committee on Interstate and Foreign Commerce.

4753. Also, letter of Oklahoma Historical Society, of Oklahoma City, Okla., in support of House bill 6040, providing for an appropriation for the printing of the official papers of the Territories of the United States; to the Committee on Printing.

4754. By Mr. GARNER of Texas: Petition of citizens of Harlingen, Mercedes, and La Feria, Tex., against compulsory Sunday observance; to the Committee on the District of Columbia.

4755. By Mr. HADLEY: Petition of residents of Snohomish, Wash., protesting against the Lankford Sunday closing bill; to the Committee on the District of Columbia.

4756. By Mr. HAUGEN: Petition of seven citizens of Mason City, Iowa, protesting against the enactment of House bill 78, or any other compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4757. Also, petition of 15 citizens of Riceville, Iowa, protesting against the enactment of House bill 78 or any other compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4758. By Mr. HOGG: Petition of John W. Covert and 75 other citizens of Lagrange County, Ind., protesting against passage of the Lankford bill; to the Committee on the District of Columbia.

4759. By Mr. KENDALL: Petition of Isaac H. Burford and other citizens of Uniontown, Pa., protesting against compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

4760. By Mr. KIESS: Petition from citizens of Wellsboro, Pa., protesting against the passage of House bill 78, known as the Lankford bill; to the Committee on the District of Columbia.

4761. By Mr. KINDRED: Petition of the National Bottlers' Gazette, urging the United States Congress, in behalf of House Resolution 123, to appoint a committee to investigate the official acts of the Federal Trade Commission in reference to the so-called Aluminum Trust, the so-called Bread and Baking Trust, and all other combinations dealing with household commodities; to the Committee on Rules.

4762. By Mr. KOPP: Petition signed by W. F. Clements and 46 other residents of Fort Madison, Iowa, in opposition to the Lankford Sunday observance bill; to the Committee on the District of Columbia.

4763. Also, petition signed by Olive L. Olson and eight other residents of Winfield, Iowa, and vicinity, protesting against the passage of the Lankford Sunday observance bill; to the Committee on the District of Columbia.

4764. By Mr. KORELL: Petition of citizens of Portland, Oreg., against the Lankford bill (H. R. 78); to the Committee on the District of Columbia.

4765. By Mr. LINDSAY: Petition of Queensboro Chamber of Commerce, favoring Federal jurisdiction and control of the construction of adequate flood control measures on the Mississippi River, at Federal expense, as outlined in referendum

No. 51 of the United States Chamber of Commerce; to the Committee on Flood Control.

4766. Also, petition of Powel Crosley, jr., protesting against proposal offered by the Merchant Marine and Fisheries Commitee, to require equal allotment of broadcasting power and licenses; to the Committee on the Merchant Marine and Fisheries.

4767. Also, petition of V. Bernard Siems, on behalf of the engineering profession, urging support of House bill 11026, providing for the coordination of the public health activities of the Government; to the Committee on Interstate and Foreign Commerce.

4768. Also, petition of E. N. Nockels, secretary and general manager Chicago Federation of Labor, and radio station WCFL, protesting against the amendment of paragraph 2, section 9, of the radio act of 1927, proposing to allocate frequencies in accordance with the established radio zones; to the Committee on the Merchant Marine and Fisheries.

4769. By Mr. LINTHICUM: Petition of Mrs. M. E. Cullinan, president Women's Auxiliary to the Railway Mail Association of Baltimore, indorsing House bill 25 and Senate bill 1727; to the Committee on the Civil Service.

4770. Also, memorial from Baltimore Federation of Churches, Baltimore, Md., and signed by many Baltimore residents, registering opposition to naval increase as proposed by present legislation; to the Committee on Naval Affairs.

4771. Also, petition of Christopher J. J. Witteman, United States custom guard, Baltimore, indorsing House bill 10644; to the Committee on Ways and Means.

4772. By Mr. MEAD: Petition or memorial of Hamburg Chamber of Commerce, regarding the Griest postal rate bill; to the Committee on the Post Office and Post Roads.

4773. By Mr. MILLER: Petition of citizens of Seattle, Wash., protesting passage of House bill 78; to the Committee on the District of Columbia.

4774. By Mr. NELSON of Maine: Petition of sundry residents of Waldo County, Me., against the proposed Lankford Sunday bill; to the Committee on the District of Columbia.

4775. By Mr. NEWTON: Petition of Mrs. Axel Larson, of Minneapolis, and others, against compulsory Sunday observance bill; to the Committee on the District of Columbia.

4776. By Mr. O'CONNELL: Petition of the Fritzsche Bros. (Inc.), of New York City, favoring the passage of the parcel post bill (H. R. 9195); to the Committee on Ways and Means.

4777. By Mr. OLIVER of New York: Petition of Bronx County Civil Service Employees Association (Inc.), protesting against efforts to relax, alter, amend, or repeal the civil service requirements in regard to employees of the Prohibition Bureau; to the Committee on the Civil Service.

4778. By Mr. RAMSEYER: Petition of residents of Oskaloosa, Iowa, protesting against the passage of the Lankford bill (H. R. 78), or any other compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4779. By Mr. ROBINSON of Iowa: Petition from Rev. John Gammons, D. D., pastor of the Methodist Episcopal Church at Earlville, Iowa, which petition was voted unanimously by his congregation, against the large increase in our Navy; to the Committee on Naval Affairs.

4780. By Mrs. ROGERS: Petition of Ralph Wright, Henry J. Bridges, and other citizens of Hudson, Mass., against the enactment of House bill 78, to secure Sunday as a day of rest, etc.; to the Committee on the District of Columbia.

4781. Also, petition of H. S. Sanborn, of 37 Walnut Street, Natick, Mass., against House bill 78, requiring compulsory Sunday observance; to the Committee on the District of Columbia.

4782. By Mr. SANDERS of Texas: Petition of several citizens of Kaufman County, Tex., in behalf of the Hudspeth bill, to prevent gambling in cotton futures and to make it unlawful for any person, corporation, or association of persons to sell any contract for future delivery of any cotton within the United States, unless such seller is actually the legitimate owner of the cotton so contracted for future delivery at the time said sale or contract is made; to the Committee on Agriculture.

4783. By Mr. SUMMERS of Washington: Petition signed by M. Franks and 121 others, of the State of Washington, protesting against the enactment of compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4784. Also, petition signed by Mr. A. E. Wesseler and 19 others, of the State of Washington, protesting against the enactment of compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4785. By Mr. SWICK: Petition of J. C. Glass and 18 other residents of New Castle, Lawrence County, Pa., protesting the passage of the Lankford bill, or any other measure proposing compulsory Sunday observance in the District of Columbia; to the Committee on the District of Columbia.

4786. By Mr. TAYLOR of Colorado: Petitions from citizens of Cortez, Colo., protesting against the passage of the Lankford bill, or any other legislation to enforce compulsory Sunday observance; to the Committee on the District of Columbia.

4787. By Mr. THOMPSON: Petition of 16 citizens of Delta, Ohio, protesting against the passage of House bill 78, the so-called compulsory Sunday observance bill; to the Committee on the District of Columbia.

4788. By Mr. WASON: Petition of W. W. Eastman and 173 other residents of Hill, N. H., protesting against the passage of the compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

4789. By Mr. WELLER: Petition of citizens of the State of New York, in favor of House bill 6518; to the Committee on the Civil Service.

4790. By Mr. WELSH of Pennsylvania: Petition bearing 563 signatures of citizens of Philadelphia, Pa., opposed to House bill 78, known as Lankford Sunday observance bill; to the Committee on the District of Columbia.

SENATE

FRIDAY, *March 2, 1928*

The Chaplain, Rev. ZeBarney T. Phillips, D. D., offered the following prayer:

Most merciful God, who art of purer eyes than to behold iniquity, and hast promised forgiveness to all who confess and forsake their sins, we bow before Thee in an humble sense of our own unworthiness, acknowledging our manifold transgressions of Thy righteous laws. Reform whatever is amiss in the temper and disposition of our souls, that no unholy thoughts, unlawful designs, or inordinate desires may rest there. Purge our hearts from envy, hatred, and malice, that we may never suffer the sun to go down upon our wrath, but may always go to our rest in peace, charity, and good will, with a conscience void of offense toward Thee and toward men. Grant this, we beseech Thee, for the sake of Him who is our Master and our Savior, Jesus Christ, Thy Son, our Lord. Amen.

The Chief Clerk proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

MESSAGE FROM THE HOUSE—ENROLLED BILL SIGNED

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the Speaker had affixed his signature to the enrolled bill (H. R. 8227) authorizing the Sunbury Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Susquehanna River at or near Bainbridge Street, in the city of Sunbury, Pa., and it was thereupon signed by the Vice President.

CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Ferris	McKellar	Shipstead
Barkley	Fess	McLean	Shortridge
Bayard	Fletcher	McMaster	Smith
Bingham	Frazier	McNary	Smoot
Black	George	Mayfield	Steck
Blaine	Gillett	Metcalf	Stelwer
Blease	Glass	Moses	Stephens
Borah	Gooding	Neely	Swanson
Bratton	Gould	Norbeck	Thomas
Brookhart	Greene	Nye	Tydings
Broussard	Hale	Oddie	Tyson
Bruce	Harris	Overman	Wagner
Capper	Harrison	Phipps	Walsh, Mass.
Caraway	Hayden	Pine	Walsh, Mont
Copeland	Heflin	Pittman	Warren
Couzens	Howell	Ransdell	Waterman
Curtis	Johnson	Reed, Pa.	Watson
Cutting	Jones	Robinson, Ark.	Wheeler
Dale	Kendrick	Robinson, Ind.	Willis
Deneen	Keyes	Sackett	
Dill	King	Schall	
Edge	La Follette	Sheppard	

Mr. ROBINSON of Arkansas. I wish to announce that the Senator from New Jersey [Mr. EDWARDS] is necessarily detained from the Senate by illness in his family.

The VICE PRESIDENT. Eighty-five Senators having answered to their names, a quorum is present.

LANDS FOR LIGHTHOUSE PURPOSES

The VICE PRESIDENT laid before the Senate a communication from the Acting Secretary of Commerce, transmitting a

draft of proposed legislation "to authorize the Secretary of Commerce to dispose of certain lighthouse reservations and to acquire certain lands for lighthouse purposes," which, with the accompanying papers, was referred to the Committee on Commerce.

PETITIONS AND MEMORIALS

Mr. DILL presented a petition of sundry citizens of the State of Washington, praying for the prompt passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

Mr. PHIPPS presented a petition of sundry citizens of Hayden, Colo., praying for the prompt passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

Mr. SHEPPARD presented a resolution adopted by the St. Louis Catholic Society, of Castroville, Tex., protesting against the treatment of Catholics in Mexico and urging our Government to use its good offices so as to promptly bring about a peaceful solution of the situation, which was referred to the Committee on Foreign Relations.

He also presented a petition of sundry citizens of San Antonio, Tex., praying for the prompt passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

Mr. FRAZIER presented the petition of Viola Hezel Wishek and 30 other citizens of Ashley, N. Dak., praying for the prompt passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

Mr. DENEEN presented petitions of sundry citizens of Chicago and Tuscola, in the State of Illinois, praying for the prompt passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

Mr. CURTIS presented resolutions adopted by the Order of United Commercial Travelers of America, at Salina, Kans., favoring the adoption of measures for the further and better control of radio broadcasting, which were referred to the Committee on Interstate Commerce.

Mr. WALSH of Massachusetts presented 20 letters in the nature of petitions from sundry citizens of Marblehead, Mass., praying for the passage of the so-called Brookhart bill (S. 1667), relative to the distribution of motion pictures in the various motion-picture zones of the country, which were referred to the Committee on Interstate Commerce.

Mr. COPELAND presented a resolution adopted by the American Cider Vinegar Manufacturers' Association at Rochester, N. Y., protesting against the passage of legislation which would permit the use of dextrose or levulose in the manufacture of prepared foods without declaration upon the labels, which was referred to the Committee on Manufactures.

He also presented a resolution adopted by the county committee of the New York County organization of the American Legion, favoring the passage of pending legislation "to send the Gold Star Mothers on a pilgrimage to the graves in France," which was ordered to lie on the table.

He also presented a telegram in the nature of a memorial from the Buffalo (N. Y.) Radio Trades Association, signed by Elmer C. Metzger, president, remonstrating against amendment of existing radio legislation, which was referred to the Committee on Interstate Commerce.

He also presented a resolution adopted by the board of directors of the Social Hygiene Society of the District of Columbia, favoring the passage of the bill (H. R. 6664) to establish the woman's bureau of the Metropolitan police department of the District of Columbia, etc., which was referred to the Committee on the District of Columbia.

Mr. JONES presented a memorial of members of the East Sixty-fourth Street Methodist Episcopal Church, of Tacoma, Wash., remonstrating against adoption of the proposed naval building program, which was referred to the Committee on Naval Affairs.

He also presented a resolution adopted by the city commissioners of Bremerton, Wash., favoring the passage of the so-called Dale-Lehlbach bill, relative to the retirement of civil-service employees, which was referred to the Committee on Civil Service.

He also presented a memorial numerously signed by sundry citizens of Yakima and vicinity, in the State of Washington, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented petitions of members of the Federated Teachers of the public schools of Tacoma, and of sundry citizens of Tacoma, Seattle, and Wenatchee, all in the State of Washington, praying for the passage of legislation creating a Federal department of education, which were referred to the Committee on Education and Labor.

Mr. McLEAN presented a letter in the nature of a petition from the Manufacturers Association of Connecticut (Inc.), of Hartford, Conn., favoring the passage of the so-called Brown forestry bill, authorizing an appropriation of $75,000 for three years to be used in the study of paper-mill wastes, which was referred to the Committee on Agriculture and Forestry.

He also presented a resolution of the Hartford (Conn.) Chapter, Reserve Officers Association of the United States, favoring the adoption of the proposed naval building program, which was referred to the Committee on Naval Affairs.

He also presented papers in the nature of memorials from the congregation of Immanuel Congregational Church and the Young Woman's Christian Association, both of Hartford; Grange No. 91, Patrons of Husbandry, of Seymour; and Everyman's Bible Class, of the Wethersfield Congregational Church, of Wethersfield, all in the State of Connecticut, remonstrating against the adoption of the proposed naval building program, which were referred to the Committee on Naval Affairs.

He also presented petitions of Williams Post, No. 55, Grand Army of the Republic; H. C. Latham Camp, No. 19, Sons of Union Veterans of the Civil War; Relief Corps Volunteers, No. 12; and Phoebe Rathbun Tent, No. 3, Daughters of Union Veterans of the Civil War, all of Mystic, Conn., praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

He also presented memorials of Uncas Council, No. 25, Order United American Mechanics, and the Bridgeport Savings and Loan Association, both of Bridgeport, Conn., remonstrating against the passage of Senate bill 1752, to regulate the manufacture and sale of stamped envelopes, which were referred to the Committee on Post Offices and Post Roads.

INJUNCTIONS BY COURTS

Mr. McKELLAR. Mr. President, I ask unanimous consent to have printed in the RECORD and referred to the Judiciary Committee a telegram from the Knoxville Central Labor Union in reference to injunctions.

There being no objection, the telegram was referred to the Committee on the Judiciary and ordered to be printed in the RECORD, as follows:

KNOXVILLE, TENN., *March 2, 1928.*

Hon. K. D. McKELLAR,

Senate Office Building, Washington, D. C.:

Following resolutions passed at mass meeting, unanimous:

"Whereas there is pending in Congress the Shipstead anti-injunction bill; and

"Whereas this bill is directed to prevent the use of the injunction in restraint of liberty and to abolish government by injunction: Therefore be it

"*Resolved*, We, the representatives of the organized labor movement of Knoxville and vicinity, do indorse the Shipstead anti-injunction bill and call on our Senators from this State and Representative in Congress from this district to support this bill by their voice and vote.

"Whereas the American Federation of Labor is making efforts to secure legislation that will enable the States to obtain relief from convict-labor competition;

"Whereas many industries as well as free labor are suffering from the use of this unfair competition of the inmates of penal and reformatory institutions;

"Whereas there is pending in Congress the Cooper-Hawes bill, which will abolish this unfair competition and subject all convict-made goods sent into a State to the laws of such State, and thereby protect the free manufactures and free labor: Therefore be it

"*Resolved*, That the representatives of organized labor in Knoxville and district in mass meeting do indorse the Cooper-Hawes bill and call on our Senators from this State and Representative in Congress from this district to support this bill by their voice and vote."

KNOXVILLE CENTRAL LABOR UNION,
SAM C. GODFREY, *President.*

ADMINISTRATION OF VETERANS' BUREAU

Mr. ROBINSON of Arkansas. Mr. President, I ask leave to have printed in the RECORD at this point in connection with my remarks a letter which I have received from John G. Pipkin, commander of the American Legion, Department of Arkansas, Some time ago, pursuant to the custom which prevails here, there was printed in the RECORD at my request Concurrent Resolution No. 11, adopted by the General Assembly of the State of Arkansas, reflecting on certain features of the administration of the Veterans' Bureau. The letter from Commander Pipkin has relation to the subject matter of that resolution, and I ask that the letter be given the same publicity that was

given the resolution, and that therefore it be printed in the RECORD at this point.

There being no objection, the letter was referred to the Committee on Military Affairs and ordered to be printed in the RECORD, as follows:

THE AMERICAN LEGION, DEPARTMENT OF ARKANSAS,
Little Rock, Ark., February 19, 1928.

Hon. JOE T. ROBINSON,
United States Senator, Washington, D. C.

MY DEAR SENATOR: Some time ago Watson B. Miller, chairman of the American Legion legislative committee in Washington, D. C., wrote me relative to the merits and history of House Concurrent Resolution 11, which you had recently introduced in the Senate. No doubt this resolution was simply handled by you as a matter of routine, you presuming that it was a part of the regular Legion legislative program or the bona fide wish of the Arkansas Legislature. I believe a review of the facts will reveal that it represents neither of the above.

The Department of Arkansas did not sponsor this Resolution 11 last year, nor did they know that any such resolution had been introduced. The United States Veterans' Bureau did not know of any such either. The resolution did not authorize its circularization, but the secretary finally sent you one upon the insistent urging of its author, Mr. Walter M. Purvis, a local lawyer.

Regardless of the above, I would be in favor of the resolution if I thought it was necessary or justified in the premises. But in this case I feel sure that there are no reasons for any such resolution ever being introduced. The Veterans' Bureau have regularly constituted examining boards to pass on mental and other cases. They have reviewing boards. And, besides, we have the civil courts, where writs of habeas corpus can be availed of if necessary. No one wants to put a sane man in the hospital out at Fort Roots. However, the majority of men out there claim that there is nothing the matter with them, which is readily understood by all of us.

Mr. Purvis, some time back, was interested in getting a man out of hospital No. 78 who was being held as an insane man. He had killed two men in the Army. Upon being released via the habeas corpus route he proceeded to attempt to kill another man, but fortunately his aim was bad. He now is in the State Hospital for Nervous Diseases. So this is the only case that any of us know about which could serve as the basis for the Resolution No. 11.

Since there will likely arise some suspicion against the local Veterans' Bureau, which will be entirely unjust, if this Resolution 11 goes through and gets publicity, I am suggesting and recommending that you withdraw same from the Senate files. I feel that any such proposed legislation should come through national channels, for it is not local in its application. The American Legion and the Arkansas Service Bureau are here to help ex-service men in all matters, and no such complaints as indicated in the Resolution 11 ever came to our attention.

In closing, I wish to express to you the great appreciation that the American Legion, Department of Arkansas, feels toward you, for you have always been ready to serve us both in and out of the Halls of Congress.

With best wishes and regards, I am,

Sincerely yours, JOHN G. PIPKIN,
Commander American Legion, Department of Arkansas.

RADIO CONTROL BILL

Mr. WALSH of Massachusetts. Mr. President, for several days I have received telegrams and letters from sundry citizens of Massachusetts protesting against that section of the new radio control bill pending before the House providing for equal wave lengths and equal power in each of the five radio zones. I ask that these letters and telegrams be treated as petitions and be referred to the Committee on Interstate Commerce.

The PRESIDING OFFICER (Mr. WILLIS in the chair). That reference will be made.

Mr. WALSH of Massachusetts. I also present a letter typical of complaints made to me, and ask to have it printed in the RECORD, together with a letter from a Federal radio commissioner.

The PRESIDING OFFICER. Without objection, the letters will be printed in the RECORD.

The letters are as follows:

WESTWOOD, MASS., *February 27, 1928.*

Senator DAVID I. WALSH,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR: In this evening's Boston Traveler there appears an article to the effect that there is now before Congress a radio bill which, if enacted into law, will cripple the broadcasting stations and systems of this section of the country by reducing the powers of the stations so that many of them will only be heard about 1 mile away. I inclose the clipping so that you may understand what the article is about.

I wish to say that if this new radio bill is to have any such provisions as stated in the clipping I wish to go on record as most emphatically protesting against the enactment of this bill, and I hope that you will see your way clear to use your powers to defeat this bill as far as it lies in your ability to do so.

It seems to me that the public investment in radio sets is now too great to have bills passed that will make this vast investment useless by making it impossible to hear anything on them.

I might say that instead of doing this there should be some effort made to lessen the heterodyning of stations every time there happens to be a night favorable for distance reception by reducing the number of radio stations as fast as this legally becomes possible. The remaining stations should be made to keep up a certain standard of excellence in the quality of their transmission and their program. If some of these stations had to furnish a definite quality of program they would soon quit, and that would leave so much more room for real musical programs.

While writing, I might say that I wish to go on record as being opposed to any tax on radios or broadcasting, as I believe that our present admirable broadcasting systems can continue to carry on without the support of the Government, and the revenues of the Government seem ample to properly control the broadcasters from attempting a monopoly of the thing, if properly exercised powers are used with discretion and common sense.

Very sincerely yours for better broadcasting,

RICHARD ROGERS.

FEDERAL RADIO COMMISSION,
Washington, D. C., March 1, 1928.

Hon. DAVID I. WALSH,
United States Senate, Washington, D. C.

DEAR SENATOR WALSH: Answering your letter of February 29, concerning the telegram reading as follows:

"We protest against cancellation of licenses of Massachusetts radio stations. Will you please help?"

I know of no cancellation of licenses of Massachusetts radio stations by the commission. There is, however, now pending before the House of Representatives the amended bill reported favorably by its Committee on Merchant Marine and Fisheries, which would provide for equalizing the radio power and stations in the five radio zones. Under this rearrangement, a rough calculation shows that Massachusetts would have its present power of 19,000 watts cut to 3,750 watts, and its 18 stations cut to 8 stations, in order to put New England on the same basis as certain States in the South which have very few radio stations and very few radio listeners. This clause will have the effect of destroying stations in Massachusetts and throughout the North, East, and West—stations which are serving the South in the absence of their own stations. As you are aware, the commission can not order stations to be built unless applications are made. There have been few applications from the South, since, as you realize, radio stations are costly. To erect a 5,000-watt station costs about $150,000, and an equal sum is required for its operation each year.

It is my hope that the clause referred to, and which your correspondent evidently has in mind, will not be passed by the House, and certainly I trust that it will be held up by the deliberate good judgment of the Senate.

Very truly yours,

O. H. CALDWELL, *Commissioner.*

Mr. McKELLAR. Mr. President, in that connection I want to say that I have received a large number of letters and telegrams from my part of the country, protesting most vigorously against the unequal division of radio wave lengths, and asking that the bill which is passed grant equal privileges and rights to the various parts of the country.

Mr. WALSH of Massachusetts. I think the Senator will find that the letter from the radio commissioner will give him information that he does not now possess.

Mr. McKELLAR. I hope it will. I have a letter from the commissioner which does not give me that hope.

REPORTS OF COMMITTEES

Mr. JONES, from the Committee on Commerce, to which was referred the bill (S. 3434) for the control of floods on the Mississippi River from the Head of Passes to Cairo, and for other purposes, reported it without amendment and submitted a report (No. 448) thereon.

Mr. McNARY, from the Committee on Agriculture and Forestry, to which was referred the resolution (S. Res. 51) requesting the Secretary of Agriculture to report to the Senate at the beginning of the second regular session of the Seventieth Congress his views as to whether the insurance of the farmer by the Federal Government against droughts, floods, and storms would be consistent with sound governmental and economic policy, reported it with an amendment and submitted a report (No. 449) thereon.

He also, from the same committee, to which was referred the bill (S. 1731) to provide for the more complete development of vocational education in the several States, reported it with amendments and submitted a report (No. 451) thereon.

Mr. REED of Pennsylvania, from the Committee on Military Affairs, to which was referred the bill (H. R. 7008) to authorize appropriations for the completion of the transfer of the experimental and testing plant of the Air Corps to a permanent site at Wright Field, Dayton, Ohio, and for other purposes, reported it without amendment and submitted a report (No. 450) thereon.

Mr. DALE, from the Committee on Commerce, to which was referred the bill (H. R. 9484) granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Tombigbee River, at or near Aliceville, on the Gainesville-Aliceville road, in Pickens County, Ala., reported it with amendments and submitted a report (No. 457) thereon.

He also, from the same committee, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (H. R. 8899) granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free bridge across the Tombigbee River at or near Epes, Ala. (Rept. No. 458);

A bill (H. R. 8900) granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free bridge across the Tombigbee River near Gainesville on the Gainesville-Eutaw road between Sumter and Green Counties, Ala. (Rept. No. 459);

A bill (H. R. 8926) granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across Red River near Garland, Ark. (Rept. No. 460);

A bill (H. R. 9019) granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across the Ouachita River at or near Calion, Ark. (Rept. No. 461);

A bill (H. R. 9063) to extend the times for commencing and completing the construction of a bridge across the Chattahoochee River at or near Alaga, Ala. (Rept. No. 462);

A bill (H. R. 9204) granting the consent of Congress to the Arkansas Highway Commission to construct, maintain, and operate a free highway bridge across the Current River at or near Success, Ark. (Rept. No. 463); and

A bill (H. R. 9339) granting the consent of Congress to the board of county commissioners of Trumbull County, Ohio, to construct, maintain, and operate a free highway bridge across the Mahoning River at Warren, Trumbull County, Ohio (Rept. No. 464).

COL. CHARLES A. LINDBERGH

Mr. REED of Pennsylvania. From the Committee on Military Affairs I report back favorably without amendment the bill (H. R. 10715) to authorize Col. Charles A. Lindbergh, United States Army Air Corps Reserve, to accept decorations and gifts from foreign governments, and I ask unanimous consent for its immediate consideration.

There being no objection, the bill was considered as in Committee of the Whole and it was read, as follows:

Be it enacted, etc., That Col. Charles A. Lindbergh, United States Army Air Corps Reserve, is hereby authorized and permitted to accept decorations, medals, certificates, or gifts which have been heretofore or may hereafter be tendered him in recognition of services, exploits, or achievements, by the government of any foreign state with which the Government of the United States was at the time of such tender and acceptance on friendly terms; and the consent of Congress required therefor by clause 8 of section 9 of Article I of the Constitution is hereby expressly granted.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. JONES. Mr. President, I did not object to the consideration of the bill which has just been passed, but I regret its passage. I hope that Colonel Lindbergh will respectfully decline to accept any decorations under it. It would detract from what he has done and from what he has shown himself to be. He needs no decoration. He is loved and admired by more people than any man in the world's history, not so much because of his wonderful exploit but because of what he is and the genuine man he shows himself to be.

AGRICULTURAL RELIEF

Mr. McKELLAR. Mr. President, I ask unanimous consent to have printed in the RECORD an article by Robin Hood, appearing in the Cooperative Marketing Journal for January, 1928, relative to cooperative marketing.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE "CO-OP BUSTERS"

(By Robin Hood)

The fight against the cooperatives, unprincipled and bitter, old as the oldest association, has suddenly taken on a new aspect. Instead of the sly tactics which have characterized most of the efforts to stem the steadily rising tide of farmers' cooperatives, dealer interests have now combined for an open national welfare calculated to destroy the legal foundations of the movement. Talking in terms of a million-dollar budget, and with plans to influence Congress and the Supreme Court, a new organization has been formed to plan and direct the battle. It is known as the Federated Agricultural Trades of America, has established headquarters in Chicago, and claims to represent dealers interested in the following commodities: Grain, cheese, vegetables, eggs, butter, fruit, tobacco, sugar, potatoes, livestock, cotton, wool, flour, ice cream, milk, and poultry.

But this is getting ahead of the story. Let us start at the Palmer House, in Chicago, November 30.

It was a conference of 200 middlemen with sore fingers. They were crying because the economic development of the Nation had forced farmers to push open the door of cooperative marketing, and the door had slammed their fingers as it swung back.

Presiding was a man from Salt Lake City, W. F. Jensen. He owns a string of creameries in the far West. Somebody said this chief of the "co-op busters" called his plants the Mutual Creameries. Ironical! His is an upstanding case of sore fingers, for the Challenge Cream and Butter Association, farmers' cooperative, has entered his territory and is serving farmers so well that Mr. Jensen declares in his official address: "We must * * * protect the billions of dollars of invested capital which we represent."

There were a multitude of sore fingers among the rest of the creamery representatives. In fact, the American Association of Creamery Butter Manufacturers sponsored the meeting. A man from the Land O' Lakes region, who omitted to give his name, solemnly pointed out that the cooperatives were destroying private business—the "very root of modern civilization." The anæmic-appearing Wisconsin man sitting beside me leaned my way and whispered: "He's sure right. He's lost thousands in the last couple of years, and I haven't had a good month since that damn Land O' Lakes outfit started in my town." All of which is a splendid testimonial for the Land O' Lakes Creameries (Inc.), which is apparently rendering a service that the farmer thinks is more satisfactory than that of the man who was speaking. All told, the speeches by butter manufacturers proved hundreds of private creameries are being left high and dry by the transfer of farmers' patronage to cooperative creameries.

Another sore finger appeared when a man introduced as L. B. Kilbourne, of Minneapolis and Chicago, arose. The obliging gentleman on my right informed me that Mr. Kilbourne was a big produce man, owner of the largest cold-storage plant in Chicago. Kilbourne agreed that American business and the American Nation would rapidly go to the bow-wows unless something was done about the co-ops. He buys poultry products in the territory where the Lake Region Cooperative Egg and Poultry Association is enjoying a thriving business.

Mr. Kilbourne said cooperatives were all right as long as small groups remained small, but when they got together into large groups they were obnoxious to private business.

Then there appeared one Charles Droste, introduced as one of 12 representatives of the New York Mercantile Exchange—a dozen plaintiff cases of sore fingers. Said Charlie was given a great ovation for declaring, "These cooperatives are not an economic movement, but are a political and agitators' movement. We must save the farmer from himself by telling him all the truth, so he'll know what this is all about."

WEIRD CHARGES MADE AGAINST COOPERATIVES

A native son, named Bell, gained the floor. Possessed of all the appurtenances of an orator, except a stump to stand on, this Californian assured us that there was no place in the world so pleasant to live in as Long Beach. It was to be gathered that he had made enough handling farm products for Iowa farmers to be able to devote real attention to the evils of cooperation.

"The cooperatives are the result of professional agitators and weak sisters," he assuaged the burned fingers. "Weak sister farmers have allowed professional agitators to make them believe they are not getting a square deal." With a brilliant flight of oratory, he made a nonstop trip clear across the Atlantic and landed hard upon poor unsuspecting Denmark. That little country is morally dead, he said, and proved it—to his satisfaction—by pointing out that Denmark stayed out of the World War! And why? "The patriotic life of Denmark is dead, because of its socialistic cooperative notions of agricultural trade!"

Before the meeting ended we had been told that cooperation is also communism, bolshevism, fascism, and, capping the climax, dictatorship. The middleman system alone is democratic! It was exceedingly unfortunate that professors of political science were not present;

a new crop of textbooks would doubtless have been inspired. Then, too, a political scientist might have been able to explain away the incongruity of cooperation being both a form of communism and a form of dictatorship, to say nothing of the democracy of middlemen.

DEALERS IN LIVESTOCK AND GRAIN MOST VEHEMENT

But there were other sore fingers in attendance. The livestock exchanges were well represented and paid their compliments to the various Producers and Farmers' Union terminal cooperative commissions. "Fight this great growing menace!" pleaded a Mr. Laverly, from Omaha, who had seen his business gradually slipping away to the cooperatives during the past 10 years. A livestock exchange official, whose name was lost in a rumble of applause, was called upon to expose a bureaucratic monster within the United States Department of Agriculture—the Bureau of Agricultural Economics in general and the division of cooperative marketing in particular.

His pet peeve was the fact that the bureau had usurped certain holy functions of the livestock exchange, specifically the distribution of statistical information regarding prices and movements of livestock. He was distinctly agitated because "the Government is wasting millions of dollars trying to duplicate information with which the livestock exchanges have been serving farmers for generations." He omitted to say that Congress instructed the bureau to disseminate this statistical information because Congressmen had discovered the livestock exchanges' information to be not always altruistically reliable. Doubtless, this was an unintentional and inadvertent omission, but it is not as easy to understand his omission to say that Congress enacted the packer and stockyards control legislation because its investigators discovered many ways in which the farmers' accounts were plundered at the livestock terminals.

If the livestock dealers had sore fingers, the grain dealers had sore thumbs. A dignified prosperous-looking Babbitt was called to the platform and was introduced as Charles Quinn, secretary of the National Grain Dealers Association. He pointed out that cooperative associations were taking business away from private agencies, including country and terminal elevators, thus leaving the owners of millions of dollars' worth of physical property stranded high and dry with facilities either empty or far short of capacity. This amounted to confiscation. But this was not the worst of the story, according to this altruistic secretary, for farmers were being bumfuzzled by agitators to embark upon a plan of marketing "which we as business men know can not succeed." For these two reasons he said, "You men must abandon your business, if necessary, to give the attention to these things demanded as the result of these cooperatives and the enabling activities of bureaucrats in Washington."

COOPERATION CALLED MOST DANGEROUS THEORY OF LIFETIME

One of the speakers was worried about taxes. Apparently he had been working on some tax returns and couldn't find satisfactory ways to evade high income taxes on his profits. He encouraged the assembly to believe that the cooperatives were exempt from taxes, omitting to say that cooperatives pay thousands upon thousands of real estate and indirect taxes yearly. He tried to create a stir over the fact that cooperatives pay no income taxes, losing sight of the fact that cooperatives are nonprofit organizations and therefore can not have incomes. Perhaps the speaker knew this, but, if so, he didn't choose to tell. Some one might have shown him that he wouldn't be required to pay any income tax either if he followed the example of the cooperatives and paid back all his profits to the farmers.

Another victim of sore fingers, an officer of a grain exchange, was given the floor. If we heard correctly, his name was Patterson, but the meeting was so well warmed up by this time that every speaker was applauded before and after talking, and one who acted merely as a spectator in a back seat couldn't hear names clearly. This self-styled friend of the grain farmer began on the defensive with the bromide of 50 years of good standing: "The grain exchanges are as near perfect as it is possible to make them." Then a second bromidic salt: "Cooperation is radical and socialistic. It is the most dangerous theory ever brought to this country during my lifetime. The cooperatives have seized Washington because heretofore you haven't had the guts to fight them. They are attempting by bureaucratic government to petrify private business and economic law."

DEALERS EXPRESS PREFERENCES FOR PRESIDENT OF UNITED STATES

It was an oration that shook the walls, and the 200 cases of sore fingers applauded until there were 200 cases of sore hands. It was a glorious speech. The lid was off. Everyone of the 200 was ready to prove that he had the "guts" to fight for the inalienable right to extract a toll from the farmer's products and for the inalienable right of the deluded farmer to have protection from the activities of professional organizers and salaried bureaucrats.

Of course, there were a few discordant notes. One man gained the floor, presumably to tell why cooperatives should be dissolved, but instead made an eloquent speech nominating Herbert Hoover for President of the United States. For a time the 200 forgot their business and convened a political convention. Al Smith was nominated for the Democrats; and then Reed and even Ritchie. Seemingly nobody in the group wanted as out-and-out co-op friend as Lowden. Finally, Calvin Coolidge was renominated and the 200 delegates returned to the pressing business of ministering to sore fingers.

Another somewhat discordant note was sounded by F. M. Hudson, manager of the Los Angeles produce exchange. He wanted it thoroughly understood that he personally was strong for the program of busting co-ops but that some rather prominent members of his exchange were cooperatives and, therefore, as an official, he was compelled to remain silent. This, of course, proved a good testimonial for all of southern California's cooperatives.

FARMERS TELL THEM THEY'RE FAR BEHIND THE TIMES

Among the organizations officially represented was the Illinois Manufacturers Association, which had delegated Charles A. Ewing as its spokesman—a very serious blunder on the part of the ring leaders of the Palmer House circus and perhaps a choice bit of humor displayed by the Illinois manufacturers, for Mr. Ewing is a director of the Chicago Livestock Producers Association. Well, when Mr. Ewing was invited to speak he told tales out of school.

"We farmers have lost more in this past five years than all the money invested in your businesses," he told the assembly. "Farmers have been getting such a small part of the ultimate value of their products that they have been compelled to go after a part of the distributive profits. The development of agriculture from the primitive to the commercial stage has brought about changed conditions. The trouble is that private business in the marketing end has not kept up with the changes, and alert men from the marketing system itself have gone with the cooperatives and helped develop them—and in doing so left the rest of you fellows behind. It is not the work of agitators nor the assistance of Government bureaucrats that pushed your old methods of business out, but it is the efficiency of the cooperative system itself."

It was a bitter pill for some of the 200 to swallow, but the program was too well staged and the plans too thoroughly mapped out in advance for such remarks to prove much of a deterrent. Nevertheless, Mr. Ewing did spoil any hopes for good publicity the co-op busters may have had, for the Chicago Tribune next day briefly reported the meeting under the headline: "Story of lost farm billions wins aid of business men."

CHAIRMAN JENSEN STATES PURPOSE OF DEALERS

The shrewdest speech of the meeting was made by the chairman, W. F. Jensen, who, it was generally understood, would get ample compensation as long as the new organization carries on its crusade of co-op busting. He presented a written speech crammed with artful combinations of words, skillful innuendo, and ingenious inferences. His speech deserves more attention than the rest for the simple reason that he tried to camouflage his program of co-op busting with a screen of propriety and righteousness, as evidenced by his statement of purpose in the following paragraphs:

"The purpose of this conference, as stated in the call, is not to make a fight on agricultural cooperation. We are not opposed to agricultural cooperation kept within legal and constitutional limits, and which is a genuine attempt made by farmers to better themselves.

"We believe, however, that this issue and all cooperative farmer development should stand on its own feet in order to be and constitute a sound and meritorious effort in our economic life.

"We are opposed to the cooperative issue and this new development if it requires artificial stimulation or Government subsidies, which must be carried in part or as a whole by the taxpayers in other lines, or by competitive business. We believe such a program is entirely foreign to our American traditions and unworthy of adoption.

"Agricultural cooperation, expressed in a genuine attempt of producers to assemble and market their own products, or to improve their condition, is the right and privilege which they possess as citizens of our great Republic and under our Constitution, and if they succeed and by reason of their success eliminate and perhaps destroy some established enterprise there is nothing to be said by our side.

"However, this expression for a change, or the farmer's desire in any community resulting in actually substituting cooperative marketing for individual enterprise, should not be the result of propaganda and the strenuous urge going out from our Department of Agriculture in such a continuous stream, or by reason of work done by the multitude of public servants employed for that purpose. And those laws which show class favoritism should be repealed or declared unconstitutional.

CHARGE THAT COOPERATION IS NOT FARMERS' SELF-EXPRESSION

"It is not right that our Federal and State Governments, aided by legislation as they have been, should render special service in order to build competitive business, partially, if not wholly tax exempt, or to aid and develop any form of business which has the effect of depriving anyone of his property and other constitutional rights.

"It is unfortunate that any part of business should become involved in politics, but that is the situation confronting us now. We can not underestimate the formidable forces back of the cooperative marketing of agricultural products, which forces have become a menace to invested capital and the established way of handling farm products.

"The present issue, which is backed so strongly by our Government, is decidedly different from the cooperative development we have had

with us for many years. The issue now is that of cooperative marketing—not in a small way, but on a national scale, and in the big terminal markets—for the purpose of establishing producer control of value, it may be said, without regard to the principle of supply and demand.

"It would seem that under the guise of farm relief this plan, which has strong support, might lead to the use of public funds and that the outcome is questionable and might lead to great disaster.

"The cooperative-marketing development can not be said to be a genuine producer demand. Only here and there is that true. It is a political question, sponsored by politicians and professional organizers, both influencing the administration as an offset to the unrest among our farmers and producers, due to their inability to meet the world's competition in the marketing of surplus products."

ASSUMING 2,000,000 FARMERS HAVE BEEN HOODWINKED

The danger of such arguments as Mr. Jensen makes in the above paragraphs lies in the pure ingenuity for distortion of facts. The careless thinker might easily pass over Jensen's false premise, and, assuming it, think he had stated a justifiable case for those middlemen whose businesses had suffered. The fact of the matter, however, is that when Jensen assumes that the cooperative movement is not the farmers' self-expression but is the work of propagandists and professional organizers, he is laying down a brazen premise that insults the intelligence of every man who has observed the movement. The inference that more than 2,000,000 American farmers can be hoodwinked and kept hoodwinked for many years by professional propagandists and organizers is too preposterous for much discussion. Yet Jensen's whole argument is more or less based on this notion that agricultural cooperation is not the result of the desires of the producers themselves.

Of course cooperatives have received encouragement from official Government agencies; the same is true of the cooperatives in every nation on the face of the earth. But nearly 2,000,000 farmers were cooperative members before the Federal Government ever established a division to deal with the movement. Moreover, the aid and encouragement is of a very proper kind. Government agencies in this country do not organize cooperatives, but they do tell how not to organize. The effort of the Division of Cooperative Marketing is directed toward the dissemination of information that will insure the cooperative movement of developing along sound lines and not unsound lines. Mr. Jensen therefore gives the lie to his own words when he opposes the work of this particular division, as he did at another point in his speech.

The real motive of Mr. Jensen's ache doubtless lies in the paragraph above, where he said: "The issue now is that of cooperative marketing—not in a small way, but on a national scale."

OBJECTION ONLY TO LARGE-SCALE COOPERATIVES

As long as little cooperatives remained little they had no sales outlets except through private dealer agencies in the terminals and central markets. Organized as locals, the cooperatives were just a very convenient agency to assemble farm products for the big dealers, and the big dealers welcomed them. As long as cooperatives remained locals they only suffered the opposition of local dealers, but now that the associations are regional and national they conflict with the business of regional and national dealers. The larger cooperatives grow, the larger are the dealers affected, of course. Until a few years ago only the little fellows fought cooperatives, but now the bigger ones are coming into the fray. Jensen's position is just as much as to say: "A little cooperative is a good thing, but a big cooperative is not." The fallacy of the view is self-evident.

A large portion of the speech was devoted to Denmark. The following extract illustrates the speaker's adroit effort to make capital out of nothing:

"There is no question that Denmark has reached a high state in its agricultural development, and can teach a good many lessons in farming. Cooperation started in Denmark about 40 years ago and since then most of the Danish farmers, not all, have associated themselves in many enterprises. They have cooperative creameries, egg-packing and meat-packing plants, feed stores, merchandise stores, and many other branches, including banks, insurance societies, etc. The result of the farmer's entrance into business in Denmark was, of course, the almost complete elimination of commercial life as carried on by individuals, especially in the small towns and villages throughout Denmark.

"Whether the Danish farmer is receiving more for his product by reason of cooperation than he would otherwise receive, I can not say. He is, of course, governed by the world's market; but he has improved the quality of his product and he has established a high standard of efficiency in his dairy herds and other livestock."

WHAT WAS IT THAT BUILT DANISH AGRICULTURE?

Needless to say, Jensen did not choose to point out the moral of each paragraph. The first evident fact is that the cooperative marketing system in Denmark was so much more efficient and satisfactory to the producers than the private agencies handling farm products, that the dealer interests were unable to withstand the competition. A better evidence of the soundness of the cooperative system would be hard to find.

In the second paragraph Jensen attributes Danish agricultural success to standardization and improvement in the quality of products. Absolutely true! The greatest benefit in cooperation is that cooperatives standardize their products, educate farmers to produce higher-quality products, pay them in accordance with grade, and provide a genuine money motive for producing high-quality products instead of grades calculated merely to "get by." Illustrating this point further, wheat growers knew little or nothing of the desirability or profit in producing high-protein content wheat until the cooperatives began to recognize this real criterion of milling value. Similarly, cotton growers generally knew practically nothing of the grade and staple values of various varieties until the cotton pools started operations. Grading of livestock for the direct benefit of the producer is relatively new, brought on by the cooperative movement. And so on, through the list of commodities down to the outstanding cases of the fruit and vegetable groups, it is possible to show that standardization is one of the foremost purposes of cooperation. In fact, there is an old saying in the literature of the movement: "Organize, standardize, and merchandise." Mr. Jensen made a damaging admission when he credited Danish success to standardization, because by so doing he credited it to cooperation.

JENSEN SAYS HE IS INSPIRED BY PATRIOTISM

Another paragraph of the speech deserving special attention is the following scintillating passage:

"In conclusion, let me say that I believe we must prepare ourselves to encounter these new ideas and suggested changes in our business life. * * * We must do this, not merely for selfish reasons, in order to protect the billions of dollars of invested capital and upwards of a million workers which we represent, but for patriotic reasons, in order to avoid a great national disaster."

Inasmuch as Mr. Jensen and other dealers with sore fingers are the only ones in this wide and great Republic who fear that disaster will befall the Nation unless the cooperatives are "busted," we are confident that patriotism hardly explains the crying and bawling of those in attendance at Mr Jensen's sore-finger party. The true explanation rests in the fact that Mr. Jensen and the others have a few dollars invested in private businesses that are unable to render a service to farmers comparable with the service of the cooperatives, and, as a consequence, are succumbing to an inevitable tide of changing economic conditions.

The immediate plan of the Federated Agricultural Trades is to send a lobby to Congress and to employ attorneys who will contest the validity of the Capper-Volstead Act, and will endeavor to set aside the cooperative marketing act of 1926, which established the division of cooperative marketing. Besides doling out a mass of propaganda that will be laughed at, we see little that the "co-op busting" Federated Agricultural Trades of America can do. Neither is there anything for the cooperatives to do except to keep a weather eye on the lookout and wait the passing of this little blow.

The resolutions tell little of what is to come. The original draft presented in the call for the meeting was deleted of much of its venom, and when the resolutions committee returned with its long-delayed report the following resolutions were adopted without discussion:

TAME RESOLUTIONS ADOPTED BY DEALERS

"1. Preamble. Believing that the welfare of America is inseparable from the welfare of its agriculture; that the unsettled agricultural condition is at the present time creating a disturbance in general business and is tending to create bureaucratic control—un-American in principle—in place of individual initiative and activity, and being desirous of equalizing the benefits that should accrue to all lines of legitimate business; and

"2. Whereas the Agricultural Trades of America represent several million dollars of invested capital, and the activities of more than a million American citizens, who have made their investments and contributed their share toward the social, agricultural, industrial, and commercial life of America, based upon the traditions of the past and on the rights of individuals as set forth in the Constitution of the United States and in harmony with the inventions and methods of modern times; and

"3. Whereas while we recognize the right which producers have to associate themselves together for the purpose of marketing the products of their own labor, we are opposed—as class legislation—to the Capper-Volstead Act, which has permitted producer associations to deal in nonmember production, thereby becoming traders and having immunity from our trust and tax laws; and

"4. Whereas we are opposed to the work being done by the Department of Agriculture through the Bureau of Cooperative Marketing, the Bureau of Agricultural Economics, the many county agents throughout the United States, and other Federal and State agencies, so far as it threatens to destroy existing marketing agencies and established enterprises of the agricultural trades: Be it

"5. *Resolved,* That we suggest a closer working arrangement between the agricultural producers and the agricultural trades, in order that questions of national importance may thus be solved more satisfactorily and with greater dispatch, and that in their adjustment government shall not be permitted to exceed its just and constitutional limits in extending to any organization financial, bureaucratic, or legislative aid not extended to others: Be it further

"6. *Resolved*, That a permanent nonprofit-making organization be formed, to be known as the Federated Agricultural Trades of America, and that the Chair be authorized to appoint, at its discretion, a committee of 15 consisting of himself and 14 others, within two weeks' time to apply for the necessary charter, prepare a constitution and by-laws, set up a schedule of dues, solicit members, and do such other things as may be necessary to perfect a permanent organization."

FLOOD CONTROL

Mr. CARAWAY. Mr. President, in view of the fact that the report to accompany the bill for flood relief is, I understand, prepared and ready for publication, I want to take a moment of the time of the Senate to read a little memorandum which I have touching flood control. First, I want to say that we people who are vitally concerned feel that the House bill more nearly meets our needs than the bill reported by the Senate Committee on Commerce. I want to read something of the efforts to ascertain what the facts were and what the remedies required were as put forth by the Committee on Flood Control in the House:

The Flood Control Committee met first on November 7, 1927, and was in session for 63 days. Six volumes of testimony were taken, consisting of 5,000 pages and more than three and one-half million words. More than 300 people appeared before the committee, some of whom represented the following important nationally known organizations:

United States Chamber of Commerce.
American Legion.
American Federation of Labor.
American Farm Bureau Federation.
Three former presidents of American Society of Engineers.
Forty Senators and Representatives.
Governors of States.
State officials.
Mayors of large cities.
State engineers.
Levee district engineers.
American Bankers' Association.
Investment Bankers' Association.
Chicago flood-control conference.

Three advisory engineering committees, one from the American Society of Engineers, one from the University Engineers, and one from the railroad engineers of the Mississippi Valley.

Army engineers and Mississippi River Commission engineers.

One hundred and fifty resolutions adopted by civic and fraternal organizations were presented to the committee.

The committee received more than 300 manuscripts containing flood-control plans.

The committee received more than 5,000 letters and telegrams from all over the United States.

Representative REID, chairman of the Flood Control Committee of the House of Representatives, made two trips to the flooded area, one for a duration of 10 days during the flood, and one after the flood, at which time he remained more than three weeks. On these trips he had with him a secretary and took notes. He traveled many hundreds of miles by airplane, train, and boat.

John F. Stevens, president of the American Society of Civil Engineers during 1927, and the man who Colonel Goethals said was responsible for the success of the Panama Canal project more than any other one man in America, testified before the Reid Flood Control Committee. His testimony is contained in 16 pages of the hearings before the Committee on Flood Control.

Representative E. E. COX, of Georgia, a member of the Flood Control Committee, stated that Representative FRANK REID, in his opinion, had a more complete knowledge of the flood-control situation than any man in America.

Mr. President, I wish briefly to call the attention of the Senate to a few additional facts and circumstances.

The greater damage from the flood of 1927 that came to Arkansas was caused by the overflow of tributaries of the Mississippi River, rather than from the waters of the Mississippi itself. The floods in the tributaries, however, were greatly added to and aggravated by the floods in the Mississippi River. There can be no protection from floods in that State, however, unless the tributaries receive consideration and protection be extended up their courses.

I wish to call the attention of the Senate to these conditions. I shall take each tributary of the Mississippi in my State separately. By "tributary" I mean only those which are navigable streams under the control exclusively of the Government. At this time, however, I shall speak only of the Arkansas.

This river rises in central Colorado and is 1,500 miles in length, flowing through Colorado, Kansas, Oklahoma, and Arkansas, and emptying into the Mississippi River below the south central line of that State.

One of its tributaries is the South Canadian, which rises in Colorado and flows through New Mexico, Texas, and Oklahoma, and empties into the Arkansas near Muskogee in Oklahoma. Another is the Cimarron, which rises in southern Colorado and flows through Kansas and Oklahoma. A third is the Grand or Neosho River, which rises in Kansas and flows through Oklahoma and empties into the Arkansas near Muskogee in Oklahoma. There are also other tributaries that flow through one or more States.

The estimated damage done in the State of Oklahoma by floods in the year of 1927 from the Arkansas River was more than $20,000,000. But the greater damage caused by floods in the Arkansas River was along its valley from Fort Smith, Ark., to its mouth.

The Jadwin plan for flood control provides for a high levee protection on the Arkansas River from its mouth to Pine Bluff. Prior to this the Mississippi River Commission has assisted in erecting and maintaining levees on this river from its mouth to the Lincoln and Jefferson County lines. Therefore, the only additional protection under the Jadwin plan is by heightening and strengthening the levees from the Mississippi up the Jefferson and Lincoln County lines and by a new levee from that line up to Pine Bluff.

Inasmuch as it is observable and will be made plain from the figures herewith quoted that a very substantial part of the damage done was above Pine Bluff it becomes apparent that the Jadwin plan offers no protection for the very large area which suffered very severely from the recent flood and will suffer from future floods.

In the territory wholly excluded from the Jadwin plan is possibly the most thickly populated section of the State. It is dotted with cities and towns ranging in population from a thousand up to almost 100,000.

Approximately 2,000,000 cubic feet per second of water passed down the Mississippi River at Natchez during the flood.

The extreme low-water gauge of the Arkansas River at Little Rock is 1,100 cubic feet per second. Its bank-full capacity at Little Rock is 200,000 cubic feet per second. During the recent flood 815,000 cubic feet per second of water passed Little Rock, or better than seven hundred times more than its low-water flow. On the same date, April 21, 1927, there passed Clarendon on the White River, a tributary of the Arkansas, 425,000 cubic feet of water per second. The combined flow of the Arkansas and this tributary was more than 1,200,000 cubic feet per second of water, or 60 per cent of the volume passing Natchez on that date.

Some of the damages suffered in the counties mentioned are set out herein.

Along the valley of the upper Arkansas River are the counties of Crawford, Yell, Pope, Conway, Faulkner, Pulaski, Jefferson, and Lonoke. In these counties private levee districts have constructed levees and in the construction of which the Government furnished no aid. Most of the waters that come down this river comes from Colorado, Kansas, New Mexico, Missouri, and Oklahoma. It therefore seems that this tributary is entitled to the same thoughtful consideration and relief to which the parent stream, the Mississippi River, is. It is evident that the problem is not of local origin and can not be controlled by local levees, and not to make it a part of the general plan for flood protection for the lower Mississippi would be both unwise and unjust.

I have before me statistics showing the damages wrought by this flood in the Arkansas Valley. I shall not take the time of the Senate to read them, but ask leave to print them in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

SEBASTIAN COUNTY, ARK.

(Prepared by County Farm Agent C. H. Alspaugh and Walter H. McConnell, secretary of the Fort Smith Chamber of Commerce)

Damage to real estate	$75,000
Damage to buildings and contents	10,000
Crop loss	100,000
Damage to roads	50,000
Industrial loss	100,000
Total	335,000

CRAWFORD COUNTY, ARK.

(Prepared by a committee of business men from Mulberry, Alma, and Van Buren under direction of J. O. Porter and A. V. Henderson)

Damage to real estate	$850,000
Damage by crop loss	1,500,000
Damage to houses, barns, and contents	$150,000
Damage to roads, bridges, etc	100,000
Damage to levees	150,000
Total	2,750,000

FRANKLIN COUNTY, ARK.

(Prepared by J. Steve Turner and John R. Davidson)

Damage to real estate	$750,000
Damage by crop loss	250,000
Damage to buildings and contents	25,000
Total	1,025,000

LOGAN COUNTY, ARK.

(Prepared by Doctor Higdon and other citizens of Logan County)

Damage to real estate	$170,000
Damage by crop loss	173,245
Total	343,245

JOHNSON COUNTY, ARK.

(Prepared by Lee Cazort, Guy Cazort, W. R. Hunt, W. W. Thompson, F. A. Blackburn, W. M. Bynum, and C. M. Tuggle, the county agent)

Damage to real estate	$1,150,000
Damage by crop loss	770,000
Damage to buildings and contents	100,000
Damage to highways and railroads	42,560
Damage to coal mines	80,000
Total	2,142,560

POPE COUNTY, ARK.

(Prepared by County Judge Quince Hill, Oscar Wilson, E. W. Hogan, Earl Darr, E. A. Williams, et al.)

Damage to real estate	$3,187,500
Damage by crop loss	581,000
Damage to buildings and contents	22,000
Damage to highways	10,000
Total	3,800,500

YELL COUNTY, ARK.

(Prepared by W. E. McClure, mayor of Dardanelle; T. E. Wilson, former county judge; Joe D. Gault, former county sheriff, et al.)

Damage to real estate	$1,200,000
Damage by crop loss	2,500,000
Damage to buildings and contents	100,000
Damage to levees and roads	70,000
Total	3,870,000

CONWAY COUNTY, ARK.

(Prepared by E. E. Mitchell, A. M. Fiser, J. S. Moose, Robert Stallings, Garland Dowdle, and Tom Davis)

Damage to real estate	$2,120,000
Damage by crop loss	500,000
Property damage	480,000
Levees	100,000
Roads and bridges	250,000
Total	3,450,000

FAULKNER COUNTY, ARK.

(Prepared by A. M. Ledbetter, examiner of real estate values for the Federal land bank, and H. D. Russell, mayor of Conway)

Damage to real estate, crop loss, buildings and contents, levees and roads	$1,070,102

PULASKI COUNTY, ARK.

(Prepared by County Agent J. W. Sargent and County Judge C. P. Newton)

Damage to real estate, crop loss, buildings and contents, livestock, and drainage canals	$2,627,000

JEFFERSON COUNTY, ARK.

(Prepared by Charles E. Taylor, former mayor of Little Rock and now secretary-manager of Pine Bluff Chamber of Commerce, and J. H. Means, president of the Pine Bluff Chamber of Commerce)

Damage to real estate, buildings and contents, crop losses, and levee losses	$4,500,000

LONOKE COUNTY, ARK.

(Prepared by the Mississippi River Flood Control Association)

The item upon which this item is based varies from other counties but is by above source given as $261,150.

PERRY COUNTY, ARK.

(Prepared by the Mississippi River Flood Control Association)

Damage to real estate, buildings and contents, crop losses, etc	$31,975
This makes a grand total of damages suffered from items above listed	26,206,532

Mr. CARAWAY. Mr. President, more than 12,000 people were driven from their homes in this area, 30 per cent of whom never returned because their houses and everything they possessed were either totally destroyed or so seriously damaged that they were utterly discouraged. Seventy lives were lost in the counties mentioned. All of this property was destroyed and all of these lives were lost in a section for which the Jadwin plan makes no provision whatever. There can be no successful restoration of this vast territory, the most thickly populated of the State, unless the bill reported to the Senate shall be amended.

The levees along the Mississippi River in Arkansas held except three minor breaks north of the Arkansas River. The water, therefore, which went into Jefferson, Lincoln, Desha, Drew, and Chicot Counties was Arkansas River water which came through two breaks between Pine Bluff and the mouth of the Arkansas River. The Pendleton break was the more destructive.

The damage suffered in Arkansas was almost a third greater than that incurred in the State of Mississippi, as a result of this flood.

It becomes, therefore, imperative that if the State is to receive protection from a recurrence of floods the Arkansas River must be included in the plan; and, in addition to the Arkansas River, the White, the Red, the Ouachita, and other navigable tributaries of the Mississippi which will be mentioned at another time and which are of equal importance and must receive consideration.

But particularly referring again to the Arkansas. The levees have been so destroyed that a bank full rise now spreads its waters over thousands of acres of fertile lands.

The Nation recognizes this as an obligation everywhere accepted save here in Washington. It would seem that it is just as much a duty to protect the country from the ravages of floods as from the incursion of hostile armies.

I merely wanted to call attention to these facts at this time, Mr. President, and from time to time I shall call attention to the necessity of protecting other tributaries in the State. I am hopeful that the Senate will see the wisdom of extending the flood control to the tributaries, because there is the seat of the greatest trouble.

Take the break at Pendleton Bend, on the Arkansas River, during the recent flood. It swept away practically every vestige of buildings, fences, everything that man had put upon the land, in an area 10 miles wide and 21 miles long. All of the water that went into the southeast part of the State of Arkansas came from that break, much as the water that went into the State of Louisiana came from that break, and yet the flood control bill, if it be enacted into law in its present form, will leave that situation untouched.

Mr. ROBINSON of Arkansas. Mr. President, in connection with the subject matter of flood control as it relates to the tributaries of the Mississippi River, I desire to offer an amendment, which I ask to have printed and lie on the table. I also ask that it may be printed in the RECORD.

The amendment intended to be proposed by Mr. ROBINSON of Arkansas to the bill (S. 3434) for the control of floods on the Mississippi River from the Head of Passes to Cairo, and for other purposes, ordered to lie on the table and to be printed, is as follows:

SEC. 2. The Secretary of War, through the Corps of Engineers, United States Army, is hereby authorized and directed to prepare and submit to Congress at the earliest practicable date projects for flood control on all tributary streams of the Mississippi River system subject to destructive floods. The investigations will include:

The Red River and tributaries.
The White River and tributaries.
The Arkansas River and tributaries.
The Ohio River and tributaries.
The Missouri River and tributaries.
The Illinois River and tributaries.

SEC. (b) The sum of $5,000,000 is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, in addition to amounts authorized in the river and harbor act of January 21, 1927, to be expended under the direction of the Secretary of War and the supervision of the Chief of Engineers or for the preparation of the flood-control projects authorized in paragraph (a) of this section.

Hereafter all works for the improvement of navigation and for controlling floods of the Mississippi River, its tributaries and outlets, including surveys and investigations in connection therewith, shall be prosecuted under the direction of the Secretary of War and the supervision of the Chief of Engineers in accordance with such plans, projects, and specifications as may be approved by the Chief of Engineers, or as may be expressly authorized by Congress.

Mr. ROBINSON of Arkansas. Mr. President, the Committee on Commerce was good enough to insert in the bill a provision that has relation to this subject, which is section 8. There is an appropriation of $5,000,000 provided for "as an emergency fund, to be allotted by the Secretary of War on the recommendation of the Chief of Engineers in rescue work or in the repair or maintenance of any flood-control work on any tributaries of the Mississippi River below Cairo threatened or destroyed by flood."

Experience gained during the flood of 1927 shows the imperative necessity for a provision of this character. In addition to this provision, however, I think a further provision should be incorporated in the bill directing the Secretary of War at the earliest practicable date to prepare and submit to Congress flood-control projects for tributaries of the Mississippi River. That is the purpose of the amendment which I have proposed.

AFFAIRS IN NICARAGUA

Mr. DILL. Mr. President, the Associated Press dispatch this morning tells us that five more American marines have been killed in Nicaragua in the process of preparing the people of that country for an election there. One of the killed and one of the wounded were boys from my State. I wish to read some portions of that dispatch in order that it may be in the RECORD and that the American people in the future who wish to learn how we prepare for elections in foreign countries may be informed.

MANAGUA, NICARAGUA, March 1.—While American marines were massing in northern Nicaragua to-day, in pursuit of the Sandino rebels, eight of their comrades, wounded from ambush Monday, were under treatment in the town of Condega.

The five men killed by machine-gun rifle fire that met the marine detachment near Daraili Monday were buried near the place they fell.

The Senator from Alabama [Mr. HEFLIN] a day or two ago submitted a resolution making provision for bringing back to the United States the bodies of the dead marines. I suggest to him that he amend his resolution to include those who have died since his resolution was offered. It may be found necessary if we do not do that to prepare a bill to enable the gold-star mothers of the Nicaraguan war to visit Nicaragua in order that they may see where their sons have died and been buried.

Mr. MAYFIELD. Mr. President, will the Senator yield?

Mr. DILL. I yield.

Mr. MAYFIELD. Can the Senator advise us what disposition has been made of the resolution introduced early in the session of the Senate by the Senator from Alabama?

Mr. DILL. I presume it sleeps the sleep that has no awakening in the Foreign Relations Committee, where all such resolutions have died up to this time.

Mr. BORAH. Mr. President——

The VICE PRESIDENT. Does the Senator from Washington yield to the Senator from Idaho?

Mr. DILL. I do.

Mr. BORAH. I desire to say to the Senator that, while the resolutions referred to have not been reported, the committee has taken, I think, all the evidence that there is to be had with reference to the military operations in Nicaragua. That evidence is now in the hands of the Public Printer and will be available to the Senate and to the public perhaps within the next 48 hours.

My opinion is, Mr. President, that we have all the facts in those hearings. Admiral Latimer testified before the committee, as did General Lejeune and General Clark; and while we have not gone into the question of concessions or the financial operations of American nationals in Nicaragua, we have, in my opinion, fully exhausted the facts with reference to what took place there from a military standpoint; and those facts, as I have said, will be available to the Senate, in my opinion, in the next 48 hours.

Mr. DILL. Mr. President, may I ask the Senator before he takes his seat whether the committee has voted on any of the resolutions as to whether or not they will be reported to the Senate?

Mr. BORAH. No; the committee has not done so. I will remind the Senator of the fact that when the resolutions were first submitted we were approaching the Habana conference. The supposition was that these matters would have a hearing at Habana, where the governments of Central America, including Nicaragua and other governments, would be heard. It was thought wise upon the part of all parties, including some of the advocates of the resolutions, that the consideration of those matters should not be urged during the pendency of the conference at Habana. For that reason consideration was postponed. I will say to the Senator, however, that the committee has had this subject before it, has discussed the subject, and has interchanged views in regard to it from time to time since the resolutions were submitted. We have considered the matter at some three or four meetings of the committee.

Mr. DILL. I may say to the Senator that the newspaper reports were to the effect that the chairman of the Foreign Relations Committee had said he was satisfied with the reports and information given his committee, and that no reports or resolutions were necessary.

Mr. BORAH. In so far as the newspaper reports indicated that the chairman went further than to say that he was satisfied as to the military operations, they were in error. What I did say, and what I now say, was that in my opinion the committee has exhausted the subject so far as the military operations in Nicaragua are concerned, or so far as the doings of our Navy in Nicaragua are concerned, and I do not know of any further facts to gather upon that subject; but, as I said and I now say, we did not undertake to go into the question of concessions. The committee will take up those matters later, and I trust will act upon these resolutions in some form.

Mr. DILL. Can the Senator give us any idea when the committee will take up and vote on these resolutions?

Mr. BORAH. No; I am unable to say when it will be done, but let me say this to the Senator: I do not know of any information we can gather by hearings that we have not already got.

Mr. DILL. I am not asking for hearings; I am asking for some report of the resolution that will give the Senate an opportunity to vote on the question of whether we are going to continue to have our marines carrying on war in Nicaragua.

Mr. BORAH. There is no resolution before the committee that will determine that question, in my opinion.

Mr. DILL. There are resolutions there that if voted upon and passed by the Senate would direct the President to withdraw the marines.

Mr. BORAH. Mr. President, I do not wish to discuss that question now; but I do not know of any authority upon the part of Congress to direct the President to withdraw the marines.

Mr. DILL. I think we might well pass the resolution and see whether it will have any effect on the President. It at least would show the country where the Congress stands.

Mr. BORAH. So far as I am individually concerned, I have no desire to pass a resolution, if I feel we have no authority to act, to see what effect it will have on the President.

Mr. DILL. The Senator must remember that other Senators might differ with him in their desires, and other Senators would like to vote on such a proposition, and differ with him as to the authority.

Mr. BORAH. The Senator from Idaho was only expressing his individual view; that is all.

Mr. BRUCE. Mr. President——

Mr. DILL. We have passed other resolutions when Senators opposed to them doubted our authority to do so, but we have found that they had very desirable effects. I remember several occasions in the last two or three years when we have passed such resolutions; and I hope the Foreign Relations Committee will not take the attitude that the Senate can not vote on these questions simply because the Senator from Idaho himself thinks it is not a proper vote to cast.

Mr. BORAH. No; neither will it likely take action because the Senator from Washington thinks it proper.

Mr. CARAWAY. Mr. President——

Mr. DILL. I yield to the Senator from Arkansas.

Mr. CARAWAY. Does the Senator recall that we passed a resolution asking that the army of occupation in Germany be withdrawn?

Mr. DILL. I do not myself recall that fact.

Mr. CARAWAY. Yes; we did.

Mr. DILL. But that was the army of occupation, not the Army that was fighting.

Mr. CARAWAY. We merely requested the President to do it.

Mr. DILL. But the condition was very different there, because the Congress had declared war and sent the Army to Germany. Congress has never passed on the question of whether or not the marines should go down to Nicaragua.

Mr. CARAWAY. The Senator misunderstands me. I was referring to the question of whether the Senate should pass a resolution asking the President to do something that lay within his power. The Senate did pass such a resolution in regard to the army of occupation in Germany.

Mr. DILL. Oh, the suggestion that the Senate is without authority to do these things is the suggestion of those who do not want to meet the issue. It is always the suggestion that is raised when they do not want to face this issue. We have repeatedly voted on resolutions which Senators said the Senate had no authority to pass, such as the Denby resolution and the third-term resolution.

Mr. SHORTRIDGE. Mr. President, will the Senator permit me to ask him a question?

Mr. DILL. Yes; I yield to the Senator from California.

Mr. SHORTRIDGE. Does the Senator wish to have the marines now or immediately withdrawn from Nicaragua?

Mr. DILL. Yes; I want them withdrawn.

Mr. SHORTRIDGE. Does the Senator wish to leave American citizens, their lives and their property, at the mercy of a bandit, Sandino?

Mr. DILL. I may say to the Senate that there is no proof that the lives of American citizens are in danger; and we are not in the business of protecting the property of American citizens all over the world by having marines stationed there for the purpose of enabling our citizens to make profits by such action.

Mr. SHORTRIDGE. Permit me, then, to observe—and I may take the time later to give the details—that there was an American citizen in Nicaragua, a very prominent citizen and a very patriotic citizen, who had his property stolen and his life threatened, and was obliged to flee from the country because of this same bandit, Sandino. I wish to commend to the Senator from Washington the reading, and may I say the careful reading, of an article which appears in this week's issue of the magazine called Liberty; and if the Senator during the day or this evening, in the quiet of his study, will read that article, I express the belief that his views will be very materially modified. I commend that article to the Senator from Washington.

Mr. DILL. Let me say to the Senator that I read that article this morning before I came to the Capitol, and it was one of the reasons why I was induced to stand on the floor and make the speech I am making.

Mr. SHORTRIDGE. Then the Senator is a type of American with which I am not in sympathy, and he disappoints me greatly.

Mr. DILL. I do not care particularly about that. I do not want the sympathy of any American who would have men who are enlisted in the armed forces of the United States, to protect this country and its flag, used to protect the property of men who have made investments in a foreign land on which they are attempting to profiteer at the expense of the people of that country. [Manifestations of applause in the galleries.]

Mr. SHORTRIDGE. I want to say to the Senator from Washington that Charles Butters, of California, who went to Nicaragua lawfully, was in the peaceful possession of property lawfully acquired; that his property was stolen from him; that he was threatened with death and was obliged to flee from the country. As for me, I want the United States of America to protect such a citizen wherever he may be, whether it be in Nicaragua or in any other country on this earth.

Mr. DILL. The Senator is now arguing about the reason why the marines were sent in. A moment ago he challenged me because I was objecting to the marines being kept there; and I made the statement that the lives of Americans are not in danger, and that it is not the business of this Government to keep its troops in every part of the earth because American people may have been in danger at some time or other in the history of that country, and to enable those people to make profits on their foreign investments.

Mr. SHORTRIDGE. I wish the spirit of Andrew Jackson were a little more visible in the Senate. No American would then be robbed of his property or have his life threatened in any country or on any sea without Uncle Sam going to his defense.

Mr. DILL. I do not remember whether Andrew Jackson sent armed troops all over the earth to do all the things the Senator suggests.

Mr. SHORTRIDGE. Well, I do.

Mr. EDGE. Mr. President, the Senator suggests that he wants the marines immediately withdrawn from Nicaragua. Does the Senator believe that this country should repudiate a solemn contract entered into with the leaders and representatives of both political parties in Nicaragua and recall the marines after agreeing with these accredited representatives that we would use our best offices to try to see that they should have a fair election?

Mr. DILL. I am not going to enter into any argument with the Senator about that other than to say that that agreement was made with one band of men who could not keep control down there without the use of the armed forces of this country, and with the leaders of the other band, whom they bought off by paying them for their ammunition and their guns, and others whom they forced to sign the agreement. I do not consider it a legal contract in any sense; and I would have the marines bring out those Americans who might be in danger and let the people of Nicaragua run their own Government.

Mr. LA FOLLETTE. Mr. President——

Mr. EDGE. In other words, the Senator would repudiate a solemn contract made on behalf of the President of the United States with the representatives of both political parties, withdraw the marines, and encourage a renewal of the bloodshed that was happening up to the time the armistice was signed?

Mr. DILL. It will not be American blood shed, and that is what I am objecting to. I am objecting to the spending of American lives to buy profits for men who have made investments in Nicaragua.

Mr. LA FOLLETTE. Mr. President——

Mr. EDGE. Certainly the present understanding with Nicaragua has nothing whatever to do with concessions and nothing whatever to do with investments. It is a plain, clear, thoroughly understandable proposition that we will offer our best offices to try to bring about the one thing that everyone, as far as I have been able to find out, hopes can be brought about—a fair expression of opinion of the Nicaraguan people as to who shall be President of that Republic. If we withdraw our marines to-day, we leave that country with a chaotic condition; we repudiate our own obligations; we put ourselves in an absolutely indefensible position before the world.

Mr. DILL. Let me say to the Senator it is never too late to do right.

Mr. SMOOT. Mr. President, I ask for the regular order of business.

The VICE PRESIDENT. The introduction of bills and joint resolutions is in order.

Mr. DILL. Mr. President, I started to read an article, and I think I might be permitted to finish that article. It affects boys killed in Nicaragua who come from my State.

Mr. BORAH. I ask unanimous consent that the Senator be permitted to read the article.

Mr. SMOOT. All I want to do is to carry out the unanimous-consent agreement which was made yesterday.

Mr. BRUCE. Mr. President——

Mr. DILL. I do not yield.

Mr. BRUCE. I am not asking the Senator to yield. The Senator from Idaho is asking unanimous consent that the Senator from Washington be permitted to proceed, and I think the Senator will feel just a little ashamed of himself when I say that I rose for the purpose of seconding the motion of the Senator from Idaho that the Senator from Washington be allowed to proceed.

Mr. DILL. I thank the Senator.

Mr. SMOOT. I have no objection to that, providing the Senator just reads the article, and then we can take up morning business. We have a unanimous-consent agreement that we would take up the calendar this morning; and I do not want to have the whole two hours spent on a question that is not before the Senate.

The VICE PRESIDENT. Without objection, the Senator from Washington will read the article.

Mr. DILL. I appreciate the courtesy, and if I had not been interrupted I would have finished long ago.

Mr. SHORTRIDGE. Mr. President, may I ask the Senator to permit me just one question?

Mr. DILL. I can not yield to the Senator.

Mr. SHORTRIDGE. The Senator declines to yield?

Mr. DILL. I can not yield, because permission was granted that I might read the article, and if I do yield I will get into an argument with the Senator.

The eight wounded, one of them in a serious condition, were transported to Condega, having been given emergency treatment en route by a medical officer who joined the pack train yesterday. The men will be held at Condega until they can be moved either to Esteli or Ocotal, marine bases, 30 miles away.

WILL BE MOVED TO CAPITAL

As soon as their condition permits they will be transported by airplane to Managua. Condega has no landing field, but Ocotal and Esteli have.

As soon as word of the encounter was received three detachments of marines were sent from points in the vicinity. Capt. William K. MacNulty, of the Eleventh Regiment, who was on another mission with 85 men, also joined forces with Lieut. Edward F. O'Day, leader of the ambushed patrol.

Three marines were killed in the action and two died from their wounds. Those slain were Pvts. John C. Pump, Council Bluffs, Iowa; George E. Robbins, San Antonio, Tex.; and Albert Schlauch, Jamestown, N. Dak.

TWO DEAD FROM WOUNDS

Those who died from their wounds were Corpl. Cicero D. Austin, Crockett, Tex., and Pvt. Curtis J. Mott, Trenton, Wash.

Pvt. Lem C. Davis, Nixon, Tex., was seriously wounded, being shot in the left shoulder.

Those slightly wounded were Sergt. Wilbourn C. Christian, Northport, Ala., shot in hip; Sergt. Charles Hisham, Longmire, Wash., shot in thigh; Pvt. Lewis E. Ballard, Troy, N. Y., shot in foot; Pvt. Raymond B. Carter, Payson, Utah, shot in leg; Pvt. Peter C. Crum, Omaha, Nebr., shot in foot; Pvt. Linton C. Maynard, Ranger, Tex., shot in elbow; and Pvt. Clarence E. Phelps, Portland, Colo., injuries not stated.

FIRST WORD IN FIVE WEEKS

SAN ANTONIO, TEX., March 1.—A newspaper dispatch saying that George E. Robbins had been killed with four other marines in the Nicaragua ambush was the first word his mother, Mrs. Agnes Robbins, of this city, had received of her son in five weeks, she said to-day. Robbins enlisted here October 12. Three sisters and a brother live in Houston, Tex.

COUNCIL BLUFFS, IOWA, March 1.—John C. Pump, Council Bluffs, killed in action in Nicaragua, enlisted in the Marine Corps last October.

The last word his parents, Mr. and Mrs. Emil A. Pump, had from him was a letter from San Diego, Calif., dated January 7, in which he said his company was embarking for Nicaragua.

Pump was graduated from high school at Denison, Iowa, and studied law for two years at Creighton University, Omaha.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. REED of Pennsylvania:

A bill (S. 3458) to create the reserve division of the War Department, and for other purposes; and

A bill (S. 3459) to amend an act of Congress approved March 4, 1927 (Public, No. 795, 69th Cong.), to provide for appointment as warrant officers of the Regular Army of such persons as would have been eligible therefor but for the interruption of their status, caused by military service rendered by them as commissioned officers during the World War; to the Committee on Military Affairs.

By Mr. SACKETT:

A bill (S. 3460) granting a pension to Harriett Morgan (with accompanying papers); and

A bill (S. 3461) granting a pension to James F. Taylor (with accompanying papers); to the Committee on Pensions.

A bill (S. 3462) granting the consent of Congress to the Maysville Ohio River Bridge Co., and its successors and assigns, to construct a bridge across the Ohio River at or near Maysville, Ky.; to the Committee on Commerce.

By Mr. CAPPER:

A bill (S. 3463) to recognize commissioned service in the Philippine Constabulary in determining rights of officers of the Regular Army; to the Committee on Military Affairs.

By Mr. WHEELER:

A bill (S. 3464) granting a pension to Rudolph Lange; to the Committee on Pensions.

A bill (S. 3465) for the relief of Charles Parshall, Fort Peck Indian allottee of the Fort Peck Reservation, Mont.; to the Committee on Indian Affairs.

By Mr. SMOOT:

A bill (S. 3466) to amend the naval record of Edwin Rodman; to the Committee on Naval Affairs.

By Mr. WAGNER:

A bill (S. 3467) for the relief of Thomas Vincent Corey; to the Committee on Naval Affairs.

By Mr. NYE (by request):

A bill (S. 3468) to accept the cession by the State of California of exclusive jurisdiction over the lands embraced within the Lassen Volcanic National Park, and for other purposes; to the Committee on Public Lands and Surveys.

By Mr. CURTIS:

A bill (S. 3469) authorizing the payment of war-risk insurance to Alice M. Smith and E. R. Smith (with accompanying papers); to the Committee on Finance.

A bill (S. 3470) granting a pension to Mary M. Baldwin (with accompanying papers);

A bill (S. 3471) granting an increase of pension to Lou Milburn (with accompanying papers);

A bill (S. 3472) granting an increase of pension to Martha A. McLin (with accompanying papers);

A bill (S. 3473) granting an increase of pension to Jennie McClaury (with accompanying papers);

A bill (S. 3474) granting an increase of pension to Emma L. Kennedy (with accompanying papers);

A bill (S. 3475) granting an increase of pension to Sarah S. Ewing (with accompanying papers);

A bill (S. 3476) granting an increase of pension to Annie Earnest (with accompanying papers);

A bill (S. 3477) granting an increase of pension to Maggie J. Miller (with accompanying papers); and

A bill (S. 3478) granting an increase of pension to Sarah Shuck (with accompanying papers); to the Committee on Pensions.

By Mr. COPELAND:

A bill (S. 3479) to carry out the findings of the Court of Claims in the cases of labor performed in excess of 8 hours per day at certain navy yards; and

A bill (S. 3480) for the allowance of certain claims for extra labor above the legal day of 8 hours at certain navy yards certified by the Court of Claims; to the Committee on Claims.

By Mr. DENEEN:

A bill (S. 3481) granting an increase of pension to Thomas E. Roberts; to the Committee on Pensions.

By Mr. BAYARD:

A bill (S. 3482) granting a pension to Nellie Hayman (with accompanying papers); to the Committee on Pensions.

By Mr. HARRIS:

A bill (S. 3483) for the relief of the heirs of W. H. May, deceased; to the Committee on Claims.

By Mr. REED of Pennsylvania:

A joint resolution (S. J. Res. 106) to amend Public Resolution No. 65, approved March 3, 1925, authorizing the participation of the United States Government in the International Exposition to be held in Seville, Spain; to the Committee on Foreign Relations.

COTTON PRICES

Mr. SMITH. Mr. President, I desire to give notice that on Wednesday next the hearings on Senate Resolution 142 will begin in the Agricultural Committee room in the Senate Office Building.

Mr. McKELLAR. Will the Senator state the subject of the resolution?

Mr. SMITH. It is the resolution for an investigation of the cotton market. I shall be glad to have the press give as great publicity as possible to this announcement, so that any interested parties who desire to give testimony may govern themselves according to this notice.

NATIONAL ORIGINS DECEPTION

Mr. NYE. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial appearing in the St. Paul Pioneer Press under date of February 29, 1928, under the heading "National-Origins Deception."

The VICE PRESIDENT. Is there objection?

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

NATIONAL-ORIGINS DECEPTION

Accompanied by a fanfare of trumpets to disguise its deception, what purports to be a revision of immigration quotas is put before the Senate. The new figures are calculated to pave the way for the revolution in restrictive immigration under the alluring title of "national origins," which is to go into effect next July but against which a swelling protest is rising.

The change was postponed by Congress once before, because of the preposterous results in immigration control that it would introduce.

The new juggling turns out to be hardly better than the old. It would have the same result of shutting down on north European immigration which has proved most valuable in building of the country. It would slam the door in the face of desirable immigrants from Scandinavian and Germanic countries and increase only British. America certainly never intended anything like that when it took up the policy of restricting immigration four years ago.

The proposed new quota figures are put forward in such a way as to create an impression that Nordic allotments are to be increased over their present numbers. If this is done deliberately, it is deceptive and fraudulent. The fact is that if the so-called national-origins system is permitted to go into effect next July the quotas of Sweden will be reduced from the 9,561 of present schedules to 3,399; of Norway from 6,453 to 2,403; of Germany from 51,227 to 24,908; of the Irish Free State from 28,567 to 17,427.

By a sly joker, which has been generally overlooked, the advocates of closing America's doors as completely as possible to new blood will contrive to reduce total immigration by about 30 per cent. The present quota of Great Britain and North Ireland is 34,007. But actual immigration from those countries is only about 24,000 a year. They do not nearly use up the existing quota, yet it is proposed to almost double Great Britain's present allotment, making it 66,000, or nearly three times as many as seek to come in.

The national-origins system would supposedly admit 150,000 immigrants a year from all Old-World countries. But by the allotment of 40,000 more to Great Britain than that country can use, the actual immigration allowed would be cut down close to 110,000 a year. This is a crafty method of juggling figures to raise the bars against even the most desirable races. It is fanaticism, 100 per cent Americanism, and insidious bigotry carried to the extreme.

In 1924, when the present immigration law was passed, the so-called national-origins plan of regulating newcomers was adopted. A total of 150,000 immigrants a year was fixed as the maximum. These would be divided among countries of the world, not including North and South America, in the same proportion which persons tracing their origin to that particular country and already in the United States bore to the total American population in 1920.

But lack of official records made the task of tracing nationalities back to the beginning of American Government so difficult that the national-origins clause was postponed and the present quota system temporarily substituted.

A committee of three Cabinet members was designated meantime to work out the new allotments. That committee made its first report last year, submitting certain estimates of new quotas from each country, but adding the extraordinary statement that due to the haphazard methods necessarily employed in arriving at the figures it would refuse to assume responsibility for its own work. Thereupon, operation of the national origins clause was again postponed until June 30, 1928, and the same Cabinet committee has now submitted another report, with revised figures.

It is this second guesswork compilation that is proclaimed in Washington dispatches as giving increased immigration quotas to so-called Nordic races. In reality it is merely a comparison between last year's disowned schedules and this year's renewed attempt at figure juggling without accurate data on which to base the allotments. The new figures are not a comparison with quotas now in use. The much-heralded increases for northern races are in reality harshly restrictive decreases for those very races who have built up Minnesota and the Northwest. Sweden, Norway, Germany, Ireland, all are radically reduced in numbers of their people who may come into America. Only the British, who are well content at home and in their colonies, have the door of opportunity opened wider for them, a door which they do not care to enter.

Congress will do a good day's work if it throws the national origins clause out of the window.

CALF-LEATHER INDUSTRY

The VICE PRESIDENT. The Chair lays before the Senate a resolution coming over from the previous day, Senate Resolution 163, submitted by the Senator from New York [Mr. COPELAND].

Mr. COPELAND. Mr. President, yesterday the Senator from Utah [Mr. SMOOT] asked that the resolution go over for a day.

Mr. SMOOT. I will say to the Senator that I have not yet received the information asked for, but if the Senator wants to have the resolution passed, I shall not object this morning. I think the information is already in the hands of the Tariff Commission, and it will take only a short time to report it.

The VICE PRESIDENT. The question is on agreeing to the resolution.

The resolution was read and agreed to, as follows:

Resolved, That the United States Tariff Commission is hereby requested to investigate and report to the Senate the extent of sales of foreign calf leather in the United States since January 1, 1925, and the rates of wages paid calf tannery workers in the United States and competing countries.

MESSAGE FROM THE HOUSE—ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the Speaker had affixed his signature to the following enrolled bills and joint resolutions, and they were subsequently signed by the President pro tempore:

H. R. 5818. An act authorizing J. H. Peacock, F. G. Bell, S. V. Taylor, E. C. Amann, and C. E. Ferris, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near the city of Prairie du Chien, Wis.;

H. R. 7201. An act to provide for the settlement of certain claims of American nationals against Germany, Austria, and Hungary, and of nationals of Germany, Austria, and Hungary, against the United States, and for the ultimate return of all property held by the Alien Property Custodian;

H. R. 7948. An act to extend the times for commencing and completing the construction of a bridge across the Delaware River at or near Burlington, N. J.;

H. R. 9136. An act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1929, and for other purposes;

H. R. 10298. An act to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near New Orleans, La.;

H. R. 10635. An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1929, and for other purposes;

S. J. Res. 88. Joint resolution authorizing the erection on public grounds in the District of Columbia of a stone monument as a memorial to Samuel Gompers;

H. J. Res. 141. Joint resolution to authorize the President to invite the Government of Great Britain to participate in the celebration of the Sesquicentennial of the Discovery of the Hawaiian Islands, and to provide for the participation of the Government of the United States therein; and

H. J. Res. 223. Joint resolution making an additional appropriation for the eradication or control of the pink bollworm of cotton.

THE CALENDAR

The VICE PRESIDENT. Under the unanimous-consent agreement, the Senate will proceed to the consideration of unobjected bills on the calendar, beginning with Calendar No. 317.

The bill (H. R. 7030) to amend section 5 of the act of March 2, 1895, was announced as the first bill on the calendar, beginning at the point reached on the last call.

Mr. ROBINSON of Arkansas. Mr. President, I think there should be an explanation of this bill, particularly in view of the fact that no report appears to accompany it. In the absence of the chairman of the Committee on Post Offices and Post Roads, who reported the bill, I think it should go over.

The PRESIDING OFFICER (Mr. FESS in the chair). The bill will go over.

Mr. KING. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. KING. When we ceased working upon the calendar the last time, the Senate was considering Order of Business 316, the bill (S. 3194) to establish the Bear River migratory-bird refuge.

The PRESIDING OFFICER. The unanimous-consent agreement entered into yesterday was that the Senate should begin the consideration of unobjected bills on the calendar, starting with Order of Business 317. The bill to which the Senator from Utah refers was objected to when reached on the last call, the Chair is informed.
